In the middle and late twenties promotion was very slow; pay and allowances were at a minimum. The country had recently gone all-out to support a war that people were told was a war to end all wars. The need for an army then was not a matter of general concern. The future for anyone in the Army was dim. A member of my class made detailed computations of the probable future of the Class of '25, USMA, in the Army. His findings were that the top members would retire as Lieut. Colonels at the age of 64; the lower part of the class as Majors. Events in the world changed this.

About a half of my class resigned in the first few years after graduation.

During that time, I received my Professional Degree in Engineering at Government expense. Soon after, the head of a large corporation offered me a position in its management structure at three times my Army salary as a 2nd-Lieut. I showed the letter to my wife. (By then, we had a little son also.) She said, "What did you go to West Point for?" I tore up the letter. I've never been sorry. Our philosophy as applied to me continuing as a United States Soldier dictated the correct answer.

Today, we read articles from Sergeants to Generals deploring the "slights" to our Army today: post exchanges, commissaries, medical attention, pay, inadequate allowances, housing, low value of the Dollar in Germany, overseas tours without families, field duty, long hours, requirements of high standards of training, etc., etc.

Still there are very few who list the present advantages of an Army career for good and competent officers and men. There are few who point out that the Army wins its country's battles through confident, enthusiastic, cooperative fighting and support teams—not through individuals. Such teams are not organized, coached and produced by a negative philosophy or by a defeatist attitude. Taking counsel of fears, rumors, and/or present and anticipated problems is not the basis for victory or a bright future for soldiers.

Many of these deadening attitudes can be alleviated within ourselves, our units and our Army. We don't have to depend upon the American public, the Congress, the Pentagon, or the Administration to issue all the solutions to us.

The Army today is concerned about a small minority who believe a "union" can take care of all its individual and collective problems. This is a false hope on their part. Besides, there is no place in the national military concept or requirements for such a "union" to act; especially in time of danger or crisis to our Country. We must be constantly prepared to handle such contingencies during peace time. Adequate readiness will admit of no lesser standard.

We have many professional organizations of active and retired military officers and men that are working hard to help overcome the inequities and shortcomings of the soldier's lot. They properly do not hesitate to bring them to the attention of the Administration and the Congress, where they must be handled, based upon an enlightened attitude of our people. I suggest strongly supporting such organizations. They act by furnishing information and persuasion—but not through "unionized" pressure and force. There is no place for this latter in a military organization, supported by the Public for serving our Country in time of danger and crisis.

The officers and men of the Army have the advantage of the finest school system of any army in the world. This system, from its non-commissioned officers academies through its Branch and Special Schools, The Command and General Staff College and the Army and National War Colleges, enables the Army to provide leaders and commanders from the squad or crew to the Chief of Staff, in an integrated chain of command, trained to do what is best in training, handling and employing our units, organizations and their officers and men. At every echelon, they are charged to take an interest and to look after the welfare of their men, and their problems. Industry has no such formal set-up for looking after its men; nor can a union provide such service to its members.

Good morale is most important to a soldier. It comes from (1) a feeling that he is important, (2) that he does his duty well, and (3) that his good work and sacrifices are appreciated. The appreciation item is very important. Unfortunately, it does not come in equal amounts in periods of peace and

war. It is too often overlooked. However, in looking back over my 44 years in uniform, I am sure I received a total of all the appreciation I deserved.

I believe most soldiers can find confidence and enthusiasm for service to their Country in a philosophy based upon the foregoing. Those who cannot, should consider finding a "better way of life" in some other calling; they are not contributing their best to our Country's need for an outstanding and ready Army.

EQUAL RIGHTS AMENDMENT RATIFICATION

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. DERWINSKI. Mr. Speaker, as proponents of the ERA push for ratification before the March 1979 deadline, their efforts have become somewhat excessive and compulsive.

Chicago's station WMAQ-TV points out, in an editorial broadcast on November 6, that advocates of the ERA are not using proper judgment in their approach and are actually jeopardizing support for their cause. As I concur with the comments made in this editorial, I wish to insert it in the RECORD at this time for review of the Members:

WMAQ-TV EDITORIAL

We support the Equal Rights Amendment. We've said that many times. Most of the arguments against ratifying the E.R.A., in our opinion, makes little sense.

But the E.R.A. has not yet been ratified and its supporters are showing signs of desperation. For it to become part of the United States Constitution, it needs the approval of the legislatures of 38 states. It now has 35 and Illinois is not one of them.

The present deadline for approval is March, 1979. Otherwise, it is dead. E.R.A. proponents are now trying to get more time and the Justice Department has ruled that Congress has the authority to give E.R.A. an extra seven years.

In this instance, the E.R.A. supporters have gone through legal channels and Congress will make the decision.

But another approach shows signs of overzealousness. Some E.R.A. crusaders are promoting economic boycotts of states where E.R.A. has not been approved. The National Organization for Women is using heavy-handed methods to convince national organizations not to hold conventions in those states. There's one estimate this has cost Chicago $15 million in convention and tourist business.

We consider this a wrongheaded approach that could backfire. Certainly there is no direct relationship between business meetings and legislative action on E.R.A.

Political pressure is fine. There's nothing wrong with individuals and organizations lobbying legislators and trying to elect candidates who support E.R.A.

But it is madness to try to keep business away from states that have not okayed E.R.A. Someone suggested these women are emulating the Arabs and their oil boycott. Maybe they figure they have the same rights as the Arabs.

REGULATING THE GROWTH RATE OF MONEY TO COMBAT INFLATION

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. OBERSTAR. Mr. Speaker, today I am introducing a bill to amend the Federal Reserve Act of 1935, to provide for the regulation of the growth rate of the money supply and reduce the rate of inflation over the course of the next 4 years.

Inflation is costly. We feel its costs in the reduced value of savings, diminished purchasing power for those on fixed incomes, income lost as people are pushed into higher and higher tax brackets, and lack of confidence in the economy on the part of businessmen and consumers alike.

Inflation is at least partly the result of the money supply growing at a faster rate than the supply of goods and services in the economy. Real growth in the United States has averaged about 3 to 3½ percent per year but the money supply has recently been growing at a 9-percent rate and the difference in the growth rates shows up as inflation which is currently 6 percent. The only realistic long-term solution to the problem of inflation is to reduce the growth rate of the money supply.

Terms such as cost-push inflation and wage-price spiral are misleading. Inflation begins by increasing the growth rate of the money supply. As the additional dollars are distributed through the economy the initial impact is a business upswing: People have more dollars to spend. When it becomes apparent that there are only more dollars, not more goods and services, the prices of the existing goods and services are bid up, resulting in inflation. But prices do not exist just for retail goods; labor and raw materials have prices, too, and these are also bid up as manufacturers try to maintain sufficient supplies to keep up production. The important factor is that it takes time for all the sectors to make adjustments in their respective prices. As the excessive growth rate of the money supply continues, the different sectors must continue to make adjustments in their prices. This creates the appearance of a cost-push inflation or a wage-price spiral but in fact it is still the direct result of continued excessive growth rate of the money supply.

Inflation also raises interest rates. The interest rate is the price of credit; during a period of inflation it must reflect not only the price of credit but the inflation rate as well. Another factor contributes to high interest rates during periods of inflation: The tax shift. In the United States the whole nominal interest payment increases the taxable income of the lender and reduces the taxable income of the borrower, thus the interest rate must reflect this shift in the tax burden.

Unfortunately, it is not very easy, nor is it wise to suddenly cut the growth rate of the money supply. Just as a sudden increase in the growth rate of the money supply will have a temporary boom effect on the economy, so will a sudden decrease have a recessionary effect. There are two aspects of the recessionary effect of a decrease in the growth rate of money, both of which can be overcome as they are in this bill. The first and most important is the size of the decrease. If the decrease is large, the recessionary impact will be large; but if the growth rate of money is decreased in a series of small steps, most of the recessionary impact can be avoided.

The second aspect of the recessionary impact is lack of information and its consequences. Monetary policy in the past has generally come as a surprise to the economy, therefore requiring a substantial period of time for the economy to adjust to the new growth rates of money. If monetary policy were required to follow specific growth rate guidelines, then informed businesses and consumers could make the necessary adjustments in production and consumption levels to avoid the usual pattern of over-production and under-consumption that acts as a bottleneck in the economy and causes unemployment to rise.

This bill will require the Federal Reserve System to follow specific growth paths of money which will bring about an orderly reduction in the inflation rate without the recessionary impact that has historically accompanied attempts at reducing inflation. Because the growth rates of money will be gradually reduced over a 4-year time period, no significant impact on unemployment is to be expected. Also, since the business community and consumers will be aware of the succeeding reductions in the growth rate of the money supply, the lag that usually occurs in reducing the inflation rate will be reduced from 2 years to 1 year.

This act will by no means handcuff the Federal Reserve System. By mandating that the Fed follow specific growth paths within plus or minus 1 percent rather than follow specific growth rates, we retain the flexibility the Fed needs to respond to temporary, short run fluctuations in the money market. But the longer term result will be to require the Fed to follow the growth path of the money supply established by this act.

As a result of this act, the inflation rate will show a steady decline. The inflation rate for 1977 is expected to be about 6 percent. A modest slowing of this inflation rate would occur in 1978 and by 1979 would drop to about 4 to 5 percent. Continued decreases in the inflation rate should be expected, with inflation for 1980 forecast at 2 to 3 percent; for 1981, 1 to 2 percent and by 1982 inflation will have declined to 0 to 1 percent.

The overall impact on the economy of reducing the rate of inflation would be most beneficial. Increased confidence in the level of interest rates will encourage more investment by business in equipment and consequently more jobs. Consumer borrowing for the purchasing of new homes will rise, thereby providing more jobs in the housing industry. Fur-

thermore, the dollar on the international market will be strengthened by increased confidence in the dollar by overseas investors.

Increasingly, Americans have worried about the effect of long-term inflation on the continued economic growth of this country. Ours is not an economy condemned to permanent high inflation. This bill can eliminate the long-term inflationary trend of the economy that has been built in by monetary policy of the last 15 years. The bill also introduces a new concept into our national monetary policy formulation: making monetary growth a matter of national policy.

This bill is very much in harmony with the intention of President Carter to have a balanced budget by 1981. By reducing inflation, the bill will encourage the increased investment that is necessary to achieve and sustain the growth required to reach the goal of a balanced budget.

It is my sincere hope that this Congress will make every effort necessary to fight inflation. By asserting the leadership of the Congress in meeting and solving the problem of inflation, we can inspire confidence of the American people in their government's ability to solve the many other pressing problems of our society.

I commend to my colleagues the following article by Lindley H. Clark, Jr., in today's Wall Street Journal, which directly addresses the money supply-interest rate issue in a clear, concise, informative manner:

INTEREST UPROAR

(By Lindley H. Clark Jr.)

In principle just about everybody favors low interest rates. Low rates make it less expensive for businessmen and consumers to finance their spending and thus to keep the economy growing. The arguments center on the cause of high rates—and the cure.

In recent months the cause, in the view of many critics, has been the Federal Reserve System. Since spring short-term interest rates have risen by nearly two percentage points, a swift rise in so short a period. The interest rate increase has helped to spur demands, in Congress and the administration, that Mr. Carter replace Fed Chairman Arthur Burns when his term expires on Jan. 31.

But is the Fed really the rate-booster it's cracked up to be?

One interesting fact is that interest rates, both long and short-term, are still below the levels of mid-1975. The business recovery is nearly three years old. The economy has been expanding at rates well above the post-World War II average, and the demand for credit has been accelerating.

Interest rates, after all, are merely the price of credit. Looking back over other postwar recoveries it's impossible to find one where interest rates at this stage were still below early-recovery levels.

From the viewpoint of business-cycle history, then, interest rates are "low," not "high."

Even if interest rates were high, there would be little the Federal Reserve could do about it quickly. The Fed has a powerful influence on one interest rate—the rate charged for federal funds, the funds that banks lend one another for short periods of time.

Member banks of the Reserve System are required to hold reserves against the deposits on their own books. Most of these reserves consist of deposits with their regional Reserve Banks. From time to time these deposits are either larger than required or smaller; at such times a bank with excess reserves may lend them—federal funds—to a bank with insufficient reserves.

Basically, the interest rate on such funds is determined by those old friends, demand and supply. The Fed can't do much about demand, but it can raise or lower the supply.

If it wants to raise the supply it can buy Treasury securities in the open market. The Fed pays for the securities in effect by writing a check on itself. When the Fed's check is presented for payment the reserves of the commercial banks are increased. The supply of federal funds grows.

The increased reserves of the banks permit an expansion of their loans and investments. The funds the banks lend or invest eventually wind up in someone's bank account and the supply of money grows.

This year, while the federal funds rate and other short rates have risen by two points, the money supply—currency and checking accounts—has grown at an annual rate of around 9%. That kind of money growth is well above the Fed's own targets and totally inconsistent with long-term price stability.

In other words the Fed, by fighting the rise in short rates, has permitted an inflationary growth of the money supply. The real surprise so far is that the Fed's actions have had so little impact on inflation expectations.

Lenders, either long or short-term, have to take inflation into account. They have to recognize that the dollars they lend today may not be worth as much when they get them back a few months or a few years from now. Realistically, you would expect both long and short rates to be higher than they are.

One factor limiting inflation expectations presumably has been the recent trend of price indexes. After sharp increases during last winter's cold weather, the consumer price index has settled down to an annual rate of less than 4% for the past three months.

Another limiting factor, presumably, has been Arthur Burns's rhetoric. The chairman has deplored the recent money-supply growth, professed not to fully understand it and promised to do something about it. It is a tribute to the credibility that he has built up over a long career that many people seem to believe him.

This pleasant state of affairs, however, can't last. Money-supply growth does not have an instant effect on inflation. The time lag will vary, but excessive money growth usually means swifter price increases about two years hence.

If the Federal Reserve continues to fight the rise in short-term rates it will permit the continuing expansion of the money supply—and assure an acceleration of inflation toward the end of next year or early in 1979. Credit demand is strong and seems likely to continue strong for some months to come.

Sooner or later, I submit, everyone is going to recognize that more inflation is on the way. Long-term interest rates will start climbing if the Fed continues to try to hold down short-term rates. Even the battle against rising short-term rates eventually will be lost.

The cure for high interest rates is easy to spell out and, politically, difficult to execute. The Fed simply has to get a grip on monetary expansion. Over a period of time the money supply should grow at a rate about equal to the economy's ability to expand its productive capacity. If money grows faster than that for very long, we get inflation. If it grows more slowly than productive capacity the result is deflation.

It's impossible to predict what will actually happen. After next Jan. 31 the country may lose even Arthur Burns's rhetoric. The chief factor in recent interest rate increases has been a strong economy. If the Fed lets the money supply continue to grow at recent rates, however, it will deserve the blame for what happens to rates in 1978 and 1979.

THOSE MEXICAN ABORTIONS: SOME NEW LIGHT

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. OBERSTAR. Mr. Speaker, President Carter has been criticized—unfairly, I think—for his firm stand in opposition to Federal funding of discretionary abortions under medicaid. During his press conference a few weeks ago, he was confronted with a question which, though doubtless well-intentioned, was at least melodramatic and perhaps out of place. Nonetheless, Mr. Carter fielded it well.

It concerned allegations—which were unfortunately treated as fact by the press—that a Texan woman had died as a result of a Mexican abortion, to which she had resorted because medicaid would not cover the costs of an abortion in this country. To his credit, President Carter did not flinch or budge an inch from his previous position when he was confronted with this highly suspect incident.

Now additional information has come to light concerning it which, I believe, vindicates the President's position on this issue. According to information reported in today's Washington Post, the incident may have been manufactured by overly zealous Federal officials at HEW's Center for Disease Control in Atlanta, the same Federal agency which, a year or so ago, was referring to unwanted pregnancy as a venereal disease!

Because this is such a serious matter, I have asked Secretary Califano to take steps to investigate the role the Center for Disease Control has played with regard to this controversial issue. It would be most unfortunate if a Federal agency were proven to have been less than candid with the public and the Congress on so critical an issue.

In the hope that this incident will serve to impress upon us all the seriousness of the abortion issue and will heighten our sensitivity to the fragile human lives which it touches, I recommend to my colleagues the following story from the Washington Post of November 28:

DOUBTS ARISE ABOUT ABORTION "MARTYR"

(By Bill Peterson)

A woman portrayed as a martyr when she died from an illegal abortion after Medicaid funds were cut off may have been simply trying to keep her pregnancy a secret when she slipped across the border to have the operation performed in the back of a Mexican pharmacy.

That possibility has been raised by the woman's personal physician and the head of a Planned Parenthood clinic where she had been a client before she died Oct. 2 in McAllen, Tex.

Both said in interviews that they would have arranged a free or low-cost legal abortion for the unmarried, 27-year-old woman if she had sought their help—which she didn't.

Furthermore, the physician, Dr. Homero Rivas, said that in 1975 the woman had not sought a Medicaid abortion, for which she was eligible, when she was also pregnant out of wedlock.

Rivas and Lila Burns, who directs a Planned Parenthood clinic, said it is common for women in the area to seek cheap illegal abortions across the border in Mexico to keep friends, neighbors and relatives from finding out about them.

"We had this problem long before Medicaid abortions and we'll have it long after them," said Rivas.

Reports that the woman's death might not have been linked to the cutoff of funds for government-paid abortions first appeared in Ob. Gyn. News, a medical newspaper for obstetricians and gynecologists published in Bethesda.

In a copyrighted story in its Dec. 1 issue, the newspaper said investigators from the Center for Disease Control in Atlanta knew the woman "had gone to Mexico for another abortion two years ago" but disregarded this information "without making it public."

Dr. Julian Gold, who headed a four-member CDC team that investigated the case, conceded in an interview that he knew the woman had been pregnant in 1975, but said investigators could not establish if she had an abortion in Mexico, or elsewhere.

Gold's report said that this year when the woman "indicated to her physician that she might be pregnant, he informed her that Medicaid no longer paid for abortions. She subsequently obtained an induced abortion in Mexico."

The Mexican-American woman, the mother of a four-year-old daughter, died Oct. 2, six days after being admitted to a McAllen, Tex., hospital with chills, fever, anemia and jaundice.

The incident led to widespread outcries in Congress and in the press over the cutoff of Medicaid funds for abortions. A memorial service was held in Washington for the woman at which one spokesman said: "The only thing that stood between her and life was a Medicaid card that wouldn't buy her an abortion she chose to have."

Gold said he still stands behind his report. He based his conclusions on extensive on-site interviews, particularly one with a cousin of the dead woman. "He had spoken to her a day or two before she went to Mexico and he said she went there because of the cutoff," he said.

Four other women, two of whom carried Medicaid cards, also suffered complications requiring hospitalization after illegal abortions at the same bordertown pharmacy. Only one of the four talked with investigators; she told them she had gone to Mexico to keep the matter secret.

Neither family physician Rivas nor Planned Parenthood official Burns talked to the dead woman about her reasons for going to Mexico. Burns said she believes the woman wanted to protect her privacy because she's certain that she knew free or low-cost abortions were available through the Planned Parenthood clinic.

"It's only speculation," she added. "Who knows why someone goes to Mexico for an abortion? Is it money? Or is it that they don't want anyone to know about it?"

The abortion the dead woman received in Reynosa, Mexico, reportedly cost $40. The going legal rate for abortions in McAllen is said to be from $200 to $250.

SOUTH HIGH ORIOLES 1977 FOOTBALL CHAMPS

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, the city of Pittsburgh public high school football champions were crowned on Saturday, November 5, when the South High Orioles beat the Westinghouse Bulldogs 22–0.

The victory was a fitting conclusion to the career of South Head Coach Glenn Miller who is retiring this year after 30 years as a high school teacher and coach.

I want to extend my congratulations to the South High team, Coach Miller, the students and fans of South High, and the people of Pittsburgh's southside who loyally backed the team throughout the season.

I would also like to include in the RECORD at this time several articles, which appeared in the South Pittsburgh Reporter, describing South High's winning season.

THEY COULDN'T—BUT THEY DID!

Nobody thought they could do it. Not the major news media, which early in the season picked Westinghouse and Peabody as the top contenders, and grudgingly granted South High's Orioles lines of space while other teams got major feature stories; or passing mention on television sports casts; not the local oddsmakers who picked Westinghouse by two touchdowns; not the scoffers who said "No Way." Nobody thought it was possible but a squad of dedicated boys who loved the game and played to win; a team of coaches who showed they could pull out of the clinches with plays that never should have worked; a head coach who seemed to walk around with a black cloud over his head during most of his 30-year career.

And they did do it.

Near the beginning of the season, a reporter asked coach Glenn Miller if the fact that this was to be his last season would have any influence on the performance of his team. "No way," he said. "I don't believe in this 'Win one for the Gipper' thing. If my boys (always 'my boys') win, it will be because they have what it takes to win and they deserve the victory."

Maybe he was right, but it seems evident in the comments of some of the players after the championship game that they did want this one extra badly because it was Miller's last season.

But whatever the reason, they did it. And they have made their teachers, their parents, their community proud.

Too often, people from all over the city look down on the South Side. They think we're a bunch of losers, whether in sports, community improvements, or whatever.

But over the past few years, these same people are beginning to change their opinions. The boys from the championship Oriole team, the cheerleaders, majorettes, band and color guard who helped to keep the spirits high, have done a great deal to improve the image of the South Side. The conduct of the fans at all the games, but especially during the play off and championship, added to that positive image.

It is to these fine young people and their adult mentors that we dedicate this issue.

We're proud of you, yes. But more importantly, we love you. You are our future, and we are confident that you will continue to bring pride and accomplishments to your community.

GLENN MILLER: A VERY SPECIAL PERSON

(By Carl Antosz)

The convincing City Championship victory over Westinghouse climaxed a 30-year coaching career for Glenn Miller.

It was his only championship, and the first in South High's history.

Coach Miller survived many frustrating seasons, and it took a quarter of a century for him to lead his Orioles from mediocrity to the championship.

Four times in the last nine years, South was in the playoffs, and each time, they came up empty, until the storybook season of 1977, when the Orioles, with a new field, won the City title under a leader who would never again have another shot at it.

The only emotion Miller ever displayed on a football field was anger; he never seemed satisfied, which indicates his striving for perfection.

A rugged individualist who commanded the respect of his players, in whose eyes he was infallible, Glenn Miller delivered a speech following the championship that was similar to those he had given many times before. But this time, he ended his speech, and his career, by shedding a grateful tear in front of his champions.

It isn't hard to touch Glenn Miller's heart; all it takes is a championship every 25 years.

INJURIES PLAGUE ORIOLES BUT THEY STILL COME OUT ON TOP

Plagued by injuries to some of their key players almost from the beginning of the season, the South High Orioles still managed to complete a near-perfect season, broken only by the 14–6 loss to Brashear in the final game of the regular season, outscoring their opponents by nearly four to one.

"Mike Fuller started the season with a great record," said Assistant Coach Jim Stasenko. "He was our leading offensive groundgainer, and also lead the defense with the most interceptions, and was near the top in tackles. Then he got hurt. We lost Bob Montana in the second game, and Jerome Wilson early, too.

"With our main breakaway threat, kickoff man and wide receiver gone, things could have been pretty bleak. But the rest of the squad moved in to fill in the gaps, and the rest is history."

Scoring against South was minimal during the entire season. In the first game against Carrick the Raiders scored six points on a recovered fumble. Until the Brashear game, the only team to score defensively against South was Westinghouse in the season's second game. Five of the regular season games, and the championship, were shutouts for South.

South came close to the championship twice in recent years. In 1973, with an 8–0 record, the Orioles lost to Perry, coached by a former South man. It was Perry, again, who did in the Orioles in 1974, when South had piled up a 7–1 season record.

What does it look like for the Orioles next season?

"We're losing most of the people we now have in skilled positions," said Stasenko,

"but we have a lot of good boys coming up."

So far, no decision has been made about a replacement for retiring Coach Glenn Miller.

One thing is certain, however. The boys in black and orange will be a force to be reckoned with next year.

FINANCIAL DISCLOSURE STATEMENT

HON. JEROME A. AMBRO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. AMBRO. Mr. Speaker, we have made some progress in this session toward requiring every Member of Congress to publish annual financial disclosure statements, documents which I have voluntarily released every year that I have served in this institution.

My support for the financial disclosure concept extends back through all the years that I have served in government, at both the Federal and local level. During the period I was supervisor of a Long Island town, that municipality became the first in the State of New York to require all elected officials, all department heads and members of numerous boards and agencies to publicly file these documents.

While I am pleased that we have made progress in duplicating that requirement in Congress, I am not completely satisfied with the type of statements now required of all my colleagues and, indeed, voted against the rule which limited amendments to the financial ethics reform package we approved earlier this year. I supported final passage of that legislation, as most of my colleagues are aware, but would have preferred to amend the package to include a bottom line net worth figure in those financial disclosure statements. Without such a requirement, in my judgment, it is extremely difficult, if not impossible, to determine the net increase, or decrease for that matter, in an elected official's total worth.

For example, if an elected official's net worth should increase $60,000 or $75,000 in a single year, it seems to me that his constituents might want to know how he or she achieved that very impressive financial gain in so short a period of time. I do not think such a change could always be spotted in the financial statements that will be required beginning next year.

Nevertheless, we now have a financial disclosure requirement for the first time and I am confident that in the future we can amend the administrative rules of the House to perfect those statements.

Toward that end, I am once again releasing the type of financial disclosure statement I have used in recent years. It is a more comprehensive document than the one approved by the House this year and in my opinion contains many categories and features which should be required of all House Members:

FINANCIAL STATEMENT

1. ANNUAL INCOME DATA FOR 1976

1. Wages, salaries, and other employee compensation	$44,600.00
2. Retainers, fees, honorariums, and other non-employment payments	600.00
3. Dividends	0
4. New York State pension fund interest	2,689.94
5. Rents	4,500.00
6. Business income (or loss)	0
7. Net gain (or loss) from sale or exchange of capital assets	1,000.00
8. Pensions or annuities	0
9. Royalties	0
10. Settlements	0
11. Partnership	0
12. Commissions	0
13. Estates or trusts	0
14. Gifts, loans, pardoned loans	0
15. Farm income	0
16. Alimony	0
17. Winnings of any kind	0
18. Other income of any kind	0

2. ASSETS, LIABILITIES, NET WORTH FOR 1976

Assets:	
Notes receivable	0
Accounts receivable	0
Life insurance (cash surrender value (do not deduct loans)	0
Loans receivable	0
Securities (readily marketable U.S. Government and Stock Exchange listings)	0
Mortgages owned	0
Real Estate (two personal homes)	120,000.00
Automobiles	2,500.00
Other assets (itemize, including jointly owned property and name of joint tenant) New York State Retirement System	647.52
Household goods, jewelry, etc.	6,000.00
Total assets	129,147.52
Liabilities:	
Notes payable to banks (unsecured direct borrowings only)	10,000.00
Notes payable to banks (secured direct borrowings only)	0
Notes payable to others (unsecured)	2,395.57
Notes payable to others (secured)	0
Time payment accounts	2,500.00
Loans against life insurance	0
Real Estate mortgages payable	56,139.85
Real Estate taxes and assessments paid in 1976	3,556.63
Federal and State income taxes (combined paid in 1976)	11,535.44
Other taxes	0
Brokers margin accounts	0
Other liabilities (itemize)	0

4. BUSINESS INTEREST FOR THE YEAR 1976

1. I have been involved in the following real estate transactions: None.

2. I am director or officer of the following commercial corporations, partnerships, associations: None.

3. I hold financial interests in the following corporations or partnerships which are directly or indirectly subject to Federal regulatory agencies: None.

5. SCHEDULE OF CONGRESSIONAL REIMBURSEMENTS AND EXPENSES

Travel allowance	$2,820.06
Stationery allowance	6,500.00
Home office allowance	2,000.00
Total reimbursements	11,320.06
Travel expense	1,985.76
Stationery expense	4,107.49
Home office expense	673.31
Cost of living (Washington, D.C.) (permissible allowance)	3,000.00
Total expense	9,766.56
Miscellaneous Congressional Expenses:	
Entertainment of constituents	398.86
Newspapers and periodicals	407.10
Stationery (excess over reimbursement)	0
Home office (excess over reimbursement)	0
Miscellaneous office expense	614.39
Dues	45.00
Tapes and recordings	98.75
Other	0
Total miscellaneous expenses	1,564.10

MAN OF THE YEAR

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. PATTERSON of California. Mr. Speaker, it is my pleasure to recognize

today a member of the California State Legislature, Assemblyman Chester Wray, who has been honored as organized labor's 1977 "Man of the Year" in Orange County, Calif.

Assemblyman Wray has a long record of distinguished service to his community and to all working men and women in California. He served as president of the United Auto Workers Local 216 from 1969 to 1976 and was a director of the Orange County community action program. Additionally, Assemblyman Wray has served as a United Crusade cochairperson and has been very involved with local community work in the city of Westminster. He was first elected to the California State Assembly in 1976 and we look forward to his continued good work in that office.

Assemblyman Wray has been a friend of mine for many years just as he has for countless numbers of working men and women in Orange County. He has set a good example for all citizens by his compassion and dedication to the betterment of his community.

On behalf of my colleagues in the Congress of the United States, I extend our official congratulations for Assemblyman Wray's designation as Orange County Organized Labor's 1977 "Man of the Year."

FRANK THOMPSON—MR. ARTS AND HUMANITIES

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I can think of no better person to discuss the Federal role in support of the arts than the gentleman from New Jersey, Mr. THOMPSON.

THOMPY was one of those few Members 20 years ago, a group in which I proudly include myself, that fought to get the financial muscle of the Federal Government behind the arts and humanities in this Nation.

It was THOMPY's subcommittee, on the Education and Labor Committee, that provided the legislative vehicle which has since become the National Foundation for the Arts and Humanities.

FRANK THOMPSON was a freshman when he introduced his first bill to aid the arts. That was 22 years ago. His support has never waned, indeed it has blossomed and grown stronger to the point where he now, along with the gentleman from Indiana (Mr. BRADEMAS), is recognized as the preeminent spokesman for the arts in Congress.

THOMPY discussed Federal support for the arts in a recent speech to the American Assembly's Conference on the Performing Arts and America, at Arden House, Harriman, N.Y.

I would like to include those remarks in the RECORD at this time along the comments of W. McNeil Lowry, who introduced THOMPY.

INTRODUCTION OF REP. FRANK THOMPSON, JR.

There are many issues we have encountered in this Assembly which we might not yet have reached without the persistence and drive of our speaker for tonight. Frank Thompson of New Jersey is the ranking member of the House Committee on Education and Labor and Chairman of the House Administration Committee. Given this, we tend to forget that he began to push bill after bill in the arts from the time he was a freshman in the House 22 years ago, and even in 1965, despite the support of President Johnson, had to marshal the 260 votes that brought the National Foundation for the Arts and Humanities legislation to the floor over the powerful opposition of the Rules Committee. If we focus only on this watershed year of 1965, there are other names we should remember—Fogarty, Moorhead, Pell and Javits are a few of them—but Thompson was the key and it was his subcommittee of Education and Labor which since 1961 had laid the groundwork for federal intervention in the arts and humanities and for establishment of the Kennedy Center. This same subcommittee is now chaired by his great friend, John Brademas, so vigorously that many persons in the arts think Thompson works for Brademas, when it is the other way around.

From this might one conclude that the gentleman from New Jersey is shy or reticent or hides his light under a bushel? Yes and no, for like many effective leaders in all walks of life he is complex, even paradoxical. He has a great deal of reticence; indeed it may be that a skillful combination of reticence and power accounts for his great influence inside the House of Representatives. But in relating to individuals, members of Congress or others, he is not always reticent. He can be aggressive, talkative, humorous—I had almost said profane. He has way down deep that quality which even his intellectual friends do not hesitate to call heart, which all politicians profess but few truly reveal. At the same time he can be tough, relentless, sometimes quick to anger. Try as he may, he cannot suffer a fool gladly and he hates inefficiency, but his generosity is boundless. Whether at Princeton with his fellow trustees of the Woodrow Wilson School or at Trenton with his labor constituents, he is congenitally blind to distinctions of class.

I have been privileged to know this man over the past twenty years, and I could tell you many stories about him. I shall not do that from this platform, not because they are indecorous—not all of them are—but because this platform tonight properly belongs to him: Mr. Arts and Humanities, Mr. Education and Labor, Mr. Congressman and my dear friend, the Hon. Frank Thompson, Jr.

THE FEDERAL ROLE IN SUPPORT OF THE ARTS

(By FRANK THOMPSON, Jr.)

Speaking after dinner one should always remember the brief schoolboy essay on Socrates. The student wrote: "Socrates was a Philosopher. He talked a lot. They poisoned him." With that lesson on talking too much in mind, I will keep my remarks short and provide you with an opportunity to ask some questions.

It is a special priviledge for me to join you this evening. The American Assembly has for more than two decades played a vital role in stimulating informed public debate of major policy issues confronting the Nation. I am particularly pleased that the American Assembly has in recent years, with its 1974 Assembly on Museums and with this assembly concerning the performing arts, devoted more attention to public policy and the arts.

The Federal Government has a role to play in the arts and what that role is is an important question of public policy. The report of the 1960 commissions on national goals, which I might note was published by the American Assembly, stated: "In the eyes of posterity, the success of the United States as a civilized society will be largely judged by the creative activities of its citizens. . . ."

There is an old Capitol Hill aphorism that says: There are two things people do not want to know the details of—one is the making of sausage and the second is the making of legislation. At the risk of violating that generally good advice, I would like to begin this evening by providing some perspective on the lineage of Federal policy for the arts. I believe one can only appreciate both the current and future Federal role in the arts by understanding some of the history of where we have been.

A direct Federal role in support of the arts is quite recent. The only truly historic Federal commitment was the establishment of a national copyright system to carry out the mandate of the Constitution "to promote the progress of science and useful arts."

The assistance provided to performers and artists by the Works Progress Administration was an enlightened response to the crisis of the depression, but it did not outlast the passing of the hard times of the 1930's.

The first glimmering of a broader and more permanent Federal role dates only to the 1950's. Bills to establish a Federal advisory council on the arts to encourage private support of the arts were first introduced in 1955, but it was 9 years before one was adopted.

It is useful to remember that the National Cultural Center, better known today as the Kennedy Center for Performing Arts, was first authorized in 1958. The project almost lapsed in 1963, and it was only the designation of the Center as a memorial to the assassinated President that brought the Center into being.

Federal support for the arts did not come easily or quickly. Shortly after being first elected to the House in the mid-50s, my personal interests pointed me in the direction of working on legislation for Federal support of the arts. My initial reward was a half page advertisement in the New Yorker magazine in 1956 characterizing me as a "visionary culture vulture." Federal support for "toe dancers" and "violin players" was derided by some of my colleagues. Sotto voce comments were frequently made suggesting none too subtly that supporters of arts legislation were at best "effete."

By 1965, in large measure through the splendid efforts of many who are present here tonight, the legislative climate had improved. The arts and humanities bill passed by a comfortable margin in the banner year of the 89th Congress and the great society. But deep misgivings remained. Some worried that the legislation created "Government-appointed czars of what was good and bad in art". They feared that rather than nurture the arts, Federal intervention would soon produce America's own roster of creative geniuses scorned by Government but honored by the ages. Dark references were made to the attempts of Hitler and Stalin to create a new culture. This 1965 bill was described as a "boondoggle" and a "march toward bankruptcy of this country."

The mockery also continued. One of the best examples was an amendment offered by my dear friend and long-time nemesis, Congressman H. R. Gross of Iowa. He offered a clarifying amendment defining the term "dance" to include but not be limited to "the irregular jactitations and/or rhythmic contraction and coordinated relaxations of the serrati, obliques, and abdominis recti group of muscles—accompanied by rotatory undulations, tilts, and turns timed with and attuned to the titillating and blended tones

of synchronous woodwinds." He was ridiculing the bill by offering an amendment to specifically include belly dancing.

Last year, a bill reauthorizing the National Endowments for the Arts and Humanities became law with scarcely a murmur of opposition and only a few token negative votes from the most stingy guardians of the budget. The appropriations for the arts endowment have grown more than 40 fold from $2.5 million in fiscal 1966 to $114 million this year. The acceptance and growth of the arts endowment has been stunning and it is a source of great pride to me.

The lessons of the legislative history of support for the arts are clear: First, Federal support for the arts is a recent phenomenon, but it now seems to be accepted as a permanent Federal responsibility.

Second, Federal support in monetary terms has grown from an initial token investment to what now amounts to an important contribution.

Third, the Federal commitment to the arts was entered into with some grave misgivings, and there remain substantial concerns in the minds of many over what indeed is the appropriate Federal role.

Thus, we have a substantial, growing and permanent Federal commitment, but one that is still very new. The Federal role is no longer in its infancy, but it is not much more than a toddler. Its steps are frequenty uncertain and its direction is not always clear.

The turnabout of the last two decades from a nonexistent to a substantial and permanent Federal role in support of the arts can be explained by several factors:

The enlightened leadership of Presidents Kennedy and Johnson;

The vision and statesmanship of some members of Congress;

The maturing of American Public attitudes toward Government support of the Arts; and

The Grass Roots efforts of the many friends of and advocates for the Arts.

Certainly, another important reason for the growth in the Federal role is that the fears of the skeptics have not been borne out in the performance of the arts endowment. The endowment has happily been sensitively and effectively administered. The Federal presence has not been obtrusive or heavy-handed. The common pathologies of bureaucratic caution and inertia have not stifled artistic creativity.

Having briefly described for you the historical evolution of the Federal role in the arts and suggested some of the lessons of this history and the reasons for the change from neglect and skepticism to acceptance and enthusiasm, let me now try to outline more explicitly what I believe are the objectives of the Federal role in the arts. Given that there now is a Federal role, what should that role be?

I believe, and it almost goes without saying, that the Federal Government should support and assist the arts. While the level of Federal support has increased dramatically, as I noted earlier, it still is quite modest. For example, the United States lags far behind Western Nations in its support of artistic endeavor. According to one recent survey, the United States spends less than 40 cents per year per citizen on the performing and visual arts, compared to Great Britain contributing $1.23, Israel $1.34, Canada $1.40 and West Germany $2.80.

To put it rather crudely, as I see it, one important part of the Federal role is to provide dollars, and there is clearly plenty of room for the Federal dollar commitment to grow. Symphonies, operas and dance and theatre companies have been increasingly hard pressed in recent years. I will not preach to the choir by elaborating on this problem with which you are all too familiar. A perceptive public policy analyst once remarked that the problem with poor people is that they do not have enough money. Analogously, one of the major problems of the arts in this country is that they do not have enough money. One important part of the Federal role is to supply more money.

However, another astute observer of the American scene remarked, there is no free lunch. There is no such thing as Federal dollars with no strings attached. Indeed, there should be no such thing. The Federal Government spends the taxpayers' money. Those who are elected or appointed to positions of Government responsibility must insure that public monies are used without fraud and waste, and they must insure that public monies are used to accomplish the purposes for which they are appropriated. Thus, in a Democratic system those who receive public money must be accountable to those who hold elected or appointed office who in turn are accountable to the voter-taxpayers for the expenditure of their money.

If there is accountability for public expenditures, there is also some risk of bureaucratic red tape and the heavy hand of bureaucracy. There must also be, quite frankly, some risk of political interference. It is obvious that artistic creativity, which the expenditure of Federal money seeks to foster, is particularly vulnerable to being warped or damaged by bureaucratic heavy handedness or political interference. Fortunately, as I noted earlier, this has not been a problem in the brief history of the arts endowment. Nor do I sense any inclination on the part of the Carter administration or any broad support in the Congress to politically intrude in the arts. Nevertheless, as the amount of money spent for the arts increases, as I am confident it will, the danger may increase that the necessary accountability will become burdensome and that it will threaten artistic freedom and creativity.

Let me briefly summarize what I have said thus far about the Federal role in support of the arts:

One facet of the Federal role is to supply sorely needed money. Federal money cannot be had without standards of accountability being enforced. Accountability carries with it the dangers of political and bureaucratic interference with artistic freedom and creativity, particularly as the amount of Federal money spent for the arts increases. This brings me to two principles which I believe should guide Federal policy and which are corollaries to spending more Federal money for the arts. I would characterize these two principles as pluralism and leverage.

By pluralism with respect to Federal support for the arts I mean that the integrity of the artistic enterprise will best be preserved if the arts received support from a variety of sources. If there are a number of strong financial revenue bases for the arts—audience admission fees, corporate contributions, labor union contributions, foundation support, State and local governmental expenditures, Federal appropriations and contributions from international or multinational agencies and organizations—then the risks are lessened that any one source of support will come to dominate and threaten the independence and freedom of the arts. This is simply an application of James Madison's argument in Federalist paper No. 10. Madison's view was that the pluralism of American society, which is reflected in its politics, would protect Government from being dominated by any one interest and would preserve the freedom of all.

Today the arts do receive support from a wide variety of sources. There is plenty of room for expenditures from each source, including the Federal Government, to increase without there being a serious danger that any one will become dominant. So we have, in fact, a healthy situation of pluralism in the sources of support for the arts.

However, the Federal role should not be simply to serve as a passive participant in the pluralist system of supporters of the arts. Instead, the Federal Government should adopt policies to encourage diversity in the sources of support for the arts and to encourage a large and growing contribution from each source. This is one aspect of what I characterize as a Federal policy of leverage.

We have some policies already in place which encourage diverse sources of support for the arts. For example, the National Labor Relations Act permits employers and the unions representing their employees to negotiate employer contributions to jointly administered educational and cultural trust funds. Many unions have negotiated for such trust funds and the money in them is spent by at least one union in New York City (Local No. 3, IBEW) to purchase theater and symphony tickets for its members. The Federal Tax Code, to cite another example, encourages charitable contributions to the arts and permits foundations to operate for eleemosynary purposes.

The challenge grant program of the arts endowment is an excellent application of the principle of Federal leverage being used to encourage pluralism in the sources of support for the arts. Federal funds are committed to a project only when an applicant can demonstrate the ability to raise three times the amount of the Federal contribution from non-Federal sources. To cite only one illustration of how this has worked in practice, in 1973 the arts endowment, through a challenge grant, helped the Metropolitan Opera generate $1 million of new money from its radio audience while raising the number of donors by 25,000 many of whom have continued to contribute.

Legislation introduced this year with my cosponsorship, the artists bill of rights, is another illustration of the leverage principle. This bill would provide a tax incentive for artists to contribute their works such as paintings or musical and literary manuscripts to non-profit institutions like museums or libraries. Prior to the Tax Reform Act of 1969 artists who donated their works could take a tax deduction of one hundred percent of their fair market value of the donated works. Artists shared this tax break with Federal elected and appointed officials who took the same deduction when they donated their public papers to libraries. This tax break for Federal officials was repealed, and rightly in my view, by the 1969 act. But at the same time, the deduction was also removed for the contribution of art works by artists. The artists bill of rights would restore this tax incentive to artists, and I hope that it will become part of President Carter's tax reform package which will be submitted to the Congress in the near future.

There is a second facet of the leverage principle. In my view, the Federal Government should provide support to the arts and encourage others to do so through policies which are, where possible, indirect and unobtrusive. The artists bill of rights, supporting the arts through a tax incentive, also illustrates this aspect of the idea of leverage.

Another example of such a policy is the Arts and Artifacts Indemnity Act which was enacted in 1975. Prior to passage of this law exhibitions of great arts works from other nations in this country or sending American exhibitions abroad was discouraged by the prohibitively high insurance premiums. The act provides indemnification of these exhibitions by the Federal Government and made possible, for example, the enormously

successful King Tut exhibition. To the extent that indirect Federal leverage can be used to support the arts, as in the case of the artists bill of rights and the Arts and Artifacts Indemnity Act, the risk of Federal infringement on artistic freedom will be minimized.

A Federal role of expending money following the principles of pluralism and leverage does not exhaust the issues with respect to the Federal role. With the enactment last year of the Museum Services Act we now have a precedent for direct Federal expenditures to cover operating expenses of art institutions, rather than only funding specific projects. An important question is how far should we go in the direction of providing operating subsidies to art institutions or a living allowance to individual artists.

The Federal role in supporting the arts should also go beyond the various kinds of direct and indirect financial support I have been discussing. I believe that the Federal Government should provide leadership in the arts. Federal efforts can make the arts more visible, better understood and more respected.

The legislation creating a 1979 White House conference on the arts is one important mechanism to provide such national leadership. This bill introduced by my good friend and colleague John Brademas with my cosponsorship, provides that "the purpose of the conference shall be to help develop a climate in which the arts can flourish and recommendations to formulate an assessment of problems and issues relating to the arts, and to develop recommendation relating to the appropriate growth of the arts in all parts of the Nation." During the next three months hearings on this legislation will be held in Dallas, New York City, Miami and Atlanta, and I have high hopes that it will be enacted into law next year.

A Federal blueprint that seeks to dictate the direction of the development of the arts would be most inappropriate and dangerous. What we do need, however, is to bring some coherence and some focus into Federal efforts in support of the arts. It is my hope that the White House conference on the arts will be a major step in formulating such a national policy for the arts.

Federal leadership in the arts can also be exercised by identifying newly emerging or neglected areas of artistic concern. The legislation creating a national folklife center and my bill to preserve architecturally significant railroad depots and convert them into theaters, museums and cultural centers are examples of Federal leadership to focus attention on specific and selected artistic concerns.

The basic question concerning Federal policy for the arts is toward what overriding goals should Federal money be spent and Federal leadership be exercised. We have recently been bedeviled by a fundamentally silly and arid debate over whether Federal policy is too "elitist" and whether it should become more "populist." In my view, this is a false antitheses. Elitism and populism are crude code words. Elitism really means support for the development of artistic excellence and creativity. Populism really means support for broadening the participation of Americans in the arts. When understood in this way, elitism versus populism does not pose a choice. The fundamental objective of Federal policy, in my view, is to nurture artistic excellence and to make its benefits available to all Americans. These are complementary goals. What Federal policy must seek to achieve is to make the arts popular but not popularized.

Thank you.

U.S. AGRICULTURAL FOREIGN MARKET DEVELOPMENT PROGRAM LAGGING BEHIND OTHER EXPORTING NATIONS

HON. W. R. POAGE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. POAGE. Mr. Speaker, in recent years, American agriculture has become more and more dependent upon foreign markets as a source of income. Agricultural exports have increased from about $6.7 billion in 1970 to an estimated $23.8 in 1977. Today, about one dollar in four received by the agricultural industry is received from exports.

Yet, with all of the gains in exports that have been achieved in recent years, we still have massive surpluses of wheat, feed grains, and other commodities acting to keep farm prices below the cost of production. The Nation's farmers are currently undergoing a severe economic crisis and are asking where the foreign markets for their products are that they were promised in the past.

The answer is that the foreign markets for American agricultural products do exist but not enough has been done in the recent past by the Department of Agriculture to aggressively expand these markets to their full potential. In recent weeks, the staff of my Subcommittee on Livestock and Grains, at my request, has been studying the foreign market development programs of the Department of Agriculture in an effort to find ways of improving on these programs. Some rather interesting and telling information has come from the staff study and I want to take this opportunity to share this information with my colleagues.

In 1970, the foreign market development budget of the U.S. Department of Agriculture was $16,795,000. This represented an amount approximating three-tenths of 1 percent of total U.S. agricultural exports during 1970. In fiscal year 1977, U.S. Department of Agriculture budget for foreign market development was $21,430,000. However, when this level of expenditure is corrected for inflation, it shows that we are actually spending only about $13,650,000 (in 1970 value dollars) for foreign market development. More important, this analysis shows that our market development budget in 1977 equaled only about eleven-one-hundredths of 1 percent of our gross agricultural exports during 1977—about one-third the amount which was expended in 1970.

Therefore, Mr. Speaker, it is apparent to me that we must next year take a close look at our foreign market development programs and make an effort to provide the funding and authority necessary to continue and to expand upon the effective programs begun in the past. I urge my colleagues to study the following charts provided to me by the Foreign Agricultural Service so that they may better realize the need for expanding the USDA's foreign market development programs.

RELATIONSHIP BETWEEN EXPENDITURES FOR AGRICULTURAL FOREIGN MARKET DEVELOPMENT AND AGRICULTURAL EXPORTS FOR THE UNITED STATES AND OTHER SELECTED EXPORTING NATIONS, ESTIMATES FOR FISCAL YEAR 1976

Country	Total agricultural exports (billion U.S. dollars)	Market development expenditures (million U.S. dollars)	Relationship (percent)
Australia	4.6	50.5	1.10
Canada	3.9	10.2	0.26
Denmark	2.2	16.2	.72
France	8.7	12.1	.14
Israel	[1] .38	6.0	1.54
Netherlands	8.8	23.0	.26
New Zealand	2.0	17.9	.89
South Africa	1.3	9.6	.72
United States	22.1	[2] 22.5	.10

[1] Calendar year 1975.
[2] Includes USDA funds and contributions of U.S. Market Development Cooperators.

USDA BUDGET FOR FOREIGN MARKET DEVELOPMENT, FISCAL YEAR 1970-78

Year	Total budget (thousand)	Total budget (thousand 1970 dollars)
1970	$16,795	$16,795
1971	17,280	16,568
1972	17,589	16,331
1973	18,069	15,795
1974	19,380	15,260
1975	18,791	13,558
1976	20,234	13,802
1977	21,430	13,650
1978	23,488	

RELATIONSHIP OF U.S. AGRICULTURAL FOREIGN MARKET DEVELOPMENT EXPENDITURES TO TOTAL U.S. AGRICULTURAL EXPORTS, FISCAL YEAR 1970-77

Fiscal year	U.S. agricultural exports (billion)	Market development expenditures (million)	Relationship (percent)
1970	$6.718	$20.310	0.30
1971	7.753	20.569	.27
1972	8.046	18.785	.23
1973	12.902	18.536	.14
1974	21.293	18.600	.09
1975	21.578	22.656	.10
1976	22.147	21.593	.10
1977	[1] 23.850	25.069	.11

THE DANGER OF BURNING FOSSIL FUELS

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BOB WILSON. Mr. Speaker, the major opposition to nuclear energy power plants is generally based upon an emotional appeal to "save" the American public from the machinations of the plutonium bomb makers and the horrors of buried nuclear waste material. The third horror tale—the nuclear powerplant as a bomb—is gradually being discarded since no one believes it can happen—and it cannot.

Since the 1954 atoms for peace program was initiated, only one country—India—has detonated a nuclear explosive developed in-house. The Chinese People's Republic received significant help from the Soviet Union. This indicates to me that the bomb makers can be restrained.

The nuclear waste generated when spent fuel elements are processed for contained uranium and plutonium can be safely stored. It has been safely stored in temporary containers for over 30 years at Hanford, Washington and Aiken, S.C., among other places. A comprehensive development program is underway for producing a solid form of the waste for permanent underground storage. This indicates to me that the disposal of nuclear waste is not an unsolvable problem.

In my own State of California, where a referendum rejected the idea of foregoing nuclear power, a bunch of appointed bureaucrats in Sacramento is trying to kill off a pair of nuclear power stations desperately needed by those of us who live in the southern part of the State. The plans for the Sun Desert Plants 1 and 2, proposed by the San Diego Gas and Electric Co. for construction at Blythe, are being strangled by a handful of hysterical hangdogs who purport to worry about bomb makers and buried nuclear waste.

"Look at the alternatives to nuclear" they moan. Continued geothermal development at the Geysers field, north of Sacramento, is just about dead because of environmental groups' opposition. Solar production of electricity is decades away; even if successful, solar could only meet a small percentage of the needs of an industrial society. Geothermal development in the Imperial Valley will probably be killed off when the bureacrats believe full-scale use is possible.

What alternative is left? That is right, fossil fuels.

The administration is against nuclear power. The administration wants the country to return to the initial days of our industrial revolution when "King Coal" provided the muscle.

How many communities in California are willing to install coal-fired powerplants?

I have another question: Is it safe to burn coal? The administration's proposed energy bill will punish the owners who do not convert powerplants to coal. But is it safe to burn coal?

The National Academy of Sciences appointed a 15-member energy and climate panel, chaired by my friend of many years, Prof. Roger R. Revelle of the University of California, San Diego, to study the buildup of carbon dioxide in the atmosphere from burning fossil fuels. The work of the Revelle panel and its plan to attack the problems of carbon dioxide buildup were covered very well in the October 1977 issue of Physics Today. I will include this article at the conclusion of my remarks.

Following is the opening paragraph of the article:

A major buildup in atmospheric carbon dioxide could increase average global temperatures by as much as 6°C over the next century or two; this is the chief problem associated with continued worldwide dependence on fossil fuels, according to a panel on energy and climate convened by the National Academy of Sciences. The effects of such a climatic change, throwing the Earth's habitable surface back to conditions that prevailed in the Mesozoic Era, probably would include a shift of the agricultural and fishing zones toward the poles and destabilization of those semi-arid regions now considered marginal for human occupancy.

Has the administration warned the American people that burning coal could be dangerous to the survival of our progeny? No. But the administration, in an almost conspiratorial manner, has undertaken a program that will study CO_2 effects. However, unless you read Physics Today, the Oak Ridge National Laboratory Review (fall 1977), or reports put out by the Geophysics Study Committee of the National Academy of Sciences, you would be unaware that a problem even exists.

I consider it a transgression against the American people to scare them about the minute effects that fluorocarbons from spray cans might have in the ozone layer and to totally ignore the fact that fossil fuel burning plants could significantly alter the Earth's climate. I consider it an insult to the American people to worry them with contrived problems about nuclear waste 10,000 years from now when fossil burning plants could destroy the Earth as we know it 200 years from now.

At this point, I insert the article from Physics Today:

NAS Panel Is Concerned Over Atmospheric CO_2 Buildup

A major buildup in atmospheric carbon dioxide could increase average global temperatures by as much as 6°C. over the next century or two; this is the chief problem associated with continued worldwide dependence on fossil fuels, according to a panel on energy and climate convened by the National Academy of Sciences. The effects of such a climatic change, throwing the Earth's habitable surface back to conditions that prevailed in the Mesozoic Era, probably would include a shift of the agricultural and fishing zones toward the poles and destabilization of those semi-arid regions now considered marginal for human occupancy. The panel has recommended extensive further study of the energy-climate relationship, a tremendous interdisciplinary research effort and new institutions to deal with the problem. Physicists may be able to contribute to meeting the CO_2 threat through development of improved theoretical models and more precise determination of numerous measurements needed for accurate climatic predictions.

The 15-member Energy and Climate Panel, headed by Roger R. Revelle (University of California, San Diego, and Harvard University), was established after the NAS's Geophysics Research Board finished planning in 1974 for a series of studies on topics of geophysical interest. A Geophysics Study Committee, led by co-chairmen Philip H. Abelson (Carnegie Institution, Washington) and Thomas F. Malone (Holcomb Research Institute), supported Revelle's panel in its work.

Approaching the CO_2 problem.—The panel began by considering three by-products of energy production and consumption—heat, particulate matter and gases—as potential sources for a significant degree of inadvertent modification of the Earth's over-all climate. The first two they soon dismissed as not irrevocably harmful on a global scale: Direct-heat release may be an important factor in local-climate determination, but for the foreseeable future manmade heat output will remain a tiny fraction of the heat produced by incoming solar radiation; the venting of particulate matter from manufacturing processes and other sources appears readily controllable from a technological standpoint, even if substantially increased. Revelle's panel focussed on carbon dioxide, produced in the combustion of fossil fuels, as the greatest potential menace to stability of the Earth's climate over the next few centuries; the so-called "greenhouse effect," in which atmospheric CO_2 traps solar heat by appearing transparent to the Sun's shortwave radiation (visible light) while strongly absorbing long-wave radiation (heat), could lead to a climatically significant rise in average temperatures near the Earth's surface—with particularly marked effects in high latitudes.

Revelle and his colleagues base their conclusions about the CO_2 threat on energy-consumption estimates and expectations of future energy sources for the next 200 years. The panel examined various models for the division of CO_2 among the oceans, the atmosphere and both living and dead organisms (the so-called "biosphere"); they found a range of agreement for these models that indicates a probable increase of four to eight times present levels of atmospheric CO_2 by the latter part of the twenty-second century. A review of models that associate increased CO_2 in the atmosphere with higher global temperatures suggests, according to the panel's report, that a corresponding increase of 2–3°C is to be anticipated for the average temperature at the Earth's surface for each doubling of the atmospheric CO_2 content. Increases in polar-region temperatures could be as much as three times greater. Such a change, the panel points out, might easily exceed all fluctuations in global temperature of the past few thousand years, including the most recent "ice age," which ended 10,000 years ago, when average midlatitude temperatures were 5–10°C lower than present norms.

Impact of a rising thermometer.—An increase of 6°C in average global temperature could result in a climate comparable to that of the Mesozoic Era, the "Age of Reptiles" that ended 70–100 million years ago, the panelists warn. What are the possible consequences for human life? The panel notes that the near-surface waters of the oceans would be warmed, with the result that fish populations would tend to move toward the poles, the average sea level would rise (by about one meter for every 5°C increase in the temperature of the top 1000 meters of ocean water) and the Northwest and Northeast Passages would become open for shipping most of the year. "Agricultural belts," the panel concludes, "would be shifted by changing seasonal precipitation and temperature patterns. For some countries with marginal agriculture, the impact on food production could be severe." The panel finds it "impossible to forecast" what effect a general warming of the atmosphere and oceans might have on the Greenland and Antarctic ice caps. Abelson and Malone stress that "human capacity to perturb inadvertently the global environment has outstripped our ability to anticipate the nature and extent of the impact."

What can physicists do?—There remain several conceptual problems to whose solution physicists may be able to contribute. The panel notes, for instance, that no feasible means to compensate for very large CO_2 emissions so as to prevent an atmospheric build-up or a rise in global temperature are

known at present. One idea mentioned in the panel's report is to increase the Earth's albedo (reflectivity) so as to absorb less solar radiation; this could be done, in principle, by spreading large quantities of small reflecting platelets of latex over the ocean surface—however, the pile-up of billions of platelets on the world's beaches is an easily predicted and environmentally undesirable side-effect.

The panel states that it is not yet known whether climatic changes occur in fairly discrete, "steplike" shifts from one dynamically stable state to another, or if they take place by a gradual passage through a continuum of states. The steplike transition would be especially worrisome, because seemingly minor changes might bring on an abrupt change in climate. An even more suitable problem for the physicist is to determine what contributions to the world's energy needs can be expected from the various "renewable" (sometimes called "inexhaustible") resources.

More accurate measurements of a number of parameters in the energy-climate problem are needed. The variation with time of the ratio of C^{12} to C^{13} in the atmosphere must be measured over a wide range of geographic locations to learn the net flux of CO_2 between the atmosphere and the biosphere, says the panel, because the changes in C^{12}–C^{13} ratio are likely to be small compared to random errors. Other measurements the panel deems necessary include:

Better estimates of changes in land use;

Estimated annual changes in global forest biomass;

Determination of changes in carbon content of soil humus;

Intercomparable mean monthly values of the partial pressure for CO_2 in the atmosphere, the ocean surface and subsurface waters;

Refined estimates of the quantities of CO_2 released by the burning of fossil fuels;

The dispersal of tritium from atmospheric nuclear-weapons tests in subsurface ocean waters (as a measure of advection, convection and turbulent-mixing processes in the ocean), and

Reduction of error in the Suess effect, the decrease of atmospheric radiocarbon content over the century and a half before 1950 due to injection of C^{14}-free CO_2 into the atmosphere from combustion of fossil fuels.

Recommendations.—The Revelle panel suggests that its study of possible climatic consequences of fossil-fuel use should be only part of a family of similar assessments of the most attractive alternative energy sources' environmental impacts. The panel recommends a "comprehensive worldwide research program" of a uniquely interdisciplinary nature to carry on the investigation of CO_2-related climatic effects. "Consideration should be given," says their report, "to the establishment at the national level of a mechanism to weave together the interests and capabilities [of scientists and Government agencies] in dealing with climate-related problems." This "Climatic Council," as the panel describes it, would coordinate studies of the CO_2 cycle, energy demand, future population changes and ways of mitigating the effects of global climatic shifts.

Revelle and his colleagues conclude that there are two sorts of counter-measures possible—the reduction of actual climatic changes or adaptation to such changes with a view to minimizing their impact on human life. Adaptation, they say, is the most readily approached; attempts to reduce the climatic effect of additional CO_2 in the atmosphere they find to be "formidably difficult," requiring extended efforts over centuries. With an eye to the future, however, the panel also proposes an intriguing challenge: In light of the expanding knowledge and interest in climatic changes, they say, "perhaps the question that should be addressed soon is 'What *should* the atmospheric carbon dioxide content be over the next century or two to achieve an optimum global climate?'"

HOW FAST CAN WE SAFELY BURN COAL?

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

[From the Oak Ridge National Laboratory Review, fall 1977]

CARBON DIOXIDE AND CLIMATE—HOW FAST CAN WE SAFELY BURN COAL?

SOME SCENARIOS FOR THE YEAR 2040

(By Carolyn Krause)

For the first time in years, the White House has not received a Fraser balsam fir from the Blue Ridge Mountains for its official Christmas tree. A change in climate there and in the Great Smoky Mountains has caused these outlying areas of Maritime Canada climate to warm up. The warmer climate is unsuitable for the fir trees and, furthermore, favors a devastating insect pest—the balsam wooly aphid—to hasten destruction of the fir forests. The Fraser fir is in danger of becoming extinct, and forest rangers and national park officials are worried that the aphid will start to work on a new host—the red spruce trees which, along with the firs, have thrived for hundreds of thousands of years in these mountains.

In the Great Plains, wheat farmers who have not been wiped out financially by dust-bowl storms are contemplating moving to the cornbelt to raise their crops and establish their silos. They have become persuaded that the cyclic droughts of recent years are part of a permanent trend to warming and drying, not a series of temporary aberrations, so they are preparing for a migration.

Other regions of the world are benefiting from the warming trend. Some deserts bloom in response to greater-than-normal rainfall, for example.

Climatologists attribute the warming trend to the furnaces of civilization which have been spewing forth increasing loads of carbon dioxide to the atmosphere. This colorless and odorless gas, exhaled by man and used by plants to make themselves green, restricts the escape into space of infrared radiation from the sun-warmth earth. Since increased CO_2 absorbs more of the infrared radiation than formerly, a larger amount of heat accumulates, causing a slight but significant increase in average global temperature. This impact of atmospheric CO_2 on climate—dubbed the "greenhouse effect"—has become more apparent in recent years because of the escalating rate at which power plants and industry throughout the world have burned coal, oil from shale, and synthetic oil and gas.

These scenarios may never happen, but they may be within the realm of possibility if the world usage of fossil fuels continues to grow and coal becomes the principal global source of energy. In 1976, Alvin Weinberg, former ORNL Director and now head of the Institute for Energy Analysis at Oak Ridge Associated Universities, warned that a sharp rise in the rate at which the world burns fossil fuel over the next few decades could result in a large increase in atmospheric CO_2 content, which in turn could boost the surface temperature of the earth enough to have serious economic and ecological implications. The same year, Alex Zucker, ORNL's Associate Director of Physical Sciences, assembled an ad hoc study group to compile a state-of-the-art report on atmospheric CO_2 and climate—a report which would summarize what is known about the problem, what studies are being done, and what research is required to dispel the uncertainties. Appointed to the group were Charlie Baes of the Chemistry Division, group chairman; Jerry Olson of the Environmental Sciences Division, who was already at work on such an assessment and had advocated such a study since the 1960s; Hal Goeller of ORNL's Program Planning and Analyst Office, who has been concerned with resource problems; and Ralph Rotty, meteorologist and engineer at the Institute for Energy Analysis, who has long been concerned with fuels and climatic implications.

In August 1976 the group issued an ORNL report entitled "The Global Carbon Dioxide Problem;" an abbreviated version of this report entitled "Carbon Dioxide and Climate: The Uncontrolled Experiment" was published in the May–June 1977 issue of American Scientist. The message of Weinberg and the Oak Ridge report has not been lost on the Carter Administration which proposed $3 million for new CO_2-climate studies in the FY 1978 budget.

GROWTH IN ATMOSPHERIC CO_2

According to the Oak Ridge report, atmospheric CO_2 has grown steadily from 295 ppm in 1860 (when the Industrial Revolution gathered momentum) to 330 ppm now, an increase of 12 percent. The CO_2 content of the atmosphere has been increasing at 0.2 percent per year since 1958 when regular, accurate measurements commenced. The overall increase has thus far been equivalent to half of the cumulative release of CO_2 from the worldwide combustion of fossil fuels. The other half of the released fossil carbon presumably has been absorbed by the oceans and land biota.

One of the messages of the report is this: If combustion of fossil fuels continues to grow at the historical annual rate of 4.3 percent (an unlikely scenario unless there is a ban on nuclear power), the atmospheric CO_2 concentration could double in 60 years, resulting in an increase in the average global temperature of perhaps 2 to 3°C. On the other hand, a much slower rate of increase of fossil fuel combustion might not affect the climate enough to produce unacceptable changes. So the question that needs to be answered is this: Is there a maximum rate at which we can safely burn oil, gas, and coal without dangerous disturbing the climate?

Answering this question requires more extensive mathematical modeling to determine levels of CO_2 and its distribution among air, oceans, and terrestrial plant life. Mechanisms that must be accounted for in these models, according to the Oak Ridge report, are decreased snow and ice cover (which would result in a decrease in reflected radiation, thus producing additional warming), changes in cloud cover and in the temperature of cloud tops, effects of ocean circulation on CO_2 absorption, and effects of changes in water balance and terrestrial plant life on atmospheric CO_2 levels.

RECENT COOLING TREND

The earth's surface temperature, which averages 15°C, rose about 0.6°C in the 60 years before 1940. In the past three decades, the earth has undergone a cooling, with its temperature dropping 0.3°C. Some scientists ascribed this slight cooling to industrial pollution, theorizing that airborne particulates can shade the earth by reflecting back incoming solar radiation. (Cool sum-

mers tend to follow the larger volcanic eruptions for several years because of the dust blown into the stratosphere which settles out slowly.) Industry spews forth both CO_2 and particulates, but the latter's effects are mostly local and likely to remain much less than metrologists are coming to expect from CO_2. Opposing influences on climate may have been canceling each other's effects lately, giving rise to the controversy over whether the net effects of man's future activities will be a cooling or warming trend.

In recent national meetings on climate or the CO_2 problem, Olson finds scientists generally tending to agree now that discharges of fossil carbon pose substantially more threat to the climate on a global scale than do particles from energy sources. (The particles, incidentally, may absorb some solar radiation, thus adding heat to the atmosphere, but the extent to which this absorption occurs depends on the location and the various particles' optical properties.) Thermal discharges from energy sources, Olson adds, are considered even less of a threat to the next century's global climate, although they could have adverse localized impacts.

There is 10 times as much carbon in the world's fossil fuel reserves as in the atmosphere; or, more specifically, the atmosphere contains 700×10^9 metric tons of carbon while the recoverable fossil fuel reserves hold 7300×10^9 tons.

The Oak Ridge group considers as a high-use scenario one involving the use of fossil fuel at a growth rate near 4 percent per year for a while followed by an eventual gradual decrease as the supply is used up. In this scenario, roughly half of all fossil carbon resources might be released to the atmosphere in less than 100 years—a situation which could produce many of the consequences mentioned above. In the group's low-use scenario, which might have more acceptable, or at least delayed, consequences, they envision the use of fossil fuel growing at 2 percent of the present rate per year until the year 2025, followed by a decrease as renewable energy sources become available and as fossil fuel use is discouraged. The total fossil carbon released would be 1.5 times the carbon content of the pre-industrial atmosphere, or one-fourth that of the realistic high-use hypothesis.

Olson believes the fossil fuel consumption pattern that will be adopted will lie somewhere near the high-use rate at first, followed by a struggle to return to a low-use scenario after effects of the excess release are belatedly recognized. How any fossil fuel use scenario will affect man's welfare cannot be predicted until more knowledge is obtained on the carbon cycle, on the likely climatic effects of increasing atmospheric CO_2, and on the ecological and economic consequences of climate change. How well the various parts of the problem can be organized and solved will challenge the best efforts of all the people and agencies who become involved.

As Roger Revelle and H. E. Suess stated in 1957: "Human beings are now carrying out a large-scale geophysical experiment of a kind that could not have happened in the past nor be repeated in the future. Within a few centuries we are returning to the atmosphere and oceans the concentrated organic carbon stored in the sedimentary rocks over hundreds of millions of years. This experiment, if adequately documented, may yield a far-reaching insight into the processes determining weather and climate."

HOUSE OF REPRESENTATIVES—*Wednesday, November 30, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Fear not, for I am with you; be not dismayed, for I am your God; I will strengthen you; yea, I will help you.—Isaiah 41: 10.

Almighty God, our Father, before we begin the work of this day we turn to You in our morning prayer. We come with hearts filled with gratitude for the opportunity of serving our country in this House. Grant that Your spirit of wisdom and truth may guide us in these critical hours as we plan for the future of our Republic. Help us to think the thoughts, possess the emotions, and do the deeds which become us as leaders of this great land.

May we ever be true to the high principles upon which our Nation was founded, may we ever hold high our enthusiasm for life, liberty, and the pursuit of happiness and may we ever keep our concern for the needy, the poor, and the oppressed.

Grant that good will and justice may live in every heart and increasingly prevail in our planet. Together may we do justly, love mercy, and walk humbly with You. Amen.

CALL OF THE HOUSE

Mr. ROUSSELOT. Mr. Speaker, under rule 1, clause I, of the rules of the House, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 752]

Abdnor	Armstrong	Beilenson
Alexander	Ashley	Biaggi
Ambro	Badillo	Bolling
Burton, John	Hammer-schmidt	Ruppe
Cederberg	Harsha	Santini
Chappell	Hawkins	Sarasin
Chisholm	Jones, Tenn.	Scheuer
Cochran	Kasten	Seiberling
Conyers	Kelly	Smith, Nebr.
Crane	Koch	Teague
Cunningham	Krueger	Thone
Davis	Lundine	Thornton
Dent	McDonald	Tucker
Derwinski	Mikva	Udall
Diggs	Moss	Van Deerlin
Dingell	Myers, John	Wampler
Duncan, Oreg.	Nolan	Waxman
Fithian	Pike	Whalen
Ford, Mich.	Pursell	White
Fraser	Rangel	Wilson, Tex.
Frey	Rosenthal	
Goodling		

The SPEAKER. On this rollcall 371 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 417. Concurrent resolution commending Anwar el Sadat, the President of Egypt, and Menachem Begin, the Prime Minister of Israel.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate numbered 5 and receded from its amendment numbered 6 to a bill of the House of the following title:

H.R. 1904. An act to suspend until July 1, 1980, the duty on intravenous fat emulsion.

The message also announced that Mr. DANFORTH be a conferee, on the part of the Senate, on the bill (H.R. 9346) entitled "An act to amend the Social Security Act and the Internal Revenue Code of 1954 to strengthen the financing of the social security system, to reduce the effect of wage and price fluctuation on the system's benefit structure, to provide for the conduct of studies with respect to coverage under the system for Federal employees and for employees of State and local governments, to increase the earnings limitation, to eliminate certain gender-based distinctions and provide for a study of proposals to eliminate dependency and sex discrimination from the social security program, and for other purposes," vice Mr. LAXALT, excused.

DR. ORRIN E. HUDSON, SR.

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, it is with genuine sadness that I speak today in the House of Representatives regarding a friend and supporter of many years, Dr. Orrin E. Hudson, Sr.

Dr. Hudson, age 74, of Madisonville, Ky., died there at Hopkins County Hospital November 19 following an apparent heart attack.

He was a complement to many constructive interests in Madisonville. The impressions he tendered upon those around him will endure for years to come. He was an outstanding family man, a faithful churchman, and worked for progress in his community.

Dr. Hudson, a native of Golden, Ill., came to Madisonville following his 1944 graduation from Palmer College of Chiropractic in Davenport, Iowa. During his practice he served on the board of

directors of the Kentucky Association of Chiropractors for many years. He was past president of the Pennyrile Chiropractic Association.

At the top of his wide-ranging interests was his church. He was a charter member of Parkview United Methodist Church which he served faithfully as a board member most of his life in Madisonville.

Dr. Hudson was a charter member and past vice president of the Kiwanis Club of Greater Madisonville.

Dr. Hudson's wife, Bessie Harrison Hudson, preceded him in death in 1961.

Surviving are a son, Dr. Orrin E. Hudson, Jr., of Madisonville; two daughters, Mrs. Larry "Madonna" Mahurin, of Hanson, Ky.; and Mrs. Kenneth "Sharon" Suggs, Fayetteville, N.C.; a grandson and two granddaughters.

The family and friends of Dr. Orrin E. Hudson, Sr., can be justly proud of this great American whose love for his God and country was evidenced by his life's activities.

OHIO SENDS LOUD AND CLEAR MESSAGE THAT THEY WANT NO PART OF INSTANT VOTER REGISTRATION

(Mr. LATTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LATTA. Mr. Speaker, on November 8, the people of Ohio sent a message to Washington. It was loud and clear that they want no part of instant voter registration.

Five months after such a measure was passed by a Democrat-controlled legislature, the people of Ohio ignored the tremendously costly campaign of the big labor bosses to save it, disregarded a personal letter of endorsement of it from President Carter, and voted overwhelmingly to repeal an Instant Voter Registration Act by over 700,000 votes.

Despite efforts by the Ohio Council of Churches and the League of Women Voters to get the people to overlook the opportunities for fraud under instant voter registration, they emphatically said they did not want any tampering with the integrity of Ohio's election system.

The Ohio instant registration law—erased by the people's action on November 8—was rammed through the Ohio Legislature over the Governor's veto and under the guise of an appropriation bill in order to deny the people of Ohio a referendum on it for the benefit of certain interests without regard to the possible damage it might have to the integrity of our present election system.

The dangers inherent in this registration law had been called to the attention of the people by every major metropolitan Ohio newspaper—with one exception—and that was in the Dayton area. Ironically, 94,689 in the Dayton area voted against the instant registration measure and only 54,257 in favor of it.

The Columbus Dispatch editorial read:

Tuesday voters said emphatically they want the integrity of elections preserved. Their verdict should carry to the Nation's capital where nationwide instant registration has been considered.

The Cleveland Plain Dealer editorialized:

Voters across Ohio displayed more than a little good sense in repealing election-day registration.

An Akron Beacon Journal editorial said:

The margin of Issue One's (repeal of instant registration bill) passage was enough to make congressmen think twice about pushing an unpopular idea, particularly one that many voters associate with fraud.

Mr. Speaker, the overwhelming approval of Ohio State issue 1 is a classic example of democracy in action. This message should be clear to President Carter and this Democrat-controlled Congress that the American people do not want instant voter registration.

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time to announce the program for today and the remainder of the week.

Our first order of business will be the conference report on H.R. 9375, supplemental appropriations for fiscal year 1978.

After that, we will move to appoint conferees on H.R. 9346, the Social Security Financing Amendments of 1977. I have been informed that there may be an attempt to instruct conferees with respect to that.

Following that, we will take up the conference report on H.R. 9418, the Public Health Service Act amendments; and the conference report on S. 1316, the Endangered Species Act authorization through 1980.

Then we would act on motions to agree to Senate amendments to H.R. 7738, the Trading With the Enemy Act; and to H.R. 9378, the ERISA, Employee Retirement Income Security Act amendments.

The final order of business would be on S. 1340, the Energy Research and Development Administration Authorization Act of 1978.

Mr. Speaker, we will go through as much business as we can today; and in any event, will arise this evening not later than 6:30. We would come in tomorrow at 10 o'clock a.m.

The future is uncertain because of the impasse which continues to exist with reference to the Labor-HEW appropriation bill.

Until that is resolved it would be impossible to give a definite statement as to when we will or will not be in session. There will be at least a pro forma session on Monday next and if there is some possibility of resolving that stalemate we may be in session on Monday.

Mr. RHODES. Mr. Speaker, if the gentleman will yield, would the majority leader respond to a question as to the time frame on the Labor-HEW appropriations situation? That is, at what point do the employees of that Department cease to get paid?

Mr. WRIGHT. The continuing resolution expires tonight. Payroll certification is on the 7th of December and payday is on the 13th of December for HEW.

Mr. RHODES. Might I further inquire as to whether there has been any thought given to the possibility of a further continuing resolution for that appropriation bill?

Mr. WRIGHT. Much thought, I would respond to the minority leader, has been given to it. There has been strong resistance to the idea on the other side of the Capitol, in the other body, and at least one spokesman for the other body has asserted an avowal to disallow any additional continuing resolutions unless perchance they carry the language that he would find acceptable in the bill itself that would make a continuing resolution identical to the enactment of the appropriation bill.

Mr. RHODES. It would seem we are at an impasse which will result in, among other things, Government employees not being paid and two departments of the Government being paralyzed. Could the majority leader inform me as to whether there is any action on the part of the leadership to try to resolve the impasse which has been caused by the disagreement between the two Houses over the so-called Hyde amendment? It seems to me that the parties are much closer than I had believed they were previously and that perhaps, with some nudging, or some help from the leadership, that there could be some arrangement made which would meet the objections of both parties.

Mr. WRIGHT. If the gentleman from Arizona (Mr. RHODES) could show us, Mr. Speaker, whom and where to nudge, this Member stands ready to attempt such a nudge.

I would further respond that the leadership, the Speaker and others, of course, have been in almost constant conversation with members of our Committee on Appropriations and indeed with Members of the other body, but the matter still remains unresolved for reasons with which the gentleman is fully as familiar as I am.

Mr. RHODES. If the gentleman would yield still further, I would advise the gentleman where to nudge, if I really thought it was necessary, but my own experience has been that the Speaker and the majority leader know exactly where to nudge when the occasion arises and I have full faith in their ability to determine the focal points.

Mr. WRIGHT. I would state further to the gentleman from Arizona on that point and remind him that I was the self-appointed nudger yesterday but there were no nudgees.

Mr. CEDERBERG. Mr. Speaker, if the gentleman will yield, I can tell you whom I think we ought to nudge. We have been engaged in this conference on HEW for several months now and I do not think that next week is going to make any change or that we are going to be able to resolve this language difficulty. I just do not believe that will be happening. I believe that the sensible thing to do would be to come up with a continuing resolution from the House and put a date on it for sometime next

year and if the Senate wants to take the responsibility for the employees not being paid, then let them take the rap. I think that will nudge them.

Mr. MAHON. Mr. Speaker, if the majority leader would yield, would the gentleman not agree that this matter involving the Labor-HEW appropriation bill must be handled either as a part of the appropriation bill or as a part of the continuing resolution?

A continuing resolution provides no magic solution because the same issues involved in the big bill would also be addressed in the continuing resolution, and it would not be possible to pass a continuing resolution without dealing forthrightly with the matter of the abortion issue. That ought to be understood and I hope it will be understood. There is no way to dodge the responsibility of coming to a decision between the House and the Senate on the abortion issue.

Mr. CEDERBERG. Mr. Speaker, will the gentleman yield further?

Mr. WRIGHT. I yield to the gentleman from Michigan.

Mr. CEDERBERG. Mr. Speaker, I think there is a possibility that we could take up the continuing resolution on this very subject, and there will be some amendments, and the House will be doing what it has been doing for several months, and then we can send the resolution over without that amendment on and let the Senate decide whether or not they want those employees to get paid.

I remember some years ago when this House adjourned and went home and we let the Senate—at that time Senator Dirksen and I believe former President Johnson were the leaders and they did not like it. But here we are and I do not see how we are going to go up and down this road for another 2 weeks. It does not make any sense to me.

Mr. WRIGHT. The gentleman makes a good point of course. If, however, there is any resolution short of one that might cause this entire program of the Government, or these multiple programs of the Government to be halted in their tracks, then surely that resolution ought to be sought.

Mr. CEDERBERG. Of course.

Mr. WRIGHT. And it ought to be pursued and without seeking to determine, as between the House and the Senate, whose fault it was.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Of course I yield to the minority leader.

Mr. RHODES. Mr. Speaker, I just had a thought as to where the Speaker and the majority leader might do a little nudging. It seems to me, from what the distinguished chairman of the Appropriations Committee has said, that the idea of a continuing resolution does have problems and that perhaps we could find ourselves at the same impasse as those measures we have already attempted.

But getting down to the basic disagreement, the basic disagreement has to do with human life, the so-called human life amendment. Would it be possible for the majority leader and the Speaker to sit down with the majority members of the Judiciary Committee and agree upon some scenario by which that human life amendment would be allowed to proceed to hearings and proceed to votes and to have some consideration? Personally I think that there would be many people who feel constrained to remain against the amendments to the Hyde amendment who would look at their position again if they were assured that the human life amendment—which after all is I think the way that this issue should be brought up—would move. It has been sitting there, and as Members will recall, the Judiciary Committee did have hearings in the last Congress, but very late, with no idea that any action would be taken, and no action was taken.

I am talking about a real movement which would actually allow the American people to have a vote on this really important issue. The House has before acted upon constitutional amendments and voted them out not necessarily because the Members agreed with them but because the Members recognized that the amendments were important issues to the people which should be decided by the legislatures of the States.

I think the human life amendment is one of those issues and it should be voted out.

I suggest to the majority leader that if this were done, perhaps in future appropriation bills we would not find ourselves facing this impasse which, believe me, is not the last time this impasse will occur.

Mr. WRIGHT. The gentleman's suggestion certainly merits consideration.

Mr. RHODES. Mr. Speaker, I thank the distinguished majority leader.

PERMISSION FOR COMMISSION ON ADMINISTRATIVE REVIEW TO FILE A REPORT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that notwithstanding the sine die adjournment of the 1st session of the 95th Congress, the Commission on Administrative Review may be permitted to file with the Speaker its final report not later than midnight December 31, 1977, and that the report be ordered printed as a House Document of the 95th Congress, 1st session.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

CONFERENCE REPORT ON H.R. 9375, SUPPLEMENTAL APPROPRIATIONS FOR FISCAL YEAR 1978

Mr. MAHON. Mr. Speaker, I call up the conference report on the bill (H.R. 9375) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of November 8, 1977.)

Mr. MAHON (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. MAHON) and the gentleman from Michigan (Mr. CEDERBERG) will be recognized for 30 minutes each.

The Chair recognizes the gentleman from Texas (Mr. MAHON).

Mr. MAHON. Mr. Speaker, we have before us today a conference report on a multibillion dollar supplemental appropriations bill. The sums involved total more than $7 billion. Since it has been some time since the supplemental bill was before the House and in view of the fact that the other body added on several hundred million dollars to the bill, I think it might be helpful for me just to recite some of the issues, some of the programs and projects, that are involved here. I shall go down the list in order to refresh our minds on some of the projects and some of the appropriations, although not in any particular order.

There is Federal crop insurance, $30 million, in the bill; watershed and flood prevention operations, $30 million; agricultural conservation programs, $36,600,000; Environmental Protection Agency research and development, $44,200,000; EPA abatement and control, $85 million.

Waste treatment plant grants, $4.5 billion—the biggest item, of course, in the bill; surface mining reclamation and enforcement, $67 million; Federal Energy Administration, $273 million; strategic petroleum reserves, $383 million; assistance to refugees from Cambodia, Vietnam, and Laos, $124 million.

The Clinch River breeder reactor, one of the controversial issues which will be before us today, is $80 million.

SBA loans, principally to farmers, is $1.4 billion. There are various defense items including great acceleration of the cruise missile program, $423 million.

Then, there is a recission which will be before us during consideration of this measure, a recission of $463 million that was appropriated in fiscal year 1977 which has not been used. The President has sent us a recission request for this amount. The Senate has approved it, and we will have a vote on that matter during the afternoon.

There are various other items which I will include in the RECORD. I do not think it is necessary to go into great detail. The conference report has been printed in the RECORD, and Members will have an opportunity to participate in discussion of the various controversial items in the bill.

At this point, I offer a summary table by chapter showing the conference agreement compared with the budget estimate and the action on the bill by the House and Senate:

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY—SUPPLEMENTAL APPROPRIATIONS BILL, 1978

Chapter	Subcommittee summary	New budget authority				Conference compared with—		
		Estimates, fiscal year 1978	House, fiscal year 1978	Senate, fiscal year 1978	Conference, fiscal year 1978	Fiscal year 1978 estimate	House bill	Senate bill
I	Agriculture and Rural Development:							
	New budget (obligational) authority	4,145,000	34,145,000	101,157,000	102,745,000	+98,600,000	+68,600,000	+1,588,000
	(Insured loans)			(100,000,000)				(−100,000,000)
	(Liquidation of contract authority)			(36,600,000)	(36,600,000)	(+36,600,000)	(+36,600,000)	
II	Housing and Urban Development—Independent Agencies:							
	New budget (obligational) authority	4,625,000,000	4,630,500,000	4,779,947,000	4,638,047,000	+13,047,000	+7,547,000	−141,900,000
III	Interior and Related Agencies:							
	New budget (obligational) authority	1,303,792,000	466,363,000	757,249,000	746,813,000	−556,979,000	+280,450,000	−10,436,000
IV	Labor and Health, Education and Welfare:							
	New budget (obligational) authority	110,337,000	29,070,000	345,689,000	150,689,000	+40,352,000	+121,619,000	−195,000,000
	Appropriations	95,337,000	14,070,000	330,689,000	135,689,000	+40,352,000	+121,619,000	−195,000,000
	Authority to spend debt receipts	15,000,000	15,000,000	15,000,000	15,000,000			
V	Public Works:							
	New budget (obligational) authority		121,000,000	104,450,000	106,450,000	+106,450,000	−14,550,000	+2,000,000
	(By transfer)			(875,000)	(875,000)	(+875,000)	(+875,000)	
VI	State, Justice, Commerce, and the Judiciary:							
	New budget (obligational) authority	1,408,850,000	1,407,000,000	1,407,500,000	1,407,000,000	−1,850,000		−500,000
	(By transfer)	(2,668,000)	(2,668,000)	(2,668,000)	(2,668,000)

GENERAL LEAVE

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MAHON. Mr. Speaker, I reserve the balance of my time.

Mr. CEDERBERG. Mr. Speaker, I yield 8 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I rise to explain for my colleagues why I at the appropriate time will offer a motion to recommit which, if approved, will instruct the House conferees to recede from their disagreement to the amendment of the Senate numbered 46 and concur therein with an amendment as follows: in lieu of the sum provided in said amendment insert $11,500,000.

The purpose of this instruction in this motion is to restore order where chaos exists. I fear that there may be some truth in the criticism that we are being dangerously casual with the future of American railroads. In our often justified exasperation with Amtrak for its inability to make progress toward the goal of operating a profitable passenger railroad system, or even a system operating at modest deficits, we overlook the fact that some real progress has been made after a quarter century of neglect. According to the New York Times, patronage has been growing at an average of 7 percent a year. Polls indicate that the new passengers are not bus-riders, but overwhelmingly are drivers of cars.

It is not illogical to suggest that rail transportation should have a greater role to play in solving our energy crisis. On October 27, 1977 it was widely reported that the chairman of the Joint Chiefs of Staff, General Brown, stated that this country's lagging fuel supply poses the single largest threat to our national security. It is folly to prematurely begin to dismantle this fuel efficient railroad passenger system when our mounting dependence on the use of foreign oil is increasing daily. However, progress cannot be made toward the goal of attracting greater ridership and Amtrak cannot become an effective national resource in coming to grips with our energy crisis unless both Amtrak and Congress clearly understand what the optimal route structure of its system should be.

It is clear that some changes must be made in the current structure. By asking for concurrence with the Senate and requesting that Amtrak be granted an additional $3.5 million over that recommended by the House/Senate conferees, I am only asking that, in the main, Amtrak's current system be left intact for the few short months until we are presented with the results of a comprehensive reexamination of Amtrak's route structure from a zero base as was called for by the joint conferees in the current conference report. This analysis is to be completed by the Department of Transportation, in cooperation with Amtrak, by March 1, 1978.

The route structure analysis will provide a blueprint for an optional national railroad passenger system based upon current and future market and population requirements. The report will provide the means of redetermining our Nation's present and future rail passenger transportation needs in a logical, orderly fashion. I believe that this approach contrasts favorably with the current Amtrak rush to target routes showing large operational deficits as candidates for cancellation without hasty, secondary regard for the volume of passengers served or the potential for future ridership. This is especially true in light of an improving Amfleet. To allow discontinuance of service where the Department analysis may show that service should have been continued makes no sense at all. Such an approach will ultimately lead to greater waste of the economic and capital assets that the conferees obviously are trying to preserve with the restrictive recommendation.

In sum, I believe that the extra $3.5 million that will be appropriated if this recommital motion is ultimately successful, is small insurance against the greater financial risk of unnecessary restart costs. Also, I believe that a fuel efficient passenger railroad system is clearly in the national interest in light of our increasing balance-of-payments deficits resulting from dependency on foreign oil.

The public cost of Amtrak's rail system may be expensive, but fiscal commonsense demands that it should only be reasonably so. By our motion to recommit it is not my intention to throw good money after bad, but to insure that decisions with respect to Amtrak's operations proceed in logical fashion and are not made under the gun of financial desperation.

Mr. PATTEN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. Yes; I yield to my friend, the gentleman from New Jersey.

Mr. PATTEN. Mr. Speaker, every time I have seen a release from Amtrak, I have noted they were blaming the Congress for not giving them the right amount of money. Does the gentleman favor the criticism they have had of our Committee on Appropriations?

Mr. CONTE. Mr. Speaker, I have mixed feelings on this matter. Amtrak wanted $500 million. In the regular bill we gave them all but $11.5 million.

This is what my amendment would do: It would bring the amount up to the amount they had requested and what the administration had requested at the beginning of the fiscal year, which was a half a billion dollars.

If I may say this to the gentleman from New Jersey, I think that Amtrak has had plenty of time to put its house in order.

Mr. PATTEN. Mr. Speaker, if I had the proper assurances, I might give the gentleman a vote.

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Speaker, is there any language in the gentleman's instructions accompanying his motion to recommit that would prohibit Amtrak from terminating those lines it has announced it is going to terminate?

Mr. CONTE. Mr. Speaker, to answer the gentleman's question, no. My amendment is a very clean one. It restores $3.5 million. I did mention that before in my speech.

My amendment would restore $3.5 million, and it leaves everything else intact until their report comes out on March 1. I would have preferred to have $18 million but I realize that government is the art of compromise. The gentleman from Michigan (Mr. CEDERBERG), who was good enough to allow me to offer the motion to recommit, would argee to the motion with only a $3.5 million increase. Under the rules of the House, he has the authority as the ranking minority Member, so I went along with this procedure.

I know the gentleman from Florida (Mr. YOUNG) is interested in the Florida route. He has spoken to me on that issue many, many times. I know of no Member who has worked harder for maintaining that route, and I want to commend the gentleman and state that I will do everything I can to help him in his efforts.

Mr. MAHON. Mr. Speaker, I yield such time as he may consume to the chairman of the Subcommittee on Agriculture and related agencies, the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, in connection with the conference report on the supplemental appropriations bill now before us, I would like to elaborate on the committee's intention with respect to the $30 million provided for section 216 funds. Section 216 funds are provided for the purpose of repairing damages to watersheds which would present a possible threat to life or property. Therefore, under these conditions I would like to make it clear that repair work to dam No. 37 on the Hatchie River in Mississippi would qualify since until the dam is repaired, it constitutes a present danger.

Mr. Speaker, I believe the other items in chapter I of the bill are self-explanatory, therefore, I will not discuss them at this time.

Mr. Speaker, since this Congress and this calendar year are soon coming to an end, I would like to call to the attention of the House, H.R. 9608, which I introduced on the 17th day of October and which reads as follows:

H.R. 9608

A bill to protect the economy of the United States; domestic agriculture, labor, and industry, by the maintenance of farm income and purchasing power

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the loan rates and target prices for 1977 through 1981 set forth in the Food and Agriculture Act of 1977 (Public Law 95–113) for wheat, feed grains, upland cotton, rice, peanuts, soybeans, and sugar shall be increased periodically to reflect costs of living increases granted to individuals in the public and private sector or to reflect increases in the minimum wage.

The Secretary of Agriculture is also hereby authorized and directed to utilize section 32 funds to maintain both adequate supplies and prices for perishable agricultural commodities. Section 32 purchases shall be used to maintain a price for perishable commodities that reflects costs of living increases granted to individuals in the public and private sector or increases in the minimum wage. All laws in conflict are hereby modified to conform to this provision.

Agriculture, and those engaged therein, must be kept on a parity with industry and labor. Under my bill the target or loan rate would rise in line with what the farmer has to pay.

Remember history shows if agriculture, the base of our economy, goes under then our overall economy will follow.

I am hopeful the President and the Secretary of Agriculture will recommend this change to existing law. If not, I shall urge the legislative committee and the Congress to approve these changes.

Mr. SISK. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from California.

Mr. SISK. Mr. Speaker, I thank my colleague, the gentleman from Mississippi, for yielding.

This is a matter that I had discussed with my colleague earlier, and let me just quickly try to make some legislative history here.

Mr. Speaker, many farmers in the Western States (California, Washington, Oregon, Idaho, Utah, Nevada, and Arizona) were faced a year ago with sizable reductions in their water supplies. They had a desperate need to conserve and enhance their available water supplies. In January, President Carter promised help. But, they could not wait until the necessary authorizing legislation was passed. The conference report before us contains language that the moneys appropriated be for reimbursement to farmers for expenditures incurred after a Presidential disaster declaration.

Was it the intent of the conferees that help be given to those farmers who because of reduced water supplies installed water conserving or enhancing practices during the period of January 20, 1977 (or a later date of a Presidential declaration) and May 4, 1977 when the funds were actually available?

Mr. WHITTEN. It was our intention to do that insofar as we were able to.

Mr. SISK. Mr. Speaker, I thank the gentleman. I appreciate the help of my colleague, the gentleman from Mississippi (Mr. WHITTEN), because certainly this has been a serious problem with us. I am grateful to him and to the committee for their intent in connection with this matter.

Mr. McFALL. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to my colleague, the gentleman from California (Mr. McFALL), a member of the committee.

Mr. McFALL. Mr. Speaker, I wish to thank and commend the gentleman for his help in this matter and then commend my colleague from California (Mr. SISK) for his work for the farmers in this issue. The conference report now before us contains an appropriation of $36.6 million for the agricultural conservation program. I strongly support this appropriation, and wish to advise the House of its importance to the farmers throughout several Western States.

About a year ago these farmers were confronted with a worsening drought that threatened the water supply for their farm operations. Early in the year, the President declared many areas to be drought emergencies. Most of my own congressional district in California, for example, was declared to be a drought emergency area on January 20, 1977. Many farmers responded by initiating water conserving or enhancement projects, such as drilling new wells and lining irrigation ditches.

On May 4, 1977, Public Law 95–26 was enacted, and it provided for cost-sharing grants to farmers who undertook qualified water conserving and enhancing practices. Many farmers were unable to prudently wait from January until May to commence these practices. To these farmers, the Department of Agriculture would provide no assistance under the cost sharing grant program, known as the drought and flood conservation program.

Public Law 95–97, enacted on August 12, 1977, provided that cost-sharing grants could be made to farmers who instituted water conserving or enhancing practices between the time their area was declared to be in a drought emergency by the President and the time the drought and flood conservation program began on May 4.

The conference report now before the House will appropriate the necessary

funds to make cost-sharing grants to farmers who instituted eligible practices between January 20, 1977 (or a later date of a Presidential declaration), and May 4, 1977. The report language states that the moneys appropriated will "be for reimbursement to farmers for expenditures incurred beginning on the date of the Presidential disaster as authorized by law."

Mr. Speaker, the Federal Government made a commitment to assist farmers affected by the drought, and then tried to deny aid to those farmers who exercised the most foresight. Adoption of this conference report will permit the fulfillment of that commitment, and I urge its adoption by the House.

Mr. WHITTEN. Mr. Speaker, I appreciate the statement of my colleague, the gentleman from California (Mr. McFALL). We are well aware of the extreme difficulties that they have had in this matter.

Mr. CEDERBERG. Mr. Speaker, I yield 5 minutes to the gentleman from Montana (Mr. MARLENEE).

Mr. MARLENEE. Mr. Speaker, I rise in opposition to the conference report, specifically in opposition to amendment No. 46 concerning Amtrak appropriations. I will be supporting the motion to recommit the conference report to obtain $3.5 million more for Amtrak and to direct Amtrak not to eliminate any present routes.

The current conference report language calls for total elimination of some individual routes in the present passenger rail transportation system without regard to the total system.

Mr. Speaker, I fear that the routes which will be terminated under direction of the conference report will not be restored. And even if they should be restored at some future date, I suspect the cost of restoring them would far exceed any savings we will make during the current fiscal year.

If total routes are abandoned to meet the budget requirements now being imposed, the experience and improvements gained over the past 6 years will be sacrificed. I question if it makes any economic sense to terminate routes for a few months.

If a route is terminated, what will we stand to lose?

First, the terminals and facilities, already in disrepair in many cases, will be torn down or will deteriorate even more.

Passengers now accustomed to using the trains will be lost and will have to be attracted back at considerable expense and effort.

And even more importantly, experienced crewmen will be lost.

To its credit the conference report calls for the "zero-based route study that the Department of Transportation and Amtrak is directed to complete by March 1." However, in view of this study, does it make sense to force uncompromising decisions before Congress can study the results of this report? I do not think so.

Mr. Speaker, according to the Department of Transportation, petroleum products account for more than 95 percent of the energy consumed in transportation. And transportation uses more than 50 percent of the national annual petroleum consumption.

When this Nation is spending $40 billion per year to import foreign oil, can we seriously consider abandoning parts of our mass transportation system which offers the greatest potential for moving our citizens in an energy-efficient way? I think not.

What is at stake here is whether we are willing to appropriate the needed $18 million to keep the trains running.

The argument can come up if railroad passenger transportation really is energy efficient. We need look no further than the 1974 report by the Department of Transportation which studied this issue on the basis of passenger-miles using maximum seating capacity.

Depending on whether relatively old locomotives or new ones were used, Amtrak rates 225 to 360 seat-miles per gallon.

By comparison, intercity bus transportation rates 282 seat-miles per gallon; airlines rates from a low of 30 seat-miles on twin-engine jetplanes to 60 for wide-body jets; and automobiles rate from 72 to 120 depending on whether it is a subcompact or a luxury automobile. Clearly, if the trains are full, rail transportation has an edge.

In light of our need to conserve energy, we should be seeking to improve the energy-efficient rail transportation system rather than declaring that entire routes should be eliminated.

The Northern Tier States are already reaching a crisis stage in gasoline and middle-distillate fuels. How do we know that more people will not be turning to the trains out of necessity, particularly if the service is improved.

Elimination of service now will be particularly hard on communities along such lines as the Empire Builder and the North Coast Hiawatha which traverse Montana between Seattle and Chicago. Many people along these routes depend on Amtrak as the only form of public intercity transportation. Businesses also depend on the service for products and supplies.

Before Amtrak, the railroad passenger business got into trouble because of more attractive energy-inefficient types of service. Then to reduce deficits, the railroads started to curtail service and actually discouraged people from riding the trains. It came to a point where this Nation was either to lose rail passenger service or bolster and improve it. Six years ago Congress made the wise decision to try to save it.

I am of the opinion that numerous improvements must be made to attract new passengers to the point where deficits can be reduced. I suggest that if the connecting routes are abandoned today, the remaining routes will also drop in service and they too will be in worse trouble.

We should and must make policy decisions on Amtrak. Those decisions should make economic sense with all factors being weighed.

But under the terms of the present conference report the decisions have been made. We lose our option without the benefit of the report we have asked for.

I urge you to join me in voting to recommit the conference report so rail passenger service can be weighed in proper perspective as a national option to save energy. The price we pay today may be insignificant in comparison to the cost of the wrong long-range decision.

Mr. BAUCUS. Mr. Speaker, will the gentleman yield?

Mr. MARLENEE. I yield to the gentleman from Montana.

Mr. BAUCUS. Mr. Speaker, I thank my colleague, the gentleman from Montana (Mr. MARLENEE) for yielding to me and for the important contribution he has made here. I join with the gentleman in urging the Members to support the motion to recommit. Amtrak is the only form of surface transportation available in many parts of our country, and is very important in Montana. This is especially true in view of the fact that rural America also has very little air service.

Mr. Speaker, although we are here to consider a supplemental appropriations bill, many of our districts stand to lose substantially if it is passed in its current form.

There is language in the bill that requires Amtrak to make no further frequency reductions but, rather to quickly move ahead with massive route eliminations. This language would have the effect of robbing many rural States, including my State of Montana, of their vitally needed Amtrak service.

Amtrak's authorizing committees in both the House and Senate have announced plans to hold hearings on Amtrak early in the next session, GAO is doing an audit of Amtrak, and the Department of Transportation is to submit a study on Amtrak to Congress by March 1. Given all of this interest in seeking ways in which Amtrak can become a more viable transportation system, it seems criminal to me that we should take it upon ourselves today to formulate a transportation policy which adversely affects millions of our citizens.

I worry that once these routes are eliminated, they will never be seriously reconsidered again. Montanans support Amtrak through their tax dollars just as citizens along the Northeast Corridor do, and our routes also deserve full consideration during the hearings and study periods next spring. However, passage of the language now in the supplemental appropriations bill will prevent an adequate consideration of our routes.

Therefore, I will support Mr. CONTE's motion to recommit the bill with instructions to include language requiring Amtrak to freeze all current routes—and the service along those routes—until March 1 of next year. This language would insure a fair and complete study of the entire Amtrak system. It would allow Amtrak to make route and serve decisions next year with clear guidelines from Congress. In

short, Mr. CONTE's motion will permit the formulation of a sound national transportation policy for Amtrak.

I urge my colleagues to be sensitive to the hardship that the language in the bill would place on many of our States, and ask that you support Mr. CONTE's motion. This is the only way we can get better control over Amtrak.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. MARLENEE. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Speaker, I just want to commend the gentleman in the well upon his efforts in terms of supporting the proposed motion to recommit. Earlier, Mr. Speaker, I had inserted in the RECORD a series of communications between Amtrak officials and myself, and I find indeed a lack of understanding in terms of these communications. I think we ought to at least have the opportunity to look into the matter until March 1. So, Mr. Speaker, I urge an aye vote on the motion to recommit.

Mr. MAHON. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Pennsylvania (Mr. FLOOD).

Mr. FLOOD. Mr. Speaker, the Labor-HEW chapter of this supplemental appropriations bill as agreed to by the conferees provides appropriations totalling $150,689,000. This amount is $40,352,000 more than requested by the President, $5,000,000 more than provided by the Senate, and $121,419,000 above the amounts allowed by the House. The substantial increase over the House bill is due primarily to the funds provided for the Indochinese refugee assistance program which had not been authorized when the House acted, but for which $71.7 million had been requested by the President.

These amounts are exclusive of the Community Services Administration for which the Senate bill includes $200,000,000 for the emergency fuel assistance program. This item was reported in disagreement and will have to be resolved by the entire House and Senate.

I will now summarize the agreements reached by the conferees on the Labor-HEW items.

The Senate added language to the bill earmarking funds specifically for 82 new positions for the Department of Labor. Although the House conferees had no objection to the additional jobs, we felt it was unnecessary to include bill language to accomplish this. We agreed to include language in the joint explanatory statement for this purpose.

Another Senate amendment involved a technical matter affecting loan and loan guarantee funds for hospital construction. The Senate added language which extends the availability of funds appropriated in earlier years so that approved construction projects can be completed. These projects are already under way. No new funds are involved. The House conferees agreed to this extended availability.

With respect to construction of "model intercultural" facilities at Georgetown University in Washington, D.C., and Tufts University in Boston, the House provided $9.1 million for construction grants, $7.2 million in construction loans, and $2.9 million from unobligated balances in prior year appropriations for academic graduate facilities. The Senate had deleted these funds. The conferees agreed to only reduce the grant amount from $9.1 million to $5 million and to accept the House position on the balance of funding. The House conferees were convinced that this would provide sufficient funds to complete both of these centers which may then serve as models for similar programs across the country.

The conferees agreed with the Senate on funding for assistance to Indochinese refugees. The House had not acted on this item because the authorizing legislation had not then been enacted. Since the extension of the program has now been signed by the President, the House conferees agreed with the Senate on the amount of $124,000,000. These funds will continue both the reimbursement to States for welfare costs for refugees and $10,000,000 for special educational projects. Fiscal year 1978 is the first year of a 4-year phaseout provided for under the new legislation for this program.

The conferees also agreed to $1,719,000 included by the Senate for the settlement of legal claims arising between HEW and the State of Washington because of the transfer of the Tacoma Indian Hospital. This is a unique case and we believe this appropriation will produce a fair settlement of a claim which could have resulted in protracted legal costs to the Government.

Finally as mentioned earlier, there is one item which the conferees could not resolve and which is reported in disagreement. This is amendment No. 29—the emergency fuel assistance program. The House had not included funds for it. Most of the House conferees objected to this program. I want to make it clear that I do not agree with the majority of the House conferees on this item. I intend to support the Senate position when the motion is offered on amendment 29 after the adoption of the conference report.

Mr. MAHON. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Speaker, Senate Report 95–564, which related to this supplemental appropriations bill, states that Congress intended that the retroactive reduction in interest rates on disaster loans which resulted from Public Law 95–89 being effective retroactive July 1, 1976, was to result in a reduction in individual payments for the full-term of the loan. The report also states that Congress intended that persons receiving loans at least have the option to decide for themselves whether they will repay the loan over a shorter period of time or pay at a rescheduled and lower monthly rate.

As chairman of the House conferees at the conference on H.R. 692, I can state that Senate Report 95–564 does not express the intent underlying H.R. 692. No lowering of the amount of each payment was contemplated. The conferees on H.R. 692 stated:

> The SBA will be required to make adjustments in loans made prior to the date of enactment; however, the Conferees intend that any excess interest which has already been paid on such loans be applied as a credit against future payments; it does not need to be refunded.

Retroactively reducing interest rates on disaster loans was intended simply to save the borrower money and to give equal treatment to borrowers without regard to the time when they applied for the loan. SBA bases its loan amortization on the applicant's "ability to repay." This ability to repay was determined at the time the loan was approved and the maturity, or term of the loan, set. Reducing the amount to apply to interest automatically increases the ability to increase principal payments by the same amount. It should not be necessary to recomputate each of those loans and set up a new schedule and would be contrary to the requirement that each payment be based on the ability to repay.

Mr. MAHON. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Speaker, chapter III of the conference agreement on the supplemental includes $746,813,000, which is $280,450,000 above the House bill, $10,436,000 below the Senate bill, and $556,979,000 below the budget request. The most significant change from the House bill is an increase of $273,194,000 for energy programs in the Federal Energy Administration. The amount of $293,611,000 was stricken from the House bill on a point of order. The conference amount is $20,917,000 under that amount. The conference agreement provides $253,110,000 for energy programs not yet authorized, but on which tentative agreement has been reached in the ongoing energy conference, including $200 million for conservation grants for schools and health care facilities; $25 million for conservation grants for local government buildings; $6,630,000 for assistance to local regulatory commissions; $20 million for solar heating and cooling installations in Federal buildings; and $1,480,000 for administration of these programs. The conference report also includes $20,084,000 for programs having existing authorization, and reflects added emphasis in energy information and analysis, regulatory programs, appliance standards, Federal energy management, solar energy commercialization, and coal utilization, as well as a new initiative in the beginning of a loan guarantee program for opening and expanding small underground coal mines.

The conferees also recommend an increase of $6,800,000 over the House bill for the Office of Surface Mining Reclamation and Enforcement. Of the in-

crease, $1,100,000 is for added reimbursement to States for enforcement costs necessitated by the Surface Mining Control and Reclamation Act of 1977, and $5,700,000 to initiate State mineral institutes as authorized by the law. This will provide grants of $110,000 each for 20 institutes, $3,200,000 for research grants and fellowships and $300,000 for program administration.

An increase of $1 million over the House bill is included in the Energy Research and Development Administration account for the magnetohydrodynamics (MHD) program.

The last energy related item is a reduction of $3 million in the Geological Survey because contract money for seismic data gathering in the Beaufort Sea is not needed in the urgent time frame originally expected.

The conference bill is $320,000 over the House bill for operation of Indian programs reflecting an increase of $520,000 to develop a technical assistance program for development of energy minerals resources, and a decrease of $200,000 for trust activities. In the Bureau of Indian Affairs construction account, increased construction costs of $300,000 for the Tamgass Fish Hatchery are included.

The final difference from the House bill is a $1,836,000 increase for the Forest Service for forest land management for timber sale preparation. The funds in part restore funds appropriated in fiscal year 1977 that lapsed due to the inability of the Forest Service to obligate the funds as a result of employment ceilings. The continued inability of the Forest Service to obligate all available funds in a timely manner as a result of employment ceilings shall result in prompt submission of rescission or deferral proposals. This will provide the Congress with adequate opportunity to take appropriate action.

Mr. MAHON. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Speaker, the conference report on H.R. 9375 is consistent with the allocation made to the Appropriations Committee under the Budget Act. Allocations to the committee were: Budget authority of $327,950 million and outlays of $300,640 million. Bills enacted to date and mandatory spending items covered under the continuing resolution that count against this allocation total $313,553 million in budget authority and $295,405 million in outlays.

The balances available within the allocations are budget authority of $14,397 million and outlays of $5,236 million. This is adequate to cover the amounts in this supplemental conference report: Budget authority of $6,190 million and outlays of $550 million. This will leave budget authority of $8,207 million and outlays of $4,686 million within the Appropriations Committee allocation.

There are a number of major items that remain to be considered within the balance of funds available to the Appropriations Committee under its Budget Act allocation:

The energy program, perhaps amounting to $2.8 billion;

Funding for the public service jobs program amounting to $3.8 billion;

Other youth employment and social services initiatives, $1.4 billion. With a balance of $8.2 billion of budget authority and $4.7 billion in outlays, it is obvious that restraint will be necessary.

For the congressional budget as a whole, the status report filed on Tuesday shows that the amounts remaining under the aggregate ceilings or above the revenue floor of the second budget resolution are as follows:

[In billions]

Revenues	$1.1
Budget authority	15.0
Outlays	3.5

Against these amounts—in addition to those already mentioned in connection with the Appropriations Committee—we must provide for the effects of pending changes in social security legislation, a tax bill, possible increases in uncontrollable farm subsidies, health care programs, income-security programs, interest, and a host of other contingencies. Some of these additions were assumed in our second budget resolution. Some were not. The President will send up a complete reestimate of the 1978 budget when he sends us his 1979 budget in January. The severity of this winter's weather and the Government's response are always unknown: There may be demands for more funds for disaster relief; international developments may require more funds; economic conditions may change rapidly and drastically.

Mr. Speaker, the congressional budget process sets aggregates, overall ceilings on budget authority and outlays, and a floor under revenues. Within these aggregate amounts, the system is flexible enough to permit using money originally destined for one purpose for another. But the ceilings remain. Unforeseen items—such as the SBA disaster loan appropriations—necessarily limit the amount of flexibility remaining for the balance of this fiscal year. It is a simple fact that not all the items assumed under the second budget resolution totals can be funded when Congress makes appropriations to handle unforeseen contingencies.

The Budget Committee will monitor the situation carefully, and I will report to the House soon after the President's budget is submitted next session on the prospects for adjustments in the fiscal year 1978 congressional budget total.

Mr. MAHON. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Tennessee (Mr. GORE).

Mr. GORE. Mr. Speaker, I thank the distinguished gentleman from Texas (Mr. MAHON) for yielding me this time.

Mr. Speaker, as a representative of a region immediately threatened by the loss of all railway passenger service, I take strong exception to the language of this conference report. I support a higher level of funding than the $8 million proposed by the conferees. Further, I will support the motion to recommit. I will also ask for a no vote on the previous question when it is requested on the motion to recommit. And I intend to offer an amendment at that time, if I am allowed to do so, to raise the figure in the motion to recommit from $11,500,000 to $18 million.

Mr. Speaker, Amtrak is certainly beseiged by numerous budgetary and management problems. However, the instructions of this conference report would magnify those problems and, indeed, create even further confusion in an area of public service which can only be described as chaotic.

I applaud the mandate of the conferees to the Department of Transportation to undertake a zero-based route study. The results of that study, which are due in late March, should provide this Congress with the first truly objective and manageable tool to determine the future of railway passenger services in this country.

To require Amtrak to eliminate as many as six major long haul routes would effectively dismantle our national network before the Department of Transportation findings are available. In my judgment, this premature action would be a serious mistake which would hamper the deliberations of the Congress on the implementation of the Department's recommendations. The purpose of my amendment, which I hope to offer shortly, is to prevent the cancellation of any basic routes now being operated.

This critical moment in the development and preservation of a workable national railway passenger system requires careful consideration of many factors.

I believe that we should await the results of the DOT study and provide Amtrak with the required funding to forestall any route elimination until those results are submitted to and acted upon by the Congress.

The implications of the conference action are not merely regional or limited to the narrow corridors of trains about to be eliminated.

The energy crisis mandates more efficient forms of transportation.

We need a national rail service for passengers. We can have one if we go about it in an intelligent manner.

Changes are about to be made in the Floridian route, for example, but cannot be made without a higher level of funding to continue the service. My amendment is designed to allow Amtrak to reroute the Floridian through Atlanta and continue service between Chicago and Florida.

I urge a "no" vote on the previous question when the motion to recommit is made so that this level can be increased, and I urge a "yes" vote on the motion to recommit, as amended.

Mr. GEPHARDT. Mr. Speaker, will the gentleman yield?

Mr. GORE. I yield to my friend, the gentleman from Missouri.

Mr. GEPHARDT. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to associate myself with the remarks of the gentleman from Tennessee. In my view, it would be precipitous and premature to direct Amtrak to cut any existing routes before the Congress has seen the results of the Department of Transportation zero-base study of the corporation's budget and has received DOT's recommendations for revising the rail passenger network.

The present financial situation of the National Railroad Passenger Corporation presents the Congress with the basic question of whether rail passenger service should be continued in this country. A good system can offer economical and energy-efficient transportation to the American traveling public, but it is important to find out how much it would cost to develop and maintain a system that provides convenient, comfortable, and reliable service. These fundamental questions deserve comprehensive evaluation before any changes are made in existing routes.

Amtrak is presently reevaluating a number of routes which have great potential for attracting enough riders to become profitable. Of particular interest to me are two trains serving St. Louis: The National Limited, which runs from Kansas City to St. Louis, and on to New York and Washington; and the Inter-American, which runs from St. Louis to Laredo, Tex., connecting with trains to Mexico City. In the past, these routes have been popular among St. Louisans, but ridership has declined in recent years as the quality of service has deteriorated. It would be unwise to discontinue these trains before fully examining the feasibility of realizing their potential.

The motion before us would prevent irreversible action on these and other routes while the future of rail passenger service in this country is determined. I urge my colleagues to join with me in voting to send the supplemental appropriations bill back to conference to correct the language in the committee's report which would result in the premature cancellation of Amtrak trains.

Mr. BINGHAM. Mr. Speaker, will the gentleman yield?

Mr. MAHON. Mr. Speaker, I yield to the gentleman from New York.

Mr. BINGHAM. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, as I am sure my colleagues are aware, I have long been an opponent of the Clinch River Breeder Reactor Project (CRBRP).

I am convinced that this is an unsafe and unnecessary project which would waste billions of taxpayers' dollars should it move forward.

I commend the President for his firm opposition to this project and congratulate him on his veto of the ERDA authorization bill.

Absent any specific authorizing language it is somewhat difficult to ascertain exactly what legal requirements are being attached to the expenditure of the $80 million "for the Clinch River Breeder Reactor Project" which we are considering today. On the legislative record we have the eloquent protestations of the chairman of the authorizing subcommittee (Mr. FLOWERS) who vigorously argued on June 9 against appropriation of any fund for the CRBRP without any authorizing language. We also have the assurances of the chairman of the appropriating subcommittee (Mr. BEVILL) that "no site preparation or construction will be started in the current fiscal year" (RECORD of October 19, at p. 34252). There is stipulation that the $80 million be spent in any particular fashion, only that it be used "for the Clinch River Breeder Reactor Project."

Since there is no authorizing language for the CRBRP this year, we may well have to turn to the administration message to the Congress of May 19, 1977, to define program objectives. The original authorizing statute for the CRBRP, Public Law 91–273, stipulated that any proposed revisions in the Liquid Metal Fast Breeder Reactor program, of which the CRBR is but one component, could be made by the administration through program justification amendments. Section 106(B) of Public Law 91–273 provided that the executive branch could proceed to implement such revised objectives after a 45-day congressional layover period.

Since there was no effective congressional action taken in response to these proposed program revisions, it would seem that the administration may well be entitled to proceed to spend appropriated funds to further these revised program objectives, as stated in the communication of May 19, 1977:

II. CHANGES IN CRBRP DEMONSTRATION PROGRAM

Following Congressional consideration of the proposed amendments to the basis of arrangement for the CRBRP Project, the construction contract will be terminated. All contracts for equipment will be terminated or completed if that is in the best interest of the government, e.g., lower cost, except for development items selected for completion and testing as part of the base R&D program. The developmental components to be selected for transfer to the base program will be limited by the availability of funds. Licensing efforts will be discontinued. Engineering and design efforts will be significantly reduced. Financial, legal and managerial activities will be conducted as required to settle claims, to negotiate open change orders, to inventory materials, work-in-process, and complete equipment and to complete other actions required as a result of the termination activities. Personnel not essential to conducting these termination activities or the systems design activities described below will no longer be supported by the Project. Personnel termination and relocation costs will be paid in accordance with contractual provisions.

Under the proposed plan, systems design will continue at a reduced pace. The effort will include 1) a review of the design of the major systems to determine what simplifications would be feasible and useful to future plant design activities; 2) identification and resolution of outstanding design issues on selected major systems; and 3) evaluation of existing designs and the development of required changes to accommodate the most propitious alternate fuel systems.

I would urge the President to exercise all legal avenues open to terminate this unsafe and unnecessary project, in order that we might proceed in an orderly fashion with the rest of our breeder R. & D. program.

The SPEAKER pro tempore. Does the gentleman from Michigan (Mr. CEDERBERG) have any requests for time?

PARLIAMENTARY INQUIRY

Mr. CEDERBERG. Mr. Speaker, I have no further requests for time.

I do want at the proper time to make a further parliamentary inquiry. Is this the proper time?

The SPEAKER pro tempore. The gentleman may state his parliamentary inquiry.

Mr. CEDERBERG. Mr. Speaker, I would like to make a parliamentary inquiry of the Chair. There will be this matter of the motion to recommit. If the motion to recommit carries, does that mean that the conference report automatically goes back and is recommitted to conference and that we will not at this time take up the amendments that are in disagreement?

The SPEAKER pro tempore. The gentleman is correct.

Mr. BENNETT. Mr. Speaker, I rise in support of the motion that will be offered by the gentleman from Tennessee (Mr. GORE) to recommit the conference report on supplemental appropriations for fiscal year 1978 to include certain Amtrak funds.

The motion to recommit instructs the conferees to insist on language prohibiting Amtrak from suspending any routes until Amtrak completes an overall system study next spring. The motion also instructs the conferees to insist on including $18 million in additional support for Amtrak instead of the $8 million figure in the conference report now.

Earlier this month, Amtrak ordered suspension of the "Floridian" route between Chicago and Florida effective January 19, 1978. This suspension will have a very adverse impact not only on long-distance travelers, but also on intrastate travelers who use the Floridian to travel from one point to another in the same State.

I joined with the other members of the Florida delegation in strongly opposing the suspension of the Floridian, and I think it is especially irresponsible to suspend this route before the completion of Amtrak's system study next spring.

The $8 million supplemental appropriation for Amtrak in the conference report is not enough to allow Amtrak to continue service on the Floridian and other routes until next spring. However, the $18 million figure contained in the motion to recommit would permit the continuation of such routes until completion of the system study, and I urge my colleagues to support the motion.

Mr. BALDUS. Mr. Speaker, I rise in support of the motion that will be offered to recommit to conference with instruction to increase Amtrak's funding and to prohibit line discontinuation until after the Department of Transportation study is completed. If it makes sense to hold off on frequency reductions until the DOT study is done, then it certainly makes sense to also hold off on line dis-

continuations until the study is completed. This route structure analysis should allow DOT to carefully review the existing lines and recommend route structures that will enable us to provide a railroad passenger service that reaches the maximum number of people.

As a representative from a rural midwestern congressional district, I have frequently been called upon to support legislation providing funds for rail service in the urbanized Northeast corridor and I have done so because I recognized the long-term rail interests of the Nation in preserving these lines. Now we find ourselves in a situation where the passage of this conference report could result in the discontinuation of service in rural sectors of the country, such as my own. I urge that we provide the funding and ban such discontinuations until the DOT study is completed.

Rural people do not have the transportation advantages that urban people do. Even Amtrak's skeletal passenger service presents a significant reduction of transportation alternatives in rural areas. We must not allow this to be reduced any further until we have the DOT recommendation on an optimal national railroad passenger system.

COMMENT ON CLINCH RIVER FUNDS IN THE SUPPLEMENTAL APPROPRIATION BILL

Mr. BROWN of California. Mr. Speaker, as we consider the conference report on H.R. 9375, it is important to clarify the origins of one of the provisions of this bill. I refer to the inclusion of $80 million for the Clinch River breeder reactor project. The House and Senate Appropriations Committees included this money for the simple reason that they assumed the authorization for the Clinch River breeder reactor project would be enacted into law. The previous appropriation bill stated this intent quite clearly in its conference report on H.R. 7553, the Public Works appropriations bill, which said:

> Funding will be forthcoming by way of a supplemental immediately following the enactment of appropriate authorizing legislation.

The supplemental appropriations bill included $80 million for the CRBRP because, in the words of the House Appropriations Committee Report No. 95-644—

> Although the authorizing legislation has not been enacted, it has passed both Houses of Congress and action will surely be completed prior to the enactment of this supplemental appropriation bill. Further, this is expected to be the last supplemental appropriation bill relating to energy programs during this session of Congress.

The Senate Appropriations Committee adopted a similar rationale for including the Clinch River breeder reactor project funds in its Report No. 95-564, which stated:

> The Conference Report on the authorizing legislation passed the House and the Senate on October 20, 1977, and the bill has been presented to the President. Accordingly, the Committee by a roll call vote of 16 yeas to 5 nays recommends that the Senate concur in the House allowance.

From this legislative history it is abundantly clear that the $80 million appropriation in H.R. 9375 for the Clinch River breeder reactor project were included on the assumption, and contingent on the basis of the ERDA authorization bill being enacted into law. Since the President vetoed the authorization bill, which included the authorization for the Clinch River breeder reactor project, and was in fact, the reason for the veto, it is obvious that the assumption on which this appropriation was based was wrong. Thus, the legislative intent is clear that the appropriations for the Clinch River project are dependent upon an authorization for the Clinch River project, which does not exist. Without such authorization legislation, the authority to spend this appropriation is quite dubious. In fact, the bill before us would not have even included funds for the Clinch River project except for the assumption that the authorization legislation would become law.

My own feelings about the legislation before us are mixed. I believe that the House and Senate would both reconsider their approval of appropriations for the Clinch River breeder reactor project, in view of the veto of the authorizing legislation for the Clinch River project. I have contemplated parliamentary moves which would recommit this issue to conference, and allow both bodies to reverse themselves on including unauthorized appropriations. I have also joined with many other Members of the Congress in urging the President to veto this appropriations bill, in order to give us an opportunity to repass the supplemental appropriations without the Clinch River funds. And, I have noted before and here today that the CRBRP appropriations in this legislation are unauthorized, and the President is probably not obligated to spend them for that reason alone.

It seems clear that the Congress cannot force the construction of the Clinch River breeder reactor, unless it overrides the veto, but it is not as clear what the President can do with the funds already appropriated for the Clinch River breeder reactor. As one who prefers to avoid ambiguities, I would recommend that the Congress deauthorize this project and rescind its appropriations for the Clinch River breeder reactor project. Unless the House takes steps to do this today, I believe a veto of H.R. 9375 is necessary to accomplish this goal.

Mr. MAHON. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

MOTION TO RECOMMIT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER por tempore. The clerk will report the motion to recommit.

The Clerk read as follows:

> Mr. CONTE moves to recommit the conference report on H.R. 9375 to the committee of conference, with instructions to the managers on the part of the House to move that the House recede from its disagreement to the amendment of the Senate numbered 46, and concur therein with an amendment as follows: In lieu of the sum provided in said amendment, insert: "$11,500,000".

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

Mr. GORE. Mr. Speaker, I object.

The SPEAKER pro tempore. The gentleman from Tennessee (Mr. GORE) objects to ordering the previous question on the motion to recommit.

The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore being in doubt, the House divided, and there were—yeas 41, nays 11.

Mr. GORE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 125, nays 270, not voting 39, as follows:

NOT VOTING—39

Abdnor	Frey	Ruppe
Alexander	Hammer-	Sarasin
Armstrong	schmidt	Smith, Nebr.
Bolling	Jones, Tenn.	Thone
Broomfield	Kasten	Thornton
Chisholm	Kelly	Tucker
Conyers	Krueger	Udall
Cunningham	Long, Md.	Van Deerlin
Dellums	Lundine	Waxman
Dent	McDonald	Whalen
Diggs	Moss	White
Duncan, Oreg.	Murphy, N.Y.	Wilson, Tex.
Eckhardt	Myers, John	
Fithian	Pike	

The Clerk announced the following pairs:

Mr. Dellums with Mr. Pike.
Mr. McDonald with Mr. Udall.
Mr. Waxman with Mr. Abdnor.
Mr. White with Mr. John T. Myers.
Mr. Jones of Tennessee with Mr. Long of Maryland.
Mr. Fithian with Mr. Krueger.
Mr. Alexander with Mr. Broomfield.
Ms. Chisholm with Mr. Armstrong.
Mr. Dent with Mr. Cunningham.
Mr. Duncan of Oregon with Mr. Frey.
Mr. Moss with Mr. Whalen.
Mr. Murphy of New York with Mr. Kelly.
Mr. Tucker with Mr. Thornton.
Mr. Van Deerlin with Mrs. Smith of Nebraska.
Mr. Lundine with Mr. Sarasin.
Mr. Conyers with Mr. Thone.
Mr. Diggs with Mr. Ruppe.
Mr. Eckhardt with Mr. Hammerschmidt.
Mr. Charles Wilson of Texas with Mr. Kasten.

Messrs. ROSTENKOWSKI, FARY, PRESSLER, MINISH, BOLAND, and RODINO, Mrs. HOLT, Messrs. PICKLE, JEFFORDS, GILMAN, McCORMACK, and DICKS, and Mrs. SPELLMAN changed their vote from "yea" to "nay."

Messrs. FINDLEY, LaFALCE, DAN DANIEL, and RISENHOOVER changed their vote from "nay" to "yea."

So the previous question was not ordered.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. GORE TO THE MOTION TO RECOMMIT OFFERED BY MR. CONTE

Mr. GORE. Mr. Speaker, I offer an amendment to the motion to recommit.

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Tennessee (Mr. GORE) to the motion to recommit offered by the gentleman from Massachusetts (Mr. CONTE).

The Clerk read as follows:

Amendment offered by Mr. GORE to the motion to recommit offered by Mr. CONTE: In the amendment proposed in the motion to recommit, strike "$11,500,000" and insert in lieu thereof "$18,000,000".

Mr. GORE (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

Mr. CONTE. Reserving the right to object, Mr. Speaker, as I understand, the amendment is not debatable.

Therefore, I would like to take this opportunity to ask the gentleman from Tennessee (Mr. GORE) about his amendment. Just what are we intending to do here?

I certainly concur and will not object once the gentleman responds.

Mr. GORE. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Tennessee.

Mr. GORE. Mr. Speaker, the purpose of the amendment is to restore the $18 million needed by Amtrak to keep the current routes in operation until the zero-base study is returned to the Congress on March 1.

If we go with the conference report as it presently stands, a great deal of money will be wasted by canceling several lines if they are then reopened later, if we decide to reopen them later it will cost a great deal of money. The intent and purpose of this amendment is to prevent the termination of any of Amtrak's basic routes now in operation.

Mr. CONTE. I want to thank the gentleman from Tennessee (Mr. GORE). As the gentleman knows, I have worked with him on this amendment and I strongly support it. I made it clear to the minority side on the amendment as to how I felt, as I said on the floor of the House during the debate I strongly support the $18 million, and I strongly supported it in conference, and I strongly support it here.

Mr. MAHON. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Texas (Mr. MAHON).

Mr. MAHON. Mr. Speaker, I think the Members should understand what the adoption of this amendment would mean. It would mean that it would take the bill off the floor and there would be no chance to have votes on those matters that have been scheduled for today. The bill would have to be sent back to conference between the House and the Senate. A new conference agreement would have to be achieved. A new conference report would have to be made, written, and filed. And, according to the rules, there would have to be a 3-day lapse before the matter could be reconsidered, unless other actions are taken. Is that correct?

Mr. CONTE. The chairman of the full committee is absolutely right. However, as I understand, this has been done before. This is a rather perfunctory thing. They can go to the Committee on Rules and obtain a rule and return later in the day and bring that bill up in the House.

Mr. CEDERBERG. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. CEDERBERG. Mr. Speaker, I think, just so the Members understand what is happening here, that I should state that when this bill was being considered by the House previously there was zero money provided for Amtrak. Eighteen million dollars was put in in the Senate. As we always do in a House and Senate conference, we agreed on $8 million. That was the compromise.

Then the original motion to recommit increased that to $11,500,000.

Now what this amendment does is to completely cave in to the Senate for the full $18 million.

If that is what the House wants to do, fine.

Let me further add that the Committee on Appropriations has held all of their hearings. The gentleman from California (Mr. MCFALL), the chairman of the subcommittee that handles all of the money here, understands the money problem very well. Here we go from the zero amount in the House bill to the total of $18 million in the Senate bill, instead of the compromise of $8 million, and then the proposal later would have been more than half, or $11,500,000.

Mr. MAHON. Mr. Speaker, if the gentleman will yield further, the adoption of this amendment would mean that the funds in the bill, the $1.4 billion, for instance, for disaster loans to farmers, which it is claimed are needed immediately, would be delayed, is that correct?

Mr. CONTE. Mr. Speaker, as I said to the gentleman earlier, and as I understand after some 20 years on the committee, although not as long as those of the chairman of the full committee,

the gentleman from Texas (Mr. MAHON), I believe he has been there over 40 years, that this is a perfunctory action in that if this is adopted then we will come back and ask for a rule and probably a rule can be granted today, so that before the day is over we can dispose of the conference report, if that is the wish of the chairman.

Mr. McFALL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. Mr. Speaker, I yield to the gentleman from California (Mr. McFALL).

Mr. McFALL. Mr. Speaker, the House in the last vote seems to have indicated that they want to add more money for Amtrak, however I wish to express my opposition to the House of adding more than the $8 million that we have provided for Amtrak.

As the gentleman from Michigan (Mr. CEDERBERG) stated, it would have been $11,500,000 under the motion to recommit of the gentleman from Massachusetts (Mr. CONTE), but it is now $18 million under the proposal which the gentleman from Tennessee (Mr. GORE) offers.

Now this extra $10 million is not really going to provide the opportunity to restore this service that everyone believes will be provided. But what we want to do is to get them to make this route and service study. That is the important thing. Whether it be $3 million or $8 million or $10 million, the important thing is to get this railroad under control, and I believe the gentleman from Massachusetts would agree with me on that.

Mr. MAZZOLI. Mr. Speaker, I rise in support of the motion.

I do not lightly suggest to my colleagues that they recommit this very important piece of legislation, but I believe that not to do so would be to do an injustice to many people who depend upon rail service as their primary means of transportation. These people deserve reasonable and efficient rail service.

The conferees have wisely ordered DOT and Amtrak to provide the Congress with detailed recommendations on a complete nationwide rail passenger system, a system that would provide reasonable and efficient service to the country. This study will be available by the time that the Congress considers next year's appropriations, but it is not available to us now.

All that is now available to the Congress are Amtrak's piecemeal decisions to cut service on various routes and to eliminate others entirely. These decisions are being made in advance of the comprehensive study and may run counter to the findings of that study.

To stop some service now, and then, just a few months later, to restart service would not well serve either the riders of passenger trains or the demands of the budget process. Trains would be mothballed, crews laid off, tracks laid idle. Then, Amtrak management would have to recommission the trains, rehire the crews, and repair the track.

With respect to my own District, the Amtrak board has voted to discontinue the only north-south train serving Louisville, Ky., The Floridian. At the same time the board indicated that while this train will stop running on January 19, 1978, the board believes that a slightly modified version of the train will run sometime in the future.

How far in the future depends upon when the Congress gives Amtrak the money to pay for the running of the line. Seven other lines are scheduled for similar disruption.

Surely, the human and financial costs embodied in this stop-start process justify the House acting to prevent this kind of disruption.

Rather than allow this to happen, this motion allows the House to pay Amtrak's bills until the study is completed. This would cost a mere $10 million while the study itself is budgeted at $25 million. Surely this is not too much to ask.

I urge that this motion be adopted.

The SPEAKER pro tempore. Is there objection to dispensing with further reading of the amendment?

Regular order has been demanded. Is there objection?

Mr. KAZEN. Mr. Speaker, reserving the right to object.

The SPEAKER pro tempore. Regular order has been demanded.

Mr. KAZEN. Mr. Speaker, reserving the right to object.

The SPEAKER pro tempore. Regular order has been demanded.

Mr. DINGELL. Mr. Speaker, I demand the regular order.

The SPEAKER pro tempore. Is there objection? That is the regular order. The Chair hears none, and reading of the amendment is dispensed with.

Without objection, the previous question is ordered on the amendment.

There was no objection.

The SPEAKER pro tempore. The question is on the amendment.

PARLIAMENTARY INQUIRY

Mr. KAZEN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. KAZEN. Mr. Speaker, the question before the House was dispensing with the reading of the amendment, not the previous question.

The SPEAKER pro tempore. The question before the House was the reservation as to whether or not there was going to be an objection to the reading of the amendment.

Mr. KAZEN. To the reading of the amendment.

The SPEAKER pro tempore. And there was no objection.

Mr. KAZEN. That is correct. But not to the previous question.

The SPEAKER pro tempore. The Chair will state to the gentleman that the amendment is not debatable.

Mr. KAZEN. That is correct.

The SPEAKER pro tempore. The question now is on the amendment.

PARLIAMENTARY INQUIRY

Mr. PICKLE. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. PICKLE. Mr. Speaker, would it be in order for a substitute to be offered for the amendment which has been offered by the gentleman from Tennessee?

The SPEAKER pro tempore. Not unless the gentleman from Tennessee yields for that purpose.

Mr. PICKLE. Mr. Speaker, then I ask the gentleman from Tennessee, would he yield for a substitute amendment to be offered?

Mr. GORE. Mr. Speaker, believing as I do that the basic issue is whether we are to have a rail passenger system in this country, I would prefer to have the vote on whether we are going to continue the present lines or whether we are going to cancel the rail service all over the country.

The SPEAKER pro tempore. To avoid any misunderstanding, the Chair will again state that without objection, the previous question is ordered.

There was no objection.

The question is on the amendment offered by the gentleman from Tennessee (Mr. GORE) to the motion to recommit offered by the gentleman from Massachusetts (Mr. CONTE).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. GORE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken by electronic device, and there were—yeas 256, nays 141, not voting 37, as follows:

Mr. Dellums with Mr. Kasten.
Mr. Krueger with Mr. Lundine.
Mr. Pike with Mr. Thone.
Mr. Diggs with Mr. Charles Wilson of Texas.
Mr. Thornton with Mr. Charles H. Wilson of California.

Mr. BARNARD and Mr. DICKS changed their vote from "nay" to "yea."

Mr. HUGHES and Mr. EDWARDS of Oklahoma changed their vote from "yea" to "nay."

So the amendment to the motion to recommit was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. SISK). The question is on the motion to recommit, as amended.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MAHON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

Mr. MAHON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. The Chair will count. One hundred and eighty-two Members are present, not a quorum.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device; and there were—yeas 258, nays 138, not voting 38, as follows:

[Roll No. 755]

Mr. Krueger with Mr. Bingham.
Mr. Pike with Mr. Thornton.
Mr. Dellums with Mr. Rahall.
Mr. Charles H. Wilson of California with Mr. Pursell.

Mrs. COLLINS of Illinois and Mr. CARTER changed their vote from "nay" to "yea."

Mr. LUKEN changed his vote from "yea" to "nay."

So the motion to recommit, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. RAHALL. Mr. Speaker, on rollcall No. 755, the vote on the Gore amendment to the motion to recommit with instructions to provide $18 million for Amtrak, to conference the bill H.R. 9375 supplemental appropriations, I am recorded as not voting. I did in fact vote following the prescribed procedure and voted "aye." My colleague, the gentleman from West Virginia (Mr. STAGGERS) was with me when I voted and verifies that fact. I am alarmed that mechanical error caused me to lose my vote and I ask that my statement appear in the RECORD immediately following the vote.

APPOINTMENTS OF CONFEREES ON H.R. 9346, SOCIAL SECURITY FINANCING AMENDMENTS OF 1977

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 9346) to amend the Social Security Act and the Internal Revenue Code of 1954 to strengthen the financing of the social security system, to reduce the effect of wage and price fluctuation on the system's benefit structure, to provide for the conduct of studies with respect to coverage under the system for Federal employees and for employees of State and local governments, to increase the earnings limitation, to eliminate certain gender-based distinctions and provide for a study of proposals to eliminate dependency and sex discrimination from the social security program, and for other purposes with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

PREFERENTIAL MOTION TO INSTRUCT CONFEREES OFFERED BY MR. ARCHER

Mr. ARCHER. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. ARCHER moves that the managers on the part of the House at the conference on the disagreeing vote of the two Houses on the bill H.R. 9346 be instructed to insist on section 501 of the bill, H.R. 9346, as adopted by the House, to provide for the liberalization and eventual repeal of the earnings test for individuals age 65 and over under the Old-Age, Survivors and Disability Program of the Social Security Act.

The SPEAKER pro tempore. The gentleman from Texas (Mr. ARCHER) is recognized for 1 hour.

Mr. ARCHER. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Oregon (Mr. ULLMAN) and reserve the other 30 minutes for myself. At this time I yield myself such time as I may consume.

Mr. Speaker, the motion I have offered would instruct the House conferees on social security to insist on a provision to eliminate by 1982 the ceiling on earnings of beneficiaries aged 65 or older.

The provision was an amendment approved in the House by a vote of 268 to 149, offered by the gentleman from California (Mr. KETCHUM), and it clearly demonstrates that more than 60 percent of this House want this provision included in the bill.

Because of that mandate, because of the widespread support of this change which has been expressed over the years and because of the merits of the provision itself, we should act now to instruct our conferees on this one issue.

Until the ceiling on the earnings of social security retirees is lifted, our entire society will remain the loser. It will continue to lose the services of wise and experienced workers who simply cannot afford to work for substantial pay because, if they do, they will lose their valued social security benefits.

Millions of retirees are individual losers, too, of course, because they face a potential loss of benefits if they pursue gainful employment. They are forced to adopt artificial work practices. They cannot work that extra hour; they cannot sell that extra item because either move would put their earnings over the ceiling. It also creates an incentive to circumvent the law by working for unreported cash.

It is time, Mr. Speaker, to put an end to this waste, in taxes and economic activity and in human lives.

One argument that is often made against the repeal of the earnings limitation is that it would not help the many people who work in arduous tasks throughout their careers, and do not want to continue when they reach 62, or 65. The answer is that repeal of the earnings limitation would not in any way be disadvantageous to these people, and it could be helpful to them. It would give those who have done backbreaking work an opportunity to draw their social security benefits while turning to some entirely different type of gainful employment which they might have wanted to pursue all their lives, but could not afford to do so because they were locked economically into an unwanted career.

Mr. Speaker, we simply face the fact that changing demographics are changing America. In 1935, when the Social Security Act was signed, American males aged 65 could look forward to, on the average, another 11.9 years of life. Females at that time could expect to live an average of about 13 years beyond age 65. But today, the life expectancy of an American male aged 65 is almost 14 years, and for an American female it is 18 years.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague yielding to me.

So that, the point of this motion to instruct is to reinforce the support that this House gave by voting for the Ketchum amendment to eliminate the earnings limitation for senior citizens beyond 1982?

Mr. ARCHER. That is correct, to permit them to continue to work without suffering any loss of their social security benefits after age 65.

Mr. ROUSSELOT. And especially because so many senior citizens are also now living longer and want to earn their way?

Mr. ARCHER. That is correct.

Mr. ROUSSELOT. I appreciate the gentleman offering this motion to instruct. It is appropriate, and I join him in his strong effort.

Mr. ARCHER. By the year 2050 these expectancies will have reached 15 years for American men and 20 years for American women. In short, men will be living at least 3 years longer, and women about 7.

Mr. ICHORD. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I yield.

Mr. ICHORD. I listened very intently to the distinguished gentleman from Texas, and I cannot disagree with anything that he has said. He has made a very excellent statement, but we must realize that when we increase the benefits that are paid out, we must somewhere get the contributions.

I would like to ask the gentleman from Texas as to how he would increase the contributions into the trust fund.

Mr. ARCHER. I would say to the gentleman that the increased economic activity in this country generated by the creativity of people over 65 and their work efforts will produce far more than the increased benefits in additional taxes coming into the Treasury of the United States, through income taxes and social security taxes paid on the earnings of persons over 65. We are suffering a tremendous loss of wasted human productivity at this time.

Mr. ICHORD. Was that the gentleman's thought?

Mr. ARCHER. In addition, the Ketchum amendment itself carries provisions to provide the necessary funds.

To continue with my statement, not only are our people living longer, they are living longer productive lives. Medical literature clearly indicates an improvement in health levels of older persons, compared with 20 or 40 years ago. Better diets, more widely available health services, and improved medicines have combined to keep more Americans more active, both mentally and physically, for increasingly long periods of time.

It also is argued by those opposed to repeal of the earnings limitation that those workers who retire early do so because of ill health, and therefore could not work past 65 anyway. A 1976 Social Security Administration survey report did, in fact, state that "failing health is the most important reason described by over half the men claiming reduced benefits." But this retrospective analysis contradicts prospective studies, and in a number of instances might reflect an understandably defensive response offered by persons who are attempting to rationalize an earlier decision to retire by pleading ill health because it is a reason readily acceptable to society.

On the other side of this retirement coin, there are those who believe—and I happen to be one of them—that enforced retirement actually may cause ill health and reduced longevity. I have talked with a number of physicians, some of whom testified before our committee, who also believe that quitting work too early has been in many cases a contributing factor in disease and death.

Still another oft-heard argument against repealing the earnings limitation is that if older persons keep on working, there will be fewer jobs for younger people trying to break into the labor force. But this never has been proved as an overall effect. An economist who also is a recognized expert on social security recently pointed out that in 1950, when the unemployment rate for males 20 years and older was just 5 percent, more than 45 percent of males aged 65 or older were still in the labor force. Yet in 1975, when the unemployment rate for males 20 years old or older was 9 percent, only about 21 percent of the males aged 65 or older were in the labor force.

The contention that more older workers automatically mean fewer younger workers just does not stand up statistically.

In years ahead, the U.S. labor force will need more older workers, not fewer, because fewer younger workers will be entering the work force as a result of our reaching the population zero birth rate several years ago.

In addition, the social security system, to my knowledge, is the only pension system in this country where an individual can pay in all of his or her working life and then, at the age of retirement, be prevented from drawing benefits just because he or she decided to take another job. This is not true of any private pension system that I know of. It is not true of our military pension system, where military personnel can retire at a very early age on a Federal pension and still work at another job without losing any part of the pension. All Federal employees can retire under the Federal alternative program to social security, and get another job and continue to draw their Federal retirement benefits. All Congressmen can retire under their Federal retirement system, obtain large earnings from another job, and still draw their benefits. But the social security recipient cannot. This, to me, is grossly unfair.

Beyond these points, however, lies an even more important issue, involving not only the growth of jobs and the economy, but the ways in which we make them grow. Our aim should be to strengthen the economy as much as possible, thereby creating enough jobs to enable all our citizens to be productive, just as long as they want to be.

This would be highly regenerative, morally and economically. It would utilize the creative talents and experience of millions of Americans to produce a bigger national pie of goods and services for all Americans to share, improving the standard of living and the quality of life for all our people.

Mr. Speaker, that is the direction in which I believe this motion points, and I urge my colleagues to help get us moving in this direction.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield at that point to answer one question?

Mr. ARCHER. Mr. Speaker, I have a limited amount of time. I am forced to yield time on this side, and if there is any time left after that, I will be glad to yield to the gentleman. If the gentleman from Oregon (Mr. ULLMAN) will yield me the time, I would be glad to answer the question.

Mr. ULLMAN. Mr. Speaker, I yield myself such time as I may consume, and I yield to the chairman of the Subcommittee on Social Security, the gentleman from Massachusetts (Mr. BURKE).

Mr. BURKE of Massachusetts. Mr. Speaker, I would like to ask the gentleman from Texas (Mr. ARCHER) if it is not true that we would be putting a tax of $3 billion to $3.5 billion on business and employees in this country if we were to adopt this ridiculous and outrageous provision?

Mr. ARCHER. Mr. Speaker, if the gentleman from Oregon will yield for a response, the actuarial expert tells me that the cost of this particular amendment is only one-tenth of 1 percent of the payroll. That is all it amounts to, and that estimate does not include provision for any extra social security taxes paid into the system on the extra earnings of persons over 65. For this reason I believe it is faulty and grossly exaggerates the net cost to the fund.

Mr. ULLMAN. Mr. Speaker, let me urge my colleagues not to take this very drastic step of moving to instruct conferees on an issue that is as far-reaching as the one we will have in our conference dealing with the exempt earnings for social security benefits eligibility. I urge my colleagues to let the legislative process work.

The assumption somehow is that the conferees are not committed to the House bill, and I want to say that the chairman of this committee will always be committed to the House position. On the other hand, the nature of a conference is that the goal is always to reach an agreement between the positions of the House and the other body. The conditions of a conference demand flexibility in order to allow the decisionmaking process to work.

It is not possible, of course, for the House to bind conferees. That is obvious by the very nature of the process. To instruct conferees, even though we cannot bind conferees, seems to me to be a procedure that should be used very sparingly.

Let me say that it is the intention of the chairman of the Committee on Ways and Means, while he certainly cannot commit the other conferees, to bring back from the conference a bill on which the majority of the House can agree and can support. That includes certain actions in this area that are very important, and in making that consideration, the conferees are going to have to look at other pieces in the package.

They are going to have to look to the long-range actuarial soundness of the social security system. They are going to have to do that with a sense of responsibility, both to those who are paying into the system and those who are the recipients of the benefits.

So, Mr. Speaker, I urge the Members of this body to vote against the motion to instruct and to give the conferees, by voting against the motion to instruct, a vote of confidence, so that they may indeed live up to their responsibilities and bring back the very best bill that they can get in their conference with the Senate.

Mr. MOAKLEY. Mr. Speaker, will the gentleman yield?

Mr. ULLMAN. I yield to the gentleman from Massachusetts.

Mr. MOAKLEY. Mr. Speaker, I rise in opposition to the motion offered by the gentleman from California (Mr. KETCHUM). I should stress that I voted for the amendment when the gentleman offered it during consideration of the Social Security Financing Amendment (H.R.

9346) and, as a member of the Committee on Rules, I supported efforts to have the amendment made in order under the rule.

I am therefore in the position of opposing a motion to instruct conferees to insist on an amendment I have strongly supported. I do not see any inconsistency in this position. I believe that instructions to conferees are appropriate only in extraordinary cases.

I should point out that the managers for each House do not enter a conference without limitation under the standing rules. Clause 3 of rule XXVIII prohibits consideration in the House of a conference report which exceeds the scope of the conference. While this is frequently a difficult question for the Chair, rulings on points of order raised on the question of scope are extremely straightforward when specific dollar amounts are involved. For each year, the conferees will be limited by the lowest and highest figures. It appears to me that it might be useful to insert in the RECORD a summary on the limitations on the conferees:

Year	Outside earnings which may be contained in conference report		Ketchum motion
	Lowest limitation	Highest limitation	
1978	$4,000	$4,500	$4,000
1979	4,500	6,000	4,500
1980	5,000	[1] 6,000	5,000
1981	5,500	[1] 6,000	5,500
After 1981	[2]	[1] 6,000	[2]

[1] After 1979, the Senate bill provides that the $6,000 ceiling will be adjusted to reflect inflation by the same factor used to adjust benefits.
[2] No limitation.

Thus, Mr. Speaker, if the Ketchum motion were to prevail, it is possible that a worker over 65 years of age earning $6,000 now would have gotten $2,250 less in benefits during 1979 through 1981 under the motion than would be possible without instructions.

Although the motion would instruct House conferees to insist on language with no limitation after 1981, only well paid workers would be able to make up the money lost in the next 4 years.

If, during the course of the conference, it appears that the conferees are prepared to agree on a figure the House cannot accept, a motion may be made in the House to instruct conferees or the report itself can be sent back to conference. But I cannot support an effort to send our managers into conference bound to the lower House figures for the next 4 years simply to insure that the complete repeal of limitations after 1981 will be included in the report especially since it would be perfectly possible even without instructions.

Mr. ARCHER. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. KETCHUM).

Mr. KETCHUM. Mr. Speaker and Members of the House, some Members may possibly have heard that it was my objection to the appointing of conferees on an ill-advised unanimous-consent request by the chairman of the Committte on Ways and Means that held up consideration or going to conference on this particular bill.

Let me say, in no uncertain terms, that I did, indeed, object; and we are today participating in an exercise, right here and now, which the chairman of the Committee on Ways and Means would have precluded us from doing had we appointed conferees in a pro forma session.

Suffice to say, Mr. Speaker, that I was mildly surprised and terribly disappointed in the leadership of my committee because the chairman of the Committee on Ways and Means and all of the members knew, beyond a shadow of doubt, for what reason I objected to the appointing of conferees in a pro forma session. I was surprised that the chairman did not mention that to the press.

We had a great conversation in H–208 right after I objected; and in that discussion, which became heated at times, I explained not once, not twice, but three times why I had objected—because under the appointing of conferees in a pro forma session, not one Member would have been able to offer a motion to instruct conferees.

One other advantage accrued to this body, in my opinion, by the delay; and that is that each and every one of my colleagues have had time to listen to their constituents, who told them what they thought of the social security bill during the recess. I am sure our constituents have discussed it at some length with all of us.

Mr. Speaker, I think it is important to have that input before we go to conference. There is nothing lost. Nothing has been lost. Conferees will now be appointed. We will go to conference, and undoubtedly we will come back with some kind of bill.

Mr. Speaker, I sincerely hope that this body will concur with the Archer amendment, will concur with the overwhelming desires of this House, as expressed during the debate on the social security bill, to instruct the conferees to hang tough on the amendment which this House overwhelmingly adopted, and that is, to phase out the earnings limitation for those individuals over 65 years of age.

Mr. Speaker, the specious argument is made—and I heard it made by a Member of the other body, and I heard it made by the chairman of the committee during the course of our debate—that if we remove this earnings limitation, only the rich, the doctors, the lawyers, the architects will benefit.

Nothing could be further from the truth. The rich, the architects, the doctors, the lawyers, all of them are the individuals who have unearned income, dividend income, rental income, all sorts of investments that they have made; and no limitation is made on that unearned income.

Therefore, Mr. Speaker, I ask the Members to speak up; speak up for those individuals, those thousands of retired individuals who have been deprived through inflation, much of which is created in this body right here. I ask the Members to stand up for those people, give them this amendment, and insist that our conferees carry that message to the other body.

Mr. ARCHER. Mr. Speaker, I yield 1½ minutes to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of the motion to instruct our conferees to insist on the Ketchum amendment to H.R. 9346 to phase out the earnings limitation for social security recipients. I do not know how many of the Members had the opportunity to see the article in Monday's Los Angeles Times on this issue. The article spoke of two persons age 67 who receive $3,744 a year in social security benefits. One works at a menial job for 6 months of the year just to make ends meet. But for every dollar he earns over $3,000, he loses half that much in benefits.

The other retiree, according to the Times, lives on easy street. In addition to his social security benefits, he receives $100,000 a year in investment dividends—without lifting a finger.

This anomaly is caused by laws now on the books requiring earned income exceeding $3,000 a year to be, in effect, taxed at a 50-percent rate by the social security administration. No such penalty is levied against the coupon clipper.

It is beyond me how anyone can say this is fair. The Ketchum amendment would do away with this discriminatory provision of the law—a provision which penalizes working people and deprives the economy of their talents and productive capacity. It has been said that the true test of any society is the way it treats its senior citizens. I say do away with this hated earnings test, and restore our senior citizens to the respect, and legal protection, they deserve.

The projections of cost do not include increased social security taxes that will be paid. It is my understanding that the Social Security Administration has refused to make such estimates or projections.

Mr. ARCHER. Mr. Speaker, for the purpose of debate only, I yield 3 minutes to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Speaker, I rise in support of the motion offered by the gentleman from Texas (Mr. ARCHER). As a sponsor of similar legislation to eliminate the earnings limitation on social security I think this measure is long overdue to provide this kind of relief.

At the appropriate time, Mr. Speaker, I will also seek to offer an amendment to the motion offered by the gentleman from Texas (Mr. ARCHER) to provide additional instructions to the conferees to agree to the Senate provision for a $250 income tax credit for higher education expenses.

Mr. Speaker, my colleagues are well aware of the long history of this proposal whose time has certainly come.

It will be said that we are being asked to agree to a nongermane Senate amendment but the fact is that this House has been denied time after time an opportunity to vote here in the House on education tax credits.

Many of my colleagues will remember during the dying hours of the last session of Congress, specifically on Wednesday, September 29, 1976, a commitment was made to bring this matter before the House for a vote. It was brought here under a procedure which was objected to successfully.

Such legislation to provide educational tax credits has been passed in the Senate in four out of the last five Congresses. Similar legislation has been introduced in this House by myself as long ago as 1970 and by numerous other Members. In fact, 210 Members of the House have sponsored some form of education tax credit legislation in this Congress alone. That warrants it being brought here for a vote.

On September 8, 1977, at the time of consideration of the second concurrent resolution on the Budget, a provision was made for this amendment. That provision was adopted by this House by a vote of 311 to 76.

The time has come, now, to provide some measure of tax relief to those who are struggling to meet the soaring costs of higher education. Seven years have elapsed since I first introduced this legislation. In that time the cost of such education has doubled, up over 50 percent, and in the community colleges and vocational schools, it has increased by 130 percent. Business can get a tax deduction for educational expenses, why cannot people get that kind of a deduction? This would not mean a revenue loss to the Government, but could instead result in a net tax revenue gain to the Government because the record shows that those with a higher education earn more than those who do not have such an education, and those with this education will pay taxes.

Mr. Speaker, at the appropriate time I hope to offer such an amendment to agree to the tuition tax credit provision.

Mr. ARCHER. Mr. Speaker, I yield 2 minutes to the congresswoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. I thank my colleague for yielding.

Mr. Speaker, I intend to vote for the Archer motion to instruct the conferees, and I would like to tell my colleagues why.

Once, in a radio program in my home district, a woman telephoned in. She said:

> I am 68 years old and I work to make a little extra as a parttime checker in the A&P.

This was at the end of the year and she went on—

> By mistake—I make $400 too much this year.

She started to cry and said:

> Now they tell me I have to give some of it back; and coal has gone up to $57 a ton.

I thought of everything that meant in the life of that woman: Wrestling with an old coal furnace, trying to make ends meet, living at the edge of possibility.

One of our colleagues has described those with large incomes, without worry, receiving untaxed social security. It just does not seem fair.

I think we must let the older people who want to earn a little extra to do so; that is my reason for supporting this amendment.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Speaker, I rise to support the motion of the gentleman from Texas (Mr. ARCHER) to instruct the conferees on the social security financing bill to insist on the phasing out of the earnings limitation placed on our senior citizens who receive social security benefits.

As an original cosponsor of legislation to accomplish this goal and having voted in favor of the amendment offered by the gentleman from California (Mr. KETCHUM), I want to continue my association with this effort and reemphasize the need to provide immediate relief to those people most severely affected by inflation, namely our senior citizens living on fixed incomes. The best and most effective way of providing this help is to remove the kinds of limitations which trap them into a position where they are dependent on Government programs for survival.

These people want the freedom to choose to continue working to supplement their retirement incomes without suffering a loss of benefits.

I urge my colleagues to support the motion.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I rise in support of the Archer motion.

Mr. Speaker, I support the Archer motion to instruct our House conferees to support the elimination of the earnings limitation on social security.

The House voted, by a strong majority, to eliminate the inequitable restriction under which social security beneficiaries must lose benefits if they earn a certain amount of income. That decision ought to be supported in the conference committee.

Many social security recipients desire to work even after they begin receiving benefits. People ought to be encouraged to work. Many of our older citizens lose their sense of worth when they are forced to leave their jobs, or are not allowed to seek new jobs, because of this earnings limitation.

In my district, people constantly refer to the earnings limitation as the most inequitable single feature of our whole social security system. It is high time we got rid of it.

A vote for the Archer motion will not guarantee that we can get rid of the limit, but it will take us much closer to that goal. I urge an "aye" vote.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. SCHULZE).

Mr. SCHULZE. Mr. Speaker, I rise in support of the Archer motion.

Mr. Speaker, for the past several months, Members of both Houses of Congress have been debating the social security finance bill.

One of the most controversial and significant provisions, particularly for the elderly and others living on fixed incomes, is the amount of income which those receiving social security may earn in addition to their monthly benefits. No other aspect of the present law has attracted so much adverse reaction from the public. Hearings before the Ways and Means Subcommittee on Social Security, of which I am a member, produced more discussion and adverse testimony concerning the earnings limitations than any other issue. It is particularly necessary to consider the ramifications of this limitation at a time when there is concern for the well-being of our elderly citizens. It has finally been acknowledged that elderly Americans are an underutilized and long-ignored segment of our society who posses the knowledge and perspective from which we may all benefit.

The social security earnings limitation only serves as a disincentive to those senior citizens who can and want to continue contributing to our Nation and the economy. It is for this reason that I have consistently supported the removal of the earnings limitation and urge my colleagues to support its removal.

Not only will we be tapping a valuable human resource but we will also be generating additional tax revenues by removing any earnings limitation.

Finally, I personally believe that it is improper to say to the elderly, who have contributed so much that they can only draw full benefits if they abstain from employment which would pay more than a minimal amount.

Mr. ULLMAN. Mr. Speaker, I yield 2 minutes to the distinguished chairman of the Social Security Subcommittee, the gentleman from Massachusetts (Mr. BURKE).

Mr. BURKE of Massachusetts. Mr. Speaker, I thank the chairman for yielding.

Mr. Speaker, I think the issue here again is a little clouded. I just would like to have the attention of my good friend, the gentlewoman from New Jersey (Mrs. FENWICK).

I can understand her concern, and I am concerned also about these people, but this amendment goes a little bit further than that. This amendment removes the entire ceiling. If we would instruct the conferees to go in and do this, we are in a bind and we would have to levy a tax of $3 billion to $3.5 billion on the business firms and on the employees of this country to finance this provision.

We can raise the ceiling and raise it to a reasonable amount, but to abolish the ceiling is an outrageous thing to do, because what we are doing is taking people who are earning up to $100,000

a year and giving them their social security benefits and making an annuity program out of the social security system and breaking down the whole principle of social security, and we would be doing a most dangerous thing.

I am surprised and shocked to hear the people on that other side of the aisle supporting this when they are putting such a burden on the business firms of this country.

If the Members have been back home during the recess and if they have read their mail, they have found out the people in business and the employees oppose this regressive tax that this provision is going to cause.

There is no justification for it. We can raise the ceiling on earnings to a reasonable amount so that people in this country can earn a sufficient amount of money to get by, but we do not have to abolish the ceiling and take care of the fatcats in this country, take care of the high-rollers, take care of those people who need that provision like a hole in the head. There is no reason for it. There is no justification for it. There is a lack of common sense here.

I think if we are going to protect the social security system, we have to do something about the financing. There has been over $20 billion of benefits added to this bill. We put an unmerciful weight on the shoulders of business in this country.

I have heard from 800 small business firms in my district who are concerned about this regressive tax. I think we should not bind the hands of the conferees. The conferees should go in there with at least some ability to adjust this tax and not instruct them to abolish this earnings ceiling entirely. We can raise the ceiling to a reasonable amount, even if that makes it $6,000 or $7,000 for the rate value, but to insist on abolishing the ceiling is an outrageous thing to do.

The SPEAKER. The time of the gentleman from Massachusetts has expired.

Mr. ULLMAN. Mr. Speaker, I yield 1 additional minute to the gentleman from Massachusetts.

Mr. KETCHUM. Mr. Speaker, will the gentleman yield?

Mr. BURKE of Massachusetts. I yield to the gentleman from California.

Mr. KETCHUM. Mr. Speaker, I thank the gentleman for yielding. We are old friends, as everyone in this House knows; but we are not talking about the $100,000 fat cat. We are talking about the elderly eating dog food, as this House has discovered.

Mr. BURKE of Massachusetts. Then why not come back with a limitation on the earnings ceiling?

Mr. KETCHUM. We tried and we tried in the subcommittee unsuccessfully.

Mr. BURKE of Massachusetts. It costs $3.5 billion in taxes to the business firms in this country. If the minority side wants to take that position, let them do it; but let them go back and be truthful and honest with their business firms and tell them we are driving them out of business.

We are driving the steel workers out of their jobs. We are driving the textile workers out of their jobs. We are driving the shoe workers out of their jobs, you name it, and these are the types of provisions that are doing it.

It is an irresponsible amendment that was not discussed fully enough in the last session when we adoped this amendment and we should not bind the hands of the conferees.

Mr. ULLMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Louisiana (Mr. WAGGONNER).

Mr. WAGGONNER. Mr. Speaker, in the interests of the social security system itself, I urge you to vote down this proposed instruction, and let me explain why.

The problem is far more difficult than most of us realize. Listen to me for a minute to what this House has done and what you are going to do to the social security system if you do not give us a chance to reconcile the problem itself. Now, the problem is money for social security. Whether you realize it or not, this House earlier this year did away in another piece of legislation with the mandatory retirement at age 65 and made it discretionary at 70 on the part of the employee. What that means is that if we instruct this conference committee on this matter we will further seriously jeopardize the trust fund. The conferees are going to be in the position of having to consider equating what we do with regard to social security with what we have already done on the discretionary retirement proposal. Even though we are talking about separate bills each affects the other.

Now, if we phase out the retirement test in 1982, we will then have a situation, and as desirable as it might be, practically, we cannot do it yet because of the financial state of the trust fund. We will have a situation where at age 65 every employee can at his or her discretion continue to work and be eligible for full social security retirement benefits between the age of 65 and 70.

Now, I know that we did not think when we passed the discretionary retirement bill at 70 that we would be faced with this problem; but nevertheless, we are, and we cannot consider either of them in isolation, if we are interested in preserving the integrity of the social security retirement system or private systems for that matter.

Now, I am one of these people who stood here and voted with the gentleman from California (Mr. KETCHUM). I voted for an increased limitation in the subcommittee and in the full committee; but it has dawned on me and I am trying to get you to see as well what we are doing in the transition period while we are trying to provide financing for the social security system if we force this additional conference burden on the House.

The SPEAKER. The time of the gentleman from Louisiana has expired.

Mr. ULLMAN. Mr. Speaker, I yield 2 additional minutes to the gentleman from Louisiana (Mr. WAGGONNER).

Mr. WAGGONNER. I would plead with the Members to reject this motion to instruct.

Mr. ARCHER. Mr. Speaker, will the gentleman yield?

Mr. WAGGONNER. I yield to the gentleman from Texas.

Mr. ARCHER. Does the gentleman actually stand in the well and tell this House that a Congressman who has paid in all his life to an alternative program to social security and can retire at age 60, can continue to get another high-paid job?

Mr. WAGGONNER. He could without having to be a social security recipient. Nobody can get it now without an earnings limitation. I am saying that we have to provide a transition that will allow us to not destroy, first of all, retirement systems that the business community of this country has, the land over. Nor should we further aggravate the social security trust fund.

I am saying, do not instruct us, and let us try to get into conference and try to work the matter out. The gentleman from Texas (Mr. ARCHER), my friend, is going to be a conferee. I am just saying that we are jeopardizing the social security trust fund at a time when it is already in serious jeopardy, and we should let the conference committee try to provide for a transition that will preserve the system.

Mr. ULLMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Speaker, I think it might serve a useful purpose to get our terms in order here. This matter has been referred to as an "earnings limitation." That is legislatively inaccurate. The term is "retirement test," and the question is, What sense does it make to pay retirement benefits to somebody who is not retired?

The further point has been made that, after all, Members of Congress on their pensions are allowed unlimited earnings. And after all, people who have unearned income are allowed unlimited unearned income. But, when the insurance contract was made with the American people, the retirement test was later added in order to be sure that everybody understood, as he or she paid into the system, that he or she would have to be retired in order to receive retirement benefits.

Now, there are two ways to cure the disparity between the way Members of Congress are treated and the way social security people are treated. One way, the usual congressional national debt way, is to load the Christmas tree where the disparity is on the low side. The other way would be to stand up and vote a law that says that we cannot collect our retirement benefits if we take jobs to earn $100,000 a year. Now, what we have here, in essence, is Robin Hood in reverse, because after everything is said that can be said, if this language is adopted it will indeed mean that the person who earns $100,000 a year at age 65, 66, 67, and so on, can collect the social security benefits despite the fact that this person is not retired.

The other side of that same coin is that the poorest person in the land, run-

ning a lathe somewhere in a Ford plant, will have to pay into the system in order that those benefits can be paid. Now, I do not really think that we want to tell the public that we are going to look at the person that MILLICENT talked about, for whom we all have not only sympathy but willingness to take action, and say to that person—if there is only one in the country, and there are hundreds of them who will make the hundred thousand and collect a golf cart of money in social security benefits, "Have at it, hit the jackpot on the widow's mite."

I do not think we want to go on record as doing that. I support the chairman. Frequently, I do not, but at this time I do.

Mr. ULLMAN. Mr. Speaker, I yield 4 minutes to the gentleman from Illinois (Mr. MIKVA).

Mr. MIKVA. Mr. Speaker, I think I understand the strong feelings that the gentleman from Texas and the gentleman from California have about this general subject matter. The sympathy is one that I think all of us share. We are aware that there are some people who have been caught on the low end of the social security ladder and have been hurt by the earnings limitation put on them. That sympathetic feeling was one that reflected itself in the original action taken by the subcommittee and the full committee to raise the earnings limitation. It reflects itself in the even higher limitation that the Senate put on. But I think it gets put in an improper package when the whole limit is taken off, because then we are not expressing the sympathy to those people we are really concerned about, but we are expressing sympathy to all of the lawyers and doctors and dentists and other professionals by saying to them, "We know you are not going to retire at age 65 anyway, but go ahead and keep working and, in addition, you will collect full social security."

That was never the intention of the vote of the House, and yet that is the way it is going to come out. I would hope that, without an instruction, perhaps the conferees on the Senate side and on the House side could find some common ground to try to ease the burdens of those people we are financially concerned about, but not to throw out the baby with the bath water and end up with a $30 billion load over a 5-year period under the social security system.

How long would it take for the Members of this body to vote $30 billion in appropriations? I assure the Members that it would be more difficult to get a $30 billion direct appropriation through than it was to get the original Ketchum amendment approved when we debated the social security bill or the consideration that we are devoting to this motion to instruct. Thirty billion dollars is the least that this will cost the system over that 5-year period. It may cost more. This may be the equivalent, in this bill, of what the Congress did a few years ago when it first created the coupling provision. It is such an open-ended exposure that no one can really properly estimate its total cost. It seems ridiculous that we should not have only voted that way but we should now tell the conferees they should have their feet in concrete and not even talk to the Senate conferees on what ought to be done on this very, very difficult matter. I do not believe that the House conferees are insensitive to the concern the gentleman from California and the gentleman from Texas (Mr. ARCHER) are expressing. We would all like to do something for the elderly. We would all like to do something that makes it a little easier for them to get by on what is a minimum social security benefit at the bottom end. But we do not want to do that at the expense of breaking the system and we do not want to do that by adding still further to a very, very heavy tax burden that this bill is putting on the working people and the middle class.

I would only point out to my distinguished friend, the gentleman from Texas, that, while I appreciate his generosity and his concern for the senior citizens, I would feel a lot more comfortable about it if I knew he was going to vote for the final product. But I find it somewhat troublesome to know that my friend, the gentleman from Texas (Mr. ARCHER) and my friend, the gentleman from California (Mr. KETCHUM) who are urging an additional 3 billion expenditure here and urging an additional tax load imposed on the working people, are asking for us to do it while they will not bite the bullet and vote for the bill. I would urge those who did vote for the bill to think twice before going home and having to explain why they voted this way.

Mr. ARCHER. Mr. Speaker, will the gentleman yield?

Mr. MIKVA. I yield to the gentleman from Texas.

Mr. ARCHER. I thank the gentleman for yielding.

Mr. Speaker, I am not absolutely certain who the majority conferees will be from the House, but it is very nearly certain that every one of them voted against the Ketchum amendment on the floor, and that is the support for our concern.

Mr. MIKVA. Mr. Speaker, I would only say to my collegaue that we all understand the rules, and I assume the conferees will attempt to support the House position. But at the same time, we ought to be aware of the very heavy burden that the House position is putting on the social security system.

Mr. ULLMAN. Mr. Speaker, I yield 3 minutes to the gentlewoman from Kansas (Mrs. KEYS), a very important member of the committee.

Mrs. KEYS. Mr. Speaker, much has been said on this issue, but sometimes I think we forget that social security benefits for old age were intended to compensate people for income that they had lost by retiring.

When we get down to the basic mistake in public policy that would be made by our adopting the complete removal of the retirement test, we have to look at the recent overwhelming action of both the House and the Senate in ending mandatory retirement at age 65.

Can we possibly say to our working men and women, those who are working at the low steps of income, that they have to pay additional taxes in addition to competing with those who are at the high level of income who, between the ages of 65 and 70, are still holding the jobs that the younger work force is seeking to fill?

As a matter of public policy, I do not think we can possibly say that to these people in our work force. I think that changes the entire way we have in the past looked at the retirement test, and it underscores the natural sensitivity all of us have because it has been far too low.

What does the National Council of Senior Citizens say about this? They say, "No." They say that it is a wrong policy. It is pointed out in their statement that the acceptance of a $6,000 retirement test would provide an income that is very near to the average income of the average working man and woman, an income less than a thousand dollars below that of the person who is still working and who is probably still supporting a family.

I would like to quote from the end of the council's statement on this issue, as follows:

> The elderly for whom added earnings and higher incomes would be of greatest help are the least likely to benefit. People who draw low benefits because they could not earn high salaries in their peak earning years, or whose health is too poor to permit them to continue earning, are not the sort who command salaries over $6,000 in the best of circumstances. They will not be helped at all by ending the retirement test. Instead, billions of dollars will go to aid that 7 percent of the elderly best able to help themselves, and be unavailable to improve the conditions of the 93 percent whose need is much greater.

Mr. Speaker, let us look to our responsibilities and raise the retirement test to a decent level, but let us not perform the terrible, mistaken public policy of saying that our younger work force is going to have to pay for older members of the work force who would receive additional benefits when they are not retired. I urge the Members to vote against the Archer motion to instruct conferees.

Mr. ULLMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, I supported the Ketchum amendment when it was offered before, and I still support it basically on its merits. But the longer I hear statements on the issue, the more I realize that only a fool never changes his mind when he finds he perhaps is wrong, or better yet, not entirely right.

Although I do not think the amendment is intrinsically wrong, I intend to vote against the motion to instruct conferees. I do not want to tie the hands of the conferees on an issue which I think is very complicated and on a matter which could turn out to be very costly.

When I went home recently, I must have made 20 speeches, and the main issue on which I was confronted was not gay rights, was not the Panama Canal,

was not energy, but it was social security. The main issue I heard related to rising wage rates and wage bases provided in our bill. Not once did this issue regarding the earnings limitation come up. But the main issue of rising social security taxes was so overwhelming on the part of my constituents that I do not think I am willing to tie the hands of the conferees on this bill on an issue which could raise these taxes fairly dramatically, even though the issue on the merits is still quite attractive.

I think this is an issue that should be compromised. The future of the social security system, even with this bill, is, in my mind, rather bleak, and while the issues raised by the Ketchum amendment are somewhat popular political issues, after I came back from Kansas I found the most popular issue to be lower social security taxes.

Mr. Speaker, I think it would be foolish for us to vote to instruct conferees and I urge the membership to vote down the motion to recommit.

Mr. GEPHARDT. Mr. Speaker, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Missouri.

Mr. GEPHARDT. Mr. Speaker, I thank the gentleman for yielding.

I would like to make just one point. I voted against the Ketchum amendment, and I am not today going to go into the merits of that amendment again. I think the result was clear; the vote was 268 to 149.

This is a bicameral legislature, not a unicameral legislature. It seems to me that tying the hands of the conferees before the conference would be an extraordinary remedy. It seems to me the time for this motion to be made is after the conferees come back from the conference with a product, not before.

Therefore, Mr. Speaker, I urge the Members to vote against this motion.

Mr. ULLMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Tennessee (Mr. ALLEN).

Mr. ALLEN. Mr. Speaker, those who have reached the age where they are entitled to receive social security benefits, for which they have already paid their taxes, should not be forced to retire in order to receive full benefits, or be penalized for having other sources of income. This is not required of those who have paid their premiums on annuity policies with private insurance companies, and it should not be required of those who have paid their premiums in the form of social security taxes. Furthermore, the more wealthy, who own stocks, bonds, real estate and other assets from which they draw an income, are not limited in the amount of income they may receive in order to qualify for full social security benefits. I can see no justification or defense for this kind of discrimination against the less fortunate of our citizens whose only income outside of social security is in the form of wages and salaries for work performed. Everyone should be treated alike.

The Government's failure to control spiraling inflation has hurt those on modest and fixed incomes. The elderly and people with disabilities, either temporary or permanent, and those who are often without other sources of income, find that the meager increases in their social security payments have been offset by spiraling inflation.

There is no reason for those on a limited income to bear the often devastating consequences of Government policies that do nothing to control inflation. And certainly there is no reason for placing a limit on how much extra income a senior citizen receiving benefits may earn. Our society cannot afford to waste the special skills of our elderly by depriving them of their social security benefits if they choose to continue working.

It is Congress, and only Congress, which can correct this injustice. The right of those on social security to live in dignity, and not despair, is in the hands of the U.S. Congress, and I hope we will correct the present situation by passing this bill.

For these reasons, I most respectfully urge all Members of the House to adopt this motion to instruct the conferees to insist on the House language of the bill.

Mr. ULLMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on this matter I urge my colleagues to vote on the side of responsible alternatives for the conferees. I ask them to recall what happened on the cost-of-living increase when the actuaries told us that that would do certain things and keep the trust fund in a sound actuarial posture.

That was the story when we adopted the cost-of-living increases. Then all at once, we woke up to the fact that it was destroying the social security fund over the long term. In this particular instance, I urge my colleagues to give the conferees the authority to be actuarially responsible so as to keep that trust fund solvent. If we are to have the responsibility, I ask that that decision be left to us, and I ask the Members to vote against this motion to instruct.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. ULLMAN. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank the chairman for yielding.

I was staggered to hear that removing all limitations on the ceiling would cost $3.2 billion. I did not know that.

I want to ask the chairman, Does that take into account the income taxes that the people who will be receiving the benefits would be paying, since they would be employed, and also the social security taxes which they would be paying?

Mr. ULLMAN. This does not take into consideration those factors; but I want to say that the actuarial assumption in that estimate, in my judgment, is too conservative. Furthermore, I am sure that that $3 billion annually will go up and up and up as the years go on.

Therefore, Mr. Speaker, I urge the gentlewoman from New Jersey (Mrs. FENWICK) to oppose the motion to instruct.

Mrs. FENWICK. If there is no exact figure with respect to the social security taxes and income taxes that those people who will be working will be paying, how do we know it is even going to cost $3.2 billion?

Mr. ULLMAN. The problem is that there will be no more income; if that person did not stay on that job, someone else who does not have a job would have that job. Consequently, somebody would be paying taxes if that other person did not stay on the job and continue to work. It is still a job on which someone would be paying taxes, and there really is no cost gain in that event.

Mrs. FENWICK. Mr. Speaker, I thank the gentleman.

Mr. ULLMAN. Mr. Speaker, I reserve the balance of my time.

The SPEAKER. The Chair will state that the gentleman's time has expired.

Mr. ARCHER. Mr. Speaker, may I inquire how much time I have remaining?

The SPEAKER. The gentleman from Texas has 7¼ minutes remaining.

Mr. ARCHER. Mr. Speaker, I would use whatever time I consume for one moment to merely make a rejoinder to the chairman of our committee, the gentleman from Oregon (Mr. ULLMAN) by saying that as mentioned earlier the estimates of the actuaries are faulty because they, as the gentlewoman from New Jersey (Mrs. FENWICK) just said, do not include one penny of income tax and social security taxes that will be paid in by those over 65 years of age who continue to work. The actuaries admit this and the Social Security Administration admits that they have not included one penny of additional income. So the deficit estimates, on their face, are faulty.

Mr. Speaker, for the purposes of debate I have no further requests for time, but at this time I would like to yield to the gentleman from Pennsylvania (Mr. COUGHLIN) for the amendment which he has previously described.

Mr. LEVITAS. Mr. Speaker, I favor lifting the unfair earnings limitation that presently penalizes retired persons who need to work and supplement their meager retirement and social security benefits. I voted for the Ketchum amendment which would remove the limitation, and I have even introduced a bill of my own which would lift the unfair limit on earned income.

However, I do not think we should vote to instruct our conferees on this issue at this time. Rather we should let the conference process to see if an acceptable provision can be written into the law that will lift the earnings limit for those who need to work to supplement their income but would not let the very wealthy continue to receive social security and also salaries ranging in the hundreds of thousands of dollars. So we should not bind the conferees now. A vote against Mr. Archer's motion is not a vote against the unfair penalty; rather it is a vote to let the conference come up with the best possible provision.

I will not vote for the final conference report unless it contains a fair provision for lifting the earnings limitation. But the time to cast that vote will come later. This is not the vote to accomplish that end.

Mr. GRASSLEY. Mr. Speaker, I support the Ketchum amendment to elimi-

nate the earnings limitation on retirees because it is the only rational thing to do.

We can talk about raising it from $3,000 today to $4,500 or $6,000 at some future day or any other figure you might want to pick out of the air. But, the fact remains that no limitation is justified or rational and as a matter of principle the limitation must be abolished.

Any limitation is discriminatory against our elderly. There is no justification for this discriminatory practice. It is discrimination based on age, and it is just as wrong as discrimination based on race, creed, religion, or sex. We are concerned about those blatant forms of discrimination in employment so why should we not be equally up-in-arms about this form of age discrimination.

Ultimately if freedom means anything in this great country, it implies no economic sanctions should be applied to anyone's desire to work. The earnings limitation is such a sanction.

Besides, most of those who want to work after 65, need to work because of inadequate income from social security.

The SPEAKER. The gentleman from Texas (Mr. ARCHER), as I understand it, wishes to yield time?

Mr. ARCHER. I will yield back my time, but before I yield back the balance of my time, I would like to yield to the gentleman from Pennsylvania for an amendment. That was the purpose of my rising.

Mr. WAGGONNER. Mr. Speaker, I move the previous question on the motion to instruct the conferees.

The SPEAKER. The gentleman from Louisiana (Mr. WAGGONNER) moves the previous question. The question is on ordering the previous question.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. COUGHLIN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 214, nays 181, not voting 39, as follows:

[Roll No. 756]

	Thone	

The Clerk announced the following pairs:

On this vote:

Mr. Jones of Tennessee for, with Mr. McDonald against.

Ms. Chisholm for, with Mr. White against.

Mr. Sarasin for, with Mr. Abdnor against.

Mr. Dellums for, with Mr. Cunningham against.

Mr. Charles H. Wilson of California for, with Mr. McClory against.

Mr. Waxman for, with Mrs. Smith of Nebraska against.

Mr. Tucker for, with Mr. Young of Alaska against.

Until further notice:

Mr. Dent with Mr. Armstrong.

Mr. Alexander with Mr. Frey.

Mr. John Burton with Mr. Hammerschmidt.

Mr. Conyers with Mr. Kasten.

Mr. Moss with Mr. Thone.

Mr. Duncan of Oregon with Mr. Wiggins.

Mr. Fithian with Mr. Whalen.

Mr. Krueger with Mr. John T. Myers.

Mr. Teague with Mr. Kelly.

Mr. Thornton with Mr. Ruppe.

Mr. Van Deerlin with Mr. Quayle.

Mr. Tsongas with Mr. Pike.

Messrs. MADIGAN, PATTEN, HAGEDORN, Mrs. LLOYD of Tennessee, Messrs. GAMMAGE, HUCKABY, GONZALEZ, HALL, STRATTON, BOWEN, WATKINS, and WHITTEN changed their vote from "yea" to "nay."

Mr. DINGELL and Mr. GIAIMO changed their vote from "nay" to "yea."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the preferential motion offered by the gentleman from Texas (Mr. ARCHER).

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. ARCHER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 183, nays 209, not voting 42, as follows:

Frey		

The Clerk announced the following pairs:

On this vote:

Mr. McDonald for, with Mr. Jones of Tennessee against.

Mr. White for, with Ms. Chisholm against.

Mr. Abdnor for, with Mr. Dellums against.

Mr. Cunningham for, with Mr. Waxman against.

Mr. Kelly for, with Mr. Tucker against.

Mr. McClory for, with Mr. Charles H. Wilson of California against.

Mr. Sarasin for, with Mr. Conyers against.

Mr. Young of Alaska for, with Mr. Moss against.

Until further notice:

Mr. Dent with Mr. Ruppe.

Mr. Alexander with Mrs. Smith of Nebraska.

Mr. Carney with Mr. Hammerschmidt.

Mr. John Burton with Mr. Frey.

Mr. Teague with Mr. John T. Myers.

Mr. Van Deerlin with Mr. Quayle.

Mr. Thornton with Mr. Armstrong.

Mr. Tsongas with Mr. Baucus.

Mr. Fithian with Mr. Duncan of Oregon.

Mr. Krueger with Mr. Kasten.

Mr. Leggett with Mr. Pike.

Mr. Thone with Mr. Whalen.

Mr. PATTERSON of California changed his vote from "nay" to "yea."

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the preferential motion to instruct the conferees which was just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees: Messrs. ULLMAN, BURKE of Massachusetts, ROSTENKOWSKI, WAGGONNER, COTTER, MIKVA, TUCKER, CONABLE, ARCHER, and KETCHUM.

There was no objection.

CONFERENCE REPORT ON H.R. 6666, LEGAL SERVICES CORPORATION AMENDMENTS ACT OF 1977

Mr. KASTENMEIER submitted the following conference report and statement on the bill (H.R. 6666) to amend the Legal Services Corporation Act to provide authorization of appropriations for additional fiscal years, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–825)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6666) to amend the Legal Services Corporation Act to provide authorization of appropriations for additional fiscal years, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Legal Services Corporation Act Amendments of 1977".

DECLARATION OF PURPOSE

SEC. 2. Section 1001 of the Legal Services Corporation Act (42 U.S.C. 2996) is amended by inserting before the semicolon at the end of paragraph (3) "and assist in improving opportunities for low-income persons consistent with the purposes of this Act".

MEMBERSHIP OF GOVERNING BOARD

SEC. 3. Section 1004(a) of the Legal Services Corporation Act (42 U.S.C. 2996c(a)) is amended by inserting at the end thereof the following new sentence: "Effective with respect to appointments made after the date of enactment of the Legal Services Corporation Act Amendments of 1977 but not later than July 31, 1978, the membership of the Board shall be appointed so as to include eligible clients, and to be generally representative of the organized bar, attorneys providing legal assistance to eligible clients, and the general public.".

SUNSHINE PROVISION

SEC. 4. Section 1004(g) of the Legal Services Corporation Act (42 U.S.C. 2996c(g)) is amended by striking out all that follows "open" and inserting in lieu thereof "and shall be subject to the requirements and provisions of section 552b of title 5, United States Code (relating to open meetings).".

SUPPORT ASSISTANCE

SEC. 5. (a) Paragraph (3) of section 1006 (a) of the Legal Services Corporation Act (42 U.S.C. 2996e(a)(3)) is amended by striking out "and not" and inserting in lieu thereof a comma and "or".

(b) Section 1006(a)(3)(A) of the Legal Services Corporation Act (42 U.S.C. 2996e(a)(3)(A)) is amended by inserting at the end thereof the following: "except that broad general legal or policy research unrelated to representation of eligible clients may not be undertaken by grant or contract,".

(c) Section 1010 of the Legal Services Corporation Act (42 U.S.C. 2996i) is amended by adding at the end thereof the following new subsection:

"(d) Not more than 10 percent of the amounts appropriated pursuant to subsection (a) of this section for any fiscal year shall be available for grants or contracts under section 1006(a)(3) in any such year.".

POWERS, DUTIES, AND LIMITATIONS OF THE CORPORATION AND RECIPIENTS

SEC. 6. (a) Section 1006(b)(1) of the Legal Services Corporation Act (42 U.S.C. 2996e(b)(1)) is amended by inserting "(A)" after "SEC. 1006. (b)(1)" and adding at the end thereof the following new subparagraph:

"(B) No question of whether representation is authorized under this title, or the rules, regulations or guidelines promulgated pursuant to this title, shall be considered in, or affect the final disposition of, any proceeding in which a person is represented by a recipient or an employee of a recipient. A litigant in such a proceeding may refer any such question to the Corporation which shall review and dispose of the question promptly, and take appropriate action. This subparagraph shall not preclude judicial review available under applicable law.".

(b) Section 1006(c)(1) of the Legal Services Corporation Act (42 U.S.C. 2996e(c)(1)) is amended to read as follows:

"(1) participate in litigation unless the Corporation or a recipient of the Corporation is a party, or a recipient is representing an eligible client in litigation in which the interpretation of this title or a regulation promulgated under this title is an issue, and shall not participate on behalf of any client other than itself; or".

(c) Section 1006(d) of the Legal Services Corporation Act (42 U.S.C. 2996e(d)) is amended by adding at the end thereof the following new paragraph:

"(6) Attorneys employed by a recipient shall be appointed to provide legal assistance without reasonable compensation only when such appointment is made pursuant to a statute, rule, or practice applied generally to attorneys practicing in the court where the appointment is made.".

ACTIVITIES OF STAFF ATTORNEYS

SEC. 7. (a) Paragraph (2) of section 1006(e) of the Legal Services Corporation Act (42 U.S.C. 2996e(e)(2)) is amended by inserting "and staff attorneys" after "Corporation", and by inserting before the period at the end thereof a comma and the following: "except that no staff attorney may be a candidate in a partisan political election".

(b) Section 1007(a)(6) of the Legal Services Corporation Act (42 U.S.C. 2996f(a)(6)) is amended by striking out the matter following clause (C).

REIMBURSEMENT FOR SUCCESSFUL DEFENDANTS

SEC. 8. The first sentence of section 1006(f) of the Legal Services Corporation Act (42 U.S.C. 2996e(f)) is amended by striking out "may" and inserting in lieu thereof "shall".

ASSISTANCE CRITERIA

SEC. 9. (a) Paragraph (2)(B)(iv) of section 1007(a) of the Legal Services Corporation Act (42 U.S.C. 2996f(a)(2)(B)(iv)) is amended to read as follows:

"(iv) such other factors as relate to financial inability to afford legal assistance, which may include evidence of a prior determination that such individual's lack of income results from refusal or unwillingness, without good cause, to seek or accept an employment situation; and".

(b)(1) Paragraph (2)(C) of section 1007(a) of the Legal Services Corporation Act (42 U.S.C. 2996f(a)(2)(C)) is amended to read as follows:

"(C) insure that (i) recipients, consistent with goals established by the Corporation, adopt procedures for determining and implementing priorities for the provision of such assistance, taking into account the relative needs of eligible clients for such assistance (including such outreach, training, and support services as may be necessary), including particularly the needs for service on the part of significant segments of the population of eligible clients with special difficulties of access to legal services or special legal problems (including elderly and handicapped individuals); and (ii) appropriate training and support services are provided in order to provide such assistance to such significant segments of the population of eligible clients;".

(2) Section 1008(c) of the Legal Services Corporation Act (42 U.S.C. 2996g(c)) is amended by adding at the end thereof the following new sentence: "Such report shall include a description of services provided pursuant to section 1007(a)(2)(C) (i) and (ii).".

(c) Paragraph (5) of section 1007(a) of the Legal Services Corporation Act (42 U.S.C. 2996f(a)(5)) is amended to read as follows:

"(5) insure that no funds made available to recipients by the Corporation shall be used at any time, directly or indirectly, to influence the issuance, amendment, or revocation of any executive order or similar promulgation by any Federal, State, or local agency, or to undertake to influence the passage or defeat of any legislation by the Congress of the United States, or by any State or local legislative bodies, or State proposals by initiative petition, except where—

"(A) representation by an employee of a recipient for any eligible client is necessary to the provision of legal advice and representation with respect to such client's legal rights and responsibilities (which shall not be construed to permit an attorney or a recipient employee to solicit a client, in violation of professional responsibilities, for the purpose of making such representation possible); or

"(B) a governmental agency, legislative body, a committee, or a member thereof—

"(i) requests personnel of the recipient to testify, draft, or review measures or to make representations to such agency, body, committee, or member, or

"(ii) is considering a measure directly affecting the activities under this title of the recipient or the Corporation.".

LIMITATIONS ON USE OF FUNDS

SEC. 10. Section 1007(b) of the Legal Services Corporation Act (42 U.S.C. 2996f(b)) is amended to read as follows:

"(b) No funds made available by the Corporation under this title, either by grant or contract, may be used—

"(1) to provide legal assistance (except in accordance with guidelines promulgated by the Corporation) with respect to any fee-generating case (which guidelines shall not preclude the provision of legal assistance in cases in which a client seeks only statutory benefits and appropriate private representation is not available);

"(2) to provide legal assistance with respect to any criminal proceeding, except to provide assistance to a person charged with a misdemeanor or lesser offense or its equivalent in an Indian tribal court;

"(3) to provide legal assistance in civil actions to persons who have been convicted of a criminal charge where the civil action arises out of alleged acts or failures to act and the action is brought against an officer of the court or against a law enforcement official for the purpose of challenging the validity of the criminal conviction;

"(4) for any of the political activities prohibited in paragraph (6) of subsection (a) of this section;

"(5) to make grants to or enter into contracts with any private law firm which expends 50 percent or more of its resources and time litigating issues in the broad interests of a majority of the public;

"(6) to support or conduct training programs for the purpose of advocating particular public policies or encouraging political activities, labor or antilabor activities, boycotts, picketing, strikes, and demonstrations, as distinguished from the dissemination of information about such policies or activities, except that this provision shall not be construed to prohibit the training of attorneys or paralegal personnel necessary to prepare them to provide adequate legal assistance to eligible clients;

"(7) to initiate the formation, or act as an organizer, of any association, federation, or similar entity, except that this paragraph shall not be construed to prohibit the provision of legal assistance to eligible clients;

"(8) to provide legal assistance with respect to any proceeding or litigation which seeks to procure a nontherapeutic abortion or to compel any individual or institution to perform an abortion, or assist in the performance of an abortion, or provide facilities for the performance of an abortion, contrary to the religious beliefs or moral convictions of such individual or institution;

"(9) to provide legal assistance with respect to any proceeding or litigation relating to the desegregation of any elementary or secondary school or school system, except that nothing in this paragraph shall prohibit the provision of legal advice to an eligible client with respect to such client's legal rights and responsibilities; or

"(10) to provide legal assistance with respect to any proceeding or litigation arising out of a violation of the Military Selective Service Act or of desertion from the Armed Forces of the United States, except that legal assistance may be provided to an eligible client in a civil action in which such client alleges that he was improperly classified prior to July 1, 1973, under the Military Selective Service Act or prior corresponding law.".

GOVERNING BODIES OF RECIPIENTS

SEC. 11. Section 1007(c) of the Legal Services Corporation Act (42 U.S.C. 2996f(c)) is amended by striking out "and which includes at least one individual eligible to receive legal assistance under this title," and inserting in lieu thereof "and at least one-third of which consists of persons who are, when selected, eligible clients who may also be representatives of associations or organizations of eligible clients.".

NOTIFICATION

SEC. 12. Section 1007(f) of the Legal Services Corporation Act (42 U.S.C. 2996f(f)) is amended by striking all that follows "Governor" and inserting in lieu thereof a comma and: "the State bar association of any State, and the principal local bar associations (if there be any) of any community, where legal assistance will thereby be initiated, of such grant, contract, or project. Notification shall include a reasonable description of the grant application or proposed contract or project and request comments and recommendations.".

ELIGIBLE CLIENTS' SPECIAL NEEDS ASSESSMENT STUDY

SEC. 13. Section 1007 of the Legal Services Corporation Act (42 U.S.C. 2996f) is amended by adding at the end thereof the following new subsection:

"(h) The Corporation shall conduct a study on whether eligible clients who are—

"(1) veterans,

"(2) native Americans,

"(3) migrants or seasonal farm workers,

"(4) persons with limited English-speaking abilities, and

"(5) persons in sparsely populated areas where a harsh climate and an inadequate transportation system are significant impediments to receipt of legal services

have special difficulties of access to legal services or special legal problems which are not being met. The Corporation shall report to Congress not later than January 1, 1977, on the extent and nature of any such problems and difficulties and shall include in the report and implement appropriate recommendations.".

AUDITS AND RECORDKEEPING

SEC. 14. Paragraph (2) of section 1009(b) of the Legal Services Corporation Act (42

U.S.C. 2996h (b) (2)) is amended by striking out the period at the end of the last sentence and inserting in lieu thereof "throughout the period beginning on the date such possession or custody commences and ending three years after such date, but the General Accounting Office may require the retention of such books, accounts, financial records, reports, files, papers, or property for a longer period under section 117(b) of the Accounting and Auditing Act of 1950 (31 U.S.C. 67(b))."

FINANCING

SEC. 15. (a) Section 1010(a) of the Legal Services Corporation Act (42 U.S.C. 2996i(a)) is amended by inserting after the first sentence the following new sentence: "There are authorized to be appropriated for the purpose of carrying out the activities of the Corporation $205,000,000 for the fiscal year 1978, and such sums as may be necessary for each of the two succeeding fiscal years.".

(b) The last sentence of section 1010(a) of the Legal Services Corporation Act (42 U.S.C. 2996i(a)) is amended to read as follows: "Appropriations for that purpose shall be made for not more than two fiscal years, and shall be paid to the Corporation in annual installments at the beginning of each fiscal year in such amounts as may be specified in Acts of Congress making appropriations.".

HEARING EXAMINERS

SEC. 16. Section 1011(2) of the Legal Services Corporation Act (42 U.S.C. 2996j(2)) is amended by inserting before the period at the end thereof a comma and "and, when requested, such hearing shall be conducted by an independent hearing examiner. Such hearing shall be held prior to any final decision by the Corporation to terminate financial assistance or suspend or deny funding. Hearing examiners shall be appointed by the Corporation in accordance with procedures established in regulations promulgated by the Corporation".

EFFECTIVE DATES

SEC. 17. (a) (1) The amendment made by section 11 of this Act shall be effective six months after the first day of the first calendar month following the date of enactment of this Act.

(2) The amendment made by section 15 of this Act shall be effective with respect to fiscal years beginning after September 30, 1977.

(b) The amendments made by provisions of this Act other than sections 11 and 15 shall be effective on the date of enactment of this Act.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6666) to amend the Legal Services Corporation Act to provide authorization of appropriations for additional fiscal years, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment strikes out all of the House bill after the enacting clause and inserts a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SHORT TITLE

The House bill cites the title as the "Legal Services Corporation *Amendments Act* of 1977".

The Senate amendment cites the title as the "Legal Services Corporation *Act Amendments* of 1977".

The House recedes.

DECLARATION OF PURPOSE

The Senate amendment clarifies the Congressional intent respecting the scope and purpose of the legal services program by specifying that the program is intended to assist in improving opportunities for low-income persons consistent with the purposes of the Economic Opportunity Act of 1964, as amended.

There is no comparable House provision.

The House recedes.

MEMBERSHIP OF GOVERNING BOARD

The Senate amendment requires that at least three members of the Corporation's Board of Directors be eligible clients, and that the membership of the Board be generally representative of the organized bar, the client community, legal assistance attorneys, and the general public.

There is no comparable House provision.

The House recedes with an amendment providing that, effective with respect to appointments made after the date of enactment of the Legal Services Corporation Act Amendments of 1977 but not later than July 31, 1978, the membership of the Board shall be appointed so as to include eligible clients, and to be generally representative of the organized bar, attorneys providing legal assistance to eligible clients, and the general public. It is the intention of the conferees that at least one eligible client shall be appointed at the earliest possible date.

SUNSHINE PROVISION

The House bill and the Senate amendment each provides that the Corporation and each State Advisory Council will be subject to the requirements of the Government in the Sunshine Act (section 552b of title 5, United States Code).

The conference substitute includes this provision.

SUPPORT ASSISTANCE

1. The House bill and the Senate amendment each gives the Corporation the authority to fund by grant or contract research, training, technical assistance, and clearinghouse functions.

The conference substitute includes this provision.

2. The Senate amendment prohibits the funding by grant or contract of broad general legal or policy research unrelated to representation of clients.

There is no comparable House provision.

The House recedes.

3. The House bill restricts the funding of grants and contracts for support assistance to not more than ten percent of the appropriation for any fiscal year.

There is no comparable Senate amendment.

The Senate recedes.

POWERS, DUTIES, AND LIMITATIONS OF THE CORPORATION AND RECIPIENTS

1. Challenges to representation of clients

The House bill and the Senate amendment each prohibits challenges to the authority of legal services programs to provide representation in a particular case or to a particular client during a proceeding.

In addition, the Senate amendment, but not the House bill, requires that such issues shall be referred to the Corporation for review and disposition and clarifies that the party challenging the authority of the local legal services program to represent a client is not precluded from seeking judicial review of the Corporation's decision.

The conference substitute provides that no question of whether representation is authorized under this title, or the rules, regulations, or guidelines promulgated pursuant to this title, shall be considered in, or affect the final disposition of, any proceeding in which a person is represented by a recipient or an employee of a recipient; that a litigant in such a proceeding may refer any such question to the Corporation which shall review and dispose of the question promptly, and take appropriate action; and that judicial review of the Corporation's action or inaction is not precluded where available under applicable law.

2. Litigation by Legal Services Corporation

A. The House bill and the Senate amendment each restrict the Corporation from participating in litigation unless the Corporation or a recipient is a party to such litigation.

The conference substitute includes this provision.

B. The Senate amendment adds a further exception, allowing the Corporation to participate in litigation when a recipient is representing an eligible client.

There is no comparable House provision.

The conference substitute provides that the Corporation may participate in litigation on behalf of itself when a recipient is representing an eligible client in litigation in which the interpretation of this title or a regulation promulgated thereunder is an issue.

3. Nondiscriminatory appointment of attorneys

The House bill and the Senate amendment each provides that a legal services attorney shall not be appointed by a court unless the attorney is compensated on the same terms as a member of the private bar in that court.

The conference substitute includes this provision.

ACTIVITIES OF STAFF ATTORNEYS

1. The House bill and the Senate amendment each subjects staff attorneys of recipients to the same provisions of the Hatch Act which are applicable to Legal Services Corporation, State, and local employees (chapter 15, of title 5, United States Code).

The conference substitute includes this provision.

2. The House bill has explicit language prohibiting partisan political candidacies by staff attorneys of recipients.

The Senate amendment has no comparable provision.

The Senate recedes.

REIMBURSEMENT FOR SUCCESSFUL DEFENDANTS

The House bill modifies current law to mandate that a court award reasonable costs and legal fees against the Corporation, when the court finds that an action was commenced or pursued for the principal purpose of harassing the defendant or was brought with malicious abuse of the legal process.

There is no comparable Senate amendment.

The Senate recedes with amendments restoring the requirement in existing law of a defendant's motion and maintaining "sole" rather than "principal".

ASSISTANCE CRITERIA

1. Employment situation

The House bill provides that any evidence of an individual's willingness to seek or accept employment may be considered as a factor relating to such individual's financial inability to afford legal assistance.

The Senate amendment provides that evidence of a prior determination of an individual's unwillingness to seek or accept an appropriate employment situation shall be considered as a factor relating to such individual's financial inability to afford legal assistance.

The conference substitute provides that evidence of a prior determination that an individual's lack of income results from refusal or unwillingness, without good cause, to seek or accept an employment situation, may be considered as a factor relating to such individual's financial inability to afford legal assistance. The conferees intend that the appropriateness of the employment situation offered be included in any consideration of such evidence.

2. Setting of priorities

A. The House bill and the Senate amendment each requires the Corporation to insure that recipients establish priorities taking into account the relative needs of the client community, including the needs of those groups with special difficulties of access to legal services or with special legal problems (including elderly and handicapped individuals.)

The Senate amendment also includes veterans, native Americans, migrants or seasonal farmworkers, and persons with limited English-speaking abilities as groups having specialized problems which need to be addressed.

The Senate recedes.

The purpose of the priorities section is to assure that the relative needs of all significant segments of the client population are taken into consideration as recipients set priorities for providing legal assistance. The two groups mentioned are meant to be suggestive only and should not be construed to give special preference in the process of consideration to these groups over other low-income persons who also have special difficulties of access to legal services or special legal problems. The conferees recognize that most of the legal problems of such groups are shared by the eligible client population generally and can be ameliorated by legal assistance that is not necessarily directed to one specific group. However, the conferees agree that elderly and handicapped persons have special difficulties of access to legal services or special legal problems which must be considered in this priority-setting process. It is appropriate that the needs of other groups be examined, including those groups subject to the study mandated by section 13 of the conference substitute. To the extent that any identifiable group does have unique legal problems, the local legal services program should consider such problems in setting its priorities and in providing services to particular groups of eligible clients which may be able to be reached only through outreach activities.

B. The House bill and the Senate amendment require the Corporation to insure that appropriate training and support services are provided to implement established priorities.

The conference substitute includes this provision.

C. The Senate amendment requires that the annual report of the Corporation include a description of the services provided pursuant to section 1007(a)(2)(c)(i) and (ii).

There is no comparable House provision.

The House recedes.

3. Legislative and administrative advocacy

A. Affected Actions

The House bill changes present law by adding to the list of legislative and executive actions which the recipients are restricted from influencing, "State proposals by initiative petition".

There is no comparable Senate amendment.

The Senate recedes.

B. Representation by Employees of Recipients

(1) The House bill provides that an employee of a recipient may represent a client in an administrative or legislative proceeding.

The Senate amendment provides that an attorney, or a recipient employee supervised by an attorney, may represent clients in such proceedings.

The Senate recedes.

(2) The Senate amendment explicitly states that the ABA Code of Professional Responsibility is applicable to legal services programs and employees with respect to the solicitation of clients.

The House bill has no comparable provision.

The House recedes.

C. Appropriate Representations

(1) The House bill specifies examples of the types of representations (testifying, drafting, or reviewing measures, or making representations to an agency, body, committee or member) that may be made by legal services programs in response to a request from a legislative or administrative body or member thereof.

There is no comparable Senate amendment.

The Senate recedes.

The conferees agree that the representations enumerated by the House bill are those which are already implicit in current law. This provision in no way precludes a recipient from responding to a request directed to a recipient by a governmental agency, legislative body, a committee, or a member thereof to make representations of a general nature.

(2) The House bill provides that a legal services program may engage in legislative and administrative advocacy with respect to a measure directly affecting the activities of the recipient program, the Corporation, or (if the local Board votes to take a position on a particular subject) eligible clients.

There is no comparable Senate amendment.

The Senate recedes with an amendment providing that a recipient may make representations on a measure directly affecting the activities under this title of the recipient or the Legal Services Corporation. This amendment does not permit, without request, the type of advocacy on matters of general concern to poor persons, which would have been authorized under the deleted House language.

HIRING OF STAFF ATTORNEYS

The Senate amendment exempts a recipient from the hiring preference existing law gives to local attorneys if the recipient certifies that the position requires specific legal expertise or language proficiency and that there is no qualified local attorney who is available, but provides that in no case may a program give preference to a person which is inconsistent with Federal laws respecting discrimination in employment.

There is no comparable House provision.

The Senate recedes, maintaining the provision in existing law.

LIMITATIONS ON USE OF FUNDS

1. Fee-generating cases

The House bill permits representation in a fee-generating case, matter, or proceeding if adequate private representation is unavailable, and then only as authorized by the Corporation regulations.

The Senate amendment permits legal assistance in a fee-generating case in which a client seeks only statutory benefits and where appropriate private counsel is unavailable, and in other situations where authorized by Corporation guidelines.

The House recedes.

2. Criminal cases

The House bill and Senate amendment each permits legal assistance to a person charged with a misdemeanor or lesser offense in an Indian tribal court. The House bill sets out this provision in a separate paragraph, numbered (2).

In addition, the Senate amendment, but not the House bill, expands this exception to allow the provision of assistance in a criminal proceeding when the offense involves hunting, fishing, trapping or gathering fruits of the land and the principal defense asserted involves rights arising from a treaty with native Americans or from a statute or Executive order establishing such rights.

The Senate recedes.

3. Civil actions challenging the validity of a criminal conviction

The Senate amendment restates existing law prohibiting legal assistance in civil actions brought by a convicted defendant to challenge the validity of a criminal conviction, and in addition, the Senate amendment would permit the undertaking of such cases when authorized by Corporation guidelines.

The House bill restates the existing law and prohibition in a new paragraph, numbered (3).

The Senate recedes.

4. Juvenile representation

The Senate amendment explicitly repeals section 1007(b)(4) of the Legal Services Corporation Act of 1974 which prohibits juvenile representation except in specified instances.

The House bill has the same effect of repealing the prohibition, but does so by omitting the language of section 1007(b)(4) when it revises section 1007(b).

The conference substitute follows the House format.

5. Desegregation assistance

Section 1007(b)(7) of current law prohibits the use of Corporation funds "with respect to any proceeding or litigation relating to the desegregation of any elementary or secondary school or school system". The section prevents a legal services lawyer from aiding in the preparation of briefs, pleadings, or similar documents, or participating in any other way in any judicial or administrative proceedings relating to school desegregation.

The Senate amendment repeals section 1007(b)(7) of the Legal Services Corporation Act of 1974 which prohibits legal assistance in proceedings or litigation involving elementary or secondary school desegregation.

The House bill retains this prohibition, and renumbers the paragraph as paragraph (9).

The Senate recedes with an amendment stating that a recipient may provide legal advice to an eligible client with respect to such client's legal rights and responsibilities. However, the existing prohibition against legal assistance in litigation or proceedings involving school desegregation remains intact.

The conference substitute, renumbered as section 1007(b)(9), states what is implied in current law: that the prohibition does not prevent a legal services lawyer from providing advice to an eligible individual concerning the state of the law or the individual's status and responsibilities under it. Nor does the prohibition prevent a legal services program from advising an eligible client about

how to obtain other representation or from making a direct referral.

Canon 2 of the American Bar Association Code of Professional Responsibility states: "A lawyer should assist the legal profession in fulfilling its duty to make legal counsel available". If an applicant for assistance with respect to a desegregation proceeding were turned away without any explanation, advice, or referral, the person would be likely to draw the erroneous conclusion that the case was without merit, or that no source of free legal assistance was available with respect to it. The Canon requires a lawyer to avoid creating that kind of misleading impression, and to take positive steps to assure that individuals are aware of their legal rights and the availability of lawyers to help vindicate them.

6. Organizational assistance

The House bill clarifies the prohibition on organizational assistance so as to prohibit the use of Corporation funds to initiate the formation of or directly organize any association, federation, or similar entity, except that legal assistance to eligible clients is permitted.

There is no comparable Senate amendment.

The Conference substitute provides that—

"No funds made available by the Corporation under this title, either by grant or contract may be used—

* * * * *

"(7) to initiate the formation, or act as an organizer, of any association, federation, or similar entity, except that this paragraph shall not be construed to prohibit the provision of legal assistance to eligible clients;".

7. Abortion cases

The House bill restates the section 1007(b)(8) provision on proceedings or litigation involving abortions.

While the Senate amendment does not explicitly restate existing law, it continues the existing prohibition.

The conference substitute follows the House format.

8. Military-related cases

The House bill repeals the existing provision of section 1007(b)(9) of the Legal Services Corporation Act of 1974 which prohibits the provision of legal assistance in certain proceedings or litigation arising out of a violation of the Military Selective Service Act or of desertion from the Armed Forces of the United States.

The Senate amendment modifies the existing law to permit legal assistance in a civil case arising out of the Military Selective Service Act where the client alleges wrongful denial of his status as a conscientious objector prior to July 1, 1973.

The House recedes with an amendment which renumbers the prohibition as paragraph (10), retaining the current prohibition against representation in such proceedings or litigation "except that legal assistance may be provided to an eligible client in a civil action in which such client alleges that he was improperly classified prior to July 1, 1973, under the Military Selective Service Act or prior corresponding law" (the last military draft expired on June 30, 1973).

9. Gay rights cases

The House bill prohibits legal assistance with respect to any proceeding or litigation arising out of disputes or controversies on the issue of homosexuality or "so-called gay rights".

There is no comparable Senate amendment.

The House recedes.

GOVERNING BODIES OF RECIPIENTS

The Senate amendment requires that at least one-third of the membership of boards of recipients shall be, when selected, eligible clients. This provision is made effective six months after the first day of the first calendar month following the date of enactment of this Act.

There is no comparable House provision.

The House recedes.

NOTIFICATION

The Senate amendment provides that the principal local bar association (if one exists) of the community to be served will be notified at least thirty days prior to approval of any grant application, contract, or any other project initiating a legal assistance program, and requires that notification of the initiation of legal assistance in a local community include the solicitation of comments and recommendations.

There is no comparable House provision.

The House recedes.

ELIGIBLE CLIENTS SPECIAL NEEDS ASSESSMENT STUDY

The Senate amendment provides that the Corporation may make contracts or grants for model or demonstration projects. It enumerates certain segments of the eligible client population which might be appropriate recipients of services provided by such projects, including elderly persons, handicapped persons, veterans, native Americans, migrants or seasonal farmworkers, persons with limited English-speaking abilities and persons living in sparsely-populated areas where a harsh climate and an inadequate transportation system significantly impede the receipt of legal services.

There is no comparable House provision.

The Senate recedes with an amendment requiring that a study be conducted (and a report be submitted by January 1, 1979) on whether eligible clients who are veterans, native Americans, migrants or seasonal farm workers, persons with limited English-speaking abilities, and persons in sparsely populated areas where a harsh climate and an inadequate transportation system are significant impediments to receipt of legal services, have special difficulties of access to legal services or special legal problems which are not being met, and that appropriate recommendations be made and implemented to deal with these problems.

The Senate recedes from its provision on model projects, with the understanding that authority for such projects already exists in sections 1006(a)(1) and 1007(g) of the Legal Services Corporation Act of 1974. The Corporation may implement any recommendations in the report under the authority of sections 1006(a)(1) and 1007(g). The conferees believe that the Corporation, when examining and taking appropriate action to meet the needs of all veterans, should be particularly concerned about the needs for legal assistance of veterans (eligible for legal assistance under this title) with upgraded administrative discharges which are affected by the provisions of Public Law 95–126 during the period ending October 7, 1978.

AUDITS AND RECORDKEEPING

1. The House bill requires that the Corporation retain the report of its annual audit for three years from the date on which such audit is filed with the General Accounting Office.

There is no comparable Senate amendment.

The House recedes.

2. The House bill and the Senate amendment each provides a time limitation during which the Corporation must permit the General Accounting Office access to Corporation papers, property, or documents which are necessary to facilitate the audit. The Corporation is required to retain such documents for three years from the date of initial possession of custody, unless otherwise requested by GAO.

The conference substitute includes this provision.

FINANCING

1. The House bill authorizes appropriations for two fiscal years at the level of $217 million (FY 1978) and $275 million (FY 1979). The Senate amendment authorizes appropriations for three fiscal years at the level of $205 million (FY 1978), and at "such sums as may be necessary" for fiscal years 1979 and 1980.

The House recedes.

2. The House bill requires that the appropriations be paid to the Corporation in annual installments.

There is no comparable Senate amendment.

The Senate recedes.

HEARING EXAMINERS

The House bill and Senate amendment each modifies existing law to require an independent hearing examiner, when requested, to conduct the hearing; appointment of the hearing examiner pursuant to Corporation regulations; and the hearing to precede any final decision by the Corporation.

The conference substitute includes this provision.

LIABILITY OF THE UNITED STATES FOR LEGAL FEES AND COSTS

The Senate amendment adds a new section to the bill which permits the recovery of litigation costs, including attorneys' fees, by certain individuals or organizations when they prevail in civil litigation in which the United States is a party.

There is no comparable House provision.

The Senate recedes.

The conferees have taken note that similar proposals are being seriously evaluated by the Judiciary Committees in both Houses, as well as by the United States Department of Justice. The conferees have agreed that, while these inquiries may be desirable, further analysis and disposition should be left to the Committees of jurisdiction. In view of this, and also because the provision is not germane under the Rules of the House, the conference substitute does not include the Senate provision.

CONFERENCE REPORT ON S. 1316, ENDANGERED SPECIES ACT AUTHORIZATIONS

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the statement of the managers be read in lieu of the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of November 29, 1977.)

Mr. MURPHY of New York (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. MURPHY) and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 30 minutes each.

The Chair recognizes the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conference report on S. 1316 adopts all of the provisions of the House-passed legislation with only one minor modification. As agreed by the conferees, the bill would authorize $16 million over 4 years to fund State cooperative endangered species programs.

Under the Endangered Species Act, the Federal Government is authorized to enter into cooperative agreements with individual States that develop a qualifying endangered species program. Once a State has developed an acceptable endangered species program, it is eligible to receive Federal matching funds to carry out its program. In the past, these matching funds have been used for such activities as conducting bald eagle surveys and propagating falcons for release into the wild.

In addition, S. 1316 amends the requirements that States must meet before they become eligible for these matching funds. This change in the law was added by the House and agreed to by the conferees in an attempt to encourage participation in the endangered species program by the large number of States who have not signed agreements with the Federal Government.

The conferees have added only one small modification to the bill as passed by the House. This modification simply insures that the prohibitions in the Endangered Species Act will continue to apply to resident endangered and threatened species in those States qualifying for Federal funding under the new qualifying requirements specified in the bill. Without this modification, some endangered species could have been left unprotected by both the provisions of the Endangered Species Act and the provisions of the State endangered species program.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, this comes at a time when we have not had much preparation for it. I do not know whether the committee went into the situation that we faced in the Public Works appropriation hearings and as well as in the Interior Committee appropriation hearings, but it developed upon those hearings that the present act, in my opinion, at least, the Department of the Interior or parts thereof had held species endangered without any evidence that it was a species and not a variety.

Further hearings disclosed that in the Tellico Dam they had to seek out the so-called snail darter, not to save the species, but to find one whereby they could stop a dam within 5 percent of being completed and which would have furnished energy to 30,000 homes. In the south end of my State where I live they held up an interstate highway because of the sandhill crane. It develops that the sandhill crane is in many parts of the United States. We have had them declared a species endangered without determining whether they are a species or a variety, as history will show, without any evidence that they might exist in other States, to see whether they were plentiful.

Down in Tennessee they went to the bottom of the stream and found a darter, where the citizens who filed an injunction could not identify or separate them from two other darters. The only thing we could see as Members of Congress was a little slight dot for two of them, what you would call a minnow. Nobody heard of them until they set out to stop the dam.

I wonder if the gentleman has made an effort to see what damage they are doing to the country's ability to look after itself in the name of protecting something that is worthwhile.

As I said earlier, we have had this endangered species from the time of the dinosaurs, or we would not be here.

They are not carrying out the law as it should be according to the evidence before us, so I have understood.

Can the gentleman give any information about what they have done and whether they are going to put the country back as it was at the time of the Indians?

Mr. MURPHY of New York. Mr. Speaker, I thank the gentleman for bringing this up. Of course, the gentleman's inquiry refers to section 7 of the act and what we are dealing with here is section 6 of the act. We do not in any way in this legislation deal with the designation of critical habitat under section 7 of the Endangered Species Act. It is under section 7 that the Sixth Circuit Court of Appeals enjoined the completion of the Tellico Dam. This particular conference report has nothing to do with the problems that some public works projects face as a result of the Endangered Species Act.

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield further, I have high regard for my friend, the gentleman from New York. I just wonder if the gentleman would not be better spending his time going to work on section 7 and straightening it out before we write some other section?

Mr. MURPHY of New York. We have already started working on section 7. The committee has had the General Accounting Office do a study of the Tellico Dam situation. It has also directed a set of questions to the Department of the Interior in order to determine the potential impact of section 7 on public works programs across the country. We do plan to deal with the critical habitat question early next session.

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield further, those things that are dear to us and valuable to us we are in favor of, but where this is being used to stop the development of this country, we cannot afford it, in view of the present situation.

PARLIAMENTARY INQUIRY

Mr. WHITTEN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WHITTEN. Mr. Speaker, does it require unanimous consent for the consideration of the conference report?

The SPEAKER pro tempore. The Chair is advised that unanimous consent has already been obtained for the consideration of the conference report.

Mr. WHITTEN. I am sorry, Mr. Speaker, I was not aware that was done here. I certainly would hope that the gentleman would defer this until we have a meeting of the minds between the committees that deal with it, because it is doing untold damage by being misconstrued in carrying out what I understand are the terms of the law.

Mr. MURPHY of New York. Mr. Speaker, I want the gentleman to know that we are specifically addressing ourselves to section 7. Next year the remainder of the Endangered Species Act including section 7 will be reauthorized. We want specific answers to the specific questions that the gentleman has just raised and this conference report has nothing to do with the inquiry of the gentleman.

Mr. WHITTEN. Mr. Speaker, I would like to insist that we read the statement on the part of the managers.

The SPEAKER pro tempore (Mr. FOLEY). The Chair wishes to advise the gentleman from Mississippi that unanimous consent was obtained for the consideration of the conference report, to read the statement of the managers in lieu of the report, and to dispense with further reading of the statement of the managers.

Mr. WHITTEN. I thank the Speaker.

Mr. WATKINS. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Could the gentleman explain to me on the amendment here about the provision requiring an acceptable endangered species program be developed by the States? It has to be acceptable to whom, and to what group or agency?

Mr. MURPHY of New York. The States are required to initiate a conservation program for those species most in need of protection before they can qualify for matching funds.

Mr. WATKINS. If the gentleman will yield further, what concerns me about this provision is that, like the gentleman from Mississippi, I have a cousin or mutation of the snail darter, a black darter called the leopard darter, in my district which blocked construction of a dam.

To our knowledge, it is a mutation, about three or four crosses away. We cannot figure out how it can be endangered. I am deeply concerned about who is saying what about this endangered species in my State, whether it is the Federal Government or whom.

Mr. MURPHY of New York. The Department of the Interior determines whether a species is threatened or endangered after input from biologists and the public at large.

I might say that we could use some cooperation from the Fish and Wildlife Service. They recently tried to transfer the snail darter upstream to another habitat where it probably could have survived but the Fish and Wildlife Service provided nets that were contaminated and they did away with the snail darters under transfer. That is the type of agency cooperation we are trying to prevent, but I want my colleague from Oklahoma, and also my colleague from Mississippi, to know that we understand this problem. We are not going to impede programs because some people may feel that a species is endangered. We are going into this whole question in section 7, and the entire House will have the opportunity next year in the authorization process to bring this up. We do not impact on those areas in this section 6 conference report.

Mr. WATKINS. I am deeply concerned about this because the power of this particular agency has grown here. I think there should be some very close scrutiny because they are about to stop any type of public works project or any program receiving Federal funds. There is a serious possibility that a mutation or long-distant cousin of the snail darter or something in my district will prevent any type of economic growth for our people.

Mr. MURPHY of New York. The intent is not to impede public works projects, but to protect bona fide endangered species. We are going into that whole question of endangered species and the definition of them in section 7 next year. This conference report does not deal with that issue at this time.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield further?

Mr. MURPHY of New York. I will be happy to yield.

Mr. WHITTEN. As the gentleman knows, we had no advance notice, and of course in the closing days we are accustomed to that happening—otherwise, I would have been better prepared to have made an objection had I been on the floor. But, I would ask the gentleman if, in his contemplation, endangered species is something that is sought for the purpose, not of protecting species, but of finding one that comes under the provisions of the law so as to stop a dam which is 95 percent complete, and for which $96 million has already been spent, to provide energy for 30,000 homes. In this instance, they went out and found something that was not known to exist.

I do not see how they could say it was endangered until they made a thorough survey over the United States.

And may I say, for the record, that the witness in the courtroom, when the judge issued the injunction, could not identify the snail from some others.

I just hope that we can call on our friend to help straighten this matter out so that our country can continue to exist and continue to prosper and to grow.

Mr. MURPHY of New York. In no way would the snail darter come under any aspect of this conference report, because we are dealing strictly with section 6. Section 7 will be dealt with separately next year in the authorization. The committee and the members of the committee from Tennessee were very careful to insure that this question was raised in the appropriate hearings.

Mr. FORSYTHE. Mr. Speaker, I rise in support of the conference report on S. 1316, a bill to amend the Endangered Species Act of 1973 regarding the requirements for State cooperative programs and to authorize appropriations through fiscal year 1981 to carry out such programs.

The Senate conferees have agreed to recommend that the Senate recede from its disagreement to the amendment of the House which enlarged and strengthened the role of States in our Nation's endangered species program. This is a very positive step, as the successful development of our Nation's overall endangered species program depends on the good working arrangement between Federal and State agencies. Without the strong State role added to the bill by the House, no endangered species program could ever be fully realized.

The only real change in the House-passed version of the bill which has come out of the conference is one which I can fully support. During the conference it became apparent that the protection of some species might be inadvertently lost when a State program became effective. The change brought about in conference will insure that all endangered species will continue to be protected.

Mr. Speaker, I urge my colleagues to join with me in approving this authorization so that funds are available for this much-needed program.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I thank the gentleman for yielding.

Mr. Speaker, the Committee on Appropriations, may I say, has provided funds with which to transfer the so-called endangered species from one point to the other. And the act, as I interpret it—speaking off the cuff, because I did not know this was coming up—provides that they be protected and not used to prevent the development of the country. So if the act were carried out as it reads, if the courts would so interpret it, it would be one thing; but as I point out, when we have someone making a study, trying to find something to be used to stop a project, something that was not known to exist, something that there is no evidence now that it is not of a different variety, then we can see that the act itself is being misused.

Mr. Speaker, I hope the gentleman will devote his attention to seeing that this is carried out as it is now, and then we would not have anything like the damage that has occurred.

Mr. FORSYTHE. Mr. Speaker, that is the issue, and, as I say, that matter will apparently go all the way to the Supreme Court. But then the legislative process will follow that, as the chairman of the committee said, when we look at the rest of the legislation.

Mr. WATKINS. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Speaker, what concerns me is the fact that we have stated here that the States must develop an acceptable program.

A program acceptable to whom? The Federal Government, the Federal bureaucracy, which has stopped many of us in the States flat in our tracks from developing opportunities for our people?

Mr. FORSYTHE. Mr. Speaker, for the State to get a cooperative program, it would deal with the Department of the Interior and the Department of Commerce, yes, where the species would be, for example, a marine mammal. There is a split jurisdiction by species, and obviously the Federal agency has to go by the Federal law in terms of this: Does that State cooperative agreement comply with the Federal statute?

But this piece of legislation even helps make that more possible, because one of the problems in the existing law, without this legislation, was that a State had to have a program to cover all species, whether they were resident or involved or not. This permits them to protect those species under an agreement with the Federal Government that are involved in that single State.

Mr. MURPHY of New York. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the chairman of the committee.

Mr. MURPHY of New York. Mr. Speaker, I want to assure my colleague, the gentleman from Oklahoma (Mr. WATKINS), that the purpose of this legislation is to bring the 33 States into this program, and get them to take over the protection of resident endangered species.

We have broadened the program, and we have added more money so that the States will be able to protect endangered species and have the funds to do it. Thus they will not have to rely on what is minimal funding in many States.

That is the very thrust of this legislation, and it is not meant to impede any project. There is no project that would be impeded by this legislation.

As I assured the gentleman from Mississippi (Mr. WHITTEN)—and I refer to section 7—what we are doing is simply broadening the power of the States to, No. 1, get funding, and, No. 2, to be responsible for the endangered species within the States.

Mr. WATKINS. Mr. Speaker, will the gentleman yield further?

Mr. FORSYTHE. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Speaker, the concern I have is that in the State of Oklahoma a water project was halted. Under the guise of the Endangered Species Act we were protecting two species, one called the snail darter and the other one called the leopard darter, a muta-

tion. They stopped the project. They did this, we understood, to save the environment from the results of the project.

The choice was exercised by the Federal bureaucracy, and they did not allow this project to be completed. This was done by the choice of those individuals in the Federal Government and not by the choice of the people in that area of the country, that area of the State of Oklahoma, and it was impossible to continue that project.

Mr. FORSYTHE. Mr. Speaker, as the committee chairman has said, these issues are not dealt with in the legislation we are addressing today. Those are issues that will be dealt with when we look at the rest of the Endangered Species Act. That is the time we will be anxious to hear from the gentleman further.

Mr. LEGGETT. Mr. Speaker, I urge the adoption of the conference report S. 1316. The conferees have agreed to all of the provisions of the legislation as passed by the House. They have merely added some modifying language which plugs a potential loophole in the law.

Under the existing law, when a State signs a cooperative agreement with the Federal Government covering resident wildlife, the prohibitions in the Endangered Species Act are waived. This makes a good deal of sense since the continuation of Federal prohibitions would only duplicate the protection afforded under the cooperative agreement.

S. 1316, however, changes the existing law slightly by no longer requiring blanket protection for each and every species listed by the Federal Government. Thus, in some instances, there may be a need for continued Federal protection for those species not covered by the cooperative agreement. The modification adopted by the conferees guarantees that those species not covered by the cooperative agreement will continue to receive protection under the Endangered Species Act.

Mr. MURPHY of New York. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

MOTION OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MURPHY of New York moves that the House recede from its amendment to the title of the Senate bill, S. 1316.

The motion was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore (Mr. DICKS). Is there objection to the request of the gentleman from New York?

There was no objection.

TRADING WITH THE ENEMY ACT AMENDMENTS

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 7738) with respect to the powers of the President in time of war or national emergency, with Senate amendments thereto, concur in Senate amendments numbered 2, 4, 5, 6, and 7, and concur in Senate amendments numbered 1 and 3 with amendments.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The Clerk will report the Senate amendments.

The Clerk read the Senate amendments, as follows:

Page 2, after line 15, insert:

(c) The termination and extension provisions of subsection (b) of this section supercede the provisions of section 101(a) and of title II of the National Emergencies Act to the extent that the provisions of subsection (b) of this section are inconsistent with those provisions.

Page 2, line 16, strike out "(c)" and insert "(d)".

Page 6, line 9, strike out all after "(2)" down to and including "title," in line 13 and insert "donations, by persons subject to the jurisdiction of the United States, of articles, including food, clothing, and medicine, intended to be used solely to relieve human suffering, except to the extent that the President determines that such donations (A) would seriously impair his authority to deal with any national emergency declared under section 202 of this title,".

Page 8, strike out all after line 11 over to and including line 6 on page 9.

Page 9, line 8, strike out "207." and insert "206.".

Page 9, line 19, strike out "208." and insert "207.".

Page 11, after line 10, insert:

SEC. 208. If any provision of this Act is held invalid, the remainder of the Act shall not be affected thereby.

The SPEAKER pro tempore. The Clerk will report the House amendments to Senate amendments numbered 1 and 3.

The Clerk read the House amendments to Senate amendments numbered 1 and 3, as follows:

In Senate amendment No. 1, strike out "supercede" and insert in lieu thereof "supersede;" and in Senate amendment No. 3, strike out "including" and insert in lieu thereof "such as," strike out "solely", and strike out "authority" and insert in lieu thereof "ability."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. ASHBROOK. Reserving the right to object, Mr. Speaker, I do that for the purpose of asking my colleague, the gentleman from New York (Mr. BINGHAM), just what is going on here. There does not seem to be anybody at the desk on this side with respect of this matter.

Mr. BINGHAM. Mr. Speaker, if the gentleman will yield, I will be glad to explain what we are attempting to do.

I expect that the gentleman from Illinois (Mr. FINDLEY), the present ranking member of my subcommittee, will be here momentarily.

I would remind the gentleman that the bill we are dealing with here passed the House on a voice vote a few months ago. It then passed the other body with a few amendments, most of which are technical in character, such things as a separability provision and some purely technical amendments changing section numbers and so on.

There are two proposed changes of substance in the Senate bill, which are substantially noncontroversial, we feel. We have had some discussions with the other body on the subject, and we recommend accepting one of those changes. The other we recommend accepting with some limitations, and I can explain what those are.

The bill we are dealing with, the gentleman will recall, provides procedures and policies for the Presidential use of economic sanctions following a declaration of a national emergency at times other than declared war. This conforms to the provisions of the National Emergencies Act.

Under the House bill, the issuance of particular regulations to carry out economic restrictions was made subject to congressional veto by congressional resolution. The Senate representatives took a very strong position that this was unnecessary since the Congress already has the authority under the National Emergencies Act to overrule or veto the President's declaration of an emergency, and the other body felt that that is sufficient. Therefore, our committee representatives concluded that we should concur in that amendment since the Senate seemed to feel very strongly about it.

The other amendment had to do with exceptions to the economic controls the President would have under such a declaration of emergency, so that articles of a humanitarian character would be excluded from any embargoes of exports. The House language on that, the Senate felt, was too broad. Consequently, the Senate amendment somewhat tightened up that exclusion. It proposes only to exclude items intended solely for humanitarian purposes and specifies that food, clothing, and medicine are the types of items that should be excluded from Presidential regulation.

The House amendment to the Senate amendment would eliminate the word "solely" since, in almost every case, items of that character would have some benefit other than a purely humanitarian one. The test would be an impossible one to meet if it were limited by the word "solely." Most donations would have some economic value and impact, in addition to relieving human suffering, and such economic value or impact should not preclude a donation from coming within the Senate's proposed "humanitarian exemption." The motion I am offering to concur in the Senate provision would delete the word "solely" from the Senate language.

The Senate provision also seemed to limit the donations contemplated to fall within the exemption to "food, clothing, and medicine." It was the intent of both the House and Senate bills that any article other than military or strategic items could be donated.

To make clearer that the Senate's mention of "food, clothing, and medi-

cine" is meant only to be illustrative of donations covered by the exemption, and that such mention should not be regarded as excluding other donated things of value from the exemption, it was suggested that the term "including" that appears before "food, clothing, and medicine" be changed to "such as." Such a change is included in the motion I am making to concur in the Senate amendments.

Finally, my motion to concur includes two further amendments to make purely technical corrections in the bill—to correct a misspelling and to correct a reference to the "authority" of the President which should read the "ability" of the President.

It is my recommendation, Mr. Speaker, that the House concur in the remainder of the Senate amendments. According to Senator STEVENSON, manager of the Senate bill, the Senate felt strongly that the congressional veto provided in the National Emergencies Act over future declarations of national emergency, which would trigger the international economic regulatory authority spelled out in this bill, constitutes a sufficient congressional check on the use of these authorities and makes unnecessary the additional congressional veto of regulations contained in the House bill. It was the concern of the House committee in considering this legislation that the congressional veto over national emergencies might provide too blunt and imprecise a congressional check—that a future Congress might concur with the need for a declaration of national emergency, but disagree with the use of a particular authority available to the President in light of a declared national emergency. Nevertheless, the motion I will offer to concur in the Senate amendments accepts the Senate position that congressional veto over "national emergencies" themselves is sufficient.

We feel that neither of these are of major consequence to the bill. That is why we brought the matter before the House in this fashion. We did not feel a conference was necessary and we were hoping to dispose of this legislation before the end of this session.

The minority has been consulted on this. I alerted the gentleman's colleague, the gentleman from Maryland (Mr. BAUMAN). I do not see the gentleman on the floor at the moment.

I also have the assurances that the minority on the committee are in accord with this proposal.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, I thank my colleague for that explanation and I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. DICKS). Is there objection to the request of the gentleman from New York (Mr. BINGHAM)?

Mr. GILMAN. Mr. Speaker, reserving the right to object, I would ask the gentleman from New York (Mr. BINGHAM) whether there is any provision in this proposal that will open the door to trading with either Vietnam or Cuba?

Mr. BINGHAM. If the gentleman would yield, I would say to the gentleman from New York (Mr. GILMAN) that this legislation specifically grandfathers the embargoes against Vietnam, Cambodia, Laos, Cuba, and other existing embargoes, so that they are not affected in any way by this legislation.

Mr. GILMAN. And this proposal creates no new vehicle for doing trade with any of those nations?

Mr. BINGHAM. No; it certainly does not.

Mr. GILMAN. I thank the gentleman for yielding and withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. BINGHAM)?

Mr. WOLFF. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from New York (Mr. BINGHAM) a question. The answer, as I understand it, to the question propounded by the gentleman from New York (Mr. GILMAN) as to any further limitations to be placed on the part of the Congress at any later date are not removed; is that correct?

Mr. BINGHAM. No; as I explained to the gentleman from Ohio (Mr. ASHBROOK) Congress, under the National Emergency Act, which dovetails with this act, would have the right by concurrent resolution to overrule a veto of a declaration of emergency by the President, so that right of a veto over such declarations of a national emergency would not be disturbed in this legislation.

Mr. WOLFF. But what if we got involved in some other type of conflict that was not declared a national emergency, and the Congress desired at that point to put certain restrictions on trading with that particular country or countries involved, would we still, under the provisions of this act, have the opportunity of putting those restrictions in?

Mr. BINGHAM. Why, certainly, there would be nothing to prevent the Congress from taking any action that it saw fit to take. That situation that the gentleman describes would simply not be covered by this act.

Mr. WOLFF. This would not put any restrictions on any further actions by the Congress?

Mr. BINGHAM. Certainly not.

Mr. WOLFF. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

A motion to reconsider was laid on the table.

LIVING UP TO OUR COMMITMENT TO THE PHILIPPINE SCOUTS

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PANETTA. Mr. Speaker, today I am introducing legislation to correct a longstanding inequity in our treatment of the survivors of the Philippine Scouts who fought alongside American soldiers during World War II. Although they were a part of the U.S. Army and fought and died along with their American counterparts, they never received the same pay or benefits. This kind of flagrant discrimination was sad reward indeed for their heroic sacrifices. The passage of this legislation would be a clear message to Filipino-Americans and people throughout the world that our commitment to justice and equality is not parochial and is basic to our conception of universal human rights.

In the late 1930's, the Philippine Scouts were made a part of the U.S. Army to help defend the South Pacific against totalitarian domination. Gen. Douglas MacArthur described the Scouts as "excellent troops, completely professional, loyal and devoted." They were an elite organization with a high esprit de corps in which membership was considered an honor by Filipinios and the strictest standards were followed in selection.

General Wainwright, who took command of forces on Bataan and Corregidor after General MacArthur moved Army headquarters to Australia, reported that by the beginning of December 1941 the "Philippine Scouts were fit, trained in combat principles and ready to take the field in any emergency."

At the onslaught of the war in the Pacific when the enemy attacked Pearl Harbor and invaded the Philippine Islands, these soldiers became key to the success of our entire South Pacific strategy. It was the continued resistance on Bataan that denied the Japanese an essential base for the projected thrust to the South Pacific. The enemy was forced to retain large army and navy forces in the Philippines, which otherwise could have been employed against Allied shipping of men and materials to Australia and New Caledonia from the United States and the Middle East. Their protracted defense of these islands against incredible odds allowed the United States time to recover from the first blows of the war and begin to send in supplies and reinforcements.

The defenders of Bataan were hopelessly outnumbered and undersupplied. During their entrenchment they endured severe hardships. When they entered Bataan in January they were already in need of new issues of clothing and shoes. General Wainwright reports that most of the soldiers "walked into Bataan barefooted." Disease and starvation were problems dealt with daily. At least 30 percent of the troops had dysentery, and the rest some variety of worm infestation of the bowel. By mid-March at least 75 percent of the command was incapacitated to some extent. But for 4 months they held out, fighting the enemy guerrilla fashion, buying time for an Allied force build-up in Australia.

With all the hardships endured by these soldiers, they never received the comparable benefits they were due. Brig. Gen. W. E. Brougher, Commander of the 11th Division on Bataan, pointed out in his prison diary, the moral factor that

most disturbed him was "discrimination against Philippine Scouts officers by the U.S. Army Forces in the Far East—in matters of promotion, pay and allowances." For despite their gallant service and tremendous suffering, the Philippine Scouts received only a fraction of the pay and benefits received by their American counterparts. And that discrimination continues today.

It is time to rectify that wrong. The legislation I am introducing is simple and direct. It authorizes pay and benefits for members and survivors of members of the Philippine Scouts at the same rates of basic pay as other members of the U.S. Army of corresponding grades and lengths of service received at that time. It is estimated that the remedial legislation will cost $8 to $9 million. This is a small price to pay in view of the incalculable sacrifices of life and limb made by these brave soldiers. Indeed, it is a small price to pay for hopefully restoring our moral commitment to these soldiers. I urge my colleagues to join in support of this measure which reads as follows:

H.R. 10174

A bill to authorize pay and benefits for members and survivors of members of the Philippine Scouts on the same basis as such pay and benefits are authorized for other members of the Armed Forces and their survivors

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Army shall pay to each person who served as a Philippine Scout after December 6, 1941, and before December 31, 1946, in a lump sum the difference between the basic pay which he would have received for his military service during that period if the rates of pay of the Philippine Scouts had been the same as the rates of basic pay for other members of the Army of the United States of corresponding grades and length of service, reduced by the basic pay actually received by such person.

(b) In the event a person entitled to payment under subsection (a) is decreased, payment shall be made to the persons, and in the manner, prescribed in section 2771 of title 10, United States Code.

SEC. 2. The retired pay of each former Philippine Scout shall be computed for periods after the effective date of this Act on the basis of the rates of pay prescribed for other members of the Army of the United States of corresponding grades and length of service.

SEC. 3. This Act shall take effect as of the first day of the first calendar month which begins after the date of enactment of this Act.

CHINESE SHADOWS

(Mr. HAGEDORN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HAGEDORN. Mr. Speaker, after a week-long trip to the People's Republic of China, Ms. Mary Berry, HEW's Assistant Secretary of Education, has informed us that the United States has "much to learn from Chinese schools and colleges." In particular, she is fascinated by their "healthy" attitude about admissions quotas, toward which they are moving "rationally and realistically." "They're not concerned about the subleties like we have to be," she observes.

Ms. Berry is badly in need of her own education. To laud as a model for U.S. education the most totalitarian system of education ever constructed by mankind is tragic. Sadder still is that Ms. Berry delights most in those aspects of the Chinese system which are most explicitly totalitarian, including their "tying education closely to work by requiring students to spend part of their time on farms and in factories." Although she fails to remark upon it, I would not be surprised that Ms. Berry is equally impressed by the uncanny ability of the Chinese system to coordinate the needs of the state, and the educational training and placement of its population.

One must question, too, if Ms. Berry admires the system's capacity for eliminating such "inefficiencies" and "subtleties" as dissent, free inquiry, and parental involvement. With respect to the destruction of libraries, the defacement of art works, and the obliteration of cultural traditions, the anthill-like society of Communist China is rivaled only by the equally progressive Soviets and Nazis.

Ms. Berry states that the Chinese "have set the pattern for the world to follow." If this is truly what she believes, then it is time for President Carter to set his own pattern and rid our Government of this lady. American education is suffering enough problems without being burdened further by Ms. Berry.

On one point, incidentally, I am in sympathy with the Chinese who hosted Ms. Berry. She says that she tried to explain the difference to them between quotas and goals but that "they couldn't follow me." They are sure not the only ones.

Two articles follow:

[From the Washington Post, Nov. 20, 1977]

EDUCATION CHIEF LAUDS CHINESE SYSTEM

(By Lawrence Feinberg)

After an eight-day visit to China, Mary Berry, the Carter administration's top education official, said Americans have much to learn from Chinese schools and colleges.

Berry, who is assistant secretary for education in the Department of Health, Education, and Welfare, said the Chinese are "moving rationally and realistically" by having university admissions quotas for students from different regions and minority ethnic groups "in a field that has led to confusion and near-hysteria here."

She said the Chinese "have set the pattern for the world to follow" by opening up universities to older workers and other adults and by tying education closely to work by requiring students to spend part of their time on farms and in factories.

The Chinese experience, Berry said, "may not, in every instance, be directly applicable here. But the direction of their overall policy—in terms of access to education as well as of redefinition of education as something inextricably linked to the other aspects of human life—should, I believe, represent our basic direction also."

Berry toured schools in China—from nurseries to colleges—between Oct. 28 and Nov. 4, as part of a delegation of 14 prominent American educators, She met with China's minister of education, Liu Chai Yao.

She described her trip and expressed her views on Chinese education in a speech delivered in Chicago Thursday at the University of Illinois at Chicago Circle. A text of the speech was distributed by her office here.

In an interview here yesterday, Berry said American press reports about a reversal of Chinese education policies following the death of Mao Tse-tung were "premature" and "misleading."

Even though college entrance exams are planned for December for the first time in a decade, Berry said, "I don't see the Chinese giving up any of their [egalitarian] principles. . . . They said they don't want to face another cultural revolution in five years and create another kind of elite."

She said recommendations by local party and factory groups still play an important part in university admissions. In major national universities, such as the one in Peking, she said, quotas are being continued for different regions of the country and minority ethnic groups. Another goal is to insure that a majority of students "have worker and peasant backgrounds." Test results, she said, will only be used to help pick those to be admitted from within each quota group.

"The Chinese talk about this in a much more straightforward way than we do," she said. "They don't talk about 'affirmative action' and 'reverse discrimination.' . . . . I tried to explain the difference to them between quotas and goals, but they couldn't follow all that.

"They have a healthy attitude toward disadvantagement," she continued. "It's 'Let's have quotas to make sure we have a percentage of different groups [in universities].' They're not concerned about the subtleties like we have to be."

Berry said the Chinese system of requiring students to work on farms or in factories was much different from the "career education" being promoted in American schools because it means "doing actual useful productive work."

During her visit, she said, she saw elementary school children assembling voice boxes for dolls and high school students working in factories that make automobile parts.

"Obviously, we have no intention of putting 6-year-olds to work here," she said in her speech. But Berry added in the interview: "There's nothing wrong in having school children making something useful and selling it. They could use the money for extra things in the schools."

On one point, Berry said, she disagreed with her Chinese hosts. "For some reason the leaders believe in tests now and claim that Mao always did as well. In fact, they have more faith in examinations than I do," she said. "I tried to warn them of the pitfalls, but to no avail."

[From the National Review, Oct. 28, 1977]

SINNERS AND FOOLS

(By Francis B. Randall)

The title is a pun; the author dwells on the darker sides of what the Communists have done in China, and on the elaborate deceptions they arrange to brainwash foreign visitors, like the old Chinese shadow-play screens, behind which reality is forever uncertain. Simon Leys is the pseudonym of a Belgian Sinologist who traveled and lived in China at intervals from 1955 to 1973. His book is supposed to be the most telling attack on Mao's China ever published in France, and is said, almost unbelievably, to have shaken the Mao-faith even of left-wing French intellectuals.

The first half of the book is a classic account of how Communists run innocence tours for foreign fools. They admit very few, they pick them for their ignorance of China and Chinese, jelly-spined, Mao-loving asses who willingly allow themselves to be bamboozled on propaganda-junkets through Potemkin villages. They herd them everywhere in groups, with six watchful "guides," morning, noon, and night. Visitors see selected parts of a few of the same 12 cities and the one village per province that has

electricity. They are shown through the same model schools, hospitals and factories, where everybody has been choreographed to smile at and applaud the long-noses. They "talk" to the same sixty Chinese whose profession is bemusing foreigners. All requests for greater and more significant contact with the Chinese people are lost in the shuffle. The real China cannot be perceived behind the shadow screen.

There are varieties of knaves and fools. The French detect a bit of the truth but dismiss it with dialectical persiflage. The Africans "flummox their guides by demanding beer and women." The Americans, vilest of all to Leys, "brought up on hamburger and chop suey," admire Communist hotel food and can't tell one province from another. Even the few experts suppress everything negative for fear of hurting their careers by never being allowed back to China.

Leys is 99 per cent right on all this, but he attributes too much efficiency to the devil. Even Communists can blunder. They admitted Leys, repeatedly, (and me, and my wife, and some of my friends, and others) and we all broke away from our groups, all bused or hiked into the slums, all saw desperate poverty, slave labor, and cultural genocide, and all returned unconverted and voluble. But of course Leys is preaching a passionate sermon, not making micro-measurements, and his picture of travel in China is the Big Picture.

The second half of the book, on China itself, is less sarcastic and more enraged. Leys sees Old China as a marvelous, utterly civilized, richly diverse human and cultural continent—and this he saw for himself in 1955, toward the end of the first great cycle of Maoist rule! There is little or no mention of the horrors of consolidating Communist power, of forced industrialization and collectivization, or of Mao's wars. He omits Mao's massacre of millions of peasants, but lands on Mao's boast of saving executed 46,000 intellectuals. Leys' viewpoint is indeed very intellectual, aesthetic, and patrician.

What he hates consumingly is Mao's last period of rule, the "Great Proletarian Cultural Revolution," for it was then in the late 1960s, he believes, that a flood of wilfully brutal barbarians finally destroyed the glorious culture of China. Mobs of Mao-incited Red Guards roamed from city to city, wrecking and burning temples, closing all universities and museums. Sycophantic bureaucrats stopped the teaching of the classics of Chinese literature, and forced them out of print and into oblivion, while decent writers and other exemplars of Chinese culture were cursed, humiliated, silenced, enslaved as manure-carriers in the villages, and driven to suicide. And so the world's greatest civilization was replaced by Mao's "lousy" poems, universal blah-blah sloganeering, and "the cretinization of the most intelligent people on earth."

There is no discussion of the causes of the Cultural Revolution—it emerges as a colossal binge of wilfully stupid evil—but there are many examples of its dreadful results in horrifying detail. The summit of Leys' agonized fury is his account of the destruction of the walls, gates, arches, temples, and life of Peking, reducing the most beautiful and vital city in the world to a hideous corpse. Leys' picture of this period (but not of the 1950s) is considerably more shadowed than those of most other informed anti-Communist scholars. "The Maoist cancer gnawing away at the face of China" is the way he terms the period.

Leys might have written a less rambling and more comprehensive book. He might have had more charity for sinners and fools. He might have made greater efforts to keep his spleen from overmastering his balance. But then he would not have written so fine a work of prose, and he would not have been so effective a battler in a time of great need.

RE-CENTRALIZING POWER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 10 minutes.

Mr. CLEVELAND. Mr. Speaker, this morning's Washington Post carried an article by Rowland Evans and Robert Novak which is one of the most telling commentaries on our out-of-control big government seen in a long time. Evans and Novak point out that although President Carter's campaign pivoted around his promise to bring government back to the people, his Cabinet appointees are already moving in exactly the opposite direction, less than 1 year after he assumed the office of the Presidency.

Cases in point include reorganization plans presently underway at the Departments of Housing and Urban Development, Labor and Health, Education, and Welfare. I happen to be personally familiar with the disastrous bungling at HUD in particular because this reorganization effort includes plans to downgrade the only service office in northern New England. The important community development grant function will be transferred to Boston where northern New England communities' needs will compete with their urban neighbors to the south and perhaps get lost in the shuffle. This is an incredible turn of events from an administration whose chief led a majority of the country to believe that he would accomplish what the public clearly had wanted for some time: a more responsive, closer-to-the-people decisionmaking structure in Federal agencies.

In fairness to President Carter, however, I simply do not believe he knows about the situation. An illustration of that assumption is contained in the exchange of correspondence which I am inserting along with these remarks and Evans and Novak's excellent column. After writing two strongly worded letters to President Carter protesting the HUD reorganization plan and pointing out its implications, I received a nonresponsive communication from the Assistant to the Director of the Office of Management and Budget which indicates that the author clearly did not know what he was talking about. Also attached is an exchange of correspondence with HUD Secretary Patricia Harris which was also unsuccessful. A further point is that the Buffalo situation referred to in my second letter to the President evidently was reversed for reasons similar to those which I stressed.

I have two reasons therefore for bringing this matter to the attention of my colleagues via the CONGRESSIONAL RECORD: First, in the hope that someone at the White House reads the RECORD regardless of how they handle their mail; and second, to warmly commend Rowland Evans and Robert Novak for a very perceptive description of just how out of control our Federal Government is.

[From the Washington Post, Nov. 30, 1977]

RE-CENTRALIZING POWER

(By Rowland Evans and Robert Novak)

While the public is not fully aware of it, federal bureaucrats are confounding President Carter's campaign promise of close-to-the-people government by transferring authority from the field back to Washington.

That unannounced process is far advanced in the departments of Housing and Urban Development; Health, Education and Welfare; and, less clearly, Labor. Judging from his campaign emphasizing his non-Washington base and extolling government closer to the people, voters expected that one distinctive Carter label on the federal leviathan would be less, not more, centralization.

This represents neither broken promises nor changed principles by the President. Rather, ensnarled in the details of office, Carter simply has not come to grips with what his administration should stand for. While nobody doubted, for better or for worse, the direction of Richard Nixon's presidency after 10 months, the Carter presidency has neither set nor sought a theme.

The Washington bureaucrats have leaped to fill this void with a vengeance, tightening federal regulation and devising plans for federal direction of the nation's affairs. But their successful drive to concentrate all power in Washington is most significant, considering the lingering belief of long-time Carterites that regionalizing power still ought to be a dominant Carter theme. A glance at what is happening at Labor, HUD and HEW follows:

Labor. All regional directors have been eliminated, a move that brings field offices directly under Washington's supervision. Department officials say the regional directors never had much power, so the change does not mean much, but White House staffers say centralization is undeniable.

HUD. There is no argument about more centralization. Not only have the number of field offices been reduced but their authority has been sharply cut back as well. "The feeling is we had to return the full decisionmaking to Washington," one HUD official told us.

HEW. A reorganization in July removed program responsibilities from regional directors, returning them to Washington. Like Labor, HEW's field offices will be directly supervised by Washington instead of regional offices. Office of Education employees in the field are being brought back to Washington. HEW spokesmen say Secretary Joseph Califano wants "central responsibility."

Califano leads the vanguard of bureaucrats triumphant in the first year of the Carter administration. Reluctantly selected for his post by Carter at the urging of Washington insiders (headed by Vice President Mondale), Washington insider Califano has emerged as a Cabinet star in the President's opinion (but not in the opinion of his White House staff).

That is remarkable in view of Califano's personification of more spending, more regulation and more centralization. It is explained by other administration officials not as a conversion in Carter's philosophy but as his turning in relief to one member of a generally undistinguished Cabinet who has his work completed on time and his department under control.

Califano's triumph as a master bureaucrat is not isolated. Officials who believe in more, not less, government dominate the administration. Many are graduates of the Ralph Nader school of consumer protection, but more reflect the archetypal bureaucrat predating Ralph Nader by centuries. In the words of one relatively conservative Cabinet member: "This administration is filled with people who like to regulate other people."

For example, HUD is proposing a plan (devised largely by Assistant Secretary Robert Embry, former Baltimore City housing commissioner that would require suburbs to put in public-housing cluster programs or lose federal money. Such social engineering can stir up political dogs that Carter might prefer to keep sleeping.

That is why friends of the President, motivated only by his political welfare, wish Carter would consider at greater length whether he should not fulfill his promises, explicit and implicit, of decentralization, deregulation and a less intrusive role for government.

But most of the bureaucrats are pushing for still more government in 1978, to satisfy the left as well as themselves. Moreover, even if Carter belatedly puts his mind to it, it is too late in the day to unscramble the eggs of greater centralization and regulation. The cost may be not only the loss of a distinctive Carter theme but also a big-government thrust that is beginning to run strongly against mass opinion.

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., November 29, 1977.

Hon. JAMES C. CLEVELAND,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN CLEVELAND: The President has asked me to respond to your October 11 letter concerning the Department of Housing and Urban Development's (HUD) area office in Manchester.

As you may know, the President has given Cabinet Secretaries primary responsibility for internal Department reorganizations. The Office of Management and Budget's (OMB) responsibility is to review these plans to ensure their consistency with other reorganization initiatives.

In the case of the HUD plan, it is our understanding that Secretary Harris gave close attention to the impact of the proposed changes on HUD local operations and approved only those changes that would streamline the Department's operation without impairing its ability to effectively accomplish its mission. While most HUD area office responsibilities were broadened as a result of the reorganization, a few offices were downgraded where HUD judged that such was warranted because of the level of demand for its services in those areas. I understand that HUD officials are already directly in touch with you to explain their decision in the case of the Manchester area office.

Thank you for bringing your concerns to our attention.

Sincerely,

HUBERT L. HARRIS, Jr.,
Assistant to the Director.

NOVEMBER 9, 1977.

Hon. JIMMY CARTER,
President of the United States,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: On October 7, I wrote you about the downgrading of the HUD office in Manchester, New Hampshire, which serves the northern New England, New England States; namely, Vermont, New Hamsphire and Maine. On October 21, Mr. Frank Moore informed me that the letter had been received and that the matter was under consideration.

It has now come to my attention that the Buffalo HUD office was also slated to be downgraded. As a result of Congressional inquiry, however, that proposal was canceled. It was canceled for almost identical reasons as those advanced in favor of not downgrading the Manchester office. The problems in northern New York are different than those in urban New York. The problems in northern New England are different than the problems in the Boston area of New England.

I repeat my strong request that this matter be reviewed, and the HUD decision changed.

Sincerely,

JAMES C. CLEVELAND,
Member of Congress.

THE WHITE HOUSE,
Washington, D.C., October 21, 1977.

Hon. JAMES C. CLEVELAND,
U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN: The President has asked me to acknowledge his receipt of your October 7 letter regarding the downgrading by HUD of the Manchester regional office, and to let you know that your comments are under consideration.

Sincerely,

FRANK MOORE,
Assistant to the President for Congressional Liaison.

OCTOBER 7, 1977.

Hon. JIMMY CARTER,
President of the United States, The White House, Washington, D.C.

DEAR PRESIDENT CARTER: On October 6 my office received official notification from the Department of Housing and Urban Development that the Manchester, New Hampshire, area HUD office will be downgraded as part of your Administration's reorganization plan.

As one who certainly applauds and supports your expressed intention to make the federal government more responsive to the people, I cannot believe you would condone an action which is directly contrary to that goal. Downgrading of the Manchester area HUD office will mean that New Hampshire, Vermont, and Maine citizens will have to deal with an increasingly centralized and bureaucratic structure in Boston rather than in their own northern New England region in order to obtain assistance from an active federal agency.

Prior to the establishment of the Manchester area office, I found the experience of trying to solve constituent problems with HUD at the regional level to be completely unsatisfactory and frustrating. A return to this type of centralization would, in my opinion, amount to a great disservice to the people of New Hampshire and northern New England.

I strongly urge you therefore to take appropriate action to reverse this unfortunate and misguided decision and fulfill your pledge of a more responsive government to the people of New Hampshire.

Sincerely,

JAMES C. CLEVELAND,
Member of Congress.

THE SECREATRY OF HOUSING AND URBAN DEVELOPMENT,
Washington, D.C., October 13, 1977.

Hon. JAMES C. CLEVELAND,
House of Representatives,
Washington, D.C.

DEAR MR. CLEVELAND: Thank you for your letter of October 5, 1977, urging the retention of the Manchester Area Office.

I know you are aware that our decision to convert the Manchester facility into a Service Office was not lightly or frivolously taken. On the contrary, the unique concerns and requirements of Northern New England were painstakingly evaluated in the course of our decision making process.

As you know, the new arrangement will leave untouched the housing functions currently performed in Manchester. What we will accomplish, however, is a concentration of Community Development expertise at a single facility—Boston—from which all of the Northern tier states will be served more effectively than before.

This is a relatively small department with scarce personnel resources, and even scarcer resources in personnel qualified to administer and monitor the Community Development Block Grant program in the manner mandated by the Congress. We have no choice but to deploy these resources in the most cost effective way, to reduce overhead, to pare back overstaffed offices and to do all that is reasonably possible to accelerate decision making and make Federal processes simpler, more flexible and more responsive.

We believe that the altered arrangement we have provided for Manchester, enhanced by the other reforms contained in our field reorganization, will contribute to all of these objectives.

Sincerely,

PATRICIA ROBERTS HARRIS.

HOUSE OF REPRESENTATIVES,
Washington, D.C., October 5, 1977.

Hon. PATRICIA ROBERTS HARRIS,
Department of Housing and Urban Development, Washington, D.C.

DEAR SECRETARY HARRIS: We urge you to reverse your decision to downgrade the administrative functions of the Department of Housing and Urban Development's Manchester, New Hampshire Area Office.

Your concern for a more effective and responsive agency to cater to the needs of the nation and your reorganization efforts toward this end are commendable. However, in the case of the Manchester Area Office, we feel your efforts are misdirected and will in fact result in less effective and less responsive delivery of HUD services to the States of New Hampshire, Maine, and Vermont.

We applaud the recent Housing and Community Development Act which addresses the very real problems facing the Northeast. We are convinced that the needs of rural northern New England will not be served should the administration of this Act for our region be shifted to the Boston HUD Office. Although northern New England faces the same myriad of problems presently facing the entire Northeast, we urge you recognize the very real distinction between our states and the far more urban states of Massachusetts, Connecticut, and Rhode Island.

We believe your decision demonstrates an insensitivity toward our states' unique needs and undermines, rather than enhances, President Carter's pledge to bring government closer to the people it serves. As far as many rural communities in our states are concerned, HUD programs might as well be administered in Los Angeles as in Boston.

We protest in the strongest terms the downgrading of the Manchester HUD Area Office and urge you to reverse your unfortunate decision. The housing and community development needs of Maine, New Hampshire and Vermont are far more important than the bureaucratic considerations on which your decision was based.

Sincerely,

JAMES C. CLEVELAND,
WILLIAM S. COHEN,
NORMAN E. D'AMOURS,
DAVID F. EMERY,
JAMES M. JEFFORDS,
Members of Congress.

THE SECRETARY OF HOUSING AND URBAN DEVELOPMENT,
Washington, D.C., September 13, 1977.

Hon. JAMES C. CLEVELAND,
House of Representatives,
Washington, D.C.

DEAR MR. CLEVELAND: I have received your letter dated August 18, 1977 regarding the status of our Manchester Area Office.

As Assistant Secretary Medina stated in his letter to you, we must balance the requirement for services to the public with the cost of our field operations. Also, as Mr. Medina mentioned, final decisions have not been made. Therefore, at this time I must defer the answers to your questions. When we have made the final decisions about Manchester, we will contact you.

Sincerely,

PATRICIA ROBERTS HARRIS.

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 29, 1977.

Hon. PATRICIA ROBERTS HARRIS,
Department of Housing and Urban Development, Washington, D.C.

DEAR SECRETARY HARRIS: This correspondence is in regard to the Department of Housing and Urban Development's Manchester, New Hampshire Area Office.

It has recently been brought to our attention that the Department of Housing and Urban Development plans to close the Manchester Area Office. We are writing at this time to express our concern over the effect that such action will have upon the delivery of services to Northern New England.

The HUD Area Office in Manchester presently serves the states of New Hampshire, Maine and Vermont. Although rural in nature, these states are burdened with the same myriad of problems presently facing the entire Northeast. However, these states in Northern New England are often overshadowed by their larger and more urban neighbors to the south. It is an administrative structure, such as the Manchester Area Office, which allows for the consideration of problems faced by this region of New England.

The HUD Manchester Area Office presently serves over sixty (60) municipal housing authorities. Twenty (20) local jurisdictions are served by the Community Development Block Grant Program. In addition, approximately thirty (30) municipalities receive the benefits of the Community Development Discretionary Program. We are convinced that the quality of services provided these municipalities will not be maintained should the Boston HUD Office assume the responsibilities now held by the Manchester Area Office. This conviction is strengthened by the experience of dealing with HUD on constituent problems piror to the establishment of the Manchester Area Office. We are sorry to say that the regional and national offices were not satisfactorily responsive to Congressional needs and we do not look forward to such difficulties again.

It is our hope that the recognized quality services provided northern New England by the Manchester Area Office will far outweigh any need for administrative reorganization.

We thank you in advance for your consideration and attention to this matter.

Sincerely,

NORMAN E. D'AMOURS,
JAMES C. CLEVELAND,
Members of Congress.

DEPARTMENT OF HOUSING
AND URBAN DEVELOPMENT,
Washington, D.C. August 10, 1977.

Hon. JAMES C. CLEVELAND,
House of Representatives,
Washington, D.C.

DEAR MR. CLEVELAND: Secretary Harris has asked me to respond to the letter dated July 29, 1977 signed by you and Congressman Norman E. D'Amours.

As part of our organizational assessment we are considering changes in the assignment of programs and functions among our various field offices including Manchester, to provide for greater effectiveness and efficiency and reduce the cost of our field organization structure. However, final decisions have not been made. While there may be some functional reassignments, certainly I can assure you that the Department will continue to maintain an office in Manchester.

Please be assured of our concern for the level and quality of services which we provide in all field offices. We are determined that, regardless of the changes that might be made, the problems you previously experienced with respect to HUD's responsiveness will not be repeated.

When final decisions have been made concerning Manchester, we will be in contact with you again. An identical letter is being forwarded to Congressman D'Amours.

Sincerely,

WILLIAM A. MEDINA,
Assistant Secretary.

INSPIRE AND REQUIRE THE PRESIDENT TO ASSIST STRIKING FARMERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. SEBELIUS) is recognized for 20 minutes.

Mr. SEBELIUS. Mr. Speaker, several days ago, the major metropolitan newspapers and the national media publicized a farm strike demonstration held in Plains, Ga. and Plains, Kans. The demonstrations were held by hard-pressed farmers to dramatize their plight and to publicize a planned nationwide farm strike sponsored by a growing grassroots farm organization called American Agriculture.

During consideration of the farm bill, I am sure most of my colleagues became aware of the fact we are in the midst of the worst farm crisis since the "Great Depression." What my colleagues may not be aware of—and what this farm strike is all about—is that the farm bill, as it is being administered, represents little if any practical help to many farmers who are facing financial ruin.

Last March, when the wind and dust were blowing in the High Plains, many farmwife organizations came to Washington to alert this administration to the fact we were in danger of losing a generation of farmers. At that time, I said we had two problems: One, to write a good, long-term farm bill and two, to quickly enact several emergency measures to provide immediate cashflow assistance.

In this bipartisan effort, I am pleased to say I was joined by a number of farsighted colleagues on both sides of the political aisle. We sought the following measures to provide immediate help:

Emergency credit and long-needed modernization of Farmers Home Administration loan limitations;

Incentive payments for converting cropland to soil conserving crops;

An emergency graze out and hay program;

And, finally, an increase in the loan and target rates.

Unfortunately, our efforts proved fruitless. Consideration of these emergency measures was refused and 9 months later, a new farm bill still did not meet short term cash flow needs. As a result, current farm policy is leaving hard-pressed farmers little alternative but to consider militant action and strikes.

Just this past week, the Honorable Robert Bennett, the Governor of Kansas, told the Kansas Association of Wheat Growers in Wichita that farmers feel they have little choice other than militant action to get Washington's attention.

Governor Bennett's remarks were brought home by Alvin Jenkins, a High Plains farmer and cofounder of the American Agriculture Movement when he told thousands of farmers in Hays, Kans., last weekend that the strike movement had three goals: Human dignity for farm families; equal rights for farmers, and economic justice. Mr. Jenkins said the demand for parity was not unreasonable.

If the farmer cannot at least earn back the cost of production and goes out of business, all of the farm legislation in the world will not help. I want to stress to my colleagues that is precisely where we are at this moment.

Let me point out that with bipartisan help, we did win some battles in enacting the 1977 farm bill. We did manage to increase the wheat target price from the $2.47 a bushel figure proposed by the administration to $2.90. We were able to provide 100 percent funding for the new Federal Grain Inspection Service instead of passing the cost on to the farmer. We managed to boost funding for research on gasohol use. We were able to include in the bill an antiembargo provision and we won the fight to keep funds for wheat and wheat foods research and nutrition education.

But, measured by what farmers need to stay in business, and I might add what was promised in the campaign, the farm bill represents a half of loaf. Worse, after seeing many provisions end up on the cutting room floor due to administration opposition within conference, now we find the Department of Agriculture refuses to use all of the authority within the bill and has proposed running the farm program with confusing and complex set-aside regulations that make little or no sense in wheat country.

As a result, we have a farm program that is asking farmers to reduce their income in order to comply with a farm program that will in turn provide only enough payment to minimize the farmer's loss. That is not a farm program; that is minimum loss blackmail and it is no wonder to me that farmers will not comply.

Mr. Speaker, the 1977 Food and Agriculture Act which we passed and which President Carter signed into law, contains the discretionary authority for the President and Secretary Bergland to significantly help farmers through this crisis period. All that must be done is to act. I do not consider that too much to expect in face of the crisis American agriculture faces today.

I am therefore today introducing a resolution calling upon President Carter

to use the authority we provided in the 1977 farm bill to act at once. I urge my colleagues to join me in approving this resolution and to signal to our farmers that help is on the way. Mr. Speaker, the text of the resolution is as follows:

H. CON. RES. 423

Whereas American agriculture is suffering the most severe economic conditions since the great depression, as shown by:

(1) A precipitous drop in net farm income from $33 billion in 1973 to $20 billion or less this year;

(2) The drop in the parity ratio to the lowest level since 1933;

(3) A continued and critical squeeze on agricultural credit, farm and commodity debt, interest rates, and cash flow condition of farmers and ranches;

(4) An anticipated 10 percent decline in agricultural exports at a time when the United States faces its greatest trade deficit in history;

(5) Continued and rapidly escalating inflation fanned by extraordinarily large Federal budget deficits, trade deficits and a weakened U.S. dollar which combine to raise the production and living expenses of farm and ranch families far beyond the current levels of depressed prices;

(6) Continued and intentional accumulation of government-owned or controlled dairy stocks and grain designed to be used to depress market prices as an ill-conceived strategy for "cheap food";

(7) Failure to use the full scope of authorities in the Food and Agriculture Act of 1977 and other existing laws: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress of the United States of America does hereby petition the President and the Secretary of Agriculture to:

(1) use the authorities in existing law to increase price supports through loans, purchases, payments and other operations that will bring commodity prices received by producers to levels of parity as quickly as possible;

(2) use the discretionary authority in the "Food and Agriculture Act of 1977" to provide diversion payments to grain producers for temporarily devoting to conservation practices land which otherwise would be dedicated to crops or idled under current policy;

(3) use the discretionary authority in the "Food and Agriculture Act of 1977" to implement the Critical Lands and Graze-out programs;

(4) use the discretionary authority in the "Agricultural Act of 1949" to prevent government dumping of surplus grain and dairy products into already depressed markets;

(5) re-implement fully the summer-fallow provisions of the "Agriculture and Consumer Protection Act of 1973"; and

(6) use the discretionary authority in appropriate agricultural export laws to maximize such exports, improve the effectiveness of agricultural attaches, stop the delay in Food for Peace shipments and open new markets in foreign nations.

CRIME SUBCOMMITTEE TO HOLD HEARINGS IN SAN FRANCISCO AND LOS ANGELES, CALIF., ON THE RELATIONSHIP BETWEEN UNEMPLOYMENT AND CRIME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

Mr. CONYERS. Mr. Speaker, the Subcommittee on Crime of the House Committee on the Judiciary has scheduled hearings to be held in San Francisco, Calif., on December 5 and 6, and in Los Angeles, Calif., on December 7. The purpose of these hearings is to examine the relationship between economic indicators, particularly unemployment, and crime. The hearings on the 5th and 6th will be held in the Ceremonial Courtroom, Federal Building, 450 Golden Gate Avenue, 19th floor, commencing at 10 a.m. and 10:30 a.m., respectively. The location for the hearing in Los Angeles is the Watts Labor Community Action Manpower Center, 958 East 108th Street, commencing at 10 a.m. The subcommittee has already held 4 hearings and heard from 15 witnesses on this subject.

Testimony will be received from persons representing a wide range of disciplines, including State and local elected officials; law enforcement officials; economists, sociologists, criminologists, and others who have studied crime and unemployment; business and labor leaders; and ex-offenders and persons involved in employment, counseling and related programs. In addition, members of the California congressional delegation have been invited to be present at the hearings.

Those wishing to testify or to submit a statement for the record should address their requests to the House Committee on the Judiciary, 2137 Rayburn House Office Building, Washington, D.C. 20515.

THE WAYWARD AIR—FROM A. J. LIEBLING TO MICHAEL J. ARLEN IN ONE GENERATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wyoming (Mr. RONCALIO) is recognized for 30 minutes.

Mr. RONCALIO. Mr. Speaker, many times these past weeks I have been asked about matters in Wyoming. Inquiries from my colleagues stemmed from two recent features on "60 Minutes," one involving my old hometown, Rock Springs, where I was born and raised—the other involving my new hometown, Cheyenne, where I established a law practice, served as a prosecutor following World War II, and where I have lived ever since.

This matter involves failure of due process in a trial by television; I have cited time and again that our Constitution guarantees a free press, not necessarily a fair press. These truths are apparent in Wyoming today, thanks to "60 Minutes" and CBS.

Years ago the New Yorker had a writer named A. J. Liebling who gained fame with a column called "The Wayward Press." It was journalistic excellence, and it called forth the errors of the news giants of that day, and kept them on their toes. Journalism professor George Gerling, of the University of Wyoming, back in 1939, required Liebling columns as must reading for all students. Most of us in those days found a column by A. J. Liebling better than a textbook on journalistic fairness or investigative responsibility.

Recently Michael J. Arlen of the New Yorker wrote a series in that magazine dealing with "The Air." The first feature dealth with the problem of raising children at home in the presence of television. I believe it even more excellent than the second. But the second part of his work deals with the Wyoming-CBS broadcasts and because of interest in these matters, I am reprinting the entire second feature which is called, "The Air, The Prosecutor," dealing with the Wyoming "60 Minutes" programs. It follows:

THE AIR, THE PROSECUTOR

I like "60 Minutes" a lot, most of the time. The program usually seems solid—or as solid as any news magazine—and there's a breadth to it that's adventurous and entertaining. The show's three correspondents, Mike Wallace, Morley Safer, and Dan Rather, are tough interviewers, and it's good to see tough interviewing on the air—particularly in an era when important people so often hide behind imperturbable on-camera pronouncements, or else behind shields of lawyers and accountants so thick that most ordinary reporters can scarcely make a dent in them. The "60 Minutes" musketeers unfailingly dent such shields, and sometimes penetrate them, while awards are won and ratings climb. But there's a danger in this approach, for much of what sustains the popularity of the program is clearly the thrill of the chase which comes from watching a subject being pursued by tough questions on the air—especially a subject who has already been defined for the audience as a bad guy. So the program is bound to be on the lookout not just for newsworthy situations but for situations that will provide this thrill of pursuit, and for interview subjects who can be made to serve, willingly or unwillingly, as bad guys. And so, too, as the "60 Minutes" newsmen have been more frequently drawn into prosecutorial roles, it's been inevitable for them to increasingly assume a trial lawyer's manner, with an emphasis on courtroom tactics and judgmental righteousness.

A recent example of this growing tendency to let prosecutorial indignation do the work of investigative reporting—or do more of the work than it should—occurred a few weeks ago when one of the program's sternest musketeers, Dan Rather, galloped into Wyoming to uncover low- and high-level corruption in the state. To begin with, I should say that I have no doubt that all kinds of wickedness exist in Wyoming, for it is a place of enormous mineral wealth, much of which has only lately been developed (or exploited), and where there are grown men trying to make money out of the ground there are usually all kinds of deals and payoffs and improper goings on to be found. But, unfortunately, the accusations that Rather made he hardly ever proved. Moreover, for much of the program he seemed interested mainly in decrying sin, somewhat in the fashion of a district attorney running for office who tries to stir up the citizenry against the local whorehouse.

In fact, the first of two Wyoming reports—it was enititled "Our Town"—was largely devoted to the prostitutes of Rock Springs, Wyoming: a historically tough town of twenty-five thousand inhabitants, half of whom have arrived in the past five years, as a result of the statewide energy boom. To start off, Rather professed to be astonished at the presence of vice in semi-desert communities:

Tonight, "60 Minutes" looks at charges of payoff and coverup in one American city where vice runs rampant and a handful of men run the city as they please. New York? Detroit? Los Angeles? Chicago? Wrong. Not this time. The corruption we're talking about is in a city far off in the hills of Wyoming.

Then he professed to be shocked at vice itself:

When the sun goes down in Rock Springs, the town becomes a Western sin city. Hookers openly work the streets and the bars, each of them earning a minimum of a thousand dollars a week.

Then, as if his audience wasn't sufficiently writhing in prurient disapproval, he returned to his initial theme—which had made "Winesburg, Ohio," so popular sixty years ago: Good people, can you believe that they're doing it *right here* in Winesburg? Thus:

If you're saying, "So what?"—remember this is not New York or New Orleans or Chicago. This is Rock Springs, with more working hookers than you can shake a wallet at. By conservative estimate, prostitution alone is a two-million-dollar-a-year business here in this little Wyoming town.

Notice that Rock Springs has changed from "one American city" to "a Western sin city" to "this little Wyoming town." Notice also the mathematics. If each prostitute earns a thousand dollars a week and all of them together earn two million dollars a year, then there must be a grand total of around forty hookers in Rock Springs. Which may be vice, but in a town of miners, oil workers, and construction hands it may not be everybody's idea of vice running rampant.

Then we got to see the sinful creatures themselves. For "60 Minutes," sparing no expense, had brought "a special night lens," as Rather described it, which "enabled us to film it all in almost total darkness." Indistinct women varying in color and appearance drifted about in the murky Rock Springs night, as if moving through fog. Stoutish women, clearly of ill repute, shuffled along on a sidewalk. Others stood in a parking lot. There was a brief scene of a prostitute overheard engaging in a transaction with a man. She: "Well, what can you spend—thirty?" He: "Well, what kind of work for thirty?" This was surely pretty heady stuff for members of the urban audience who would otherwise have had to drive several miles out of their way, wherever they lived, to witness similar transactions in their own cities.

But Rather wasn't interested only in bringing back U–2 photographs showing that prostitution existed in Rock Springs. He was after bigger game: official corruption. Thus he observed solemnly, "The local police will hurry to stop a fight but hardly ever to arrest for prostitution." A female undercover agent was produced on camera, who substantiated this grave charge.

"Were you hassled by the police?" Rather asked the woman.

"No, not at all," she replied. "The police—we've seen them several times on K Street in their cars. Never was any attempt ever made [at an arrest]."

A less determined prosecutor, one imagines, or a less pious reporter who had once worked a city beat might have asked himself if police in most American cities—certainly including New York, where "60 Minutes" and Rather are based—even hurry to stop fights, let alone bother with arresting hookers and dumping them in the courts. But to admit the question, or the answer, would be to diminish the tone of moral outrage—and thus the story. As it was, having so far put forward a supposedly significant case against Rock Springs vice which consisted of (a) blurry views of prostitutes on a sidewalk and in a parking lot, and (b) his own shocked indignation, Rather next brought his courtroom talents to bear on an effort to involve the upper reaches of the state administration itself in the shady doings on K Street.

Now there were two undercover agents on camera, and they sat facing Rather, who was all business in a trimly tailored suit and was seated stiffly in a straight-backed chair, balancing a reporter's notebook on his knee, though it was unclear why he needed the notebook, since a tape machine was clearly running along with the camera. One of the agents had just given it as his opinion that Rock Springs not only was a place where prostitution ran rampant but was also a transfer, or "pass through," point for narcotics. Rather then engaged the two agents in a trial lawyer's catechism that went as follows:

RATHER: In your personal opinion, the police chief knows about it?

AGENTS: Yes.

RATHER: Sheriff know about it?

AGENTS: Yes.

RATHER: Mayor know about it?

AGENTS: Yes.

RATHER: Members of the city council know about it?

AGENTS: Yes.

RATHER: County attorney know about it?

AGENTS: Yes.

RATHER: State attorney general know about it?

AGENTS: Yes.

RATHER: Governor know about it?

AGENTS: Yes.

On a theatrical level, this was an obviously effective performance. Like a good lawyer, Rather had presented his allegations in the form of dramatic questions—knowing that the questions contained the power of persuasion, regardless of the validity of the answers—and so had brilliantly led the jury in the direction he wished it to take. For, starting only with those nighttime glimpses of prostitutes, whom the audience could more or less see for itself, he had then asked it to accept an opinion that pimps and narcotics traffic existed alongside the prostitutes, which is generally a plausible supposition, and then—by presenting, in a decidedly courtroom manner, additional opinion as to who might "know about" this situation—he had involved the attorney general and the governor of the state in the vice in Rock Springs. But the fact remains that, whatever the real situation in Wyoming might be, Rather's "case" before the TV audience consisted almost entirely of style, with little reportorial substance to back it up. After all, think of whom one might not ensnare in a similar catechism about vice in most cities. "Sir, do not prostitutes openly parade the sidewalks of Forty-second Street?" asks the prosecutor of his witness. "And does not the mayor know about it? Does not the police commissioner? Do not both senators? Does not the governor? Does not the archbishop? Does not the Vice-President of the United States? Does not the *President* himself?" In other words, if a link did exist between vice in Rock Springs and the State House in Cheyenne, it was not being shown on "60 Minutes"—it was only appearing to be shown.

Even so, Rather, with his "special night lens," seemed on solider footing that week, trying to press charges of sinfulness against the little Wyoming town (or Western sin city) of Rock Springs—whose mayor, on camera, inspired no greater confidence than the mayors of most American towns—than he did a week later, when he made further attempts to find corruption in high places in the state. This installment was titled "High Noon in Cheyenne," and Rather began it in the confident, upright style of a successful prosecuting attorney who has already proved this first point and is now going after the "big one." Thus:

Our story last week, entitled "Our Town," looked at the little city of Rock Springs, Wyoming, steeped in prostitution, gambling, and narcotics. . . . Tonight, "High Noon in Cheyenne," as we look at charges that Wyoming state officials as high as the governor and the attorney general may be involved in covering up corruption, not just in that little city of Rock Springs but in the state as a whole, with alleged links to organized crime out of state. It is accusation and confrontation and it is high noon in Cheyenne!

Soon it became clear that Rather's charges were actually those of a man named Neil Compton, who until his dismissal five months before by the governor had been head of Wyoming's criminal-investigation unit. On camera, Compton was controlled, assertive, and articulate.

Rather asked him why he had been dismissed.

Compton said, "I was fired because I went to the governor on two separate occasions and brought to his attention that the attorney general for the State of Wyoming was a crook."

Rather then backed up his own witness. "We'll get back to the specific charges in a moment," he said, "but first it's important to know that the man who makes them, Neil Compton, has a long reputation for being a superb investigator. He does not have a reputation for shooting from the hip."

However, it turns out, after a brief check with various members of the press and with civic officials around the state, that Neil Compton was at the least a highly controversial figure. In fact, during the two years before his dismissal he had been the subject of two meetings of Wyoming sheriffs and police chiefs, who had criticized his investigative methods. For instance, the sheriff of a fair-sized Wyoming town said on the phone recently, "I think about eighty per cent of the law officers of this state questioned his judgment." As for his shooting from the hip, there had been numerous complaints, from all over the state, that Compton tended to be an overzealous investigator; one citizen had complained that Compton himself arrived at her house in the middle of the night seeking to arrest her son, then away at college, for selling one ounce of marijuana.

At any rate, Rather had three main charges of Compton's to present to the large "60 Minutes" audience. The first was that the state's Democratic Party chairman, Don Anselmi, had "attempted political coverup" in order to protect an employee of a motel he co-owns "who was caught in a major drug case." Briskly, Rather interviewed Anselmi as if he had him on the witness stand:

RATHER: You know John Vase? He works for you?

ANSELMI: He's my assistant beverage manager. My partner's son.

RATHER: He's the son of Mike Vase. Right? Your partner here?

ANSELMI: Right.

Notice that Anselmi had already told Rather, in his first reply, that John Vase was his partner's son, so that Rather's second question had no point except as courtroom rhetoric—to make it sound as if the investigator were ferreting out information from a recalcitrant witness. Then Rather buttressed his charge by producing another female undercover agent, who had apparently befriended young Vase and then turned him in:

RATHER: The case stood up?

AGENT: The case then was transferred to be prosecuted in the federal government.

RATHER: The county attorney in effect got rid of it?

AGENT: Yes, sir. The attorney general got rid of it. It was taken out of his hands. And the federal government took over this case. And at this time he pled guilty. He didn't want to go to court. He pled guilty.

However, a fairly rapid check of this situation produces a somewhat different impression. In the first place, according to the easily accessible Sweetwater County records,

young Vase's crime turns out to have been the delivery of "five baggies, a tie-stick, and one branch of marijuana," which may be illegal but hardly constitutes a "major drug case." Secondly, the undercover agent seems to have got the disposition of the case upside down, for the state court hadn't "got rid of" it to the federal court. In fact, the federal government had never taken over the case, for the charges had originally been filed in the state court, where they had been prosecuted. And there, far from escaping justice, Vase had pleaded guilty for the reason that he was guilty, and was punished with a fine of seven hundred and fifty dollars, five years' probation, and the forfeiture of his car.

But, having disposed of the Vase case to his satisfaction, Rather went on to list other charges against the Democratic state chairman; for instance, "that Anselmi was party to a stolen gun deal." He said, "Anselmi denies it. A federal grand jury looked into that case three years ago. A prosecutor told us political pressure stopped the investigation." Here is little checking turns up the fact that Compton's "stolen-gun deal" charges against Anselmi stemmed largely from accusations brought by a former convict, Michael Dansdill, whose release Compton was involved in—and who latter retracted the charges. The possibility of "political pressure" always exists, but since the Dansdill affair was well known in Wyoming, having been amply covered in the local press, it was too bad that Rather's "prosecutor" didn't mention that aspect of the matter, or that Rather didn't pass the word along to the audience.

In any event, having further demonstrated Anselmi's shadiness, Rather went on to link the Democratic chairman to even bigger crime. Compton broached the charge:

At that time [1970], I found that there were the connections between Mr. Anselmi and Arizona . . . There was a real-estate and property buy-up in Wyoming by subjects from Arizona, Colorado that had related and had been a subject of organized-crime investigations in those particular states.

Rather took it up:

The Arizona connection means to Compton that Don Anselmi is doing business with the land-scandal people who have connections to mobsters, who have bilked the public out of the millions of dollars in fraudulent deals in the Southwest.

There was a brief glimpse of Anselmi flatly denying the charge. Compton and Rather then tried to link Anselmi's "connections" with Arizona to a man called Danny O'Keefe, who, Rather said, had been indicted in Colorado on land-fraud charges. Anselmi also denied ever having talked with O'Keefe, or ever having known him.

Here, Rather had linked Anselmi to an "Arizona connection"—which was as yet unproved—by showing unrelated scenes of Arizona desert and also a brief film sequence of a man said to be Danny O'Keefe, who was seen arriving on his own at an airport. Now Rather proceeded to cast his net over the top officials in the Wyoming capital. First, he asked Compton what he thought a grand jury might concentrate on. Compton replied:

I would ask that the grand jury look at the governor in relationship to land purchases with Don Anselmi.

Rather showed some exterior views of a ranch that had apparently been bought by Governor Ed Herschler, of Wyoming, and then took his camera to the Governor himself:

RATHER: Governor, your partner in purchasing this Yellowstone Ranch in Fremont County, nineteen hundred acres, is Mr. Don Anselmi.

GOVERNOR: It's closer to twenty thousand acres. And leases—and federal leases. I suppose there's about a million acres involved.

RATHER: And your partner is Mr. Anselmi?

GOVERNOR: He's one of them, yes.

Having thus linked Governor Herschler with Anselmi, who had earlier been linked with a "connection" in Arizona and "land-scandal people who have connections to mobsters," Rather returned to Compton:

RATHER: Source of the money [for the Yellowstone Ranch]?

COMPTON: Source of the money? It is my belief the source of money is from organized crime.

RATHER: Do you think that could be proven?

COMPTON: I believe that could be proven with subpoena power from a grand jury.

RATHER: Organized-crime connections with the Governor of the state? Democratic state chairman?

COMPTON: That's correct.

In effect, the intrepid investigators had shown us some television views of the Yellowstone Ranch and of Governor Herschler saying that he was one of its purchasers, while darkly implying that if the real source of the purchase funds should ever be uncovered (an investigative operation that would require the assistance of a grand-jury subpoena!) it would be traceable to the coffers of organized crime. But, in fact—though, for all I know, the Governor of Wyoming, or anyone else, may be allied with the Black Hand in other areas—in the matter of the purchase of the Yellowstone Ranch a couple of modestly investigative phone calls produces the somewhat less exciting information that this particular deal was consummated through Lowham Associates, a well-known Wyoming firm specializing in ranch properties; that a major portion of the purchase price of one million eight hundred thousand dollars was financed by loans from the Federal Land Bank Association of Wyoming and the First National Bank of Casper; that a lesser part of the purchase price was financed through a second mortgage to the sellers, Mr. William McIntosh and his niece Jennifer MacIntosh; and that the relatively minor sum of twenty-five thousand dollars in cash was paid by each of the four partners.

The subject of Rather's final charge against the Wyoming administration was not without foundation, and had already been extensively covered in the regional press, but, once again, Rather seemed more interested in prosecuting it than in reporting it. A case that "involved charges that public officials were stealing from a state home for the elderly" was first grimly described by Rather as "a seemingly minor scandal, perhaps no bigger than that 'third-rate burglary' at Watergate," and then, more portentously, in the statement "It may become a Democratic prairie-gate here in Wyoming!" According to numerous earlier newspaper accounts, the mess in question had to do with allegations that two officials involved with the administration of Wyoming's old-age homes—both of whom were Republican appointees from a previous state administration—between them had ripped off the Pioneer Home, in Thermopolis, Wyoming, taking several thousand dollars' worth of goods presumably intended for the elderly intended for the elderly pioneers: a half-dozen or so TV sets; several stereo units; some bath towels; and generous supplies of nuts and canry. It was Compton's and Rather's accusation that Governor Herschler and his attorney general, Frank Mendicino, had engaged in a coverup when the latter "refused to prosecute." But, once again, the facts, though they hardly spoke well for the Attorney General's political savvy, were decidedly more ambiguous than they were made to appear on the air. For one of the two men, Kenneth Brighton, had indeed been charged in a state court on eleven felony counts and was awaiting trial when he died, as a result of complications from heart surgery. It is true that Mendicino was laggard in prosecuting the second man, Lloyd Hovee, but his explanation (which was repeated in several press stories) was that he needed Brighton's testimony in order to build a strong case against Hovee, and was plea bargaining with Brighton when he died. Perhaps there was more than carelessness in Mendicino's delay in bringing the second Pioneer bandit to trial, but it is troubling that Rather, in his desire to produce a "Democratic prairie-gate," neglected to mention the charges against Brighton, or the eleven counts that the state was prosecuting him on, or any of the background that might have put the Attorney General's behavior in a different perspective.

In short, there rested the "60 Minutes" investigation of corruption in Wyoming. A couple of conclusions seem worth drawing. One is that since for some years now newsmen have been protected by the Supreme Court decision in the case of New York Times Co. v. Sullivan to the extent that "actual malice" must be proved before a public official can be awarded damages in a libel action, it might be in the self-interest of the press not to act continually, out of "racial memory," as if it were the reporter's neck that was always on the line. Thanks to the *Times* decision, the reporter's neck is relatively safe, for a change. A second conclusion is that, whereas the airing of charges in a newspaper is usually a pretty cold, factual process, the airing of charges on television can be a matter of high drama, with the audience instinctively following the flow of the drama and not necessarily listening closely to the factual content. If, then, an on-camera newsman assumes the additional role of courtroom lawyer (and controls the tape-editing machines to boot), the results can often drift fairly far from an orderly or reportedly presentation of information. Or, to put it in simpler terms, perhaps Dan Rather and his colleagues on "60 Minutes" will soon give up their trial robes—and courthouse righteousness—and return to the kind of reporting they've often done so well. Maybe they'll even revisit Wyoming. They don't seem to have quite got the story the first time around.

In conclusion, Mr. Speaker, there is little doubt that millions of Americans have formed an opinion involving my friends, Gov. Ed Herschler; State Chairman Don Anselmi; Attorney General Frank Mendicino; and Rock Springs Mayor Paul Wataha. They are opinions that are not necessarily accurate nor just.

I am pleased that a grand jury is now in session at Cheyenne and I assert, as I often have, that it is wholesome for periodic grand jury proceedings. Let the chips fall where they may.

My own career included a tour as a grand jury prosecutor with the late Walter B. Phelan of Cheyenne. While no true bills or indictments were returned, several hundred slot machines disappeared from Laramie County and the air was cleared and stayed clear for several decades as a result of that grand jury session.

Following the current grand jury action I believe that Mr. Rather should return to Cheyenne, for, as stated above by Mr. Arlen, he did not quite get all the story.

I also want to concur with an editorial conclusion of the Casper Star-Tribune, this is an act that I have not found occasion to practice very often during my 10 years in Congress. but I commend that paper on its editorial yesterday in which it said that the above item by

Michael J. Arlen is "a thoughtful and reasoned piece of journalism that devastates the pseudo-journalism practiced, as evidenced, by the '60 Minutes' crew."

LEGISLATION TO PROVIDE FREE DRUG BENEFITS FOR PERSONS OVER 65

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, all of us in the House receive letters from our elderly constituents who are having a difficult time making ends meet on their retirement incomes, but from time to time I receive pleas for help from the elderly who are unable to purchase the drugs they need. On their meager fixed incomes they cannot afford these medications to treat their ailments.

Unfortunately, the medicare program, which I strongly support, has fallen short in the area of providing drugs. It does not provide coverage for drugs needed for the treatment of chronic illnesses such as hypertension, diabetes, arteriosclerosis, and others; the elderly must purchase the drugs needed to treat these illnesses out of their own pockets. In order to have medicare cover the cost of drugs, they must be given in a hospital or administered by a physician. Statistics show, however, that over 25 percent of the drugs purchased in this country are purchased by those over 65 years of age, even though this age group constitutes only 10.7 percent of the population. This age group, in fiscal 1976, expended $2.78 billion for drugs and drug sundries. Of this total, medicaid and other sources paid roughly 14 percent, but the remainder, 86 percent came out of the pockets of the elderly.

This fall the Subcommittee on Health and Long-Term Care of the House Select Committee on Aging held hearings on the gaps and limitations in the medicare program. Comments were made repeatedly throughout these hearings that the lack of outpatient prescription drug coverage was one of the most glaring gaps in the program.

For over 10 years there has been continual support for outpatient prescription drug coverage by many national, State, and local organizations which represent the elderly, and several times the Senate has included such a provision in medicare legislation, but it has never prevailed through a House-Senate conference.

Those who are considered the elderly poor—those with incomes up to $5,000 per year—fare even worse in terms of cost for necessary drugs.

Today I am proposing a bill that would provide free drug benefits for all persons over 65, regardless of whether they qualify for medicare, medicaid, or social security. Thus, we would not only be taking care of the problem confronting those on medicare, but all elderly.

Briefly, the measure would cover all residents of the United States over 65, and would be administered by a separate unit to be established under the Department of Health, Education and Welfare, as the Prescription Drug Benefits Council. The Council would advise and assist the Secretary with administrative policy and long-term plans and would recommend drugs for the approved benefits list, as well as the allowable reimbursement cost for these drugs.

The measure allows for a workable timetable in order to provide enough time to have the drug benefit program established and, therefore, no benefits would be available for 2 years after the bill becomes law.

The program would be financed by general revenues through the appropriations process and rational cost controls have been built into the bill.

Mr. Speaker, we have passed many bills since I have been in Congress to aid the elderly by providing shelter, food, and health care, but we have fallen short in this last area. If our senior citizens cannot afford the drugs they need to remain well, none of the other programs will be of any use to them.

I hope that action will be taken in the next session in order to begin a drug benefit program so that our elderly citizens will be able to care for their health needs. We have a great health care system in this country. Let us be sure that our citizens, in their golden years, are able to benefit from it.

CONDEMNING RHODESIAN RAIDS IN MOZAMBIQUE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Mrs. BURKE) is recognized for 5 minutes.

Mrs. BURKE of California. Mr. Speaker, I must take this opportunity to condemn the recent actions of the Rhodesian Government in its recent raids on guerrilla camps in neighboring Mozambique.

The Rhodesian Government has reported that the raids began on Wednesday, November 23, and ended on Monday, November 28, with air and ground of the Rhodesian military killing 1,200 black nationalist guerrillas in an operation that penetrated as deep as 132 miles into Mozambique. Journalist and other eyewitness accounts however indicate that many innocent and unarmed men, women, and children were brutally tortured and slain. Hospitals, schools and homes were indiscriminately bombed and strafed. The bodies of 20 schoolgirls between the ages of 10 and 14 were found and the bodies of men, women and children were scattered through the areas attacked. Bishop Abel Muzorewa, one of the major black nationalist leaders with whom Prime Minister Ian Smith is scheduled to meet on the transition to black majority rule, declared a period of mourning and denounced the killings stating that those killed were "for the most part men, women, and children who fled from the land of their birth to seek asylum in Mozambique."

The raids by the Rhodesian Government into Mozambique are a serious violation of that country's territorial integrity and a blow to prospects for peace between Rhodesia and its neighbors. Both the United States and British Governments have joined in condemning the latest Rhodesian actions. We must make clear to the Rhodesian Government that a lasting peace cannot grow out of terror.

POSTAL REFORM LEGISLATION TO BE CONSIDERED BY HOUSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. CHARLES H. WILSON) is recognized for 5 minutes.

Mr. CHARLES H. WILSON of California. Mr. Speaker, early next year the House will consider legislation which will to a substantial degree determine the direction of the U.S. Postal Service in the years and, indeed, decades to come.

I refer to H.R. 7700, a bill I have sponsored with my good friend JIM HANLEY of New York, which was favorably reported by the House Post Office and Civil Service Committee in October by an overwhelming 19 to 4 margin.

This legislation would mandate that our Nation's postal system continue in its traditional role as a service to the American people and not simply be run with profit and loss charts. The bill specifically authorizes public funding to maintain such services as 6-day mail delivery and rural post offices.

H.R. 7700 would also take a number of steps to return accountability for the Postal Service to the Congress and President through such provisions as direct Presidential appointment of the Postmaster General, elimination of the Board of Governors, and congressional veto authority over proposed postal rate increases or service cuts. A congressional review procedure to examine proposed major postal capital investments is also established, and the bill mandates additional funding for postal research and development so that the Postal Service will have the technological know-how to cope with our Nation's changing communications systems.

In sum, Mr. Speaker, I think the bill meets the key areas of concern which our colleagues in the House have expressed in recent years.

The fact is, the continued existence of our nationwide postal system is important to all Americans.

This point was eloquently discussed by James R. Shepley, president of Time, Inc. in a speech which he gave before the ABC Conference on Government and the Business of Communications on November 9, 1977, in New York City.

As Mr. Shepley observes, the postal system has served a vital role in the development of our country as a disseminator of information and opinion, and that role is currently being jeopardized by ever-increasing postal rates.

The text of Mr. Shepley's statement follows:

REMARKS TO ABC CONFERENCE ON GOVERNMENT AND THE BUSINESS OF COMMUNICATIONS

(By James R. Shepley)

Thank you Mr. Chairman. I am, in fact, grateful to the Audit Bureau of Circulations for this opportunity to speak on a subject vital to all those who believe that the printed word is important to our society. I should

imagine that includes everyone in this room. Any exceptions—I hope the Chairman will agree—can be excused for the next 15 minutes of this session.

The printed word, especially in smaller newspapers and perhaps most magazines, faces at this moment an enormous threat. Oddly enough this threat comes from a traditional friend and supporter of the printed word, the Federal Government. Since our nation's birth, an informed citizenry has been a pillar of its existence. Freedom of speech and wide distribution of printed information through the postal system were recognized by our founding fathers as important to the nation's social welfare, its tranquility, and its growth.

The U.S. Post Office is even older than the nation itself. Its first Postmaster General, appointed by the Second Continental Congress, was Benjamin Franklin, an appointment that recognized the crucial role of the postal system in our democracy. A few years later when George Washington, during his first Administration, appointed only five officers of cabinet rank, the Postmaster General was one of them. A strong postal service, Washington said in 1792, was needed "to bind the people to us with a chain that could never be broken."

I shall spare you the subsequent history, but it is filled with concern for the printed word and with supporting acts and regulations facilitating the distribution of newspapers and magazines. During the Civil War, for example, when the nation's unity was shattered over the issue of slavery, Congress passed a variety of laws which increased the number and the diversity of the press, particularly of magazines.

That concern and support for the printed word and its wide distribution continued with no major interruption until seven years ago. Then, in 1970, something happened. Even then what happened had its origins in good faith. The Postal Reorganization Act of 1970 reorganized the Post Office into the United States Postal Service. In doing so the Act set up a quasi corporation that was instructed to look in opposite directions at the same time. One direction was to continue to provide the public service historically recognized as vital to the nation. The other was to become business-like and no longer operate at a loss. It was, in effect, mandated schizophrenia.

Since the passage of the Postal Reorganization Act, postage costs have soared as never before and they are soaring still. Second-class mail, for example, has gone up since 1970 by over 200%. Projected increases will raise that figure by July 1979 to 404%. And before that date we expect additional increases to be proposed which would raise the percentage even higher.

Schizophrenic though it was, the Postal Reorganization Act of 1970 did reaffirm the historical function of the mails set forth by Washington and supported by Franklin, Madison, Jefferson and many others. The very first paragraph of the 1970 Act instructed the newly created postal organization to recognize "as its basic function the obligation to provide postal service to bind the nation together through the personal, educational, literary, and business correspondence of the people." Congress also gave special consideration to the print media by legislating a stretch-out of five years, later increased to eight years, which enabled the media to assume the heavily increased costs of second-class mail.

Unfortunately, the explicit instructions of Congress to fund the stretch-out were ignored by the Nixon and Ford Administrations. Fortunately, Congress approved the funding despite Administration opposition. The attitude of the present Administration is in some doubt. The Postal Service itself, although nominally independent of the White House, cannot be really independent of the Office of Management and Budget and the OMB seems clearly to have a bias against users of the Postal Service, particularly business users.

I said that the position of the Carter Administration on postal matters was in some doubt. As a candidate, however, Mr. Carter was perfectly clear. In a statement on the Postal Service released just a year ago, Mr. Carter called it "a classic illustration of wasteful, imprudent, and inefficient management . . . We must recognize," Mr. Carter concluded, "that the Postal Service represents an essential public service for many people in our country."

About the same time in an interview with a distinguished southern publisher, Emory Cunningham, Candidate Carter reiterated that "the Postal Service has got to be a service . . . We've got to provide adequate distribution for periodicals, newspapers, magazines, and second-class mail to families in this country who couldn't possibly pay the full cost of postal service."

The reality has been something else. For example, the Postal Reorganization Act of 1970 provided a $920-million public service appropriation based on the Post Office Department's operating budget for that year. That amount has remained the same even though operating costs of the Postal Service have jumped by 84%. In effect, the print media have been saddled with much of the enormous burden of inflation, of maintaining thousands of small post offices and of rural free delivery. Yet the Carter Administration has indicated an unwillingness to raise the public service appropriation established more than seven years ago on the basis of a now outdated operating budget.

Public service postal appropriations have been taken for granted throughout our nation's history. Before the turn of the century, they were in fact far larger in respect to the national budget than its current appropriation. Every other major country in the world today subsidizes its postal system. Not one expects it to be in the black. Public service funding passes almost unnoticed for the Parks Department, HUD, the Commodity Credit Corp., Amtrak, even municipal transport. The federal subsidy to Amtrak last year was $576 million, nearly twice its total operating budget. In Boston, New York and Washington, a mere 30% to 55% of operating costs come out of bus and subway fares.

Nonetheless, the present Administration opposes a 15% public service appropriation for the Postal Service. And make no mistake. Without such funding many segments of the print media face an intolerable burden, a terminal one for small daily and weekly newspapers and for many magazines.

Consider if you will a magazine of about 100,000 circulation which runs about 20% advertising and 80% editorial. The postal costs on the editorial part have always been charged at a flat rate, the same rate whether the magazine was mailed from Baltimore to Washington or from Baltimore to San Francisco. The Postal Service now proposes to institute a zoned rate for editorial which would hit particularly hard small magazines that tend to have a high percentage of edit pages. That would be on top of an overall postal rate increase already in excess of 200% since the Postal Reorganization Act of 1970.

The U.S. Office of Education, a department of HEW, has been very rightly stressing the importance of good reading material for children. If you've seen any children's TV programming recently, you can only say "amen" to HEW's good wishes. Well, the proposed editorial zoned rate for children's magazines, which carry very little advertising, could well be catastrophic. One major publisher of such a magazine estimates that his current mailing costs will rise by 76% this coming July and 126% a year later. Sadly enough the higher subscription prices necessary to pay for such an increase will inevitably result in lower circulation. The losers will be not just the publisher, but children and their parents as well.

If it occurs to you that I am shedding tears for smaller publications when my obvious interest is in Time Inc. magazines, you are only partially right. Obviously, I am concerned about any soaring cost in my business. But Time Inc., like other large publishers, has both resources and choices which smaller publications lack. We can, for example, achieve distribution at newsstands and in supermarkets, as we've done with PEOPLE magazine, and as we will do with WOMAN magazine, if we decide to enter the women's field. We can also avail ourselves of alternative means of distribution that bypass the Postal Service, about which I'll speak briefly in a moment.

So it's not a question of whose ox is being gored. We are all being gored and the horns are getting sharper. The larger, more fortunate magazines will bleed but survive. Others will bleed and die. Those others are more than a part of your business, they are part of the fabric of our society. If the people of this country purchase fewer newspapers and magazines, if they are exposed to fewer points of view, the nation will be impoverished. If prices rise so that publications will be available only to an elite, our society is threatened. So my tears and my fears are not for some newspapers, not for small or large magazines, but for all of us and for this nation.

There is a further threat inherent in soaring postal costs and that is to the Postal Service itself. Since the Reorganization Act of 1970, it has lost most of the parcel post business to the United Parcel Service. In total volume of mail the Post Office recently suffered a decline, its first peace-time reduction since the '30s. Although in the fiscal year just past volume rose once again, that's almost certain to be temporary. The electronic transfer of funds will cut that volume, according to the Postal Service's own estimate by as much as 42%. Growing exchange of information by computer terminals—what is now being called compunications—will certainly cause another sizeable cut in volume.

Since postal costs are largely fixed, the reflex reaction is to try to raise additional money from the mail that remains. Washington's predilection for laying off costs onto business simply reinforces that unreasonable reflex. The proposed double standard of citizen and business rates for first-class mail illustrates that point, as if we in business were not even citizens.

As a result of what's been happening and of what we continue to be threatened with, Time Inc. for the last couple of years has been testing alternative delivery systems to the Postal Service. So have other publishers.

When we began testing systems they were expensive compared to the Postal Service. They still are, but the gap has narrowed considerably. We know it will narrow more because on the one hand postal rates are scheduled to rise and on the other because our distributors have learned about economies of scale and introduced better carrier organization. Right now we are distributing Time magazine in eight geographical areas using seven different carrier organizations. We are continuing to expand those test areas. In southern California we plan to go from delivery in 28 zip codes to 72. We will also for the first time include Sports Illustrated and Time-Life Books in that operation. In the Boston area our independent carrier within the next year expects to move from 20 zip codes to 155 zips.

We have for some time sampled our subscribers by telephone and mail questionnaires to find out how these new delivery systems are working. They have not, of course, been trouble-free but neither is

postal delivery and we are overwhelmingly convinced that alternative delivery systems produce satisfied subscribers.

If rising postal costs push Time Inc. and other large publishers deeper into alternative delivery while small newspapers and magazines are pushed out of business, the loss in volume to the Postal Service will significantly affect its operations. Such losses together with reductions in volume from electronic funds transfer and from computer communications will greatly aggravate the cost and pricing problems or the Postal Service. Operating deficits that ran a billion dollars or so before the Reorganization Act of 1970 and reached $2.6 billion in 1975 could easily triple in the next ten years.

Fortunately, action has begun in the House of Representatives. Just a few weeks ago the House Post Office and Civil Affairs Committee by a 19 to 4 vote cleared a bill that seeks to rectify some of the current and proposed postal abuses. This bill recognizes the public service tradition and the responsibility of the Post Office to be a service to the people. It calls for an increase in the public service appropriation of about $1½ billion and it gives the Congress a veto power over proposed postal-rate increases. It also restores the Postal Service to control of the Presidency by making the Postmaster General a presidential appointee. It is not a perfect bill, but it recognizes at least certain realities that the Carter Administration saw clearly last November and to which it now appears blinded.

One drawback with H.R. 7700, as the Bill is called, is that it cannot be considered by the full House until after the first of the year. Over in the Senate prospects for action are a good bit worse. In the reorganization of that upper chamber's committees early this year the Senate committee on postal affairs disappeared. Instead postal affairs is just one responsibility of a subcommittee of the Government Affairs Committee. That subcommittee deals with energy, nuclear proliferation and federal services, and Senators who are members of that subcommittee obviously have other priorities. Furthermore their sense of priority may understandably be influenced by the fact that the Chairman of what was the Senate Postal Committee was defeated in last November's election, a defeat many observers concluded was due in part to his identification with the postal mess.

So here we are this morning with almost no likelihood of the Senate subcommittee producing a bill this year and not much chance of a bill reaching the Senate floor before March or April. Very frankly we do not know what to expect when the Senate gets around to writing its counterpart to the House bill.

The cost of second-class mail has already risen over 200% in the last seven years and we can expect that increase to exceed 400% in the next two years. I've tried to indicate to you what that means to smaller newspapers and magazines—in many cases extinction. I've suggested what such soaring costs mean to larger publishers, to the Postal Service, and to the country. There is no one in this room who will not be adversely affected if the idea of postal self-sufficiency continues to be pushed to self-immolation.

I spend a good bit of time in Washington these days and can assure you that this concern of mine is real and in no way exaggerated. My hope is that each of you here this morning will raise your voice and particularly will make it heard in Washington. You are an important audience. Many of you play significant roles in your communities and beyond those communities on a national level. You are influential and I urge you to make your influence felt.

Nowhere is it more important to do so than in the Senate. As I've indicated, the House at least has a bill in the works. The Senate is farther behind, and not only because it's been enmeshed in the energy bill. The Chairman of the Government Affairs Committee is Senator Abraham Ribicoff and the senior Republican on that Committee is Senator Charles Percy. The Subcommittee on postal matters is headed by Senator John Glenn and Jacob Javits is the senior Republican. Each of these gentlemen, and others of course, can play an important part in shaping the kind of postal bill which will ultimately reach the Senate floor.

I have mentioned specific committees and legislators because I hope you'll do more than nod if you're in agreement with what I've said. We can all be caught nodding. If you want to know who are the principal players in postal drama and are willing to communicate with them, please don't hesitate to write or phone my office at Time Inc. We are all at this moment in a difficult, even dangerous, situation. I hope we can extricate ourselves, but it will take all our efforts to do so. Thank you.

PENSION REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, today I have introduced the Veterans and Survivors Pension Improvement Act of 1978. The bill is cosponsored by the distinguished chairman of the full Committee on Veterans' Affairs, the Honorable RAY ROBERTS; the ranking minority member of the full committee, the Honorable JOHN PAUL HAMMERSCHMIDT, the Honorable JACK BRINKLEY, the Honorable WILLIAM (BILL) HEFNER, the Honorable SAM B. HALL, Jr., the Honorable ROBERT W. EDGAR, and the Honorable TENNYSON GUYER.

The bill would improve the pension system which provides monthly payments to war veterans who are permanently and totaly disabled from causes not related to their military service and to the widows of surviving children of such veterans.

The veterans' pension program is governed by the principle that pensions are not a reward for service to our country but a supplement to resources otherwise available. The bill seeks to assure that pension beneficiaries will not be dependent on charity or welfare assistance in the future.

Although the current pension program is, in my opinion, an excellent well thought out income support program, we do recognize that the current program contains some inequities and inconsistencies. In Public Law 94–432, we directed the Administrator to conduct a thorough study of the current pension program and requested that the VA recommend to the Congress various alternatives to the current program based on the results of its study. The report was due October 1, 1977; however, we were notified just prior to that date that the study results would not be submitted until November 1, 1977. Having not heard from the Administrator as of this date, one can only conclude that the Administration is having difficulty in getting Office of Management and Budget clearance on suggested alternatives to the current program.

Mr. Speaker, earlier this year, during consideration of H.R. 7345, a bill to increase the rates of disability and death pension and DIC for parents, I informed my colleagues that following receipt of the VA study results, my subcommittee would conduct extensive hearings in January or February on a comprehensive bill which would provide for a thorough restructuring of the pension program. During consideration of our first and second budget resolutions, the chairman of the full committee promised the gentleman from California, the Honorable GLENN ANDERSON, that hearings would be held on two bills he has introduced in behalf of World War I veterans and their dependents, H.R. 55 and H.R. 9000. I intend to honor our commitment to hold these hearings. I can assure my colleagues that we are in the process of working up a hearing schedule on these bills, as well as others pending before my subcommittee that would provide for various amendments to the current pension program. I shall announce that schedule at the earliest possible time.

Mr. Speaker, the bill we have introduced today is designed to fill the vacuum created by the Administrator's failure to comply with the mandate in Public Law 94–432. The bill is a starting point for all explorations into the improvements which many of my colleagues have suggested are necessary to improve the current pension program. If the administration eventually recommends viable alternatives, we can incorporate them following our hearings.

One major provision of the bill would put an end to the adverse effect increases in social security have on pension rates. Pension rates would be indexed to the social security increases which are tied to the Consumer Price Index. This means that those drawing pension under the program we are proposing would receive automatic cost-of-living increases each year. Under current law Congress is required to take affirmative action periodically to provide those increases.

In addition, the bill would assure that no pensioner would receive less pension as a result of the social security increase each year. The pensioner would receive a full cost-of-living increase in his or her pension benefit. This provision would result in maintaining a true cost-of-living increase for pensioners as well as resolve the single most often repeated criticism of the current pension program.

The rates in the proposed reform measure are substantially higher than those under current law. The following table compares the proposed rates with the new increased pension rates effective January 1, 1978, under H.R. 7345:

	(1)	(2)
Veteran alone	$4,000	$2,364
Veteran, 1 dependent	5,200	2,544
Veteran, 2 dependents	5,800	2,604
Veteran, 3 dependents	6,400	2,664
Additional dependents	600	None
Veteran alone plus A&A	6,160	4,344
Veteran, 1 dependent plus A&A	7,360	4,528
Veteran, alone, housebound	4,804	3,096
Veteran, 1 dependent, housebound	6,004	3,276
Widow alone	3,000	1,596
Widow, 1 child	3,900	1,908
Widow, 2 children	4,350	2,220

Widow, 3 children	5,800	2,532
Additional children	450	312
Widow alone plus A&A	4,488	3,312
Widow, 1 child plus A&A	5,388	3,492
No widow:		
1 child	1,200	732
2 children	1,650	1,044
Each additional child	450	312

[1] Rates under Montgomery bill effective Jan. 1, 1979.

[2] Rates under H.R. 7345 effective Jan. 1, 1978, as passed by House and Senate.

The rates may seem high to many of my colleagues. However, I remind my colleagues that one of the major complaints we hear in reference to the current program is that the rates are so low for those in the lower income brackets that they are required to turn to income-assistance or inkind programs such as supplemental security income or food stamps merely to survive, while those with substantial income from various sources continue to receive some pension. By increasing the rates as shown in the above table, pensioners will not be forced to live on sub-poverty level incomes. The rates are intended to set a level which permits a more equitable consideration of other resources available to pensioners for support. To that end, most exclusions in the current pension program wrich tend to create false entitlement have been eliminated, yet substantial support levels are maintained by use of the higher rate structure.

Finally, Mr. Speaker, the bill would provide for protection for those on the rolls in a new and innovative way. To prevent current pensioners from being adversely affected by this new program, the bill would assure that all pensioners on the rolls on the date of enactment would receive at least the dollar amount of pension being received at the time the bill becomes effective. This means that no pensioner would receive a decerase in pension because of income from future social security increases.

Mr. Speaker, I am hopeful this bill will receive strong support from both sides of the aisle. I know the other body is working on a bill and I am certain we will report a measure to the House early next year.

SOCIAL SECURITY FINANCING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 5 minutes.

Mr. BURKE of Massachusetts. Mr. Speaker, I stand before my colleagues today to focus attention on an article by Mr. Tom Wicker which appeared in the Boston Herald American on Sunday, November 27, 1977.

Mr. Wicker, clearly states that the only sensible means of preserving the social security trust funds is by using general revenue funds. As you know, I have long been a strong supporter of the general revenue approach. My proposal would reduce the tax rate for employees and employers to 3.9 percent in 1979, and would provide for a one-third contribution from the general fund.

The social security financing bill presently before Congress calls for excessively high payroll tax rates. As Mr. Wicker points out, increasingly higher tax rates have an extremely detrimental effect on the economy—increasing unemployment, increasing prices, reducing purchasing power, restricting capital formation, increasing welfare costs, so forth. It is obvious that we must provide tax relief at the employment level.

General revenue financing is not a new concept for social security. The founders of the social security system in the 1930's clearly expressed the fact that by the 1960's general revenues would be necessary and completely justified for maintaining the financial stability of the trust funds.

At this time I wish to bring to your attention a list of over 50 countries throughout the world that use general revenues for their social insurance programs. The workers and the general economies of these nations have benefitted from such general revenue funding.

The list of countries follows:

Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Canada, Chile, China, People's Republic of, China, Republic of Taiwan, Colombia, Costa Rica, Cuba, Cyprus, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Finland, East Germany, West Germany, Greece, Guatemala, Haiti, Honduras, Hungary, Iceland.

India, Iraq, Ireland, Israel, Italy, Japan, Libya, Luxembourg, Malta, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Panama.

Paraguay, Philippines, Romania, Saudi Arabia, South Africa, Spain, Sweden, Switzerland, Union of Soviet Socialist Republics, United Kingdom, Upper Volta, Uruguay, Venezuela, Zaire.

I ask that each of my colleagues take the time to read this article in order to gain a greater understanding of the urgent need to provide for general revenue financing of the social security trust funds:

[From the Boston Herald American, Nov. 27, 1977]

SLIM HOPE CONGRESS CAN IMPROVE SS BILL

(By Tom Wicker)

WASHINGTON.—When Congress returns for the final phase of its 1977 session, opportunity still will exist—but just barely—for drastic action to improve the pending Social Security legislation. As they stand now, bills passed by both houses to keep Social Security solvent for the rest of this century will also force sharp periodic tax increases through the next decade, exert upward pressure on the price level and dampen buying power during the same period, possibly worsen the unemployment situation and still not solve the system's basic long-term problem.

The chance to avoid all or some of these consequences derives from an obscure section of the House bill that would provide for automatic Treasury loans to the old age and disability trust funds if either fell below 25 percent of annual outlays. That could be a foot in the door for Treasury contributions from general revenues to the trust funds, and if Congress would disenthrall itself from the myth that Social Security is an "insurance" system, general fund revenues would be seen as the only sensible means of preserving the system without constantly rising payroll taxes and their inflationary consequences.

That's because the fundamental problem of Social Security is the continuing and projected decline in the number of retired persons who will be receiving benefits from them. The House bill would increase this imbalance by removing the ceiling on amounts that retirees can earn without loss of Social Security benefits—thus inevitably increasing the outflow of benefits.

In the short-run, this basic problem is exacerbated by high unemployment—which decreases contributions to the trust funds—and inflation—which causes Congress to vote increased benefits. President Carter had the good sense to see that, in effect, a slack economy was robbing the system; so he proposed that in years when unemployment exceeded 6 percent, the Treasury should contribute the difference between Social Security taxes actually collected and what they would have totalled at 6 percent unemployment. This would be "indexing" to unemployment rather than to inflation.

Both houses rejected this counter-cyclical scheme, primarily due to the prevalence of the "insurance" myth; members feared that to inject general revenues into the supposedly self-supporting trust funds would make Social Security appear to be "welfare." But this is a knee-jerk reaction with no real basis in logic or fact. For example:

Employer payroll taxes for Social Security—half the total—are deductible from employers' income taxes. Thus, what employers pay into the Social Security system reduces general fund revenues; indirectly, therefore, general fund revenues are already being diverted in favor of the Social Security trust funds.

President Carter has stated that if the steep Social Security tax increases voted by Congress go into effect, he will have to call for income tax reduction to compensate workers hard hit by the regressive payroll taxes. Once again, therefore, potential general fund revenues would be channeled into the Social Security trust funds, whether members of Congress want to admit it or not.

For most retired persons, benefits far surpass their contributions to the system, so that the notion that a beneficiary gets only what he or she paid for is mistaken; and the United States is virtually the only Western industrial society that tries to maintain this "insurance" charade.

In fact, the insurance myth appears to be no more than a derivative of the scorn and indignation in which contemporary Americans seem to hold "welfare." But that was not always so; and J. Douglas Brown, who headed the Social Security Advisory Council in 1937–38, when the system was in its infancy, wrote The New York Times earlier this year to say that "the planners" of Social Security "were convinced that, as the system matured, government contributions would be necessary and fully justified to preserve the integrity of the system."

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. DANIELSON, after 4 o'clock p.m. today and for the remainder of the week, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. MICHEL, for 30 minutes tomorrow, and to include extraneous matter, on the subject of welfare reform.

(The following Members (at the request of Mrs. FENWICK) and to revise and extend their remarks and include extraneous matter:)

Mr. YOUNG of Alaska, for 10 minutes, today.

Mr. CLEVELAND, for 10 minutes, today.
Mr. SEBELIUS, for 20 minutes, today.
Mr. MARLENEE, for 5 minutes, today.
(The following Members (at the request of Mr. WATKINS) to revise and extend their remarks and include extraneous material:)
Mr. CONYERS, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. RONCALIO, for 30 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mrs. BURKE of California, for 5 minutes, today.
Mr. CHARLES H. WILSON of California, for 5 minutes, today.
Mr. DRINAN, for 60 minutes, today.
Mr. MONTGOMERY, for 5 minutes, today.
Mr. BURKE of Massachusetts, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BROWN of Ohio, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,207.50.

(The following Members (at the request of Mrs. FENWICK) and to include extraneous matter:)
Mr. DON H. CLAUSEN.
Mr. ROUSSELOT in two instances.
Mr. HAGEDORN.
Mr. SNYDER.
Mr. CEDERBERG.
Mr. HILLIS in two instances.
Mr. DERWINSKI in two instances.
Mr. RHODES.
Mr. DEL CLAWSON.
Mr. LAGOMARSINO.
Mrs. HOLT.
Mr. SYMMS.
Mr. CLEVELAND.
Mr. ASHBROOK in three instances.
Mr. BOB WILSON in two instances.
Mr. CARTER.

(The following Members (at the request of Mr. WATKINS), and to include extraneous matter:)
Mr. FISHER.
Mr. APPLEGATE.
Mr. DRINAN.
Mr. LUKEN.
Mr. MILFORD.
Mr. REUSS.
Mr. HAMILTON in three instances.
Mr. SKELTON.
Mr. VANIK in three instances.
Mr. GONZALEZ in three instances.
Mr. ANDERSON of California in three instances.
Mr. WON PAT.
Mr. BALDUS.
Mr. VENTO.
Mr. WALGREN in two instances.
Mr. WEISS in two instances.
Mr. ROSE.
Mr. LLOYD of California.
Mr. EDGAR.
Mr. WOLFF.
Mr. ROGERS in five instances.
Mr. PEPPER in two instances.
Mr. MAZZOLI.
Mr. LE FANTE.
Mrs. SPELLMAN.
Mr. ROBERTS.
Mr. CONYERS.
Mr. ADDABBO.
Mr. SMITH of Iowa.
Mr. MURPHY of New York.
Mr. JENRETTE.
Mr. PATTERSON of California.
Mr. EILBERG.

ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 7. An act to authorize a career education program for elementary and secondary schools, and for other purposes; and

H.R. 8422. An act to amend titles XVIII and XIX of the Social Security Act to provide payment for rural health clinic services, and for other purposes.

ADJOURNMENT

Mr. WATKINS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 45 minutes p.m.), the House adjourned until tomorrow, Thursday, December 1, 1977, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2751. A letter from the Acting Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriation for the Federal Grain Inspection Service has been apportioned on a basis which indicates the necessity for a supplemental estimate of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

2752. A letter from the Assistant Secretary of Defense (Comptroller), transmitting an additional contract award date notice for the period November 15, 1977, to February 15, 1978, pursuant to 10 U.S.C. 139; to the Committee on Armed Services.

2753. A letter from the Executive Director, National Capital Planning Commission, transmitting a report that the Commission acquired no lands for the parkway and playground system of the National Capital Area during fiscal year 1977, pursuant to section 13 of the National Capital Planning Act of 1952; to the Committee on the District of Columbia.

2754. A letter from the Attorney General, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2755. A letter from the Comptroller General of the United States, transmitting an evaluation of the Federal antirecession assistance to State and local governments as implemented under title II of the Public Works Employment Act of 1976 (PAD-78-20, November 29, 1977), pursuant to section 215 (a) of the act (Public Law 94-369); to the Committee on Government Operations.

2756. A letter from the Clerk, U.S. House of Representatives, transmitting his quarterly report of receipts and expenditures for the period July 1 through September 30, 1977, pursuant to section 105(a) of Public Law 88-454, as amended (H. Doc. No. 95-265); to the Committee on House Administration and ordered to be printed.

2757. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

2758. A letter from the Acting General Counsel, Department of Energy, transmitting notice of two meetings relating to the International Energy Program on November 28 and December 1, 1977, in London, England; to the Committee on Interstate and Foreign Commerce.

2759. A letter from the Chairman, U.S. Civil Service Commission, transmitting a draft of proposed legislation to amend title 5, United States Code, to provide survivor benefits to certain dependent children; to the Committee on Post Office and Civil Service.

2760. A letter from the Chairman, U.S. Civil Service Commission, transmitting a draft of proposed legislation to extend the period of eligibility for a Vietnam Era Veterans' Readjustment Appointment within the Federal Government; to the Committee on Veterans' Affairs.

2761. A letter from the Administrator of Veterans' Affairs; transmitting reports covering fiscal year 1977 on exchange of medical information and sharing of medical resources, pursuant to 38 U.S.C. 5057; to the Committee on Veterans' Affairs.

2762. A letter from the Chair, Equal Employment Opportunity Commission, transmitting a report on the number of employees of the Commission in each grade of the General Schedule as of the close of fiscal years 1976 and 1977, pursuant to section 1310 of the Supplemental Appropriations Act of 1952; jointly, to the Committees on Appropriations, and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. KASTENMEIER: Committee on conference. Conference report on H.R. 6666 (Rept. No. 95-825). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. APPLEGATE (for himself and Mr. MARRIOTT):

H.R. 10163. A bill to amend the Internal Revenue Code of 1954 to allow individuals a credit against income tax for expenses paid by a taxpayer in connection with his education or the education of his spouse or any of his dependents at certain educational institutions; to the Committee on Ways and Means.

By Mr. ASHBROOK (for himself and Mr. STEERS):

H.R. 10164. A bill to amend the Internal Security Act of 1950 to control and penalize terrorists, and for other purposes; to the Committee on the Judiciary.

By Mr. BEDELL (for himself, Mrs. BOGGS, Mr. COHEN, Mr. DOWNEY, Mr. ERTEL, Mr. FISHER, Ms. HOLTZMAN, Mr. LEVITAS, Mr. MOLLOHAN, Mr. VOLKMER, and Mr. WALKER):

H.R. 10165. A bill to amend title 18, United States Code, to prohibit Members of the Con-

gress from mailing or otherwise using official congressional stationery for any purpose other than official congressional business; to the Committee on the Judiciary.

By Mr. DRINAN (for himself, Mr. BLOUIN, Mr. D'AMOURS, Mr. FITHIAN, Mr. GEPHARDT, Mr. LEDERER, and Mr. WALGREN):

H.R. 10166. A bill to provide additional assistance to small business concerns in acquiring procurement information and contracts from the United States; to the Committee on Small Business.

By Mr. GLICKMAN (for himself, Mr. NOLAN, Mr. JEFFORDS, Mr. FRASER, Mr. MOAKLEY, Mr. PURSELL, and Mr. WALGREN):

H.R. 10167. A bill to encourage the use of alcohol in motor vehicle fuels by requiring certain retailers to make alcohol-blended fuels available for sale, by allowing the rapid amortization of facilities producing alcohol for use in motor vehicle fuels, and by exempting alcohol-blended fuels from certain requirements of the Clean Air Act jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. GONZALEZ:

H.R. 10168. A bill to establish a program of drug benefits for the aged; to establish a Drug Benefits Council and other appropriate management controls to provide for the efficient administration of such program; and to require the conducting of certain studies and experiments, to enhance the capability of the Secretary of Health, Education, and Welfare to administer such program, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HAGEDORN (for himself, Mr. EDWARDS of Oklahoma, Mr. ICHORD, Mr. SYMMS, and Mr. SCHULZE):

H.R. 10169. A bill to amend the Congressional Budget Act of 1974 to limit increases in levels of total budget outlays and total new budget authority established in concurrent budget resolutions; to the Committee on Rules.

By Mr. HEFTEL:

H.R. 10170. A bill to amend the Internal Revenue Code of 1954 to eliminate the adjusted gross income limitation on the credit for the elderly, to increase the amount of such credit, and for other purposes; to the Committee on Ways and Means.

H.R. 10171. A bill to amend the Internal Revenue Code of 1954 to provide, for purposes of determining the unrelated business taxable income of certain tax-exempt organizations and trusts, that such income does not include gains or losses from the sale of certain real property to the lessee of such property; to the Committee on Ways and Means.

By Mr. HYDE (for himself, Mr. ERTEL, Mr. HAGEDORN, Mrs. HECKLER, Mr. O'BRIEN, and Mr. WALKER):

H.R. 10172. A bill to amend title 18, United States Code, relating to the production of false documents or papers of the United States, and the use of false information in obtaining official documents and papers of the United States, involving an element of identification; to the Committee on the Judiciary.

By Mr. MONTGOMEY (for himself, Mr. ROBERTS, Mr. HAMMERSCHMIDT, Mr. BRINKLEY, Mr. HEFNER, Mr. HALL, Mr. EDGAR, and Mr. GUYER):

H.R. 10173. A bill to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. PANETTA:

H.R. 10174. A bill to authorize pay and benefits for members and survivors of members of the Philippine Scouts on the same basis as such pay and benefits are authorized for other members of the Armed Forces and their survivors; to the Committee on the Judiciary.

By Mr. PANETTA (for himself, Mr. BEDELL, Mr. HARRIS, and Mr. JONES of Tennessee):

H.R. 10175. A bill to permit teachers to change employment across State lines without substantial loss of retirement benefits; to the Committee on Education and Labor.

By Mr. STUDDS (for himself and Mr. COHEN):

H.R. 10176. A bill to amend section 1207(f)(4) of the Tax Reform Act of 1976; to the Committee on Ways and Means.

By Mr. WALGREN (for himself and Mr. MARKS):

H.R. 10177. A bill to amend the Internal Revenue Code of 1954 to allow individuals who have attained age 65 a refundable tax credit for amounts paid for electricity or gas under automatic fuel adjustment clauses; to the Committee on Ways and Means.

By Mr. BOB WILSON:

H.R. 10178. A bill to provide that the Secretary of the Interior and the Attorney General shall not withhold water deliveries from any beneficiary of a Federal reclamation project for the purpose of achieving conformity with the reclamation rules and regulations proposed by the Bureau of Reclamation, Department of the Interior (Federal Register, vol. 42, No. 165, August 25, 1977) until January 1, 1979; to the Committee on Interior and Insular Affairs.

By Mr. BEDELL (for himself and Mr. DRINAN):

H.R. 10179. A bill to provide that housing benefits available to a veteran, under title 38 of the United States Code, shall not be considered in determining, under title 5 of the Housing Act of 1949, whether such veteran is able to obtain credit for housing from sources other than the Farmers Home Administration; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BEDELL (for himself, Mr. KINDNESS, Mr. MOORE, Mr. LOTT, Mr. KAZEN, Mr. AKAKA, Mr. ERTEL, Mr. CORNWELL, Mr. WATKINS, Mr. GRASSLEY, Mr. MCCORMACK, Mr. NOLAN, Mr. MCHUGH, and Mr. MARRIOTT):

H.R. 10180. A bill to amend the meat import law in order to limit the quantity of certain prepared or preserved beef and veal which may be imported into the United States after 1976, and for other purposes; to the Committe on Ways and Means.

By Mr. RODINO (by request):

H.R. 10181. A bill to amend the Immigration and Nationality Act to provide for the classification of certain aliens as special immigrants; to the Committee on the Judiciary.

By Mr. WOLFF (for himself and Mr. MARRIOTT):

H..R 10182. A bill to amend the Internal Revenue Code of 1954 to allow certain individuals whose employers make contributions to pension plans a deduction for their contributions to employer pension funds and to allow certain individuals to establish modified individual retirement plans when the employer-employee pension contributions are small; to the Committee on Ways and Means.

By Mr. LEHMAN (for himself, Mr. ADDABBO, Mr. BADILLO, Mrs. CHISHOLM, Mr. CORCORAN of Illinois, Mr. GLICKMAN, Mrs. KEYS, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LEDERER, Ms. MIKULSKI, Mr. MURPHY of Illinois, Mr. PRICE, and Mr. RINALDO):

H.J. Res. 665. Joint resolution recognizing the contributions of school volunteers; to the Committee on Post Office and Civil Service.

By Mr. VANDER JAGT (for himself and Mr. MARRIOTT):

H.J. Res. 666. Joint resolution proposing an amendment to the Constitution of the United States to give citizens of the United States the right to enact and repeal laws by voting on legislation in a national election; to the Committee on the Judiciary.

By Mr. COLLINS of Texas:

H. Con. Res. 422. Concurrent resolution expressing the sense of Congress that the Holy Crown of Saint Stephen should remain in the safekeeping of the U.S. Government until Hungary once again functions as a constitutional government established by the Hungarian people through free choice; to the Committee on International Relations.

By Mr. SEBELIUS:

H. Con. Res. 423. Concurrent resolution to inspire the President and the Secretary of Agriculture to use existing law to achieve parity for farmers and ranchers; to the Committee on Agriculture.

By Mr. HAGEDORN (for himself, Mr. EDWARDS of Oklahoma, Mr. GRASSLEY, Mr. MILLER of Ohio, and Mr. SYMMS):

H. Res. 922. Resolution to amend the rules of the House of Representatives to require that each introduced bill and resolution contain a statement of the constitutional basis of authority for the bill; to the Committee on Rules.

By Mr. YOUNG of Texas (for himself, Mr. GAMMAGE, Mr. POAGE, Mr. BROOKS, Miss JORDAN, Mr. KAZEN, Mr. HIGHTOWER, Mr. HALL, Mr. BURLESON of Texas, Mr. MATTOX, Mr. MILFORD, and Mr. PICKLE):

H. Res. 923. Resolution directing the Committee on Interstate and Foreign Commerce to initiate an investigation concerning the Notice of Proposed Rulemaking regarding medical facilities in rural areas; to the Committee on Rules.

EXTENSIONS OF REMARKS

ON WELFARE REFORM

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. WEISS. Mr. Speaker, the United Neighborhood Houses of New York, Inc. has jurisdiction over 35 settlement houses and neighborhood centers in New York City. Of the 250,000 people who make use of the settlement house system, 63 percent receive some form of public assistance.

Because of United Neighborhood House's familiarity with the welfare situation in New York City, I am submitting its testimony before the Welfare Reform Subcommittee. I think it is a thoughtful analysis of welfare reform:

ORAL TESTIMONY PRESENTED BY UNITED NEIGHBORHOOD HOUSES OF NEW YORK, INC.

My name is Dennis Monaghan. I am speaking on behalf of United Neighborhood Houses of New York, Inc., and its 35 member settlement houses and neighborhood centers. I am the Chairman of a committee formed especially to analyze and comment on federal welfare reform. I also serve as President of one of the affiliated neighborhood houses, Manhattanville Community Centers, located in West Harlem. All of this is a voluntary

activity and, in my business life, I am an executive of a large multi-national company with headquarters in New York City. Accompanying me at this hearing is Joseph E. Jenkins, the Executive Director of United Neighborhood Houses and Carol R. Lubin, Director of Policy Research and Social Issues.

The testimony we are submitting presents the point of view of our settlement house system with respect to the need for welfare reform generally and HR 9030 in particular. The plan as a whole clearly provides major improvements over the current confused welfare system, and United Neighborhood Houses supports these changes. First, United Neighborhood Houses commends the Administration for providing a job program as a basic element in assisting low-income individuals and families. Second, United Neighborhood Houses supports the potential widening of the income maintenance and job creation program to include families who are not currently eligible. Third, we welcome the concept that the application of national standards will be designed to reduce inequities and, by consolidating programs, simplify some administrative aspects of the program.

But, we see some serious problems in the Administration's proposal which we hope the Congress will deal with as it redrafts the bill.

First, the effectiveness of the job search and job provision concepts depends on much more realistic and effective programs than appear in either the Administration statements or the current text of the bill. Second, the complex eligibility and work related provisions of the income maintenance program could lead to severe problems in administration, at both the federal and the local level. The intended recipients may be penalized for situations that are outside their control, and inefficiencies and fraud in administration may be increased rather than decreased.

Our full written statement contains four sections. The first part is an introduction to the role of neighborhood houses and their particular experience in dealing with welfare issues and welfare recipients in New York City. The second section presents the general principles which United Neighborhood Houses believes should govern the provision of income assistance to those in need, social services to those requesting them, and the availability of employment for all those capable of work. The third section comments upon those issues raised by H.R. 9030 which United Neighborhood Houses feels must be solved before any welfare reform bill is adopted by the Congress. The final section contains the findings of a survey made in July/August 1977 of the views concerning welfare indicated by social service clients from 23 of UNH member neighborhood centers in New York City.

In my oral statement, I shall address some of the issues of special significance to the settlement house system. I shall be glad to answer questions with respect to the balance of the testimony.

We believe, as indicated in our written testimony, that United Neighborhood Houses and its affiliated neighborhood-based centers can make a useful contribution to the Congress' consideration of a national poverty relief program because:

1. We are located in the poverty areas of New York City, a City in which more than 1.25 million residents, or 16.7% of its population, receive some form of public assistance. At present, the incidence of people subsisting on public assistance in New York City is 4.4% higher than in the nation as a whole. In effect, the frequency per capita of those living in poverty in New York City is 35% higher than the current national average.[1]

2. At the present time, some 250,000 individuals make some use of the settlement house system. Many of them have incomes above the poverty level, but all live in poverty areas. In our sample survey of individuals participating in settlement house programs, 63% received some form of public assistance. Of these, only 10% were managing "comfortably;" 63% were managing with "some difficulty;" and 33%, with "great difficulty." Eighty-eight percent of public assistance recipients were on Medicaid. Most of those who were receiving social services, but not public assistance, were senior citizens.

3. The dual goal of settlement houses as non-profit community organizations is to alleviate problems of the underprivileged in a compassionate and realistic way, and, at the same time, provide the services, using fully accountable procedures. Our aims are based strictly on the interest of our clients and their neighborhoods, with political, sectarian or racial bias. We know, first hand, the needs and preferences of those we serve. There is no compulsion for anyone to accept our service. Our boards of directors, which determine our policies, are composed of voluntary representatives of the communities served, as well as of the business community (including lawyers, accountants and corporation executives) and of professionals in social services and allied fields.

The principles we believe should guide any welfare system, based on our own experience, formally approved by our Board, are:

1. Every individual has a right to an adequate diet, decent shelter and clothing, and basic health care. For those who cannot achieve this with their own resources, the government has a fundamental responsibility to provide assistance.

2. Those unable to earn a living include not only the young, the old, the handicapped and those caring for dependents, but also those who lack the opportunity to move ahead due to the inadequacies of the nation's economy.

3. Job creation must be an essential element in any welfare program, starting with national and regional economic policies, and including direct employment by government as a last resort.

4. Alleviation of poverty should include the provision of social services to aid movement out of poverty and to enable the low and moderate income members of our society to become more self-sufficient.

5. Government must be the major instrument in alleviating poverty—by funding, standard setting, and monitoring—but direct contact with the families and individuals requiring aid should, wherever possible, be handled by community-related groups where they have a credible track record in providing such services.

Turning directly to the current text of the "Better Jobs and Income" bill, we regretfully state that we do not feel it adequately meets the criteria expressed in the principles I have just outlined. The bill implies that welfare recipients do not wish to work. Our experience within the settlement house system indicates that this is a myth, based on the concept that welfare recipients, in general, choose to live as public dependents. This may be true of a very limited number—but the real problem is, as you know, that there simply are not enough jobs in either the public or private sector today to meet the needs of those seeking employment. Again, to refer to the respondents to our questionnaire, we found that 84% were unemployed and 73% of this number preferred to work. However, 26% were unable to find employment; 26% were physically unable to work; 19% have young children and would be exempt under any program; and 12% were retired senior citizens. It is interesting to note, moreover, that 35% of those interviewed had completed from 9 to 11 grades of school; 23% had graduated from high school; and 9% were either college graduates or had some years of college. Thus, it seems clear that the lack of job opportunity is a greater factor in unemployment than the lack of educational opportunity.

In New York City, the need for a greater number of jobs is compounded by the overwhelming needs of our minority and youth unemployment. As we have seen whenever any jobs are made available, under programs such as CETA and the various youth unemployment acts, the number of those who seek and need these jobs is so great that it is almost impossible to deal fairly with the allocation of the limited available opportunities.

Incentives are needed not for employment search, but for private sector job creation in order to enlarge the employment market. Those seeking stable employment are concerned with equitable wage scales and benefits. In our experience, there has never been any preference for public employment; but, rather, it is needed because there are no private sector jobs available. We are, therefore, seriously concerned that, on the one hand, the incentives for creating new jobs in the private sector are inadequate and, on the other, the very limited number of public service employment jobs will not meet the needs of urban areas, especially cities like New York, even if current programs such as CETA VI are continued. The concept that these jobs will be eliminated because of decreased unemployment seems to us entirely unreal.

We are also seriously concerned about the punitive nature of several employment provisions. The experience described in our survey indicates that those seeking various kinds of jobs during recent years have encountered many bureaucratic hassles. Many of those who responded to our questionnaire reported that the assistance they had received in job search from government offices was futile and even after training, no jobs were offered. For example, out of 52 individuals who would have been eligible for the current Work Incentive Program (WIN), 36 did not participate because they were not aware of its existence or because there was no adequate care available for their children or they had been classified as disabled, even though they could have worked in appropriate jobs. Out of a sample of 16 individuals who had received WIN training, none are now employed.

Other provisions that seem to us punitive are those requiring lower benefits during periods of job search. The requirement that there must be a second job search after 52 weeks of public service employment and, at that time, a family will be brought down to the lower tier for benefits seems to us particularly inequitable. If the job that the client was doing is real, the client would not have had time to find another job while working. To ask him to find one on his own time at the end of 52 weeks and then, if unsuccessful, enter a different public service job does not seem a logical procedure.

We are also concerned, as we indicated in some detail in our written statement, at the

[1] The above statistics are based on census data estimates of 1975 population characteristics as reflected in the Bureau of Census' Current Population Reports: In 1975, more than 1.25 million of 7.5 million New York City residents received some form of public assistance. The Bureau of Census estimated that 25.9 million people were living below the national poverty level; the total U.S. population was estimated to be 213.6 million.

requirement that wages be set at the minimum rate, with far less benefits than those available under CETA, and with the consequence that individuals will be working side by side, in closely similar jobs, with those obtaining higher wages and better benefits. This hardly provides an incentive to productivity. There are many other inequities to which we call attention in our written testimony, including the need for greater employment disregards and essential social services.

Because we believe that the employment component of welfare reform is going to be a basic, long-term part of the total U.S. employment system, we urge Congress to ensure that these provisions be satisfactorily modified.

The financial aid concepts seem to us even more inadequate than those relating to employment. While we support the concept of the two-tier approach, we find the proposed benefit levels inadequate to meet even minimal standards. We strongly urge that these be reconsidered and indexed to cost of living changes and be adjusted to the different needs of urban and rural life and regional economic realities.

We support the concept of state supplementation and maintenance of effort, but we believe that these provisions should be strengthened and that the federal participation in state supplementation should be continued even where the state pays benefits above the national poverty level. Particularly, as I indicated earlier, the nature of New York City's economy results primarily from national policies outside its control. We urge that it is the responsibility of the federal government to carry a greater proportion of local welfare costs.

United Neighborhood Houses believes that one of the greatest weaknesses in the bill is the lack of substantial preventive social services. We urge that such services, in addition to those already available under Title XX, must be an intrinsic part of the bill in order to prevent deterioration of communities as well as of individuals. Our survey indicated, for example, that specific additional services were needed by almost 60 percent of the respondents. While the largest number requested housing assistance, other requests included additional health assistance, homemaker services, new job and educational services, more feasible transportation and more adequate information and referral to those social services that currently exist. We urge that adequate social services, whether provided by voluntary or public agencies, are essential to aid the poor to break out of the welfare cycle, to enable former welfare recipients to become and remain self-sufficient and to develop appropriate attitudes toward education and work. Quality child care is indicated as the most essential service both to enable parents to work and for the good of the children themselves.

We also have found that the food stamp program is vitally needed by many, particularly those who are elderly or are low income workers who are unwilling to seek cash assistance because they fear the welfare "stigma." We believe that a revised food stamp program available to those who do not receive public assistance should be added to the welfare bill.

Finally, we urge that voluntary community-based agencies, such as the settlements, should have a far greater opportunity to contribute to the design and operations of the welfare system. To this end, we believe we should be given an opportunity to participate in the redraft of many of the basic proposals, especially where they relate to determination of incentives and program administration at the local level. We believe that our experience could be useful in the planning of transition arrangements at the local level and in the assessment and evaluation of changes as they are implemented. We ask to be a partner in the coordination and cooperation required by welfare programs in the belief that we can make a practical contribution to the formulation of a better system.

A REPORTER'S REPORTER

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. VENTO. Mr. Speaker, in tribute to a dedicated news reporter and good friend, Paul Presbrey, I would like to enter the following editorial by Bob Johnson of the St. Paul Pioneer Press-Dispatch in the CONGRESSIONAL RECORD. Paul Presbrey was truly a reporter's reporter who had all the skills and virtues young journalists, and even some experienced ones, envy. He was bright, quick, courageous, honest, and had a knack for being in the right place at the right time to get a story. His sudden death last week is a great loss to every Minnesota citizen who ever read his news reports and benefited from the information and insights he provided. It is especially fitting that this fine editorial epitaph appeared not in the newspaper for which he worked, the Minneapolis Star, but in the St. Paul Pioneer Press-Dispatch, its chief competitor.

The article follows:

AND THERE WAS PRESBREY

Paul Presbrey was a man who never gave up. In the finest sense of the phrase, he never grew up, either. Paul was a reporter for the Minneapolis newspapers and much of his time was spent covering St. Paul—us—for them. He was a helluva competitor, managing to stay at least three steps ahead of everyone, most of the time.

Paul died in his St. Paul home this week of the heart attack he knew was coming. He'd had experience with heart attacks, and with hospitals. The former he regarded as inevitable in his case, the latter was to be avoided at all costs. "Most people die in hospitals," he said by way of explaining why he wouldn't go, or wouldn't stay when they carried him in.

He simply decided to keep running until he was hit. He didn't like being sick and he certainly gave no impression of eagerness to die. He simply figured it was better to go all-out as long as he could. He was 67.

Paul Presbrey was an unusual reporter. They don't make 'em like that anymore, if they ever really did. That is to say, maybe he was the last of the great reporters; maybe he was unique. His job was getting The News. He lived it, and made a batch of side jobs simply help him along his main course. Twin Cities news circles are full of Presbrey stories: both friends and enemies contribute to the legend. Paul comes out a real tough guy who wouldn't let bonds of kin or friendship stand in the way of the story. He wouldn't and lots of people hated Presbrey. Mostly, they didn't know him.

Lots of other people, including his closest competitors, developed a wary affection for him, and learned how much he really cared—about news stories, about his friends, about his family.

Now, Presbrey earned his reputation as a reporter to watch out for. He got onto stories, he got the stories and saw them reach print—even if this last required a tip to a competitor if his own editors seemed a bit obtuse. But the lesson of Paul Presbrey, the magic of that reoprter, is so far from cynicism and amorality that it is hard to teach to those who would succeed him.

Paul Presbrey never gave up. It's that simple. Once he got a story he pursued it with imagination and tenacity until he had it. This for the Front Page big ones and the little items as well. And through all his years on the job his curiosity and interest never faded. He could get as excited as a fifth-grader over what he was working on, right up until the end.

You not only need equipment of brass to be a Paul Presbrey, you've got to stay something of a kid all your life as well.

REEXAMINATION OF AMTRAK'S ROUTE

HON. JOHN W. JENRETTE, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. JENRETTE. Mr. Speaker, an appropriations conference committee has directed the Department of Transportation, in cooperation with Amtrak to undertake "a comprehensive reexamination of Amtrak's route structure from a zero base."

The object of this analysis, according to the conferees, will be to recommend a route structure that will provide "an optimal national railroad passenger system based on current and future market and population requirements."

In my opinion, such a study is badly needed and is long overdue. I will not presume to instruct the Members about how Amtrak's original route structure was created under severe pressures of time and conflicting regional requirements. Or how Amtrak's route structure has grown helter-skelter since. In the 6½ years of its existence, Amtrak has been directed by the Congress, by various Secretaries of Transportation or by the States to add routes in 34 States and three Canadian Provinces.

I am not sure that the intercity passenger route structure which was chosen in the first place was the optimum one or that additions made in the interim were the best possible ones. We all have suffered from the lack of an objective comprehensive study of the national rail passengers system—as a system—and particularly as it relates to our total transportation network.

Now, within a few months, we can expect that the Department of Transportation will give us our first comprehensive analysis of our national rail passenger system.

My question is very simple. We have waited for 6½ years and we already have invested approximately $3 billion in train operations and new stations and

equipment. Can we not wait a few more months?

Amtrak's management is currently—on the basis of budgetary considerations alone—dismembering our national route structure train by train. The requirement to live within available operating funds for this fiscal year can only force a series of costly and traumatic route discontinuances before we have a chance to study adequately the full impact of those cancellations or the possible alternatives.

Amtrak was created in 1971 as a matter of public policy. It is being dismantled in 1977 without a full examination of what has been built; what is worth saving or—and this concerns me deeply—of the cost of restoring this system if we find some day we are left with alternatives which are far more costly in the long run.

I urge that a way be found to provide minimal funding for the continued operation of the present Amtrak system until we and the executive branch of Government are satisfied that we are operating on the basis of facts and for the long-term best interests of this Nation.

RACIAL QUOTAS THREATEN SMALL BUSINESS

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. ASHBROOK. Mr. Speaker, I have been informed by a small contractor in my district that, for the second time in 10 days, he has been refused a State contract because he is the wrong color. This announcement would have horrified my liberal colleagues a few years ago, but not today. That is because the contractor is white.

This year, the Carter administration pushed through a provision of the Public Works Employment Act which requires that at least 10 percent of the funds allocated under the act be spent on contracts awarded to minority firms. The contractor mentioned above was the only bidder for two recent contracts, but the State had to refuse him and is now out looking for someone who is the right color.

This liberal policy of racial quotas has a tremendous human cost, besides being blatantly unconstitutional. The small contractor I have been discussing employs 125 workers, 25 of them from minority groups. They and the families who depend on them represent a total of at least 400 people, each of whom is being hurt because one man is of the wrong race.

Liberals talk incessantly about "humanity." These racial quotas demonstrate once again that this fake concern has nothing to do with real people. The 400 living, breathing human beings being hurt by racial quotas in this case, and the tens of thousands like them throughout America, are of no importance to self-righteous leftists.

To racist, statist liberalism, the sufferings of human beings in the name of their ideology means nothing, and the Constitution less than nothing.

FED UNDERMINES URBAN POLICY IN CHOICE OF SUBURBAN SITES

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. REUSS. Mr. Speaker, the selection of a suburban rather than central location in Miami for a new branch of the Federal Reserve Bank is unfortunate, and should be reversed. The location of Federal facilities, which also influences where other businesses that deal with these agencies locate, can be a crucial factor in efforts to save the central city and preserve jobs in the areas where they are most desperately needed.

Beyond the unfortunate Miami decision, the Federal Reserve must promptly reconsider its recently adopted guidelines on site location for facilities. These guidelines, which favor suburban locations for future Fed facilities, clearly contradict the administration's emerging efforts to encourage central city economic development.

The following editorial in the Miami Herald of November 19, 1977 addresses this issue forthrightly:

FED BRANCH BELONGS IN DOWNTOWN

The Federal Reserve Board should heed the advice of Rep. Henry Reuss and reconsider its decision to locate its Miami branch at a suburban site west of Miami International Airport.

A downtown site had been recommended by the manager of the local branch of "the Fed" and by the Bank's regional headquarters in Atlanta.

Those recommendations, based on an understanding of the financial community to be served by the new facility, made good sense from several points of view.

For one thing, development of the bank on a downtown site would be consistent with the efforts of numerous federal programs to bring renewal and employment to America's urban-core areas.

For another, the development of a mass transit system will make a centrally located facility relatively more convenient for employes and customers alike than a facility in a location far from transit service.

Further, as Rep. Reuss points out, the cost estimates that the Fed used to justify selecting a remote site are highly questionable.

As he observed, "Nowhere does the cost analysis deal with the public costs of building additional infrastructure, employe costs for additional transportation, or the bank's own additional costs of being widely separated from its clientele in downtown Miami."

Branding the Board's decision as "clearly contrary to the Administration's emerging urban policy of encouraging central city economic development," Rep. Reuss added that "it is foolish and wrongheaded for the nation's central bank to adopt an approach that fails to take into account the associated public costs and social consequences of central city decay and urban sprawl."

Well said, Mr. Reuss. How about it, Mr. Burns?

FEDERAL AID TO EDUCATION

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. DEL CLAWSON. Mr. Speaker, it is a matter of concern to some of us who frequently vote against high-priced Federal aid to education programs, which we consider of low value, that our votes may be interpreted as indifference to the educational needs of American young people. Newsweek magazine of November 14, 1977, however, contains an editorial which I believe refutes that inference. A sensitive and dedicated teacher describes her painful discovery of just how far the present system falls short of realizing basic educational goals. The editorial by Susan Britt Jordan entitled "I Wants To Go to the Prose," follows:

"I WANTS TO GO TO THE PROSE"

(By Suzanne Britt Jordan)

I'm tired—and have been for quite a while. In fact, I think I can pinpoint the exact minute at which I first felt the weariness begin. I had been teaching for three years at a community college. I had, for quite a while, overlooked ignorance, dismissed arrogance, championed fairness, emphasized motivation, boosted egos and tolerated laziness. I was, in short, the classic modern educator.

One day a student, Marylou Simmons, dropped by my office. She had not completed a single assignment and had missed perhaps 50 per cent of her classes. Her writing, what little I saw of it, was illogical, grammatically incorrect and sloppy. "Can I help you, Marylou?" I said cheerily, ever the understanding and forgiving teacher. Her lips began to tremble; her eyes grew teary. It seemed she had been having trouble with her boyfriend. "I'm sorry, but what can I do?" I asked. Suddenly all business, Marylou said, "Since I've been so unhappy, I thought you might want to just give me a D or an Incomplete on the course." She smiled encouragingly, even confidently. That's when the weariness set in, the moment at which I turned into a flaming conservative in matters educational. Whatever Marylou's troubles, I suddenly saw that I was not the cause, nor was I about to be the solution.

NAMBY-PAMBY COURSES

When I read about declining SAT scores, the "functional illiteracy" of our students, the namby-pamby courses, the army of child psychologists, reading aides, educational liaisons, starry-eyed administrators and bungling fools who people our school systems, my heart sinks. Public schools abide mediocre students: put 18-year-olds, who can't decide what to wear in the morning, into independent study programs; excuse every absence under the sun, and counsel, counsel, counsel. A youngster in my own school system got into a knife fight and was expelled for one week. I noticed in the paper that bus drivers regularly see riders smoking marijuana and drinking wine on the bus at, for God's sake, 8 in the morning. I could go on, but the public knows well enough the effects of a system of education gone awry.

Consider for a moment what caused the mess. A few years ago people began demand-

ing their rights. Fair enough. They wanted equal education under the law. I'm for it. Social consciousness was born. Right on. Now, enter the big wrong turn, the one that sent our schools into never-never land. We suddenly, naïvely, believed that by offering equal opportunities we could (1) make everybody happy, (2) make everybody well-adjusted, (3) forgive everybody who failed, and (4) expect gratitude to boot. When students were surly, uncooperative, whiny and apathetic, educators decided they themselves didn't know how to teach. So they made it easier on the poor, disadvantaged victims of broken homes, the misfits, the unloved. Well and good. But the catch to such lofty theories is evident. Poverty, ignorance and just plain orneriness will always abound. We look for every reason in the world for the declining test scores of our children, except for stupidity and laziness.

A CURMUDGEON SPEAKS

I'm perfectly aware that I sound like an old curmudgeon and it frightens me more than it offends you. But I have accepted what educators can't seem to face. The function of schools, their first and primary obligation, is not to probe tender psyches, to feed and clothe the homeless, nor to be the papa and mama a kid never had. The job is to teach.

The teacher's job is to know his subject, inside out, backward, forward and every which way. Nothing unnerves a student more than to have a teacher who doesn't know his or her stuff. Incompetence they cannot abide. Neither can I.

Before educators lost their way and tried to diversify by getting into the business of molding human beings, a teacher was, ideally, someone who knew a certain body of information and conveyed it. Period. Remember crochety old Miss Dinwiddie, who could recite 40 lines of the "Aeneid" at a clip? Picture Mr. Wassleheimer, who could give a zero to a cheating student without pausing in his lecture on frog dissection. Every student knew that it wasn't wise to mess around with a teacher who had the subject down cold. They were the teachers we once despised and later admired.

I want them back, those fearsome, awe-inspiring experts. I want them back because they knew what a school was for and didn't waste any time getting on with the task at hand. They were hard, even at times unjust, but when they were through, we knew those multiplication tables blindfolded with both trembling hands tied behind our backs.

Before the schoolmasters and the administrators change, they will have to shake off the guilt, the simpering, apologetic smiles and the Freudian theories. Which is crueler? Flunking a kid who has flunked or passing a kid who has flunked? Which teaches more about the realities of life? Which, in fact, shows more respect for the child as a human being?

Just today I talked to a big loud bruiser of a football player who wants to learn the basics of grammar. I didn't tell him it was too late. You see, he was a very, very good football player, so good that he never failed a course in high school. He had written on a weekly theme, "I wants to go to the prose and come fames." He may become a pro, may even become famous, but he will probably never read a good book, write a coherent letter or read a story to his children. I will, however, flunk him if he does not learn the material in the course. My job means too much to me to sacrifice my standards and turn soft. Suppose that every time my student played football badly, the coach said it was "just a game." Suppose the coach allowed him to drink booze, stay up all night, eat poorly and play sloppily. My student would be summarily dismissed from the team or the team would lose the game. So it goes with academic courses.

LIFE IS REAL

The young people are interested, I think, in taking their knocks, just as adults must take theirs. Students deserve a fair chance, and, failing to take advantage of that chance, a straightforward dismissal. It has been said that government must guarantee equal opportunity, not equal results. I like that. Through the theoretical fog that has clouded our perceptions and blanketed our minds, we know what is equitable and right. Mother put it another way. She always said, "Life is real; life is earnest." Incidentally, she taught me Latin and never gave me air in a jug. I had to breathe on my own. So do we all.

BOYCOTT REGULATIONS UNDERMINE CONGRESSIONAL INTENT

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. EILBERG. Mr. Speaker, I am distressed to hear continuing reports that the Department of Commerce is formulating regulations which seriously undermine the intent of Congress when it passed legislation to prohibit American compliance with the Arab economic boycott of Israel.

That legislation is aimed at protecting U.S. citizens from discrimination which could result from American participation in the boycott, and as such it upholds basic democratic principles.

Now, we learn that the Commerce Department has proposed regulations which would seriously invalidate the clearly stated goals of Congress when it approved this legislation.

The administration, Mr. Speaker, is on record as having made a full commitment to effective antiboycott legislation. In light of this commitment, I hope that President Carter and Secretary of Commerce Kreps will reevaluate the proposed regulations before they go into effect on January 18, 1978.

I commend to my colleagues the following summary of the proposed regulations, as reported in the November 25, 1977 issue of the Jewish Exponent, of Philadelphia:

AGENCIES CRITICIZE BOYCOTT RULES

NEW YORK.—Three major Jewish organizations have sharply criticized proposed regulations issued by the U.S. Commerce Department to implement the new federal antiboycott law as "contrary to the legislation," adding that its proposals would "subvert the thust and purpose of the anti-boycott statute."

The American Jewish Committee, American Jewish Congress and Anti-Defamation League of B'nai B'rith outlined three new significant sections of the proposed regulation, which, they charged, would "distort legislative intent and action and undermine the objectives embodied in the new statute." These areas are the "unilateral selection," "local law" and "risk of loss" sections of the proposed legislation.

In the legislation, the agencies declared, Congress enacted exceptions for specific, limited situations. However, they continued, the Commerce Department regulations interpret these exceptions so broadly as to vitiate the entire thrust of the law.

For example, in the unilateral selection section, the agencies declared "Congress intended to place the burden on the foreign buyer making a boycott-based selection to do so without assistance from any U.S. person. The proposed regulations, however, ignore both statutory language and legislative history by permitting a U.S. person to provide a foreign buyer with invaluable assistance—in the form of management, procurement and other pre-award services—before the foreign buyer makes his boycott-tainted selection."

The three Jewish agencies, which acted on behalf of the six national and 101 local constituent agencies of the National Jewish Community Relations Advisory Council, called on President Carter to honor his commitment to effective anti-boycott legislation by "significant strengthening" of the proposed regulations.

The Commerce Department issued its implementing regulations on Sept. 21. They are scheduled to take effect on Jan. 18, 1978.

Excerpts from the text of the three agencies' statement follows:

"The recent hearings of the House Government Operations sub-committee on Commerce, Consumer and Monetary Affairs, confirm our view that the regulations as proposed seriously distort legislative intent and action and undermine the objectives embodied in the new statute. At the least, the proposed regulations reflect in part an apparent unwillingness on the part of the Department of Commerce to come to terms with key aspects of the anti-boycott legislation.

"Congress strengthened the Export Administration Act to prohibit most forms of compliance with foreign dictated boycott demands directed against friendly countries and U.S. persons. In so doing it forthrightly acted against the increasingly unacceptable and pervasive requirements being imposed on citizens and businesses of our country by the Arab boycott—requirements which are discriminatory in nature and which strike at the fundamental moral and commercial underpinnings of the U.S.

"As responsible legislation, the statute also provided for a limited number of exceptions to the prohibitions in recognition of certain rights of sovereign states and to allow normal commercial transactions generally unrelated to a boycott. But in affording these limited accommodations, Congress made clear that these exceptions were subsidiary elements in the overall legislative scheme to prohibit boycott compliance and were to be construed narrowly and be subject to nonevasion principles.

"By this legislation Congress affirmed that commercial relations with boycotting countries, however important they may be, cannot occur at the expense of basic American principles and at the cost of our national self respect.

"As to 'local law,' Congressional hearings made it clear that only in specific, limited situations, tied to a 'national interest' test, would a U.S. resident of a boycotting country be permitted to engage in activity that was boycott-related. Yet despite the existence of clear legislative history rejecting an across-the-board approach to the availability of this exception, the proposed regulations provide for its unbridled use by U.S. residents of a boycotting country.

"In addition, whereas the statute permits a U.S. resident in a boycotting country to comply with the boycott when importing specific products solely 'for his own use,' the regulations misinterpret these words to mean 'for another person's use.' Thus, the regulations consider as being 'for his own use,' components that are to be 'incorporated into

(a) product . . . to be manufactured or constructed for another.' Similarly goods to be placed 'in general inventory for subsequent resale' to other persons are also considered 'for his own use.'

"Finally, the proposed regulations permit use of a novel 'risk of loss' clause which provides that a seller's liability would not end at the point he delivers merchandise to a carrier selected by the buyer, as is the normal commercial practice, but would continue until the goods have reached and passed through customs in the foreign port of entry.

"Obviously, merchandise entering an Arab country which was manufactured by a blacklisted U.S. corporation is subject to confiscation by the overseas custom's authorities. Thus, insistence on such a clause has the 'chilling effect' of preventing blacklisted companies from fairly competing for business in the Arab world.

"We have already expressed our objection to the timing of a recent trip undertaken by representatives of Commerce, State and Treasury Departments to the Middle East to explain the proposed regulations, as premature and prejudicial to our rights during the public comment period.

"We firmly trust and hope that the professed commitment of the President and Secretary of Commerce Kreps, as well as a recognition of the imperatives set out by the statute and legislative history, will result in the legitimate and crucial modifications we support."

JOSE VARGAS

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. PATTERSON of California. Mr. Speaker, Jose Vargas, a Santa Ana, Calif., police officer and a naturalized American citizen since 1968, has been chosen as one of the top 10 police officers in the Nation by the International Associations of Police Chiefs.

Officer Vargas first entered the United States at the age of 16 as an illegal immigrant. He was caught and returned to Mexico by the border patrol each of the dozen times he entered the United States.

Eventually, he married an American citizen, became a legal resident and brought his widowed mother and five brothers and sisters to the United States from San Martin Hidalgo, Jalisco, Mexico.

Jose worked for 7 years as a garbage collector by day and worked toward his goal of becoming a police officer by night. He learned English, obtained a high school diploma, attended Fullerton Junior College, and finally, at age 33, became a U.S. citizen and police officer.

In 1975, Jose Vargas transferred to the Santa Ana Police Department and is assigned to the highly successful community relations unit. Vargas' work with the Spanish-speaking community in Santa Ana has been instrumental in fostering the goodwill and cooperation now evident between the Santa Ana Police Department and the community.

Vargas teaches English as a second language classes, orientation classes to Mexican-born residents, works in the Spanish drug awareness program, is active in the League of United Latin American Citizens (LULAC), is an advisor for a Christian oriented drug rehabilitation program, and attends Cypress College. He is both mother and father to his eight sons, including one foster child.

Perhaps Jose Vargas can best be described as he was in the letter of nomination by his chief, Ray Davis, "Joe's entire life has become one dedicated to service such as usually seen only in a member of the priesthood."

CONGRESSIONAL CLEARINGHOUSE ON THE FUTURE

HON. CHARLES ROSE III

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. ROSE. Mr. Speaker, from time to time I like to inform my colleagues in the House and Senate about the activities of the Congressional Clearinghouse on the Future, a small information-gathering group I and 10 of my colleagues helped organize in April 1976.

Since our beginnings almost 2 years ago, Anne Cheatham, our director, and our advisory committee have led the Clearinghouse through a series of successes. Membership has grown from 10 Members of the House to over 60 Members of the House and Senate. A part-time staff of one has grown to a fulltime staff of three with several part-time assistants. And our activities have swelled from a simple monthly newsletter to a collection of services geared to all levels of congressional activity.

The goals of the Clearinghouse are:

First, to assist Members of Congress and their staffs in their efforts to become aware of the ways in which the future is affected by today's decisions.

Second, to help House committee members implement rule X, section 2(b)(1), which states that—

> . . . All committees and subcommittees (except Budget and Appropriations) shall on a continuing basis undertake futures research and forecasting on matters under the jurisdiction of that committee.

And to help committees of the Senate initiate similar foresight activities.

Third, to provide Members of Congress with information about trends which may shape the future.

Fourth, to identify citizens interested in the future and to assist Members of Congress as they make contact with these individuals. We have established the following ongoing activities to meet our goals:

First. The publication of a monthly newsletter;

Second. The seminar series, "Dialogues on America's Future";

Third. Formation of a congressional talent bank;

Fourth. The development of a trend evaluation and monitoring (TEAM) program;

Fifth. Identification of citizen participation projects around the country which are working on the future.

WHAT'S NEXT?

Our monthly newsletter, What's Next?, is full of suggestions about ways we can begin talking about the future with the people back home. Articles appear which explain how various futures research groups function and how they might aid our committee staffs.

An index of the CONGRESSIONAL RECORD is included every month noting entries we make that are directly related to the future. Recent issues have included articles on House and Senate foresight hearings, President Carter's involvement with the goals for Georgia program, reviews of books and periodicals in the field, and announcements of Washington area activities.

"DIALOGUES ON AMERICA'S FUTURE"

The seminar series, "Dialogues on America's Future", is designed to bring together, for the purpose of dialog, Members of Congress and noteworthy individuals who are thinking provocatively about the future. We have heard such well-known personalities as Alvin Toffler, author of "Future Shock," Dr. Margaret Mead, Dr. E. F. Schumacher, author of "Small is Beautiful: Economics as if People Mattered."

Herman Kahn, director of the Hudson Institute, Prof. Jay Forrester of MIT, and Ted Gorden of the Futures Group have spoken to us about growth issues and the economic stresses which result. Barbara Marx Hubbard, chairperson of the Committee for the Future, Arthur C. Clarke, author of "2001: A Space Odyssey," and Isaac Asimov, science fiction writer, have shared their visions about outer reaches of our society. Hazel and Carter Henderson, directors of the Princeton Center for Alternative Futures, and Elizabeth and David Dodson Gray, directors of the Bolton Institute, have spoken about trends in institutions and in individual lives which may have important implications for our future survival.

Willis Harman of Stanford Research Institute and Dr. Elise Boulding of the University of Boulder, Colo., have shared their feelings about the human value changes which are emerging in this transition time. And finally, Buckminster Fuller and John Kenneth Galbraith have simply inspired us to think—more creatively, more intuitively, more humanely—about the future.

Mr. Speaker, the gifts brought to us by these speakers as part of this "Dialogues" series have been incalculable. It is impossible to measure what has happened to the over 125 Members of the House and Senate who have attended these monthly dinners, but surely we are not the same as we were before we heard them.

CONGRESSIONAL TALENT BANK AND TEAM

The Clearinghouse has also created a congressional talent bank composed of individuals from all around the country who are willing and eager to help us look at legislation from future point of view. The Clearinghouse is a clearinghouse, and so we have sought out those already engaged in futures research and forecasting, and we have asked for their help. So far, over 25 committees and subcommittees in the House and Senate have used the talent bank, and requests are coming in from others.

Talent bank members come from all walks of life: business, industry, educational institutions, and government. Also, the talent bank includes invidivuals and groups who are active in citizen participation programs. By talking with these citizens who have a "futures outlook," we will be able to take more seriously our foresight responsibility.

The Clearinghouse is also developing a trend evaluation and monitoring (TEAM) program. Congressional staff people who are directly involved in the TEAM project monitor over 70 periodicals and regularly analyze abstracts in these four categories: science and technology, social sciences, business and economics, and politics and government.

Quarterly briefings for our colleagues will alert us to those issues most likely to be in the headlines several years from now. This trend identification program, Mr. Speaker, is just another example of the fine, innovative thinking which has characterized the Clearinghouse on the Future since its creation.

OUR CITIZENS AND THE FUTURE

And finally, Mr. Speaker, one of the most important emphases of the Clearinghouse has been in the area of citizen participation. We recognize the need to talk about the future with our people back home. We know their frustrations with continuing crises. We know their anger. We know their disappointment.

We believe that the citizens of this country must become engaged in the process of setting goals if we are to expect them to adopt the goals we name.

All of this information which the Clearinghouse so readily shares is very valuable, Mr. Speaker. We must learn to anticipate in this time of rapid change if we are to survive. As C. P. Snow said:

The sense of the future is behind all good politics. Unless we have it, we can give nothing either wise or decent to the world.

TRIBUTE TO ED DEAL

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. ANDERSON of California. Mr. Speaker, on December 9, 1977, Ed Deal will step down as president of the Long Beach District Board of Realtors, a position he has filled most successfully during the past year.

Walter Edwin Deal was born in Gainesville, Ga. on March 4, 1915. He received his education in the State of Georgia and served in the Navy in World War II.

Ed has been a respected member of the community since he first moved to Long Beach on March 4, 1966. He worked in electrical engineering at the Phillips' Electric Co. and then decided that real estate was the business he preferred. He has spent 25 years in property management and real estate.

As director of the California Real Estate Association and a member of the International Real Estate Federation, Ed has been highly regarded by his associates in the business. He worked diligently to bring about the defeat of the property transfer tax in the city of Long Beach. He is very active in city, county, and State politics.

When he is not busy with community involvements, he enjoys singing in a barbershop quartet.

Along with Ed's wife Thelma and their children, Eddie Jr., Nancy, Gary, and Larry, my wife Lee and I share an appreciation of Ed's civic awareness and many humanitarian contributions.

HUMPHREY-HAWKINS STILL A BAD BILL

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. ASHBROOK. Mr. Speaker, after much revision, the Humphrey-Hawkins bill is back with us once again. Despite the changes, however, it is still a bad piece of legislation.

Like most liberal schemes, the Humphrey-Hawkins bill displays a remarkable faith in the power, wisdom, and ability of the Federal Government. It is premised on the belief that the Government can successfully manipulate the marketplace so as to provide a perfect economy. Nothing could be further from the truth.

Nationally syndicated columnist James J. Kilpatrick hit the nail on the head when he stated:

Even in its remodeled form, the Humphrey-Hawkins bill embraces all the bankrupt notions of conventional liberalism.

Let me dwell upon the most fallacious notion. This is the notion that in a free society, the most fundamental forces of human nature and of the marketplace can be successfully manipulated by the power of government. It simply is not so . . .

No matter how its purpose is camouflaged, the sole idea of Humphrey-Hawkins is to impose The Plan. The sponsors cling to the naive, simplistic notion that a few bureaucratic wise men can devise a Plan that will bring us an economic millenium.

The Humphrey-Hawkins bill offers no economic panacea. It is still a bad piece of legislation which deserves to be defeated.

Following is the full text of Mr. Kilpatrick's article which appeared in the November 17 Washington Star:

STILL A DEPLORABLE BILL

(By James J. Kilpatrick)

All of a sudden, the Humphrey-Hawkins bill is back in the news, and if you want a piece of bad news, that's it. No matter how this misguided proposition is watered down or prettied up, it remains pure folly. In the friendliest possible fashion, out of deference to its principal sponsor, the bill ought to be permanently shelved.

The Humphrey-Hawkins bill is the brainchild of Sen. Hubert H. Humphrey of Minnesota and Rep. Augustus F. Hawkins of California. In its original form, as presented to the 94th Congress two years ago, the bill proposed an elaborate blueprint for centralized government planning and control. Ostensibly the idea was to get unemployment down to a level of 3 percent, chiefly by invoking grandiose schemes of public employment; in actuality, the idea was to create a vast bureaucracy with massive powers over the entire economy.

In its revised form, born again from political necessity, the bill is superficially more palatable. The most objectionable features of the original proposal have been deleted; a nice passage has been added to treat the theme of inflation. Economic goals are now stated more realistically. Greater emphasis has been placed upon the needs of black youth.

And it's still a deplorable bill. It cannot be transformed into a good bill. As a sagacious old Virginia legislator used to say, this year's version is the same old 'coon with another ring around his tail. Even in its remodeled form, the Humphrey-Hawkins bill embraces all the bankrupt notions of conventional liberalism.

Let me dwell upon the most fallacious notion. This is the notion that in a free society, the most fundamental forces of human nature and of the marketplace can be successfully manipulated by the power of government. It simply is not so.

In a totalitarian society, the notion will work. It may work badly—in the Soviet Union, it plainly has worked badly—but it cannot work in a free society. We keep tinkering with bits and pieces. The recent minimum wage bill offers one example. Temporarily, many bottom-rung workers will appear to benefit. Before long the inflationary impact will be felt on everyone.

The Humphrey-Hawkins approach holds the prospect of infinitely greater disaster than a minimum wage bill. No matter how its purpose is camouflaged, the sole idea of Humphrey-Hawkins is to impose The Plan. The sponsors cling to the naive, simplistic notion that a few bureaucratic wise men can devise a Plan that will bring us an economic millennium.

The sponsors think in terms of an annual Full Employment and Balanced Growth Plan. In theory the Plan would apply only to government programs, but the theory has no meaning; federal power is now locked so tightly into the structure of private economic activity that any presidential proposal, if enacted, must affect the private sector.

In its original form, Humphrey-Hawkins would have required that the federal budget be shaped to achieve the state economic goals. Under the revised version, no substantive powers of enforcement appear to be proposed. But if this is so, the bill becomes a nullity. It would amount to little more than a hearty recital of so many New Year's resolutions. Presumably, everyone favors less inflation and more employment. If Humphrey-Hawkins were no more than a windy assertion of good intentions, it could be passed by acclamation on Monday and forgotten on Tuesday. The bill is not so sweetly innocent.

Sad to say, we are hearing in Washington a sales pitch of desperation. The bill must be

passed, we are told, as a tribute to the ailing Sen. Humphrey. He is one of the most loved statesmen of this century. He suffers inoperable cancer. While there is yet time, it is suggested, the bill should be passed in his honor.

Nonsense! A worse reason for passing a major bill scarcely could be imagined. There is now being established in Minneapolis a Hubert H. Humphrey Institute of Public Affairs. If those who want to honor a beloved American will throw their money and their energy into the institute, that will be memorial enough. We ought not to remember a very good man through a very bad bill.

THE GROWTH OF GOVERNMENT: WHO BENEFITS?

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. ROUSSELOT. Mr. Speaker, the rapid growth of government in the past decade—a growth that has produced enormous budget deficits which threaten the stability of the economy and the living standards of all Americans—was made possible by the attitude that government always serves the public's interest. More government was taken to mean that more was done in the public's interest.

Lately, however, this attitude is changing. Not only has it been discovered that government often serves special interests to the exclusion of the public's, but also that government serves its own interest. We are beginning to discover, as are our constituents and scholars who study the process, that too much of what we do is in the interest of building political machines for Federal bureaucrats. It is a lot harder to justify huge deficits when people see them as being mainly in the interest of bureaucrats and special interests.

The American people are increasingly coming to feel that they have been colonized by their own government. I want to call my colleagues' attention to an article in The Intercollegiate Review by Paul Craig Roberts, a scholar from the Hoover Institution at Stanford University, and former chief economist for the minority on the House Budget Committee. Dr. Roberts puts the growth of government in a new perspective which we all need to consider.

The article follows:

THE POLITICAL ECONOMY OF BUREAUCRATIC IMPERIALISM

(By Paul Craig Roberts)

A person born before the turn of the century was born a private individual. He was born into a world in which his existence was attested by his mere physical presence, without documents, forms, permits, licenses, orders, lists of currency carried in and out, identity cards, draft cards, ration cards, exit stamps, customs declarations, questionnaires, tax forms, reports in multuplicate, social security number, or other authentications of his being, birth, nationality, status, beliefs, creed, right to be, enter, leave, move about, work, trade, purchase, dwell.

He was born into a world in which a person could travel anywhere on the face of the earth, excepting Russia and Turkey, without need of a passport, visa, or identity card. He was born into a world of freedom of movement of people, money, and ideas. A confident 19th century futurology predicted that the 20th century would find him freer still.

But by the time of the First World War, the world into which he was born was on its way out. And the period since has been one of the growing autonomy, not of the individual, but of the state. He was born in a century that pulled down walls and lived out his life in the century walls—whether made from iron, or barbed wire, mine fields, and machine-gun towers, or from paper—the barbed wire of documents—20th century walls are by-products of the universal bureaucratization of life. In place of the 19th century's autonomous individual, to whom some romantics romanticized all things were permitted, we have the 20th century's autonomous state to which, as Dostoevsky predicted and Lenin declared, all things are permitted.

The private individual is an extremely recent and precarious invention. A central question of our century is whether he is a mere momentary caprice of history.

Many people take private individuals for granted, and they will find what I am saying farfetched. But private individuals do not exist in the Soviet Union or in China where the claims of the state are total and even art and literature must be subservient to the interests of the state—as the recent expulsion of Solzhenitsyn reluctantly reminds the wistful hopes of a weakened West. Neither do private individuals exist in many of the emerging nations where change consists only if replacing the subordination of the person to tribe or caste with subordination to the modern activist state.

But my topic is not one of communism versus democracy. My argument does not turn on the form of political system but on the self-interest of bureaucrats and their beneficiaries and allies, whatever the form of the political system.

Just as private individuals do not exist today in the Soviet Union or in China, they did not exist in ancient Egypt. Nor were they prevalent in the Europe of the Middle Ages. Private individuals were the creation of the social revolution that created private property.

I do not use the term social revolution lightly as do academic sociologists who find a social revolution everytime students change their hair styles or sex habits. I am speaking of a social revolution which, along with the reaction to it, comprises the social, economic, political, and intellectual history of Western civilization from the 12th century through the present.

THE RISE AND FALL OF THE PRIVATE INDIVIDUAL

The Social Revolution through which private individuals were created hand-in-hand with the creation of private property began with the Inclosures in the 12th century and attained its greatest flowering in the 19th century. Prior to the appearance of private property, private individuals did not exist. There existed only the rulers and the ruled, lords and serfs.

A serf was a person who did not own his own labor. Although he was not himself owned by another, that is, he could not be bought and sold like a slave, the feudal nobility, the state of that time, had rights over the serf's labor. When we say that a peasant was enserfed, we mean that he owed a certain amount of his working time to the state. Over time and regions this obligation seems to have averaged about one-third of a serf's working life.

In turn the serf had use-rights in the land. The same social revolution which abolished the serf's use-rights in the land abolished the state's use-rights in the serf's labor. The same social revolution which created private property in land and capital created private property in labor. Serfdom disappeared as wages appeared. As Karl Marx recognized, "Wages and private property are identical."

Reaction to this great social revolution began with it, and over most of the course of this revolution, reaction was identified with conservatism. But what was really happening was that as different groups—landowners, merchants, capitalists, and laborers—attained specific private property rights—in land, trade, capital, and labor—each group had an incentive to gain control of the state as a means of advancing its specific property rights at the expense of others. A "reactionary" was merely whoever had control of the state at a point in time and was defending his interest against the interests of others. As different groups in different times gained control of the state, each in turn passed from the offensive to the defensive and were automatically turned into conservatives, which meant they wanted to conserve their interests. But no group felt its property rights secure unless it controlled the state. Each identified progress with the advancement of its property rights.

Historians have often confused this strife between different property interests with an alleged reaction of property against democracy. But whichever property group was in power, it would tend to see democracy as the right of others to vote away its property. Democracy was thus confined to voting by members of the group whose property interest was dominant. This greatly limited the power of government because any claim to act in the public interest was quickly recognized for what it was.

Although each property group had an accurate assessment of the threat of government to its interests, each group mistakenly saw its interests as divergent from the interests of others, and each preferred to unite with government against the property interest of others. However, in spite of the strife among its beneficiaries, the social revolution of private property was inexorable, and the real reactionaries were swept aside.

But the revolution was never quite completed. Just as the various property groups began to realize, under the influence of Adam Smith and others, their common interests and unite against government per se, the greatest reactionary of them all, Karl Marx, appeared and began a new counter-attack against the on-going social revolution. Like some of the earlier reactionaries, Marx knew exactly what he was reacting to. He was reacting to private individuals. According to Marx, man is only individualized through the creation of private property: "Man originally appears as a generic being, a tribal being, a herd animal." Private property "makes the herd animal superfluous and dissolves the herd."

Marx's counter-attack was the work of genius. According to Marx, the private individual is rootless, powerless, alienated, and unfree. He only appears to be free, but as an individual actor he must bear the consequences of his own action; yet as an individual actor he has no control over his life because he is affected by, but has no control over, the actions of others. Thus, the divergent actions of private individuals produce consequences beyond the control of all, and a private individual is the victim of his own individuality.

Marx's solution is to do away with the private individual and return to the herd animal. Herd animals do not act as individuals and therefore they do not have to bear uncontrolled consequences of private actions. Instead they act as a community, or the State acts for the community. Marx's genius launched the career of a new class of professional rulers—the bureaucrats. In the Soviet Union and China this class is known as the

Communist Party and in the United States and Europe it is known as the civil service.

As Marx and his followers translated his esoteric argument for the masses, it came out: "It is not government that exploits, but private property." To Lenin, to Mussolini, to Hitler, to European socialists and statists of all hues and colors, and to their counterparts in the United States who go under the name of liberals—a curious perversion of a name that originally designated one who stood for the interests of private property against the interests of the state—to all of these this meant that progress could be realized only through government. The strife this century between the various statists has overshadowed their common agreement that government action is the instrument of progress.

My liberal acquaintances are generally proud of what they see as the progressive nature of their view that government is the instrument of social progress. It is unknown to them that they share this view with the great reactionaries of history. My liberal acquaintances become annoyed when I quote from Mussolini and from Camelot liberals on the state as the instrument of social progress, and they find that they cannot tell them apart. But I generally lose their friendship when I point out that Alexander Herzen published an open letter to Czar Alexander of Russia in 1857 protesting the Czar's idea that government action is the instrument of progress.

Many people are not aware of the extent of bureaucratic involvement in private life. Usually I find that people, whether my students, my academic colleagues, or my mailman, see themselves under the thumb of big business and multinational corporations. They generally look to government for protection, which means that each wants government to overrule any private action that each does not see in his interest. Government, of course, is anxious to oblige because in this way it gains power over all private actions. Let me give two recent examples which have left even some statist liberals shaken.

A female student at the University of Georgia failed in her efforts to be chosen by her fellow students as sports editor of the student newspaper. In petty spite she filed a discrimination complaint with HEW, and this cabinet level agency quickly involved the United States government in the matter of the students' selection of the sports editor of their newspaper.

U.S. District Judge Wilbur Owens instructed the Board of Regents of the University System of Georgia to use involuntary transfers of faculty members between system institutions to achieve racial balance among the faculties. As long as the involuntary transfers of teachers was intra-city and confined to elementary and high school teachers, my liberal colleagues saw it as social progress. But once they faced inter-city involuntary transfers, they called it fascism. It is true that until the liberal progress of the 1960s, government direction of labor in this century was unique to the Hitler and Stalin regimes. As is often the case, people realize the consequences of statist ideas only when their own private individualities are touched.

But examples such as these are unlimited and many are so horrific that they are unbelievable until they touch us individually. Let me instead sum up the success of the reactionary forces in this century in simple economic terms. At the turn of the century government in the U.S. had a claim to only one-eighth of the national income. By 1970 government had a claim to one-third of the national income. In relative terms our position is no different from that of a medieval serf who owed the state one-third of his working time.

SERFDOM AND THE BUREAUCRATIC STATE

It is true that the statists owe their success partly to technological change which raised national income through time. If people are better off in absolute terms, they may not notice that they are worse off in relative terms. But statists mainly owe their success to the power of reaction in the 20th century. It is striking that it has required little more than a half century to reverse a social revolution that had been on-going since the 12th century. When you hear a liberal say that you cannot repeal the 20th century, all he is saying is that in the 20th century statist reactionaries have repealed the 19th and 18th centuries and have us on our way to reenserfment.

Many may reject this parallel. They may say that we have a democratic government controlled by the people, and that high taxes and big government merely reflect the voters' demands for public goods in the public interest. Such an argument is reassuring but problematical. The income tax was voted in under one guise and retained under another. Furthermore, it was the action of a past generation. For us it is an inherited obligation, as were feudal dues, and it is seen that way by the Internal Revenue Service. All of us have been born to the statist gospels. Any clamors for tax reduction are translated into proposals for tax reform, which are further transformed into proposals for securing more revenues for government.

The public interest remains what it has always been—the interest of those who speak in the name of the public. Few who understand the workings of democracy, or any form of government, will claim that a public interest can prevail over divergent special interests. Individual citizens find that their time is spent in going about their jobs and ordinary affairs. The cost is large to any single individual of organizing a constraint on bureaucratic power, and the gains to him are not clearly identifiable. He tends to hope it will be done by someone else because in that event he shares the benefits without incurring the costs.

But precisely because they do have special interests offering them identifiable gains, bureaucrats and their beneficiaries have incentives to enlarge the scope of government. Today legislation is originated by bureaucrats who unlike politicians are life peers and cannot be voted out of office.

Since the bureaucracy's position is the strongest, and since the benefits to its members of more government are large and easily identifiable, it is unlikely that a democracy offers the ruled any more control over the rulers than did feudal serfdom. In fact the medieval serf may have been in a stronger position than the ruled of today. The feudal state was constrained by custom and tradition, and the medieval serf was more intelligent than his 20th century counterpart. He would immediately see through any king or noble who might claim he was raising taxes in the public interest. This is the reason that the power of government in a kingdom is less than the power of government in a democracy. No king could claim to speak in the name of the people or to act in the public interest without arousing suspicion. The power of governments which historians cavalierly term autocratic was extremely small. No king ever had draft laws at his disposal. The universal draft originated with the democrats of the French Revolution and has ever since been a feature of democracy. Perhaps the only case in which the rulers can be controlled by the ruled is when government is small, and if government is small, its form is of little consequence.

BUREAUCRATIC UNDERMINING OF THE MARKET

Our founding fathers were products of the great social revolution of which I have spoken. As such they believed that God had created people as private individuals and not as herd animals. Not trusting governments with God's handiwork, they attempted to design a political system that would preserve the private individual against the self-interest of government. But any viable federalism as a means of checking the power of government was destroyed by the Civil War. Since that time bureaucratic power has been limited only by an on-going market system. To the extent that markets work, there is no need of government. Once this was realized by bureaucrats and their allies, they saw their vested interests in arguments that markets do not work and in policies assuring that indeed they did not work. The great depression launched their battle to beat back the constraint that a market system placed on bureaucratic power. All of economic and social policy and the predominant economic and social theory since that time can be explained in these terms.

This is a new explanation of social and economic theory and policy, and it may be difficult for people born to statists gospels to follow. After all, it is taught in every college and university in the country, and it is printed in virtually every economics textbook, that government economic policy is conducted in the public interest to achieve economic stability, to prevent recessions and inflations, to protect the public from monopolies and from unemployment and eroding purchasing power. It is true that many have noticed that the record of government social and economic policy is one of dismal failure, but the general conclusion has merely been that bureaucrats make errors like anyone else and lack sufficient power, that better minds are needed in positions of more power.

Such a conclusion is possible only if the assumption is that bureaucrats attempt to act in the public interest and merely fail. But if we assume that bureaucrats act in their own interest, as do other groups and individuals, public failures are transformed into bureaucratic successes.

Some people are sufficiently sophisticated to notice that bureaucrats are quick to use every opportunity to feather their nests and enlarge their budgets and powers. But I am saying more. I am saying that there is no coincidence whatsoever between the interest of bureaucrats and the public interest. I am saying that government social and economic policy is the tool of bureaucrats for self-aggrandizement and is inimical to the public interest.

Before we had activist government economic policy, we had small government and lots of little ups and downs called the business cycle. These ups and downs were used as an excuse for a activist government economic policy to smooth them out and replace the business cycle with uniform stability. With activist economic policy not only came big government but the worst long-term depression and inflation in our history, that is, chronic economic instability. Many people have puzzled why the Federal Reserve and the Treasury always do the wrong things—even when they are run by Milton Friedman's teachers and colleagues.

But the trouble with this way of puzzling over the matter is that it assumes the bureaucracy has an interest in economic stability. Whereas any given President has an interest in economic stability for the period of his re-election campaign, no one else in government has an interest in economic stability. Put simply, economic stability does not increase the demand for bureaucrats and their services or for pork-barrel legislation to deal with the consequences of instability.

It is easy for government to cause economic instability, and it can always rely on its allies among the liberal academics to blame the instability that government causes on the private sector. All government needs to do is intervene in markets and disrupt them,

or shrink the money supply, or increase the money supply faster than business and labor can produce goods. The resulting instability becomes the excuse for increases in government programs and in the supply and power of bureaucrats. If government wishes to take control over an industry and to facilitate the takeover by placing the industry in a bad light with the public, it can begin by causing inflation. Then on the grounds of fighting inflation, government can impose price controls and cause shortages. At this point its academic allies can begin alleging conspiracy among the businessmen. The result will be rationing and government determined production schedules, followed by a decline in profitability, subsidies, and then nationalization.

If government wishes to increase its share of the national income relative to the private sector, all it needs to do is cause inflation. Inflation allows government to increase its share of national income in three ways: (1) with the progressive income tax system, inflation drives people into higher tax brackets, thus increasing government's claim on their income and the government's relative share of national income, (2) the inflation that government causes can be blamed on excessive consumer spending, and an increase in taxation can masquerade as a scientific economic policy to fight inflation, (3) through the inflation tax on money.

The reason all countries suffer inflation is not because it is not known how to prevent it, but because inflation increases the powers and incomes of governments.

THE ACADEMIC ALLIES OF THE BUREAUCRATIC STATE

My references to the academic allies of the bureaucracy may annoy some, although others may be proud of the connection. The subject of the academic alliance with the bureaucracy is an essay in itself. I have shown how economic policy since the Great Depression can be understood in terms of the bureaucracy's interest in inefficacious markets, that is, in markets that do not work. As I said, also, that economic theory itself could be understood in these same terms, I must now provide some argument in support. Many believe the popular misconception that economists are class-biased lackeys of capitalists whose science is an ideology for the market, and they may even misinterpret what I am saying as evidence in support of this misconception. Indeed, many economists themselves prefer this misconception because it provides a disguise that conveniently masks whose lackeys they really are.

On the surface it may look like economists are not sufficiently relevant to be anyone's lackeys. Large expanses of modern economics are inscrutable even to many economists. But if one strips away the reified jargon and mathematical symbols and looks at what the economists who dominate the profession have been doing for the last forty years, one sees that they certainly have not been providing an ideology for the market. Rather, they have been providing a rationale for big government, whose handmaidens they are.

The two subjects which have dominated theoretical economics during this period are externalities and Keynesian macroeconomics. The externality literature is replete with the concepts of "market failure" and "social costs." The purpose of this literature is to discredit the efficacy of the market on a microeconomic level. The Keynesian literature is replete with unemployment equilibrium. The purpose of this literature is to discredit the efficacy of private saving and investment decisions and the market on a macroeconomic level. The justification of big government as scientific economic policy is precisely the purpose of the most famous diagram in post-war economics—the "Keynesian cross"—a diagram that is familiar to every student who has had an economics course during the last quarter century. This diagram is devoid of economic content and is solely a propagandistic rationale for the efficacy of big government.

It does not surprise me that economists fashion their theories to serve the interest of the state rather than the interest of private enterprise. After all, it is in their self-interest. Private enterprise does not provide the research grants that are the bread and butter of the influential social scientists. These grants come from the National Science Foundation, the National Endowment for the Humanities, the U.S. Department of Health, Education, and Welfare, the U.S. Department of Labor, and so forth. Neither can private enterprise provide the positions of power which academics enjoy as cabinet ministers and Presidential advisors. Any social scientist who can discover a social problem that can be parlayed into a new federal program is set for life.

The conspiracy of bureaucrats and their alliance with academia is unwittingly protected by the naive world-view of liberals who believe that all good fellows from public actions and all evil from private actions. The liberal is the easy dupe of the bureaucrat because the liberal's outlook is highly simplified: On the one hand he sees the public interest, identified with government, self-evident and beyond questioning by an upright person; on the other hand he sees private interests, selfish, sinister, and illegitimate. As a result of the pervasiveness of this outlook, the public learns in schools, colleges, universities, and from the news media to be suspicious of the private businessman and to look with favor upon government interventions as acts in the public interest. I expect that the informal inculcation of this attitude will soon become official educational policy in the U.S., just as it is today in Sweden—a country totally ruled by bureaucracy.

THE BUREAUCRATIC STATE IN SWEDEN AND WEST AFRICA

This conspiracy and alliance is far from being unique to the U.S. and can be found in most every country. I will conclude with remarks on its manifestations in Sweden and in West Africa.

In Sweden the "new left" is subsidized by the bureaucracy to discover social imperfections because each imperfection justifies an increase in state power to correct the imperfection. The Swedish "new left" may have convinced itself that it is revolutionary, but in fact it is either an agent or a dupe of the bureaucratic state.

The imperialistic rule of the Swedish bureaucracy has been established since the late 18th century when King Gustaf III, under the influence of the French Enlightenment, toyed with the idea of a nation of private individuals and was promptly assassinated by his bureaucracy which felt its prerogatives threatened. The imperialistic rule of the Swedish bureaucracy is the standard to which our own aspires. But it is in the lands that most shrilly accuse the West of imperialism that the imperialistic nature of indigenous bureaucracy stands out most starkly. The voluminous writings about imperialism are just another mask behind which hide the real imperialists. Let me strip away the mask.

In some nations of West Africa there are state export monopolies, or marketing boards as they are officially described, that extend their control over practically all agricultural products. These boards were set up ostensibly to stabilize the prices received by private farmers. African farmers, if they wish to sell their crops, must sell to the state marketing boards at prices set by the boards. The boards in turn sell the crops on the world market. The original idea supposedly was that during years of high world market prices, the boards would hold back part of the proceeds from the producers in order to provide a reserve for years when world market prices were low. In this way incomes were to be stabilized.

When these state monopolies were introduced, categorical, formal, official assurances were given that the marketing boards would serve as trustees and agents for the private producers and that no money would be withheld overall from the farmers. In the words of the supporters of the marketing monopolies:

"There will be no question of the boards making a profit at the expense of West African producers. On the average of a period of years, the average price paid to the producers will be equal to the average net price realized on world markets, and the boards' buying and selling transactions will, therefore, approximately balance."

By 1962 the state marketing monopolies had withheld between one-third and one-half of the commercial values of their crops from the producers in Nigeria and Gold Coast-Ghana. The total sum withheld exceeded two billion dollars! The political changes and upheavals in Nigeria and Ghana in the 1960's stopped the publication of consistent statistical information on the operations of the marketing boards, but the evidence indicates that the state marketing monopolies continue to be the instrument of exploitation of those whom they were ostensibly set up to help. What was supposed to be state help to private producers has resulted in prolonged large-scale confiscation of their incomes.

What has become of this huge sum stolen from the poorest elements of the populations by their own governments? Some of it was lost in currency devaluations, but much of it was transferred to cover current operating expenses of the governments. In effect, a productive sector of the population, whose money income is minuscule, has been kept poor by being taxed at rates equivalent to those levied on American annual incomes of $50,000 to $140,000! The consumption and investment of West African farmers have been throttled in order that civil servants and government officials can enjoy relatively high incomes.

This makes it clear why West African governments have been such vociferous consumers of the anti-western imperialist diatribes that originate in the West. It is always in the interest of indigenous imperialists to support the argument that the country is exploited by foreigners.

Indigenous imperialism has been obscured by an assumption underlying the economic theory of public goods which asserts that governments act not in their own interests but in the interests of others—the "public interest." Economists who use the "public interest" assumption to analyze the state sector simultaneously assume that other organized groups and individuals act in their self-interest. This dichotomy in the economists' assumption about behavior protects indigenous imperialism under the mask of benevolence.

Such exploitation of agricultural export producers as has occurred in West Africa retards economic development. The lack of progress is then taken as evidence of the need for greater amounts of foreign aid. The government-to-government grants that characterize "foreign aid" allow the recipient governments to consolidate and extend their control over their citizenry. The situation is made even worse by the fact that many of the African government leaders have been products of Western universities and have little sympathy for the culture of those they govern.

The real beneficiaries of foreign aid are the international organizations, those who control political power in the recipient countries, those who staff the foreign aid agencies of the giving countries, and the Western professors

who advise on economic development schemes. I once served in a state university as the academic replacement for a professor who had just purchased a $60,000 home and gone on an AID mission to India for two years. His pay for his mission to the poor was $30,000 per year plus expenses, and it allowed him to pay off his mortgage on his return. One of his colleagues had gone on a similar mission to South America and bragged to me that he had "salted away $30,000." Such "missions" which let academics save at annual rates of up to twice their normal incomes explain the great popularity among professors of foreign aid and all arguments that justify it. He who hasn't got his yet can hope to in the future. Western taxpayers who are assuaging "guilt" for the poverty of underdeveloped countries are fattening the pocketbooks of others, but the others are not the exploited farmers of West Africa.

It is clear that the state marketing monopolies are supported not by the producers whose incomes they confiscate, but by officials of governments and international organizations and their academic handmaidens. As the boards came to accumulate huge reserves by exploiting the farmers, price stabilization gradually receded as the argument for their existence. Now it is said that the boards are necessary to raise taxes to finance economic development and to control inflation. In other words, the agricultural producers are going to be imperialized to the end.

The rationale for the marketing boards is clear. They are one more result of the cult of state power which serves the material interests of a new class of planners, academics, state functionaries, and international civil servants—a class which appropriates the wealth of others under the guise of the "public interest." These salaried do-gooders are the new imperialists.

CONCLUSION

I hope what I have said will be interpreted as a call to arms and not as a counsel of despair. There are still some intellectually honest men and women. Within the limits of their talents they can do much. Those who cannot be bought can analyze the lack of coincidence between the public interest and the interest of government. They can strip away the various moral guises behind which hides the self-interest of government, and leave the statists unmasked, naked in their greed.

We can learn to apply the logic of skepticism universally and not just toward the private sector. When John Kenneth Galbraith, Ralph Nader, Common Cause, and the Secretary of HEW claim to speak in the public interest, we can be just as suspicious as we would be if the presidents of General Motors and U.S. Steel claimed to speak in the public interest. If we can increase the sophistication of the public just a bit, we can have them jump the gap between amusement over the idea that "What is good for General Motors is good for the country" to amusement over the idea that what is good for HEW is good for the country. One day we may have the modern democrat as sophisticated as the medieval serf who, when told by his noble master that his taxes were going up in the public interest, thanked his Lordship for his concern but told him no thanks, the public be damned.

RESOLUTIONS SUPPORT H.R. 9954

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. WEISS. Mr. Speaker, on November 17, the council of the city of New York unanimously passed two resolutions introduced by council member Frederick E. Samuel. Both resolutions support H.R. 9954, a bill I introduced providing that the Secretary of Housing and Urban Development may not approve any application for rental increases in federally assisted housing unless the amount of such increase is permitted under State and local law. The resolutions follow:

Resolution calling upon the Congress of the United States to pass H.R. 9954, introduced by Congressman Theodore Weiss, providing that the Secretary of Housing and Urban Development may not approve any application for rental increases in federally assisted houses unless the amount of such increases is permitted under State and local law

Whereas, the Federal Housing and Urban Development Administration has adopted a policy of pre-empting and Bypassing Local Rent Control Laws of the City of New York and thereby allowing the imposition of exorbitant rent increases on tenants in Federally insured buildings in New York City, and

Whereas, there are approximately 200,000 apartment buildings in New York City which are likely to be adversely affected by the present policy of the Housing and Urban Development Administration, and

Whereas, this policy has an inevitable, disastrous and devastating financial effect upon the thousands of struggling middle class residents who occupy the affected apartments and could conceivably result in large numbers of these tenants fleeing the City of New York and thus aiding in the erosion of the tax base of the City of New York—a truly frightening prospect as our city even now struggles in a continuing fiscal crisis; and

Whereas, Congressman Theodore Weiss has introduced H.R. 9954, a bill which provides that the Secretary of Housing and Urban Development may not approve any application for rental increases in Federally assisted houses unless the amount of such increase is permitted under State and local law; now, therefore, be it

Resolved, That The Council of the City of New York does hereby call upon the Congress of the United States to pass H.R. 9954.

Resolution calling upon the Federal Housing and Urban Development Administration to discontinue its policy of preempting local rent control laws of the city of New York

Whereas, the Federal Housing and Urban Development Administration has adopted a policy of Pre-empting and Bypassing Local Rent Control Laws of the City of New York and thereby allowing the imposition of exorbitant rent increases on tenants in Federally insured buildings in New York City, and

Whereas, there are approximately 200,000 apartment buildings in New York City which are likely to be adversely affected by the present policy of the Housing and Urban Development Administration, and

Whereas, this policy has an inevitable, disastrous and devastating financial effect upon the thousands of struggling middle class residents who occupy the affected apartments and could conceivably result in large numbers of these tenants fleeing the City of New York and thus aiding in the erosion of the tax base of the City of New York—a truly frightening prospect as our city even now struggles in a continuing fiscal crisis; now therefore, be it

Resolved, that the Council of the City of New York, calls upon the Federal Housing and Urban Development Administration to discontinue its policy of Pre-empting Local Rent Control Laws of the City of New York, and be it further

Resolved, that copies of this resolution be transmitted to the Housing and Urban Development Administration, the President of the United States, the United States Senators from the State of New York, to each member of the New York Congressional delegation, the Mayor of the City of New York and the City Conciliation and Appeals Board.

WHAT KIND OF TAX CUT

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. RHODES. Mr. Speaker, for some time now many Republicans in the House have been calling for an across-the-board tax cut to stimulate the economy and to provide for the millions of new and real jobs we need, not only to cut present unemployment, but also to provide for those preparing to enter the labor force.

The soundness of this approach was demonstrated in the results of the tax cuts enacted during the Kennedy administration, and we Republicans believe it will work again. That is why we have united behind the Roth-Kemp tax cut proposals, which would reduce taxes an average of 33 percent over the next 3 years.

Unfortunately, until very recently this administration has been so mesmerized by the concept of tax reform that it has largely ignored the need for a solid tax cut. Now, we are hearing noises indicating that this administration may at last have gotten the message, and that the American people may well get a tax cut next year.

However, as the Wall Street Journal pointed out in a cogent editorial on Tuesday, November 29, there are many ways to approach a tax cut, not all of them necessarily helpful toward improving our economy. The key, as this editorial notes, is the particular theory with which tax cuts are approached.

For an excellent discussion of the likely outcome of various approaches, and why the Roth-Kemp approach is the soundest and most beneficial, I urge my colleagues to read the following editorial:

WHAT KIND OF TAX CUT?

Reports from all hands, official and unofficial, are that sometime after the first of the year President Carter will propose a "tax cut." And for the time being, go the same reports, he's going to pretty much shelve his plans for "tax reform." Instead of trying to close tax loopholes available to the well-to-do, he's going to concentrate on "stimulating the economy."

Assuming these reports are correct, the business community would still be wise to withhold enthusiasm until it has a chance to look this gift horse in the mouth. What kind of tax cut? Precisely how does one go about designing a tax cut to stimulate the economy? On what theory will this tax cut be based?

So far, Mr. Carter and his advisers seem to be operating on what might be called the right-paystub-box theory. His tax "cut," we hear, will "offset" the planned increases in Social Security taxes and energy taxes. We hear no talk at all of a comparable offset to the tax increases that result when inflation drives taxpayers up through the progressive rate schedule, so it appears that in fact taxation will continue upward. If you can manipulate the tax burden out of the wrong

little box on the paystub and into the right one, the theory seems to run, the economy will be stimulated.

As time goes by Mr. Carter and his advisers will no doubt graduate to the Keynesian theory, which is that tax cuts stimulate because they increase the federal deficit. The deficit drives the economy and needs to be "fine tuned." The record deficits of recent years are not enough to keep recovery going. The impending fiscal '78 deficit of over $60 billion three years into recovery needs to be further expanded. Government spending is already going to grow by nearly 15 percent, so we have to get the rest of the needed deficit by cutting taxes.

This theory, incidentally, leaves plenty of room for "doing good." If it suits your taste, you can confiscate all income above, say, $50,000, calculate that this will produce revenues of $5 billion, and scatter the $5 billion in "rebates" or to the poor. Since the deficit will be unchanged, there would be no economic effect. In accord with this theory, Mr. Carter is being pushed to substitute tax credits for tax exemptions, a $250 credit in lieu of a $750 exemption. This has the effect of lowering the tax bite on people who are in a tax bracket lower than 33 percent and increasing the marginal rate for everyone above 33 percent—all, of course, in the name of "stimulating the economy."

But when you go back into history to find tax cuts that have in fact succeeded in stimulating the economy, you do not find such redistributionist schemes. The Kennedy-Johnson cuts of 1962-1964, for example, simply cut rates across-the-board—to 70 percent from 91 percent on the top brackets of personal income, to 14 percent from 20 percent at the bottom, and to 48 percent from 52 on corporate income.

President Kennedy and his advisers tinkered their way through the same problems that President Carter is chewing on, starting with martini lunches and working through one-year cuts that looked a lot like rebates. But the Keynesianism of some advisers was tempered by another theory held by some in the administration and particularly by Ways and Means Chairman Wilbur Mills. They believed that tax cuts stimulate not by boosting demand, but by providing greater incentives to production.

The current Roth-Kemp tax proposal endorsed by the Republican congressional leadership is explicitly based on this theory, and closely patterned after the Kennedy-Johnson cuts. The bill would cut personal income tax rates by 30 percent over three years (roughly the 1962-'64 magnitudes), slide the corporate rate to 45 percent from 48 percent and raise the surcharge exemptions on smaller business to $100,000 from $50,000. Senator Roth and Congressman Kemp believe that people would work harder, investors would invest more, and the economy would grow more rapidly, because everyone could see greater rewards not only in a given year but stretching into the future.

Even this kind of tax cut, it should be said, cannot cure all of the problems of the economy overnight. The Federal Reserve would have to go on fighting inflation. Any stimulative effect could be offset by the dead hand of regulation keeping the economy from responding. No tax cut will help if government spending runs wild, siphoning off through the credit markets whatever additional resources are produced.

A general tax cut is well worth trying, though, provided it is not shaped by perverse theories. The key is to let producers keep more of what they produce, and the biggest effect will come from cutting rates where they are the highest. If the tax cuts reduce rather than improve rewards for the economy's most gifted, talented and skilled producers, they will be worse than nothing at all.

ANTI-TERRORISM ACT OF 1977

HON. JIM LLOYD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. LLOYD of California. Mr. Speaker, I have introduced legislation aimed at combating skyjacking and terrorism which threaten the safety of air passengers around the world.

In the first 6 months of this year, 33 acts of air piracy occurred. These actions left 14 dead and 42 injured. Bomb threats against U.S. airports and aircraft have reached the level of 120 per month. Over half of all skyjacking attempts are successful. More than a third of all skyjackers are still at large. Some of these fugitives have been harbored by other nations.

The Anti-Terrorism Act of 1977 will show these nations, and countries who condone other forms of terrorism, that we will not tolerate governments aiding or encouraging terrorist activities. The act imposes penalties, including a cessation of all direct and indirect flights from these nations to the United States. Airports not meeting minimum U.S. security standards may have direct and indirect flights curtailed.

Some of the nations fitting the definition of aiding terrorist activities include North Korea, Cuba, Libya, Algeria, Yemen, Lebanon, and Uganda.

Further economic penalties would be imposed on such nations. Trade and aid of any item on the U.S. munitions list, and of nuclear technology would be prohibited.

A summary of the legislation follows:

H.R. 10086

TITLE I—REORGANIZATION OF THE EXECUTIVE

(1) Establishing a Council to Combat Terrorism in the Executive Office of the President.

(2) Council membership is as follows:

a. Secretary of State.
b. Secretary of the Treasury.
c. Secretary of Defense.
d. Secretary of Transportation.
e. The Attorney General.
f. U.S. Ambassador to the United Nations.
g. Director of Central Intelligence.
h. Assistant to the President for Domestic Affairs.
i. Director of the Federal Bureau of Investigation.
j. Assistant to the President for National Security Affairs, or their delegates.

(3) The Council shall report to Congress the identity of individuals involved in terrorist activities and a description of their activities. The report shall include a list of nations abetting such individuals or groups. The list shall be known as List of Countries Aiding Terrorist Enterprises (LOCATE). Congress shall have the power to review and change the LOCATE list.

(4) All direct and indirect flights from LOCATE countries shall be suspended.

(5) Sale or transfer of items on the U.S. Munitions List shall be suspended to LOCATE countries.

(6) Export or transfer of nuclear material, technology and equipment shall be prohibited to LOCATE countries.

(7) Further economic sanctions may be imposed.

(8) Airports not meeting minimum U.S. safety standards shall be identified. Economic sanctions may be imposed on countries where these airports are located.

TITLE II—POLICY ON INTERNATIONAL AGREEMENTS

(1) Compliance with the following international agreements is declared a priority:

a. Convention for the Suppression of Unlawful Seizure of Aircraft.
b. Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation.
c. Convention on the Prevention and Punishment of Crimes Against Internationally Protected Persons.

(2) Strengthening nuclear non-proliferation efforts are also declared a priority.

(3) All explosives shall be placed on the U.S. Munitions List.

TITLE III—EXTENSION OF SAFETY AND SECURITY MEASURES

(1) Existing safety and security requirements are extended to charter and commuter air services.

(2) Explosive taggants are mandatory on all items shipped into and within the U.S.

TITLE IV—AIRCRAFT SABOTAGE AND PIRACY

(1) Violations of the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation shall be $10,000 and not more than 20 years.

(2) Threats against an air facility or false information given in relation to a threat or actual terrorist activity shall be punishable by no more than five years and from up to $1000 to $5000 in fines.

NAVY LAMPS HELICOPTER SHOULD BE TEST CASE FOR NEW DOD CONTRACT-SPLITTING POLICY

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. EDGAR. Mr. Speaker, last Monday, November 21, 1977, the Wall Street Journal ran an article by Kenneth H. Bacon which discussed in some detail a newly adopted Defense Department policy that, in an effort to control the cost of major weapons, contracts will be split between two manufacturers.

The premise of this policy, that competition restrains costs, is precisely the one which I made repeatedly this year to the Defense Department during the competition between the Boeing Vertol Co. and Sikorsky Aircraft on the Navy's LAMPS helicopter. Under current DOD policy, manufacturers compete only in the design and development phase. Once one prototype is selected, one manufacturer is guaranteed 100 percent of the production work, for years to come, no matter how inflated their production costs become. There is no incentive to maintain cost discipline.

So I commend the Defense Department for adopting this new policy. It is certainly worth a fair test, and the newspaper article indicates some that are planned. I would like to urge one other: The Navy LAMPS helicopter. When DOD announced in September that Sikorsky had won the prototype competition, it stated that Boeing Vertol's helicopter was equally capable. Without some helicopter production work over the next few years, Boeing Vertol will have difficulty staying in the helicopter business to com-

pete in 10 years or so when the next major system is proposed. During that 10 years, Sikorsky will have little incentive to maintain its cost discipline, and the public will pay.

Because Boeing Vertol has a quality product, because this is precisely the sort of "feast or famine" situation referred to by DOD's Research and Engineering chief as undesirable, and because the LAMPS program has not yet reached the production phase, this situation seems to be an ideal one with which to test the new policy. I have asked Secretary Harold Brown to consider this proposal, and I am awaiting his reply.

I would like to share with my colleagues the full text of the Wall Street Journal article:

PENTAGON TO TRY AWARDING CONTRACTS FOR SAME WEAPON TO 2 MANUFACTURERS

(By Kenneth H. Bacon)

WASHINGTON.—The Defense Department, hoping that more competition will help control the cost of major weapons, plans to experiment with awarding two manufacturers contracts to make the same weapon.

Contractors currently compete to design and develop complex new weapons. But then one company wins the production contract—sometimes worth billions of dollars—on a winner-take-all basis.

William Perry, Under Secretary of Defense for Research and Engineering, says the Pentagon plans to experiment with two-source manufacturing of some newly designed weapons. If the test works, "We will certainly consider that possibility for every program where purchases are made in big volume over a long period of time," he says.

Pentagon planners believe arms makers will work harder to hold down costs and look for production efficiencies if they have to compete to make sales to the military. "We aren't talking about giving the first few years (of production) to one contractor and the last few years to another," he explains. Instead, the Pentagon wants to be able to compare costs and "determine on a year-to-year basis whether it will be a 50–50 or 70–30" division of the business between the two competitors, he said to illustrate.

CRUISE MISSILE ENGINE

The Pentagon is considering seeking two manufacturers for the jet engine of the cruise missile, the super-accurate, low-flying weapon currently under development. Williams Research Corp., of Walled Lake, Mich., the privately held concern that developed the powerful, 126-pound engine, would be one of the manufacturers but it may have to share production of the thousands of engines the Pentagon is expected to buy.

In addition, Mr. Perry says the Pentagon may seek competitive production of the Copperhead, a laser-guided, 155-mm. artillery projectile being developed by Martin Marietta Corp., and of certain parts for the General Dynamics Corp. F16 fighter plane. He stresses that the plan would be possible only for weapons purchased in large quantity.

Under current practices, several companies often receive contracts to design a new plane or missile. Next, for most weapons, two companies receive advanced-development contracts under which they build prototypes. A production contract is then awarded to one of the companies on the basis of its prototype's performance and the cost estimates it submits to build the weapon. Thus, competition stops when production begins. The idea behind the new plan is "to maintain a competitive environment even through the manufacturing process," Mr. Perry explains.

Mr. Perry concedes that the Pentagon may be "trading off" the benefits of big production contracts, which promise certain manufacturing efficiencies, for the anticipated cost discipline of competition. But "there's an absence of quantitative data" on this, he says.

"FEAST OR FAMINE"

In favor of dual manufacturing, Mr. Perry notes that the current "winner-take-all" system leads to "feast or famine" for many defense contractors. "If we can reduce the feast or famine aspect of working for the government, we will be doing industry a great service" by reducing some of the uncertainties of undertaking highly complex weapons-development work, he says.

Mr. Perry, who assumed supervision of the Pentagon's major weapons-development and acquisition programs in April, says he wants "to improve the government as a customer" by reducing the risks of defense work.

As part of that program, the Pentagon recently has adopted several changes in its weapons-development and acquisition policy designed to screen out unnecessary or overly costly weapons before they advance too far in the development process. One benefit will be to stop programs before they acquire large numbers of supporters in the service that's developing them, the industries making them and Congress. "The greater the constituency that's built into a program, the harder it is to kill it," he asserts.

One change is more "explicit consideration of the military need for a system and a consideration of alternative ways to meet that need" before design work even begins. This review, which used to be performed by the service building the weapon, has been elevated to the office of the Secretary of Defense.

In addition, the Pentagon is making a greater effort to prevent weapons that ultimately may prove too expensive from getting into advanced development, the stage immediately preceding production. "What has happened in the past is that we've carried a program through advanced development and then killed it because it costs too much," according to Mr. Perry.

"We want to try to answer the question of affordability" at the time the decision to enter advanced production is faced, by paying more attention to long-range budget constraints and spending plans, he says.

While the changes won't eliminate the possibility of last-minute program cancellations, billion-dollar cost overruns, poor performance and scheduling snags that have plagued some new weapons in the past, Mr. Perry hopes the changes will make these less likely.

Even small improvements could produce major savings. It's estimated that the 45 major weapons currently in advanced stages of development or production at the end of September will cost $179.55 billion to complete.

A QUESTION OF VIGOR: NOT ENOUGH OR TOO MUCH?

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. BROWN of Ohio. Mr. Speaker, I find it implausible that Dr. Vincent E. McKelvey might have been fired as the Director of the U.S. Geological Survey, as suggestd by a "high-level source in the Carter administration" quoted in the Washington Post issue of November 13, because he "barely knows" our distinguished colleague, the gentleman from Arizona (Mr. UDALL) or the Secretary of Energy, Mr. Schlesinger. I cannot believe that friendship with these gentlemen is a prerequisite for service.

It is perhaps more believable that the reason for the dismissal was that "a change would be good for the survey" or "the agency * * * was losing its vigor," as other administration officials apparently told the Post. But the evidence given in the Post report, that he spent 75 percent of his time managing one division, is hardly conclusive. The division in question is an important one, and it may well require that much attention.

I do know that Dr. McKelvey was quite vigorous—perhaps too vigorous for his own good—in advancing his view that there is a great deal of natural gas left to be found. Dr. McKelvey asserted, in a speech in Boston July 13, that studies of "geopressurized zones underlying the gulf coast—have led to estimates of as much as 60,000 to 80,000 trillion cubic feet of gas. This is an almost incomprehensibly large number. Even the bottom of the range represents about 10 times the energy value of all oil, gas, and coal reserves of the United States combined.

Unfortunately for Dr. McKelvey, his statement and other hopeful remarks about shale oil, coal and conventional gas, do not support the administration's contention that there are not enough additional domestic supplies of energy to justify an energy policy that encourages domestic energy production.

It would not be so tempting to see this conflict between Dr. McKelvey's considered scientific judgment and the administration's policy as the reason for his dismissal if this were an isolated incident. However, the identical fate befell another administration official earlier in the year.

When scientists at the Energy Research and Development Administration reported last spring that there are large quantities of natural gas left to be discovered and produced at free market prices, they ran afoul of administration efforts to drum up a crisis atmosphere about short supplies. The administration was crying "shortage" to aid the passage of the National Energy Act (in reality a tax program of unprecedented magnitude), and the suggestion by ERDA that a free market could lead to the discovery of large gas reserves was not appreciated.

The chairman of that study, Dr. Christian W. Knudsen, testified under oath before the Senate Energy and Natural Resources Committee June 23, that he was removed from the project and transferred to another ERDA job because his results conflicted with the "conventional wisdom."

No one knows yet who will be chosen to succeed Dr. McKelvey as Director of USGS, but a useful qualification might be a degree in political geology.

Mr. Speaker, I would like to insert in the RECORD at this point a copy of the Washington Post article to which I have referred, a news release from the U.S. Geological Survey and Dr. McKelvey's July 13 remarks.

[From the Washington Post, Nov. 13, 1977]

CHIEF GEOLOGIST'S DOWNFALL

(By Thomas O'Toole)

When Vincent E. McKelvey was fired last summer as director of the U.S. Geological Survey he got four telephone calls from Capitol Hill asking why.

One came from Rep. Jack Kemp (R-N.Y.), another from Sen. Bob Packwood (R-Ore.), and the other two from aides to Sen. Daniel Patrick Moynihan (D-N.Y.) and Sen. Henry M. Jackson (D-Wash.) All four callers wanted to know if politics had squeezed McKelvey from the job he'd held for six years.

The question was a good one. McKelvey was the first of nine directors in the 99-year history of the survey to be fired for any reason, including politics.

The aides to Moynihan and Jackson wanted to know if McKelvey's dismissal meant the White House wanted more control over the Geological Survey. Kemp and Packwood asked the same question a different way: was McKelvey fired because he had said the United States has more oil and natural gas in the ground than the Carter administration was saying it has?

McKelvey told his callers he didn't know why he'd been fired . . . and apparently he didn't. Which helps to explain why he was fired: so isolated had the U.S. Geological Survey been from politics in 99 years that its director could no longer read the politics of the times. To hear those who asked for his resignation, McKelvey was fired in part because he had so few friends on Capitol Hill and in the White House that he did not know he was falling from favor.

"It's no accident Vince had no more than four calls from the Hill about his dismissal," said one high-level source in the Carter administration. "He's not a political animal, which in the long run may be what did him in."

McKelvey had cultivated few political friendships. He "barely knows" Rep. Morris K. Udall (D-Ariz.), whose committee has heard McKelvey's testimony on oil and gas reserves. He doesn't know Jackson, who chairs the Senate committee that confirmed him and will consider his successor. When asked if he thought Energy Secretary James R. Schlesinger had a hand in his dismissal, McKelvey said he doubted it: "I've never been in the same room with him."

According to McKelvey, he was told by Assistant Interior Secretary Joan M. Davenport last spring that she was contemplating replacing him. Two weeks later, Davenport "accepted" McKelvey's resignation. McKelvey appealed the acceptance to Interior Secretary Cecil D. Andus, who told him he would not interfere with Davenport's decision. A letter followed from the White House signed by "Jimmy Carter" formalizing the resignation.

"The only reason Davenport gave me was that a change would be good for the survey," McKelvey said recently. "She did not explain why a change would be good for the survey."

When pressed on the reason for his dismissal, McKelvey falls back on a single speculation—age. "I'm 61," he said, "and Joan Davenport's 34. She's the same age as my son. That could be it."

But age is not the reason McKelvey was fired. Highly placed administration sources said McKelvey was replaced because the Carter administration feels the agency he directed for six years was losing its vigor. The same sources said the Geological Survey can ill afford to lose its vigor when oil and gas reserve estimates are so vital and regulation of oil, gas and coal production so important.

Capitol Hill sources point out that McKelvey did not fare well in congressional budget battles. Two out of the last four years McKelvey suffered budget cuts on Capitol Hill, even though demands on the survey were growing. The two years the survey budget was not cut it managed only modest increases that the Carter administration did not think were enough to do its job.

One source close to the White House said McKelvey spent too much time managing the survey's Conservation Division, which supervises the drilling and digging of federal oil, gas and coal leases and collects production royalties from those leases.

By McKelvey's own estimate, three-fourths of his time went to the Conservation Division. The division employs 1,500 of the 10,000 employees in the survey. It spends $75 million a year, less than one-fourth of the survey's $320 million-a-year budget.

"The survey needs somebody who's more vigorous, who will defend it better and can pattern it better to the country's needs," one source said. "To be perfectly honest, the survey needs fresh blood."

The firing of McKelvey almost went unnoticed when it was announced last July 26. The few reports written at the time gave the wrong reasons for his dismissal. The only notice given the firing on Capitol Hill came from Rep. Kemp, a Republican who tied McKelvey's dismissal to Carter's call for war on energy consumption.

The survey has had a 99-year tradition of getting its directors from slates nominated in secret ballot by the National Academy of Sciences. It is the only federal agency that does so. McKelvey was nominated in the same way and was appointed to the post by President Nixon even though he is a Democrat.

There are an estimated 25,000 geologists in the United States, a fifth of them employed by the survey in places like Denver, Flagstaff and Menlo Park and many nervous that politics has intruded into the survey's affairs. Sources inside the Interior Department insist this isn't the case.

"It is not political intrusion to want an agency director who is vigorous," one source said, "who will look at his agency from a standpoint of reorganization and how it can be patterned into the country's needs instead of the way it was 50 years ago."

As it has nine times in the past, the National Academy of Sciences has submitted a slate of nominees to succeed McKelvey and become the survey's 10th director. Davenport has interviewed four candidates and this week will interview a fifth. The White House hints it is confident that if she does not want any of the five nominees she will ask the academy for more names.

Meanwhile, McKelvey stays on as director until January. After that, he will remain as a senior geologist with no cut in salary.

McKelvey has few regrets. "They've been very gracious about it," he says wistfully. "They never asked me to clean out my desk and be gone. They've let me stay on and that's very decent of them."

[Department of the Interior news release]

LARGE ENERGY SUPPLIES REMAIN TO BE FOUND AND DEVELOPED

While traditional sources of oil and gas are finite and are not being found in pace with their rate of consumption, large supplies remain to be found and developed over the next several decades. according to Dr. V. E. McKelvey, Director, U.S. Geological Survey, Department of the Interior.

Additionally, McKelvey said, there are vast amounts of hydrocarbons sealed away in forms not presently recoverable economically, such as gas in tight formations in the Rocky Mountains, gas in black shales in the Eastern United States, and gas occluded in coal beds throughout the country.

By far the greatest potential sources of natural gas are the "geopressured" zones underlying the Gulf Coast region, both on and offshore. Limited investigations made of the region have led to estimates of as much as 60,000 to 80,000 trillion cubic feet of gas dissolved in water, and as free gas above the water zone. "This is an almost incomprehensibly large number," McKelvey said, noting that "even the bottom of the range represents about ten times the energy value of all oil, gas, and coal reserves of the United States combined.

"In addition to the gas," McKelvey said, "the water itself represents a potential source available at pressures up to 10,000 pounds per square inch and at temperatures exceeding 300 degrees F., provided ways can be found to produce, use, and dispose of it. But we very much need to know more about this potential resource. We are far from knowing how to go about realizing its possibilities at the present time, and the President's Energy Plan promises that such assessment will be made."

McKelvey's remarks about the geopressured zones were part of a talk, "The U.S. Outlook for Energy Minerals," delivered today, July 13, 1977, before a group of institutional investors attending the Tsai Forum in Boston, Mass., sponsored by G. Tsai and Company.

In a summary statement, McKelvey said that:

In the case of coal and oil shale, the extent of the resource is both large and relatively well known;

Large resources of natural gas are also believed to exist, although much less is known definitively about their extent or the technology that will be required to produce them;

Oil appears to be the least abundant of the fossil fuels, but undiscovered petroleum resources estimated at high confidence levels are adequate to justify vigorous exploration and development programs for many years; and

Estimates of the nuclear fuels are accompanied by great uncertainties, but both high and low estimates indicate that additional exploration is justified.

REMARKS OF V. E. MCKELVEY, DIRECTOR, U.S. GEOLOGICAL SURVEY

THE U.S. OUTLOOK FOR ENERGY MINERALS

[Figures indicated not printed in the Record.]

I'd like to ask your indulgence while I devote a few moments to a little exposition on terminology. I feel this is important because the term "resources" is a rubbery kind of word used to mean many different things by different people and this greatly complicates the task of defining the outlook for future energy supplies. Resources are hard enough to describe in quantitative terms because of incomplete data, assumptions that may or may not be justified, and all the other difficulties that arise where inference and extrapolation have to substitute for measurement. And the task becomes hopeless if there is no common understanding of what is being talked about in the first place.

Much of the recent confusion and argument about the extent of future energy supplies stems from the failure to distinguish between total resources and reserves, the latter being only that portion of total resources that has been found and is considered economically recoverable at any given time. Thus the Cassandra sees the comparatively small figure given for reserves and thinks that there will never be anything more. The Pollyanna sees the much larger figure for the total resource and assumes it is indeed all there and will be available whenever it is required. I know it is difficult for people accustomed to looking behind every figure in a company report, prospectus, or Form 10–K to imagine such confusion, but evidence of it shows up frequently in news articles (and editorials), speeches, magazine articles, and the like. Without aspiring to eliminating this confusion wherever it oc-

curs, I can at least specify what it is that I shall be talking to you about over the next half hour.

Figure 1 portrays graphically the relationship between reserves and total resources I just mentioned. Consider the large rectangle to be the perceived universe of a given resource—oil, gas, coal, or whatever—including the discovered and undiscovered, the economic as well as the subeconomic. The horizontal axis measures the degree of geologic assurance about the existence, size, and quality of the resource, increasing from right to left. The vertical axis indicates the economic feasibility of producing it, increasing from bottom to top. The small rectangle labeled "Reserves" represents that portion of the total resource that is known with the greatest assurance and that is considered the most feasible to produce. It is the part that has been discovered, to some extent measured, and that is considered to be recoverable at a profit with existing technology. Reserves, therefore, represent the minimum amount of a resource that can be counted on for future supply, not the maximum, as the uninformed pessimist is inclined to view them.

As the contents of the "Reserves" box are withdrawn for production, they may be replenished both by the discovery of new deposits and by events which improve the economics of production, such as higher prices, technological advances that lower costs, the removal of political or legal barriers, or other factors which make formerly subeconomic deposits worth recovering. Thus the dynamics of mineral discovery, development, and production suggest a continual flow across the chart upward and to the left as previously undiscovered or uneconomic resources are transformed by company activities into producible reserves. It follows that there can also be retrograde movements whereby reserves once established slip back into the subeconomic resource category because of falling prices, rising costs, or adverse legal or political developments. It can be a two-way street.

As the chart suggests, our knowledge of the resource varies widely. We consider that the estimates of "measured reserves," in the upper left corner, are generally accurate within 20 percent. We have considerably less confidence in our estimates of the "indicated" and "inferred" reserves which are the quantities of the resource that are believed to exist in the undeveloped, undiscovered portions of known fields. We know very much less about the resources that have not yet been discovered, but which may still be found in known districts, such as the deeper portions of the Anadarko Basin in Oklahoma. And we are really looking into a murky crystal ball when we attempt (as we do) to estimate how much oil there is in places like the U.S. Atlantic Continental Shelf where no exploratory drilling has ever taken place.

One more remark about terminology: in place of the terms measured, indicated, and inferred shown on this chart, industry generally describes reserves by the three p's—proved, probable, and possible. The definitions of the two series are not exactly equivalent but the principles are the same.

OIL

Let's now turn to oil, which last year supplied 47 percent of our energy—a record high, despite the growing realization that we ought to be shifting to other fuels. In 1976 we consumed 6.3 billion barrels, of which 43 percent was imported from other countries. Proved reserves of crude oil and natural gas liquids at the end of December were 37 billion barrels, down by 1½ billion barrels from the previous year. Production during 1976 also declined, for the fifth straight year.

So much for present conditions. They're bad enough. But what about the prospects? Has the time come to wind down the domestic petroleum industry, or are the resources there to justify investments in the expectation that vigorous production can be continued at least to the end of the present century?

Figure 2 depicts the remaining recoverable petroleum resources of the United States as estimated by a group of Geological Survey scientists as of the beginning of 1975. The figure of 34 billion barrels for measured reserves was taken from the American Petroleum Institute's estimate of proved reserves as of the same date. In addition to the proved reserves, which are fully developed and currently available for production, the API considered that 4.6 billion barrels could be made available for production by the installation of enhanced recovery techniques. These are the "indicated" reserves shown in Figure 1. Beyond these two categories of reserves is a third, estimated by the Survey group at 23.1 billion barrels, which is expected to become available as field limits are extended, new pools are found within existing fields, and the percentage of oil recovered is improved by advancing technology. Experience provides a solid basis for this expectation. For example, the API estimated at the end of 1966 that a total of 112 billion barrels would be recovered from all the oil fields that had been found in the U.S. up to that date. At the end of 1975, API's estimate of ultimate recovery for those same fields was 128 billion barrels—a "growth" of 16 billion barrels in a nine-year period. Nearly 3 billion barrels of the increase occurred in fields that had been discovered before 1920. Thus while indicated and inferred reserves are not developed, and therefore not available for current production, there is good evidence to suggest that they can be considered near-term sources of additional supply under prevailing economic conditions, and accordingly deserve to be called reserves, even though they must be ascribed a lesser degree of certainty than "proved" or "measured" reserves. The total of all reserve categories of crude oil totaled 62 billion barrels on January 1, 1975. The inclusion of natural gas liquids raises the total liquid petroleum reserve to 73 billion barrels.

In addition to current reserves, large amounts of undiscovered petroleum resources will become reserves in the future through the discovery process. We are certain of this. We are much less certain as to how much will be discovered, due to the hazards of estimating unknowns that I touched on at the outset. The Survey's Resource Appraisal Group accordingly gave its estimates as ranges reflecting the degree of assurance with specified amounts of oil can be found and recovered. In the case of undiscovered recoverable crude oil, the Group estimated that there was a 95 percent chance of finding more than 50 billion barrels, but only a 5 percent chance of finding more than 127 billion barrels. The statistical mean value of the range is 82 billion barrels. Natural gas liquids add between 11 and 22 billion barrels to the prospective liquid petroleum supply under the same probability assumptions.

These are large numbers, and the ranges given suggest something of the uncertainties underlying all estimates of undiscovered resources. There is another element of uncertainty that the ranges do not disclose. All estimates of recoverable petroleum resources contain some assumption about the portion of oil in the ground that can be profitably extracted. This value is affected by the economic, technical, and political factors I noted earlier, and is subject to change. For example, fifty years ago the petroleum industry considered that only 20 percent of the total oil had been discovered in United States could ever be produced. Currently the estimated recovery rate is 32 percent, and this latter rate was applied to the estimated totals of undiscovered crude oil in place to obtain the 50-to-127-billion-barrel range believed to be economically recoverable. It follows that if the average recovery rate continues to improve, the estimates of undiscovered recoverable crude oil would be revised upward to take this into account. An improvement to 40 percent in the present case would yield a revised range of 62 to 159 billion barrels, with a mean value of 102 billion barrels. For purposes of comparison, total crude oil production from the beginning of the U.S. petroleum industry in 1859 to the end of last year was slightly more than 122 billion barrels.

The estimates I have given suggest that a large amount of oil is still to be found in the United States, but they do not say when. The "when" is just as critical as the "how much," of course, for the really relevant aspect of resources is the rate at which they can be transformed into measured reserves through discovery and development, and thus made available for production. Our recent performance in this regard has been rather dismal: over the past two decades petroleum discoveries, adjusted for the "growth" factor I mentioned earlier, have averaged about 2 billion barrels a year—less than a third our current consumption. This has customarily been explained in terms of the prolonged decline in exploratory activity that began in 1958 and lasted until 1972, and while the argument sheds some light on the decline in supply it does not touch on the growth of demand which is the other contributor to our difficulties. The fact is that never in our history have we discovered petroleum over any sustained period in anything approaching the volumes we are presently consuming. What we did over most of the past was to discover more oil than we were then using, and bank the remainder. We have been living off the shelf for twenty-five years, and we have compounded the problem with rapidly increasing imports over the last five.

NATURAL GAS

Natural gas presents a picture very similar to oil: an overall resource position indicative of substantial supply potential appearing in sharp contrast with an immediate outlook of falling reserves and production.

Figure 3 shows the Resource Appraisal Group's estimate of U.S. natural gas resources of January 1, 1975. At the time of the estimates, measured reserves, taken from the American Gas Association's estimate of proved reserves as of the same date, were believed to be 237 trillion cubic feet. The Group estimated inferred reserves which may be found in existing fields to be 202 trillion cubic feet. Undiscovered recoverable resources were estimated to range between 322 trillion and 655 trillion cubic feet at 95 and 5 percent confidence levels, with a mean value of 484 trillion cubic feet. This compares with total cumulative production of 495 trillion cubic feet as of December 31, 1976.

So again, the resource estimates are impressive, but the rate of discovery and development is not. Keep in mind that pipelines are connected to measured reserves, and to no other component of the gas resource. The flow dynamics of oil and gas are such that only a small part of measured reserves can be withdrawn over a year's time. It follows that if measured reserves decline, so eventually must production, despite the potential in undiscovered resources. In the case of gas reserves the decline began in 1968,

and by 1974 production had peaked and was declining as well. The problem is the same as with oil: neither inferred reserves nor undiscovered resources are being found and developed at a rate sufficient to maintain measured reserves at a level adequate to sustain needed volumes of production, and they have not been, for many years.

UNCONVENTIONAL HYDROCARBON DEPOSITS

In addition to the traditional sources of oil and gas I have just mentioned there are vast amounts of hydrocarbons that are sealed away in various geologic environments from which they are difficult to recover. The rising cost of energy now makes it worthwhile to give these resources more attention than they have received in the past.

For example, the estimates of gas resources I have just given largely exclude the 600 trillion cubic feet of gas that are estimated to exist in the extremely tight sandstone formations of the Rocky Mountains. They do not include another 500 to 600 trillion cubic feet that may occur in shales, mostly of marine origin, that underly 250,000 squ re miles of the Eastern United States; or another 300 trillion cubic feet that are believed to be occluded in coal beds throughout the country where it is a source of constant danger to miners.

The challenge of all these sources is how to induce the gas to flow into wellbores at rates sufficient to justify the cost of the necessary drilling and development. In the sandstones of the Rocky Mountains experiments are being conducted with hydraulic fracturing on a much larger scale than normally employed—say on the order of ten times the volume of fluid and propellant that would ordinarily be used—to induce fractures extending laterally as much as 1500 feet from the well and vertically for 500 feet or more. While the process is expensive, the results have been encouraging, and rising gas prices may well make some portion of this source available over the next few years.

The eastern shales have been a source of gas for 150 years, and in fact the first commercial gas well in the United States was completed in a shale deposit in 1821, 38 years before the birth of the oil industry in Western Pennsylvania. But the gas comes out every slowly—wells tapping shales may produce no more than a few thousand cubic feet a day, even though they may produce at that rate for long periods of time. Coal suffers the same problem of low productivity as a source of methane, and there is some experimentation going on aimed at penetrating the coal seam on an axis parallel to its bedding plane thus providing access to several hundred feet of potentially productive section rather than vertical penetrations which might be limited to a seam thickness of six to ten feet.

By far the greatest potential source of natural gas are the geopressured zones underlying the Gulf Coast region, both on and offshore. The limited investigations that have been made of this region have led to estimates of as much as 60,000 to 80,000 trillion cubic feet of gas dissolved in water at a ratio believed to average 25 cubic feet of gas per barrel of water.

This is an almost incomprehensibly large number. Even the bottom of the range represents about ten times the energy value of all oil, gas and coal reserves of the United States combined. In addition to the gas, the water itself represents a potential energy source available at pressures up to 10,000 pounds per square inch and at temperatures exceeding 300 degrees F. provided ways can be found to produce, utilize, and dispose of it. We very much need to know more about this potential resource, and the President's Energy Plan promises that such an assessment will be made. But we are far from knowing how to go about realizing the possibilities of this resource at the present time.

In addition to these exotic gas sources, there are large amounts of heavy crude oil in existing fields that are not included in the inventory of recoverable reserves because recovery for the most part has not been profitable. A figure of 150 billion barrels has been cited as the total resource in place, and of course the recoverable fraction would be something much less, depending on the profitability of individual projects. The Getty Oil Company has for years been a leader in extracting heavy oil from its California fields by thermal recovery methods, and those of you who have looked at Getty's current Form 10–K will have noted a plan for a pilot project to actually mine the oil from a deposit in its properties in the McKittrick field from the surface to a depth of 400 feet. The deposit contains an estimated 420 million barrels of oil in place, and if the pilot operation is successful, a commercial scale facility may be built in the early 1980's.

COAL

The coal resources of the U.S. are many times larger than the petroleum resources, and much better known. There are estimated to be about 1.7 trillion tons of coal of all ranks in seams 14 inches or more in thickness to depths of 3,000 feet that have been identified by direct evidence and another 2.2 trillion tons that are postulated to exist in unmapped and unexplored areas down to 6,000 feet. These are gross figures, but they do indicate that the United States has a lot of coal that may prove extremely useful in the future.

A more meaningful figure for coal is the demonstrated reserve base, which includes identified deposits 28 inches or more in thickness for anthracite and bituminous coal, and 60 inches or more for subbituminous coal and lignite to a maximum depth of 1,000 feet for underground mining, and 200 feet for surface mining. The demonstrated reserve base is shown in Figure 4, broken down by general location and sulfur content. It totals 437 billion tons, only half of which is estimated to be producible with current economics and technology, so the recoverable reserve is something like 218 billion tons. Even this reduced figure is about 400 times last year's consumption, and contains the energy equivalent of more than two and a half times that of the oil reserves of the Middle East.

The low-sulfur coal deposits are of interest because of the restrictions on emissions of new plants and the ambient air quality standards applied to all plants. Figure 5 shows coal with less than 1 percent sulfur content analyzed by location and mining method. It says that the overwhelming portion of low-sulfur coal lies west of the Mississippi—about 800 to 1,000 miles west of it, in fact.

What it does not say is that much of the relatively small amount of low-sulfur coal east of the Mississippi is of metallurgical grade, and that burning it under steam boilers would be almost as much a crime against nature as using natural gas for that purpose. It does say that while the amount of strippable low-sulfur coal in western beds is very large, there is nearly half again as much that can only be reached by underground mining, which suffers a number of disadvantages that are well known to you. Again, remember to divide all figures in half to account for the fact that only half of the coal in place is thought to be presently recoverable.

OIL SHALE

For as long as anyone here can remember the potential for the Green River oil shale has been looked to as a contributor to the Nation's energy supply, but about all the shale deposits have produced thus far has been paperweights and table tops. Nevertheless, the amount of oil equivalent credited to the deposits is huge: more than 400 billion barrels are estimated to be contained in beds more than 100 feet thick and averaging more than 30 gallons of oil per ton, and another 1,400 billion barrels is estimated to occur in beds at least 15 feet thick averaging at least 15 gallons per ton. The distribution of these deposits is shown in Figure 6, with the bulk of the most valuable deposits being found in the Piceance Creek Basin of Colorado. In addition to the 1,800 billion barrels of oil credited to the Green River Formation, an additional 200 billion barrels are estimated to occur in low concentrations in marine black shales found in the Eastern United States—the same shales I mentioned earlier as a potential source of methane.

As in the case of so many of the potential resources I have mentioned, the problems lie not in the extent of the resource but in recovering it in commercial amounts. The traditional approach to shale oil recovery has been an enormously costly job of mining, crushing, retorting. and disposing of waste rock, at a ratio of nine tons of rock to each ton of oil recovered. Large amounts of water are needed for processing—3½ barrels of water for each barrel of oil recovered—in a region where water is scarce. Finally there are environmental impacts ranging from land disturbance and the intrusion onto wildlife habitat to the potential for damage of aquifers and the contamination of water both above and below ground by leachings from the wastepiles.

Much attention is being focussed on the Occidental Petroleum Company's experiments with *in situ* recovery, where the shale would be fractured by explosives underground, ignited, and the native kerogen converted to oil by the resulting heat and recovered from a sump in the bottom of the underground combustion chamber. Such a process would eliminate most of the material handling problems associated with bringing the rock to the surface for retorting, and would require much less water than other methods. Should the problems of recovery be satisfactorily solved, shale oil production may some day reach 2 to 3 million barrels a day, with water availability in all probability being the limiting factor. But about the shale oil resource itself there can be no question: it is there, and in great abundance.

NUCLEAR FUELS

The future contribution of nuclear fuels is obscured by great uncertainties on both the supply and demand sides of the equation. Demand for electricity, which doubled every ten years between 1920 and 1970, is certainly going to increase at a lesser rate in the future, but there is disagreement as to what it will be. The controversy over nuclear power plants and the environmental difficulties of both coal mining and coal utilization make it difficult to forecast the relative shares of each in the electric power generation market. Even within the nuclear option, various plant modes present widely differing demands for nuclear fuels. The high temperature gas reactor requires about half the uranium ore as the light water reactor which is the standard plant in the United States. The Canadian CANDU reactor, burning natural uranium and moderated by heavy water, requires only about two-thirds as much uranium as the light water reactor on a once-through basis, and it can also burn the spent fuels of light water reactors. Thorium is part of the fuel loading of the one operating high temperature gas reactor in the United States, but studies suggest that it could also be used in

both the light and heavy water reactors to drastically reduce the uranium requirement of those modes. And, of course, if an acceptable breeder were to be developed, the effect would be to greatly increase the nuclear fuel supply—but just how much would depend on how rapidly the breeders became operational and what their breeding ratio turned out to be.

The supply outlook is also in disarray. The Energy Research and Development Administration annually publishes estimates on uranium reserves and resources, the latter classified as probable, possible, and speculative. The most recent estimates have been challenged by a National Academy of Sciences panel as being much too high, and by a study sponsored by the Ford Foundation as being much too low. So you can pay your money and take your choice. It does appear, however, that there is enough uranium ore in the "reserves" plus "probable resources" categories to accommodate the 30-year life-of-plant requirements of the 236,000 megawatts of light-water reactor capacity presently operating or programmed for the future. The President has directed ERDA to improve its uranium resources assessment capability, and the Geological Survey is cooperating with ERDA in this program, which also provides for evaluation of the Nation's thorium resources as well.

CONCLUSION

Of necessity this has been a rather cursory review of our mineral fuels endowment, but I hope to have established the fact that while these courses are finite and therefore exhaustible, there are large supplies remaining to be found and developed over the next several decades. In the case of coal and oil shale, the extent of the resources is both large and relatively well known. Large resources of natural gas are also believed to exist, although much less is known definitively about their extent or the technology that will be required to produce them. Oil appears to be the least abundant of the fossil fuels, but undiscovered petroleum resources estimated at high confidence levels are adequate to justify vigorous exploration and development programs for many more years. Estimates of the nuclear fuels are accompanied by great uncertainties, but both high and low estimates indicate that additional exploration is justified.

One thing is certain: the energy supplies of the future will not be cheap or easy to come by. The Golden Age of superabundant, cheap energy is over, and we are going to have to adjust our modes of transport, industry, and commerce—not to mention our style of living—to that fact. That might be a good place to begin another lecture, but it is an even better place to end this one.

MORE BUREAUCRACY, LESS PRODUCTION

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. ASHBROOK. Mr. Speaker, since first being elected to Congress I have fought against the growth of bureaucracy in our Federal Government. The problem is that bureaucracies are inherently inefficient. As they grow in size and cost, they also tend to become more cumbersome and less productive.

Dr. Max Gammon, a British physician, has noted this trend and turned it into a new theory. This is the theory of bureaucratic displacement. It basically holds that the bigger the bureaucracy, the less the production.

According to Gammon, in a bureaucratic system "increase in expenditure will be matched by fall in production. Such systems will act rather like 'black holes,' in the economic universe, simultaneously sucking in resources, and shrinking in terms of 'emitted' production."

The reasons for this are not too difficult to understand. Economist Milton Friedman points out that it reflects the difference between a free market and a government bureaucracy. According to Mr. Friedman:

In a market, we can pursue our self-interest only by persuading people to buy what we have to sell, hence we are driven to serve our customers' interests. In a government bureaucracy that is exempt from competition, the customers have nowhere else to go. Their interests are largely irrelevant. Hence, the bureaucrat can serve his self-interest at their expense by expanding his empire and reducing his workload.

Congress should keep these thoughts in mind whenever it is suggested that we pour more money and add more personnel to the Federal bureaucracy. Following is Mr. Friedman's article on Gammon's theory of bureaucratic displacement as it appeared in Newsweek:

GAMMON'S "BLACK HOLES"

(By Milton Friedman)

Dr. Max Gammon, a British physician, recently completed a five-year study of the British health system. In reporting his findings, Gammon was led to formulate a brilliant extension of one of C. Northcote Parkinson's famous laws.

Parkinson's law was "work expands so as to fill the time available for its completion." Gammon, without referring to Parkinson, adds what he calls the "theory of bureaucratic displacement." In his words, in "a bureaucratic system . . . *increase in expenditure* will be matched by *fall in production* . . . Such systems will act rather like 'black holes,' in the economic universe, simultaneously sucking in resources, and shrinking in terms of 'emitted' production."

USELESS WORK

In words that are more in Parkinson's style: in a bureaucratic system, useless work drives out useful work.

Gammon illustrates his theory from the British National Health Service (NHS). He points out that in the eight years "between 1965 and 1973, the total number of staff employed in NHS hospitals in Great Britain increased" by 28 per cent (and administrative and clerical staff by 51 per cent). On the other hand, "the average number of beds occupied daily" declined by just over 11 per cent. He goes on to note that the long waiting lists for beds throughout the period ensure that the number of beds occupied is a valid measure of output. Input up, output down.

The U.S. is still, fortunately, some way from a national health service. However, the rising costs of medical care—as government has expanded its role and bureaucracy has multiplied—presumably reflect an early stage of the process documented by Gammon.

A clearer example for the U.S. is schooling, which is predominantly governmental, as health care is in Britain, and where the law of bureaucratic displacement has been proceeding apace. In the five years from the school year 1971–72 to 1976–77, total professional staff in all U.S. public schools went up 8 per cent, cost per pupil went up 68 per cent in dollars, and 21 per cent after correction for inflation: *input clearly up.*

Number of students went down 4 per cent, number of schools went down 4 per cent. And I suspect there will be few demurrers from the proposition that the quality of schooling went down even more drastically than the quantity. *Output clearly down.*

Is this due to bureaucratic organization? As some evidence, the number of school districts went down by 10 per cent, continuing a trend toward greater centralization and bureaucratization of education that has been going on now for decades. For a somewhat earlier five-year period for which the data are available (1968–69 to 1973–74), when total professional staff went up 10 per cent, and teachers 14 per cent, supervisors went up 44 per cent.

Moreover, the increasing expenditures on schooling have been accompanied by the long decline in SAT scores of high-school graduates to which so much attention has recently been drawn by the Willard Wirtz report for the College Board. Need we look beyond Gammon's brilliant theory to explain why?

DRIVES OUT USEFUL WORK

As a final example of the law of bureaucratic displacement operating in reverse, I quote from a New York Times story of Aug. 21, 1977: "The New York City government provided about the same level of services in 1976–77 as in the previous fiscal year but, thanks to improved productivity, did it with 12,000 fewer employees . . . " That is, reduced input (government employees) resulted in higher output (level of services).

Gammon's theory is more than a smart-aleck curiosity. It is a direct consequence of the pursuit by all of us of our self-interest. In a market, we can pursue our self-interest only by persuading people to buy what we have to sell, hence we are driven to serve our customers' interests. In a government bureaucracy that is exempt from competition, the customers have nowhere else to go. Their interests are largely irrelevant. Hence, the bureaucrat can serve his self-interest at their expense by expanding his empire and reducing his workload.

The fault is not with the people who run the system, but with the system itself. More fundamentally, the fault is with those of us who are responsible for replacing the economic market with the political market.

BILL TO MODIFY THE MATERIAL PARTICIPATION REQUIREMENTS FOR PURPOSES OF THE SPECIAL VALUATION PROVISION UNDER THE FEDERAL ESTATE TAX FOR REAL PROPERTY USED ON A FARM OR SMALL BUSINESS

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. FISHER. Mr. Speaker, I would like to urge my colleagues in the House and on the Ways and Means Committee to support legislation introduced by Representative MARTHA KEYS and which I cosponsored. Portions of the Tax Reform Act of 1976 were designed to permit many family farms in this country to claim a special valuation provision for

farm and small business real property under the Federal estate tax laws. Prior to that time many family farms were being sold simply to pay the Federal estate taxes due. Unfortunately, the provisions of the 1976 Reform Act may have been unduly restrictive. H.R. 9902 is designed to correct this problem.

During hearings held in the spring of 1976, it was brought to the attention of the Ways and Means Committee that many family-owned farms had to be sold in order to raise the cash required to pay the Federal estate tax, which in part was caused by the higher estate tax valuation assigned to the farm real property. Prior to passage of the Tax Reform Act of 1976, land used for farming was valued under the Federal estate tax laws according to its highest and best use, which usually meant for purposes of commercial development, and not according to its actual use as farm property. This result occurred irrespective of whether the family continued to operate the farm after the death of the senior family member.

To correct this inequity, the Congress included a provision in the Tax Reform Act that permits executors to value real property used in a family farm or small business operation according to its actual use for Federal estate tax purposes. To assure that the lower valuation for farm and business real property was available only to genuine family farm operations and not to land speculators or individuals seeking an investment sheltered from the Federal estate tax, the Tax Reform Act established a number of requirements that must be met before the special valuation election is available: First, the real property must have been owned by the decedent or a member of his family for 5 of the last 8 years prior to the decedent's demise, and, second, the decedent or a member of his family must have materially participated in the operation of the farm for the same 5 of the last 8 years preceding the decedent's death.

In addition, the estate tax savings derived from the lower valuation are recaptured if there is no material participation in the operation of the family farm by a qualified heir or members of the decedent's family for any 3 of the 8 years following the decedent's demise.

While the material participation requirements have the salutary effect of denying the special valuation to farm real property held only for investment, they also preclude a sizable number of family-owned and operated farms and businesses from claiming the valuation provision. For example, an elderly farmer would risk losing the lower valuation for real property if he retires at a point when there are no family members or heirs capable of managing the farm or business operation. Moreover, even if the estate qualifies for the special valuation provision, the estate tax savings derived from the lower valuation will be lost if the surviving spouse or some member of the decedent's family does not materially participate in the business or farming enterprise for the requisite period following the decedent's death.

H.R. 9902 eases some of these problems. Instead of the 5 out of 8 year material participation requirement under current law, H.R. 9902 will enable farming real property to qualify for the lower valuation if the decedent or a member of his family had materially participated in the conduct of the farm or business for any 20-year period prior to the date of the decedent's demise. Thus, qualification would not be lost to a family whose senior member is forced into early retirement for medical reasons provided that the decedent or his spouse had operated the farm or business for a lengthy period of time prior to the decedent's retirement. In addition, H.R. 9902 would correct the problem posed by the material participation requirement after the decedent's death by providing that operation of the farm or business by a party unrelated to the decedent will constitute material participation by a qualified heir during the period the heir is either a minor, a student, a disabled person, or a surviving spouse who is 62 years of age or older.

The modifications contained in H.R. 9902 will enable many small business and farming estates, for whom the special valuation provision was designed, to claim its benefits. I urge my colleagues to support it.

NONDISCRIMINATION

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mrs. HOLT. Mr. Speaker, the Federal Home Loan Bank Board recently proposed new regulations to govern the savings and loan industry. After reviewing the proposed regulations, I concluded that the Federal Home Loan Bank Board has overstepped the bounds of the authority vested in it by Congress. I also concluded that the new regulations represent a dangerous step into Government direction of the use of private savings.

For the information of the House, I am submitting for the RECORD the comments I have sent to the Federal Home Loan Bank Board:

COMMENTS BY REPRESENTATIVE MARJORIE S. HOLT ON NONDISCRIMINATION RULES PROPOSED BY THE FEDERAL HOME LOAN BANK BOARD

The existing rules of the Federal Home Loan Bank Board prohibit discrimination in lending on a basis of race, color, creed, national origin, or sex. I applaud these rules, which are designed to enforce compliance with civil rights laws enacted by the Congress.

However, in the proposed new rules published in the Federal Register of November 14, 1977, the Federal Home Loan Bank Board proceeds far beyond the nondiscrimination requirements of federal law, construing the civil rights acts to require affirmative action by private lending institutions to renew older neighborhoods.

The proposed rules have no relevance to race or sex or any other kind of discrimination prohibited by the civil rights laws. Any person having an adequate income, a good credit record, and the qualities of a law-abiding citizen can now obtain a loan for the purchase of property which can reasonably be expected to maintain its value.

The real purpose of the new rules is to force private savings and loan institutions to become urban renewal agencies, compelling them to make loans they now regard as unacceptably risky. The rules would even prohibit them from charging higher interest rates for these loans of greater risk.

In making loans, the institutions would be prohibited from considering the age of the dwelling to be purchased or the condition of the neighborhood in which it is located. The purpose of these provisions is made very clear by the insertion in the Federal Register, which says that "Loan denials based upon assumptions of a dwelling's age or neighborhood perpetuate discrimination and impede revitalization of older neighborhoods." I am amazed that the Federal Home Loan Bank Board would confuse discrimination with sound economic judgments and fail to make the obvious distinction.

The new rules would also prohibit savings and loan associations from giving "undue weight" to consideration of a loan applicant's arrest record or prior credit difficulties. There will surely be no end of confusion and litigation on the interpretation of the term "undue weight," but the apparent effect of these provisions would be to weaken credit standards to something less than sound and prudent.

The foremost responsibility of a thrift institution is the safety of a depositor's money, and it is extremely disturbing to me that the Federal Home Loan Bank Board has now decided that the savings of the people must be invested in social purposes determined by the board. The deposits do not belong to the government, but to the people who have entrusted the savings and loan institutions with their savings. The depositors have not given responsibility to the federal government to invest their savings or to direct the investment of their savings.

The proposed rules represent a dangerous new claim by government on the economic substance of the people. Not content with taxing away an increasingly large portion of the taxpayer's income, government now claims the power to direct the use of his savings according to a bureaucratic definition of what is socially desirable. The new rules would be a raid on personal assets.

If the logic of this Great Leap Forward prevails, what is to prevent government from ultimately requiring private investment institutions to invest in stocks that are deemed socially desirable but risky, or in municipal bonds that are issued by nearly bankrupt cities? This is where the new rules promulgated by the Federal Home Loan Bank Board would lead if such thinking were applied universally.

The issue is whether the government has the right to claim the savings of the people and mandate their use to implement government social policy. If government can move beyond taxing income to directing the use of the people's assets, it is making a total claim on the wealth of the people and threatening the surviving remnants of freedom in this Republic.

TOM TALKS ABOUT AGRICULTURE

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. SNYDER. Mr. Speaker, a half billion dollars might not sound like a lot of money here in Washington where we are in the habit of churning out annual budgets with enough zeroes, commas and

dollar signs to choke the proverbial horse.

But back in the real world where our constituents live, a half billion dollars is quite a bit of money. In a single State economy it is a lot of money. It also happens to be the amount of money paid to Kentucky farmers for last season's tobacco crop.

But that half billion dollars did not stop in the farmers' pockets. It rolled around the economy and eventually generated as much as $3.5 billion in the Kentucky economy.

I would like to share with my colleagues an article written by the Kentucky Commissioner of Agriculture, Thomas O. Harris. Mr. Harris effectively illustrates the fact that rather than being the villainous creation of diabolical Federal subsidies, tobacco pays its own way.

The article follows:

TOM TALKS AGRICULTURE

(By Thomas O. "Tom" Harris)

I don't think it is news to anyone that tobacco is big business in Kentucky. Last season farmers in our state received over $500,000,000 for their Burley crop. A half billion dollars is in itself a lot of money, but the story doesn't stop there. Economy experts and statisticians tell us that every dollar introduced into the economy turns over a number of times. This is done by what the farmers buy with their tobacco money, the other outside fringe jobs that are created by the tobacco money.

Most government agencies use a multiplier of seven. That is, each dollar turns over seven times in the economy. That means that the tobacco industry may mean a half billion dollars at the farm level, but when introduced into the economy, it actually means $3.5 billion to Kentucky's economy. That's truly big business. But any time you are in big business, there will be attacks. The tobacco industry has been under attack for some time, but recently a lot of misinformation has been put out. I don't know if this was done accidentally or deliberately, but in either case the record needs to be set straight.

Recently there were reports that the Federal Government subsidized the Burley market. This is not true. There have been reports that the Burley program was costing the Federal Government and the taxpayers money. This is not true. There is a price support program, which allows the Burley farmer to get back the cost of production. This is done with money borrowed from the Commodity Credit Corporation. This money is paid back, with interest.

Let's look at the figures. The Kentucky Burley tobacco growers report that since 1940, and including the 1975 season:

Money borrowed from the Commodity Credit Corporation	$991,000,000
Money paid back to the Commodity Credit Corporation	991,000,000
Interest paid to the Commodity Credit Corporation	119,000,000

In addition there were net gains returned to farmers of $17 million over and above the price level of pool receipts. On top of this, the governments on all levels take in over $6 billion every year on excise taxes on cigarettes.

So not only does tobacco not cost the taxpayers of this nation any money, it actually makes money.

The money paid back to Commodity Credit Corporation in interest does not take into account anything except the amount borrowed. So even if we use these figures only, it is easy to see that the program makes money, not only for the government, but for the farmers. It does not take into account the approximate $3.5 billion in jobs and services that Burley generates in the state of Kentucky. You know if you are a farmer, just as well as I do, what the tobacco crop means. There is no way of telling how many of our young people have been sent to school by tobacco; there is no telling how many farmers over the years would have gone broke and lost their farms if it were not for tobacco and the tobacco program. Kentucky needs the tobacco crop.

These recent attacks will not be the last. There is no doubt that the friends of tobacco in Congress are fading every year. Every year it becomes more and more a burden that must be borne by the representatives from the tobacco states.

If those who would take a $3.5 billion bite out of Kentucky's economy have a substitute program, I would like to hear about it. I do not feel that we should lose a crop without something to replace the lost income. I am not smart enough to know of any other crop which will bring $3.5 billion into Kentucky's economy, but I sincerely hope that before the one we have is cut off, somebody will offer one.

We can expect pressures from groups that claim opposition to tobacco for health-related reasons also. Some Federal officials have already said that they oppose the price support system, because it was not right for the Federal Government to support a product which was harmful to health. But let's be sure tobacco is harmful before we destroy the livelihood of thousands of Kentucky's farmers.

Early in April, the Tobacco and Health Research Institute near the University of Kentucky College of Agriculture was dedicated. This facility was a result of House Bill 466 that I introduced when I was State Senator at the General Assembly in 1970. This bill established a state-financed tobacco health program broadened the already existing federal tobacco and health research program on the University campus. The bill states that "every effort should be made to prove or disprove the charges of health hazards in the Commonwealth." To support the program, a ½ cent tax was placed on each package of cigarettes sold in Kentucky.

The Tobacco Health and Research Institute is much more than a laboratory. It is a commitment the people of Kentucky made . . . a commitment 200,000 farm families of Kentucky made by taxing their major cash crop.

The Tobacco Health Research Institute will find the answers. They will be truthful answers. If tobacco is harmful, they will produce the facts. If not, those facts will also come forth. Many respected doctors and other scientists are not convinced that moderate use of tobacco is harmful. We need all the information before we jump and stop growing Kentucky's major cash crop.

TO REDISCOVER WHAT IS RIGHT WITH AMERICA

HON. ELFORD A. CEDERBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. CEDERBERG. Mr. Speaker, leadership is something that we know is essential to the accomplishment of anything, whether it be running the country or operating a business. In a recent speech before a leadership conference in Nashville, Michigan businessman, Robert Gerholz, noted that leadership is ineffective, however, without a strong sense of honesty and integrity. He poses that the real question facing the American business community today is not whether it can "afford stronger ethical standards, but how much longer it can go on without them." I would like to take this opportunity to share with my colleagues his probing, and thought-provoking, message:

TO REDISCOVER WHAT IS RIGHT WITH AMERICA

(By Robert P. Gerholz)

It is a distinct honor and pleasure for me to address this luncheon meeting of leaders in every field of endeavor. This leadership conference may well win historical recognition as a milestone in the development of the Rediscover America Program with honesty and moral integrity.

It is a heart warming experience for me to have an opportunity to exchange ideas with my fellow Americans and to be among friends where faults are forgiven. One's eccentricities are looked upon as evidence of a rugged individualism and one's accomplishments are generously magnified.

Mark Twain once said, "When I was 14 years old, my father was so ignorant I hated to have the old man around. But when I was 21, I was surprised to see how much my father had learned in only 7 years." The passing years bring wisdom but they also bring humility. They bring less self assurance, but they bring a larger sense of abiding values of life.

As we look ahead together, I confidently believe that the opportunity for constructive and rewarding accomplishment in every field of endeavor is greater than anything we have had, experienced, or dreamed.

I welcome this opportunity to share with you my observations, experiences, optimism, spadework and above all, my faith in America's brilliant future.

The winds of change are blowing swiftly. The future is where my concern lies and I'm looking beyond the valley of economic doubts to the inevitable recovery cycle and to bright new horizons.

I feel confident that more will happen in the next 15 years; more change will occur, more growth will take place, more inventions added, more distance covered, more needs satisfied. More goods made, shipped, sold, junked and recycled in the next 15 years than in the entire civilization called Rome. Or that period of several hundred of Europe's most creative years called the Renaissance—more in your next 15 years than in all of America's hundred which followed the Revolution and included the Civil War.

I want to take a few brief moments to establish a national and historical frame of reference for my remarks.

The explosive growth of America in the past quarter century has given us many benefits and many problems. Each of these problems, in today's high speed era, is a "crisis." So we have an "environmental crisis," "pollution," "transportation," "energy crisis," "urban sprawl," A "mid-east crisis," and "inflation," "unemployment" and "Panama Treaty crisis."

As we move from crisis to crisis, as we plan for the future, let us not lose focus on what's right with America . . . on what's right with our society. Let's begin by counting our

blessings; renewing our faith in our great nation, our religious heritage and in our dynamic free enterprise system which has contributed a significant measure to our achievement in spiritual, cultural, medical, social and educational progress. It is represented by 250,000 churches, 3,650 private hospitals, 1,450 private colleges and universities, 4,600 private schools, 6,000 private museums, 100 symphonies, and 5,500 libraries—just to mention a few.

Our national assets include a population of over 215 million human beings. Nearly 60 million are still in school, of whom 10 million are in colleges and universities.

We have over one hundred forty million cars, trucks and buses rolling over four million miles of U.S. highways and nine of the ten busiest airports in the world. We lead the world in nuclear power capacity with a potential seven times that of the Soviet Union. Our electric energy output, notwithstanding our current energy problem, is three times that of the Soviet Union.

Some 91 million men and women are gainfully employed at the highest wages and salaries in history.

America adds up to 3 million 600,000 square miles of verdant plains, vast timber lands, lakes, rivers and harbors and some of the most scenic mountain and valley regions in the world with abundantly high agricultural production and rich mineral resources, with a climate to suit every taste and a future filled with exciting expectations and promise.

For all the furor over inflation, recession and the fluctuation of the stock market and the value of the dollar, our people have the highest standard of living in world history—165 million telephones, radios, color TV's, two cars, boats, air conditioning, leisure-vacations, time to fret and fume about prices and shortages while we're playing. We deplore unemployment, ignore the glad news that employment is the highest in history. More people have jobs than really want them.

We fret over shortages, but we spend more on dog and cat food than we do on baby food—$50 million a year just to rid our pets of fleas.

America may be running short of gas, but it's more from joy riding than from desperation driving. Most of our shortages are from waste. Not from lack of resources.

Foreign oil profits are so great that the oil producing and exporting countries (OPEC) could with 10 days' worth of oil profits, buy the Bank of America; I'm afraid that most people in Washington don't really know what a billion dollars is. They don't even count the zeroes any more. Here's how big a billion is: one billion seconds ago the first atomic bomb had not been exploded; one billion minutes ago, Christ was still on earth; one billion hours ago, men were still living in caves; yet, one billion dollars ago—in terms of government spending—was yesterday. Just a few observations relating to our RDA Program—it is popular to say we need new goals, new values. But our salvation is in the old values—as simple as The Ten Commandments, The Golden Rule, The Sermon on the Mount, The Declaration of Independence, The Bill of Rights and the Constitution.

There is no substitute for our rich religious heritage, for the practical application of the Judeo—Christian principles and for honesty and integrity in our American Society.

The word, crime, conjures up a catalogue of specific mis-deeds—murder, rape, robbery, auto theft, etc. periodically, we learn from the Attorney General the aggregate number of offenses in the various categories of crime compared with the statistics for the previous year. It is easy to assume that these figures reflect our progress or failure in the fight against crime, much as we assume the patient's temperature indicates the trend of his illness.

It is not, I believe, quite so simple to gauge this social blight. Crime is not the root problem, but merely one manifestation of a far more complex problem, dishonesty! Dishonesty is a contagious disease that can decimate a civilization. One person's anti-social acts become the justification for others to disregard conscience in their decisions.

Integrity, it seems, does not arise spontaneously in the human breast. It is a learned reaction. The conscience must be trained. If integrity is not an ideal prized and proclaimed, practiced and praised in the society, then dishonesty seems to flourish and those acts we label as crimes are only part of the result.

In the long run, increasing the level of respect for integrity is probably the most effective antidote for crime, if not the only one.

As we focus on the challenge of the future, the point is, whatever your business or profession, whatever your political philosophy, no system will provide equality, fairness and justice that does not rest on a strong foundation of honesty as the basic working social principle.

It is a historic fact that only a better functioning, more honest and efficient private sector can create the jobs, the opportunities and the new technical breakthroughs needed to build a better society.

Too many within the ranks of the private sector have lost sight of the moral side of capitalism. And too many think of rigorous ethical standards as a costly luxury rather than an indispensible part of a healthy free economy.

This is nothing short of folly. As the wily and eminently practical old observer of human nature, Benjamin Franklin once pointed out, "If the rascals knew the advantages of virtue, they would become honest men out of rascality." In the long run, honesty is not only the best business policy but the only one compatible with a free market and open, honest competition. A viable market system requires a vital-ethical-moral context in which to survive.

The values which test achievement—honesty, truthfulness, self-control, fair play, loyalty, devoutness, and many others—these play a determining part in the course and pattern of life.

The real question facing the American business community today is not whether it can "afford stronger ethical standards," but how much longer it can go on without them.

Before we can expect others to believe in the system, we must believe in it ourselves, and this belief must be translated into clear, tangible actions that demonstrate a strong sense of ethics that is not only real but clearly visible to the public.

Some say that America has lost its way—that opportunity is gone. Ridiculous. The world never exposed more frontiers for exploration, improvement and betterment than exist today. Of all our talents in the U.S., two stand giant-like above the rest—our ability to be creative and innovative. Never have the people in any nation displayed more ingenuity and resourcefulness—more basic creativity—than those in the melting pot of the United States of America. Perhaps it's because our entire concept from the Declaration of Independence and the Constitution was new, bold and creative. And we have woven the same pattern through everything we do. We are a nation of creative, innovative people—that is the secret of our greatness.

Today, America is the most powerful, the wealthiest and the most technically advanced nation in the world.

We are living in the best time that has ever been. We are living in one of the rarest moments in American History.

Ours is a rich heritage of faith. Indeed, America has had a unique background of faith from its very beginning. No other nation has roots so steeped in the commitment to religious freedom—the freedom to seek and find equality before God under a people's government. From the pilgrims fleeing persecution to refugees from Hitler's mass extermination of Jews, millions of people have sought and found religious as well as political haven in America.

Nine years ago, my wife and I visited Greece for the first time. A magnificent experience. Poor country, but a wonderful country; wonderful people. We read several books before we went over and we were fortunate in having a young lady interpreter who spoke perfect English and was a Historian and an Archaeologist. The Age of Pericles was a "golden" age. It's called that in the history books and it was. These people, over a period of time, became largely free from want, illiteracy and disease.

Then they tried for the fourth freedom—the so-called ."wonderful freedom"—freedom from responsibility and the golden Age of Pericles was no more. If I had any hope for the future, if I were to make a toast for the future, I would hope we would never arrive at a period when we were free of individual responsibility—

Today America and the world cries out for creative, competent, moral leadership. Creative leadership looks to living examples. You shall know the truth and the truth shall make you whole—John—8:32.

"By some contagion of wisdom", as Christopher Morley offers, we are privileged to enjoy the free way of life handed down to us by America's founders. Our nation's system of free enterprise, made up as it is of the conglomeratic motivations of two hundred million people, depends heavily on responsibility and inter-responsibility. Without responsibility, freedom itself can be nothing but an empty word. The kind of America those who follow you will get will be largely dependent on the kind of America you insist on now.

The gut question, my fellow Americans—will we tomorrow still be showing the vitality, the productivity, the creativity, the resources of moral and cultural strength which are required for this leadership and for the preservation of our free society? Yes, the winds of change are blowing swiftly. In this period of dramatic change in the affairs of men and nations, in this time of relentless challenge to the U.S., do we have those qualities of adjustment, those characteristics of the adaptive society which are requisite to meet the accelerating rate of change which is the over-riding characteristic of our time?

In the chaotic, dangerous and immensely exciting world we are living in today, democracy is not meant to be a free-for-all at any price. Democracy depends on the inner discipline and the standards of conduct that free men choose to adopt if they are going to stay free. We must be reminded of that great philosopher, Edmund Burke, who said, "All that is necessary for evil to triumph is that good men do nothing."

America's spiritual vision and vitality need to be renewed if the nation is to recover its sense of purpose, direction and destiny.

The American Economic System is the envy of the world and our goal must be to promote, to improve and to strengthen this system which is the most successful social organism for producing and distributing the wealth which man creates, that history has ever seen.

The challenge and the opportunity for rediscovering America is to build a truly won-

derful country—one characterized by less indifference and more involvement, by less hostility and more friendliness, by less fear and more confidence, by less crime and more self-discipline, by less complaining and more fortitude, by less self-interest and more altruism, by less haste and more courtesy, by less tension and more serenity, by less ugliness and more beauty; in short, by less pettiness and more greatness, toward a truly great America!

Remember what makes you American. And it doesn't hurt you to be proud of it. Breathes there a man whose soul so dead, who never to himself has said "This is my own, my native land."

Remember it now when the going is so very tough and liberty is threatened by violent word and appalling deed. Remember, Americans must have that one more thing other than air, water and food. Americans must have liberty, they love it and will live or die for that one necessity before all the others. No matter what.

This is the only country throughout civilization that has guaranteed absolute freedom to its people for two whole centuries.

To everyone's surprise, it doesn't breed anarchy, it breeds enterprise. Free enterprise that built giant industries and more jobs. Enterprise that planted the plains, and felled the timber, and mined the ore, and plumbed the oil, and forged the steel that built an incredible wealth of commerce shared by a benevolent culture, a soft-hearted, open-handed people.

We seem to be in the midst of a historic cycle, which has repeated itself over and over in nation after nation ever since the dawn of history. It goes something like this:

From bondage to spiritual faith
From spiritual faith to courage
From courage to freedom
From freedom to abundance
From abundance to selfishness
From selfishness to complacency
From complacency to apathy
From apathy to fear
From fear to dependency
From dependency back again to bondage.

Is this to be our heritage?

Is this what is to become of the American dream? Is there no reversing it? Is there no way out of our morass?

I believe there is.

I believe our dynamic Rediscover America Program with honesty and moral integrity, with your help, is destined to play a prophetic role in the future of our great nation.

To men and women of great vision, dedication, courage and faith, I want to share favorites of mine.

This prayer by J. Holland:

GOD GIVE US MEN

God give us men, the time demands strong
minds, great hearts, true faith and
willing hands;
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who can stand before a demogogue, con-
demn his treacherous flatteries with-
out blinking;
Tall men who live above the fog in public
duty and in private thinking.

And this gem of Carl Sandberg's—another special favorite:

I see America, not in the setting sun of a
black night of despair ahead of us.
I see America in the crimson light of a rising
sun fresh from the burning, creative
hand of God.
I see great days ahead, great days possible
to men and women of will and vision.

Thank you for being such a wonderful audience—and for the opportunity to invite you to join with religious heritage of America in the great effort to re-discover America with honesty and moral integrity—to bring the future into focus, to join in the fight to preserve for posterity God's richest gift to man—the last frontier in the world where free men and free women still have a chance to work out their own destiny—America, America Re-Discovered.

Good luck and God bless you.

FLOODS—"ACTS OF GOD"; FLOOD LOSSES—ACTS OF MAN

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. WALGREN. Mr. Speaker, I would like to bring to the attention of my colleagues the following article by Vernon T. Houghton, Jr., my constituent. Mr. Houghton is with the Pennsylvania Department of Environmental Resources. His comments are well worth noting:

FLOODS

(By Vernon T. Houghton, Jr.)

Forecasting of floods deserves a prominent place in the national flood policy. An adequate river forecasting service is as vital a factor in flood control plans as are dams, levees and channel improvements. Probably no feature of flood control planning can offer as much potential economic value for as little initial and annual cost as can river forecasting. The value of flood forecasting is two-fold. First, it gives timely warning which will permit the removal of inhabitants, movable property and livestock from the danger area to a place of safety. "To be forewarned is to be forearmed" applies to floods no less than to fires or other disasters. A community flooded without warning is like a crowd trapped in a burning theater—emotion dominates reason and utter chaos usually results. It may on the other hand, give assurances necessary to prevent a costly and unnecessary exodus from a flood-threatened area. Perfect forecasts are of no value unless, through timely and thorough dissemination, all interested parties are made aware of the predictions and preventative measures taken by all concerned.

The first physical evidence of a flood is usually in the form of water running over the surface of the ground, collecting in tiny rills, and eventually flowing in stream channels. The surface or direct runoff makes up the initial or land phase of the flood. It is during the land phase that rain, rejected by the soil, becomes runoff and generates the flood. The land phase of the flood may last but a few hours; when the sun shines again the farmer knows the worst is over while the townspeople downstream may still face an impending danger.

The channel phase of the flood follows the land phase closely and starts when the surface runoff enters the stream channels. The river levels rise to carry off the surface runoff generated during the land phase. Ordinarily, when speaking of floods we mean the channel phase, since this phase is the most spectacular and on the whole the most destructive, although this statement may be disputed by the upstream farmer.

Floods on large river systems, such as the Ohio River, are usually produced by periods of persistent warm, rainy weather. Occasionally the regular progression of waves along a polar front is interrupted and the front becomes stagnant over one watershed. When the front is blocked by a standing high pressure dome of air off the Atlantic coast (the "Bermuda high") the mechanism is just right for feeding warm, moist air aloft to the storm center. Instead of there being large waves accompanied by widely spread light rains, moving at intervals along a shifting front, numerous small waves producing intense rains move along a stagnant front. Rainfall then persists in an area for several days, and enough water may accumulate in a single watershed to flood even its largest stream. The concentration of a series of showers over a large though compact area was typically displayed by the storms and flood of January 1937 in the Ohio River Basin, and the recent flood in Johnstown, Pennsylvania in July 1977.

Every year receding flood waters in one or more sections of the United States expose muddy plains where people were poorly prepared to meet the overflow. Small town shopkeepers digging their goods out of silt; farmers collecting their scattered and broken possessions; and manufacturers taking inventory in water-soaked warehouses, testify to the dislocating effects of floods and to the unsatisfactory adjustment which man has made to them in many valleys. For the most part, floods in the United States leave in their wake a dreary scene of impaired health, damaged property, and disrupted economic life.

Movement of flood waters is an example of the blind legality—one might almost say the constitutionality—of nature. There is no appeal from it and no amending process. We see only too often, after a flood has passed, the reaction of the public mind to a fallacious and dangerous optimism about the future—now that the flood is over and homes and property rehabilitated, induced poverty and hardship are to be forgotten as quickly as possible. What accounts for this? It cannot be that the cost is not a very real one; it is both real and great, and it is borne directly by the individual and the taxpayer in dollars and cents. The explanation cannot be that violent death, permanent impairment of health, loss of estate, and social maladjustment have not left their mark for these misfortunes are visited upon thousands of families in flooded valleys every year. The answer lies, no doubt, in the fact that human beings quickly adjust themselves to misfortune and accept too willingly the illusion that it will not happen again. The principal lesson to be drawn from past floods is that however terrifying the implications of the assertion that "The past is prologue," there is no evidence that we have yet succeeded in preventing a hazard of major disasters from floods. Record streamflows convey a message to the heedful. Representing what once occurred, they indicate what can and will probably occur again in seemingly aimless pattern, and when least expected. While this should not discourage or lessen interest in preventative measures, the public must at the same time make certain that they are always psychologically and in every other way prepared for whatever may come.

Floods are one of man's greatest natural enemies. The chances are they always will be. The devastation and hardship caused by angry waters is terrible. Man has attempted to control floods by flood control projects and river forecasting programs to provide advance warnings and, although the angry giant has been curbed to some extent, nature continues its relentless attack and man has not been too successful. The fearful element—the river—is yet to be controlled, is yet to be harnessed for mankind. As long as man builds, as long as fields are plowed, as long as the countryside is given over to industrialization, the scientist, the agriculturist, the builder still has work to do to tame the angry rivers.

UNITED STATES FINANCING OF FOREIGN MILITARY MISSIONS IN THE UNITED STATES

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues correspondence I have had with the Department of Defense concerning United States financing of the Government of Israel's Ministry of Defense Mission in the United States. Around the middle of August of this year, it was brought to my attention that foreign military sales (FMS) credits had been used to finance the operations of the Israeli arms purchasing mission in New York.

No similar arrangements to finance arms purchasing missions in the United States, through the use of FMS credits, apparently exist, although FMS credits have been used to finance services similar to those performed by the Israeli mission in New York.

This particular arrangement, originally requested and authorized in December 1975, was discontinued August 9, 1977.

The correspondence, as well as an article from the Washington Post which appeared August 30, 1977, follows:

COMMITTEE ON INTERNATIONAL RELATIONS,
August 19, 1977.

Dr. HAROLD BROWN,
Secretary of Defense, Department of Defense, The Pentagon, Washington, D.C.

DEAR MR. SECRETARY: It is my understanding that the Government of Israel maintains a defense procurement office in New York City and that the expenditures of that office, including travel expenses, are paid for by the United States Government.

I would like to know if this is true, what those expenses are on an annual basis, how payments for the office are made and under what provision of the Foreign Assistance Act such assistance is provided.

I would appreciate an early reply to this matter.

With best regards.

Sincerely yours,

LEE H. HAMILTION,
Chairman, Subcommittee on Europe and the Middle East.

ASSISTANT SECRETARY OF DEFENSE,
Washington, D.C., August 31, 1977.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: In response to your letter of August 19, 1977, foreign military sales credit funds have been used since December 1975 to finance the expenses of the Government of Israel Ministry of Defense Mission to the United States, located in New York. The Government of Israel is obligated to repay the principal amount of these credit fund disbursements together with the interest thereon. "Forgiveness" funds were not used.

The authorization to use foreign military sales credit funds for this purpose was made in response to a request from the Government of Israel. A copy of the authorization is enclosed.

The authorization permits use of the credit funds for the following operating expenses of the Mission: rent, utilities, maintenance of facilities and equipment, office supplies and equipment, contractual services, consultation fees and traveling expenses in the United States. Further, the expenses must pertain solely to the operations of the Israeli Ministry of Defense and the procurement procedures must meet the terms of the applicable credit agreements. Specifically excluded are the salaries of Israeli personnel. These approved Mission expenses come within the definitions of defense articles and services which may be financed with foreign military sales credit funds under Section 23 of the Arms Export Control Act (P.L. 94-329).

Beginning with the date of the authorization (December 19, 1975) through April 1977, a total of $2,120,000 in foreign military sales credits have been used to finance the Israeli office in New York. A breakdown of this amount by type of expenses is attached.

By letter dated August 9, 1977, the Mission advised us that it proposed to discontinue the arrangement approved in that authorization.

I hope this information will prove to be helpful.

Sincerely,

WALTER SLOCOMBE,
Acting Assistant Secretary of Defense, International Security Affairs.

OFFICE OF THE DIRECTOR DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECRETARY ASSISTANCE),
OASD/ISA,
Washington, D.C., December 19, 1975.

Mr. J. CIECHANOVER
Government of Israel, Ministry of Defense, New York, N.Y.

DEAR MR. CIECHANOVER: In response to your inquiries of 17 December 1975, it has been determined that the use of DOD direct or guaranteed credit funds for the following purposes is appropriate and consistent with the terms of the applicable credit agreements:

Payment of operating expenses, excluding salaries of Israeli personnel, related to your Government's Ministry of Defense office in New York City.

Procurement of defense articles from a U.S. manufacturer who either produces or procures less than 50 percent of the parts, components, or sub-systems of an end item outside the United States.

Examples of operating expenses that may be paid with available credit funds are: rent, utilities, maintenance of facilities and equipment, office supplies and equipment, contractual services, consultation fees, and traveling expenses within the U.S. It should be noted, however, that such expenses should pertain solely to the operation of the Israeli Ministry of Defense and should be procured in a manner consistent with the terms of the applicable credit agreements.

Invoices and other such documentation in support of the operating expenses that are to be paid with credit funds should accompany your requests for payment. This documentation should be batched in a manner that will permit correlation with your requests for payments and promissory notes.

In the event defense articles are procured from a U.S. manufacturer who produces or procures less than 50 percent of such articles outside the U.S., credit funds may be disbursed to the prime U.S. contractor but may not be disbursed directly to foreign subcontractors except under the provisions of Section 42 of the Foreign Military Sales Act, as amended.

Sincerely,

H. M. FISH,
Lieutenant General, USAF, Director, Defense Security Assistance Agency and Deputy Assistant Secretary (ISA), Security Assistance.

MINISTRY OF DEFENSE MISSION TO THE UNITED STATES, EXPENSES FINANCED BY UNITED STATES CREDIT (*) (**)

	Thousands
1. Telephone, Telegraph and Teletype	$550
2. Consultation Fees (Marketing Research, Engineering, Quality Assurances, etc.)	500
3. Office Maintenance and Moving Expenses	270
4. U.S. Legal Fees	260
5. Computer Services	200
6. Warehouse Rent and Maintenance	100
7. Office Equipment and Rental Expense	80
8. Travel in U.S. Only (Inland Only)	70
9. Security Equipment	50
10. Insurance	40
Total	2,120

(*) All expenses are financed under loan agreements with Israel, and Israel is obliged to repay both principal and interest thereon.

(**) Expenses financed did not include any salaries, per diem expenses, entertainment, any personnel oriented expenses, etc.

COMMITTEE ON INTERNATIONAL RELATIONS,
Washington, D.C., September 15, 1977.

Mr. WALTER SLOCOMBE,
Acting Assistant Secretary of Defense, International Security Affairs, Washington, D.C.

DEAR MR. SLOCOMBE: Thank you for your letter of August 31, 1977 which I received September 8, 1977. The letter concerned the Government of Ministry of Defense Mission in New York and is identified as I-9692/77.

In further reference to this subject, I would like to know the following:

1. Has this type of arrangement ever existed for any other country in the past and does it exist today for any country?

2. What precisely was the $260,000 in legal fees for and were the lawyers and others involved in this item registered with the United States Department of Justice pursuant to the Foreign Agents Registration Act? If they were not registered or you do not know, why weren't they and why don't you know?

3. What was the size of the Mission; how many were professional staff and how many clerical?

4. What was the nature of the $70,000 in domestic travel and how is that figure broken down?

5. How can the item "consultation fees" be broken down further into specific items?

6. Can you provide me with copies of the Government of Israel's "invoices and other such documentation in support of the operating expenses" and of its "requests for payments and promissory notes" alluded to in your December 1975 authorization to use foreign military sales credits for the operation of the mission?

7. Why did the Government of Israel decide to terminate the arrangement and how will it now finance the operation of the mission?

8. How can you assure that U.S. aid funds are not used in the future to support this mission?

I would appreciate your consideration of this matter and would like an early reply.

With best regards.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

ASSISTANT SECRETARY OF DEFENSE,
Washington, D.C., October 7, 1977.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I refer to your letter of September 15, 1977 in which you asked for additional information concerning the Government of Israel's Ministry of Defense Mission in New York. Your eight questions are repeated below and each is followed by my response.

Question 1: Has this type of arrangement ever existed for any other country in the past and does it exist today for any country?

Answer: All countries involved with the FMS credit program spend their FMS credits for similar services, whether or not they maintain a defense purchasing mission in the United States. Those countries without a defense purchasing mission must necessarily make virtually all important defense purchases via the FMS program. Generally, the Department of Defense performs administrative and contracting services on behalf of the foreign purchaser and is reimbursed for such services via an administrative surcharge applied to the foreign military sales case. This administrative surcharge covers such DOD procurement costs as those for communication, legal services, computer processing, temporary duty travel, and office equipment. The DOD also has disbursed FMS credit funds, at the request of the purchasing nation, directly to suppliers of such administrative services as quality assurance, contract engineering, freight forwarder/transportation costs, and the support of foreign trainees.

Unlike most nations using FMS credits, Israel undertakes a large proportion of its defense procurement by commercial contract directly with U.S. suppliers (rather than via FMS, wherein the DOD is responsible for arranging contracts with U.S. suppliers). This is possible only because Israel has established a large purchasing mission in the U.S. Thus, while all countries have financed costs for administrative service with FMS credit funds, Israel has incurred a significantly greater proportion of such costs directly rather than via the DOD. This arrangement has been mutually beneficial since, due to the magnitude of Israeli purchases in the U.S., it has actually reduced the DOD's administrative involvement with Israeli defense purchasing program.

Question 2: What precisely was the $260,000 in legal fees for and were the lawyers and others involved in this item registered with the United States Department of Justice pursuant to the Foreign Agents Registration Act? If they were not registered or you do not know, why weren't they and why you don't know?

Answer: The vouchers covering legal fees incurred by the Israeli mission in N.Y. which were paid from their credit program did not disclose the detailed information you have requested. However, you should be aware that this category of expense is incurred by most of our FMS customer countries who maintain purchasing missions in the U.S. The legal fees paid from Israeli credit programs were necessary in the negotiation of commercial contracts; in the review of their loan agreements with the Federal Financing Bank and the Department of Defense; and to insure adherence to those loan agreements and to various U.S. laws such as the International Security Assistance and Arms Export Control Act and the U.S. Merchant Marine Act.

We have no information in our files concerning whether or not the lawyers who provide such legal counsel to the Israeli mission are registered with the Department of Justice.

Question 3: What was the size of the Mission; how many were professional staff and how many clerical?

Answer: The Director of the Mission has reported to us that his staff consists of 202 personnel. We have no information concerning how many of that number are professional and how many are clerical. As you will recall from my letter of August 31 we authorized the use of FMS credit funds for certain operating expenses of the Mission which did not include the salaries of the Israeli personnel.

Question 4: What was the nature of the $70,000 in domestic travel and how is that figure broken down?

Answer: This category of expense includes the cost of transportation by commercial air, train, bus and taxi incurred by the Director of the Mission and members of his staff in performing the official duties of the Mission. Most of this expense was the cost of air transportation between New York City and Washington, D.C.; DOD's Defense Security Assistance Accounting Center at Denver, Colorado; the International Logistics Centers of the military departments at Bayonne, New Jersey, Dayton, Ohio and New Cumberland, Pennsylvania; and various U.S. commercial contractors' installations.

Question 5: How can the item "consultation fees" be broken down further into specific items?

Answer: These expenses are incurred primarily for market source research to determine risk assessment and overall stability of potential commercial suppliers of defense material prior to negotiating purchase contracts, for cost accounting services, and for quality control.

Question 6: Can you provide me with copies of the Government of Israel's "invoices and such documentation in support of the operating expenses" and of its "requests for payments and promissory notes" alluded to in your December 1975 authorization to use foreign military sales credits for the operation of the Mission?

Answer: The Director of the Israeli Defense Mission has officially requested that individual invoices, such as those you seek, not be disclosed. The Government of Israel deems the invoices to be classified and proprietary, and that release of such would be prejudicial to the security interests of their Defense Mission to the U.S. As to other documentation, you will recall from my letter to you of August 31 that a total of $2.1 million in FMS credits was used to finance the operating expenses of the Israeli office in New York. There was three promissory notes associated with those expenditures which were made from three credit agreements, and 17 requests for payment. A copy of each of the foregoing is attached. However, I must explain several things to you concerning the attachments.

First, you should be aware that the borrower signs just one Promissory Note when a loan agreement is consummated with the Federal Financing Bank (FFB). The note is for the full amount of the loan agreement, but the interest rate is a "floating" one, which means the Borrower is charged at the rate current at the time the incremental drawndowns or disbursements are processed by the FFB. In this instance, funds were disbursed from three different loan agreements (FMS credit programs) therefore, we are providing you with a copy of each of the three respective Notes which included, but were not limited to, funds for the Mission.

Secondly, requests for payments for administrative or operating costs out of credit funds were accumulated by the Government of Israel over a period of time and were commingled with requests for payments for commercial purchases as well as payments for FMS purchases. They were then processed through DOD for approval, and DOD then forwarded the payment request to the FFB for disbursement. The foregoing explains, when one reviews a single note or request for payment, it is not possible to extract the portion related exclusively to operating costs for the Mission.

Question 7: Why did the Government of Israel decide to terminate the arrangement and how will it now finance the operation of the Mission?

Answer: It is our understanding that the Government of Israel wished to eliminate the risk that supporting invoices might be disclosed contrary to their security interests. DOD has not asked the Israeli Government how it will finance future operating costs of the Mission.

Question 8: How can you assure that U.S. aid funds are not used in the future to support this Mission?

Answer: First, referring to the term "aid", allow me to reemphasize that their direct FMS credit funds (for which payment is waived) were not used to support the Mission. Instead, the Israeli Government used funds available from its loan from the FFB which it is repaying with interest.

Secondly, as to the future, there are no present plans to resume such financing for the Government of Israel Mission or to initiate similar financing for the mission of any other government. Should the Israeli (or some other Mission) request such assistance and should we determine it to be in the best interests of our foreign policy to do so at some future time, we would be pleased to consult with you and the Committee in advance of implementing any such plans. As to insuring that no FMS credits are used for support of the Mission now that the agreement for such support has been terminated, each request for payment of funds from FMS credit programs which Israel (or any other country) submits is channelled through DOD where it is verified for accuracy, completeness, authenticity and for compliance with existing policies and procedures set forth in the loan agreement itself, as well as the Arms Export Control Act. I am satisfied that this procedure is adequate to prevent any "leakage" of funds into support of the Mission. (I should add that I have no reason to believe the officials of the Israeli Mission would attempt such a course).

I hope this information will prove to be helpful to you and your Committee.

Sincerely,

WALTER SLOCOMBE,
Acting Assistant Secretary of Defense, International Security Affairs.

COMMITTEE OF
INTERNATIONAL RELATIONS,
October 18, 1977.

Mr. WALTER SLOCOMBE,
Acting Assistant Secretary of Defense, International Security Affairs, Washington, D.C.

DEAR MR. SLOCOMBE: Thank you for your letter of October 7, 1977 (I–10657/77) in which you respond to questions concerning the Government of Israel's Ministry of Defense Mission in New York.

I would like a clarification and more information with regard to your answer to Question 1 on the existence of this type of

arrangement with other countries. You indicated in your answer that all countries receiving FMS credits spend them for services similar to those rendered by the Israel mission, whether these countries have a purchasing mission in the United States or not. In an earlier letter, dated August 31, 1977 (I-9692/77), you indicated that an authorization had been granted to Israel allowing it to use FMS credits for the operation of the mission. I would like to know if such authorizations are needed in one instance and not in others.

I would like to know what countries, other than Israel, have at any point over the past five years, maintained arms purchasing missions in the United States and have used FMS credit funds to operate them, and what amounts were spent on the operation of these missions. I would also like to know what such missions still exist. I would also appreciate receiving the specifics of all authorizations issued, permitting the use of FMS credit funds for this purpose for these countries, as you did for Israel (attachment to letter of August 31).

I appreciate your help in this matter.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

ASSISTANT SECRETARY OF DEFENSE,
Washington, D.C. November 3, 1977.

HON. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This is in reply to your letter of October 18, 1977, requesting clarification of a part of my letter to you of October 7, 1977.

Both the standard form Department of Defense direct credit agreement and the Federal Financing Bank loan agreement establish as a condition to a borrowing country's use of credit funds available thereunder, that such funds may be used only to finance the procurement of defense articles and services pursuant to "Purchase Arrangements" authorized for such financing by the Department of Defense. Each request by a borrowing country for disbursements under these credit financing arrangements must identify the approved Purchase Arrangements for which the disbursements will be used. This standing requirement for authorization of Purchase Arrangements applies both to FMS agreements and to direct commercial contracts. Hence, the answer to your question is that such authorizations for the use of FMS credit financing for services similar to those rendered by the Israeli Mission are needed in all instances for all countries, irrespective of whether a particular country has a purchasing mission in the United States.

Your second question is "what countries, other than Israel, have at any point over the past five years, maintained arms purchasing missions in the United States and have used FMS credit funds to operate them, and what amounts were spent on the operation of these missions?" No other country has requested authorization to use FMS credit funds to finance the operations performed by a purchasing mission in the United States, and accordingly, no FMS credit funds were expended for the operations of the missions themselves. As I indicated in my earlier letter, however, services similar to those directly performed by the Israeli Mission were, in the case of such other countries, performed on behalf of those other missions under FMS cases either by the Department of Defense or by contractors of the Department of Defense, e.g., for communications, legal services, computer processing, travel, and transportation. For the most part, the costs of such services are provided for in the standard administrative cost surcharge on FMS cases; in some instances, costs such as those incurred for freight forwarding services are provided for as specific line items in an FMS case.

I hope this information adequately clarifies the points you raised.

Sincerely,

WALTER SLOCOMBE,
Principal Deputy Assistant Secretary of Defense, International Security Affairs.

[From the Washington Post, Aug. 30, 1977]

U.S. FUNDED ISRAELI UNIT

(By Don Oberdorfer)

The United States for 20 months financed the expenses of the 202-member Israeli arms purchasing mission in New York in a unique arrangement approved by Pentagon officials. But the financing has now been terminated by Israel rather than risk disclosure of details of the expenses.

According to Lt. Gen. Howard M. Fish, director of the Defense Security Assistance Agency and the Pentagon's top arms salesman, the United States provided about $2.8 million in foreign military credits to pay the Israeli mission's expenses from December, 1975, until cancellation of the arrangement earlier this month.

A breakdown provided by Fish showed that during the first 16 months the U.S. financing went for such items as telephone, telegraph and teletype charges ($550,000); consultation fees for marketing research, engineering and quality control ($500,000); U.S. legal fees ($260,000); computer services ($200,000) and U.S. travel by the Israeli purchasing officials ($70,000).

Responding to a Freedom of Information Act request from The Washington Post, the Pentagon refused to make available the invoices which had been submitted by the Israeli arms mission to back up requests for payments.

Charles W. Hinkle, director of the Pentagon's freedom of information staff, said the Israeli mission had requested that the invoices be withheld on grounds that disclosure of this detailed information would be "prejudicial to the security interests" of the mission.

The possibility that details of the expenses might be disclosed apparently lies behind Israel's decision to discontinue the U.S. financing, according to Pentagon officials. The Israeli decision was made known in a letter to the Pentagon Aug. 9 from Josie Ciechanover, director of the New York mission.

The Israeli arms purchasing mission, which employs almost twice as many Israelis and Americans as the Israeli embassy in Washington, is unique in both its size and sophistication. It is also the only such foreign organization in the world financed by U.S. funds.

Fish, who approved the financing plan two days after a request from Israel on Dec. 19, 1975, defended it in an interview as "a perfectly legitimate arrangement" which is legal and proper under the Foreign Military Sales Act. He said the administrative expenses of the Israeli purchasing mission have been classified as a "defense service" which can be financed under U.S. law.

The legislators most directly involved in the financing of Israeli arms, Sen. Hubert H. Humphrey (D-Minn.), chairman of the Senate Foreign Relations Subcommittee on Foreign Assistance, and Rep. Lee Hamilton (D-Ind.), chairman of the House International Relations Subcommittee on Europe and the Middle East, said they knew nothing of the financing arrangement.

Hamilton has sent a letter to the Defense Department asking for details.

For the past several years the United States has provided Israel, as part of a $2.2 billion annual aid package, with $1 billion annually in foreign military sales credits, $500 million a gift and $500 million a loan.

The arms mission expenses must come out of the loan portion, according to the Pentagon ruling. Such loans to other countries must be paid back with interest in 7 to 12 years but Israel, under a special provision of law, is permitted to make its repayments over more than 20 years with a grace period of 10 years on repayment of principal.

"I don't view this as taxpayers' dollars [going to the Israeli arms mission]. This is credit financing which Israel has to pay back with interest," said Fish.

The purchasing mission in New York, which is a branch of the Israeli Ministry of Defense, make about 30 per cent of its purchases through the Pentagon and the rest directly from private firms. Pentagon officials have described it as highly effective in obtaining the best prices and delivery schedules for Israeli purchases.

The mission's direct link with U.S. arms manufacturers is also an important source of information and expertise, according to defense officials. "They've come in and asked for things that were still so secret I wasn't even cleared to know about them," an official said.

In addition to being the largest recipient of U.S. arms aid, Israel is now a major arms producer and exporter that competes with U.S. manufacturers and on some occasion has clashed with U.S. arms sales restrictions. Israeli defense officials have said the U.S.-financed operations in New York do not involve Israeli arms sales, but only purchases. Fish said he has "no indication" that the U.S. financing has contributed to the Israeli sales effort.

According to Fish, no entertainment expenses of the Israeli mission were financed by the U.S. payments. The United States made clear from the beginning that, unlike administrative expenses, the salaries of the Israeli or American personnel in the mission could not be charged to the U.S. credit program.

WYOMING FOOTBALL TEAM—AA CHAMPS

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. LUKEN. Mr. Speaker, I would like to call attention to what I believe to be a significant occasion for some young people in my district. Recently,the Wyoming, Ohio High School Football Team won the AA championship of the State of of Ohio. The work that went into obtaining this title was indeed great and I would like to give both the team and the coaching staff the recognition they deserve.

The following people comprise the winning team for the State of Ohio and it was a job well done. Congratulations.

WYOMING FOOTBALL TEAM

COACHES

Bob Lewis, Garry Jump, Don Rahe, John Debalasis, Kurt Rockel, and Tom Ritz.

MANAGERS

Rob Bedenkop, David Fagin, Tom Savage, trainer; Mark Boudreau, trainer.

TEAM MEMBERS

Chris Bolle, Jeff Russell, Andy Packer, Terry Pitman, Tony Clark, David Gordon, Mike Moore, Ray Steight, Auto Bierman, Rich Sanaha, Aaron Samuel, Steve Lohman, John Tulesky, Pat Clark, Robbie Edington, Greg Livingston.

Frank Jacobs, Tim Marty, Day McMurrain, John Gentry, Sam Ach, Bill Buscher, Dan King, Karl Bahm, Todd William, Chuck Wright, Greg Saul, Jim Filan, Wendell Reed, Jeff Dennis, Chip McAuley, Clay Kull.

Buddy Reese, Bruce Stebbins, Will Putnam, John Spaulding, Steve Guggenheim, Steve Leonard, Scott Myhre, Jack Mueller, Olaf Strom, Craig Centry, Kevin Bates.

THERE MUST BE A BETTER WAY

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. MILFORD. Mr. Speaker, I have heard it proposed that if you want to make something look attractive—garbage, for example—you simply put a high price on it, and the buyers will flock in.

Apparently, though, that does not hold true if the waste product you are trying to sell is, in fact, useful.

The Fort Worth Star-Telegram pointed this out quite clearly yesterday in an editorial, which I would like to have included in the RECORD.

It would appear that the Consolidated Edison Co., in New York, very commendably has packaged its waste steam from power generation, and put it up for sale to heat buildings.

And then put a price on this waste steam which makes it cost the customer almost twice as much as oil.

It would appear we have taken one more step backward toward solving our energy problems.

The article follows:

[From the Fort Worth Star-Telegram
Nov. 28, 1977]

OIL IS CHEAPER THAN STEAM

Pssst. Congress.

Lend us your ear.

One of the reasons that few people are switching to alternate sources of energy is because oil and gas are too cheap.

The law of supply and demand works. In New York, Consolidated Edison Co. sells the byproduct of its electric generation—steam—to heat buildings.

The ConEd steam is used to heat such structures as the World Trade Center and Rockefeller Center, Energy Daily reports.

Many New York landlords, however, are installing their own boilers instead of buying ConEd heat. Simple reason.

ConEd steam costs about $7 per million Btu. No. 2 fuel oil can be bought in New York for $3.75 per million Btu.

Want to discourage the unnecessary use of oil and gas? Simply let price seek its level.

Congenerated steam won't be attractive in New York or anywhere else so long as building managers can heat with gas and oil less expensively than with waste steam.

THE GREEK ELECTION

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. DERWINSKI. Mr. Speaker, we too often take for granted political stability in the Western World. I wish to direct the attention of the Members to an editorial in the Washington Star of November 28, which I believe to be an accurate analysis of the situation in Greece after their recent elections:

THE GREEK ELECTION

The recent elections in Greece gave that country's friends in the West few reasons to cheer. The basic piece of good news was that Prime Minister Constantine Caramanlis and his New Democracy Party retained a clear, if diminished, parliamentary majority. As the chief restorer of Greece's democratic tradition, after the collapse of a blundering junta in 1974, Mr. Caramanlis deserved the further four-year mandate he has now received. What he will be able to do with it is another question.

In most other respects, the electoral trends in Greece are not encouraging. The ruling party's share of the popular vote fell fom 54 to 42 per cent, and it will have about 175 rather than its former 215 seats in the 300-member Assembly. The principal gains were made by Andreas Papanderou's Panhellenic Socialist Party, which rose from 13.5 to 25 per cent of the popular tally, and from 15 to about 90 seats, becoming the chief opposition party in place of the rebuffed Union of the Democratic Center.

The most disturbing aspect of the voting trend is not the rise of leftist economic thinking but, in Mr. Papanderou's version, its baggage of anti-Western propaganda and hardline attitudes toward Greece's disputes with Turkey. A few days before the elections, Mr. Papanderou handily summed up his demagoguery by declaring that "the U.S.A. and the countries of NATO and the EEC (European Economic Community) support the expansionist policies of Turkey." Even the election of Melina Mercouri on the Panhellenic Socialist ticket does nothing to sweeten that bitterly anti-Western message.

So Mr. Caramanlis will have to cope with a stronger, less responsible opposition as he seeks to preserve Greece's NATO role and to shepherd the country into EEC membership. The NATO relationship was wrenched in the Greek reaction to the invasion of Cyprus by one NATO ally, Turkey, and the failure of the United States and the other NATO allies to prevent it. Membership in the Common Market—a partnership with many of the same Western military allies—could be the salvation of the Greek economy but is distasteful to left-wing ideologues.

In dealings with Turkey about the future of Cyprus (with its Greek ethnic majority) and about conflicting claims to resources of the Aegean Sea, Mr. Caramanlis needs all the support he can muster for whatever compromises are possible. The opposition's continued use of an extremely nationalistic, anti-Turkish line could make any agreement difficult. Turkey's weak coalition government is even more handicapped should it seek to demonstrate public support for reconciliation between the Aegean neighbors.

One pessimistic view of the voting trend sees an increasing polarization of right and left, threatening a return of the parliamentary crises that damaged Greek democracy in the past. It is encouraging that, if the movement is toward fragmentation of the Greek electorate, it stopped well short of transforming the Caramanlis government into a struggling coalition dependent on tenuous political understandings. Four years with a safe majority might be enough to do wonders.

CHRIS HARDEE ELECTED NATIONAL FFA OFFICER

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. FUQUA. Mr. Speaker, the Future Farmers of America provide one of the finest training grounds for young people of any organization I know. It, therefore, is with special pride that the young men and women studying vocational agriculture in my district are honored with leadership positions in this great institution.

Thus, I take special pride that Chris Hardee of the Chiefland senior chapter of Chiefland, Fla., in my district, was named the southern region national vice president of the 50th national convention in Kansas City, Mo., recently.

And it is a special distinction that 11 of the 23 young people from Florida receiving the American Farmer degree are from my district. They are: Chris Hardee and Faron Perryman, Chiefland chapter; John Smith and Randy Hanna, Greensboro chapter; Patricia Harris and Lauren Hesser, Santa Fe senior chapter; Joe Hendricks, Lake Butler senior chapter; Kevin Huesman, Bronson chapter; Edwin Mozley, Malone chapter; Jeffery Parish, Vernon chapter; and Ricky Slaughter, Trenton chapter.

The area I serve in north Florida is the major agricultural area of our State and I think the fact that these young people merited the FFA's highest award is a tribute not only to them, but to their parents.

Chris Hardee is another in a distinguished line of national officers of the FFA from the Sunshine State, and he will be one of the best. The son of Levy County Commissioner and Mrs. Charles Hardee of Chiefland, he exemplifies the qualities of leadership that typify these young people.

It has been a long climb to this position of honor, serving as president of his local chapter in high school and then serving as Florida FFA president in 1975–76.

Following his year as State president, Hardee enrolled in animal science at Auburn University for 1 year before dropping out this fall to concentrate on running for national FFA office.

To be one of the six national officers is a tremendous tribute to this fine young

man. During the coming year he will travel across the Nation and that experience will be worth all of the effort and devotion which has gone into his achieving this mark.

To Chris Hardee, his parents, to all of these young people who received their American Farmer degree, and their parents, I extend my warmest congratulations. I know how much it means for I stood in their shoes once myself, and it is still one of the proudest days of my life.

BEN WEIR, SR.

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. SKELTON. Mr. Speaker, in 1787, in a letter to Col. Edward Carrington, Thomas Jefferson offered this famous opinion on the importance of a free press:

The basis of our Government being the opinion of the people, the very first object should be to keep that right; and were it left to me to decide whether we should have a government without newspapers, or newspapers without a government, I should not hesitate a moment to prefer the latter.

Since the founding of the American Republic, newspapers have played a vital role in protecting our freedoms and in keeping people informed. The publishers of newspapers are, in a sense, guardians of the public trust. A good newspaper publisher can make a unique contribution to the quality of life for the people in his community.

It is, then, with a deep sense of regret that I note the passing of a fine newspaperman, Ben Weir, Sr., publisher of the Nevada Daily Mail in Nevada, Mo. Ben's career as a newspaperman began more than 40 years ago at the Daily Globe in Atchison, Kans. In 1945, he became publisher of the Nevada Daily Mail, where he remained until his death, except for 4 years as publisher of the Independence Examiner. In 1968 the University of Missouri School of Journalism honored him for distinguished service to journalism.

In addition to his efforts as a journalist, Ben Weir was an active member of the community. At one time or another, he served as president of the Rotary Club, president of the chamber of commerce, a member of the National Boy Scout Council, and a regent of Southwest Missouri State College. He was a member of the United Methodist Church in Nevada.

Ben is survived by his son, Ben Weir, Jr., of Marshall, Mo., his daughter, Ludmila Ann Dickeson, of Flagstaff, Ariz., and three grandchildren.

Ben Weir was a fine family man, an exemplary member of the community, and a dedicated journalist. He will be sorely missed by the people of western Missouri, to whom he meant so much.

HOMES, DISAPPOINTMENT RISE IN SANTA BARBARA ASHES

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. LAGOMARSINO. Mr. Speaker, we are all aware of the devastation caused by the brush fire which swept through Santa Barbara last July 26, destroying 216 homes and causing $33 million damage. However, my colleagues may not be aware that since the fire things have not gone as well as might be expected. Although the director of the SBA declared an emergency in the area, making it eligible for low-interest loans, President Carter for some reason declined to follow through with a disaster proclamation, which would have provided Federal assistance for debris clearence and temporary housing. This despite the fact he was requested to do so by myself on the day of the fire, and subsequently by Senators CRANSTON and HAYAKAWA, Governor Brown, Assemblyman Gary Hart, and State Senator Omer Rains, who was the President's Western States campaign chairman. As a result, many people whose homes were destroyed have been forced to endure extra expense and hardship. These are people facing uninsured losses of $50,000 and more.

In order that my colleagues, who bear the duty and responsibility for developing national policy on disaster assistance, may have the benefit of the latest information on this situation, I insert the following article from the November 28 edition of the Los Angeles Times in the RECORD:

HOMES, DISAPPOINTMENT RISE IN SANTA BARBARA ASHES

(By John Hurst)

SANTA BARBARA.—They don't like to call it bitterness. That seems to lack grace. Disappointment is the word Mayor David Shiffman chooses.

"We are not a bitter people by nature," he said.

However, as new houses begin to rise out of the ashes of the July 26 fire that destroyed 216 homes, the victims of the blaze speak with an edge of bitterness about the federal government and, in some cases, the state and the news media.

There is a feeling here that the federal government, in denying Gov. Brown's request to supply temporary housing and debris clearance aid, was as unfeeling as the fire itself, which started when a runaway kite pulled power lines together, sending down a shower of sparks that turned drought-parched Sycamore Canyon into an almost instant inferno.

There is a feeling, too, that the governor was not as aggressive as he could have been in seeking federal aid.

"The governor's own people were very reticent about asking for federal assistance," Shiffman said. "We were very insistent that they go to the federal government and they took their time on making the request."

There also is a feeling that the news media hurt the fire victims' chances of federal assistance with inaccurate reports that the destroyed homes belonged to wealthy folks who watched their homes burn while sipping margueritas aboard yachts in Santa Barbara Harbor.

"I have a building inspector who lost his home up there," said Ray Nokes, head of the county Building Department. "You know, he's worked hard all his life and he had a little boat down in the harbor. He had a little motor cruiser. . . . He went down and lived on his boat and in the media it came out that he was on a yacht."

The inspector makes about $18,000 a year, Nokes said.

Nokes took a survey of fire victims the weekend after the blaze and of those who were willing to discuss their income, it averaged about $22,000 a year.

The average insurance coverage was $48,000 for dwellings that Nokes estimated will cost an average of $100,000 to rebuild.

The fire victims represent a cross-section of occupations, according to Nokes.

"In certain areas there are many people where both the husband and wife work," he said. "They are some kind of mechanic or carpenter . . . The wife works as a secretary . . . We have people on welfare, unemployed, clear up to retired generals."

Nokes said 75 permits have been issued to rebuild homes in the fire zone but owners face tougher regulations aimed at cutting down the fire danger.

No shake roofs will be allowed, for example, and owners who want wood siding on their homes are required to install sheet rock underneath it, adding greatly to the cost of homes that generally were far underinsured.

Many owners of older hillside homes are finding that their foundations, although undamaged by the fire, are not up to contemporary standards and will require replacement or major correctional work, also adding greatly to the cost of rebuilding.

No final figures on the damage caused by the fire have been compiled but the American insurance Assn. in San Francisco estimated the insured loss at $20 million. That figure includes personal property, as well as dwellings.

Nokes estimated the fire caused $24.5 million in damage to dwellings, $8.2 million in personal property losses including vehicles, and $1 million in damage to public property such as roads, utility lines, bridges and flood control channels. (A state estimate set the public property damage at $500,000.)

Nokes' total loss figure comes to more than $33 million but Shiffman said the total cost of the fire could well reach $50 million.

While President Carter, through the federal Disaster Assistance Administration, denied Brown's request for temporary housing and debris clearance aid, the director of the federal Small Business Administration declared the fire victims eligible for SBA low-interest loan assistance.

By mid-November, more than $3.8 million in federal loans to fire victims had been approved, according to Richard Schulze, manager of the SBA disaster branch in Santa Barbara. The deadline for applications is Wednesday.

The loans were granted to owners of 119 homes and 15 businesses in the fire area, Schulze said. The most common amount of a loan was $45,000, he reported.

"On our experience," Schulze said, "the average person was about 40 percent underinsured."

An SBA loan, Schulze said, is to be used to make up the difference, if possible, between the amount of insurance on a destroyed house and the cost to replace it. However, the maximum SBA loan is $55,000 and most of the houses will cost more than $100,000 to rebuild. Whether a fire victim will have

enough money between the two sources to rebuild will depend, of course, on how close the insurance coverage kept pace with rising construction costs.

Ten SBA loan applications were declined, Schulze said, because the applicants had no evident ability to repay.

Renters, he said, were hard hit, especially those with small craft businesses operated from their homes. Some lost everything and are not eligible for an SBA loan due to lack of incomes.

Homeowners who are rebuilding in the fire area—and most fire victims are expected eventually to rebuild—must get clearance from a newly formed technical review team, consisting of experts, such as engineers, from various public agencies.

County and city officials are considering controlled burning in the future as a fire prevention method, a procedure previously was banned because of air quality concerns.

Erosion and flooding are primary concerns since the fire damaged or destroyed acres of vegetation. The county has done some reseeding and some fire victims, whose homesites face possible mudslides, have tried on their own to prepare defenses.

Frank and Ellie Ruffing are rebuilding in Sycamore Canyon.

On the steep hill behind the site where their new house is going up, grass and shrubbery are watered by a sprinkler Ruffing installed. The grass spouted from seed he planted on his own.

The rubble of the house next door lies exposed to a bare dirt hillside behind it that could come sliding down on the ruins with the first heavy rain. That family will wait until spring to rebuild.

Ruffing described his flood control and mudslide prevention advice from members of the newly formed technical review team:

"One said, 'Don't do anything to that hill other than plant rye grass." Another guy came along and he said, 'Dig a ditch.' Another guy said, 'Use sand bags' . . . But they finally all got together and issued a building permit." Ruffing, a retired businessman from Ohio, bought the house in 1970. It was insured for about 60 percent of the cost to rebuild it. He hopes to get an SBA loan to help make up the difference.

The Ruffing also lost an estimated $60,000 in personal possessions that were underinsured.

They have insurance covering emergency living expenses but like many other fire victims, they found it difficult to find a place to rent in Santa Barbara.

"We looked and looked," Mrs. Ruffing said, "and could find no place that would take a dog to begin with. And when we did find a place that would accept a dog, it would be as high as $600 to $700 rent."

Like many others, the Ruffing stayed with friends until they found a place to rent.

Mr. and Mrs. Jim Williams moved five times since the fire, staying with friends and at motels until, after two months, they found a small duplex to rent for themselves, their 15-year-old son and their dog.

Like the Ruffings and other fire victims, the Williams are upset with President Carter's refusal to declare a state of emergency in Santa Barbara and with what they consider erroneous news reports that all the victims are wealthy.

The Williams are not rich. Williams works as the public information officer for Santa Barbara City College.

They bought their modest home, including the lot, for $19,200 in 1960. The only firm estimate they have gotten so far put the rebuilding cost at $62,500.

They were insured for about 50 percent of the rebuilding costs and hope to get an SBA loan to help cover the rest.

Except for the SBA officers, and California Conservation Corps workers who helped clear some of the debris, the Williams said help for fire victims came from friends, relatives, coworkers and private organizations.

"It did not come from government," the 45-year-old Williams said.

When Brown came to Santa Barbara after the fire to attend a conference on solar energy, Williams felt the governor should have been concentrating, instead, on the needs of the fire victims.

"He kept talking about solar energy," Williams said, "and I thought, 'Bull feathers,' because at that time we were living in a motel and I was more concerned with a roof over our heads than solar energy."

Besides the physical problems of shelter and clothing, the victims of the fire have gone through emotional troubles, according to the Williams. A panel of psychologists and psychiatrists recently met with a group of fire victims to discuss mental problems, the couple said.

Some couples have split up as a result of the strain, Mrs. Williams said, and children have been traumatized by the fire.

"Some parents are saying, 'I wish to goodness we had left earlier,' " she said, "because the children saw the house on fire and they're having nightmares."

It did not go unnoticed in Santa Barbara when Carter declared a disaster in Toccoa, Ga., the day after a dam burst there on Nov. 6, killing 39 people and doing an estimated $2.5 million in overall damage.

"I hate to tell you my first thoughts," Mrs. Williams said, "because I'm sure it's unfounded. But I thought, 'My gosh, it makes a difference if it's your home state and if the state carried you in the election.' There were lives lost, (but) . . . I have to admit, I did feel a little twinge of resentment."

Mrs. Williams' reluctant resentment is indicative of an undercurrent of suspicion in Santa Barbara that bad political blood between Brown and Carter influenced the reaction to the Santa Barbara fire.

It is not clear why Toccoa was declared a disaster and Santa Barbara was not.

There was loss of life in Toccoa and not in Santa Barbara but the federal programs connected with a presidential declaration of disaster have nothing to do with casualties. The programs are aimed at aiding survivors.

Moreover, the number of families left homeless, and the magnitude of the damage was far greater in Santa Barbara than in Toccoa.

Whatever the difference, people in both locales are trying to put their lives back together.

In Santa Barbara, the lure of the gorgeous mountain country is bringing the fire victims back to face tighter building restrictions, greater costs, mudslide hazards and the ever present danger of fire.

Ralph Whitmer, 66, and his wife, Marjorie, have hauled a house trailer up to the ruins of their home on a mountain lane aptly named Ridge View Road.

There, over a stunning view of the back country, Whitmer, who is retired, works to rebuild his house, using plans he drew himself.

"All through life, you've got to take some chances," he said when asked about the fire danger. "You can't play everything safe. Where can you go that there isn't some chance"?

COMMUNISM, SOCIALISM, AND DEMOCRACY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. DERWINSKI. Mr. Speaker, Dr. David Owen, Britain's Foreign Secretary, is one of the prominent diplomats of this period. He is a scholar, historian of note as well as an outstanding representative of his country.

On Friday, November 18, Dr. Owen delivered the Hugh Anderson Memorial Lecture to the Cambridge Union Society on the subject of the relationship between socialism and communism in contemporary Europe. His lecture comprises the first authoritative assessment by any Labor Government minister of the challenges posed to socialists by what is sometimes termed Eurocommunism.

Basically, Dr. Owen rejected the term "Eurocommunism," and did so in a scholarly yet direct fashion. His address follows:

COMMUNISM, SOCIALISM AND DEMOCRACY

Today there are few questions requiring a more urgent and considered answer from Democratic Socialists than how to deal with the Communist Party in Europe. It is an urgent question because, in a number of countries, Communist Parties claim to have changed and, specifically, to have abandoned their subservience to Moscow and acquired a commitment to parliamentary democracy.

The power and influence of Communist Parties in a number of European countries has given added urgency to the question. In Italy, the Communist Party, with thirty-four per cent of the votes in the 1976 parliamentary elections and a long involvement in regional and local government, is now the second most powerful party. In Spain, Senor Carrillos defiance of the Soviet Union seems to be making him into a popular figure and the Communists are major political rivals of the PSOE or Democratic Socialists. In France, where support for the Communists appears to be falling, Communist electoral support was nevertheless sufficiently large for the Socialists and left-radicals to have to reckon with it in forming the left coalition.

THE BLURRING OF THE EDGES

In Britain, although Communist Party membership in July this year stood at only 25,293 (twenty-five thousand two hundred and ninety-three), the CP remains influential. On a whole series of fronts Communists are active, not as Communists used to be, advancing the claims of their party, building up their support in industry and attacking Democratic Socialists, but in the student broad left, as anti-racists, women activists or community workers.

This dangerous conscious blurring of the edges between communism and socialism—which has the Morning Star referring to MPS not as Labour but as left or Social Democrat—puts the challenge to Democratic Socialists at a more insidious level. The challenge remains. Nevertheless in this new modified respectable form it is far more dangerous, for it presents a real risk of eroding the foundation stone of socialism's commitment to democracy.

COMMUNISTS AND THE BALLOT BOX

The central question is not whether, or to what extent, the Communist Parties in Europe are still Marxist—leaving Communist Parties aside, Marxist thought is in any case part of the intellectual inheritance of Western Europe and together with methodism, guild socialism and anarchism, an important strand in Labour Party thinking. We have instead to ask ourselves what the attitude of these Communist Parties really is to democracy and to the ballot box. At the seventh congress of the comintern in 1935, Georgi Dimitrov, the secretary general, said in launching a popular front policy:

"Comrades, you will remember the ancient tale of the capture of Troy . . . we, revolutionary workers, should not be shy of using the same tactics. Is communism in Europe a later-day Trojan horse for dictatorship and totalitarianism? Or has there been a qualitative change since the 1930s, as a result of which the major Western European Communist Parties have a genuine and lasting contribution to make to the further development of democracy within a framework of individual liberties and pluaralist values?"

The questions are unanswerable. The Communist Parties in question have yet to be put fully to the test of governmental responsibility and, unless and until they are, nobody, including even their leaders themselves, can be certain of what will happen. What is important is that we should try to understand clearly the nature of communism in Europe, as it has evolved so far, and to seek to establish in what direction it may be moving. In the meantime, the issue which divides Democratic Socialists from Communists in this country—that of a proven commitment to democratic values and institutions—must be regarded as equally relevant to our relationship with the Communists on the continent.

THE PROFESSION OF PLURALISM

The plain truth is that open support for the ballot box is the only feasible path to political power for all western Communist Parties. The espousal of the ballot box is a political necessity for them. The explanation for their conversion is power. You have to search hard for any underlying philosophical justification for democracy. any espousal of libertarian values, any fundamental respect for diversity, any political humility.

Professions of support for pluralist democracy give us no guarantees of how political power, once acquired, would be used. In particular, the vagueness with which the parties describe the situation following the transition to communism can only increase suspicions. As Sr. Carrillo was quoted as saying in 1974 (nineteen seventy-four): "All we can say on this subject belongs to the sphere of future prospects as we see them, without it being possible to rely on precedents."

A SERIOUS PHENOMENON

These are some of the fundamental questions which the development of communism in Western Europe raises for Democratic Socialists. It is, however, no use looking on this development as an alien organism, to be treated contemptuously. It is a very serious phenomenon which needs analysis and debate. It is an indigenous product of national political processes and of a widely felt need for change and, for millions of Europeans, it has provided the means of re-engaging in the democratic process. The effectiveness of the Communist resistance in occupied France or fascist Spain, or of efficient local government by Communists in Italy, have all provided the communist parties in these countries with a degree of support that is itself an indictment of the failure of Democratic Socialist Parties to produce and implement effective policies. Yet, at the same time, it is the very broadness of the spectrum to which the Communists are appealing in these countries which gives hope to Democratic Socialists. Democratic Socialism can and should win back those voters.

THE DANGERS OF TERMINOLOGY

It is deliberate that I have not once mentioned the term Eurocommunism. I am deeply skeptical that any such a unified phenomenon exists. It is a dangerous term. It confers a respectability on an ill-defined, disparate and as yet unidentifiable phenomenon. It is very interesting that western Communist leaders themselves are now using the term Eurocommunism. They recognise it has an appealing quality. It is a convenient portmanteau term. It tends to make people suspend their critical faculties, avoid analysing the phenomenon seriously, country by country, and instead take refuge in generalities.

Eurocommunism is becoming respectable. It is a term which Socialists should eschew. We should give it no currency. I reject the term because I am not convinced that the phenomenon which it is supposed to describe exists as a separate entity. I reject the term because I do not wish to give communism anywhere a spurious credibility, particularly in Europe. I reject the term because it can easily mean lowering the guard of Democratic Socialists. It will not be long before we will be asked to link the British Communist Party with Eurocommunism. An attempt is already being made to persuade the Labour Party to confer on British Communists, the same credibility as we are in danger of giving to their Italian, French and Spanish counterparts.

WE MUST RESIST

The danger is that the Labour Party will be slowly turned away from its present outright opposition and traditional hostility to the Communist Party in Britain. We will be asked first to tolerate, then to associate and then to combine with the Communists under the broad banner of the left and embraced within the heady froths of Eurocommunism. We must resist for it could spell electoral death for the Labour Party.

THE WISE APPROACH

Instead, we in Britain should approach French communism in relation first to how French Socialists wish us to approach French Communists. The British Labour Party's prime relationship is with our fellow French Socialists or Italian Socialists or Spanish Socialists. This was the wise approach of the NEC international committee when considering whether to invite delegations from Communist Parties to annual conference. They first consulted and had the agreement of the Socialist Parties.

In working with our fellow Socialists we are bound to pay due regard to their own national political circumstances and their own national involvement with the Communist Parties. But it is not part of our philosophy to work independently with their Communist Parties. We should deliberately fragment so-called Eurocommunism so as to deal with it country by country, recognising that vigilance should be our watch word and that it is not in the interest of Democratic Socialism to promote Communism at the expense of our fellow Socialists anywhere in Europe.

SALUTE TO SENIOR CITIZENS

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. APPLEGATE. Mr. Speaker, I would like to take a few moments to address my fellow colleagues, and to enter as part of this RECORD, a statement reflecting the accomplishments and contributions of this Nation's senior citizens.

Through every walk of life and in every profession, the direction and wisdom which these men and women can provide is indeed far more valuable than can be accountable in words. As we so rapidly move and progress in today's world, the guidance offered through the experiences of these leaders can serve an even greater value. A quick glance through the pages of history indicates how previous great civilizations valued and respected the heritage and wisdom of their elder citizens.

In many cities and towns, both small and large, organizations uniting senior citizens together with a common goal can be found. These organizations not only provide a vital social function for senior citizens, but they also channel valuable service contributions by their membership to their respective communities. I direct your special attention to one such organization located in my district in Jefferson County, Ohio. This senior citizen's organization was the first such organization west of the Alleghany's.

Over the years, the accomplishments and services provided by this organization have been tremendous. I know that our community dearly values the existence and accomplishments of this fine group. I would like to commend this organization and I would hope that each of my colleagues will join with me in this salute, not only to this particular organization, but to the entire community of senior citizens in this country.

FUEL COST ADJUSTMENT REBATES

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. WALGREN. Mr. Speaker, today Congressman MARC L. MARKS and I are introducing legislation aimed at the burden of increased utility costs automatically passed through to the public in the form of fuel cost adjustments.

At our town meetings, we have been struck by the number of elderly people on fixed incomes who have great fear that they will not be able to pay to heat their homes. They come to us with their gas bills in hand, distraught at the increases through the fuel adjustment clause that more than double their bills.

A recent study by the Congress revealed that in 1976 utility customers paid $12.7 billion more for electricity and gas service than they had in 1975. Three-fourths of this increase—$9.6 billion—was automatically billed to consumers through fuel cost adjustment clauses. This represents an average increase of $380 for each household in America.

The legislation we introduce today provides for rebates from the Federal

Government equal to the amount people 65 years of age and older, with adjusted gross incomes of $15,000 or less, pay for electricity and gas under automatic fuel adjustment clauses.

These rebates would be in the form of tax credits in excess of an individuals' tax liability. They would be available to both renters and homeowners for automatic cost increases incurred for nonbusiness, residential purposes in a principle dwelling only.

The median income for our citizens 65 years of age and older is $8,721. These are the people who can ill afford increased fuel costs.

Our bill would provide relief for 77 percent of this population group by focusing credit on those who have the most dramatic need for relief, elderly renters and home-owners.

We urge prompt consideration of this bill.

EXTRA CAUTION NEEDED FOR HOLIDAY CAROLERS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. PICKLE. Mr. Speaker, each year we are all saddened to read of tragic accidents during the Christmas season. All too often we, or our friends, are touched by these tragic moments in a personal way.

A recurring cause of accident is the hard-to-see Christmas caroler being run down by an automobile during an evening of holiday singing.

The American Optometric Association has come forward with the wise suggestion that carolers make sure they are wearing reflective clothing.

To give this holiday tip to avoid unnecessary tragedy wide and needed publication, I ask that the announcement of this suggestion be placed in the CONGRESSIONAL RECORD, as follows:

Christmas caroling can be hazardous unless carolers are seen as well as heard, warn the nation's optometrists.

According to the American Optometric Association, carolers risk injury and death from pedestrian-auto accidents because, usually dressed in dark clothing, they are difficult for drivers to see at night.

A simple solution, the optometrists say, is for carolers to wear outer clothing trimmed with retro-reflective material.

Optometric studies indicate that retro-reflective material, which contains hundreds of tiny beads that reflect light back to its source, is the only material safely visible to drivers at all legal speeds, as well as excessive speeds up to 80 m.p.h.

Even more important for carolers, who often share the street with intoxicated drivers, retro-reflective material is safely visible to drunk drivers at all speeds up to 70 m.p.h. In the studies, ten percent of the pedestrians wearing black were not seen in time by drunk drivers traveling at 20 m.p.h. and almost six percent of those wearing white were not seen in time at 40 m.p.h.

Many manufacturers are adding retro-reflective material to ready-to-wear coats and shoes but iron-on and sew-on varieties make it possible to turn any outerwear into safe wear at home, says the American Optometric Association. Carolers should be certain, however, they are safely visible from front, sides and back.

NADER'S FANS PLAN IS JUST PLAIN N.U.T.S.

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

[From the El Cajon Daily Californian, Oct. 21, 1977]

NADER'S FANS PLAN IS JUST PLAIN N.U.T.S.

(By Bud Tucker)

LOS ANGELES.—Actually, you would have thought Ralph Nader was too busy saving us from the ravages of inferior food, clothing, automobiles and flea collars to worry about the manner in which we are being raped by sports promoters.

Nonetheless, good old Ralph has found time to establish an organization entitled Fight to Advance the Nation's Sports, or FANS, which would lump us together under the designation of consumer advocates.

Among those things from which we would be protected by FANS is increased prices for tickets to sports events. FANS will also strive to insure that all food and beverages served at sporting events are pure and wholesome.

FANS will also seek to get us a seat on the board of directors of our favorite franchise. Citing the trade of Tom Seaver from the Mets to the Reds without consulting the citizens of New York, Nader vows to put an end to this sort of bullying on the part of the owners.

Well, Ralph, at the risk of coming across as a sniveling ingrate, this tourist declines with thanks your generous offer. I, for one, am reasonably happy with the way things are going at the moment.

Sure, ticket prices are too high. But so is the cost of coffee and ham and eggs. Geez, milk is up to something like 50 cents a fifth.

The consoling aspect of all of this is that we can't stop buying groceries but we can discontinue purchasing tickets to sporting events. I mean, we can't get hamburger steak on television but there is no shortage of athletics.

In the matter of food, Ralph, you are making mention of the fact the stuff we get at the stadium is junk food and you would save our bodies from breakdown and ruin. Presumably, you will police the kitchens at arenas around the country and replace the hot dog with a spinach sandwich.

Well, most of us like hot dogs. Furthermore, the fatter and juicer the wiener, the better we like it. One of the real pleasures about going to the stadium is to fill ourselves with junk food and liquid moonlight and feel lousy the next day and swear up and down never to do it again. The thing is, we prefer to make the foregoing oath entirely on our own.

Besides, hot dogs are American. Spinach sandwiches are not.

If a client at the ballpark wishes to pay $2.00 for a flimsy little pennant which says "Los Angeles Dodgers" on it, that should be his own affair. He may be from Podunk and will never again see a major league game and will cherish his little banner for the rest of his life.

Hell, Ralph, in San Diego they sell satin cushions with "Mother" stitched on them. With the price of these things, they have been ripping off the sailors for decades.

Finally, Ralph, if you think we onlookers wish anything to do with trading or selling athletic livestock, you are hallucinating.

For instance, if the Los Angeles Rams lay out a fortune for a creaking quarterback named Joe Namath, we prefer such an experiment to be entirely on the heads of the Rams and the individual who makes the final decision.

You see, if Namath falls on his pompador, we wish to retain the right to sit in the seats and scream that the person responsible is a fathead. We can hardly do this if we are involved in the decision.

Similarly, if Gene Autry wishes to spend $5 million a year in an attempt to pump up the California Angels, we do not wish to have any of this squandering on our conscience.

The next thing likely to happen is that we would get involved with salary negotiations. Really, Ralph, we don't wish any truck with the likes of Howard Slusher and his inflated ideas of what certain of his clods are worth.

Dealing with agents is not for us. Carroll Rosenbloom of the Rams has had such an agonizing time with player agents his hairpiece is getting grayer.

Finally, Ralph, it has to be conceded there are some elements from which we need protection. Not the least of these would be an outfit called FANS which asks us to send in $9, the cost of two tickets to a baseball game, for membership.

An organization to spare us such insults to our intelligence might be called Nader Underestimates This Society.

EFFORTS BY THE ICC TO INCREASE COMPETITION IN TRUCKING INDUSTRY

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. HILLIS. Mr. Speaker, during the recent congressional break, I became aware of current efforts by the ICC to increase competition in the trucking industry. I met with several constituents who are worried that those efforts will have an adverse effect on our trucking industry. Yesterday, I wrote to the Chairman of the ICC, the Honorable A. Daniel O'Neal explaining some of the dangers of increased competition. I would like to share that letter with my colleagues in order that they too can have the benefit of my discussion with businessmen who work with the trucking industry on a day-to-day basis. The letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 30, 1977.

Hon. A. DANIEL O'NEAL,
Chairman, Interstate Commerce Commission, Washington, D.C.

DEAR MR. CHAIRMAN: Recently, I had the fortuitous opportunity to meet with several businessmen in Kokomo, Indiana who are

concerned with the possible "deregulation" of the trucking industry. These businessmen expressed many valid concerns which I thought you should be aware of.

To begin with, it is my understanding that President Carter requested the ICC to reconsider its policies which regulate the establishment of new trucking companies. It was the opinion of the President that current policies make it difficult for new carriers to enter into any particular market place. As a result, competition has been unnecessarily discouraged.

In a preliminary effort to develop the case for deregulation, a staff task force was established by the ICC to review current regulations, procedures and policies. That task force subsequently made 39 recommendations in a report entitled "Staff Task Force Report on Improving Motor Carrier Entry Regulation." After these recommendations had been made public, the ICC then held several days of hearings in order to receive input on the findings of the task force. The testimony, as I understand it, which was received during these hearings is still being evaluated.

The concerns of the businessmen I talked to were many. Perhaps these concerns were best summarized by one gentleman who stated that deregulation of the trucking industry would result in a "fool's paradise." He explained that for a while everyone would be out trying to make money. Rates would go down and some companies would find that they were no longer able to continue to operate profitably. Many bankruptcies would follow and the only trucking lines making a profit would be a few large firms servicing large industries. Large companies would get larger and small companies would disappear.

Should these concerns become a reality, small businesses which must rely on small shipments of goods would suffer. As you know, shipments of less than 500 pounds are most often unprofitable. Under current regulations, trucking companies are mandated to carry these small shipments. If this situation should change, the small businessman would most certainly suffer.

Presently, customers are assured that carriers they contract meet the high standards of proper insurance and safety equipment required by the ICC. If the market place is opened to independent unregulated truckers, these guarantees would be eliminated. Furthermore, there would be increasing difficulties for individual states which require proper licensing and purchases of gasoline within their boundaries to compensate for the use of their highways to enforce their laws.

In my opinion, the transportation industry is a public utility. We must be careful to ensure that any change in the status quo is in the best interest of the nation. While I endorse the stated purpose of the ICC's efforts, i.e. to improve the ability of the independent trucker to contribute to the national transportation system, other factors must be kept in mind. The trucking industry is extremely complex and any major change in policy has several possible adverse effects which must be taken into consideration.

This country was founded on the free enterprise system—the essence of which is open and free competition. However, it has long been recognized that certain segments of our economy do not lend themselves to the advantages of open competition. Through the use of antitrust laws and federal regulations, our private sector is governed to allow open competition or to restrict it in a particular area, whichever is in the best interest of the public. The trucking industry is regulated. However, within those regulations, competition has been established and is well developed. This regulated competition has withstood the ultimate test of time. In fact, many shippers already believe that too much competition exists.

I do not need to express to you how important the trucking industry is to the United States. Any action which would prove harmful to that industry would prove disastrous to our economy. All concerned parties would agree that there is ample room for improvements in the ICC's regulations. To that end, many of the recommendations made by the staff task force appear to be worthwhile. I hope that those recommendations can be expeditiously approved and implemented. However, those recommendations aimed at increasing competition should be subjected to the most thorough scrutinization.

It is my sincere hope that the current Administration, and in particular the ICC, will consider very carefully all of the ramifications of reduced regulation and increased competition before taking any substantive actions. We must ensure that the careful balance between regulation and competition in the trucking industry is maintained.

Sincerely,

ELWOOD H. HILLIS,
Member of Congress.

ENERGY CONSERVATION MEANS A HEALTHY ECONOMY

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. DRINAN. Mr. Speaker, faced with bold assertions that serious energy conservation must come at the expense of economic growth, it is instructive to consider just how much energy saving is technically and economically feasible without hampering business expansion or sacrificing our quality of life.

This is especially important in weighing the promises of President Carter's national energy plan, in view of Energy Secretary Schlesinger's assurance to oil producers that "there is a very limited amount of conservation in this program."

I highly commend the following article from Technology Review, which discusses the enormous and untapped potential for energy conservation in the U.S. economy. One of its authors, Dr. Elias Gyftopoulos, is a Ford Professor of Engineering at the Massachusetts Institute of Technology, is an industrial energy conservation expert at the Thermo-Electron Corp., and advises me on energy legislation as a member of my energy policy task force.

The article follows:

[From Technology Review, June 1977]

ENERGY CONSERVATION AND A HEALTHY ECONOMY

(By Thomas F. Widmer and Elias P. Gyftopoulos)

It is only too well known that we are exhausting our finite store of fuels at an alarming rate, especially the gaseous and liquid forms. It's also painfully clear that we are investing more and more for new energy supplies and obtaining less and less for our money. International fuel prices have increased much faster than the prices of other commodities because of this scarcity of petroleum and natural gas and the high cost of new energy sources. Most indications are that this gap will keep widening for many decades to come. Fortunately, it is quite certain that we can re-optimize each energy-consuming task to achieve the same result at equal or lower cost, and use far less energy. In this paper we will show the firm technical and economic bases that underlie this seemingly bold assertion. We will show that there is an enormous opportunity for reduced energy consumption per unit of product in every sector of the economy; and if we do not take advantage of this opportunity, our economic well-being and security will be endangered.

Re-optimizing energy end-uses will, of course, require long-term commitments involving significant restructuring of all sectors of society. This restructuring cannot happen automatically, because of many institutional barriers and many distortions of the free market system introduced by past decisions. But these barriers and distortions are not insurmountable. They can be largely eliminated if we attack them with a comprehensive energy policy, such as the accelerated conservation policy we propose.

TECHNICAL ROOM FOR CONSERVATION

The laws of thermodynamics give us a most convincing technial basis for estimating the possibilities for energy conservation. Specifically, the second law of thermodynamics affords a yardstick that is universally applicable to all fuels and all processes. The second law implies that energy has a "quality" about it and that this quality can only be degraded as energy is consumed to perform useful tasks. The "available work" in a system is a quantity that takes into account both the quality and the quantity of energy (see "The Potential for Fuel Conservation" by Marc H. Ross and Robert H. Williams, February, 1977, pages 48-57). This "available work" concept has been used in several studies to measure the efficiencies of various energy-using processes in our society, as a function of the task to be performed, rather than the particular device used to perform that task. Some of the efficiencies estimated in these studies are:

Residential and commercial space heating: 6 per cent,

Residential and commercial water heating: 3 per cent,

Air conditioning and refrigeration: 5 per cent,

Automobile propulsion: 10 per cent,

Steel production: 21 per cent,

Petroleum refining: 9 per cent,

Cement manufacturing: 10 per cent,

Paper production: less than 1 per cent.

The total amount of fuel used in these applications is about 60 per cent of all U.S. energy consumption. The average efficiency of utilization, obtained by weighting each efficiency by the amount of fuel used for the purpose, is only 8.3 per cent. Moreover, the figure of about 8 per cent is believed to be fairly representative of the overall energy effectiveness throughout the economy. The 10 per cent efficiency given for automobiles actually overstates their performance considerably, since this calculation takes into account only the efficiency of converting fuel energy to tractive effort at the driving wheels. It is extremely difficult to specify auto efficiencies precisely because of various non-technical factors affecting the vehicle design, such as add-on hardware to enhance convenience, safety, comfort, etc.

We're not suggesting that energy efficiency will ever approach 100 per cent for real de-

vices or processes, even in the remote future. We wish to emphasize, however, that the present low values of efficiencies indicate the enormous opportunity for energy savings and that no fundamental scientific barriers exist to prevent substantial improvements in energy end-use effectiveness. Even a modest improvement, for example from 8.3 to 9.3 per cent efficiency, represents a saving of almost 10 "Quads" per year at the 1975 consumption level (where a Quad equals 10^{15} Btu's.). This is the energy equivalent of 4.6 million barrels of petroleum per day.

Some analyses mistakenly associate large energy savings with reduced economic activity. In 1972, for example, an analysis for the Chase Manhattan Bank stated almost fatalistically that "analysis of the uses of energy reveals little scope for major savings. The great bulk of the energy is utilized for essential purposes, . . . Conceivably, the use of energy for such recreational purposes as vacation travel and the viewing of television might be reduced—but not without widespread economic and political repercussions. There are some minor uses of energy that could be regarded as strictly nonessential—but their elimination would not permit any significant saving."

More correctly, a report by the Energy and Environment Division of the Lawrence Berkeley Laboratories answered that "more informed studies of energy use contradict this analysis. Especially misleading is the subjective phrase essential purposes, which obscures the whole question of efficiency. Careful analysis of energy use has revealed an enormous potential for energy conservation. The most recent forecasts from the Energy Research and Development Administration suggest that U.S. energy needs in the 1990s could be 20 to 40 per cent below what was previously expected, as higher energy prices and new end-use technologies help Americans squeeze more economic and personal well-being from every Btu."

The process known as cogeneration offers an impressive example of the energy savings obtainable using only current technology. Cogeneration—the combined production of electricity and industrial process steam—offers an opportunity for conservation because steam for industrial processes is produced at relatively low pressure and temperature and, hence, does not make good use of the high-temperature heat available from fuel combustion. The common practice of producing low-pressure process steam in a fuel-fired boiler is therefore thermodynamically inefficient. The practice can be made much more effective by first producing high-pressure steam in a boiler, then expanding this steam through a turbine to generate electricity and then exhausting the steam at the appropriate pressure level needed for the desired process.

The electricity thus produced is obtained at an additional fuel consumption rate less than half that achieved by the most efficient central station power plant. Since over 40 per cent of industrial energy—or about 16 per cent of all the nation's energy—is used in the form of process steam, the potential savings are enormous. In West Germany, cogeneration accounts for over 18 per cent of electrical needs, compared to only about 5 per cent in the U.S. A recent study by Thermo Electron Corp. for the Federal Energy Administration revealed that in just three industries—papermaking, chemicals, and petroleum refining—there exists the opportunity to produce over 34 per cent of all the nation's electricity by means of cogeneration and waste heat recovery.

While long-term dramatic improvements in end-use efficiencies can probably be made throughout the economy there will be a significant capital cost involved, unlike the case with many of the simple measures already implemented in response to rising energy prices. Such conservation actions, involving the trade-off of energy cost savings against initial capital costs, deserve the most careful attention in formulating a new U.S. energy policy.

SKYROCKETING SUPPLY COSTS

To understand just how economically sound conservation measures really are, we can compare capital requirements for various supply and conservation measures.

On the supply side, diminishing fossil fuel resources have necessitated the investment of enormous amounts of capital per unit of energy production capacity. True, Middle East reserves are still readily accessible. However, most new petroleum or natural gas production areas—such as the U. S. outer continental shelf, North Sea, Alaska, etc.—require anywhere from $10,000 to $15,000 for each barrel per day of equivalent fuel energy provided. This translates into a capital demand of about $4.5 to $6.8 billion for every Quad per year of energy delivered. Synthetic gas and oil obtained from coal will be even more capital intensive, probably requiring more than $10 billion per annual Quad.

New coal supplies are still obtainable at a capital cost of $1.5 billion to $2.0 billion per annual Quad. However, coal mining, processing, and combustion produce serious environmental and safety problems which may ultimately limit the rate of coal consumption, or at least cause increases in the cost of supply. Moreover, coal cannot be as flexibly used as oil and gas. The industrial sector could undoubtedly substitute more coal to produce steam, for example, but increasing our reliance upon coal will depend mainly upon its greater use by electric utilities or the development of economical gasification methods.

Electricity as a form of energy requires a much higher capital investment. For every Quad per year of delivered electricity, the capital investment in facilities for fuel supply, generation, transmission, and distribution will range from $45 billion for coal-based systems to about 1.5 times as much for nuclear generation. We cannot directly compare electricity costs with those for coal and petroleum fuel resources, because electricity has far greater flexibility of usage than does raw fuel. Even so, the capital cost of coal-based electricity is about $15 billion per annual Quad of coal converted to electricity, or more than eight times the capital cost of raw coal supply, itself.

Despite its high capital cost, electricity occupies a unique and vital place in the spectrum of energy forms. Many tasks exist that can be performed only by energy of the highest thermodynamic grade, such as electricity. So electricity is an essential part of a balanced energy supply system. Electricity should be recognized, however, as having both special properties and high capital intensity, and therefore should not be used as a convenience fuel, as for home heating.

The enormous and growing capital required to develop new energy supplies could injure the entire economy. According to even highly optimistic projections of economic growth and capital formation, the U.S. economy is unlikely to produce more than $2.7 trillion for all purposes over the next decade. Assuming that the long-standing ratio between business and residential investments prevails, about $1.8 trillion will be available for all business investments for both new capacity and replacement purposes. A New York Stock Exchange report estimated that, of that capital, the energy supply industry would require more than $800 billion.

It is an alarming prospect that we might have to allocate almost half of all business capital to energy supply investments alone. In the recent past, the energy industry has consumed only about one-fourth of total U.S. business capital, and even this fraction had created growing stresses in the capital markets. Unless this trend is reversed, we will soon be devoting so much of our scarce capital resources to energy production that other business needs will suffer a severe lack of investment funds.

A BARGAIN IN CONSERVATION

In contrast to the rising expenditures needed to develop diminishing fuel reserves, conservation can be put to effective use with substantially smaller capital commitments.

For example, for only a modest investment we could reap large improvements in the energy efficiency of the common window air conditioner. Data published by the Federal Council on Science and Technology showed that three commercially available room air conditioners with exactly the same 5,000-Btu-per-hour cooling capacity had the following initial costs and energy consumptions:

$120 for a 4.58 Btu/watt-hour unit;
$140 for a 5.80 Btu/watt-hour unit;
$165 for a 8.70 Btu/watt-hour unit.

As you can see, by investing only $45 in additional first cost—38 percent more—one can obtain an efficiency improvement of 89 percent.

Since the air conditioner is likely to be used only 500 hours per year, or about 6 percent of the time, the energy saving will be 258 kilowatt-hours per year. However, its usage is likely to coincide with the period of highest summer electrical demand. Hence, the $45 increment for conservation can be viewed as a direct substitution for more than one-half kilowatt of expensive utility system peak generation and distribution capacity, having a value of at least $200.

Unfortunately, user benefits do not reflect the same degree of advantage indicated by the capital cost comparison. In fact, the consumer would save only about $18 per year for 500 hours of use, yielding a gross payback of about four years. Even this moderately attractive return can be illusory when the ultimate consumer does not participate in the initial purchase decision, for instance if he lives in a rental apartment or housing equipped by the builder rather than by the owner.

Another example of high return on conservation investment is the case of waste heat recuperators. Recuperators can provide fuel savings of at least 25 percent on most high-temperature furnances used for controlled-atmosphere metal processing. The cost of such recuperators is about $1,300 for each combustion burner on a radiant tube furnace, with fuel savings amounting to about 125,000 Btu per hour per recuperator. Under normal plant operating schedules, this represents capital cost investment of $1.5 billion per annual Quad of fuel saved, compared to the $6 billion per annual Quad cost of new domestic gas supply.

With the recent sharp rise in industrial gas prices, the payback period for recuperators has shortened to about three to four years, a range that is still only marginally attractive to most industrial firms whose capital budgets can barely cover essential or "mainstream" business investment needs.

The generation of electricity from waste heat also represents an excellent investment opportunity. A recent engineering study conducted for a major cement manufacturer revealed the opportunity for producing 4,700 kilowatts of electricity by capturing waste heat from the exhaust of the company's cement kilns using a steam-electric bottoming cycle system. The cost of the system was $2.7 million.

If that 4,700 kilowatts were to come half from a new coal plant and half from a new nuclear plant a capital investment of more than $7 million would be required for fuel supply facilities, generating apparatus, and transmission and distribution equipment. In terms of energy capital effectiveness, the waste heat recovery system costs less than $25 billion per annual Quad of electricity, or less than half that of the average investment required for new coal and nuclear utility capacity.

It is noteworthy that in this particular case the conservation equipment was not installed, and the cement plant continues to purchase its electricity at 2.5 cents per kilowatt-hour. Allowing for operation and maintenance of the steam-electric bottoming cycle, the savings would have been $775,000 per year; i.e., the energy conservation investment would be recovered in about 3.5 years. Since this payback did not meet the company's requirements for discretionary investments, the proposal was rejected. As a result, the failure to implement this one conservation measure in one cement plant causes a continuing loss to the nation of 180 barrels per day equivalent petroleum. In general, capital investments for on-site generation of electricity by various schemes are smaller than those for central power stations, as shown in the chart at the left.

These few examples have only scratched the surface of conservation investment possibilities for industry. We have identified numerous examples of energy conservation investments in the steel, aluminum, oil refining, paper, chemical and other industries that significantly outperform corresponding investments in new energy supplies. In other sectors of the economy cost effective opportunities might include:

Substitution of diesel engines for gasoline engines in light trucks, which would require less capital per unit of fuel saved than does new petroleum supply capacity.

Weight reduction in automobiles through material substitution, which can actually decrease total capital cost.

Reducing passenger space is also cost-effective, but this type of energy conservation involves changing life-style and consumer tastes rather than improving technical efficiency, which is the focus of this discussion. It is important to clarify the distinction between these two different kinds of conservation, and to dispel the popular misconception that conservation is equivalent to belt-tightening. Such actions, usually taken in response to immediate crises, tend to obscure the real and lasting benefits of conservation through improved end-use effectiveness.

SOME BARRIERS TO CONSERVATION

Because of their economic attractiveness, one might expect capital investments in conservation to proceed at a faster rate in the industrial than in the residential or other sectors of the economy. After all, in industry energy users are likely to have a greater awareness of first-cost versus operating-cost tradeoffs. However, industry has not significantly outpaced other sectors in improving its energy efficiency. Where industrial conservation investments have been made, the decision has often been influenced by factors other than simple economics; for example, the threat of outright curtailment of production due to fuel interruption.

We've identified several reasons behind industry's reluctance to invest in energy-efficient equipment.

Most energy-user companies must maintain conservative debt-to-equity ratios because of uncertainty about the future availability and cost of financing. Conservation investments, therefore, do not usually command high priority in the competition for limited capital funds. These funds must first be reserved for essential mainstream business purposes, such as tooling new products and expansion of capacity to meet market conditions.

Criteria for investment payback are more stringent for manufacturing companies than for regulated utilities whose risks are lower.

The pricing of industrial electricity and fuel is largely based on average, rather than incremental costs of supply.

The factors tend to create a major distortion in the deployment of scarce capital resources to achieve the optimum balance between investments in new energy supply and in energy conservation.

A PLAN FOR ACCELERATED ENERGY CONSERVATION

A new government policy stressing energy conservation could produce major changes in our energy usage patterns in a relatively short time and without impairing economic expansion. By comparing energy demand estimates, with and without an accelerated conservation approach, one can really see the important differences that might be anticipated during the next decade.

For our scenario of life without accelerated conservation, let us examine a 1975 report by the Federal Energy Administration (F.E.A.) entitled, "National Energy Outlook." In its ten-year forecast for U.S. energy production and usage the F.E.A. predicted that higher energy prices alone could cut 1985 consumption from an unconstrained demand level of 123 Quads to about 107 Quads. Demand would be restricted further, to about 101 Quads, by some additional conservation measures which were not specified.

Under the F.E.A. plan, electrification was to increase from 1.93 trillion (24 per cent of all 1975 energy input) to 3.35 trillion kilowatt-hours (more than 34 per cent in 1985). Thus, with the real G.N.P. expanding at about 3 per cent per year (34 per cent over the decade), total energy was to grow by 2.8 per cent per year and electricity by 5.5 per cent per year. The plan was expected to produce almost no change in the distribution of energy by the end-use sectors relative to the pattern existing in 1975: residential and commercial would still comprise 37 per cent of consumption; transportation, 24 per cent; and industry, 39 per cent.

The F.E.A. projected a shift in energy resources, with coal rising from 18 per cent in 1975 to 22 per cent in 1985, nuclear energy rising from 3 percent to almost 10 per cent (accounting for over one-fourth of electricity generation), and oil and gas declining from 74 per cent to 63 per cent (the major reduction occurring in electric utility consumption of these fuels).

To provide a framework for evaluating these forecasts we have devised an alternative plan which stresses conservation measures. Based upon the same growth in real G.N.P. as assumed in the F.E.A. plan—approximately 3 per cent per year—the alternative approach postulates no substantial social changes or curtailment of living standards. This "Accelerated Conservation Policy" is by no means the only plan that might be considered, but it illustrates some of the benefits realizable by more effective energy end-use.

A key element of the conservation policy is the transfer of a major portion of the capital now marked for new energy supplies into investments in energy conservation in each of the end-use sectors. An important result of this transfer will be a major reduction in the total amount of capital required for all energy investments.

The Accelerated Conservation Policy calls for sharp curtailment in the rate of growth for electricity, the most capital intensive form of energy. It also calls for certain specific measures to improve end-use efficiencies, including:

Enforce the mandatory automobile fuel economy standards enacted by Congress. Impressive progress is being made toward meeting the 1980 criterion of 20 miles per gallon (m.p.g.), particularly by General Motors. The 1977 GM fleet average is projected to be 18.4 m.p.g. compared to 12.3 m.p.g. in 1974. Much of this improvement was accomplished through improved depth design and weight reduction, with little or no sacrifice in interior space or comfort. Planners should also consider a stepwise introduction of post-1980 standards, perhaps at a linear rate from 20 m.p.g. to the mandated 27.5 m.p.g. in 1985. This staged progression will insure that the improvements in average fuel economy continue without interruption for the turnover in overall population of 100-million-plus vehicles. The 27.5 m.p.g. goal is a difficult one, but there are strong indications that this level can be achieved by such strategies as the wider use of stratified charge or diesel engines, or both, improvement in transmissions, further weight reductions, etc. Some flexibility on the part of Congress with respect to emission levels of nitrogen oxides may be desirable to reach the optimum balance between fuel economy and exhaust pollutants.

Construct alternative electric generation capacity in lieu of 103,000 megawatts (Mw) of planned central station capacity. This alternative capacity would include cogeneration of electricity with industrial process steam (64,000 Mw); generation by district plants producing both electricity and space heating for buildings (32,000 Mw); and burning trash to generate electricity (7,000 Mw). Together, these electricity sources would contribute 24.5 per cent of all U.S. electricity. To stimulate this substantial shift away from central station utilities to the far more efficient systems identified above, several actions will be required, such as mandatory rules for purchase of surplus industrial electricity by utilities; a restructuring of backup or demand charges originally designed by utilities to discourage on-site generation; provision of direct government loans to industries and apartment or commercial complexes to finance investments in on-site generating capacity; special taxes on industries and commercial businesses which do not take advantage of proven cogeneration opportunities; and changes in federal, state and local rules regulating utilities.

Establish efficiency goals for all energy-intensive industrial processing equipment and systems; examples are blast furnaces, papermaking machines, refinery and chemical plants, heat-treating equipment, etc. In setting such goals consideration should be given to the efficiencies being attained in foreign countries where conservation technology has progressed further than in the United States.

Enact mandatory heating, insulation, and lighting standards for new residential and commercial construction. Standards should provide for optimum utilization of passive solar measures such as window and roof overhang design. We might also prohibit certain practices such as electric resistance space heating, and limit heat pump electric heating to those regions having moderate winter temperatures.

Enact progressively stricter efficiency standards for all major energy consuming appliances, such as water heaters, refrigerators, air conditioners, home furnaces, etc.

Phase out natural gas as a fuel, either for central station electricity generation or for process steam applications in industry. This could mean either a direct ban on such use, or a steeply progressive tax on gas fuel that

is so misused. Sufficient gas must be reserved for residential space heating and for direct-fired high-temperature industrial processes to avoid excessive growth in electricity demand.

Provide direct government loans and other economic incentives to finance the retrofitting of houses with conservation equipment, including insulation, storm windows, improved furnaces, and other cost-effective systems. This program should be continued until every structure in the nation has been modified to an extent commensurate with the capital cost of incremental new energy supply. These measures probably won't be completed until well beyond 1985, and our projections assumed less than one Quad of savings per year.

Collectively, these and several less important actions would reduce energy consumption over the next decade to 80 Quads per year, a saving of 21 Quads relative to the F.E.A. plan. In effect, energy growth can be almost halted over the ten-year span while economic activity can still expand by 3 per cent per year. Moreover, the costly electrical sector would increase to only 2.53 trillion Kwh, a growth rate of 2.8 per cent per year relative to 1975. The fraction of total energy converted to electricity, 29 cent, is higher than in 1975, but still well below the 34 per cent figure projected by the F.E.A. plan.

In the Accelerated Conservation Policy, distribution of energy by end-use sector differs from that of the F.E.A. plan, with transportation accounting for only 20 per cent, and industry rising slightly to 42 per cent. Sources of energy would change somewhat with nuclear fuel contributing only 7 per cent instead of 10 per cent of all energy. The fraction for oil and gas is about the same for both plans—63 per cent—but the contribution of coal rises from 22 per cent to 24 per cent under the accelerated conservation alternative.

Major contributions to the 21 Quads of total energy saved under the conservation policy are due to:

Automobile fuel economy standards (5.6 Quads),

Alternative methods for electricity generation (2.9 Quads),

Improved efficiencies in industrial processes (4.5 Quads), and

Appliance efficiency standards (2.5 Quads).

The remaining 5.5 Quads of savings result from improved insulation standards for all new buildings, increased retrofitting of insulation in existing structures, some modest usage of solar-assisted water and space heating, and greater efficiency in trucks due to wider use of diesel engines, improved scheduling practices, drag reductions, etc.

None of the measures we've proposed, except for far-term automobile efficiency improvements, requires unproven technology. Moreover, the overall improvement represents only a modest aggregate gain in the absolute efficiency of devices and processes. In fact, under our policy the average efficiency of energy utilization increases to 10.9 percent—only 2.6 percentage points over the 8.3 per cent we mentioned earlier. Approximately one-third of this gain is attributable to automobile fuel economy improvements alone.

WHAT COST CONSERVATION?

The most striking difference between the Accelerated Conservation Policy and the F.E.A. plan is the amount of capital needed to implement these alternative programs. Over the 1975-to-1985 decade the F.E.A. plan would require $570 billion for energy supply and $78 billion for energy conservation, for a total investment of $648 billion. In sharp contrast, the Accelerated Conservation Policy would require $61 billion for supply and $157 billion for conservation, for a total of only $18 billion—less than half the F.E.A. capital requirements.

These enormous capital savings are due in large part to sharply lower central station electric generating capacity. Less generating capacity investment is needed, not only because of reduced total electrical demand, but also because of the lower cost of altermative combined-cycle generating equipment, such as cogeneration. As you can see on page 35 and following, the conservation policy will thus result in significant savings on nuclear and fossil generating plant construction, and on coal, oil and gas consumption.

Savings on petroleum consumption will have a dramatic effect on imports. Accelerated conservation policies produce a net surplus or reserve of 4.5 Quads per year of natural gas by the end of the decade as is shown by comparisons of F.E.A. projections of maximum natural gas supply with our calculations of demand under a conservation policy. Required petroleum imports will be only 5.3 Quads of 2.4 million barrels per day—about one-third the present level of imports. Even if natural gas price controls were continued, the Accelerated Conservation Policy would curtail usage enough to almost exactly balance F.E.A.'s domestic supply forecast of 17.9 Quads for price-controlled supply. In contrast, the previous F.E.A. plan with complete price deregulation achieves zero imports in natural gas, but still requires the import of about 6 million barrels per day of petroleum—over 13 Quads.

There are clear and compelling economic advantages to the Nation for conserving more energy. Before this can occur, however, we must resolve the differences between two different sets of economic assessments that ultimately determine how we balance energy conservation. The problem is that investment decisions on conservation are generally made by a completely different group than that responsible for capital investments in energy supply. These two groups operate under substantially different ground rules for return-on-investment and access to capital markets. For example, the return-on-investment for energy conserving equipment required by energy users in industry is much higher than that for electricity plants achieved by regulated utilities, and the debt-to-equity ratio of manufacturing industries is much lower than that of utilities. Thus, it is totally unrealistic to suppose that the so-called "free market" approach will produce an optimal allocation of the nation's scarce capital resources among energy supply and conservation options.

Nothing resembling a free marketplace exists today, given the fact of cartel pricing for petrolum, and considering the long history of massive federal subsidies to the energy supply industry—research and development grants, depletion allowances, guaranteed return on utility investments, etc. This fact has often been obscured by those who promote price deregulation as the only means for a comprehensive energy policy.

STRONG REGULATION NEEDED

Our proposed policy for accelerated energy conservation depends heavily upon mandatory measures to improve end-use efficiency. This approach will inevitably raise arguments' against tampering with the so-called "tree market." Direct intervention must be considered, however, because price alone cannot provide sufficiently strong motivation for accelerated conservation.

Price increases are limited as a conservation stimulus even for the industrial sector, because energy costs still averages well below 10 per cent of value added for all manufacturing. Thus, even large additional rises in fuel prices will not necessarily place overwhelming conservation pressures upon manufacturers.

Congress has recognized this aspect of energy policy, and has acted wisely in passing the mandatory automobile fuel economy legislation. By forcing the desired trend in new car efficiency, this measure will mean a continuing reduction in gasoline consumption throughout the next decade and beyond. Moreover, the law can reduce gasoline consumption without the need for decontrolled gasoline prices.

The transition to a conservation plan requires nothing short of a massive restructuring of the priorities for deployment of resources, both capital and technological. This shift must take place in a relatively short period so that we won't exhaust our capital resources in marginal ventures.

ONLY THE BEGINNING FOR CONSERVATION

A conservation strategy could actually have more profound far-term implications than near-term. Current technology can clearly provide the 21 Quads of incremental annual savings over the next eight to ten years. But considering that overall second-law fuel efficiency would still be less than 11 per cent at that point, aggressive research into end-use efficiencies could almost certainly advance the technology still further. A concerted effort in this area has not even begun, and the untapped potential for improvement may well exceed anything on the horizon among the various alternative energy supply options. If, for example, we were able to continue improving energy efficiencies by about one percentage point every two and a half years, we could sustain an uninterrupted growth in real G.N.P. of 3 per cent per year for the next three decades, and still consume no more energy than we do today. Even then, our overall end-use efficiency would be only 20 per cent, about equal to that of the steelmaking process today.

The improvements in energy end-use efficiency that we postulate are, in fact, not all that remarkable. As you can see from the graph at the right above, they are still less than that accomplished over a comparable number of decades in improving electric generating plant efficiencies. The latter process, of course, has been subjected to enormous and continuing commitments of technological resources—the same prescription that is suggested here for energy end-use processes.

Some progress has already been made in overcoming the notion that the conservation of energy is synonymous with decreased economic activity. There is a growing awareness that capital investments in energy-saving devices can often yield greater dividends than comparable investments in new supply. Given appropriate stimulus, then, it is quite likely that the U.S. economy will make substantial progress toward more efficient end-use of energy over the next ten years. Unfortunately, there is little appreciation of the fact that conservation can play a major role in our long-term energy future. This misconception must be changed so that we can focus attention upon the task of developing the new conservation technology needed to insure continuing reductions in energy consumption in the period beyond 1985.

Perhaps the most decisive of all arguments in favor of conservation is the dividend that such a policy can buy in terms of time—the time needed for a thorough, searching, and balanced investigation of all possible energy supply alternatives, including the complete costs of their environmental and safety impacts.

IMPORTANCE OF PANAMA CANAL TO AMERICAN TRADE

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. HAGEDORN. Mr. Speaker, despite efforts by many supporters of the Panama Canal treaty to downplay the canal's importance to the domestic economy of the United States, the canal

continues to be the critical east-west link for U.S. agricultural trade. In 1976, nearly 20 percent of all commodity exports passed through the canal, including roughly 18 percent of all corn exports, 26 percent of all soybean exports, and 45 percent of all grain sorghum exports. Transportation costs for these commodities to foreign markets could be expected to double in the event of transit difficulties at the Canal Zone.

These exports are not important only for the economic health of farmers and rural America; they are also critical to maintaining some semblance of a favorable "balance of trade" by the United States. The $23 billion in total U.S. farm exports in 1976 nearly countered the value of energy imports by the United States during that same period. Any interruption of traffic at the Canal Zone could quickly threaten the trade gains made in recent years in the Far East, further injuring the dollar and jeopardizing full production agricultural policies in this country.

To relinquish secure control over the Panama Canal at a time when American farmers are increasingly producing for world markets is surely one of the most compelling arguments against the pending treaty. Far more than mere symbolism is involved in the treaty; very real considerations of economic (and military) security are involved despite the efforts of many to wish them away.

At this point, I would like to insert an excerpt from a recent article on "The Panama Canal and U.S. Farm Trade" published by the Foreign Agricultural Service, as well as several charts illustrating the importance of the canal for U.S. commodity trade.

THE PANAMA CANAL AND U.S. FARM TRADE

While its role in total U.S. trade has declined in recent years, the 51-mile-long Panama Canal continues to be a key east-west link for U.S. farm trade. Grains, soybeans, and cotton headed to the Far East from U.S. Great Lakes, east coast, and gulf ports are especially dependent on the Canal, whose opening in 1914 gave U.S. shippers a welcome alternative to the hazardous Cape Horn route and helped foster east-west trade.

During 1976, about one in every 5 tons of U.S. farm product exports moved through the Canal. This amounted to some 20 million metric tons, or two-thirds of all farm product traffic through the Canal last year and about 17 percent of total Canal shipping.

Far the most important farm commodities shipped via the Canal are grains, soybeans, and other bulk products, whose lifelines to foreign markets are still the ocean-going tankers and freighters.

During fiscal year 1976 grains and soybeans accounted for 16.3 percent of all traffic through the Canal—their share being exceeded only by the 18.7 percent for petroleum and petroleum products.

In calendar 1976, roughly 18 percent of the 44.3-million ton U.S. corn export, 26 percent of the 15.3 million-ton soybean export, and 45 percent of the 5.7 million-ton grain sorghum export moved through the Canal. These three products, combined, earned $9.1 billion in foreign exchange for the United States during 1976 out of the $23 billion in total U.S. farm exports.

Adding in other bulk products dependent on Canal transit—including wheat and cotton—would push the figure much higher still.

By penetrating the land barrier to transportation posed by Central and South America, construction of the Canal through the Isthmus of Panama represented one of the early breakthroughs for U.S. trade, paving the way for export grains in the Far East and other distant markets. For many U.S. farm products, this advantage continues, despite hikes in Canal tolls since 1974 and the advent of air transportation and innovative land-sea connections.

Last year, for instance, the Canal handled 70 percent of all U.S. farm commodity exports to 15 markets in East, Southeast, and South Asia and Oceania. The Asian market as a whole now means $8.5 billion to U.S. farmers and ranks alongside Western Europe as the leading outlet for U.S. agricultural products.

Japan—the largest single-country market, with imports of U.S. farm products approaching $4 billion—took over 12 million tons of U.S. agricultural shipments through the Canal last year. That adds up to around 60 percent of all U.S. farm product exports through the Canal and an even larger percentage of U.S. farm trade with Japan.

South Korea and Taiwan each took more than 1.5 million tons of U.S. products via the Canal last year, while Hong Kong, Indonesia, and Chile also received large quantities of westward bound shipments.

Such products originate throughout the eastern half of the United States, ranging from the granary States of the Midwest and Great Plains to the cotton fields of Arkansas and Louisiana.

U.S. corn and soybeans bound for the Far East travel to Great Lakes ports or down the Missouri, Ohio, and Mississippi Rivers to the gulf for westward shipment through the Canal.

Short-staple cottons used by Asian markets are produced in Texas and the western Old South and shipped out of the gulf.

While White wheat and Hard Spring wheats produced in the Pacific Northwest tend to go to west coast ports, Hard Red Winter wheats and almost all grain sorghum move out of the gulf and—again—through the Canal.

Also of significance are shipments from the U.S. west coast to Europe, as well as to the U.S. east coast. Last year, 60,802 bales of California and Arizona cotton moved eastbound into export through the Canal. In addition, much canned fruits and vegetables moving from the west coast to east coast, as well as some citrus and dried fruits, go through the Canal.

Total shipping through the Canal during fiscal 1976 included 13,201 ship transits and cargo movements of 119.3 million metric tons. (However, this was the lowest level since 1965, reflecting the worldwide recession and reopening of the Suez Canal.)

Of all the foreign vessels going in and out of U.S. seaports, 7 percent passed through the Canal in fiscal 1976, compared with 13 percent in 1949, More than two-thirds of this trade either originated in the United States or was destined for U.S. ports.

Tolls on the Panama Canal have been increased three times since 1974—once as a result of a technical change and twice to make up for deficits incurred by the Panama Canal Company, which is required by law to be self-sustaining. So far, these increases have carried charges some 50 percent above those prevailing before 1974, to $1.29 per ton currently.

Still, the Canal is a much more economic means of shipping bulk products than any other alternative now available.

Rerouting grain shipments around South America might almost double transportation costs, according to USDA analyses. And transit time would be increased considerably; for example, shipping time from New Orleans to Yokohama would rise from an average of 25 to 45 days in vessels that normally carry contents of bulk grain.

Such factors would lessen the U.S. farmer's ability to compete for Asian markets, thus benefiting Australia and other exporting nations with access to the Pacific or those with closer locations to major markets. Cross-country land-sea transportation—including the minibridge system with surface carriers now used extensively for container shipping—also would be prohibitively expensive for grains and soybeans. Moreover, existing transportation and port facilities could not handle the volume increases that would be required to circumvent the Canal.

U.S. farmers and rural communities thus have much to gain from continued, dependable operation of the Panama Canal.

These benefits radiate throughout the economy. Farmers depend on the export market to take one in every three harvested cropland acres, amounting to a fifth of net farm income. And gross farm income in the first half of 1977 was running at an annual rate of $108 billion—more than that generated by any other U.S. industry—with some $85 billion of the production expense paid to people outside agriculture.

NEW LANDING SYSTEM DEMONSTRATED AT CAPE MAY BY NAFEC

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. HUGHES. Mr. Speaker, last month the FAA's National Aviation Facilities Experimental Center (NAFEC) and the Cape May County Airport, both in my district, took part in a development that will have future significance to aviation. The event was the first demonstration at a small, community airport of the proposed U.S. Microwave Landing System that NAFEC has played a major role in developing and testing at its 5,000-acre proving ground in Pomona, N.J.

That demonstration, thanks to the efforts and joint cooperation of Cape May County Airport officials and NAFEC engineers, illustrated the speed by which a small community MLS can be set up, as well as this system's capabilities in a rural, operational environment.

As many of my colleagues know, the Federal Aviation Administration is embarking on a program of showing the technical and cost advantages of the U.S. MLS system, based on a Time Reference Scanning Beam principle. Such demonstrations are aimed at showing the world's aviation community the superiority of the MLS–TRSB system, which the International Civil Aviation Organization (ICAO) is expected to approve at a meeting next spring in Montreal. The U.S. MLS–TRSB already holds a favored position within ICAO. This is based on a vote earlier this year by an ICAO technical committee.

I am very pleased and proud to see that two important operations within my district—NAFEC and the Cape May County Airport—have contributed to what is likely to be the next international approach and landing system of the future for civil aviation.

Accordingly, I commend to the attention of my colleagues the following two fine newspaper accounts of their joint efforts, together with some background material on MLS issued by NAFEC:

[From the Atlantic City, (N.J.) Press, Oct. 7, 1977]

CAPE MAY TEST—LANDING SYSTEM MAKING WAVES

(By Daniel Heneghan)

RIO GRANDE.—Relief may be in sight for residents plagued by aircraft noise and a safer flight is in store for fliers of the future.

It all comes in the form of a new all-weather landing system which U.S. officials hope will be selected to replace the present instrument landing system.

Officials from the National Aviation Facilities Experimental Center (NAFEC) demonstrated a new "Microwave Landing System" (MLS) at the Cape May County Airport here Thursday to show how it can give a pilot more flexibility in landing in bad weather.

The development of the system, according to NAFEC Deputy Director Joseph Del Balzo, means "existing airports can handle additional traffic more efficiently and with greater safety."

At the same time, it gives pilots the ability to cut down on the amount of time they fly over populated areas by using steeper angles of descent and curved or segmented approaches, he explained.

In addition, Del Balzo explained that the system is compact and inexpensive enough to be installed at small, community airports.

"This system is able to serve the complete spectrum of aviation in all weather and in zero visibility," he said.

The system uses two sets of radio waves to pinpoint a plane's location and guide the pilot to the field. The radio waves emanate from two antennae which are placed near each end of a runway with little advance site preparation. Position is determined by the time it takes for a sweeping signal to be received twice by the plane, a process which gives the microwave system the designation of Time Reference Scanning Beam.

One of the drawbacks of the instrument landing system, Del Balzo explained, is that the transmitting antennae have to be placed approximately 1,200 feet from the side of a runway across level terrain.

The instrument system, "requires weeks to set up and costs $40,000 to $250,000 in site preparation alone," he said.

An MLS system for an airport like the Cape May County Airport, Del Balzo said, would cost approximately $60,000 for the avionics—or about the same as for the equipment involved in an instrument landing system. Site preparation for the MLS, however, costs only $2,000 as opposed to the minimum of $40,000.

The landing system, which had been tested at NAFEC and two other federal airport installations, was moved here from NAFEC last week and set up in less than two days, Del Balzo said.

One of the planes involved in the test flights Thursday was a De Havilland Twin Otter from the Canadian Department of Transportation, the same type of plane that operates on the Southern Jersey Airways commuter flights from here to Philadelphia.

Inside the crowded cabin, NAFEC project manager Richard Cleary proudly showed off the compact equipment, which included an instrument resembling a pocket calculator which displayed the plane's deviation from the pre-determined glide slope and how far it strayed from the center line of the runway.

He said that if a Twin Otter that crashed here last winter—killing four persons—were equipped with the MLS, the crash may have been averted.

"I haven't read the accident reports, but I would say that if it had the MLS the crash probably would not have occured," Cleary said.

In 1972 the International Civil Aviation Organization (ICAO) called for the development of a new landing system to handle increasing airport loads safely and more efficiently. Since then, half a dozen countries started working on systems capable of replacing the instrument landing system. The system tested Thursday was developed through a joint effort of the United States and Australia with help from a number of other countries.

At a meeting of a technical sub-committee of ICAO last March, the MLS system was recommended for approval by the full organization.

At a meeting in Montreal in April, ICAO will select one of two systems under consideration, the MLS developed at NAFEC and a system developed by the United Kingdom.

Following the test Thursday, Del Balzo said the system would be taken down and flown to Buenos Aires, Argentina and then around the world to gather international support for the system among ICAO member nations.

[From the Evening Bulletin, Oct. 7, 1977]

FAA MICROWAVE LANDING SYSTEM DEBUTS

(By Don Nauss)

ERMA.—The Federal Aviation Administration (FAA) yesterday demonstrated at Cape May County Airport a new microwave landing system which it claims will revolutionize modern-day aviation.

The all-weather system, FAA officials said, is cheaper to install than present instrument landing systems, can reduce air traffic congestion and lead to noise reduction in communities located near airports.

The system, developed by FAA's National Aviation Facilities Experimental Center (NAFEC) in nearby Pomona, will be tested world-wide over the next few months.

The International Civil Aviation Organization (ICAO), the world's recognized ruling body on aviation regulations, is expected to approve the system at its Montreal meeting in April.

If approved, FAA officials said it will be the first major development in aviation guidance in 40 years and will replace most instrument landing systems in use throughout the world.

NAFEC Deputy Director Joseph M. Del Balzo, at a press conference yesterday, said the system, commonly called MLS, was developed in response to ICAO's call to eliminate major problems now facing airports.

"There is an international requirement for a new landing system," said Del Balzo. "But we've run out of improvements for the instrument landing systems."

MLS utilizes the microwave frequency band which offers several advantages over conventional systems which use VHF and UHF frequencies.

The latter bands are limited to 40 channels and are susceptible to greater interference and distortion often found in busy air terminals. The microwave band has more channels allowing for better tower-to-airport communication which can ease and speed landing.

"This also means that existing airports can handle additional traffic more efficiently and with greater safety," said Del Balzo.

The system utilizes two beams which scour the area approaching the airport both on a vertical and horizontal plane. When an aircraft is beamed, the pilot can read precise readings of his elevation, distance from the airport and angle of descent.

Because of the greater range of the system and precision, it can allow aircraft to approach landings from extreme curves or in steep descents. Presently, conventional systems demand one path to be followed by approaching aircraft.

Del Balzo said that this flexibility can lead to abatement of noise levels over communities near airports by rerouting airplanes.

NAFEC demonstrated the system's operations utilizing a Canadian DHC–6 Twin Otter. On two separate runs, the pilot brought the bulking plane in on a regular landing and then followed with a steep descent.

Another advantage of the new system, according to Del Balzo, is the cost. Although the system costs about the same as conventional systems ($60,000), the savings on installation is sizable.

Del Balzo said that the small system installed in Cape May cost $2,000 to install and only took a day. Another system would have taken weeks to set up and cost anywhere from $40,000 to $250,000 for installation.

"In the case of many small airports throughout the world," Del Balzo said, "this can mean the difference between having or not having an instrumented all-weather approach and landing system."

The demonstration at Cape May marks the first test of the system at a small rural airport which presently has an instrument landing system.

Plans were announced earlier this year for installation of the new system at the airport. It is hoped it will increase landings at the airport which now handles only 22 daily flights in the summer and six in the winter.

It is frequently closed during inclement weather. Last December two persons died and another was severely injured when a plane crashed while attempting to land in a rain storm.

BRITISH STEEL CORP. FACES 1977 LOSS OF $1 BILLION: CONTINUES TO DUMP STEEL IN U.S. MARKET

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. VANIK. Mr. Speaker, on November 3, I entered some data in the CONGRESSIONAL RECORD which had been provided to me by the U.S. Customs Service and which showed that the British Steel Corp. was selling steel in California cheaper than were the Japanese. I pointed out at the time that there was no steel expert in the world who believed that the British were more efficient steel producers than the Japanese and that this data was therefore prima facie evidence that the British were dumping steel in the United States. The reason that they are selling large quantities of steel in America below their cost of production is that it maintains employment in England; in short, the British have been exporting their unemployment from England to the Mahoning Valley and the other steel towns of America.

The November 28 issue of Business Week contains an article which starts:

A crisis is at hand for Britain's biggest public investment—British Steel Corporation. Next week it is expected to report first half 1977 losses of about $360 million, with a projected loss of $1 billion for the year.

Any (private) company losing money at the rate of British Steel would now be in receivership or liquidation, Chairman Sir Charles Villiers told the steel unions. British Steel has to become a business and cease to be an institution.

I would like to include this article and an article from the November 19, 1977 Economist in the RECORD at this point. These two articles indicate, more clearly than ever before, the extent of Government subsidy given to the British Steel Corp. It is totally unfair and unrealistic to expect private American steel corporations to compete against this State-owned corporation which is backed by the full Exchequer of England.

Every ton of steel shipped here from England is shipped here under subsidy—and every ton helps unfairly put an American worker out of his job.

It is imperative that the Treasury Department act against this type of blatant dumping practice immediately and on its own initiative.

The articles follow:

[From the Economist, November 19, 1977]

BRITISH STEEL: THEY'RE STILL PASSING THE BUCK

The government and its nationalised British Steel Corporation cannot agree how to tackle its mounting, huge losses, and the overmanning that has caused them. The government wants the problem to be tackled by negotiation with the top national officials of the steel unions, especially Mr. Bill Sirs, general secretary of the largest, the Iron and Steel Trades Confederation and chairman of the TUC steel committee. The BSC wants to negotiate closures at plant level where it reckons it has more chance of persuading people to accept them.

The BSC is more likely to be right, this time, than wrong. Past efforts to persuade the unions to agree nationally to sackings to reduce the corporation's overmanning have got nowhere. True, there have been "agreements" signed after midnight confrontations and outbursts by BSC's former chairman, Sir Monty Finniston. But BSC still employs 205,000 or so people, no fewer than three years ago. On the most conservative reckoning, that is at least 25,000 too many and more like 60,000 if BSC is to be slimmed down to internationally competitive levels.

The present chairman, Sir Charles Villiers, points to BSC's success in negotiating the earlier-than-planned closure of Clyde Iron, in Scotland. It will be shut by February, 1978, two years earlier than the date set in the review by former industry minister Lord Beswick. The £1m–2m expected closure cost will be much less than the cost of keeping it open until 1980.

Everybody concerned with BSC knows the scale of its problems. That certainly includes Mr. Sirs. But he does not dominate the other steel unions so cannot push through measures of the sort that are needed—not even if things are arranged so that he appears on the way to have gained some great victory (which ministers are prepared to do). One possibility would be to supplement redundancy payments, on top of BSC's contribution and that from European community funds. (It cannot be too much extra in case it sets an overgenerous precedent for other state-owned industries, eg, shipbuilding.)

BSC's loss for the six months to September, to be announced next week, is expected to be a little over £190m. But for the full year to next March it could easily reach £500m. Add that to the £450m BSC has lost in the past two financial years.

BSC will borrow from the government the full £930m allowed it in this financial year under its cash limit, to wit 12% of the government's present total borrowing requirement. No better is to come. BSC's statutory borrowing limit was recently raised from £3 billion to £4 billion, which was supposed to be adequate until early 1979. But this week industry secretary Mr. Eric Varley told Labour MPs that the new higher limit would have to be increased again by next summer.

Demand for steel worldwide is still falling. BSC is suffering more than most other steelmakers because it cannot sack people and close down inefficient plant. In the present financial year it will make perhaps 17½m tonnes of liquid steel; its breakeven is 23m–24m tonnes, at least 92% of total capacity. Hence those £10m a week losses. If the United States government applies anti-dumping rulings to many BSC products (it is vulnerable) its losses will soar.

By taking drastic measures (apart from sacking people, that is), BSC should just stay within its cash limit this year. Its investment plans were cut by £225m (to £600m) back in the summer. Already another £65m has been trimmed and more will be, eg, plans to install electric arc furnaces at Beswick-saved Shelton works in Lancashire. BSC has also destocked heavily, both raw materials and the steel stockpile it had expensively built up "ready for the coming boom".

So far the various options being kicked around Whitehall have only been put to cabinet committee. Mr. Varley would like to get full cabinet approval for BSC through before Christmas. He will probably be unlucky. Other ministers have just started to wake up (with horror) to the scale of the problem. BSC, as the largest borrower from government, is a menace, for instance, to the schools budget of Mrs. Shirley Williams. There is no longer any clear view of just how big BSC should be, how likely it is to retain a large enough share of world exports to justify continuing with large parts of the modernisation programme.

[From Business Week, Nov. 28, 1977]

STEEL LOSSES RACE TOWARD $1 BILLION

A crisis is at hand for Britain's biggest public investment—British Steel Corp. Next week it is expected to report first-half 1977 losses of about $360 million, with a projected loss of $1 billion for the year. Prime Minister James Callaghan's Labor government considers the company's plight so serious that it is being forced to support a major cutback in jobs and investment and the closing of some plants.

"Any [private] company losing money at the rate of British Steel would now be in receivership or liquidation," Chairman Sir Charles Villiers told the steel unions. "British Steel has to become a business and cease to be an institution."

British Steel employs 208,000 workers, which industry analysts say is 60,000 too many for efficient operation. A cut of such magnitude is unlikely, especially with parliamentary elections coming up and unemployment at 6%. But a corporation plan, supported by the government, is afoot to reduce the work force by 10,000 within the next three months. It will involve "voluntary redundancies" in 12 old plants.

Another part of the plan is to assign work on the shrinking order book—British Steel faces stiff competition in world markets—to low-cost plants. But William Sirs, general secretary of the Iron & Steel Trades Confederation, the industry's largest union, says: "This is no good because whole communities could suffer."

As for investment, the corporation will chop capital spending by $810 million through next year. That will mean, sources say, that the $1.4 billion expansion of the Port Talbot facility in Wales will be postponed, and the plan to add 10 million tons of capacity at Teeside in northeast England will be drastically cut.

DEBT BURDEN

Besides having too many people and too many old plants, British Steel is deeply in debt. At the end of March, its borrowing ran to $4 billion against net assets of $4.8 billion. And to help finance this year's running costs, it had to increase its borrowing limit from $5.5 billion to $7.2 billion. Interest charges are estimated at a crippling $360 million—equal to the company's estimated first-half losses. "We are in it up to the hilt," says Villiers. But without remedial action, he says, "we will go down further."

British Steel's customers also have something to say. Through Sir Richard Marsh, chairman of the British Iron & Steel Consumers Council, they have suggested that the government sell off certain assets. Although these plants bring in $720 million a year from sales, they consistently produce low profits or actual losses. The council also wants the government to write off $1.8 billion of accumulated losses and restruture the corporation's capital base. Says Sir Richard, who handled the Labor government's steel nationalization 10 years ago: "Such action would be no more than companies in the private sector regularly adopt in the face of far less serious financial problems."

VA HAS LONG PIONEERED IN MEDICAL RESEARCH

HON. RAY ROBERTS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. ROBERTS. Mr. Speaker, the prowess of the Veterans' Administration in the field of medical research has once again been called to our attention with the recent award of Nobel Prizes to two distinguished VA scientists, Dr. Rosalyn S. Yalow of the VA hospital in the Bronx, N.Y., and Dr. Andrew V. Schally of the VA hospital in New Orleans.

Their recognition by the Nobel Committee is a highpoint in the tradition of excellence the VA has maintained in the research field for so many years.

To bring Members of Congress and the public up to date on this vital subject, I offer the following description of the Veterans' Administration's research program for insertion in the RECORD at this point.

Nobel Prize winners Dr. Rosalyn S. Yalow of the Bronx, N.Y., Veterans Administration Hospital, and Dr. Andrew V. Schally of the New Orleans, La., VA Hospital are the latest in a long list of VA medical investigators and career VA employees who have helped advance the frontiers of medicine.

Regarding Dr. Yalow's work, the Royal Caroline Institute in Stockholm, in making the Nobel award, said she and her coworkers "directed diabetes research into new tracks and gave it a new dimension."

Dr. Yalow was recognized for discovering, in association with the late Dr. Solomon A. Berson of the Bronx VA Hospital, the technique of radioimmunoassay, in 1960, and for her many research findings of applications of this method for measurement of insulin and other biological substances in tissues.

The citation continued:

We are witnessing the birth of a new era in endocrinology, one that started with Dr. Yalow. This modern endocrinology continues to develop and gives us . . . new outlooks on the causes and nature of diseases within the whole spectrum of medicine.

Dr. Schally was recognized by the Nobel selection committee in association with Dr. Roger Guillemin of the Salk

Institute for their discoveries concerning the peptide hormone production of the brain. Their research revealed how the brain controls several important body functions. They isolated, identified and synthesized three separate hormones or releasing factors originating in the hypothalamus by which that portion of the brain directs the pituitary gland to release key hormones that in turn signals other organs.

Dr. Yalow and Dr. Schally previously had each won the Albert Lasker Basic Medical Research Award, considered the highest research honor in the United States. Dr. Yalow, in 1976, was the first woman to win that recognition and the fifth VA scientist to achieve it in 5 years.

Among other VA scientists whose research has won recognition of prestigious bodies in recent years are several other recipients of the Lasker Award. These are:

Dr. William H. Olendorf, Los Angeles VA Hospital Center, who shared a 1975 Lasker Award for his concept that led to development of computerized tomography, an X-ray scanning system that discloses soft tissues and has revolutionized diagnosis of cancer, brain disorders and other disease.

Dr. Ludwik Gross, Chief of the Cancer Research Unit at the Bronx VA Hospital, who received a 1974 Lasker Award for his original discovery of leukemia-inducing and cancer-inducing viruses in animals, findings on how these viruses are transmitted from one generation to another, how they are activated by radiation, and the role of animal immune systems in preventing viruses from causing disease.

Dr. Edward D. Freis of the Washington, D.C., VA Hospital won the Lasker Award in 1971 for his research on hypertension. Dr. Freis headed a VA multihospital cooperative study which proved that the life span of persons with moderate to severe high blood pressure can be lengthened significantly if they are treated with a drug regimen, developed in the VA study.

The VA annually conducts about 30 such multi-hospital cooperative studies that take advantage of the large VA patient load—about 180,000 persons are under care daily in the 172 VA hospitals, 88 nursing home care units and 219 outpatient clinics. It is these studies that have contributed some of the most significant increments of knowledge that can be applied universally in medical practice.

The first VA cooperative study was begun in 1946 with the Armed Forces to evaluate chemotherapy for tuberculosis. It proved the efficacy of streptomycin and other drugs, resulting in a reduction of more than 85 percent in the national patient load and revolutionizing the standard treatment for tuberculosis.

A cooperative study on tranquilizing drugs for mental illness was another landmark accomplishment of VA research. It established the usefulness of tranquilizing medication for many psychiatric disorders, and brought changes in therapeutic approach and substantial reductions in the numbers of patients requiring hospitalization.

Other cooperative studies have contributed new knowledge of neurological disorders, metabolic and endocrine diseases, stroke prevention, sickle cell disease, the aging process and arteriosclerosis, and have evaluated chemotherapy as an adjuvant treatment after cancer surgery, the value of anticoagulant drugs, and treatment for alcoholism.

Important individual research accomplishments have included:

Development of a system for computer interpretation of electrocardiograms;

Findings greatly increasing knowledge of peptic ulcers and gastrointestinal hormones;

Knowledge of the action of specific therapeutic drugs for mental illness;

Development of antilymphocyte globulin and other substances to suppress the rejection of transplanted organs.

These investigator-initiated studies typically are directly related to problems of clinical medicine, as are the cooperative studies.

Basic medical research is conducted by career scientists. The highest level of career development for these scientists is that of senior medical investigator. The VA now has six scientists with that rank, including the two new Nobel laureates.

The Nobel Prize followed by a few months a report by the Assembly of Life Sciences of the National Academy of Sciences which praised VA's research effort in glowing terms.

VA research, the NAS investigators reported in March, 1977, is comparable in output and quality to that done in the best institutions in the country, with particular capability in the area of cooperative studies. The NAS 3-year study committee used the term enthusiastic in noting that the VA offers unique opportunity for clinical research. The committee was headed by Dr. Leighton E. Cluff of the Robert Wood Johnson Foundation.

SBA DISASTER PROGRAM

HON. NEAL SMITH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. SMITH of Iowa. Mr. Speaker, there have been a number of news media articles concerning the SBA disaster program which were based upon some misunderstandings of the facts. On September 27 of this year, the Washington Post ran an editorial which contained a number of incorrect statements. I mistakenly assumed that if I would point out the mistakes they might so inform their readers but to my knowledge they have not done so. I fear that some other news reporters relied upon the information in that editorial rather than doing independent research. However, there have been some other incorrect statements concerning SBA in the Congressional Quarterly and an article in Time magazine. I am setting forth herewith the letter I wrote to the editor of the Post which explains in more detail the incorrect statements they had made.

In Time magazine of November 14, on page 28, an article states that SBA has declared two-thirds of all U.S. counties disaster areas and eligible for the loans. Even though loans are limited to an individual who suffered damage regardless of where he lives and, in many counties the disaster covered a small part of the county, the fact is that two-thirds of the counties have not been declared drought disaster areas by SBA. There are 3,042 counties in the United States and SBA has declared some 525 as drought disaster areas.

Also, the Time magazine article states that demand for loans is expected to soar to $4.6 billion by next August. The only way this could occur would be if there are two more disasters of the magnitude of Hurricane Agnes, which caused outlays of $1.3 billion. Perhaps someone at Time magazine has a direct wire to the Almighty and has been informed that there will be two such disasters between now and August but the probability is low. However, if such major disasters occur, the communities suffering those disasters will be as much in need of loans as would those who suffer in a smaller disaster.

I also want to remind the Members of the House that these are loans and that the history of repayments of disaster loans has been even better than the repayment history for nondisaster loans. Since the inception of SBA's disaster loan program, only 2½ percent of these loans have been uncollectable.

Early next year the committee will reconsider this disaster legislation. The message I have gotten from other Members has been loud and clear to the effect that they want the program extended and that they think that communities in the U.S. hit by such disasters should be given an opportunity to respond and rebuild. In effect it is an insurance program in which everyone in the United States is insured. Every citizen of the U.S. runs the risk of being involved in a disaster sometime and when the net cost of providing loans to those involved in disasters is calculated, it amounts to an annual premium cost of only a few cents per person.

OCTOBER 4, 1977.

EDITOR,
The Washington Post,
Washington, D.C.

DEAR SIR: An editorial from your paper of September 27th entitled "The Disaster That Wasn't" has just been called to my attention. The editorial states ". . . A farmer in a drought area is eligible for special loans at interest rates as low as 3 percent . . . But the drought aid needs to be tied to the actual effect of weather on individual farmers' final harvests. The Carter administration has been doing it the other way, providing aid on the basis of regional rainfall at the beginning of the season. As this year's experience shows, that can mean an expensive program of disaster aid when, as it turns out, there was no disaster."

The assumption upon which the editorial is based is totally incorrect. Before a farmer is eligible for a 3 percent loan, he must prove that he was damaged by the drought on his particular farm unit and the loan is limited to the net amount that he was damaged by the drought disaster. His farm unit must also be located in a county where there has been enough drought to warrant a designation.

I come from an area of Iowa which has experienced the first serious drought in history. Some farmers have a total crop loss while neighboring farms received several showers and have good enough crops that they cannot qualify ofr low interest loans. For the farmer who has suffered a disaster, it is little help to know that most farmers raised such a bountiful crop that prices have dropped dramatically. In fact it makes it even more difficult because the farmer suffering the disaster has had both his production and prices reduced the same year, which usually does not occur.

Since your editorial writer obviously did not read the bill, I assume he probably read an incorrect analysis somewhere else. Likewise, some other editorial writer may read your completely incorrect statements and repeat them again. Since I was the author of this 3 percent loan provision, I thought I should call to your atention the fact that the article is based upon a completely erroneous assumption.

Sincerely,

NEAL SMITH,
Member of Congress.

THE MIDDLE EAST AT THE CROSSROADS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues remarks I made to two Jewish groups in Indianapolis on November 20, 1977 regarding the delicate, but hopeful, situation in the Middle East. These comments were prepared prior to the historic Sadat-Begin Summit of last weekend.

My remarks follow:

THE MIDDLE EAST AT THE CROSSROADS

Just over four years ago on October 8, 1973, I was in this great town speaking before the Board of Governors of the Jewish Welfare Foundation. Many of my friends here were in the room then.

That was a somber and anxious time for all of us. Two days earlier Egypt and Syria had launched surprise military operations against Israel. For a variety of reasons not fully explained by inquiries in Israel following the hostilities, Israel was somewhat unprepared for this four war in less than three decades. After more than two weeks of fighting, the October 1973 war ended in a ceasefire and the preexisting no war-no peace stalemate in the Middle East stood again.

Like the June 1967 war and other wars before, the fighting in 1973 appeared to prove little. The Israelis and their Arabs neighbors were no closer to ending the conflict which has threatened the lives of all peoples in the Middle East and raised the spectre of an East-West confrontation for over thirty years.

CRUCIAL CHANGES IN THE MIDDLE EAST

Today, in 1977, the situation in the Middle East is very different than it was in 1973. Circumstances appear more favorable both for reducing tensions and for starting comprehensive peace talks. Some people argue that the problem of the near future is not simply reconvening a Geneva Conference on the Middle East but rather how the Conference, once started, can avoid failure, promote progress, and might best be made to serve the goal of a just and lasting peace.

In 1967, the United Nations Security Council passed U.S. Resolution 242. It has served as a basic document for trying to construct a framework for the Middle East peace talks ever since. During the past decade and especially since 1973, enormous changes have occurred in the Middle East and in the attitudes of the parties to the conflict towards some of the issues addressed in U.N. Resolution 242.

The trade-off between territory and peace is a basic concept underlying U.N. Resolution 242. For Israel, the nature of the peace represents the key issue.

For the Arab States, territorial withdrawal is the primary concern. These positions and attitudes reflect the passionate concern about security in Israel and the equally passionate concern in the Arab world about Israeli borders.

To understand the problems participants in a peace conference will confront, it is useful to review five important recent changes in the Middle East.

1. Nature of Peace

The first, and perhaps most crucial change, has been in the thinking of the parties about the nature of peace.

In the immediate aftermath of the 1967 hostilities, the Israelis were primarily concerned about a formal commitment to peace from the Arabs. They wanted the Arabs merely to say: "We want peace." But there was, at that time as we all remember, ambivalence in the Arab world towards this question reflecting an indecision over whether or not to continue a campaign to try to eliminate Israel.

While this indecision may remain in parts of the Middle East, and while some Arabs may not say they want peace, Arab thinking on the issue of peace has evolved over the last few years.

The Jordanian leadership affairs that it wants peace and is willing to live in peace with Israel. Some Saudi leaders will give similar positive indications privately. Egypt and Syria, under their present leaderships, are also willing to be more forthcoming.

Herein lies the basis for current hopes that progress toward a settlement can be achieved.

But there have also been changes in Israeli thinking about what peace involves. Israel's concept of peace now contains tangible manifestations of what peace and normal relations with its Arab neighbors could mean.

During the last few months, Arab leaders, for the first time, seem to have begun thinking about ways to normalize relations with Israel. The Arabs do not reject a process which would involve substantially more than the signing of a peace agreement. President Sadat is no longer talking about peace as something only to be achieved by further generations. Jordan also supports peace during this generation, while Syria has begun to focus, albeit with some hesitation, on what specific steps peace may involve. These steps, in the minds of Arab leaders, are relative to Israeli willingness to make desired withdrawals.

This process of peace, which has just started in the Arab world, is still developing, It is ongoing and hopeful. Yet it needs further development and stimulation, but it can represent a fundamental change.

2. Palestinian Issue

If an evolving concept and understanding about what the nature of peace entails represents one important recent change in the thinking of the parties, another change in the attitudes of the parties is on the Palestinian issue.

There is growing recognition on the part of all parties that Palestinians must be participants in the discussions and neogtiations involving their fate. The question today is not whether the Palestinians will be involved in matters affecting their interests but how they will be brought in and who will represent them. On the questions of how and who there remains enormous disagreement.

3. Israel is Stronger

A third factor—and perhaps most significant military factor—is that Israel is stronger today relative to its neighbors than it has ever been. Over the last four years the United States has played a decisive role in providing Israel with the military equipment and the financial support to maintain a much more favorable military situation for that democracy in the Middle East.

Nearly $10 billion in all forms of assistance has been provided to Israel since '73. Today, there remains important support throughout the United States for continuing assistance to preserve existing military relations. Only a strong Israel can negotiate effectively.

Part of Israel's most favorable military situation is the reduced capacity of its neighbors to wage effective hostilities. The Syria military is, for the present, preoccupied in Lebanon even though Syria continues to receive new equipment from the Soviet Union. Egypt, on the other hand, no longer receives aid from the Soviet Union directly and its military is, for the moment, in a less effective state of readiness. Iraq and Libya are well armed but today at arms' length from Israel

These Arab factors, while favorable to Israel for the time being, may not remain static: They are related, in part, to what happens in peace talks.

4. Reduced Violence

A fourth change of the last few years may also be a tentative change. In 1976, for the first time since 1948, not a single Israeli soldier was killed in hostilities. Most significant, terrorism, which can always raise its ugly head, is vastly reduced. The spectre of Lod Airport, Munich, Khartum and Kiryat Shemona has not faded but through the resolve of Israel, the United States and other nations, chances for any group to achieve success through terrorism are markedly reduced.

5. The Soviet Factor

A fifth feature of the Middle East over the last few years has been the changed position of the Soviet Union. There can be no doubt that Soviet interests in the Middle East have suffered since 1973.

While there may be disagreement over Soviet intentions in the Middle East, I do not think that any of us would quarrel with the following four propositions;

1. To succeed a Middle East peace talks or a settlement will have to have at least the tacit acquiescence, if not support, of the Soviet Union;

2. The Soviet Union is a co-chairman of the Geneva Conference on the Middle East and therefore must be involved at some point;

3. Over the years the Soviet Union has not been helpful in the Middle East. It has enjoyed a degree of tensions there. It has supplied in lot of arms to Syria, Egypt, Iraq and Libya and it has taken very one-sided positions on almost all Middle East peace issues;

4. It is in the United States interests, in the interest of success at Geneva and in the interest of peace if the Soviet Union modifies

some of its positions and is involved in the peace process to an extent that it has a stake in trying to modify some of the positions of its friends in the Middle East.

These appear to be some of the motivations of the United States in working out the Joint Soviet-American statement on the Middle East which was signed and announced October 1. It remains to be seen whether the Soviet Union will hold to the positions it took and whether the Soviet Union can, or will, try to persuade the Syrians and the Palestinians to modify some of their positions.

While it is true that this joint statement did not mention UN Res. 242 and 338 to which we still adhere and the statement referred to the "legitimate rights" of the Palestinians instead of the phrase we had used before, the "legitimate interests of the Palestinians", let us consider several significant changes in the Soviet position:

The Soviet Union had previously spoken of the PLO as the "sole legitimate representative" of the Palestinians. The Joint Statement makes no mention of the PLO;

The Soviet Union always talked about the "national rights of the Palestinians". The Joint Statement uses a weaker formulation, the "legitimate rights of the Palestinians";

The Soviet Union always talked about the creation of "an independent sovereign Palestinian state". The Joint Statement does not mention this as a Geneva agenda item;

The Soviet Union always talks about withdrawal from all of the Occupied Territories. The Joint Statement has so much adjectives;

And the Soviet Union never talked about a goal of normal relations. In the Joint Statement, there is talk of normal relations and there is affirmation of a concept of peace close to Israel's definition.

Despite the unfortunate manner in which this statement was sprung on all of us, these changes can be viewed as positive developments if the Soviet Union holds to the policies formulated for Geneva in the Joint Statement. It remains to be seen, however what efforts the Soviet will make with Palestinians and Syrians to modify their positions.

THREE CRUCIAL PEACE ISSUES

These five developments in the Middle East form a crucial background for a brief review of the three principal issues confronting the parties at any peace Conference which may develop. The three issues are: the nature of peace and the process of normalization of relations; border and security issues; and the Palestinian issue.

1. Normalizing Relations

What has been particularly encouraging about the way the parties to the conflict have approached the issue of the nature of the pace and normalization of relations is that there has been some sense of movement in the position of the parties.

As the peace process unfolds further, some questions which will need to be explored include:

What is meant by an end to the state of belligerency and by normalization of relations;

What constitutes the beginning of the process of normalization of relations;

What aspects of a process of normalization of relations might be included in a peace treaty;

What essentials of that process, if any, must remain the prerogative of each state; and

In what ways can the process of normalization of relations be phased over time and related to withdrawals.

Arab thinking is now distinguishing between an end to the state of belligerency, which Arab leaders would agree to in a peace treaty, and normalization or relations, which they view as a process that would occur after a peace treaty is concluded. The Arabs often try to draw an analogy between their relationship with Israel and that of the United States with Vietnam.

The Arabs also stress that an end to the formal state of belligerency would come only after territorial withdrawals by Israel. In effect, in the Arab view the willingness to end the state of belligerency with Israel is their major asset in negotiations, and they would not give it up with Israel is their major asset in negotiations, and they would not give it up without obtaining what they want most, Israeli withdrawal from the Occupied Territories.

Many leaders in Egypt, Syria and Jordan are willing to conceive of a phased implementation of a peace treaty. While this does not meet the Israelis desire for peaceful intentions to be tested overtime, it does reflect a willingness to consider a dynamic process of peace.

The United States itself needs to think out with all the parties what the substance and process of peace and normalization of relations are. We should work with the Israelis in defining what specific, positive expressions of normal relations they would want built into the normalization process and how sincerely and extensively the Israelis feel the other parties' positive intentions would have to be manifested. If the peace process leads to serious negotiations, Israel will also be faced with the problem of deciding precisely how far they are willing to withdraw in return for the kind of peace and normalization of relations it seeks.

The United States will need to explore with the Arabs what their concept of an end to the state of belligerency means, and how far they would be willing to move towards normalizing relations in a peace agreement.

In this peace-building process, it might be useful to look at the current state of "no war and no peace," and then think of a possible continuum of actions which would lead to full diplomatic relations between the states concerned. We need to flesh out this continuum with the Arabs so that they might think about how much of the continuum they feel they might be able to follow.

The continuum might look like this (although the order of events might not necessarily be the same):

Refraining from provocative acts and statements;

Halting anti-Israel propaganda;

Permitting free navigation throughout the region;

Mutual freezing of arms levels with hope of reducing them eventually;

Agreeing to arrangements for preserving a settlement;

Ending the boycott;

Allowing Israeli stamps in passports of third-country nationals;

Permitting free movement of third-party goods and services directly between countries;

Instituting transportation and communications between States, perhaps initially through third-country carriers;

Removing barriers to direct trade;

Allowing travel between states;

Initiating various levels of diplomatic relations, starting with the development of consular relations; and

Establishing full diplomatic relations.

All parties and the United States should also address related matters such as the pace of the normalization process, the form of assurances that the process will continue, and the procedures necessary to deal with complaints about performance on any such assurances.

Many of these questions are aspects of the peace process which cannot be easily dealt with. Positive thinking on the peace-building process, however, has started. The parties and the United States must insure that this process receives continued encouragement. In the interim, we will have to ask ourselves how much each party's suspicions and perceptions of the other's intentions should control the process and influence American policy.

2. Borders and Security

Any consideration of the nature of the peace and normalization of relations affects, and is closely linked to, consideration of final borders and security arrangements.

The gaps between the Israeli and Arab positions are greatest on the issue of withdrawals and final borders.

The Israelis maintain that they will never withdraw totally to the June 4, 1967 lines, while the Arabs insist on return of all lands occupied in June 1967.

Behind these public positions little give seems to exist. Some Arabs are reconciled to minor adjustments in the 1967 lines, while some Israelis talk about very substantial or even near-total withdrawals on some fronts.

While it appears that most Israelis will support territorial withdrawals in exchange for real peace, it is evident that they are far more sensitive to a return to Arab control on the West Bank than they are to major territorial concessions on the Golan Heights and in the Sinai.

The Israeli sensitivity to territorial adjustments on the West Bank stems from security as well as historical and religious considerations. This sensitivity is more acute for the new Likud government. The desire to keep the West Bank for these reasons, however, seems to conflict with the strong feeling in Israel that the Jewish character of the State should be maintained. A large Arab population, including the more than 600,000 Palestinian Arabs who live on the West Bank, would reside in a Jewish state should the West Bank be retained.

Some members of the Israeli Government base their opposition to returning the West Bank on security reasons. Many Israelis view the West Bank as a fist plunged in Israel's heartland. They consider deployment of sophisticated military electronic equipment or demilitarization on the West Bank as inadequate means of compensating for the security now afforded Israel by its present control over the West Bank. According to this view, any non-Israeli control of the West Bank means that Israel faces a permanent threat and could be dissected with ease by its enemies' modern weapons at points where formerly less than 10 miles separated the West Bank from the Mediterranean Sea.

Clearly, if the Israelis are to consent to major withdrawals from the West Bank, the nature of the peace as defined and agreed to in a treaty must be to their liking. In addition, methods will have to be devised in order to preserve a settlement and institute mutually agreeable ways of protecting one party from what it may consider the bad faith of the other.

For Israel, there will have to be viable substitutes for the security lost due to withdrawals from the territory occupied in 1967. For the Arab States, there might have to be a common-border buffer zone.

Several methods have been suggested to deal with the issue of security, some of which may eventually be acceptable to the parties. These include:

Multilateral or bilateral guarantees either inside or outside the United Nations system;

Arrangements to enhance the parties' faith in guarantees or treaties, including the presence of "hostage" or "tripwire" forces, ship or aircraft visits, and the stationing of American forces;

International peacekeeping forces;

Technological peacekeeping devices comparable to the electronic equipment operated by the United States Sinai Support Mission;

Demilitarized zones;

Zones of limited forces with verification proceduces; and

Diplomatic peacekeeping devices such as prior notification of military maneuvers and changes in force levels and structures.

Other ideas have been suggested to enhance security and to buttress a settlement. Arms limitations or military reconfigurations could be weaved into peace-building process. In addition, a distinction could be made between final borders and security borders.

Many of these ideas are being discussed in the Middle East today. Some may eventually be acceptable to the Israelis, but in the final analysis, given the history of the conflict, Israel will remain chary of any substitute to real peace and to its own security measures.

In the coming months, Israelis and Arabs need to think further concerning borders and security arrangements:

How far will the Israelis withdraw if the entire nature of the peace is to their liking?

What types of security arrangements, perhaps involving Israelis, are acceptable to the Arabs in exchange for near-complete Israeli withdrawals?

The United States must reflect upon the various security arrangements currently being discussed and the implications of those involving a direct American role.

In the final analysis, no borders will be secure in the Middle East if neighboring countries do not accept them.

3. The Palestinians

The future of the Palestinians, the third key issue in Mideast negotiations, may be the most difficult problem to solve in the Arab-Israeli conflict.

One factor that makes this issue so complex is that the Palestinian people are scattered.

Some 600,000 of them live on the West Bank today,

Another 350,000 in Gaza,

And almost 400,000 more (Israeli citizens) within the pre-1967 borders of Israel.

More than 1.5 million Palestinians live in Jordan and they represent just over half of Jordan's population

An additional 500,000 live in Lebanon, Syria, and elsewhere.

A second complicating factor is determining who speaks for the Palestinians. While it is recognized that Palestinians should be involved in those issues of a Middle East settlement affecting them, there is no agreement among the parties to the conflict on who represents the Palestinians.

The Palestine Liberation Organization (PLO), headquartered in Beirut, is not recogized by Israel and does not itself accept Israel's existence. Elected mayors and other officials of the cities and towns on the West Bank and in Gaza sometimes speak for local constituencies there, but because the Israeli occupation has not permitted the development of political leadership there, no local political organizations have been able to vie with the PLO to represent Palestinians on "national" issues.

A third factor which complicates the situation concerns the appropriate role, if any, of the PLO in peace talks. The PLO wants a state on any portion of the Occupied Territories from which Israel withdraws. Some PLO officials have said privately that they will settle for a ministate on the West Bank and in Gaza, agreeing to live there in peace with Israel, but such statements are not made in public. The PLO has yet to recognize Israel's existence or right to exist in explicit terms and to state its acceptance of U.N. Resolutions 242 and 338 which have been the base is for all recent negotiating efforts. The PLO has also not yet accepted publicly the right of self-determination for the Palestinian people once a settlement is reached.

Elsewhere in the area, there is little agreement on the PLO. The Israeli Government rejects the very idea of any independent Palestinian entity.

Jordan wants Israeli withdrawals, after which it is prepared to accept the results of Palestinian self-determination. Most Arab leaders, including some PLO representatives, recognize that any Palestinian entity would have to have close links with Jordan.

Despite great differences among the parties on the Palestinian representation issue, most people in the area can agree on the following principles:

(A) Palestinian involvement in the aspects of the negotiations which directly relate to them;

(B) Tangible results for the Palestinians from a settlement so that they can support an end to the conflict;

(C) A stable situation for all Palestinians, and some type of homeland for the

(D) Close links between Palestinians and Jordanians; and

(E) Some form of compensation to those Palestinians who lost property when they left Israel, as well as some form of compensation to the Jewish citizens of Arab states who emigrated to Israel and left property behind;

(F) Assurances that whatever arrangements are made for the Palestinians, instability in the region does not result.

Considerable attention to the Palestinian issue is a sine qua non of successful peace negotiations. Although the procedural problems may now be prominent, they will be much easier to resolve than the substantive issues. The key dilemma to be confronted is the degree to which, and the framework within which, all parties can allow a people that has suffered so greatly to determine its own destiny.

In my view, the parties may want to consider the concept of an interim arrangement for a period of years for occupied territories in the West Bank and Gaza. One such concept must be an international trusteeship of the West Bank and Gaza for a period of time.

ROLE OF THE UNITED STATES

At the moment, all the parties to the Arab-Israeli conflict look to the United States to help mediate differences and promote peace negotiations. For Israel, no other country in the world other than the United States has the clout and willingness to play anything close to a constructive and honest broker's role.

For the Arab States, there is a widespread feeling that while the Soviet Union can sell them arms and help them to a degree, only the United States can assist them in achieving the political goals they seek in a Middle East settlement. These perceptions have led Egypt and Syria to rely on the United States to the point that they become overconfident in our abiltiy to bring results and "deliver" Israel. In fact, there is a feeling among all the principal Arab States that the United States rather than the Soviet Union can achieve progress.

Such widely held perceptions add both pressure and responsibility on the United States in the process of negotiations. U.S. statements must always attempt to be carefully balanced, clearly stimulating the movement, flexibility, concessions and bargaining necessary from all the parties involved.

If we cannot help achieve results in a short time-frame, it is feared that Saudia Arabia, Egypt and other Arab States may drift away from current policies, thus endangering U.S. interests and increasing chances of renewed hostilities. The fear of such developments helps motivate the United States in promoting the peace process.

The United States must continually stress to the Arabs that they cannot sit back and expect the United States to "deliver" Israel or to produce some quick easy solution in Geneva. Geneva, once started, will be a lengthy process. While the United States can offer suggestions and try to help the parties, the Arabs must be convinced that the United States does not have the ability or will to impose a settlement.

The Israelis must be assured that our statements on the Middle East and our suggestions and ideas to the parties are not an attempt to dicate terms or impose an American peace plan, but rather a genuine effort to try to narrow the gap between the parties. The Israelis need to realize that such a role is part of the unique position of the United States vis-a-vis the Middle East at the moment.

The problem that ultimately arises in what the United States should do if the Arabs and Israelis cannot or will not mend their differences by themselves and cannot agree to a set of principles on the basis of which negotiations can proceed. All the parties are apprehensive about how the United States will approach this type of impasse.

Such a predicament, however, is only one manifestation of the great opportunity any Geneva-type conference presents for the United States. The United States should feel free to offer proposals and accept responsibility in resolving negotiating problems. But the United States must also understand that it cannot be heavy-handed and push the parties further and more quickly than they are willing to go.

For the immediate future, the focus must be on getting the Geneva process off to a mutually acceptable start. The U.S. role should be to encourage the parties to proceed with negotiations. The gaps in positions are enormous in some instances but they can only be tested and resolved in detailed negotiations.

Since the 1973 Middle East War, the United States has provided close to $15 billion in assistance to Israel, Egypt, Jordan and Syria. Nearly two-thirds of those funds have been provided to Israel. It is fair to conclude that we remain deeply committed to Israel's survival, well-being and to providing her with military equipment essential to maintaining existing military relations.

I think it is also fair to say that the United States Congress remains willing to appropriate large sums of money for all Middle East states in the near future. Should current efforts to start a Geneva conference fail or should circumstances in the region change, however, there may be increasing difficulty in maintaining a strong commitment in Congress to provide huge amounts of assistance to the Middle East.

CONCLUSIONS

When I spoke to many of you on the Middle East in 1973 during the Yom Kippur War, I concluded:

"There are, I suppose, a few optimists on the Middle East. Nevertheless, I believe, if we keep our wits about us, refuse to analyze the difficulties in overly simplistic terms and act prudently, we can vastly reduce our dif-

ficulties, avoid making distasteful choices between Israel and oil and meet the challenges presented to American foreign policy in the Middle East."

In November 1977 despite the difficulties in trying to start a Geneva Conference, I see stronger grounds for a degree of optimism. The alternatives for us and the peoples of the Middle East are unthinkable at best and could be devastating at worst.

FIFTY YEARS OF SERVICE

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. ADDABBO. Mr. Speaker, 1977 represents the 50th anniversary of the Jamaica branch of the NAACP and those 5 decades have represented an untold wealth of service to the community.

It is sometimes hard for us to remember just how much the world has changed in our lifetime. In 1927 when the chapter was formed by Frank Turner, who had been secretary to Dr. W. E. B. DuBois, the Ku Klux Klan had an annual parade in Queens, and a black family that bought a home in Queens had to have 24 hour police protection.

Sadly, that was not the full extent of discrimination that existed then and afterward, and to a lesser degree, still exists today. But throughout all the years of hardship and dedicated hard work, the Jamaica NAACP carried on its fight for equal treatment under the law, a battle that continues today.

I am proud of the men and women who have been part of this outstanding NAACP chapter. I am proud of the accomplishments and we can all be thankful that their willingness to fight for a better life has made our Nation a better place in which to live today.

Our Nation was founded on the principle of equal rights. For much of the 200-year history, those words were hollow for citizens whose skins were darker than their neighbors'. But through the efforts of gallant people like Frank Turner, Dr. Charles Reid, and the many others who have followed in their footsteps. the promise is finally beginning to come true.

I salute the Jamaica NAACP on its 50th birthday. I wish them continued and even greater success in years to come. I insert in the RECORD the story of "50 Years of Service."

FIFTY YEARS OF SERVICE

It was 1927. Calvin Coolidge was President, Babe Ruth hit 60 home runs, Lindbergh flew the Atlantic, Whiskery won the Kentucky Derby and the Ku Klux Klan had its annual parade along Hillside Avenue.

It was 1927. Jack Dempsey was the Heavyweight Champion of the World, Alabama and Stanford played to a 7–7 tie in the Rose Bowl, Loew's Theatres in Jamaica still practiced segregation and the Black family that bought a home on Remington Street had to have 24-hour police protection.

It was 1927 and Robert Bagnall, director of branches of the NAACP was angry when he addressed a meeting at the old Allen A.M.E. Church. The time had come, he said, for Black folks in Jamaica to get together in the spirit that gave birth to the Niagara Movement in 1909, in the spirit that prompted the creation of the National Association for the Advancement of Colored People. His words found willing listeners and in April, 1927, Frank Turner, who had been secretary to Dr. W.E.B. Dubois, called the meeting that ended with the organization of the Jamaica, N.Y. Branch of the NAACP.

Frank Turner's wife, Frosty, attended that meeting. Also gathered in the Turner living room that afternoon were Charles Shaw, Frances Dougherty, Lora Lewis, Mabel Booth, mother of Judge William Booth, and several others, including a young pretty girl named Selena Girardeau.

Dr. Charles Reid was elected the first President of the new Jamaica Branch and one of his initial tasks was to announce the organization's objectives. In his own words, the Jamaica Branch was formed 'to secure Negroes the full enjoyment of their citizenship rights, justice in the courts and equality of opportunity to work, to stimulate their cultural life and to support the NAACP national program."

There was much to be done and the new branch went straight to work. It spearheaded the fight that led to the suppression of the Ku Klux Klan in the community and began the legal action that ended segregation in the area's theatres. It fought successfully to open Queens General Hospital to Black physicians and nurses and led the campaign to construct the South Jamaica Housing development. It successfully defended eight Black men accused of committing murder during a racial disturbance and insisted better security for Black families desegregating "all-white" communities.

But, perhaps its greatest contribution has been its ability to develop capable leaders for a community, and a people, in dire need of leadership. In the 50 years since its creation, the Jamaica Branch has sent hundreds of men and women into the battle for freedom and equality. As an all-volunteer organization, part of a 1700 branch national association, Jamaica Branch has a history of dedication and service that continues to this day.

A look at the roster of its past presidents gives testimony to the fact that the Branch has been effective in attracting talented people and in sending them back to the general community even more talented than they were upon arrival.

Following Dr. Reid in the presidency were: Mr. G.W.A. Murray; Dr. John Singleton; Rev. A. Chester Clark; Dr. Judge A. Thompson; Mr. John Klugh; Rev. Charles L. Carrington; Mr. Emory Hightower; Guy R. Brewer, now majority whip of the New York State Assembly; Florence V. Lucas, former Asst. Commissioner of the New York State Division of Human Rights; Mrs. Dupree C. White; Paul Gibson, Jr., former Deputy Mayor of New York City; Criminal Court Judge William H. Booth; Criminal Court Administrative Judge W. Eugene Sharpe; Mr. Robert Couche; Mr. Peter Saltz; Mr. Richard Hansen; Mr. Walter Ramsey and the organization's current president, David E. Bryan, Jr.

These men and women, with the support of so many others, have helped to shape our community and the history of our times.

"Growth" is the key word when one reviews the activities of the Jamaica Branch through the years of its existence—the type of "growth" exemplified by the changing physical surroundings of the organization. After its beginnings in the Turner living room in 1927, the young branch wandered from home to home and from church to church before renting its first permanent quarters in 1960.

Located beneath the Allen and Edwards Real Estate office at 168–18 Liberty Avenue, the new home consisted of a tiny, below street-level cubby hole with a ceiling so low that those over six feet tall had to walk with a stoop. The rent was a staggering $40 per month.

Donated furniture and second-hand equipment followed the volunteer painters and a few weeks later, the branch's first paid secretary-clerk was hired by the then president, Dupree C. White.

From Liberty Avenue, the Jamaica Branch moved onward and upward. Out of the basement it came and into new offices at 117–20 Farmers Blvd. This move followed a heated debate in the Branch Executive Board over whether or not the organization could afford the unheard of rent of $100 per month. When the tempers had cooled, approval of the move was voted and Board member, Roger Benjamin given the responsibility of coordinating the renovation of the new quarters. Again, the Jamaica community came forward to help. Wall paneling and paint were donated. Floor tiles were sold to the branch at cost. Furniture was found hidden away in basements, restored and sent to the branch. Men and women worked side by side, painting, hammering, sewing and laughing. It was a labor of love. The formal opening was held on a Sunday afternoon in March, 1965 and a scant 15 minutes before the doors were unlocked, Branch President Gene Sharpe and Press Chairman, Paul Gibson set in place the last piece of floor tiling and raced off to their homes to clean up and change clothing before the ceremonies.

Robert Couche presided over the next move. As president in 1968, he looked with pride at the branch's new offices at 189–26 Linden Blvd. But he was even prouder of the children's day care program which shared the newly renovated building around the corner from the old Farmers Blvd. location. Roy Wilkins made the formal dedication of this NAACP first, smashing a bottle of milk on the base of the 40 foot tower on which is printed in bold, white letters: "NAACP DAY CARE CENTER—JAMAICA BRANCH".

A few years later, and a few blocks away, Jamaica NAACP opened its second day care program. Together, the Linden Center and the Montauk Center serve almost 300 children between the ages of 3 months and 13 years. The centers employ over 75 people and have a combined budget of $1 million per year.

In the heart of Jamaica's central business district is housed still another NAACP project. It is the branch's manpower training program, a program with an average annual budget of $725,000 and a staff of twelve. Another example of "growth".

But those who marvel at the accomplishments of the NAACP, look not at the buildings which house programs, but rather at the programs themselves. And programs have been the life blood of the Jamaica Branch.

For sixteen weeks in 1963, the branch manned picket lines in front of the Rochdale Village construction site where biased unions gloated as 2000 of their members reported for work each day while hundreds of unemployed, qualified, Blacks vainly sought employment at the same site.

When plans for the extension of the Clearview Expressway threatened the homes of thousands of Black families in Queens Village and Springfield Gardens, the Jamaica Branch led the successful battle to protect those homes. When the announcement was made that an elevated transit system would be constructed through Baisley Pond Park, Jamaica Branch led the community in opposition. "Dialogue" was the Jamaica Branch program developed to help people in the diverse Queens communities to understand each other. When New York City's

schools were closed by labor disputes, the Jamaica Branch opened Freedom Schools. And when "Parents and Taxpayers" threatened school desegregation efforts, Jamaica Branch rallied supporters of quality, integrated education.

Voter registration drives were conducted almost annually, and, in 1968, the most intensive effort, ever, qualified thousands of Blacks in Queens County. Imported domestics turns to Jamaica Branch to protect them from the slave labor salaries and conditions imposed upon them by unscrupulous employment agencies and demanding employers. Southern Blacks, harassed and threatened, turned to the Jamaica Branch for food, clothing and finances. Students asked for support and prayers and when they marched to desegregate Woolworth's in Dixie, picket lines also appeared on Jamaica Avenue. When Martin Luther King said he had a dream, Jamaica Branch was there and cheered. When he died, branch members wept and walked the erupting streets of their community to ensure that he would be remembered for the pride and peace he preached rather than for the violence and looting his death threatened to unleash.

York College was supposed to go to College Point, but Jamaica Branch helped to bring it to Jamaica. In 1960, a candidate opposed to school desegregation was supposed to go to Congress, but Jamaica Branch led the successful fight to defeat him. The branch's Black History Guide for Teachers was another NAACP first and its Black History Week program has become a tradition.

To rally its community, the Jamaica Branch brought in the giants of the civil rights movements: Martin Luther King, Roy Wilkins, Malcolm X, Thurgood Marshall, Medgar Ever, Arthur Spingarn, Rev. Fred Shuttlesworth, Dais Bates, Adam Clayton Powell—legendary men and women who have helped to guide the destiny of this nation.

But the great and the near great who visited Jamaica found, waiting to receive and to follow them, equally dedicated men and women. The men and women who labored behind the scenes, who raised the funds and provided the muscle that powered the Movement. Men and women like Msgr. Archie McLees, Lawrence Bailey, Claire Foster and Bobbie Croslin. Men and women like Leonard Gould, Una Mulzac, Carita Roane, Stanley Cunningham and Neville Lake. Men and women who walked the picket lines, rang the door bells, licked the postage stamps and brought in the memberships.

And when one speaks of memberships, one must speak of Chester Alston, the tireless worker, the man who organized and directed massive membership drives and pushed Jamaica Branch's enrollment over the 5000 mark. And one must speak also of Frances Dougherty, Isabelle Cooper, Betavious Archer, Walter Daniels and other leaders responsible for bringing in hundreds of members and thousands of dollars.

There have been memorable moments in the 50 years since the organization of the Jamaica Branch. There have been happy moments and there have been sad moments. There have been victories and there have been defeats. But, through it all, there has been faith in the rightness of our cause.

MEMORIES

For this 50th Anniversary Journal, a few long time members were asked to share some of those incidents or Branch activities which stand out in their memories. Here they are:

Msgr. Archie McLees

We were all involved with the founding of the day care center, first the one on Linden and then the one on Montauk Street. I am a member of the board of directors of both of those at the present time, and I've been closely associated with it from the beginning. If you remember, Paul Gibson was the first chairman of the board of directors—he got out of it to become Deputy Mayor of New York—but he's still active and still interested. That won for us that year the Thalheimer Award from the national office for the most outstanding event of any of the branches in the United States—from among the 1,700 branches.

I wish I could remember what year it was. But, I remember that Roy Wilkins came out there, and somebody had the idea that for dedicating the building, instead of using a bottle of champagne, to use a bottle of milk. They put the bottle of milk in a plastic container, and they had Roy Wilkins swing it up against the building—it was in a glass bottle inside the plastic container—and burst the container, and everybody, including poor Roy himself got a bath of milk. They had one picture in one of the papers—I forget which one carried it—but most of them missed that picture. It wasn't outstanding because of that, but I remember that as one of the interesting sidelights.

I've been a member of the branch since I came out to Queens in 1963. I was a member and a vice president in Brooklyn before that. I was put on the National Board while I was out here and I've been on the National Board since 1967.

Lora Lewis

In 1942, I was chairman of the education committee, and the federal government was selling bonds. We had a group of people helping sell the bonds called the Minutemen; I was one of them. It was during a time when it was very hard getting into St. Albans as a Negro. I went around selling bonds and I had with me two reporters and two photographers from the white newspapers. When I knocked on the doors of the white people who lived in St. Albans then and told them I'd like to come in and speak to them about bonds, the majority of them refused to let me into the house.

Around that time the NAACP was working on getting Negroes entree to that neighborhood. There were only four Negroes living over there then. So on this occasion when I had the newspaper reporters and photographers with me, the cameramen very quickly would take pictures of the white people opening the doors. They still wouldn't let us in, and the reporters saw all of these things. The newspapers came out with great big headlines that said things like: "Race Hatred Fights The Minutemen."

The next thing we did during that Minuteman period was to take our war bond campaign to City Hall—to the Mayor's office. The Mayor, then, was LaGuardia. After that visit we got pledges for war bonds by the hundreds. Then we went to Wendell Wilkie who was running for President. I have great big pictures of myself and the Mayor and Wilkie writing their pledges.

Anyway, even though the people in St. Albans wouldn't support our Minuteman campaign, the Jamaica NAACP ended up being the top money raiser in the whole Metropolitan area.

Richard Hansen

This was in 1971, Black History Week. We had the Borough President come to the branch and he proclaimed Black History Week right outside the branch headquarters. It commenced a week of local merchant participation—they put posters in their windows of historical Black people; we had a mini-one day expo in the basement of the day care center in which the merchants participated; showed their wares to the community. We also had a theater group that we brought in to perform for the children and another for the adult community at the St. Albans Plaza. We had from Newburg Street to 191st Street declared Black Freedom Plaza for the duration of Black History Week.

During my whole tenure in office, my children were involved in assisting me in an awful lot of the pains-taking things: the meeting notices and things of that nature. They were very deeply involved in that particular area, along with my wife. She played a tremendous role. I have not experienced anything like it before, nor am I aware of anything since. It was kind of a unique treatment of Black History Week.

Rep. Joseph P. Addabbo

I remember way back—the little store and the meetings on hot summer afternoons on Liberty Avenue near Merrick. We tried to get people interested in working for their own benefit, working for the rebuilding and saving of the community. I also remember Florence Lucas who had the law office where we used to meet. They were the residents who led the way in those days when it wasn't such an easy battle and it wasn't a popular battle. They were there working to get the slums cleared out of New York Boulevard, working toward the dream of a York College and the dream of bringing equality in jobs.

"The dreams are not complete, but things have started. A lot of the old slums are down. It's a long haul from the day care center and the big building on Linden Boulevard to those little storefronts where we used to meet."

Lawrence Bailey

What do I remember? In the '40s and '50s we spent a lot of our time fighting police brutality, some of it successfully. We fought for the civilian complaint review board, and, of course, we lost. We were always one of the leading branches for talent in the country. We had people like Emery Hightower, who was a school principal—he's been a president; Hillary Thorne, who was a big shot in the Board of Education; of course Florence Lucas and Rev. Charles Carrington. We had really down to earth presidents who really built that branch up—we used to have membership meetings in P.S. 40; they were so big. Some more of the past presidents: Bill Booth, Bob Couche, Gene Sharpe, Guy Brewer, Peter Saltz.

When they first started the school boards we monitored them and we successfully challenged in court, and had overturned, an election. That was in the fifties. I was the attorney for that.

Patricia Burnett

I remember our News Bulletin and the awards it would win at national conventions. It was a terrific publication. Even if people didn't attend meetings, they could keep up to date. I also remember the impact we used to have on our local public schools. It seems to be missing now; but then our education committee was really effective. And the door-to-door canvassing for memberships. Chester Alston headed the campaigns and we would get our friends together and walk for hours. We don't do that anymore, it's too dangerous. I drive everywhere anyhow—I drive too much.

Alma Whittaker

I remember our first cotillion, the Red Rose Cotillion. We had it at the Waldorf Astoria in 1955 or '56. I think that we were the first Black group to use the Waldorf. It was a big fund raiser. Bernice Johnson was the choreographer and we had twenty or twenty-five girls involved.

And I remember how our branch grew in the early 1960s with Chester Alston showing the way. Why, he would bring in 400 members himself.

THE INTERNATIONAL DIMENSIONS AND DOMESTIC CONSIDERATIONS OF DEEP SEABED MINING

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. MURPHY of New York. Mr. Speaker, I recently had the privilege of being invited by members of the Maritime League of Diet Members—Tokyo, Japan—to address the Third Ocean Policy Seminar in Tokyo. Together with a number of other Members of the Congress, I participated in the 3-day seminar on panels related to the continental shelf, energy, and deep seabed mining.

I was asked to deliver the keynote address at the first plenary meeting on November 21, 1977. My remarks to this international body focused on the primary philosophical and ideological differences between industrial nations and the Third World with respect to the deep ocean mining of manganese nodules and the effect of such differences on the Third United Nations Law of the Sea Conference.

Early in the next session of the 95th Congress, we will be considering domestic legislation to establish a legal regime for the administration and encouragement of mining by American-led consortia who will be asked to invest large amounts of capital to secure our future supplies of manganese, cobalt, nickel, and copper.

For the reasons indicated in my Tokyo address, I urge my colleagues to consider the serious consequences of delaying deep seabed mining legislation for an international conference which may be based on irreconcilable premises.

Mr. Speaker, the following is my address given at the Third Ocean Policy Seminar in Tokyo, Japan, on November 21, 1977:

THE INTERNATIONAL DIMENSIONS AND DOMESTIC CONSIDERATIONS OF DEEP SEABED MINING

I appreciate the opportunity to be here today to address the third ocean policy seminar on a topic on which I have a particular interest—deep seabed mining.

Nodules lying on the floor of the deep seabed, contain copper, nickel, cobalt and manganese, constitute a source of minerals that far overshadows land-based supplies and reserves. Estimates of the size of this resource run into the trillions of tons.

Only about three percent of the total ocean floor area has been surveyed in any detail. Most of this area is located in the eastern Pacific Ocean, north of the equator, in proximity to the United States—where most of the companies developing deep seabed technology are based. The most attractive deposits now identified occur in this region and in the south Pacific near Polynesia. However, large areas of the oceans including the Indian Ocean where high grade nodules have been found, remain essentially unexplored. The extent of the most attractive known seabed deposits is so large that first-generation commercial ventures—covering roughly the first twenty years of operations—are likely to mine less than five percent of the deposits constituting such mine-sites.

Relative to any other source of minerals we have previously considered exploiting, it is clear that the quantity of deep seabed minerals is potentially staggering. Furthermore, manganese nodules are not, strictly speaking, a depletable resource.

Indications are that nodules are forming continuously at a relatively significant rate. The process, I am told, is identical to that for making rock candy. Given a "seed" around which to form, crystals will grow drawing on the sugar or, in the case of nodules, minerals that are dissolved in the surrounding water.

I am addressing myself to a critical issue—one that has been completely obscured in the international debate on deep seabed mining. From any practical standpoint, it is not the seabed minerals themselves that are scarce.

Even at the standard of living enjoyed by the industrialized nations, there are enough manganese nodules to last the entire world for hundreds of years. I fully expect that, by the time we are in any serious danger of depleting the resource, we will have developed the technological capability to mine the moon or other planets.

The United Nations' resolution declaring the resources of the deep seabed to be the "common heritage of mankind" has masqueraded as an attempt to insure that a scarce resource is equitably shared among the nations of the world. The problem with this claim is that the resource is not scarce. What is crucially scarce, however, is the knowledge and technological capability necessary for the recovery of these minerals from as deep as three miles below the ocean surface and the ability to process such nodules once recovered.

This knowledge is possessed by certain consortia of United States, Japanese, West German, French, Australian, British, Dutch, Swedish, and Canadian corporations. The knowledge that these technologically sophisticated consortia possess is not generally regarded as "the common heritage of mankind".

The importance of this distinction between the resource itself and the knowledge required to recover the resource cannot be overemphasized. What our adversaries at the United Nations Law of the Sea Conference are demanding, once you get down to basics, is not just their fair share of the resource. This we are willing to provide them. What they are really demanding is a share of the benefits that are gained through the investment of time, resources, and effort on the part of others in gaining the technical expertise in building and equipment necessary for recovery and processing—without bearing any of the costs themselves. Many have the additional motive of protecting their privileged position, as monopoly producers of these minerals, from competition in the world market. I am certain that any of the nations so adamantly opposed to deep seabed mining, were they willing to devote resources to seabed nodule recovery and processing, would be welcome members of the mining consortia that have already been formed. It is unreasonable and implausible to argue—as the group of 77 is attempting to argue—that one has been excluded from a rightful share of a world resource simply because that nation is not allowed to share in the benefits unless it bears some of the cost.

The lesser developed nations should recognize that the industrialized world has attained the high standard of living it now enjoys only by the investment of resources, hard work, and the time that it has expended throughout its history to reach this goal. We are fully prepared and committed to help the underdeveloped world reach their goals, but they must recognize that it demands commitment and investment of resources on their part.

I find their current abdication of this responsibility and their concomitant claims that we owe them a share of the wealth we have produced, highly distressing.

The problem may have been best expressed by our special representative at the U.N. Law of the Sea Conference, Ambassador Elliot L. Richardson, in his appearance before the House Committee on Merchant Marine and Fisheries, which I chair. During his testimony on July 27, I expressed my feeling that no acceptable treaty would be forthcoming in the near future without some pressure applied to the third world and that the pressure should be of an economic nature. Ambassador Richardson expressed agreement with that statement and elaborated even further by stating:

"There has to be pressure in a sense that the other participants in the conference have to be aware of two things: one is that deep seabed mining will go forward with or without a treaty; the other is that there is no way in which other countries can participate through an international seabed authority in deep seabed mining unless the terms and conditions under which private corporations and consortia contract with the authority are economically viable."

This point must be emphasized. Private corporations are simply not going to be interested in participating in an international deep seabed mining effort that requires them to give away all their proprietary information, bear all the investment costs, but reap none of the financial benefits. I do not think that a corporate president who was to undertake a venture requiring the corporation to give away its trade secrets, its assets, and the service of its employees while receiving nothing in return could expect to keep his job for long. But, this is exactly what the third world is demanding.

It is also imperative that we correct the erroneous impression that deep seabed mining is an initiative being fostered by the United States alone. I would like to set the record straight in this regard.

Admittedly, we do have our own interest at heart. We would like to decrease our dependence on mineral imports—particularly when the sources of such imports may be of uncertain political stability. Of course, new industry benefits us just as it does any other country.

As it is now developing, however, deep seabed mining is truly an international effort. At least eight other nations in the Free World are directly involved in development of deep seabed mining through participation in various mining consortia. Furthermore, these consortia draw their investment capital from many more than just the nine nations in which the corporations comprising the consortia are based. In total, there are several dozen nations who are now participating in the development of deep seabed mining in some way. Many of these nations have their own national interest and security in mind as, quite rightly, they should.

The United States currently leads the world in the development of deep seabed mining technology and development of commercial markets for seabed minerals. But, nobody can plausibly argue that we are excluding other nations from the benefits of harvesting these minerals.

This brings me to what I now see as the fundamental impediment to a law of the sea treaty. The respective worldviews of the industrialized and developing countries and, consequently, the premises on which each bases its negotiations, may be simply too different to be reconcilable.

The industrialized nations are accustomed to working within a free enterprise framework. They accept the premise that one shares in the benefits of society largely to the extent that one shares in the cost. Not only is this considered fair but it is the way that a nation improves its standard of living—

by investing in ventures today that will lead to increased national wealth tomorrow.

The lesser developed nations comprising the Third World, on the other hand, do not accept this theory. They believe that they have a birthright to the earth's economic wealth—no matter what nation or nations bore the expense by which that wealth was created. One of the reasons that economic aid to these nations, whether through development loans or outright grants, creates so much resentment is because they really feel that we owe them more, no matter how much is provided for them.

I will not try to claim that I am right and the leaders of the Third World are wrong. Certainly they believe that their egalitarian sentiments, largely inspired by their own economic ideologies, are fair and equitable—as firmly as I believe the American free enterprise system, monitored by a government of the people, is just.

The point is that these two sets of beliefs are irreconcilable. They are so basic to each of our ways of life as to make open discussion most difficult.

Many of the scholars who have studied deep seabed mining within the context of the law of the sea negotiations have completely missed this point. For the most part, they have proposed complicated schemes for distributing the wealth from the deep seabed in order to make every nation on earth more prosperous than it is now. The intent of these proposals is to make ocean mining compromises acceptable to the third world. Our negotiators have gone far more than half way in attempting to implement some of these compensatory schemes at the conference. Yet, compromise proposals made by the U.S. delegation that included parallel access, extensive technology transfer, and excessive royalty payments to an international authority were flatly refused. Our proposals were, in my opinion, far too generous.

Once we recognize, as the scholars have *not*, the highly irrational nature of the negotiations at the law of the sea conference, we may find that we are in a completely new arena. We may not be able to reason with the underdeveloped nations because our beliefs differ so drastically. If this is true, we are left with an inescapable choice. The industrialized nations can either follow the dictates of the Third World or protect their own interest. There is no question in my mind that the latter is the course we should pursue.

As chairman of the House Committee on Merchant Marine and Fisheries, I have, along with many of my colleagues, strongly urged the Congress and the President of the United States to protect our interest and to avoid capitulation to excessive and unreasonable demands at the Law of the Sea conference. I think that we should make it abundantly clear to all concerned that we are prepared to go ahead with deep seabed mining with or without a LOS treaty and that, should the conference break down permanently, we are prepared to negotiate a series of bilateral or multilateral agreements with those nations who wish to pursue ocean mining.

Whatever the good intentions of the United States and certain other nations, the cleavages between the group of 77 nations, the land-based producers, the industrialized countries and the landlock nations, make the establishment of an international seabed authority extremely uncertain. We must face the possibility that the Law of the Sea conference will produce no acceptable treaty.

To strengthen the position of the U.S. delegation in its negotiation with the Third World and to establish a legal format suitable for possible multilateral or bilateral agreements on seabed mining, I have been urging the United States Congress to adopt domestic deep seabed mining legislation to encourage the commencement of commercial mining activity within the next few years.

The Congress must move forward this year with comprehensive legislation for two critically important reasons.

First, a legal framework must be established by legislation—a framework in which the industry can operate and the Government can administer.

With respect to the American mining industry, it is imperative that some degree of predictability about its future rights in the ocean be established. Between now and the beginning of commercial recovery on the first few mine sites which will be located in the North Pacific Ocean between Hawaii and the west coast, the companies must acquire and commit more than $2.5 billion. To the extent that a LOS treaty could terminate industry's rights under existing international law, prohibit mining activities, limit production, fix prices, require transference to a new mining site, or raise costs prohibitively, lending institutions will not loan any substantial part of the risk capital needed to move toward commercial operations. The political risks involved in an international agreement must be addressed in legislation so that a reasonable secure investment climate will be created. Only within that climate, will investment companies be willing to loan and mining companies be able to obtain the enormous amounts of capital required for deep oceans operations.

Conversely, our Government has virtually no control over the present exploratory and development activity of our ocean mining companies. The U.S. State Department has confirmed the fact that the companies may continue to operate under customary international law within the concept of the freedom of the high seas. Consequently, there is no regulatory framework by which the U.S. or any of its allies may exercise any type of administrative or environmental control over high seas operations. This is an element we will need if we are to mine the seas in an environmentally sound and responsible manner. Therefore, it is imperative that a strong legal framework be established—a framework within which the industry may enjoy some degree of investment security and the Government may exercise its normal functions of regulation and administration.

The legislation that Congressman John Breaux and I have introduced and which has been reported out of two House committees addresses itself to these requirements. Additionally, our legislation contains a provision on reciprocating States that is designed to encourage our allies to follow our lead and adopt deep seabed mining laws of their own. Our express policy in the legislation is to prohibit the issuance of any license or permit for ocean mining if such mining conflicts with licenses or permits issued previously by a presidentially designated reciprocating State.

It should also be noted that our legislation is interim in nature. In other words, the framework established by the Congress will exist only as long as there is no international agreement which is binding upon the United States. Once such an agreement is successfully concluded—if that ever occurs—ocean mining will then be carried out under the structure of the international treaty. I believe that this is very important to keep in mind because some argue that our legislation will damage the LOS negotiations. This is simply not true as the temporary nature of our measure indicates.

In concluding these remarks, I would like to touch on the question of why, in a humanitarian sense, we must proceed with deep seabed mining. This is the important question on which aspects of ocean policy must ultimately focus. Any policy that fails to take human welfare into account is policy that is empty and useless.

Some feel that no resource in the ocean should be exploited. Others feel that ocean resources should be exploited indiscriminately. Somewhere between these two extremes is a moderate balance that maximizes the human economic benefit derived from ocean resources while protecting the splendor and natural beauty of the ocean environment. Our legislative approach to deep seabed mining represents, I am convinced, such a balance.

On the economic side, the reason commercial exploitation of these resources has never before been undertaken lies in the historically high cost of producing minerals from the ocean, particularly when compared to the relatively low cost of producing those minerals from abundant land-based ores. However, over the past decade the value of the metals contained in nodules has more than doubled and has risen by 50 percent more than either the U.S. wholesale price index or the international monetary fund index of world traded goods.

At the same time, the technological environment, within which efficient ocean mining techniques could be generated, has been greatly improved. This is largely attributable to techniques developed by the rapidly growing offshore oil industry. Also, as ocean mining becomes potentially cheaper, land-based mining is becoming increasingly expensive. This is due both to dramatic declines in ore quality and accessibility and to increased infra-structure costs as more isolated land-based deposits are brought under development.

Additionally, we are moving into a period in which there is a shift from a buyer's to a seller's market for most raw commodities. This greatly increases the probability of stable cartels forming. Economic theorists traditionally dismiss the possibility of the formation of long-lived cartels. Yet, these same theorists did not foresee the formation of the OPEC cartel in 1973 and have, since that time, repeatedly predicted imminent collapses of that cartel—collapses which we all know have not occurred.

Many land-based producers of minerals are operating at already near monopoly prices—prima facie evidence that they already wield considerable market power. One who believes that such producers could not form a cartel is, in my opinion, seriously deluding himself.

Deep seabed mining can restore competition to the world market that would result in lower mineral prices for all. The economic benefit from this would be worldwide and include even those nations most adamantly opposed to an equitable seabed mining structure.

Much of what we are seeing in the confrontation between the industrialized nations and the lesser developed countries is a fundamental difference in the perception of what role is to be played by the United States and its allies in long-range human development. This brings us back to my comments earlier about the knowledge and technological capability necessary for recovery of seabed nodules, and not the nodules themselves, being the true resource. I believe that we should all keep in mind that the oil, gas, minerals, and other resources that we began using about a century ago have been held by the Earth for millions of years. What was lacking through all these years of human history was the knowledge required to make use of these resources.

The industrial and technological development that has been undertaken by the United States and others entails learning-by-doing. You do not have to be very intelligent to stoke a furnace with coal or burn oil that

you happen to find by digging in your backyard.

You have to be a good deal more intelligent to be able to obtain that oil from beneath the outer continental shelf which is under 200 meters of water. You have to be very intelligent indeed to make synthetic fuels from sea water using solar energy, or separate isotopes of hydrogen from sea water and heat them to 200 million degrees fahrenheit for the purpose of power generation. The use of hydrogen isotopes from sea water is a function we expect to be able to perform in the next century—once fusion reactors become operational. These latter two sources of energy, if developed, would last mankind for six to ten billion years. This is as long or longer than the sun itself will last.

In view of this, one should properly view the non-renewable resources that we are now using as finite wealth that the industrialized world is squandering, but as a fortunate accident of nature that has given us the luxury of time to learn proceses that will ultimately bring mankind into a world of truly abundant wealth.

Each new technological project that we undertake is an important part of this learning process. What we learn from deep seabed mining will be far more important in the long-run than the minerals we recover. The knowledge we gain will be beneficial for all people and all nations. This is precisely why it is imperative that the exploration and development of the oceans be strongly encouraged by the world community—and not be politically constrained by an international conference which may be based on irreconcilable premises.

Thank you.

REMARKS ON THE GOVERNMENT-BUSINESS STRUGGLE

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 30, 1977

Mr. HILLIS. Mr. Speaker, I would like to bring this article that appeared in the October 31, 1977 edition of the American Market/Metalworking News to the attention of my colleagues. I feel this article by the chairman of Rockwell International Corp. makes some interesting remarks on the government-business struggle. For this reason, I submit the article entitled "Government, Steel Must End Their Adversary Relationship."

GOVERNMENT, STEEL MUST END THEIR ADVERSARY RELATIONSHIP

(This article is excerpted from a speech given by W. F. Rockwell Jr. at the recent meeting of the Iron Castings Society in Scottsdale, Ariz.)

It's time we took a new look at the condition of our industrial base—especially with regard to our overseas competition.

For instance, it was not too long ago the stamp "made in Japan" on any product was usually an indication of inexpensive and poorly made goods. However, that's no longer the case. Today Japanese products have made many inroads in America because they're well made, well styled and attractively priced.

The great influx of Japanese products shows an ever growing trend that Americans can no longer ignore. In our shrinking world, the marketplace within our borders can no longer be considered the private marketplace of American business. Just as we have developed foreign marketplaces for our products, so, too, have others aimed their products at our shores.

The problem of Japanese steel, the current problem that's on many people's minds, is not the disease but merely the symptom. And while erecting trade barriers and other protective types of legislation may cure the symptoms on a short-term basis, especially if dumping is involved, I don't feel that they are the necessary long-term cure that our nation needs if we're to compete in a world marketplace.

I tend to agree with the Boston Consulting Group which reported: "Japan's economic success is not a temporary phenomenon. It is not a result of cheap labor, nor of exports, nor of copying. These kinds of simplistic explanations will not and cannot explain the massive achievement of Japan. Rather, Japanese industrial growth is the result of the functioning of a highly efficient system in which the parts interrelate to stimulate the continued growth."

WORKING RELATIONSHIP

This report goes on to point out that one of the key elements that determine the Japanese system of economic growth is their business-government relationship.

In Japan, the report goes on to say, "there is a basic assumption that the objectives of government and business are essentially the same—the maintenance of Japan's economic health and promotion of the nation's interests.

"It is perhaps no great exaggeration to suggest that a contrary assumption is made in the United States and elsewhere in the West that somehow the objectives of government and business are inimicable, and that it is the responsibility of government to protect its constituents from the ravages of the business community.

"This view of conflicting objectives, with government and business basically at odds, is seldom alluded to in Japan."

BENIGN ADVERSARY

Perhaps one of the biggest and most positive benefits of this type of working relationship on the part of the Japanese, as opposed to the benign adversary relationship of American business and government, is in the amount of capital investment available. And you and I know that for industry in each nation to grow, it must have capital to invest.

From 1960 until 1973, the United States had a capital investment rate of 13.6 percent of our Gross National Product. During that same period, the Japanese had a rate of 29 percent.

You can take a look at the years 1965 to 1975 to see the results of these capital investments. The United States had an increase in output per man hour in manufacturing of 2 percent, while the Japanese, riding on the benefits of their increased capital investments, had an increase of 9.5 percent.

What this means when applied to our industrial standards today should be obvious. The annual production of crude steel per Japanese worker between 1971 and 1976, stood at 479 net tons compared with only 239 net tons for his American counterpart.

USE LESS COKING COAL

It also means that Japan's advanced plant technology allows the use of 30 percent less coking coal per ton of steel produced than in U.S. mills.

And, it also means that crude steel production by highly efficient basic oxygen furnaces accounted for 82.5 percent of total Japanese production in 1975, while the figures for the U.S. were only 61.6 percent.

And production by out-moded open hearth furnaces in Japan was only 1 percent of their crude steel production but was 19 percent of America's crude steel production.

I'm aware of the recent article in Ironcaster Magazine that showed that the foundry industry, which employs more than 300,000 people, may need as much as $10-billion in capital over the next four years. That same article pointed to a possible capital shortage of 18 percent.

This problem of finding funds for capital investment is evident across the board in American industry.

In the 10-year period between 1965 and 1974, our nation consumed $1.6 trillion in capital. Business Week reported that "by the best estimates available, the U.S. will need the incredible sum of $4.5-trillion in new capital funds in the next 10 years; capital that, for the most part, will have to come from the savings of the American people and the profits of American business."

CAN'T USE MASTER CHARGE

The $4.5-trillion that we need between now and 1985 is a gigantic problem. I don't think anyone's going to let us use our Master Charge or BankAmericard. So, we better stop and think about just where all that money is going to come from.

Before someone suggests the government, let me remind you that the government taxes you to get its capital.

I think that statement in itself indicates part of the problem. Our nation today is basically divided into a nonproductive government sector and a productive business sector, both operating in a friendly, yet adversary relationship. This relationship must change if we're to compete in our own markets, let alone international markets, in the coming years.

We must start to change that relationship by diverting time, work and money from the nonproductive government sector and start to channel it back to our productive private enterprise system.

60,221 PAGES OF RULES

Just the opposite has been happening. When the Federal Register was first published in 1936, the listing of government regulations issued that year required 2,411 pages. By 1970, the Federal Register had grown to 20,036 pages. And by 1975, it had tripled to 60,221 pages.

The American people and the American government must be made aware of the fact that the cost of a product is determined by the cost of materials, facilities, and work hours needed to make that product.

If government regulation means different equipment or more work hours filling out forms for regulatory agencies, the cost of the product goes up. The end result is that American business becomes less productive, less competitive, less profitable and less able to make capital investments in productive areas.

So with increasing government regulations, increasing government spending, and increasing government taxes, it's no wonder why we have less and less of the capital needed for investment to improve America's business competitive posture.

But, it's still the simple answer that may prove to be the best solution.

PATCHWORK BASIS FORCED

If the actions of government limit the capital available for investment and divert capital spending into programs such as legislated pollution control or safety and environmental considerations, the net result is that American business has to use what little leftover capital there is in a patchwork, tack-on basis in an attempt to bring older plants up to newer legislated standards.

In many cases, this is not economically feasible and older plants are shut down; the net result being, instead of our country becoming more economically, financially and industrially sound, we've become less so.

SENATE—*Thursday, December 1, 1977*

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by Hon. QUENTIN N. BURDICK, a Senator from the State of North Dakota.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray.

Eternal God, before whom the generations rise and pass away, we thank Thee for all who have fought a good fight, finished their course, and have kept the faith. We thank Thee for Thy servant, our comrade JOHN MCCLELLAN, for the life he lived, the work he accomplished, the law he served, the principles he upheld, the ideals by which he lived, the friendships he made, and the inspiration which he gave to others.

Bind us together, heart to heart, mind to mind, soul to soul, to that unseen company who have completed their pilgrimage, that what they have begun in advancing Thy kingdom, we may complete. And finally may we so live as to be joined with them in hearing Thee say, "Well done, good and faithful servant . . . enter thou into the joy of thy Lord."

Through Him who loved and gave Himself for all mankind. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., December 1, 1977.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable QUENTIN N. BURDICK, a Senator from the State of North Dakota, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. BURDICK thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Tuesday, November 29, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TRIBUTE TO ERIC SEVAREID

Mr. ROBERT C. BYRD. Mr. President, last night Eric Sevareid delivered his final commentary for the "CBS Evening News," thus ending another segment in his remarkable career.

Long before he began his commentaries, Mr. Sevareid had established himself as a giant in American journalism. Many of us can recall vividly his radio broadcasts of the fall of Paris. Through his words, he painted pictures that won him a reputation as a "journalist poet," and brought home to our Nation the harsh realities of the war.

Still, it seems safe to say that, years from now, Eric Sevareid will be remembered best for his evening news commentaries. Instead of reporting events, he interpreted them. And in the electronic age—when we sometimes feel overtaken by the sheer numbers and rapidity of events—that was a valuable service, indeed.

His audience paused with him in the midst of the evening news, turning with him to concentrate on a single issue, and listening as he explained how it fit—or did not fit—into the overall course of events. His perception, and logic, and precise use of the English language earned him the respect of millions of Americans.

In a medium which relies on visuals, he continued to use words to paint his pictures. In a medium criticized for its surface treatment of events, he dared to delve, explaining the "why" and not just the "what" of news. And in a medium often accused of sensationalism, Eric Sevareid's was a voice of reason that somehow made the entire world seem a little bit more rational.

I join the many people throughout the United States commending Mr. Sevareid for the services he has rendered American journalism and the American Nation throughout his extraordinary career.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

PROPOSED TAX CUT

Mr. BAKER. Mr. President, on yesterday, the President of the United States conducted a press conference in which he suggested the necessity for a tax cut.

I applaud the President for that statement. I agree with the point of view and I pledge to him and to his administration the efforts of, I believe, all Senators on this side of the aisle to bring about that happy state of affairs.

I think the very prospect of tax relief for all Americans is likely to have a salutary effect on the community. I think the reality of a tax cut is almost certain to produce economic and social gains in this country which are so badly needed.

I hope the President will continue in this commitment, that he will further elaborate and express the details of his plan in that regard, and in the very best spirit of bipartisan cooperation and responsible political "adversaryism" I suggest that it is the responsibility of the minority party to suggest its points of view and alternatives in that respect.

In this happy instance I believe our points of view will coincide and it may be that the only thing remaining then is to decide how best to bring about an equitable, adequate, and early tax cut for the people of the United States.

I commend the President once again for his initiative in that respect and I am happy to say that we are of one mind on that point.

ORDER FOR EULOGIES TO SENATOR MCCLELLAN

Mr. ROBERT C. BYRD. Mr. President, today will be a day that will be set aside in the main for eulogies to our late departed colleague, Senator MCCLELLAN.

Mr. President, I ask unanimous consent that the RECORD remain open for 10 days for such eulogies; that at the close of that time the eulogies be gathered together and bound in a permanent volume; and that it be a Senate document.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, will the majority leader yield to me?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, on yesterday, I believe the distinguished majority leader made certain remarks in the nature of a eulogy for the late Senator MCCLELLAN, as did I, and I wonder if they might be included with those in the volume.

Mr. ROBERT C. BYRD. The day before yesterday?

Mr. BAKER. Yes. The day before yesterday.

Mr. ROBERT C. BYRD. Yes, they would be.

Mr. BAKER. I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, there were other eulogies, I believe, delivered on that same day and they will be all compiled together.

ORDER FOR RECEIPT OF STATEMENTS TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senators may have until 5 o'clock p.m. today to provide their statements for the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECESS UNTIL 11:30 A.M.

Mr. ROBERT C. BYRD. Mr. President, while we are awaiting possible further developments, I ask unanimous consent that the Senate stand in recess until 11:30 a.m. today.

There being no objection, the Senate, at 11:09 a.m., recessed until 11:30 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HATHAWAY).

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is the Senator from Massachusetts seeking recognition?

HEALTH PROFESSIONS EDUCATION AMENDMENTS OF 1977—CONFERENCE REPORT

Mr. KENNEDY. Mr. President, I submit a report of the committee of conference on H.R. 9418, a bill to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition for medical schools' receiving capitation grants, and for other purposes, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

> The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9418) to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition to medical schools' receiving capitation grants under such Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the proceedings of the House of Representatives.)

Mr. KENNEDY. Mr. President, I am pleased to recommend that the Senate adopt the conference report on H.R. 9418, legislation designed to restore to the Nation's medical schools the freedom to apply their own admission criteria in the selection of American students transferring back to this country from foreign medical schools.

Current law requires American medical schools to accept these students if they have passed part I of the national boards, without regard to any other academic qualification. This represented an unwarranted Federal intrusion into academic medicine.

Current law also made a commitment to thousands of Americans studying medicine overseas. It promised them a chance to return to medical school in the United States. Eight hundred students took their examinations and have qualified under the provisions of current law. Other students are expected to take the exam and qualify this June.

Mr. President, this conference report strikes a balance between the need to restore the principle of academic freedom in the admissions process, and the need to meet, to the extent possible, the commitment to those young Americans studying abroad.

This conference report represents a fair compromise between the House and Senate bills. The House called for a 2-year, 6-percent enrollment increase from a wide selection pool. The Senate repealed existing law. The compromise calls for a 1-year, 5-percent enrollment increase with a wide pool to assure maximum selectivity for the medical schools. In addition, the student loan provisions are decoupled from the capitation provisions, as originally passed by the Senate.

Mr. President, the relevant Senate and House committees have agreed to reopen the entire manpower legislation early next year. We will examine the utility of capitation support as a vehicle to accomplish public policy objectives. We will reexamine and strengthen the primary care provisions. Our objective then, as now, will be to respect the independence and integrity of the medical centers, while at the same time influencing them to be responsive to the social priorities of the society that pays their bills.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MORGAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORGAN. Mr. President, to maintain the continuity, I yield to the Senator from Pennsylvania.

Mr. KENNEDY. I thank the Senator from North Carolina very much, and I yield to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SCHWEIKER. I thank the Chair. I commend the chairman of our Health and Scientific Research Subcommittee for his leadership in resolving this rather difficult problem.

Mr. President, as the ranking Republican member of the Health and Scientific Research Subcommittee, I am pleased that we were able to reach an agreement with the House on this very controversial matter. Personally, I do not favor a policy of telling medical schools that they must accept particular students. I think that is bad educational policy and bad national policy. I therefore supported repeal of the Manpower Act's capitation condition requiring enrollment of certain transfer students from foreign medical schools. The conference agreement is a compromise with the House position in this regard, requiring an enrollment increase of 5 percent in school year 1978–79.

Of particular concern to me is section 7 of the bill. During consideration of this bill by the full Senate, I offered an amendment to prohibit the discrimination by medical or nursing schools against any individual because of that individual's refusal to, or willingness to participate in the performance of abortions. This amendment was accepted by the Senate on a voice vote, but it had not appeared in the House bill.

During debate on my amendment, I introduced evidence of the widespread nature of this discrimination; further evidence was contained in statements I made in support of S. 784 on February 24 and September 21 of this year. However, I recognize that no formal hearings have been held on this problem, either by the Congress or the executive branch. I further recognize that the prohibition of my amendment, although following the conscience clause already part of the Public Health Service Act, is a new approach to the question of admission to the health professions.

Therefore, I agreed in conference to support a study by the Secretary of Health, Education, and Welfare into this problem. The report must be returned to Congress no later than March 1, 1978, and I would emphasize the importance of meeting that deadline to allow us to consider the report within the timetables imposed on the Congress by the Budget Control Act.

In doing research on this report, I would hope that the Secretary will contact the people I have identified in my earlier remarks on this problem for their views of the situation. It would be unsatisfactory for the study merely to consist of direct inquiries to the schools affected without dealing with those who feel they have been discriminated against because of their views on abortion. I would further urge anyone who is concerned about this problem to contact the Secretary directly, preferably before mid-January.

Mr. President, no one needs to remind this body how divided the country is over the question of abortion. Few people can be absolutely sure that they have all the right answers to this issue. Therefore, I hope that we can prevent those with one view from closing off access to the medical profession to those who disagree. This is what my amendment was designed to do, and it was offered because I am convinced there is a need for it. If the Secretary confirms the need, I hope Congress will take prompt remedial action next year.

Mr. President, I feel the conference report is a reasonable compromise and urge my colleagues to approve it.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum, just briefly.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HAYAKAWA. Mr. President, I would like to say a few words in support of the distinguished Senator from Massachusetts concerning the conference report to amend the Public Health Services Act.

I believe the amendment proposed, and Senator KENNEDY's support of it, corrects a very important weakness in the original legislation.

As a former college president, I would like to say that the way in which institutions of higher learning maintain their uniqueness and individuality is not only by the distinction of their faculty, not only by their many departments and schools, but also by providing careful monitoring of their criteria for admission.

When the Government proposes to dictate the criteria of admission to a university or a college, it interferes very seriously with that institution.

Therefore, it seems to me, Mr. President, that the changes proposed in the conference report on H.R. 9418 are very acceptable to preserve the whole principle I have just discussed, and at the same time not interfering with the freedom of universities to operate in their own way, especially medical schools.

I know these matters are of great importance to the staffs of the universities of my State, and to the University of California and its branch medical schools.

I would like to say that I fully support the conference report, Mr. President.

Mr. SCHWEIKER. Mr. President, will the Senator yield?

Mr. HAYAKAWA. I yield.

Mr. SCHWEIKER. Mr. President, I commend the Senator from California. I offered the Senator's amendment when he was unavoidably detained. Of course, it was agreed to on the Senate floor and accepted in conference. It specifically decoupled the concept, an erroneous and false concept, which penalized a student by denying him a student loan because of an action the medical school did not take.

I congratulate the distinguished Senator from California for his amendment. I am glad it is still in the bill. I believe it is a wise amendment. I thank the Senator.

Mr. HAYAKAWA. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

SOCIAL SECURITY COVERAGE FOR MEMBERS OF CONGRESS AND EMPLOYEES OF THE LEGISLATIVE BRANCH

Mr. MORGAN. Mr. President, I send to the desk a bill, the purpose of which is to bring the legislative branch into the social security system. It requires that there be mandatory coverage under social security of all Members of Congress and their employees.

As we know, Mr. President, the social security tax matter is now before the conference committee. We all realize that neither the House action nor the Senate action is all we desired and not the permanent answer to the problem of social security reform.

Mr. President, my mail has been running very heavy on this matter. I believe the bill I have offered today, along with Senator NUNN, should be a first step toward a general social security reform.

It will show the people that we value social security, that we feel social security to be important enough that we ourselves are prepared to take part. And it will remove a glaring blot from our record. The social security program, while important, is costly. Taxes are rising almost continuously, and will jump dramatically following enactment of the bill we recently passed, and the people do not understand why we have chosen to exempt ourselves. And for that matter, neither do I.

Many might ask why this is necessary—after all, we have an excellent pension plan. But the possession of other sources of retirement income has never been a criteria for determining coverage under social security. Many people in the private sector have excellent retirement programs, and yet they must participate in social security.

If we do not have the necessary appreciation of the social security system to take part ourselves, how can we expect others to? In any case, it is not right for the Government to require the private sector to do things it is not prepared to do itself. How do we tell the people that they must take part in a program while those who set its policies and those who administer it do not?

But there is more to it than this. The social security tax is a payroll tax which the Government has decided it and its employees will not pay. We are, in effect, giving the public sector a 12 percent tax credit, soon to be more, not available to the private sector, and so encouraging the expansion of the public sector at the expense of the private sector. I do not believe any of us want to do that.

If social security were a straight supplementary retirement program, with benefits based solely on one's contribution, then there would be some justification for us not to participate. But it is not.

Millions of people have paid more into the social security system than they can ever hope to recover. This is because the Congress has wisely decided that the purpose of social security is not only to provide a supplementary pension, but also to provide some basic security to the elderly and disabled. As a result, many of the benefits available bear little or no relation to contributions. Medicare is equally available to all the elderly and some of the disabled covered by social security, regardless of contributions. The extra benefits for dependent spouses are not based on contributions. Lower wage earners, when retired, receive a higher percentage of their income than their wealthier brothers. And I could go on. In fact, social security bears a closer resemblance to an insurance program than to a retirement plan.

An insurance program cannot survive if it arbitrarily excludes large groups of people who will recover less than they pay in. I do not believe that social security will survive unless all wage earners take part, but it is especially important that those of us who have created the program join it.

I also believe that if we were a part of the social security system we would take better care of it. I will not now take the time to go into the mistakes of the past or my objections to specific provisions of the bill we recently passed. But I am seriously concerned with the lack of effort put into controlling costs and the use of overly optimistic assumptions in determining the necessary financial remedies.

According to the actuaries, social security costs will be increasing over the next several years by more than 10 percent each year, while assuming that inflation will decline to 4 percent annually. This trend must be controlled. And if the assumptions behind the bill are too optimistic, then we have understated the problem we are dealing with. That means further tax increases will be necessary, quite possibly within the next several years. And this worries me greatly, for social security taxes are already becoming oppressive.

I have received letter after letter decrying the social security tax increases that were recently approved. What do the Senators think the reaction will be when the people find out that what was passed is not sufficient? I suggest that social security reforms are necessary, and no step is more urgently needed than to bring ourselves into the system.

Next year, when we begin hearings on this matter, I hope that the consideration will be given to bringing in not only Members of Congress and their employees, but also other employees not now under the system.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2335

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) (1) section 210(a)(6)(C) of the Social Security Act is amended—

(A) by amending clause (i) to read as follows:

"(i) as the President of the United States; "; and

(B) by repealing clause (ii) thereof.

(2) Section 210(a)(6) of such Act is amended by adding at the end thereof the following new subparagraph:

"(D) Except that the preceding provisions of this paragraph shall not apply with respect to service performed as a Member of Congress (as defined in section 2106 of title 5, United States Code) or in the legislative branch;".

(b)(1) Section 3121(b)(6)(C) of the Internal Revenue Code of 1954 (relating to definition of employment) is amended—

(A) by amending clause (i) to read as follows:

"(i) as the President of the United States;"; and

(B) by repealing clause (ii) thereof.

(2) Section 3121(b)(6) of such Code is amended by adding at the end thereof the following new subparagraph:

"(D) Except that the preceding provisions of this paragraph shall not apply with respect to service performed as a Member of Congress (as defined in section 2106 of title 5, United States Code) or in the legislative branch;".

(c) The amendments made by this Act shall be effective with respect to taxable years beginning after December 31, 1977.

UNIVERSAL SCHOOL LUNCH PROGRAM

Mr. MORGAN. Mr. President, I should like to state briefly my support of a bill that was introduced by the distinguished Senator from Minnesota (Mr. HUMPHREY) with regard to the universal school lunch program. In 1975, I sponsored such a bill and I am pleased that Senator HUMPHREY has seen fit to introduce it in this session, and to join with him as a cosponsor.

The government requires children to attend school. It pays for their transportation and instruction, buys their books, buys their bats and balls. The least we can do is make sure they get a decent lunch.

The importance of proper nutrition in the development of our children is clearly established. If they do not get enough decent food, they simply cannot learn as well.

The present system for providing lunches is not adequate.

School officials are forced to determine which children, based on their parents' income, are eligible for the lunch program, and whether they should get a free lunch or a reduced-price lunch. The administrative problem of sending out, processing, and evaluating applications is both time-consuming and expensive and frequently arbitrary and even discriminatory. I rather suspect that if all of the cost of administering the present free lunch program were taken into consideration, it would almost be equal to the additional cost that would result from making the free lunch program universal.

Being singled out for a free or reduced-price lunch is degrading to a child. We were all children once, and most of us have children, and we know what it is like for a child to be singled out for special treatment. It is usually unpleasant. And here we are doing it, even though the circumstances are totally beyond the child's control.

This bill will help provide proper food and insure good health for our children, it will help provide improved and equal educational opportunities, and it will simplify administration. This is an important bill, and I hope to see it passed.

Mr. President, there is no program in all of the Federal Government, in my opinion, that is more greatly abused—certainly not in my State—than the free lunch program. It is generally known in almost every school that there are children from well-to-do families who are receiving free or reduced price lunches where they are not entitled. In some schools, as high as 90 percent of the children are receiving free lunches. It is so bad that, in one of the counties in my State, Edgecombe County in the eastern part of the State, the county has undertaken on its own to make the free lunch program universal within the county, even if this bill should not pass.

So I wanted to take this opportunity to add for the record my endorsement of Senator HUMPHREY's bill and to urge that, during the next session of Congress, we give careful consideration to making it universal and to eliminating the terrific administrative cost, as well as the consumption of time that it causes for the teachers, the principals, and the superintendents to administer the program, time that should be spent in providing better educational opportunity.

I thank the Chair.

Mr. THURMOND. Will the Senator yield?

Mr. MORGAN. I am delighted to yield.

Mr. THURMOND. I wish to associate myself with the remarks made by the able Senator from North Carolina. Many teachers from my State tell me that the time they consume in administration and determining who is able to pay and who is not is much more costly than if they just gave the free lunches to all the children. I believe the Senator has in mind legislation that will do that.

Is that correct?

Mr. MORGAN. That is correct, Mr. President.

Mr. THURMOND. I should like to endorse highly that legislation to just provide free lunches to all children.

Mr. MORGAN. I thank the distinguished Senator and I hope he will speak to the Agriculture Committee and other committees next year and lend his aid to the passage of such legislation.

Mr. THURMOND. I thank the Senator.

(Mr. HOLLINGS assumed the chair.)

THE LIFE AND DEATH OF SENATOR JOHN L. McCLELLAN

Mr. THURMOND. Mr. President, when JOHN L. MCCLELLAN died early Monday, the U.S. Senate lost one of its giants and the Nation lost a man of immeasurable worth to the common good of its people. He was truly a great man and his accomplishments in this body are legion. I knew him as a trusted friend, a wise colleague, a dedicated patriot, and a fearless defender of our representative system.

Twenty-three years ago, when I came to the Senate, JOHN MCCLELLAN was already a highly respected and acknowledged leader in this Chamber. It was a reputation which he had clearly earned through his 12 previous years of dynamic service in the Senate. Furthermore, it was a standing which grew for the rest of his life among all of us who had the privilege of serving with him.

There is no doubt that JOHN MCCLELLAN left a deep and beneficial imprint on the welfare of our Nation. As chairman of the Senate Committee on Appropriations, a post he held with distinction for the last 5 years, there was little in the Federal Government that did not come under his purview. Prior to assuming that high position, he served for 22 years as chairman of the Committee on Government Operations. Those who served in Government and who were under the scrutiny of that committee had ample confidence in his fairness, but also knew fully of his firmness.

Perhaps one of his most courageous tasks—and there were many—came as chairman of the Senate Permanent Subcommittee on Investigations. For 18 years, from 1955 until 1973, he led this investigative arm of the Senate and used its powers to ferret out the activities of organized crime and labor racketeering. Landmark legislation which he authored was designed to curb crime and enhance law enforcement throughout this land. In this way, all Americans have reaped the rewards of his vision and his understanding of our country's legal principles.

Mr. President, we in the Senate have lost one of our finest, and the people of Arkansas have lost one of their favorite sons. It is easy to see how JOHN MCCLELLAN was chosen, time and again, by the citizens of his State to represent them in public life. He was a genuine man of the people and his constituents knew they could count on him. As a boy, JOHN MCCLELLAN rode the circuit with his lawyer father and acquired a reverence for the law. He studied under his father's tutelage and became the youngest lawyer in the United States when he was admitted to the Arkansas bar at the age of 17.

After service as a first lieutenant in the Army Air Service of World War I, he established his law practice in Malvern, Ark. Shortly afterward, he served as city attorney for that community for 6 years, launching the brilliant political career which lasted until this very week. On his way to the Senate, he also served as a hard-hitting prosecuting attorney and a two-term Member of the U.S. House of Representatives. The people of Arkansas then elected him to this body six times, expressing by their votes the confidence and trust which he earned by his faithful and distinguished service.

My deepest sympathy is extended to Senator MCCLELLAN's wife, Mrs. Norma McClellan; to his two daughters, Miss Doris McClellan and Mrs. Mary Alice McDermott; and to his grandchildren and other relatives, at this time of sad-

ness. They can take genuine solace, however, from the lifelong benefits gained by sharing this close family association. Mrs. McClellan was a true inspiration to her husband and stood staunchly by him through the rigors and demanding schedules of public service. I know that she was a great help to him throughout his career.

Mr. President, JOHN MCCLELLAN was a leader among us and he exemplified the finest attributes of leadership. He was a man who based his judgments on the purity of facts, tempered by a deep understanding of people. He was firm, but compassionate. He was effective, but not flamboyant. He was willing to go the extra mile in order to achieve a necessary goal.

The legislative goals he achieved will continue to serve as reminders of his foresight: Such things as creation of the General Services Administration, revision of our copyright laws, crime control legislation, creation of many flood control projects, including the important McClellan-Kerr Arkansas River navigation system, and many more. Even now, the Senate has under consideration a far-reaching piece of legislation which was the brainchild of Senator MCCLELLAN: A complete revision of the U.S. Criminal Code. I have been pleased to join with many in this Chamber in cosponsoring this needed revision which JOHN MCCLELLAN has provided for a congressional decision.

Mr. President, Senator JOHN MCCLELLAN was a statesman who graced these halls for 35 years before his death Monday at the age of 81. We, as friends and colleagues, shall miss him. Yet we celebrate his life's accomplishments, which will long endure.

TRIBUTES TO SENATOR JOHN L. MCCLELLAN

Mr. JOHNSTON. Mr. President, it was my privilege to serve on the Committee on Appropriations over the last 3 years while JOHN MCCLELLAN chaired that committee. Certainly he provided far-sighted and able leadership in those years, and throughout the time that he spent in the Senate.

For example, Senator MCCLELLAN has been a firm advocate of a strong national defense. He has insisted that we maintain Armed Forces at a level that will insure the preeminence of American military capability. At the same time, he has had vision in areas of new public policy concern, such as energy technology. Finally, the former chairman always monitored the expenditure of Federal funds to delete national activities of marginal value and to invest citizens' tax dollars in the most beneficial and constructive programs.

It is with a deep sense of personal loss that I join my colleagues in mourning the death of Senator MCCLELLAN. He accomplished much for the people of our Nation, and his devotion to public service has set an example for all of us who continue to serve in the deliberative body to which he dedicated much of his life.

Mr. LEAHY. Mr. President, it is with a feeling of great sadness that I returned with the delegation of my Senate colleagues and others from the funeral of Senator JOHN L. MCCLELLAN in Little Rock, Ark. Traveling to Arkansas and the many miles in return for this great man's funeral was a small expression of my esteem for the long and effective leadership that Senator MCCLELLAN provided for Arkansas, the Senate and indeed for the Nation.

Senator MCCLELLAN served as chairman of the Senate Appropriations Committee from August of 1972 until his death last Monday. While I have served on the Senate Appropriations Committee for only a short time, it was my honor to know personally a man who was a giant of the U.S. Senate for three decades. As a new Senator, I had the good fortune to observe firsthand a man who set high standards of dedication, excellence and fair mindedness that few will ever equal. Senator MCCLELLAN was always ready to provide advice and counsel, especially to the newer members of the committee, and to provide what support he could.

So it was with sadness that I marked the passing of a great American and a great leader of the Senate. Before coming to the U.S. Senate in 1974, I served for 8 years as a State's attorney in Vermont. And I know from my firsthand experience in the law enforcement field of the preeminent role played by Senator MCCLELLAN in winning congressional approval for many significant laws and programs. These include the landmark Omnibus Crime Control and Safe Streets Act of 1968 and 1970; the Organized Crime Control Act of 1970; and a series of other laws relating to drug abuse and the rehabilitation of drug addicts. These legislative achievements helped to make America a safer place and serve as a memorial to the life and work of Senator JOHN L. MCCLELLAN.

Mr. YOUNG. Mr. President, this is a day when every Member of the Senate is heavy hearted and deeply saddened by the passing of our beloved colleague, the distinguished senior Senator from Arkansas Mr. MCCLELLAN.

JOHN MCCLELLAN was truly one of the great men of the Senate. He was a very intelligent man with a great mind and a vast knowledge and understanding of Government and how it could best serve the people. He spent more than 50 years or most of his adult life, as a public servant.

He was involved in some of the most difficult tasks that any chairman of a committee could be. I have special reference to his chairmanship of the Government Operations Committee when he investigated some of the toughest underworld characters in the United States. He fearlessly exposed corruption in Government or wherever it existed.

Although our friend JOHN did not have the benefit of a formal education, as many Members of the Senate do, he acquired a great education the hard way, on his own. He was not only a brilliant investigator, but he had a beautiful talent for the use of the English language. Some of the most beautiful phrases I have heard during my years in the Senate came from the pen of JOHN MCCLELLAN.

I was privileged to have served with JOHN MCCLELLAN on the Appropriations Committee for approximately 30 years and during the last 5 years, he was chairman and I was the ranking minority member. Working closely together, we developed a close friendship and trust in one another. I could always learn from him. Along with having a great mind, he was a tough relentless fighter for the things he believed in.

While he was a great prosecutor and at one time the top investigator in the Senate dealing with some of the hardest characters, he always maintained his composure and sense of justice and fair play. I believe if one were to select the mission in life that JOHN MCCLELLAN had, it would be that of devoting all his time and energy towards making ours a better and stronger Government and assuring that we would never become a second-rate power to anyone.

Congress has been condemned so much in recent years by the press and ambitious politicians who sought election to the highest office in the land mostly on platforms of making people believe that Congress was composed mostly of scoundrels and charlatans. Unfortunately, many people have come to believe there are not any honest and decent people in Congress. Unfortunately, there are some undesirable Members of Congress, as there are in every community and every State, but the vast majority of the Members are very decent people. JOHN MCCLELLAN is a perfect example of what any good, God-fearing person would expect of a U.S. Senator.

Few people knew of the misfortune and tragedy that befell JOHN MCCLELLAN and his family. One of the most heartbreaking of all was to lose all three of his sons when they were young men. Somehow he bore this heavy cross with acceptance and serenity.

The Senate and this Nation have lost a great man and a truly great Senator. Having served so long with him and having been so closely associated with this great man that I had come to love, admire, and respect, his passing is a great personal loss.

Pat and I extend our heartfelt sympathy to a wonderful lady, of whom Pat is especially fond, his wife Norma.

Our sympathy also goes to all members of his family.

Mr. HOLLINGS. Mr. President, I am reminded today in mourning the loss of my friend and colleague, JOHN MCCLELLAN, of something that Ralph Waldo Emerson, the great poet and essayist, wrote many years ago.

"An institution," Emerson said, "is the lengthened shadow of one man."

The U.S. Senate has derived its character, its strength, and its distinction as

an institution from the contributions of many, but we reserve a special place for the very few who make an indelible mark upon this body and upon representative government. Such was the contribution of JOHN MCCLELLAN of Arkansas, and thus shall he be honored by history.

I leave to others a recitation of JOHN MCCLELLAN'S long and distinguished career of public service to Arkansas and to his country. It was a career remarkable for personal accomplishment, for triumph over personal tragedy, for influence at the highest levels. But its most impressive aspects, I think, are the great lessons of personal integrity, courage, and dedication to the principles of fairness and the common good that JOHN MCCLELLAN taught us all.

Our Nation, more than any other, has always rested on the belief that there are extraordinary possibilities in ordinary people. JOHN MCCLELLAN never doubted that basic fact of his fellow man, and his extraordinary nature was due in large part to his ability to look beyond the great issues of the day to appreciate their impact on the average citizen. It was a basic trust in ordinary men and women and a strong feeling that public officials ought to do the best they can in their behalf that guided JOHN MCCLELLAN through more than 50 years of public service.

It was his concern for doing the right thing, the fair thing, that led him to renounce the demagoguery so prevalent in our land during the 1950's, even when that renunciation was less than popular in many quarters. It was this same dedication to fairness that brought him to work with such diligence on reforming the Federal Criminal Code. It was his vigilence in behalf of basic American values that led his sweeping investigations of organized crime and corruption.

Throughout several decades of aggressive and dedicated work in the Senate, JOHN MCCLELLAN never failed to appreciate the dignity and value of the individual. It was reflected in his efforts to reform the rules of congressional inquiries, his attention to individual rights and liberties in legislative initiatives against crime, and in his dealings with his colleagues. I can attest to the latter personally, because it was my good fortune to serve with the Senator from Arkansas as a member of the Committee on Appropriations, and I know he never failed to take into account the feelings of others.

JOHN MCCLELLAN has left this institution to which he brought so much, but it is a measure of the man that while we feel enormously diminished by his loss we continue to feel uplifted by his example. He has cast a long shadow in which each of us can be proud to stand.

Mr. SCHWEIKER. Mr. President, the Nation has lost one of its great elder statesmen with the passing of the senior Senator from Arkansas, Senator JOHN L. MCCLELLAN.

Senator MCCLELLAN served Arkansas and the Nation with dedication and distinction. And his longevity of service—two terms in the House of Representatives, first elected to the Senate in 1942—was a remarkable accomplishment in and of itself.

During his years here, he served as chairman of the Senate Government Operations Committee and its Permanent Subcommittee on Investigations. The committee, which came to be known as the McClellan committee, was vigorous and unrelenting in its efforts to root out corruption in the fields of labor and management.

More recently, Senator MCCLELLAN became chairman of the Senate Appropriations Committee. I had the privilege to work with him on the committee. His leadership was characterized by openmindedness, fairness, and nonpartisanship.

And of course JOHN MCCLELLAN also had a major influence on judicial, legal, and criminal reform as a member of the Senate Judiciary Committee and chairman of its Criminal Laws and Procedures and Patents, Trademarks and Copyrights Subcommittees.

Mr. President, JOHN MCCLELLAN was a great American and a true southern gentleman. He will be sorely missed.

Mr. CHILES. Mr. President, I want to add my voice to those of my colleagues in tribute to the late Senator JOHN MCCLELLAN of Arkansas.

JOHN MCCLELLAN was my chairman since I came to the Senate in 1971. My first committee assignment was to the then Senate Government Operations Committee, chaired by Senator MCCLELLAN. During his chairmanship of that committee, he was a great source of counsel and assistance to me.

In 1973 Senator MCCLELLAN became chairman of the Senate Appropriations Committee and I was fortunate enough to begin service on that committee at the same time.

Every member of either committee that he chaired, regardless of length of service or seniority, was treated fairly and as an equal. Chairman MCCLELLAN bent over backwards during committee business and markup sessions to allow every voice and opinion to be heard fully on any matter before the committee. This sense of fairness to other members was present even when the chairman held opinions other than those expressed by the majority. This truly is a mark of an experienced leader.

During the last 7 years I have been able to see firsthand the qualifications of leadership and service Senator MCCLELLAN gave to his country. His tireless efforts to keep Federal spending under control, yet at the same time seeing that adequate resources were available to assure the military strength and security of this Nation were never in doubt.

Mr. President, the U.S. Senate, the Congress and the Nation have suffered a loss. JOHN MCCLELLAN served his country well with honor. The people of Arkansas can be proud of the lasting mark that JOHN MCCLELLAN has made for his State and Nation.

Senator MCCLELLAN, during the many years of his public service was blessed by the love, comfort, enthusiasm, inspiration, and approbation of his lovely wife, Norma McClellan who was a supportative companion and coworker of JOHN'S and a source of pride to him. Our sympathy and prayers go to her in this time of loss.

Mr. President, I had the opportunity to attend the funeral of JOHN MCCLELLAN. For me it was not a time of sadness—a good man had served his people, his country, and his God well and faithfully. Everyone at the services knew that. There was no sorrow or regrets for missed opportunities or unused talents. To him who is given much, much is expected. JOHN MCCLELLAN had produced as a good and faithful steward should. You could feel the pride of all the people assembled to celebrate JOHN'S passing, and it truly was a graduation exercise.

Mr. PELL. Mr. President, I join my colleagues in mourning the passing of Senator JOHN L. MCCLELLAN.

Through nearly 40 years of service in the Congress, Senator MCCLELLAN established an extraordinary record of service to our Nation.

Senator MCCLELLAN was a man of deeply held convictions and principles. His unquestioned integrity and his vigorous intellect were qualities that enabled him to pursue investigations of wrongdoing and corruption with unequaled effectiveness. His work in the Senate was distinguished by the diligence, the stamina and the determination with which he pursued the heavy responsibilities he bore as chairman of the Senate Appropriations Committee and in leadership roles in the Government Operations and Judiciary Committees.

His voice, and the wisdom of his experience will be sadly missed in the Senate. I extend my deepest sympathy to Mrs. McClellan and other members of his family.

TRIBUTE TO SENATOR JOHN L. M'CLELLAN

Mr. HUMPHREY. Mr. President, I am deeply saddened by the death of my close friend and colleague, JOHN MCCLELLAN. His death is a great loss to the Congress and the Nation. Not only have we lost a personal friend, but this body as a whole has lost a foremost exemplar of dedication, integrity, and courage.

Senator MCCLELLAN was here in the Senate when I arrived in 1949. And over these many years I have had great admiration and respect for him and for his achievements as a legislator and committee chairman.

I watched him when as chairman of the Permanent Investigations Subcommittee, he effectively shaped and used the congressional investigative process to weed out corruption and criminal activities. His outstanding service on the Senate Judiciary Committee was marked by his relentless pursuit of more coherent and comprehensive statutes, culminating in the rewriting of our Criminal Code. When this monumental reform of the Federal Criminal Code is completed, it will not only bear his imprint, but also comprise an important legacy to the American people. As chairman of the Senate Committee on Appropriations,

Senator McCLELLAN touched the lives and institutions of every individual in this Nation. He gave effective leadership for proper funding of important programs and fiscal responsibility in Government spending. It is in these vital areas that we shall particularly miss his competency and counsel.

Senator McCLELLAN was above all a hard working, dedicated public servant who did what he believed was right for our country. His half century of service to the people of his State and the Nation exemplified all that is best in the great American tradition of public service. He will be greatly missed.

My sympathy goes out to Mrs. McClellan and the other members of his family.

SENATOR M'CLELLAN'S FAIRNESS AND CIVILITY

Mr. McINTYRE. Mr. President, it would be an affront to the memory of our departed colleague if I pretended to speak as a close associate or close friend of Senator McCLELLAN. I was neither.

But I have been a Member of this body for 15 of the 35 years he served, and it was my privilege to know him and to appreciate him as a true gentleman, a colleague of unquestioned integrity, a man committed to what he perceived as the best interests of our country.

Others have spoken of his legislative achievements and of his personal tragedies. And still others of his lifelong commitment to law and order. So I would confine my brief remarks to but a single period in his long and distinguished career.

The obituary published in the November 29 issue of the Washington Post includes the following passage:

> His work came to national attention in 1954 during the televised Army-McCarthy hearings. These were conducted by the late Senator Joseph R. McCarthy (R-Wis.) as chairman of the Permanent Subcommittee on Investigations. In the end, McCarthy's vilification of witnesses accused of supporting communism led to his censure in the Senate and his political downfall.
>
> Senator McClellan was the ranking Democrate on the Committee. He was the first to walk out on McCarthy. When the Democrats gained control of Congress in 1955, he became the subcommittee chairman. One of his first acts was to devise a set of rules for the conduct of congressional inquiries that both served the purposes of the Congress and gave witnesses a measure of protection from harassment.

There were few other congressional heroes or heroines in those dark days, Mr. President. And one of them was our former colleague, the lady from Maine, for it was she who drafted the celebrated Declaration of Conscience against the inquisitorial excesses of that period.

And it was Margaret Chase Smith, some years after, who wisely observed that one of the greatest threats to our national unity and serenity was the diminishing level of civility in public life.

Stern as he was in his judgments, firm as he was in behalf of public order and security, JOHN McCLELLAN bespoke his commitment to civility when he led a Democratic boycott of the Subcommittee on Permanent Investigations, and when he immediately changed the subcommittee rules in order to curb harassment.

So as we take this time to salute his courage in the face of great personal adversity, his experience and his talent in steering landmark legislation to passage, his great contributions to his beloved State of Arkansas, let us pause, too, to pay tribute to a colleague whose fortitude, integrity and dedication were matched by his fairness and civility.

A TRIBUTE TO THE LATE JOHN L. M'CLELLAN

Mr. WILLIAMS. Mr. President, I was deeply saddened to learn of the sudden passing of our esteemed friend and colleague, JOHN McCLELLAN. Ironically, it was only a week ago that Senator McCLELLAN announced his intention to retire next year after 35 years of service in the U.S. Senate.

JOHN McCLELLAN will no doubt be remembered for his abiding faith in the laws of this country and for his famous hearings in the 1950's which exposed the operations of organized crime. As chairman of the Permanent Investigations Subcommittee and the Labor Rackets Committee, he sought to expose and combatted the forces of organized crime and individual lawlessness that had infected many areas of American life. Thanks to Senator McCLELLAN and his courageous leadership, Americans today are aware of need to protect their lives and their businesses from the influence of organized crime.

As a committee chairman myself, I can appreciate the task that faced Senator McCLELLAN in steering the Appropriations Committee. Although we often differed in our political positions, I must say that he always gave careful consideration to each of my requests. Senator McCLELLAN'S wisdom was only exceeded by his relentless devotion to his Senate duties. All of us here admired him for that, and we shall miss him greatly.

It is an altogether fitting tribute to this great statesman and patriot that the Senate Judiciary Committee, of which he was its ranking member, last month favorably reported Senator McCLELLAN'S 10-year effort to overhaul the Federal Criminal Code. JOHN McCLELLAN devoted many long and difficult hours to this task, and it is a fine capstone to an extremely distinguished career.

My wife, Jeanette, and I offer our heartfelt condolences to Senator McCLELLAN'S wife, Norma, and to the people of Arkansas. We have truly lost one of this country's notable and deeply respected public servants.

TRIBUTE TO SENATOR JOHN L. M'CLELLAN

Mr. SCOTT. Mr. President, I attended the funeral services for our former colleague from Arkansas along with many Members of both bodies of the Congress, and the crowd at the church and cemetery, the words of the pastor of his church and his friends from his home State clearly indicated the high regard in which he was held by those who knew him best.

While I did not know Senator McCLELLAN as long or as well as some, I found him to exemplify outstanding qualities of life—integrity, fairness, decency. His dedication to principle, his ability to compromise in the national interest, his patriotism and love of God are known well by all of us who had the privilege of knowing and serving with him.

In the past few years, I have been fortunate to join JOHN McCLELLAN on the Judiciary Committee where, over the years, he has provided significant leadership in shaping many of the Nation's laws. Much has been said of the Senator's diligent efforts to combat organized crime and abuses within the labor movement as chairman of the Senate Permanent Subcommittee on Investigations. Throughout his half century of public service, law and order was a major concern to him. It is my understanding that Senator McCLELLAN had a distinguished career in the law, being admitted to the Arkansas bar at the age of 17 and later serving his county as prosecuting attorney. He then went on to serve 4 years in the House of Representatives and to be elected to six consecutive terms in the Senate.

JOHN McCLELLAN gained national stature for his thorough and impartial investigations into racketeering and organized crime. He helped enact landmark anticrime legislation of the 1950's and 1960's, and many regard him as the guiding force behind our current effort to revise and codify the entire body of Federal criminal law. His legislative achievements are legion, having chaired for many years the Committee on Government Operations and in more recent years the Senate Appropriations Committee.

I believe it is important to note that Senator McCLELLAN believed in the American free enterprise system and in keeping Government interference in our lives to a minimum. Certainly as chairman of the Appropriations Committee, he had a difficult task in allocating billions of dollars in Federal funds while attempting to adhere to the principle of fiscal responsibility; but I believe his actions tended to strike a fair and reasonable balance. He sought over the years to improve Government efficiency and to eliminate wasteful spending. I believe that JOHN McCLELLAN felt strongly about preserving freedom of choice and individual initiative, and his voting record reflected this faith in the American people.

Mr. President, Senator McCLELLAN has left a rich legacy by which to be remembered. He was proud that he had served longer in the Congress of the United States than anyone else from Arkansas, and noted the fact in his retirement announcement just a week before his death. Yet, the sincerity and warmth of our departed colleague is most evident in the closing lines of that announcement—

> But notwithstanding the turbulence and sometimes harshness of political life, when I finally retire I expect to do so with malice in my heart towards no one; but with charity for all.

The Senate and the Nation have lost a distinguished statesman. I regarded him as a friend. My wife joins me in extending our deepest sympathy to Mrs. McClellan and his family in this time of sorrow.

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD statements by Senator DOMENICI and Senator BELLMON.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR DOMENICI

I will not attempt to add much to what those, who have served so much longer than I, have said about our late colleague, Sen. John McClellan.

When you are new to this body, frankly, you aren't quite sure what to expect. Men that you have seen on television, or read about in newspapers and magazines, are made real to you. Sometimes, a certain disillusionment sets in. After all, these men turn out to be a lot like you yourself. They have strengths and weaknesses, blind spots and great moments of intuition and brilliance.

You discover, too, when you are privileged to serve with men like John McClellan that this Senate embodies the highest ideals of unselfishness, ideals beyond the image that mass media might portray.

I knew Sen. McClellan long enough to say this without reservation—he was a man of the highest principle, both personal and political; he was a man of unquestionable and irreproachable honesty; he was a man who believed that selfless public service was the highest duty of a man in a democracy.

We all know the story of his efforts to rid this nation of organized crime, to reform and codify the thousands of statutes that clog the books today, to bring this nation's court system up to the greatest possible strength.

But, I know him best not by these heroic works, but by the fact that when he told me something, I could count on it; that when he discussed an issue, he did so with an extraordinary wisdom; that when he decided, he decided not on the basis of what would benefit any narrow interest most, but on the basis of what it meant for the nation and the people he served.

I would think that a line from the Book of Common Prayer might serve best as my recollection of how Sen. John McClellan saw his life: "To do my duty in that state of life unto which it shall please God to call me."

We will all miss Sen. McClellan's clear voice of reason and the honor he brought to the Senate by the personal example he set.

STATEMENT BY SENATOR BELLMON

Over the last several years the State of Oklahoma has regarded Senator John McClellan as our third member of the United States Senate. It was largely due to his leadership and assistance that flood control and navigation of the Arkansas River were authorized, funded and constructed. The favorable impact of Arkansas River development upon Arkansas, Oklahoma and surrounding states is only now being realized. Already, the brief experience with this project proves conclusively that Senator McClellan and others who supported the development of the Arkansas were wise and visionary builders.

Since coming to the Senate, I have had the honor to be associated with Chairman McClellan as a member of the Appropriations Committee. As Chairman of this committee, John McClellan met this important responsibility with fairness toward his colleagues, and with a careful view toward making certain that the monies which the taxpayers of this country entrusted into his care were wisely and carefully used.

John McClellan's long, illustrious service to the country has helped guide the United States through many difficulties. In addition, he participated in making many decisions which led to the remarkable growth and development which has occurred in our country during the last three decades. Always concerned that development of facilities and resources keep ahead of the needs of our growing population, John McClellan provided leadership that was essential to keep America strong and free from shortages of essential services.

John McClellan was a builder, a leader and a strong moral voice in the highest tribunals of this country. His record is one which other members of the Senate can look to for inspiration and guidance.

QUORUM CALL

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON THE OPERATION OF THE AUTOMOTIVE PRODUCTS TRADE ACT OF 1965—PM 131

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Finance:

To the Congress of the United States:

I hereby submit the Eleventh Annual Report on the Operation of the Automotive Products Trade Act of 1965. This Report covers a time period before the commencement of my term of office.

JIMMY CARTER.

THE WHITE HOUSE, *December 1, 1977.*

REPORT OF THE NATIONAL ADVISORY COUNCIL ON EXTENSION AND CONTINUING EDUCATION FOR FISCAL YEAR 1977—PM 132

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Human Resources:

To the Congress of the United States:

Enclosed is the "Annual Report of the National Advisory Council on Extension and Continuing Education for fiscal year 1977," prepared in accordance with the requirement of Section III(b) of Title III of the Higher Education Act of 1965, covering calendar year 1976, preceding my term of office.

This report addresses the need for continuing education programs and the Council's recommendations for policies, funding and administrative structures toward this end.

The Report of the Council is being carefully studied and evaluated. I am forwarding the Report so that it is available to the Congress for its deliberations.

JIMMY CARTER.

THE WHITE HOUSE, *December 1, 1977.*

PRESIDENTIAL APPROVALS

A message from the President of the United States that he had approved and signed the following acts and joint resolutions:

November 7, 1977

S. 455, An act for the relief of Ermelinda Rossi.

S. 556, An act for the relief of Lee Young Soo.

S. 948, An act for the relief of Chin Ah Park and Chin Suk Park.

S. 1003, An act for the relief of Me Young Lee.

November 8, 1977

S. 1005, An act for the relief of Young Shin Joo.

S. 1551, An act for the relief of In Hea Kim and Myung Sung Kwon.

S. 2149, An act to create the District Court for the Northern Mariana Islands, implementing article IV of the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America.

November 9, 1977

S. 717, An act to promote safety and health in the mining industry, to prevent recurring disasters in the mining industry, and for other purposes.

November 11, 1977

S. 810, An act granting an extension of patent to the United Daughters of the Confederacy.

S. 2208, An act to amend the Federal charter of the Big Brothers of America to include Big Sisters International, Incorporated, and for other purposes.

November 12, 1977

S. 1019, An act to authorize appropriations for fiscal year 1978 for certain maritime programs of the Department of Commerce, and for other purposes.

S. 2118, An act to authorize the Secretary of Agriculture to convey certain homesites within the Chugach and Tongass National Forests, Alaska.

November 14, 1977

S. 1142, An Act for the relief of Kam Lim Cheung.

S. 2052. An Act to extend the supervision of the United States Capitol Police to certain facilities leased by the Office of Technology Assessment.

November 15, 1977

S. 854, An Act to authorize the Secretary of Commerce to sell two obsolete vessels to Mid-Pacific Sea Harvesters, Incorporated, and for other purposes.

S. 1062, An Act to amend section 441 of the District of Columbia Self-Government and Governmental Reorganization Act.

S. 1339, An Act to authorize appropriations for the Energy Research and Development Administration for national security programs for fiscal years 1977 and 1978, and for other purposes.

S. 1863, An Act to authorize appropriations during fiscal year 1978, in addition to amounts previously authorized, for procurement of aircraft and missiles, for the Navy and the Air Force and for research, development, test, and evaluation for the Air Force and the Defense agencies, and for other purposes.

November 16, 1977

S. 1269, An Act for the relief of Camilla A. Hester.

S. 1528, An Act to amend section 2 of the Safe Drinking Water Act (Public Law 93–523) to extend and increase authorizations provided for public water systems.

S. 2281, An Act authorizing an increase in the monetary authorization for nine comprehensive river basin plans.

November 18, 1977

S. 106, An Act to provide for furthering the conservation, protection, and enhancement of the Nation's soil, water, and related resources and for sustained use, and for other purposes.

S. 1184, An Act to extend the provisions of the Fishermen's Protective Act of 1967, relating to the reimbursement of seized commercial fishermen, until October 1, 1978.

S. 1560, An Act to restore the Confederated Tribes of Siletz Indians of Oregon as a federally recognized sovereign Indian tribe, to restore to the Confederated Tribes of Siletz Indians of Oregon and its members those Federal services and benefits furnished to federally recognized American Indian tribes and their members, and for other purposes.

November 21, 1977

S.J. Res. 81, Joint Resolution to express the sense of the Congress that, in the light of history, the third Thursday in December 1977, would be a most appropriate day for designation as the "National Day of Prayer for the Year of 1977", and respectfully to request that the President, under the provisions of Public Law 82–324, issue a proclamation designating such date as a "National Day of Prayer for the Year 1977".

November 23, 1977

S. 1750, An Act to require studies concerning carcinogenic and other toxic substances in food, the regulation of such food, the impurities in and toxicity of saccharin, and the health benefits, if any, resulting from the use of nonnutritive sweeteners; to prohibit for 18 months the Secretary of Health, Education, and Welfare from taking certain action restricting the continued use of saccharin as a food, drug, and cosmetic; to require certain labels and notices for food containing saccharin; and for other purposes.

MESSAGES FROM THE HOUSE

At 11:07 a.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House recedes from its disagreement to the amendment of the Senate to the bill (H.R. 9794) to bring the governing international fishery agreement with Mexico within the purview of the Fishery Conservation Zone Transition Act, and concurs therein with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House has agreed to House Resolution 918, on the death of the Honorable JOHN L. MCCLELLAN, a Senator of the United States from the State of Arkansas.

The message further announced that the House agrees to the amendments of the Senate numbered 2, 4, 5, 6, and 7 to the bill (H.R. 7738) with respect to the powers of the President in time of war or national emergency; that the House agrees to the amendment of the Senate numbered 1, with an amendment; and that the House agrees to the amendment of the Senate numbered 3, with amendments, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973; and that the House recedes from its amendment to the title of the bill.

The message further announced that the House disagrees to the amendment of the Senate to the amendment of the House to the amendment of the Senate numbered 82 to the bill (H.R. 7555) making appropriations for the Departments of Labor, Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1978, and for other purposes.

The message also announced that the House disagrees to the amendment of the Senate to the bill (H.R. 9346) to amend the Social Security Act and the Internal Revenue Code of 1954 to strengthen the financing of the social security system, to reduce the effect of wage and price fluctuation on the system's benefit structure, to provide for the conduct of studies with respect to coverage under the system for Federal employees and for employees of State and local governments, to increase the earnings limitation, to eliminate certain gender-based distinctions and provide for a study of proposals to eliminate dependency and sex discrimination from the social security program, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. ULLMAN, Mr. BURKE of Massachusetts, Mr. ROSTENKOWSKI, Mr. WAGGONNER, Mr. COTTER, Mr. MIKVA, Mr. TUCKER, Mr. CONABLE, Mr. ARCHER, and Mr. KETCHUM were appointed managers of the conference on the part of the House.

ENROLLED BILLS SIGNED

The message further announced that the Speaker has signed the following enrolled bills:

S. 1131. An act to authorize appropriations for the Nuclear Regulatory Commission for the fiscal year 1978, and for other purposes;

H.R. 7. An act to authorize a career education program for elementary and secondary schools, and for other purposes;

H.R. 1904. An act to suspend until July 1, 1980, the duty on intravenous fat emulsion, and for other purposes;

H.R. 7345. An act to amend title 38 of the United States Code to increase the rates of disability and death pension and to increase the rates of dependency and indemnity compensation for parents, and for other purposes;

H.R. 8159. An act to establish uniform structural requirements for intermodal cargo containers, subject to the jurisdiction of the United States, designed to be transported interchangeably by sea and land carriers, and moving in, or designed to move in, international trade, and for other purposes; and

H.R. 8422. An act to amend title XVIII and XIX of the Social Security Act to provide payment for rural health clinic services, and for other purposes.

The enrolled bills were subsequently signed by the Acting President pro tempore (Mr. BURDICK).

At 12:55 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed, without amendment, the bill (S. 2328) to amend Private Law 95–21 to make a technical correction therein.

The message also announced that the House agrees to the amendments of the Senate to the bill (H.R. 5555) for the relief of Adelida Rea Berry.

TECHNICAL CORRECTIONS IN ENROLLMENT OF H.R. 7345

In the RECORD of November 29, 1977, at page 37927, under "Messages From the House," House Concurrent Resolution 419 was shown as having been agreed to by the House and concurrence of the Senate requested.

Pursuant to order of the Senate on November 4, 1977, House Concurrent Resolution 419, upon receipt from the House, was agreed to.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications, which were referred as indicated:

EC–2366. A communication from the Chairman, Senate Committee on Armed Services, reporting, pursuant to law, on the status of certain sections under its substantive jurisdiction that were exempted from the operation of the National Emergencies Act; laid on the table.

EC–2367. A communication from the Comptroller General of the United States, reporting, pursuant to law, on the President's third special message for fiscal year 1978 which was transmitted to the Congress pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations, the Committee on the Budget, the Committee on the Judiciary, the Committee on Energy and Natural Resources, the Committee on Finance, the Committee on Human Resources, and the Committee on Armed Services, jointly, pursuant to the order of January 30, 1975.

EC–2368. A communication from the Assistant Administrator for Planning and

Management, Environmental Protection Agency, reporting, pursuant to law, the number of employees in each General Schedule (GS) grade employed by the Environmental Protection Agency on September 30, 1976 and September 30, 1977; to the Committee on Appropriations and the Committee on Governmental Affairs, jointly, pursuant to P.L. 82–253.

EC–2369. A communication from the Acting Director, Office of Management and Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation for the Federal Grain Inspection Service has been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriation; to the Committee on Appropriations.

EC–2370. A communication from the Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, approval of an REA insured loan in the amount of $4,980,000 to Guadalupe Valley Electric Cooperative, Inc., of Gonzales, Texas (with accompanying papers); to the Committee on Appropriations.

EC–2371. A communication from the Architect of the Capitol, transmitting, pursuant to law, a report of all expenditures during the period April 1, 1977 through September 30, 1977, from moneys appropriated to the Architect of the Capitol (with an accompanying report); to the Committee on Appropriations.

EC–2372. A communication from the Deputy Assistant Secretary of Defense, reporting, pursuant to law, on the B-1 cost variance analysis for the quarter ending September 30, 1977 (with accompanying papers); to the Committee on Armed Services.

EC–2373. A communication from the Assistant Secretary of Defense, reporting, pursuant to law, on contract award for the C-12 aircraft for the period November 15, 1977 to February 5, 1978 (with accompanying papers); to the Committee on Armed Services.

EC–2374. A communication from the Comptroller of the Currency, transmitting, pursuant to law, the 1976 Annual Report of the Comptroller of the Currency (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC–2375. A communication from the Assistant Secretary for Congressional Relations, Department of State, transmitting a draft of proposed legislation to amend the Communications Act of 1934, as amended (with accompanying papers); to the Committee on Commerce, Science, and Transportation.

EC–2376. A communication from the Acting General Counsel, Department of Energy, transmitting, pursuant to law, notices of meetings related to the International Energy Program (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–2377. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "Anti-recession Assistance—An Evaluation", November 29, 1977 (with an accompanying report); to the Committee on Environment and Public Works.

EC–2378. A communication from the Administrator, General Services Administration, transmitting, pursuant to law, a prospectus which proposes a succeeding lease for space presently occupied at the Ford Building, 555 West 57th Street, New York, New York (with accompanying papers); to the Committee on Environment and Public Works.

EC–2379. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, agreements entered into by the United States other than treaties, within sixty days after the execution thereof (with accompanying papers); to the Committee on Foreign Relations.

EC–2380. A communication from the Chairman, Civil Service Commission, transmitting a draft of proposed legislation to amend title 5, United States Code, to provide survivor benefits to certain dependent children (with accompanying papers); to the Committee on Governmental Affairs.

EC–2381. A communication from the Executive Director, National Capital Planning Commission, reporting, pursuant to law, on lands acquired by the Commission for the parkway, and playground system of the National Capital Area during fiscal year 1977; to the Committee on Governmental Affairs.

EC–2382. A communication from the Director, ACTION, transmitting, pursuant to law, the agency's proposed system of records report entitled "Former Volunteer/Staff Resource Record, ACTION/FVL–1," (with accompanying papers); to the Committee on Governmental Affairs.

EC–2383. A communication from the Attorney General of the United States, transmitting, pursuant to law, a report of new system under the Privacy Act of 1974 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2384. A communication from the Director, Federal Judiciary Center, transmitting, pursuant to law, the Center's Annual Report for Fiscal Year 1977 (with an accompanying report); to the Committee on the Judiciary.

EC–2385. A communication from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, reports covering the period November 1 through November 15, 1977, concerning visa petitions which have been approved according the beneficiaries of such petitions third- and sixth-preference classification (with accompanying documents); to the Committee on the Judiciary.

EC–2386. A communication from the Chairman, Civil Service Commission, transmitting a draft of proposed legislation to extend the period of eligibility for a Vietnam Era Veterans' Readjustment Appointment within the Federal Government (with accompanying papers); to the Committee on Veterans' Affairs.

EC–2387. A communication from the Administrator, Veterans' Administration, transmitting, pursuant to law, reports concerning Exchange of Medical Information and Sharing of Medical Resources programs of the Veterans' Administration for Fiscal Year 1977 (with accompanying reports); to the Committee on Veterans Affairs.

HEALTH PROFESSIONS EDUCATION AMENDMENTS OF 1977—CONFERENCE REPORT (REPT. NO. 95–608)

Mr. KENNEDY, from the committee of conference, submitted a report on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9418) to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition to medical schools' receiving capitation grants under such act, and for other purposes; which was ordered to be printed.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

B. Mahlon Brown, III, of Nevada, to be U.S. Attorney for the District of Nevada.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. WILLIAMS, from the Committee on Human Resources:

James Arthur Krumhansl, of New York, to be an Assistant Director of the National Science Foundation.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. WILLIAMS, from the Committee on Human Resources:

The following-named persons to be members of the National Museum Services Board for the terms indicated:

For a term of 1 year.
Douglas Dillion, of New York.
Neil Harris, of Illinois.
Joan Mondale, of Minnesota.
For a term of 2 years.
Mamie P. Clark, of New York.
Benjamin W. Hazard, of California.
Nancy Negley, of Texas.
For a term of 3 years.
Gary K. Clarke, of Kansas.
George Horse Capture, of Montana.
Charlotte Ferst, of Georgia.
For a term of 4 years.
Lewis Davis, of New York.
Raul A. Lopez, of California.
E. Leland Webber, of Illinois.
For a term of 5 years.
Lloyd Hezekiah, of New York.
Peter H. Raven, of Missouri.
George G. Seybolt, of Massachusetts.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. MORGAN (for himself and Mr. NUNN):

S. 2335. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide coverage under the social security system for Members of Congress and employees of the legislative branch; to the Committee on Finance.

By Mr. THURMOND:

S. 2336. A bill to repeal provisions of title 10, United States Code, which imposes certain restrictions on enlisted members of the armed forces and on members of military bands; to the Committee on Armed Services.

By Mr. FORD:

S. 2337. A bill to amend the Consumer Product Safety Act to establish an interim consumer product safety rule relating to the standards for flame retardant resistance and corrosiveness of certain insulators, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. WILLIAMS:

S. 2338. A bill to amend the Tariff Schedules of the United States to provide a temporary suspension of the duty on mineral wool; to the Committee on Finance.

By Mr. WILLIAMS (for himself, Mr. PROXMIRE, and Mr. JAVITS):

S. 2339. A bill to amend the Securities Exchange Act of 1934 to require the preparation of annual reports and distribution documents by issuers of municipal securities, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MORGAN (for himself and Mr. NUNN):

S. 2335. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide coverage under the social security system for Members of Congress and employees of the legislative branch; to the Committee on Finance.

(The remarks of Mr. MORGAN when he introduced the above bill are printed earlier in today's proceedings.)

By Mr. THURMOND:

S. 2336. A bill to repeal provisions of title 10, United States Code, which impose certain restrictions on enlisted members of the Armed Forces and on members of military bands; to the Committee on Armed Services.

Mr. THURMOND. Mr. President, it has come to my attention that an antiquated 1908 public law discriminates against members of our Armed Forces who are musicians.

This 1908 law is interpreted by some to prohibit military musicians from engaging in off-duty employment because of alleged interference with civilian musicians. I am proposing a bill to repeal provisions of title 10, U.S. Code, which discriminates against military musicians, as opposed to other professionals in the military service who earn extra money in off-duty periods.

Due to the high cost of living, the need to "moonlight" by many enlisted members of our Armed Forces is a livelihood requirement. There are many skilled military personnel, including doctors and electronic technicians, who are permitted upon approval of their commander to engage in off-duty employment. The only exception to this privilege is contained in the 1908 law prohibiting military musicians from engaging in civilian employment, as musicians in off-duty periods.

Mr. President, there is an apparent lack of a uniform policy for all military musicians, based on different interpretations of the law. The Army, Navy, and the Air Force Band authorities under some circumstances have determined that members of their musical units may accept musical engagements within the civilian community for pay. However, authorities for the Marine Corps do not share the same interpretation because the law specifically restricts members of the Marine Corps Band far more severely than imposed upon other military band members.

Department of the Navy officials testified for the Defense Department at subcommittee hearings in the House of Representatives in behalf of a similar measure to repeal discriminatory and inequitable provisions of the 1908 law which has become outdated. In view of the extensive requirement for musicians today, it would be very difficult for anyone to prove that participation by members of military musical units during limited off-duty periods would deny any professional civilian musician the opportunity to earn his livelihood.

Mr. President, the American Federation of Musicians should not raise any serious objections to this measure. I do not believe the repeal of the discriminatory provisions of the law would pose any threat to professional musicians in the civilian sector. In most cases and particularly in the Washington, D.C. area where the majority of our military musicians are located, requirements for civilian musician entertainment far exceeds availability of professional musicians.

I am especially pleased to introduce this bill, since it does not cost the taxpayer 1 cent. On the other hand, it helps some of the enlisted members of our Armed Forces who are having great difficulty in making ends meet to support their families, especially in the high cost-of-living metropolitan area.

Mr. President, I urge my distinguished colleagues to support this deserving measure, and I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2336

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that sections 974, 3634, 6223, and 8634 of title 10, United States Code, are repealed.

SEC. 2. (a) The table of sections at the beginning of chapter 49 of title 10, United States Code, is amended by striking out the item relating to section 974.

(b) The table of sections at the beginning of chapter 349 of such title is amended by striking out the items relating to sections 3632, 3633, 3634, and 3636.

(c)(1) The table of sections at the beginning of chapter 565 of such title is amended by striking out "; leader's pay and allowances" in the item relating to section 6221, and by striking out the items relating to sections 6223 and 6224.

(2) Section 6221 of such title is amended—

(A) by striking out "(a)"; and

(B) by striking out "; leader's pay and allowances" in the section heading.

(d) The table of sections at the beginning of chapter 849 of such title is amended by striking out the items relating to sections 8632, 8633, 8634, and 8636.

By Mr. FORD:

S. 2337. A bill to amend the Consumer Product Safety Act to establish an interim consumer product safety rule relating to the standards for flame resistance and corrosiveness of certain insulators, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EMERGENCY INTERIM CONSUMER PRODUCT SAFETY RULE ACT OF 1977

Mr. FORD. Mr. President, I am today introducing the Emergency Interim Consumer Product Safety Rule Act of 1977. This legislation will accomplish two objectives. First, it directs the Consumer Product Safety Commission to adopt, within 120 days, an interim mandatory consumer product safety standard for the flammability and corrosiveness of cellulose insulation. Second, it directs the Consumer Product Safety Commission to conduct an interagency study on the various safety aspects of all forms of home insulation, and to provide Congress with an interim report within 6 months, and a final report and recommendations within 1 year.

Under President Carter's energy proposal, we are asking millions of Americans to bear the cost of insulating their homes, and are encouraging such action through a tax credit. The legislation I am introducing today is essential if we are to meet our national energy goal of insulating 90 percent of American homes by 1985. The purpose of this legislation is to see that all possible steps are taken by the Congress to see that consumers who purchase home insulation can be reasonably sure that the product is safe.

The Consumer Product Safety Commission has been aware of the problem of improperly treated cellulose insulation since June, 1975. The Metropolitan Denver district attorney's consumer office petitioned the CPSC in October 1976 requesting mandatory safety standards for cellulose insulation. Yet it was not until November of this year that the Commission agreed to finally begin action on this petition. Now, members of the Commission advise me that under its existing authority, the CPSC will be unlikely to develop a mandatory safety standard within the next 18 to 24 months. That, in my judgment, is far from satisfactory. It is my opinion that Congress must act immediately to provide a mandatory minimum safety standard for the flammability and corrosiveness of cellulose insulation.

Why is the need for this legislation so urgent? When properly manufactured, cellulose insulation is a safe and effective consumer product. The Department of Commerce estimates that 10 new cellulose manufacturers enter the market each month, and an increasing quantity of cellulose insulation is being sold that meets neither the existing standard for Government purchases nor any voluntary standard followed by the cellulose industry. The reputations of the vast majority of cellulose manufacturers, who produce a safe and effective product, are being unfairly damaged by the small but growing number who produce an unsafe product. This legislation will protect both the legitimate manufacturer and the individual consumer from those who are producing and selling an unsafe consumer product.

This legislation will direct that cellulose insulation be manufactured in com-

pliance with existing General Services Administration Standard HH–I–515C, which provides the best current methods for testing the flammability and corrosiveness of this product. The present GSA standard may not be the ultimate answer. I expect the Consumer Product Safety Commission to continue to work towards promulgating an even better safety standard for cellulose insulation in the future. It is clear to me, however, and I hope my colleagues will share this opinion, that the existing GSA standard is far better than no standard at all.

Mr. President, on September 15 and 16 of this year I held 2 days of hearings before the Consumer Subcommittee of the Senate Committee on Commerce, Science, and Transportation on the subject of consumer protection and energy conservation. The witnesses who appeared were unanimous in their belief that a high level of consumer confidence is essential if we are to meet our national energy goals. We must not allow that consumer confidence to be undermined by encouraging home owners to waste personal income and tax dollars or unsafe products that pose an unreasonable risk of injury.

Mr. President, I hope that my colleagues will join with me in urging that this vital legislation be passed as soon as possible. The longer we wait before setting a mandatory standard for cellulose insulation, and studying the safety problems of other insulation products, the greater the risk that homes will burn, tax dollars will be wasted, and lives may be unnecessarily lost.

By Mr. WILLIAMS:

S. 2338. A bill to amend the Tariff Schedules of the United States to provide a temporary suspension of the duty on mineral wool; to the Committee on Finance.

INSULATION SHORTAGE RELIEF ACT OF 1977

Mr. WILLIAMS. Mr. President, today I am introducing legislation to help ease the current shortage of insulation material in the United States. This bill would suspend, for 2 years, the import duty on mineral wool, which includes rock wool and fiberglass and accounts for 80 to 85 percent of all insulation used in the home, according to the Washington Post.

Higher fuel bills, greater Federal inducements to insulate homes, and a recent boom in new housing construction has caused an unprecedented demand for insulation. One fiberglass manufacturer reports shipments are running 50 percent higher than for the same period last year. The demand for insulation has become so great that spot shortages, particularly of fiberglass insulation, have occurred around the country with increasing regularity.

Domestic manufacturers have attempted to keep pace with the rising demand. Between 1971 and 1976, for example, they doubled their production capacity and this past year, they announced plans to expand their combined capacities another 50 percent by 1981. Most Government experts agree that by 1981, the fiberglass industry will have enough capacity to accommodate the expected insulation demand. But present demands have become so great, the industry has been forced to establish an allocation system.

I find it sadly ironic that at the same time American consumers are being strongly encouraged through Federal tax credits to insulate their homes and cut down fuel consumption, industry spokesmen agree there will be a shortage of insulation material for at least the next 3 years. Such a shortage surely means higher prices and some say the cost has jumped 20 percent in the last 6 months alone. More discouraging and disheartening to consumers are the reports that substandard, flammable materials are being substituted for mineral wool.

One immediate step we can take to help ease the shortage is to suspend the 7.5 percent duty on imported mineral wool. According to the U.S. Commerce Department, mineral wool imports increased by 230 percent from 1975 to 1876. However, this 1976 volume represents a fraction of 1 percent of total domestic supply. Because the market demand is so heavy, manufacturers, suppliers and consumers deserve a break on the cost of imported supplies—at least until the domestic supply is restored to the healthy position it occupied before the recent boom. It is certainly reassuring to know that insulation manufacturers have taken the actions necessary to increase production, but we must recognize that supply will not meet demand until 1981 at the earliest. In the meantime, a temporary suspension of the import duty would be wholly consistent with our efforts to encourage home insulation.

By Mr. WILLIAMS (for himself, Mr. PROXMIRE, and Mr. JAVITS):

S. 2339. A bill to amend the Securities Exchange Act of 1934 to require the preparation of annual reports and distribution documents by issuers of municipal securities, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

MUNICIPAL SECURITIES FULL DISCLOSURE ACT OF 1977

Mr. WILLIAMS. Mr. President, on behalf of Senators PROXMIRE, JAVITS, and myself, I am today introducing the Municipal Securities Full Disclosure Act of 1977. The bill would subject issuers of municipal securities—the tax exempt, debt obligations of State and local governments—to the Securities Exchange Act of 1934, requiring the preparation, on a uniform basis, of annual reports and distribution documents and delineating and clarifying the responsibilities of issuers, underwriters, and others involved in issuing or distributing municipal securities.

This bill is actually a revised and expanded version of legislation which I first introduced in February 1976. In that month, the Subcommittee on Securities conducted 3 full days of hearings and received testimony from representatives of State and local governments, the Federal Government, municipal securities underwriters and dealers, accounting firms, bond rating agencies and institutional investors on the interesting and important questions of public policy which legislation of this kind places in clear focus.

The overwhelming weight of the testimony presented to the Subcommittee on Securities strongly supported the general objective of improving the quality, accuracy and availability of information concerning municipal securities and their issuers. Witness after witness recognized both the serious deficiencies in existing disclosure and financial reporting by governmental entities and the serious consequences which could result from the erosion of public confidence in the integrity of the municipal securities markets and the issuers dependent on these markets.

Mr. President, the municipal securities markets are quite deeply and directly affected with a tangible national interest. In broad terms, this market is the financial lifeline for government units of all size to borrow private funds for public use.

Today, our municipal securities markets are confronted by a battery of problems. Some are external—shifts in national monetary policy and overall economic conditions. Some are unique and, hopefully, unparalleled—such as the unfortunate circumstances in New York City. Still others are subtle—such as the shifting investment patterns of major financial institutions. Also, careful attention is being focused on the fiscal condition of State and local borrowers and how information on this condition is reported to and analyzed by investors. In addition, there are legal problems—such as the impact of the Federal securities laws, the requirements they impose on various participants in municipal finance, and the adequacy of the legal remedies available to investors who may be injured as a result of nondisclosure or misstatements of material information.

Whatever the source of the problem, there is little argument that government borrowers must have unimpeded and economical access to our capital markets. The delivery of essential public services at all levels of government will be jeopardized or interrupted by unnecessary barriers to market access.

Because of both the complexity and importance of these markets, there are no facile solutions or quick fixes. Coordinated policy to insure a steady and reliable flow of capital to State and local governments for appropriate public purposes is needed.

I believe there is one essential element of any comprehensive solution to the problems of our cities and States that warrants immediate attention and implementation by the Congress. I am referring to the further, measured application of the Federal securities laws to the primary market for the offer, sale, and distribution of municipal securities. In short, this is the purpose of the Municipal Securities Full Disclosure Act.

On several occasions in the recent past, the Congress has expressed interest in

and enacted legislation addressing the character and quality of financial management and information systems at the State and local levels.

Recent attention by the Congress regarding municipal bond disclosure, revenue sharing reenactment, State and local pension and retirement systems, countercyclical aid to State and local governments, and the seasonal loans extended to New York City provide a partial list to the renewed congressional interest in State and local government accounting, financial reporting, and disclosure practices.

More specifically, with the enactment of the Securities Acts Amendments of 1975, the Congress acted to eliminate serious threats to the integrity and efficiency of the municipal securities markets. This law ended over 40 years of a "hands off" Federal policy by subjecting to direct regulation under the Federal securities laws the municipal securities professionals who underwrite and deal in these securities.

For several years, as chairman of the Subcommittee on Securities, I have been actively studying the municipal securities markets from the standpoint of investors, State and local borrowers, the professionals who service both issuers and investors, and above all, the national interest in creating the conditions which will preserve and strengthen the financial independence and integrity of State and local governments. Based upon this study, I believe the time has come for the Congress, through additional legislation, to subject to minimum Federal regulation the issuance of municipal securities in the primary markets; in other words, to require municipal securities issuers to comply with the disclosure requirements of the securities laws.

Mr. President, I believe the historic exemption for municipal securities from all but the antifraud provision of the Federal securities laws, available to issuers of municipal securities since the original Securities Act of 1933, is an anachronism. From an historical standpoint, the factors which seem to have been determinative four decades ago are no longer valid or compelling.

While the legislative history is not especially illuminating, several factors were considered. The first was the absence of many actual instances of misrepresentation by municipalities. As evidence of this, the House committee report on the Securities Act of 1933 stated that investors in municipal securities were beyond the need of public protection because of the "lack of recurrent demonstrated abuses."

A second reason was the nature of the market and character of the typical municipal security investor. Both have changed dramatically since 1933. Perhaps the most startling change is in the volume of municipal securities issued. In 1933, State and local expenditures amounted to some $7 billion. By 1975, these expenditures exceeded $200 billion, and some $58 billion in new long- and short-term debt securities were issued. Moreover, by the end of 1975, some 78,268 State and local government bodies and instrumentalities had approximately $221.2 billion outstanding in publicly held securities.

The dimensions of the municipal securities market can also be illustrated by measuring it against the more commonly understood corporate securities market. In 1974, $22.8 billion in long-term municipal bonds were issued, while $31.6 billion in corporate securities—including common, preferred stock and debt issues—were registered with the SEC. In 1975, there were 8,080 municipal securities offerings totaling $46.8 billion.

Also unforeseeable in the 1930's was the role individual investors would eventually play in the municipal securities markets. For many years, institutions—banks and fire and casualty companies—were the principal investors in municipal securities. Because of their sophistication, it was argued that the statutory protections available under the securities laws were unnecessary. And until recently, it was indeed true that municipal financing demands were satisfied by commercial banks, high income individuals and fire and casualty insurance companies.

However, according to Federal Reserve figures, the commercial banks' share of the new issue market has steadily declined. According to a recent New York Times article "Commercial banks, which hold about half of the outstanding tax-exempt securities, are turning increasingly to newer more profitable tax-avoidance investments, primarily equipment leasing and operations that afford foreign tax credits." Moreover, insurance companies and other financial intermediaries are not likely to offset the commercial banks' declining market participation.

A corollary of this is that these tax-exempt securities are no longer the province of wealthy and institutional investors. An increasingly large proportion of municipal debt has been sold to individuals of small and moderate means either directly or indirectly through the emergence of mutual funds and trusts which invest predominately in tax-exempt municipal securities. Rising personal incomes and significant increases in municipal bond interest rates and yields have caused a major upsurge in private investor interest—the very category of investors intended to receive the protections mandated by our securities laws.

Mr. President, the one reason which has retained some validity over the years is the legitimate concern that the costs of SEC regulation would be passed on to State and local borrowers. The historical argument has been based on two questionable assumptions. The first is that the cumbersome and complex framework of securities regulation which the Congress has prescribed for corporations would necessarily be imported wholesale and imposed on governmental, public issuers. And second, that these costs would not otherwise be imposed on municipal finance, such as through the turmoil and disruptions which recently were visited upon the markets.

For decades now, State and local issuers have argued that corporate securities-style registration and regulation would increase substantially the costs of bringing bonds to market without any commensurate benefits. But this argument overlooks the experience of recent years and ignores the fundamental policies and purposes of the securities laws. The public policy underpinning of 44 years of Federal securities regulation has been full and complete disclosure. Full disclosure has worked well both to facilitate investment decisions and to allow for the optimal use of capital among competing sources.

As the issuers have argued, the present frameworks of both the Securities Act of 1933 and the Securities Exchange Act of 1934 were designed to protect investors in corporations, not public entities. And it is true that the reasons for the present provisions of these laws are in large measure unrelated to the characteristics or needs of governmental issuers or the underwriting and offering process for their securities.

For these and other reasons, I do not believe it is necessary or appropriate to subject State and local issuers to the full range of regulation, registration, and reporting under the 1933 and 1934 acts or the Commission's full jurisdiction under the Federal securities laws. Aside from the public policies for not doing so, there are practical reasons as well. Although there are some 80,000 public instrumentalities which could conceivably issue securities, each year some 8,000 actually go to market. The following chart compares the new issues market for corporate and municipal securities, and among other things, illustrates the practical problems which this approach would place upon the SEC.

COMPARISON OF THE VOLUME OF NEW ISSUES IN MUNICIPAL AND CORPORATE MARKETS, 1970–77

[Dollar amounts in billions]

Year	Municipals						Corporate							
	Long term		Short term		Total		Bonds		Preferred stock		Common stock		Total	
	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount
1970	4,701	$17.8	2,903	$17.9	7,604	$35.6	549	$24.3	55	$1.3	778	$5.5	1,382	$31.1

At the other extreme from the full regulation and registration of municipal issuers is continuing the status quo. Under present law, municipal securities and their issuers are subject to the general antifraud provisions. It may be argued that the antifraud provisions are sufficient to require disclosure of all material facts and to permit informed investment decisions. However, the facts are that investors in many instances are not receiving substantial disclosures, and when they do, they are not standardized or comparable. The veracity of such financial information is often open to doubt. And because there has been little litigation to date under the antifraud provisions, the obligations of issuers and underwriters, and others remains in confusion. As a result, the quality of the resulting investor protection remains in doubt.

Nor is the status quo highly desirable from the issuers' standpoint. In some specific cases, State and local governments have not been able to get to market at all because underwriters have declined to bid on issues where they have been unable to satisfy their legal responsibilities to prospective investors. Because of the confusion and uncertainty, municipal officers, and bond counsel suddenly find themselves being asked to attest to the accuracy of information in official statements, to sign indemnification agreements, and most importantly, to defend themselves in cases brought by investors under rule 10(b)(5) of the Federal securities laws. In general, the efficiency of the markets has been impeded as issuers, underwriters and others have become "gun shy" about their liability exposure under the antifraud provisions of the Federal securities laws.

And not without good reason, since the SEC has asserted broad authority over the municipal securities industry and markets under both explicit grants of statutory authority from the Congress as well as the general antifraud provisions.

The SEC and its staff have become more knowledgeable about the municipal securities market and more interested in carrying out its enforcement responsibilities under the Federal securities laws. During the past 4 years, the SEC has initiated a multitude of lawsuits, instituted administrative proceedings against municipal securities professionals involving fraudulent activity in connection with municipal securities, and filed several suits directly related to primary distributions of municipal securities.

In August 1977, the Commission transmitted to the Congress an investigative staff report on transactions in securities of the city of New York. The report, the product of a 19-month investigation, raises far-reaching questions under the securities laws about the roles and responsibilities of attorneys, underwriters, bond counsel, rating agencies, accountants, issuers, and issuer officials.

The general conclusion of the report is that—

The functioning of the process by which City securities were brought to the market place depended not only upon the issuer, but also upon the principal underwriters, bond counsel and rating agencies. As is evident from the facts set forth in this Report, in varying degrees, they failed to meet their responsibilities. Thus, public investors were denied the protections to which they were entitled.

In an epilog of the report, the Commission summed up its experience as follows:

It is imperative that persons with responsibilities in the marketing of municipal securities reassess their roles to assure that, when required, they will meet the demands of such occasions. It is hoped that this Report will be studied by the various participants in municipal financing, and that they will commence a critical review of the facts as the first step in the development of a program designed to place into effect at the earliest possible time the necessary remedial measures, not only to prevent a recurrence of what took place in New York City, but also to install a system that will assure municipalities vital access to the Nation's securities markets and the protection of those who invest in municipal securities.

Mr. President, I believe it is both necessary and desirable for the Congress to design a new statutory framework for systematic and complete disclosure by issuers of municipal securities which advances the investor protection principles of the securities laws, preserves the sovereign prerogatives of State and local issuers, and stabilizes and broadens our municipal securities market. This can be done without in any way expanding the enforcement responsibility of the Commission or the ultimate liability of either the issues or the underwriters. Furthermore, this approach will serve the interests of issuers and investors by establishing and clarifying through legislation norms of conduct which will otherwise develop in an uncoordinated, haphazard way through ad hoc SEC enforcement actions and private litigation.

Mr. President, under all of these circumstances, I believe it is the absence of legislation addressing the information reasonably necessary for investors, and the respective responsibilities of issuers, underwriters, and others in producing it, that imposes the costs and poses the interference we all seek to eliminate.

I should note that concern over municipal reporting and disclosure did not originate during this decade. In 1928, one commentator described municipal reporting in the United States as:

A jungle through which run only little trails and some of those are little used . . .

Everyone concedes that some reports are indispensable, but a few consider what the reports should contain, for whom they should be prepared, in what form they should be presented, how they might most advantageously be circulated, how their content and form might be improved.

The general absence of uniform and standardized municipal reporting is of no less concern today. According to a 1974 report of the Twentieth Century Fund Task Force on Municipal Bond Credit Ratings:

A major problem admitted by both the rating agencies and others interested in fiscal affairs is the lack of uniformity in accounting practices and timeliness in the reporting of state and local government statistics. Furthermore, not only do the reports differ in definitions, detail and quality, but their veracity and accuracy are often neither examined nor guaranteed by an independent audit.

* * * * *

The accounting and reporting problem is a deepseated one because the states either passively or actively have created a hodgepodge of practices and requirements.

A sequel from the Twentieth Century Fund, published in 1976 and entitled "Building a Broader Market," cited the "very real need for full disclosure of information by borrowers" and noted that "greater uniformity is needed in the information provided for municipal securities transactions and that national standards for financial disclosure should be established."

Mr. President, in my judgment sound financial management and fiscal responsibility by State and local officials and standardized and accurate public disclosure will not occur without definite accounting and reporting standards established at the Federal level.

Arthur Andersen & Co., a well-known international accounting firm, has published or commissioned several reports which are relevant. One report, published in 1975, is entitled "Sound Financial Reporting in the Public Sector: A Prerequisite to Fiscal Responsibility."

In this report, Arthur Andersen concluded:

Cities, states and other political subdivisions should be required to publish (. . . financial) statements annually and in connection with the sales of securities to the public.

The effect of this report was to encourage public discussion of the need for sound accounting controls and financial reporting in all units within the public sector.

A second comprehensive Arthur Andersen & Co. report conducted by the University of Chicago's Center for Management of Public and Non-Profit Enterprise, addressed the question of an appropriate format for financial reporting of State and local governments. After studying the needs of users of governmental financial statements—the general public (consisting usually of taxpayers), investors, creditors, and elected and appointive Government officials—the report recommended strongly "the need for a set of consolidated statements treating the government unit as a whole, expressed as nearly as possible in commercial accounting terms and format." The report concluded:

State and local governmental units may be paying a substantial price in higher interest costs for their failure to provide financial statements that are meaningful to a broader group of investors and analysts. The present group of specialists in state and local financial obligations generally do a good job of working with data that are frequently inadequate, but more complete and more understandable financial statements might expand the market, thus resulting in lower interest costs.

In conjunction with the University of Michigan, Coopers & Lybrand, another major accounting firm, conducted a study of disclosure practices in 46 American cities, "Finanial Disclosure Practices of the American Cities: A Public Report." This comprehensive report documents the serious shortcomings in the existing system of financial reporting and disclosure which relies upon voluntary compliance with currently recommended municipal disclosure practices.

76% of the cities studied did not disclose in their financial reports the actuarially computed value of vested benefits over the total of the pension fund and net balance sheet accruals. In some cities, the total undisclosed liabilities are estimated.

84% of the cities surveyed did not disclose accrued vacation and sick leave dollar obligations.

50% of the cities surveyed having overlapping debt did not disclose those obligations in their annual reports.

Nearly half of the cities did not describe the fundamental accounting policies used to record financial activities. Since the selection of accounting methods significantly affects the presentation of data in financial statements, the failure to disclose the methods substantially reduces the usefullness of the financial statements.

Many American cities do not publish financial information more frequently than once a year. Further, annual reports are frequently not prepared on a timely basis.

Like every other study which has been brought to my attention, this one also recognized the merit of subjecting municipalities "to the same accounting and disclosure requirements applied to publicly held corporations. This means that disclosure practices be uniformly enforced, preferably at the State level, or absent that, at the Federal level, to assure compliance. Moreover, if cities are not bound to adhere to the same standards as publicly held commercial enterprises, they will ultimately suffer a competitive disadvantage in the credit markets."

Mr. President, these are some of the more important findings of this study which "indicate a substantial lack of compliance with current generally accepted (accounting) principles applicable to governmental bodies." Accordingly, the study recommends "legislation to create a mechanism to monitor the financial reports of local governments" and that "FASB and the AICPA be permitted to develop and promulgate generally accepted accounting principles."

Most recently, the Council on Municipal Performance released the first of several installments from its report on municipal securities regulation. This report seeks to evaluate the question of municipal securities disclosure from the public perspective and the range of possible remedies. Based upon the sections released to date, a compelling case is made for a system of mandatory disclosure requirements. After meticulous and original research into the adequacy of existing Federal and State law, one appendix to this report concludes that—

Federal regulation of municipal securities generally as contemplated by the 1976 Williams bill is appropriate, desirable and a proper balance between the alternatives of self-regulation or treating municipal securities in the same manner as corporate securities.

Against this background, it is somewhat anomalous that major private corporations have audits performed by independent certified public accountants, but municipalities do not. The need for this basic information by bondholders, taxpayers, voters and by all branches of Government is obvious.

Mr. President, the Federal Government has a vital interest in the character and quality of financial management and information systems at the State and local levels.

In at least one area, the Congress has already acted to require proper and accurate State and local accounting. Under the State and Local Fiscal Assistance Amendment of 1976—

Each state government and unit of local government which expects to receive funds . . . on or after January 1, 1977 . . . shall have an independent audit of its financial statements conducted for the purpose of determining compliance . . . not less often than once every three years.

Pursuant to this law, the U.S. Treasury Department has adopted rules defining what constitutes an independent audit of State and local governments which receive revenue sharing funds. Thus, by requiring an independent audit—the heart of effective disclosure—the Congress has taken a significant first step toward improving the quality and reliability of financial information required by the revenue sharing program.

Mr. President, each level of government—city, State, and Federal—is confronted with an array of problems that cannot go unanswered: Outdated capital facilities, demands for increased services for the poor and the elderly, and obsolete equipment are just a few. These problems are particularly acute for our urban centers. Clouds of doubt over the willingness of investors to purchase municipal securities, and the serious questions surrounding the standards of conduct required by the antifraud provisions of the securities laws, can only interfere with our progress toward long-term solutions of these problems.

It is, therefore, imperative that all States and local governments, regardless of size and geographic location, join with the executive branch and the Congress to improve and fine-tune the operations of our markets for municipal securities. An essential and significant first step must be improved disclosure to promote investor confidence in the integrity and efficiency of the capital raising system—a system which governmental entities will have to rely upon more heavily in the years ahead.

Applying the Federal securities laws to State and local governments is a prerequisite. In doing so, however, there are important legal distinctions between government and corporate borrowers which the Congress must recognize and respect. Because municipal securities have been exempt from direct Federal regulation since 1933, Congress' authority to legislate in this area has never been challenged or tested. In National League of Cities against Usery (1976), the Supreme Court abruptly narrowed previous expansive readings of congressional authority under the commerce clause of the Constitution by reading into it the 10th amendment. Undoubtedly this case will be relied upon by the opponents of the legislation to assert its unconstitutionality.

After careful study, I do not believe there is any constitutional barrier to the enactment of this bill. Nevertheless, this Supreme Court decision is a clear reminder that Federal law should be extended only so far as necessary to accomplish a legitimate national purpose or protect a legitimate national interest and no further. For this reason, the Municipal Securities Full Disclosure Act envisions a limited role for the SEC, and provides the opportunity and an incentive for the States to discharge and displace the powers delegated in the bill to the SEC.

I strongly believe that what is needed in this area is a novel application of the Federal securities laws. On one hand, legislation must establish explicit, but limited, SEC authority to develop improved and standardized disclosure. At the same time, we must avoid the formalities, administrative delays and costs of full registration already prescribed for private issuers. As I stated earlier, I do not believe these procedures are appropriate for municipal bonds. Therefore, my bill will recognize and respect the pre-

rogatives of State and local governments and encourage a more active role by them in assuring investor protection. In a nutshell, these are the views embodied in the bill which Senator PROXMIRE, Senator JAVITS and I are introducing today.

The bill relies heavily and borrows frequently from longstanding practices and procedures employed by issuers, underwriters and their counsel in marketing municipal securities. Major changes would not be required. For example, the methods of syndication and distribution would continue to be governed by State law.

At this point, it may be helpful to summarize the bill's most salient features. I have prepared a detailed explanation of the bill which will appear at the conclusion of my remarks.

Briefly, the bill would amend the Securities Exchange Act of 1934 to require the preparation of annual reports and distribution statements by issuers of municipal securities in the following manner.

First, issuers of municipal securities with an aggregate principal amount of securities outstanding exceeding $50 million would be required to prepare, but not file with the SEC, annual reports and reports of events of default. General information to be included in the reports would be specified. The categories, scope and format of the informational content is extracted from the December 1976 edition of the Municipal Finance Officers Association's "Disclosure Guidelines for Offerings of Securities by State and Local Governments," as well as from schedules A and B under the Securities Act of 1933.

Financial statements, prepared in such detail and form as the Commission may prescribe, would be included. For any fiscal year beginning on or after December 31, 1980, such financial statements would be required to be audited and reported on by independent certified public accountant, a qualified independent or licensed accountant, or an examiner from an independent State agency authorized by law to perform such functions. This provision was added in recognition of the common practice in many States to utilize the services of State auditing agencies in lieu of independent or certified public accountants. It conforms to the definition of independent audit recently adopted by the Department of the Treasury for use under the Revenue Sharing Act.

Second, the bill would require an issuer that offers or sells municipal securities to prepare a distribution document prior to such offer or sale. The information to be included in the distribution statement would consist of the data required in the annual report of an issuer together with specified additional information concerning the particular offering. These additional information requirements also conform in scope and format to the applicable disclosure requirements specified in schedules A and B of the Securities Act of 1933 and those in December 1976 edition of the "Municipal Finance Officers Association Disclosure Guidelines for Offerings of Securities by State and Local Governments." The Commission would be able to administer this subsection in a flexible manner. The objective would be to minimize interference with the natural workings of the marketing system. Under no circumstances would these statements be filed with or reviewed by the SEC.

I should point out that as originally drafted in 1976, the distribution statement requirements of the bill applied only to an offer or sale of municipal securities in excess of $5,000,000. Testimony at the hearings on the bill revealed that very few issuers of municipal securities would be affected by the distribution statement requirement. According to the testimony, between January 1974 and June 1975, 84 percent of the general objections bond issues and 65 percent of the revenue bond issuers were below the $5,000,000 threshold. Various commentators expressed the view that small issues of municipal securities are in particular need of disclosure regulation and that it would be appropriate to require every issuer to comply with disclosure requirements, adjusted to reflect issuer size and circumstance.

In the revised bill, the threshold has been eliminated. However, a number of provisions have been added authorizing the Commission to prescribe modified distribution statement disclosure requirements for small issues or exempt them altogether. Moreover, an intrastate offering exemption from the distribution statement requirement has been added.

Third, the bill would expressly recognize the initiatives some States have taken in closely supervising the marketing of local government bonds and encourage the further development of this pattern. Thus, the bill would provide exemptions from the distribution document and annual report provisions of the bill in States which require substantially similar disclosures. The exemption would be automatic and not subject to Commission approval. Thus, in those States which actively supervise local financings and require disclosure conforming to the standards in the bill, the requirements of this bill would have no effect. In this way, the bill would encourage the remaining States to take a more active role in the regulation and control of securities by their instrumentalities and political subdivisions and thereby minimize even further the involvement of the SEC.

Fourth, the Commission would be authorized to establish the accounting standards and practices to be followed in the preparation of financial statements.

Fifth, the bill contains a number of provisions to insure that reports and distribution documents are made available to investors and that investors are on notice of such availability. Issuers would be required to make the annual reports available to security holders at the issuer's expense and to others at their own expense. In the case of distribution documents, issuers would make the information available to municipal securities professionals as currently authorized by the statute.

Sixth, the remaining subsections of the bill provide statutory definitions of the responsibilities and liabilities of issuers, underwriters, and others engaged in the issuance and distribution of municipal securities. This is a major improvement over the previous version of the legislation. It is necessary because the antifraud provisions at present do not clarify or define the responsibilities of each of the participants in municipal finance to assure the adequacy or accuracy of information provided to investors, nor do the antifraud provisions provide any clear statement of the standard and extent of liability.

The proposed civil liability provisions would clarify the obligations of issuers, experts, and underwriters and others to make independent investigations concerning the completeness and accuracy of the information contained in municipal securities distribution documents and provide for express liability to investors for damages suffered on account of incomplete or inaccurate information. In general, the bill attempts to allocate the responsibility for assuring the adequacy and accuracy of the information required to be disclosed between the issuer and the underwriters with a view toward:

First, accessibility to and availability of the information;

Second, preserving and encouraging the system of competitive bidding;

Third, the practical difficulties of superimposing corporate-style "due diligence" responsibilities on the municipals sector in view of the dynamics of the market; and

Fourth, advancing the basic objectives of investor protection without increasing the underwriting costs.

While the bill would enumerate the responsibilities of issuers, underwriters and others, it does not provide any responsibilities for or express remedies against officials or employees of an issuer.

Finally, the bill would require the SEC to create an advisory committee on municipal issuers and actively solicit its views on the implementation of the bill.

Perhaps as important as to what the bill would do is what the bill is not intended to do. For example, it is not intended to draw any regulatory parallels between municipal and corporate securities or their issuers. Unlike the 1933 act, no registration is required nor is there any requirement of prefiling review by the SEC. Underwritings of municipal securities will not, as a result of this bill, be highly regulated as are corporate securities. This is not practicable or necessary to assure adequate and accurate disclosure of material facts. Instead, the bill specifies mandatory minimum standards of disclosure and limits the SEC's responsibility and authority to administering the new reporting requirements.

Aside from the limited and measured authority conferred on the Commission, the bill takes congressional notice of traditional State prerogatives by encouraging active supervision of municipal borrowings at the State level. According to the Twentieth Century Fund Report:

The leading example is the close supervision exercised by the Local Government Commission of North Carolina. The Commission approves and centrally sells local bond and note issues, provides financial advisory services in debt management, supervises local government accounting standards, and maintains and publishes local government data, including the advertising of bids and distribution of bond prospectuses . . .

A recent study indicates that the bonds of North Carolina communities often have higher credit ratings than the bonds of similar communities . . .; that more bids are received on the average for local government issues; and that the higher ratings and additional bids help to lower interest costs.

State supervision of this kind has served to assure investors that correct procedures have been followed and that data is accurate and reliable. Lower borrowing costs have thus resulted from the underwriters' knowledge of the state's standards and the uniformity of offering procedures.

Mr. President, the absence of uniformity, or and the inadequacy of information creates serious problems in the marketing of municipal securities far different from those faced in the past. While I believe the solution to a nationwide problem must be Federal legislation of similar scope, others, such as the issuers of municipal securities, prefer alternative methods of achieving this objective.

The Municipal Finance Officers Association has issued suggested guidelines to assist issuers. According to its "Disclosure Guidelines for Offerings of Securities by State and Local Governments" (December 1976), the guidelines "are suggestions of information which may be disclosed in offerings of municipal securities. These guidelines are not intended to be legally binding. Rather, they represent information that normally should be included in official statements because it would be relevant to investors on most occasions for most issues." The guidelines represents a considerable and constructive undertaking by the issuers and, as such, deserve commendation.

Unfortunately, in my judgment, these guidelines simply do not suffice as an effective alternative to Federal legislation. There are several reasons for this conclusion. The first is that investors will be dependent upon voluntary compliance by the issuer with the suggested disclosures. However, evidence already exists that voluntary compliance has not resulted in widespread adherence by issuers to uniform standards of accounting and financial reporting. Coopers and Lybrands, in its "Report On Financial Disclosure Practices of the American Cities" (1976), addressed this point and concluded:

Our findings indicate a substantial lack of compliance with current generally accepted principles applicable to government bodies. These findings support our recommendation that disclosure compliance for the protection of taxpayers and securities investors should be accomplished through uniform enforcement. The MFOA presently recommends compliance with GAAFR. However, the organization issues fewer than 40 Certificates of Conformance each year. In fact, only about 400 such certificates have been issued over the last 30 years. Out of approximately 18,000 municipalities eligible to apply, only about 100 applications are even submitted for consideration. This points upon the hopelessness of voluntary compliance.

Second, voluntary disclosure guidelines will not have the status of law and therefore will not provide definitive standards of conduct or serve as defenses to serious or even spurious lawsuits against issuers, underwriters, and others. Guidelines will not eliminate confusion about the legal responsibilities and liabilities of issuers and underwriters. There is no well-established judicial precedent to clarify the liability of issuers or the application of sovereign immunity under the antifraud provisions of the Federal securities laws.

On the other hand, the establishment of specific disclosure requirements by law would provide authoritative guidance by addressing the fundamental issues of what information municipal securities issuers should be required to make available to investors, and what the respective disclosure responsibilities should be for issuers, underwriters, and others involved in the process of distributing municipal securities. This is essentially the position taken by the Municipal Securities Rulemaking Board in 1976. In brief, without national standards established by Congress, the present confusion in the municipal securities market will persist.

Third, the guidelines proposed by the MFOE would apply to all tax exempt offerings by State or municipal entities, even small offerings that are placed privately with institutions and other sophisticated investors.

Fourth, it is conceivable that the MFOA guidelines may result in unnecessary and excessive costs to issuers in some instances since there will be no statutory disclosure norms. As a result, in each offering issuers may well be forced to disclose more information than is necessary to satisfy the materiality standards of the securities laws. Underwriters fearing liability may well be overzealous in insisting on additional disclosure or by refusing to bid on an issue. The information extracted may be irrelevant and the costs substantial.

Mr. President, notwithstanding these differences over approach, I believe the contributions of the issuers in developing standardized disclosure, educating State and local officials to their obligations under the securities laws, and improving the level of disclosure have been substantial. The Municipal Securities Full Disclosure Act of 1977 would build upon their initiatives, enhance the market, and assure a minimum amount of Federal intervention, at minimum cost. With the enactment of this bill and its uniform nationwide system of disclosure, I believe the municipal bond market will become increasingly less fragmented and regionalized. In this way, the bill will facilitate the essential money raising functions of State and local governments.

Mr. President, the Federal Government has a substantial interest in stabilizing the municipal bond market because of its importance in the national capital market and because of the number of investors involved. The bill approaches this national problem by encouraging a partnership with State and local governments.

The bedrock of efficient capital raising—whether by a company or a city—is investor confidence. This is conspicuously lacking today, posing unacceptably high legal, economic, and social risks for citizens, investors, underwriters, rating agencies, issuers, and for the Federal Government. Local government must be able to borrow at reasonable costs. How best to achieve this result is a matter of current debate. As a result of this bill, on which I expect to hold hearings early next year, I am confident that accounting and disclosure standards acceptable to investors and the various governmental, trade, and professional groups involved in the municipal securities markets can and will be developed.

Mr. President, I ask unanimous consent that the text of the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 2339

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Municipal Securities Full Disclosure Act of 1977".

SEC. 2. (a) Section 3(a)(12) of the Securities Exchange Act of 1934 is amended by inserting "13A," immediately after "for purposes of sections".

(b) Section 3(a) of such Act is amended by inserting at the end thereof the following new paragraphs:

"(40) The term 'municipal securities underwriter' means any person who purchases from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any municipal security, or participates or has a direct or indirect participation in any such undertaking, or participates or has a participation in the direct or indirect underwriting of any such undertaking; but such term does not include a person whose interest is limited to a commission from a municipal securities underwriter or municipal securities dealer not in excess of the usual and customary distributors' or sellers' commission.

"(41) The term 'municipal securities distribution document' means any distribution statement, offering circular, official statement, or similar document used or prepared by or for an issuer of municipal securities in connection with the offer or sale of such securities by the use of any means of interstate commerce, whether or not such document is subject to the provisions of section 13A of this title.".

(c) Section 12(h) of such Act is amended by inserting "13A," immediately after "section 13,".

(d) Such Act is further amended by inserting after section 13 the following new section:

"MUNICIPAL SECURITIES DISCLOSURE

"SEC. 13A. (a)(1) The Congress finds that—

"(A) State and local governments, in their duty to continue to provide needed services to the public, borrow funds in the capital markets and have found it necessary to issue increased amounts of municipal securities to public investors in recent years;

"(B) to assure the availability of capital funds at reasonable rates to, and the maintenance of essential services provided by, State and local governments, it is in the public interest and appropriate for the protection of investors to require the preparation of annual reports and distribution documents by issuers of municipal securities;

"(C) improved and standardized accounting, auditing, financial reporting, and other

uniform disclosures will facilitate access by State and local governments to the capital markets on reasonable and economic terms, and thereby strengthen and improve the basic mechanism of the market for municipal securities;

"(D) the Federal Government has a substantial interest in the municipal bond market because the issuance and distribution of the securities of State and local governments involves the use of interstate commerce and constitutes an important part of the current of interstate commerce.

"(2) It is the purpose of this section to facilitate the marketing of the securities of State and local governments, to reduce the borrowing costs of such governments, to protect investors in such securities by improving the availability, adequacy, and uniformity of financial and other information concerning State and local issuers of municipal securities, and to stabilize the market for municipal securities by delineating the responsibilities of issuers, underwriters, attorneys, accountants, and others involved in the preparation and distribution of such information and securities.

"(b)(1) Any issuer of municipal securities which has outstanding during any portion of a fiscal year an aggregate principal amount of municipal securities exceeding $50,000,000 shall prepare for such fiscal year an annual report and reports of events of default in accordance with such rules and regulations as the Commission may prescribe as being necessary or appropriate in the public interest or for the protection of the investors.

"(2) The annual report required by paragraph (1) shall be prepared within one hundred and fifty days after the close of the fiscal year with respect to which the report is required under paragraph (1) or such lesser period of time as the commission may, by rule prescribed, and shall contain the following information, if applicable:

"(A) a description of the issuer, its executive officials, the principal facilities and operations;

"(B) a description of any material changes or interruptions in the issuer's operations over the past five years;

"(C) a description of the issuer's borrowing policies, debt, debt structure, including, where material, information regarding the indebtedness of overlapping State and local governmental entities, and any relevant trends involving such indebtedness over the last five years;

"(D) a description of any legal limitations on the incurrence of indebtedness by the issuer;

"(E) a description of any material contingent liabilities, leases or commitments of the issuer;

"(F) a description of any defaults, postponements, delays or other modifications with respect to the payment of principal or interest on any outstanding debt of the issuer within the past twenty years, including the terms of any succeeding arrangements;

"(G) a description of the issuer's tax authority and any legal limitations thereon, tax structure and collection experience over the past five years, including the nature and amounts of taxes levied, tax rates, assessment and collection procedures, and any anticipated change in tax structure including such procedures over the next five years;

"(H) a description of any significant economic and demographic data and relevant trends over the past five years affecting the issuer;

"(I) a description of the issuer's major taxpayers;

"(J) a description of the issuer's major revenue sources other than taxes and amounts received over the past five years;

"(K) a description of Federal or other governmental assistance to the issuer, any major changes or interruptions of such programs in the past five years to the issuer, and any anticipated changes or interruptions over the next five years;

"(L) a description of any pending legal proceedings which may materially affect the issuer's outstanding debt securities or the sources of payment therefor;

"(M) the issuer's current budget and a description of budget procedures and budget achievement experience over the past five years;

"(N) a description of the issuer's pension or other employee retirement plans, including the means of financing such plans;

"(O) a statement of any holdings of the issuer's securities by trust or pension funds associated with the issuer;

"(P) financial statements in such detail and form and for such periods not exceeding the past five fiscal years as the Commission may prescribe, which financial statements for any year commencing on or after December 31, 1980, shall be audited and reported on by an independent certified public accountant or a qualified independent licensed accountant or examiner from an independent State agency authorized by law to perform such functions, in such a manner as the Commission may prescribe.

"(3) The reports of events of default referred to in paragraph (1) shall contain such of the information required by paragraph (2) as the Commission may by rule or regulation prescribe.

"(4) The report required by paragraph (1) shall, in addition, contain such other similar information as the Commission may by rule or regulation prescribe as being necessary or appropriate in the public interest or for the protection of investors.

"(c) (1) Except as provided in subsection (d), any issuer which offers or sells an issue of municipal securities shall, prior to such offer or sale, prepare a municipal securities distribution document in accordance with such rules and regulations as the Commission may prescribe as being necessary or appropriate in the public interest or for the protection of investors. In administering this subsection, the Commission shall, to the extent practicable, avoid repetition of information required to be included in an annual report required under subsection (b)(1).

"(2) The municipal securities distribution document required by paragraph (1) may consist of more than one part and shall contain such of the information pertaining to the issuer and underwriter or underwriters required by subsection (b)(2) as the Commission may be rule or regulation prescribe, and the following information, if applicable:

"(A) the aggregate amount of each class of securities to be offered;

"(B) the price at which it is proposed that the securities shall be offered to the public or the method by which such price is or will be computed and any variation such security is proposed to be offered to any persons or classes of persons, other than the underwriters, naming them or specifying the class;

"(C) the names and addresses of the underwriters;

"(D) the nature of the underwriting arrangements;

"(E) all commissions, discounts, or other remuneration paid or to be paid, directly or indirectly, by the issuer to the underwriters in respect of the sale of the securities to be offered;

"(F) the amount or estimated amounts, itemized in reasonable detail, of expenses, other than commissions, discounts, or other remuneration specified in subparagraph (E), incurred or borne by or for the account of the issuer in connection with the sale of the security to be offered or properly chargeable thereto, including legal, engineering, certification, authentication, and other charges;

"(G) the estimated net proceeds of the securities to be offered;

"(H) the specific purposes for which the securities to be offered are to supply funds and, in the case of revenue bonds or similar enterprises, if the funds have been or are to be raised in part from other sources, the amounts, the sources thereof, and the date such funds will be available;

"(I) a description of all projects or enterprises of the issuer to be financed by the proceeds of revenue or special assessment securities, including the management and major user thereof, and any engineering or financial feasibility reports or studies on the construction or operation of the project or enterprise;

"(J) a description of the securities to be offered, including provisions as to registration and exchange, security and security substitutions, any guarantor or insurer of the principal or interest or premium on the securities being offered, the terms and conditions of the guaranty or insurance and appropriate information regarding the financial condition of the guarantor or insurer, payments of principal and interest, payment sources and any restrictions thereon, rights and duties of trustees or fiscal agents, events of default, maturity redemption, amortization, sinking fund, retirement, debt reserve funds, priority of payments, legality and authorization for issue, rights of security holders to bring suit against issuers or guarantors and whether as well as under what conditions any of these terms may be modified;

"(K) a statement of counsel's opinion as to the validity of the issuance of the securities to be offered under applicable State law and the name and address of the counsel rendering such opinion;

"(L) a description of the tax status of the securities to be offered with respect to interest payments to or sales of the securities by investors and, if such description is based on an opinion of counsel, the name and address of such counsel;

"(M) a statement of the availability of the reports required by this section; and

"(N) with respect to trustees, fiscal agents, counsel, and any other expert named in the distribution document as having prepared or certified any part thereof or any document referred to therein, a description of any material relationship between such expert and the issuer or any direct or indirect interest of such expert in the offering; and

"(O) a statement of any ratings for the securities to be offered and the names of the rating agencies, or of no such ratings have been obtained or a rating has been returned for any such securities, a statement of the reasons; and

"(3) Notwithstanding the provisions of paragraph (2), (A) the Commission may by rules or regulations provide that any information or document specified in paragraph (2) need not be included in respect of any class of issuer or securities if it finds that such information or document is not applicable to such class, that disclosure fully adequate for the protection of investors is otherwise required to be included within the distribution document, or that such information is otherwise available and may be incorporated by reference into the distribution document; and (3) prior to any sale, the information specified in subparagraphs (A) (B), (C), (D), (E), (F), (J), and (K) may be set forth in preliminary form.

"(4) The distribution document required by paragraph (1) of this subsection shall in addition, contain such other similar information as the Commission may by rule or regulation prescribe as being necessary or appropriate in the public interest or for the protection of investors.

"(5) The Commission may from time to time by its rules and regulations, and subject to such terms and conditions as may be prescribed therein, classify distribution documents according to the nature and circumstances of their use or the nature of the security, issue, issuer or otherwise, and prescribe as to each class the form and contents which it may find appropriate and consistent with the public interest and the protection of investors.

"(d)(1) The provisions of subsections (b) and (c) do not apply to an issuer or an offer or sale of municipal securities, the disclosure with respect to which is required in accordance with laws or regulations of the State in which the issuer is organized, provided such regulations are substantially similar to the provisions of subsections (b)(2) and (c)(2), respectively.

"(2) The provisions of subsection (c) do not apply to an offer or sale of municipal securities which would satisfy the provisions of sections 3(a)(9), 3(a)(10), 3(a)(11), 4(1), 4(2), 4(3), or 4(4) of the Securities Act of 1933 if such offer or sale were not within the scope of section 3(a)(2) thereof.

"(e) The Commission may prescribe, in regard to reports and distribution documents prepared pursuant to this section, the detail and form in which the required information, including the financial statements, shall be set forth, and the accounting methods to be followed in the preparation of financial statements.

"(f)(1) The issuer shall make the reports required by subsection (b) of this section available upon request to security holders at the issuer's expense and to others at their own expense and shall give appropriate public notice of such availability, as well as access to the exhibits specified in paragraph (3) of this subsection in accordance with such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors.

"(2) The issuer shall make the distribution document required by subsection (c)(1) of this section available to municipal securities brokers, municipal securities dealers, and banks acting as agents for delivery to prospective purchasers in accordance with rules and regulations adopted under this title.

"(3) The reports and distribution documents of issuers required by this section together with copies of any applicable current articles of incorporation and bylaws or comparable governing instruments howsoever designated, opinions of counsel, consents, underwriting agreements, specimen securities, guarantee agreements, indentures and other authorizing or governing instruments defining the rights of holders of outstanding and offered securities, debt or tax authorizations, material contracts or leases, management agreements, engineering or financial feasibility reports or studies, and such other similar documents as may be prescribed by the Commission shall be maintained by the issuer at a designated location for examination by the public.

"(g)(1) In case any part of a municipal securities distribution document, which at the time such part is first made available to the public, in final form, contains an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein not misleading, any person acquiring such security in the offering in which such distribution document was used (unless it is proved that at the time of such acquisition such person knew of such untruth or omission) may, either at law or in equity, in any court of competent jurisdiction (as defined in subsection (m)) bring an action against—

"(A) the issuer of such security (including any State);

"(B) each accountant, engineer, or appraiser or any other person whose profession gives authority to a statement made by him (hereinafter, collectively referred to as an 'expert') who has with his consent been named as having prepared or certified any part of the distribution document, or as having prepared or certified any report or valuation which is used in connection with the distribution document, but only with respect to the statement in such distribution document, report, or valuation, which purports to have been prepared or certified by such expert; and

"(C) each municipal securities underwriter with respect to such security;

except that the right of recovery under this paragraph shall be conditioned on proof that such person acquired the security relying upon such untrue statement in the distribution document or relying upon the distribution document and not knowing of such omission, but such reliance may be established without proof that such person read the distribution document.

"(2) Notwithstanding the provisions of paragraph (1), no person shall be liable as provided therein who shall sustain the burden of proof that—

"(A) in the case of the issuer, with respect to any part of the distribution document not purporting to be made on the authority of an expert, and not purporting to be a copy of or extract from a report or valuation of an expert, and not purporting to be made on the authority of a public official document or statement (other than a public official document or statement of the issuer), the issuer had, after reasonable investigation, reasonable ground to believe and did believe, at the time such part of the distribution document was first made available to the public, in final form, that the statements therein were true and that there was no omission to state a material fact required to be stated therein or necessary to make the statement therein not misleading;

"(B) in the case of a municipal securities underwriter, with respect to any part of the distribution statement not purporting to be made on the authority of an expert and not purporting to be a copy of or extract from a report or valuation of an expert, and not purporting to be made on the authority of a public official document or statement (other than a public official document or statement of the issuer)—

"(i) in the case of an offer or sale of municipal securities through competitive bidding, the underwriter had no reasonable ground to believe and did not believe at the time such part of the distribution document was first made available to the public, in final form, that the statements therein were untrue or that there was an omission to state a material fact required to be stated therein or necessary to make the statements therein not misleading; and

"(ii) in the case of an offer or sale of municipal securities otherwise than through competitive bidding, that the underwriter had after reasonable investigation reasonable ground to believe and did believe at the time such part of the distribution document was first made available to the public, in final form, that the statements therein were true and that there was no omission to state a material fact required to be stated therein or necessary to make the statements therein not misleading;

"(C) in the case of an expert, with respect to any part of the distribution document purporting to be made upon his authority as an expert or purporting to be a copy of or extract from a report or valuation of himself as an expert—

"(i) That the expert had, after reasonable investigation, reasonable ground to believe and did believe, at the time such part of the distribution document was first made available to the public in final form that the statements therein were true and that there was no omission to state a material fact required to be stated therein or necessary to make the statements therein not misleading, or

"(ii) such part of the distribution document did not fairly represent his statement as an expert or was not a fair copy of or extract from his report or valuation as an expert;

"(D) in the case of the issuer, a municipal securities underwriter, or an expert, with respect to any part of the distribution document purporting to be a copy of or extract from a report or valuation of an expert (other than himself), the issuer, a municipal securities underwriter, or expert had no reasonable ground to believe and did not believe, at the time such part of the distribution document became available to the public, in final form, that (i) the statements therein were untrue, (ii) there was an omission to state a material fact required to be stated therein or necessary to make the statements therein not misleading, or (iii) such part of the distribution document did not fairly represent the statement of the expert or was not fair copy of or extract from the report or valuation of the expert; and

"(E) in the case of the issuer, a municipal securities underwriter, or an expert, with respect to any part of the distribuion document purporting to be a statement made by an official person or purporting to be a copy of or extract from a public official document (other than an official person or public official document of the issuer), that the expert had no reasonable ground to believe and did not believe, at the time such part of the distribution document was first made available to the public, in final form, that (i) the statements therein were untrue, (ii) there was an omission to state a material fact required to be stated therein or necessary to make the statement therein not misleading, or (iii) such part of the distribution document did not fairly represent the statement made by the official person or was not a fair copy of or extract from the public official document.

"(3) In determining, for the purpose of paragraph (2) of this subsection, what constitutes reasonable investigation and reasonable ground for belief and the absence of reasonable ground for belief, the standard of reasonableness shall be that required of a prudent man in the management of his own property.

"(4) Notwithstanding the provisions of paragraph (1), no person, other than the issuer, shall be liable as provided therein if—

"(A) before the time the part of the municipal securities distribution document with respect to which liability is asserted was first made available to the public in final form, he had resigned or withdrawn from or had taken such steps as are permitted by law to resign or withdraw from, or ceased or refused to act in, every office, capacity, or relationship in which he was described in the distribution statement as acting or agreeing to act, and he had advised the Commission and the issuer in writing that he had taken such action and that he would not be responsible for such part of the distribution document; or

"(B) such distribution document was made available, in final form, without his knowledge for the purpose of the offer or sale of municipal securities, and upon becoming aware of such fact, he forthwith acted and advised the Commission, in accordance with subparagraph A), and, in addition, gave reasonable public notice that such part of the municipal seccurities distribution document

had been made available without his knowledge.

"(5) If any person becomes a municipal securities underwriter with respect to the security after the part of the distribution document with respect to which his liability is asserted has been made available, in final form, then for purposes of determining the liability of such person under paragraph (2) of this subsection, such part of the distribution statement shall be considered as having been first made available to the public, in final form, with respect to such person as of the time he became an underwriter. Each municipal securities distribution document shall be dated with the date on which it is first made available to the public, in final form, for the purpose of the offer or sale of municipal securities.

"(6) The action authorized under paragraph (1) may be to recover such damages as shall represent the difference between the amount paid for the security (not exceeding the price at which the security was offered to the public) and—

"(A) the value thereof as of the time such action was brought, or

"(B) the price at which such security shall have been disposed of in the market before action, or

"(C) the price at which such security shall have been disposed of after action but before judgment if such damages shall be less than the damages representing the difference between the amount paid for the security (not exceeding the price at which the security was offered to the public) and the value thereof as of the time such action was brought:

Provided, That if the defendant proves that any portion or all of such damages represent other than the depreciation in value of such security resulting from such part of the municipal securities distribution document with respect to which his liability is asserted, not being true or omitting to state a material fact required to be stated therein or necessary to make the statements therein not misleading, such portion of or all such damages shall not be recoverable.

"(7) In no event shall any underwriter (unless such underwriter shall have knowingly received from the issuer for acting as an underwriter some benefit, directly or indirectly, in which all other underwriters similarly situated did not share in proportion to their respective interests in the underwriting) be liable in any action or as a consequence of all suits authorized under paragraph (1) for damages in excess of the total price of the municipal securities offered or sold by him to the public.

"(8) In no case shall the amount recoverable under this subsection exceed the price at which the issue of municipal securities is offered to the public.

"(h) Any person who—

"(1) offers, or sells a municipal security in violation of subsection (c)(1); or

"(2) offers or sells a municipal security, by the use of any means or instruments of transportation or communication in interstate commerce, by means of a distribution statement or other written communication or oral communication, which includes an untrue statement of a material fact or omits to state a material fact necessary in order to make the statements in the light of the circumstances under which they were made, not misleading (the purchaser not knowing of such untruth or omission), and who shall not sustain the burden of proof that he did not know and in the exercise of reasonable care could not have known, of such untruth or omission, shall be liable to any person purchasing such security from him, who may sue either at law or in equity in any court of competent jurisdiction (as defined in subsection (m)), to recover the consideration paid for such security with interest thereon, less the amount of any income received thereon, upon the tender of such security, or for damages if he no longer owns the security.

"(i) The persons described in paragraphs (A) through (C) of subsection (g)(1) shall not be subject to any civil action for damages or rescission, or to any other civil action seeking a monetary recovery, brought by any person on account of an untrue statement of material fact in such municipal securities distribution document or an omission to state a material fact required to be stated therein or necessary to make the statements therein not misleading, other than the civil action provided for in this section.

"(j) Any person who shall make or cause to be made any statement in any annual report of event of default required by this section which statement was at the time and in light of the circumstances under which it was made false or misleading with respect to any material fact, shall be liable to any person (not knowing that such statement was false or misleading) who, in reliance upon such statement, shall have purchased or sold a security at a price which was affected by such statement, for damages caused by such reliance, unless the person sued shall prove that he acted in good faith and had no knowledge that such statement was false or misleading. A person seeking to enforce such liability may sue at law or in equity in any court of competent jurisdiction (as defined in subsection (m)).

"(k)(1) All or any one or more of the persons specified in subparagraphs (A) through (C) of subsection (g)(1) shall be jointly and severally liable in any action under subsection (g), and every person who becomes liable to make any payments under subsection (g) or (j) may recover contributions as in cases of contract from any person who, if sued separately, would have been liable to make the same payment, unless the person who has become liable was, and the other was not, guilty of fraudulent misrepresentation.

"(2) In any suit under this section, the court may, in its discretion, require an undertaking for the payment of the costs of such suit, including reasonable attorneys fees, and if judgment should be rendered against a party litigant, upon the motion of the other party litigant, such costs may be assessed in favor of such party litigant (whether or not such undertaking has been required) if the court believes the suit or the defense to have been without merit, in an amount sufficient to reimburse him for the reasonable expenses incurred by him, in connection with such suit, such costs to be taxed in the manner usually provided for taxing of costs in the court in which the suit was heard.

"(l) No action shall be maintained to enforce any liability created under subsection (g), (h), or (j) unless brought within one year after the discovery of the facts constituting the cause of action or after such discovery should have been made by the exercise of reasonable diligence and in no event more than three years after the security was offered to the public (or after the cause of action accrued in the case of an action under subsection (j)).

"(m) For purposes of this section, the term 'court of competent jurisdiction' refers to the courts specified in section 22(a) of the Securities Act of 1933, notwithstanding the provisions of section 27 of this title, except that a suit of action against an issuer of securities which are direct obligations of, or obligations guaranteed as to principal or interest by, a State or any political subdivision thereof, or any agency or instrumentality of a State or any political subdivision thereof, or any municipal corporate instrumentality of one or more States, may be brought and process in such cases may be served only in the district or districts within which the issuer is located.".

"(n)(1) Not later than ninety days after the enactment of the Municipal Securities Full Disclosure Act of 1977, the Commission shall establish a Municipal Securities Disclosure Advisory Committee (hereinafter referred to as the Disclosure Committee) which is representative of issuers of municipal securities, and which also includes appropriate representatives determined by the Commission to represent the public interest. The Commission shall solicit and take into account the recommendations of the Disclosure Committee and the recommendations of the Municipal Securities Rulemaking Board with respect to proposed regulations to implement the provisions of this section with respect to matters such as—

"(A) the extent to which the number or kind of disclosures required in distribution statements and annual reports should vary with different types of municipal securities and different types of municipal securities issuers;

"(B) the extent to which, if any, particular issues or kinds of issues of municipal securities and particular issuers or kinds of issuers of municipal securities should be exempt from either the distribution statement and annual report requirements and the circumstances which justify the application of simplified disclosure requirements for any particular issues, class of issues, issuers, or class of issuers;

"(C) the appropriate level, if any, for the exemption from certain distribution statement requirements based on a minimum dollar amount of a particular issue;

"(D) the appropriate manner in which the authority of the Commission to develop required forms of financial statements and uniform accounting principles should be exercised;

"(E) the appropriate relationship between the Commission and the States in the implementation and administration of laws enacted to achieve the purposes of this section;

"(F) the extent to which unusual circumstances or factors relating to a particular State or local government should be taken into account through individual exemptions or individualized treatment; and

"(G) assuring generally that the special needs of this municipal securities market and the special factors involving the interaction of Federal statutes and Federal agencies with State laws, State agencies, and State and local governmental issuers and securities are taken into account.

"(2) The Advisory Committee established under this section shall in all respects be subject to the Federal Advisory Committee Act.".

SEC. 3. Section 23(b)(4) of the Securities Exchange Act of 1934 is amended by adding at the end thereof the following new clause:

"(L) information concerning section 13A of this title, including (i) the effects of such section on the quality, uniformity, and availability of information required pursuant to such section, (ii) the effects of such section on municipal securities underwriting and distribution methods, and (iii) the impact of such section on the costs of State and local finance.".

THE MUNICIPAL SECURITIES FULL DISCLOSURE ACT OF 1977

SECTION-BY-SECTION ANALYSIS

The Municipal Securities Full Disclosure Act of 1977 would amend the Securities Act of 1933 (the "Securities Act") and the Securities Exchange Act of 1934 (the "Exchange Act") to provide for the limited regulation of municipal securities in order to (1) upgrade the quality and uniformity of financial and other information concerning state and local issuers of municipal securities, and

(2) clarify the respective responsibilities of the various participants of the municipal finance process for preparing, distributing and verifying the accuracy of the information. Section references are to sections of the bill unless indicated otherwise.

Section 1 would provide the short title of the bill, the Municipal Securities Full Disclosure Act of 1977.

Section 2(a) would amend the definition of "exempted securities" in section 3(a)(12) of the Act to provide that municipal securities would not be deemed "exempted securities" for purposes of new section 13A of the Act.

Section 2(b) would amend section 3(a) of the Act to provide definitions of terms used in proposed section 13A. The term "municipal securities underwriter" would be defined in a manner comparable to Section 2(11) of the Securities Act. "Municipal securities distribution document" would be defined to include distribution statements, offering circulars, official statements and similar sales documents used by or prepared for an issuer of municipal securities. As defined, documents which were not required by proposed section 13A (e.g., distribution documents) would nevertheless be subject to the civil liability provisions of the bill.

Section 2(c) would amend section 12(h) of the Act to provide the Securities and Exchange Commission with authority to exempt any issuer of municipal securities or class of issuers of such securities which meet the standards of section 12(h) from the provisions of proposed section 13A of the Act. The standards specified in existing 12(h) which the Commission would consider in granting specific or general exemptions include the number of public investors, the amount of trading interest in the securities, the nature and extent of the activities of the issuer and income or assets of the issuer. This section would also empower the Commission with the administrative flexibility necessary to classify issuers and prescribe different requirements for each class, a power the Commission will need in view of the variety of municipal securities.

Section 2(d) would amend the Act to add a new section 13A to the Exchange Act, entitled "Municipal Securities Disclosure". Essentially, the new section would require the preparation of annual reports and distribution documents by issuers of municipal securities and delineate and clarify the responsibilities and civil liabilities of issuers, underwriters and others involved in issuing or distributing municipal securities.

Section 13A(a)(1) would set forth the Congress' findings concerning (1) the importance of the municipal securities markets as a national asset; (2) the increasing dependence of state and local governments on those markets to borrow capital funds at reasonable costs in order to provide and maintain essential services and facilities; (3) the beneficial effects that improved and standardized accounting, auditing, and reporting of financial and other uniform disclosure will have on access to these markets on reasonable and economic terms by state and local governments; (4) the need to strengthen and perfect the basic mechanism of the market; (5) the substantial federal interest in the municipal securities markets because the issuance and distribution of municipal securities involves the use of interstate commerce and constitutes an important part of the current of interstate commerce; and (6) the need to clarify the respective obligations and liabilities of issuers and other participants in the municipal securities markets.

The subsection would also set forth the purposes of the bill: (1) to facilitate the marketing of municipal securities and reduce borrowing costs; (2) to protect investors by improving the availability, adequacy and uniformity of financial and other information concerning state and local governments; and (3) to stabilize the market for municipal securities by delineating the responsibilities of all participants (e.g., issuers, attorneys, accountants, underwriters, and others) involved in the preparation and distribution of such information and securities.

Subsection 13A(b)(1) would require issuers of municipal securities with more than $50 million in debt outstanding to prepare annual reports and reports of events of default in accordance with rules and regulations promulgated by the Commission. The method for computing the amount of municipal securities would be defined by the Commission. For example, the Commission could exclude, for computational purposes, outstanding amounts of short term municipal securities, such as tax anticipation notes.

Section 13A(b)(2) would require the annual report to be prepared within 150 days after the end of the preceding fiscal year and specify the contents of the report. The categories, scope and format of the informational content is extracted from the December 1976 edition of the Municipal Finance Officer Association's Disclosure Guidelines for Offerings of Securities by State and Local Governments, as well as from Schedules A & B under the Securities Act of 1933. Financial statements, prepared in such detail and form as the Commission may prescribe, would be included. For any fiscal year beginning on or after December 31, 1980, such financial statements would be required to be audited and reported on by an independent certified public accountant, a qualified independent or licensed accountant, or an examiner from an independent state agency authorized by law to perform such functions.

Section 13A(b)(3) would require reports of events of default to contain such of the information in the annual report as prescribed by the Commission.

Section 13A(b)(4) would provide the Commission with limited rulemaking authority to require additional information to be included in the annual reports and reports of events of default. The Commission's discretion would be limited to requiring information "similar" to that specified by new Section 13A(b)(2).

Section 13A(c)(1) would require an issuer that offers or sells municipal securities to prepare a distribution document prior to such offer or sale in accordance with rules and regulations promulgated by the Commission.

Section 13A(c)(2) and (3) would set forth the information to be included in the distribution statement. This information would consist of the data required in the annual report of the issuer together with specified additional information concerning the particular offering. These additional information requirements conform in scope and format to the applicable disclosure requirements specified in Schedules A and B of the Securities Act of 1933 and those in the December 1976 edition of the Municipal Finance Offers Association's Disclosure Guidelines for Offerings of Securities by State and Local Governments. The Commission would be able to administer this subsection in a flexible manner. It could, for example, prescribe varying and lesser disclosure requirements for certain categories of issues or issuers, e.g., smaller issuers. As another example, if the issuer had prepared an annual report for the fiscal year preceding the offer or sale of municipal securities, the Commission may permit the distribution document to consist of information concerning the particular offering and be accompanied by the issuer's annual report together with a statement of any material current developments required to make the information in such report not misleading. Alternatively, the Commission might prescribe the preparation of a brief distribution statement incorporating annual and other reports by reference. Still another alternative would be for the Commission to exempt an issuer from the requirements of the subsection upon a finding that disclosure fully adequate for the protection of investors is otherwise required to be included within the distribution document. The objective would be to minimize interference with the natural workings of the marketing system.

Section 13A(c)(4) would provide the Commission with specific rulemaking authority to require additional information to be included in the distribution statement. However, the Commission's discretion would be limited to requiring information "similar" to that required by new Section 13A(c)(2) and would not constitute a general grant of rulemaking authority.

Section 13A(c)(5) would provide the Commission with authority to classify distribution documents according to, inter alia, the size of the issue or issuer or the nature or circumstances of the security, issue or otherwise, and prescribe as to each class the form and content of the disclosure documents. Thus, for small issues of municipal securities (e.g., less than $5,000,000) the Commission could prescribe disclosure requirements less comprehensive than those for larger issues.

Section 13A(d) would provide exemptions from the distribution document and annual report provisions of the bill. Exemptions would be available for issuers in those states where annual reports and/or disclosure with respect to an offer or sale of municipal securities is required by state law or regulation which are substantially similar to the provisions of the bill. The exemption would be automatic and not subject to Commission approval. In those states which actively supervise local financings and where the state laws or regulations require disclosures which are substantially similar to the Federal disclosure standards, the requirements of this bill would have no effect. In addition, the bill would encourage the remaining states to take a more active role in the regulation and control the issuance of securities by their instrumentalities and political subdivisions.

This subsection would also provide statutory exemptions from the distribution document requirements of proposed section 13A for offers or sales of municipal securities which meet the criteria of various sections of the Securities Act: securities exchanged with securities holders (Section 3(a)(9)): securities issued in reorganizations by a court or government authority (Section 3(a)(10)); intrastate offerings (Section 3(a)(11)); or other transactions exempted by sections 4(1), 4(2), 4(3) and 4(4).

Section 13A(e) would provide the Commission with authority to prescribe the form or forms in which the required reports and distribution statements are to be set forth and the accounting methods to be followed in the preparation of financial statements.

Section (f) is intended to insure that reports and distribution documents are made available to investors and that investors are on notice of such availability. Issuers would be required to make the annual reports available to security holders at the issuer's expense and to others at their own expense. In the case of distribution documents, issuers would make the information available to municipal securities professionals in accordance with rules promulgated under present law.

The remaining subsections of the bill provide statutory definitions of the responsibilities and liabilities of issuers, underwriters and others engaged in the issuance and distribution of municipal securities. The purpose of the proposed civil liability pro-

visions is to clarify the obligations of issuers, experts and underwriters and others to make independent investigations concerning the completeness and accuracy of the information contained in municipal securities distribution documents, and to provide express liability on the part of issuers, experts and underwriters and others for damages suffered on account of incomplete or inaccurate information.

Section 13A(g)(1) would provide express civil liabilities for misleading distribution documents. Any person who acquires a municipal security in an offering and suffers damages as a result of a material misstatement in or omission from the distribution document could sue, either at law or in equity, the issuer of the security (including any state), any expert (e.g., accountant, engineer, appraiser or other professional) whose statements appear with their consent, and any municipal securities underwriter of the security. Officials and employees of issuers of municipal securities are excluded from the list of persons against whom suits are expressly authorized since such officials are already subject to civil and criminal enforcement actions by the federal government under the antifraud provisions of the securities laws, as well as to a variety of state and local laws which define their obligations to the governmental entity they represent.

Section 13A(g)(2) would establish the responsibilities of the various offering participants to assure the accuracy and truthfulness of the information contained in a distribution document which, if discharged, would provide defenses which could be raised in the event of suits by investors. Under subsection (g)(2)(A), the issuer would have principal responsibility to provide the necessary information and to assure the information so provided is not inadequate or misleading. The issuer would be liable for any material misstatements or omissions in any part of the distribution document prepared by or for it unless the issuers can prove that after reasonable investigation, it had reasonable grounds to believe the information was true and did not omit any material facts. This obligation would be constant for all types of securities. The "public official documents and statements" exception available under section 11 of the Securities Act would not apply to documents or statements of the issuer. Unlike corporate issuers, municipal issuers would not have absolute liability for any defective disclosure contained in the distribution document and would be liable only for failure to satisfy their duties to investors; they would not be guarantors of the accuracy of all information contained in the distribution document and could avail themselves of the statutory defenses.

Underwriters of a municipal security, pursuant to proposed subsection (g)(2)(B), would be subject to suit under different standards which reflect their ability to ascertain the accuracy and completeness of the information in question. The defenses available to underwriters would vary with the type of offering and security. In the case of a municipal security sold through competitive bidding, it would be unreasonably expensive and unduly disruptive to the efficient marketing of municipal securities, to expect underwriters to perform an independent investigations of the information furnished by the issuer to determine whether it is complete and accurate. Since competitive bidding keeps costs to the issuers low, it is highly desirable as a matter of public policy to preserve and encourage this marketing technique. Thus, an underwriter could reasonably rely on information prepared by the issuer and would have no liability if it had no reason to believe and did not believe the information was untrue or incomplete. This standard would apply principally to general obligation bonds which, by comparison to other types of instruments, are a primary source of credit for state and local governments and relatively risk-free since they are backed by the full faith and credit of the issuing entity.

The underwriter would have a more stringent liability standard for negotiated offerings. In negotiated deals, the problems of time and access to information do not exist. No other public policy or cost considerations override the importance of requiring underwriters to perform an independent and reasonable investigation of the accuracy and completeness of the information contained in a disclosure document. Transactions involving negotiated sales require a different standard of underwriter liability because (1) underwriters will generally have an opportunity prior to sale to conduct an independent verification, and (2) the security of the issue will generally depend on a specified source of funds (e.g., revenue bonds) and the information to be verified is generally more accessible and ascertainable.

Subsections 13A(g)(C), (D) and (E) would specify the responsibilities of other participants, including accountants, experts, and other such persons with respect to information they provide, which would be based on demonstrating that, after reasonable investigation, they had reasonable grounds to believe and did believe that the information provided by them was true and did not cmit any material fact.

Section 13A(g)(3) is identical to section 11(c) of the Securities Act of 1933 and defines the standard of reasonableness to be used in determining responsibilities and defenses under subsection (g)(2).

Section 13A(g)(4) would provide additional defenses to be raised by anyone other than an issuer and deal with the situation in which an expert or underwriter has resigned or withdrawn from such position before the municipal securities distribution document became final, and the situation where the distribution document was made available to persons for the purpose of offer or sale without the expert's or underwriter's knowledge.

Section 13A(g)(5) would provide a defense against misstatements or omissions which occurred and were corrected prior to the time any person became an underwriter for the security. It is essentially similar to section 11(d) of the Securities Act of 1933.

Section 13A(g)(6) and (7) would explicitly provide the measure of damages and the extent of underwriters' liability in the civil actions authorized in this subsection. It is virtually identical to section 11(e) of the Securities Act of 1933. In general, the liability arising from a false distribution document would be purely compensatory.

Section 13A(g)(8) would make the remedies established by proposed section 13A exclusive as to damage actions by investors. Specifically, it would provide that the persons who may be sued under subsection (g)(1) shall not be liable to any suit for damages or recovery on account of an untrue statement of material fact or an omission to state a material fact in a distribution document other than the civil actions provided for herein. This section is designed to provide certainty about obligations and liabilities and to permit the marketing and distribution of municipal securities in an orderly manner.

Section 13A(h) would provide express liabilities for misleading distribution documents in a manner comparable to section 12 of the Securities Act of 1933. Under this section, any person who offers or sells a security by means of a distribution document or oral communication containing untrue statements of material facts or omitting to state material facts required to be stated or necessary in order to make the statements made not misleading, through use of the mails or any facility of interstate commerce, would be liable to the person purchasing the security either:

(a) for the consideration paid for the security with interest less the amount of income received upon the tender of the security, or

(b) for damages if the purchaser no longer owns the security.

The purchaser could sue only his immediate seller at law or in equity in any court of competent jurisdiction (as defined in subsection (e)).

Section 13(i) would specify that the persons who can be sued under this section shall not be subject to any suit for money damages as a result of material misstatements or omissions in the distribution document other than the express civil actions provided herein. The section is designed to assure uniformity in obligations and liabilities, to permit the marketing of municipal securities in an orderly manner, to provide greater predictability and certainty and to preclude the development of conflicting judicial interpretation.

Section 13A(j) would provide express liabilities for misleading annual reports and reports of events of default in a manner comparable to Section 18 of the Securities Exchange Act of 1934.

Section 13A(k) would provide for joint and several liability for the persons who can be sued under proposed sections 13A (g)(1) and (i). It would provide that the persons who can be sued will be jointly and severally liable, and may recover contribution from any persons who would have been liable to make the same payment, "unless the person who has become liable was, and the other was not, guilty of fraudulent misrepresentation."

Section 13A(l) would provide a statute of limitations for suits authorized by the bill comparable to section 13 of the Securities Act of 1933.

Subsection 13A(m) would define the term "court of competent jurisdiction" for the purposes of proposed section 13A with reference to section 22(a) of the Securities Act of 1933 which provides for concurrent jurisdiction between the Federal courts and the state and territorial courts. Suits against an issuer of a municipal security may be brought, and process in such cases may be served, only in the district or districts within which the issuer is located.

Subsection 13(A)(n) would require the appointment of a Municipal Securities Disclosure Advisory Committee by the Commission to be composed of representatives of issuers of municipal securities. The Commission would be required to solicit and consider the recommendations of the Disclosure Committee on a variety of matters relating to the implementation of the bill, including: (A) the extent to which particular issues or issuers should be exempt from on subject to simplified procedures for the disclosure requirements of the bill; (B) the method by which the Commission should develop the forms for financial statements and uniform accounting principles; (C) the relationship between the Commission and the States in implementing and administering the disclosure provisions of the bill, and (D) assuring that the special needs of the municipal securities market and the special factors involving the interaction of federal statutes, federal agencies with state law, state agencies, and state and local governmental issuers and securities are taken into account.

Section 4 of the bill would amend section 23 of the Securities Exchange Act of 1934 to require the Commission to include in its annual report to the Congress information concerning proposed section 13A, including (1) its effects on the quality, uniformity and availability of information, (2) its effects on

underwriting and distribution methods, (3) the effects of the requirements on the costs of state and local borrowing.

Mr. JAVITS. Mr. President, I speak as a cosponsor of the Municipal Securities Full Disclosure Act of 1977. While I reserve the right to differ in respect of particular aspects of this bill as it goes through the committee process, I believe that it is a good-faith effort to assure investors of safeguards similar to those connected with corporate securities offerings.

In the wake of the New York City financial crisis, our Government is beginning to come to grips with the problems of urban policy and urban finance. We have in place now the Seasonal Financing Act, which assures the city of short-term loans from the Federal Government until June 30, 1978. Motivated in part by the public attention focused on the New York situation, the administration has announced that it will publish a comprehensive urban policy by January of 1978. I have every hope that in 1978 we can begin at last to come to grips with the grave urban problem that has developed over the last several decades.

The purpose of this legislation, by requiring more complete disclosure by municipal issuers and by setting standards of responsibility for both issuers and underwriters, is to make the financial markets more certain and more acceptable for municipal issues. At the present time, the only protection which investors and municipal issuers have is the antifraud provisions of the Securities Act, for when those acts are passed, municipal issuers were exempted from the disclosure requirements imposed on corporations. There is virtually no case law as to what constitutes fraud in the issuance of municipal securities, and it is conceivable that over a long period of time the case law could catch up with some reasonable standard of disclosure for municipal issuers. But in dealing with this problem through the legislative route, we make the conscious choice that, with the New York City crisis fresh in our minds, we must take positive steps to protect investors in what is at present a grey area of the law.

I might add that the problem has also become more pronounced in recent years because of the high marginal tax rates for many working Americans, and the increased attractiveness of tax-exempt securities for a wider class of Americans. So there is a substantial public interest to be served by legislation.

Although the New York City crisis has been the prime mover for this bill, it is also clear that the bill would help substantially in removing market uncertainties for smaller issuers. By setting standards of disclosure which should be made available with every offering, the bill would give underwriters and investors alike an opportunity to assess more realistically the risks associated with investment in municipal securities. I believe that, even with the expense to be incurred in complying with disclosure requirements, such a bill as this could ultimately reduce the overall costs of borrowing. Many State and local borrowers pay a premium for market uncertainty, a fact which we saw in bold relief at the time of the New York financial crisis. More disclosure means more certainty. It is even possible that with effective disclosure legislation, an individual credit problem in one jurisdiction would not shake the market as much as did the New York City crisis in 1975.

Recently many cities, including New York, have practiced various forms of voluntary disclosure, and these need to be implemented into and taken account of in any legislation. I am also acutely aware of the fact that although the bill at hand will aid—and should attract—municipal borrowers, it will not solve the problems of New York City which in itself presents virtually the archtype of urban problems generally. Nor can it replace the Federal seasonal financing program under which New York City currently operates. New York City's borrowing requirements for the year beginning July 1978, total approximately $4 billion, assuming that no major wage hikes or other cost increases inflate the city budget further. What is needed at a minimum, in my view, is the continuation of the Federal Seasonal Financing Act, or an equivalent substitute, coupled with a massive and comprehensive restructuring of our urban policy of which the bill at hand should be a part.

A future urban policy must correct the wrongs of the past several decades, wrongs which have encouraged businesses to leave central cities and have encouraged residents to live in suburbs, thus contributing to the deterioration of the central city tax base. As I believe that our urban problems are largely the problems of the country's older cities, a new urban policy should be especially geared to those conditions.

I am hopeful that the administration can bring out a comprehensive urban policy by the reported January target date, and I am encouraged also by reports that an urban development bank may become part of that program. It would be heartening if, in retrospect, we could call 1978 "The Year of the Cities." Thus, I commend the Senator from New Jersey for his initiative in introducing the bill at hand and hope that it portends a comprehensive approach to our urban problems over the months ahead.

ADDITIONAL COSPONSORS

S. 1251

At the request of Mr. MORGAN, his name was added as a cosponsor of S. 1251, the Universal School Lunch Program.

S. 1974

At the request of Mr. DOLE, his name was added as a cosponsor of S. 1974, a bill to amend section 553 of title 5, United States Code, to improve Federal rulemaking practice by creating procedures for regulatory issuance in two or more parts.

S. 2014

At the request of Mr. WILLIAMS, the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 2014, a bill to amend the Bankruptcy Act to provide a priority for certain debts to consumers.

S. 2156

At the request of Mr. NELSON, the Senator from Ohio (Mr. GLENN) was added as a cosponsor of S. 2156, the Minority Enterprise Venture Capital Act of 1977.

S. 2193

At the request of Mr. ANDERSON, the Senator from Montana (Mr. METCALF) and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of S. 2193, a bill to amend the Communications Act of 1934.

S. 2227

At the request of Mr. HARRY F. BYRD, JR., the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 2227, a bill to postpone the effective date of the carryover basis provisions of the Internal Revenue Code of 1954.

S. 2317

At the request of Mr. BAKER (for Mr. HEINZ), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Tennessee (Mr. SASSER), and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of S. 2317, the Trade Procedures Reform Act.

S. 2331

At the request of Mr. BAKER (for Mr. DOMENICI), the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 2331, a bill to amend the Indian Arts and Craft Board.

SENATE RESOLUTION 324

At the request of Mr. HOLLINGS, the Senator from Alabama (Mr. ALLEN), the Senator from Wyoming (Mr. HANSEN), the Senator from Maine (Mr. HATHAWAY), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Washington (Mr. JACKSON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from North Carolina (Mr. MORGAN), the Senator from Montana (Mr. METCALF), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Georgia (Mr. TALMADGE), the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from South Carolina (Mr. THURMOND), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) were added as cosponsors of S. Res. 324, resolving that there be no reduction of customs duties on textile or apparel or fiber products and that such products be excluded from the Tokyo Round of Multilateral Trade Negotiations now underway in Geneva.

ADDITIONAL STATEMENTS

PEACE QUEST MUST NOT BE ABORTED BY THREATS OF TERRORISTS

Mr. RANDOLPH. Mr. President, the historic meeting between Egyptian President Anwar Sadat and Israel Prime Minister Menahem Begin was witnessed by much of the world's population through the medium of television. It was a symbolic breakthrough in a situation which has inflamed the Middle East for almost three decades and poisoned the

wells of peace in that area for many centuries.

Perhaps this initial contact has raised expectations for peace far beyond the capacity of these two leaders to achieve. But now that the hand of friendship has been offered, the world community must assure that nothing be done that could jeopardize the movement.

The United States, the United Nations and all responsible outside interests must make it clear to those countries and terrorists groups which call for the assassination of Sadat and possible war against the Israelis that it will not happen. It must not happen.

The civilized world must ready itself to go beyond diplomatic niceties and economic wrist-slapping if such a cataclysmic event should occur. Terrorists must realize that there is no safe haven to slink back to after they have again ignited ancient hatreds. And nations which would harbor such sadists must know that they, too, will be held accountable by the world community.

An excellent analysis of the Israeli-Egyptian initiative and the probable consequences if the peace movement fails is offered by William Randolph Hearst, editor-in-chief of the Hearst newspapers. In his "Editor's Report," Mr. Hearst states:

The Carter administration should take the initiative in the U.N. by strongly condemning the Arab extremist elements who have called for the blood of President Sadat. Our U.N. Ambassador Andrew Young should lose no time in introducing a resolution to that effect.

Mr. President, this reasoned position should be endorsed by every individual uplifted by Sadat's mission of peace. That opportunity must not be lost to the threats and actions of extremists.

I ask unanimous consent that Mr. Hearst's concise and cogent editorial be printed in the RECORD, so that my colleagues can share his insight.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

MIDDLE EAST MIRACLE

(By William Randolph Hearst Jr.)

NEW YORK.—In a much calmer mood the entire world now waits to see what the next developments will be in Jerusalem and Cairo and, to a lesser extent, in the other Arab capitals. One of the most significant diplomatic steps of this century has been achieved with Egyptian President Anwar Sadat's visit to the ancient, holy city of Jerusalem, seat of the Israeli government. Now a feeling of optimistic anticipation is spreading among the world's leaders.

One feels that nothing will ever be quite the same again in the Middle East.

It was purely ceremonial, that meeting in the Knesset and, properly, both President Sadat and Israeli Prime Minister Menahem Begin spoke in generalities, but the sight of Anwar Sadat, leader of an ancient Arab country, standing beside the seven-branched candelabrum in the Jewish parliament, in itself made history. The greeting of Arab and Israeli with friendship was practically earth-moving.

There, in that holy city which houses the sacred shrines that mark the birth of three of the world's great religions, the dove of peace at last flew into the sunshine of hope.

Hope has been reborn—hope for a settlement of the bewhiskered Arab-Israeli dispute; hope that there can be peaceful coexistence among all peoples in the arid desert tinderbox of the Mideast "crossroads of the world."

It may be weeks, even months, before the full effect of Sadat's visit can be assessed. For one thing, we do not know yet what he and Mr. Begin discussed at their several private meetings. Both have declared that there were "negotiations" and that, it seems to me, suggests that compromises were at least discussed, albeit tentatively.

But that moves the entire situation off dead center where it had reposed for so long.

More than anything else the Arab-Israeli dispute has been distinguished by tedium. There have been 29 long years of more or less the same people saying more or less the same things with the dull monotony shattered only by the senseless explosions of war.

No wonder most of us had the feeling, rooted in the general inertia, that nothing could be done to change things in the Mideast. Even President Carter's strong efforts to impart some sense of motion to the situation slumped into the mush of lethargy.

That's the way it was until Anwar Sadat publicly proclaimed his recognition of Israel as a sovereign state and of its right to exist. That is something no Arab leader has done in the 29 years of the little nation's existence.

That alone altered the entire picture.

It is the adamant refusal of some Arabs to recognize Israel's existence that encouraged the spokesman for a militant Palestine guerrilla group in Lebanon to call for the assassination of President Sadat.

The voice of the terrorists comes from the dank cellar deep beneath the structure of civilization that mankind has labored so hard to build. It is inconceivable to me that in this day and age a thinking human would call for the assassination of a man who has embarked on a mission in quest of world peace.

Surely this must be the concern of the Carter administration and of our delegation in the United Nations. We cannot tolerate rank terrorism anywhere in the world. We cannot tolerate its exploitation and advocacy among civilized people.

The Carter administration should take the initiative in the U.N. by strongly condemning the Arab extremist elements who have called for the blood of President Sadat. Our U.N. Ambassador Andrew Young should lose no time in introducing a resolution to that effect.

Because I felt so strongly about this I called my old friend, New York's senior Senator Jacob Javits, to get his views, and was pleased to learn that he concurs completely.

"It is the sacred duty of all who are interested in peace in the Mideast to support and encourage the dialogue between Egypt and Israel," said Sen. Javits.

"It would be a terrible disaster for peace if President Sadat was to be the victim of terrorists.

"The U.N. should be called upon to condemn the issuance of incitements to overthrow and assassinate President Sadat, and the American government should take the initiative in sponsoring a resolution to that effect."

It is heartening that most Arab nations with the exception of Syria, Libya and Algeria responded civilly to Sadat's visit to Israel.

Jordan, which swings great influence in the region, has sided with Sadat. Jordan's minister of information, Adman Abu Oden, said that Sadat's visit had opened the road to progress toward a Middle East peace settlement.

"The visit of President Sadat has achieved its goals," he said. "The visit has broken the ice and removed the psychological barrier and brought fresh hope for resuming the Geneva peace conference within a new framework."

While there has been no official statement from the Jordanian government, this statement by the information minister seems to me to constitute endorsement of Sadat's surprise move.

Of the three Arab countries which bore the brunt of the wars with Israel—Egypt, Jordan and Syria—only Syria remains in a mood to continue the war. Syria is under great pressure from the Palestine Liberation Organization, Algeria and Libya—all three Marxist-oriented—to condemn and perhaps ostracize Anwar Sadat.

Sadat knowingly took a tremendous gamble. If his exciting mission to Israel smooths the path toward peace, he will have re-established his leadership among the Arab nations and have relieved his own country of a military burden its economy cannot sustain.

If nothing results from his visit, Sadat's position may be in grave danger. Worse, the risk of war will sharply increase.

But the leaders in Israel know this. Above all, Israel is a peace-loving nation, though she has not had one day of peace since her creation. The Israelis can be trusted, therefore, to do whatever is possible to strengthen President Sadat's hand.

It is the same hand that was stretched in friendship across a 29-year-old chasm of hostility.

LT. GEN. IRA C. EAKER, USAF (RET.) TO RECEIVE 1977 WRIGHT BROTHERS MEMORIAL TROPHY

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Arizona (Mr. GOLDWATER).

There being no objection, the statement was ordered to be printed in the RECORD as follows:

STATEMENT BY SENATOR GOLDWATER

Over the years I have developed deep respect and admiration for many leaders of our Nation's progress in the field of aviation. This extends to those men who have been prominent in both military and civilian aspects of this field. And high on my list of heroes is a man who has contributed tirelessly to both areas of our development—Lt. General Ira C. Eaker (Ret), one of the true pioneers of American aviation.

It is for this reason, Mr. President, that I take extreme pleasure in noting that on December 9, Lieutenant General Eaker will be the recipient of the highly-coveted 1977 Wright Brothers Memorial Trophy.

General Eaker was selected to receive the trophy in recognition of his significant contributions to the growth and progress of aviation in this country for the past half century. The citation for presentation to General Eaker reads: "To Ira C. Eaker for 60 years of significant public service: as pioneer flyer, military leader, industry executive and as a persuasive interpreter of aviation to the American people through the written and spoken word."

As many of the Members know, General Eaker, through his weekly newspaper articles and many speeches, has helped direct public thought and action to support U.S. aviation as an important part of the Nation's effort to promote world peace and national defense. His life spans the entire age of American aviation. He was commissioned in 1917 as a 2nd Lieutenant in the U.S. Army and received his pilot's rating at the age of 21. Following the first World War, he joined with other Army flyers engaged in aviation experimentation, setting world records which are now a part of American history. He established a world endurance record, piloted the first continental flight using refueling, and, in 1936, made the first transcontinental blind flight using instruments. In Europe

during World War II, he led the first attack by Army bombers in 1942. General Eaker retired from the Air Force in 1947 as a Lt. General and Chief of Air Staff.

In subsequent years, General Eaker has served as an executive with the Hughes Tool Company, as Vice President of Douglas Aircraft, and is presently Vice Chairman of the United States Strategic Institute. He helped develop a special program to hire the physically handicapped in the aircraft industry and has maintained an active interest in the epileptic rehabilitation program. In 1962, he started his present syndicated column which appears weekly in newspapers throughout the nation.

As a recipient of the Wright Brothers Trophy, General Eaker joins an impressive list of past winners, including such recipients as Charles A. Lindbergh, Lt. General James A. Doolittle and Dr. Igor Sikorsky.

The guiding criterion for this award is that the recipient be a living American citizen who, as a civilian, has rendered some personal and direct service as an officer or employee—federal, state, or local—with or without compensation. In addition to the foregoing, it is proper to consider other service activity of significant and enduring value to aviation in the United States.

Although the Trophy becomes the absolute property of each winner, a replica of the Trophy, accompanied by a plaque that shows the names of all its winners, occupies a place of honor in the Milestones of Flight Hall of the magnificent new National Air and Space Museum of the Smithsonian Institution. The trophy is a miniature silver replica of the original Wright Brothers airplane that flew at Kitty Hawk on December 17, 1903.

Following the death of Orville Wright in January of 1948, the Awards Committee of the Aero Club of Washington, a chapter of the National Aeronautic Association, conceived the idea of establishing a suitable award to honor the memory of both Orville and Wilbur Wright.

The National Aeronautic Association accepted their recommendation and established the Wright Brothers Memorial Trophy which is awarded by the President of NAA on the anniversary of the historic First Flight. The first trophy was given to Dr. William F. Durand in 1948; General Eaker is the 30th recipient to be acknowledged by the selection committee.

The Selection Committee is appointed annually by the President of the National Aeronautic Association and consists of seven members including the President, Chairman, Administrator, or a representative of each of the following: National Aeronautic Association, National Aeronautics and Space Administration, Air Transport Association, Aerospace Industries Association, American Institute of Aeronautics and Astronautics, Aero Club of Washington, The Aviation Press.

The Trophy is presented annually on or about the 17th of December (the anniversary of the First Successful Flight of an Airplane) by the President of the National Aeronautic Association at the Aero Club of Washington's Annual Wright Brothers Memorial Banquet.

In conclusion I should like to congratulate the Awards Board on their selection of a truly great American as a recipient of this year's presentation. I have known General Eaker for many years and have followed closely his observations and comments on the development of American aviation. As many of you know, I have, over the years, inserted many of General Eaker's articles and speeches into the Record because of their overriding importance to our deliberations. And I might say I have an intensive personal interest in this award since I myself was honored as a recipient in 1973. I can only say that the occasion was one of the proudest and most significant in my entire life.

CB RADIO IMPORTS

Mr. ANDERSON. Mr. President, the tremendous increase of CB radios imported into the United States has had a devastating effect on American manufacturers. American CB radios, which accounted for 21 percent of the domestic market 5 years ago, account for only 8 percent of the market today. Japan, which does not even permit CB use, has captured 92 percent of the U.S. market. In 1976, CB radio imports exceeded in dollar value the import value of television sets from Japan by nearly $200 million.

As a result, plant capacity utilization is at an all time low of 21 percent. The E. F. Johnson Co., which is the largest employer in Waseca, Minn., and which produces 80 percent of domestically manufactured CB radios, has been forced to lay off 45 percent of its employees and to close plants in other States.

On November 1, I submitted the following statement to the U.S. International Trade Commission during its hearing on this serious problem. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

I am deeply concerned about the effects of increased CB imports to the United States. CB imports have increased from 79 to 92 percent of domestic consumption within the last five years. Japan, which does not even permit CB use, has captured virtually all of the American market. In 1976 there was a threefold increase in the foreign share of the market resulting in a 42 percent reduction in the domestic CB workforce that year. I am sure you would agree that these figures are disturbing at the very least.

The E. F. Johnson Company is a Minnesota-based firm which produces approximately 80 percent of all domestically manufactured CB radios. This company imports only one CB which accounts for only 3 percent of its total sales. E. F. Johnson has provided jobs for Americans since 1923. In fact, E. F. Johnson is the largest employer in Waseca, Minnesota, with over 1,100 workers. This town of 7,000 has looked to the CB radio industry increasingly during the recent drought which seriously injured area farmers.

Today E. F. Johnson and the other domestic CB producers are in serious trouble. As a result of increased imports the number of American CB manufacturers has dwindled from more than 10 in the early 1960's to only 4 major producers today. The 4 combined account for less than 8 percent of domestic consumption despite the fact that fully 95 percent of world-wide CB production is absorbed by the US. market.

E. F. Johnson's net earnings plunged 95 percent in one year—from over $5 million in 1975 to only $260,000 in 1976. The company showed a loss of almost $4 million during the first half of 1977. E. F. Johnson will not be able to develop inovative new products or improve production techniques to help it compete if this trend continues.

Lost sales during the past several years have forced E. F. Johnson to reduce its workforce by 45 percent. 1,500 jobs in the communities E. F. Johnson serves have been lost, possibly for ever. 296 jobs have been lost in Waseca alone. An Iowa plant and a Florida plant have been closed. Plans to open a plant in Georgia have been cancelled.

Those who are out of work find themselves in a tight job market at a time when their training and skills are no longer in demand. Many have reached the point at which it is extremely difficult to find a job that can match their previous one. A new job too often means a loss of hard earned benefits and seniority and an income level below that on which they have come to depend. In a small town like Waseca there will not be enough other jobs to absorb those who are laid off. Many may be forced to move from their community.

This is a grave situation. I'm sure your investigation will show that the sad story is being repeated throughout the country. In as much as the United States International Trade Commision has the authority to recommend remedies, I hope that there could be some action that might relieve the burdens which unrestricted imports of CB radios are imposing on our workers and industries. I appreciate the complexities that you must consider in these matters, but I urge that you assign the greatest weight to the protection of American jobs.

NOTICE OF A DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 43, PARAGRAPH 4 PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

Mr. STEVENSON. Mr. President, it is required by paragraph 4 of rule XLIII that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics received a request for a determination under rule 43 from Arthur H. House, legislative assistant to Senator RIBICOFF, which would permit him to participate in a program cosponsored by a foreign organization, the Konrad Adenauer Foundation of the Federal Republic of Germany, and by the Center for Strategic and International Studies of Georgetown University, December 3–10, 1977. By letter of November 11, 1977, Senator RIBICOFF advised of his approval.

Based on the facts stated in Mr. House's letter of November 10, 1977, it has been determined that his participation in the program in West Germany, at the expense in part of the Konrad Adenauer Foundation, to discuss "national security policy and decisionmaking," is in the interest of the Senate and the United States. The proposed itinerary includes: Departure from Washington, D.C., December 3, for Bonn, West Germany; travel from Bonn to West Berlin on December 8; and return to Washington, D.C., on December 10.

ERIC SEVAREID'S FAREWELL ADDRESS

Mr. KENNEDY. Mr. President, yesterday evening, after 38 years with CBS, including the past 14 years as distinguihsed columnist on the "CBS Evening News," Eric Sevareid retired and delivered his final commentary.

In recent days, Mr. Sevareid has received a number of high tributes from his colleagues in journalism and from

many others in public and private life who, like myself, have enjoyed his remarkable style and learned from his wisdom and analysis. He was a master of the medium of television. He became so much of a national institution that his valedictory itself became something of a national event.

He grew up in television under the original genius of the medium, Edward R. Murrow, to whom he so often referred, as he did last night. But it is fair to say that in this case, the pupil became the equal of the master, creating his own niche of excellence in the unique field of television commentary, a sort of Walter Lippmann of broadcast journalism.

If there is a silver lining in his retirement, it is the knowledge that his work is not over, that he is merely shifting his uncommon talent to other horizons in television.

One of his finest "extracurricular" activities in recent years has been his series of lengthy broadcast conversations with distinguished Americans. Many of us will recall his extraordinary interviews—such as those with Hugo Black, Dean Acheson, and Eric Hoffer—and how Mr. Sevareid opened up for millions in the Nation a genuinely new dimension of the news, illuminating the real persons behind the headlines.

So I hope that Mr. Sevareid's retirement will be a long and productive and innovative one. He has more to give us and more to teach us about the ways the great power of television can and should be used to promote understanding in our complex modern society and world.

Mr. President, all of us wish Mr. Sevareid well in his retirement. I ask unanimous consent that his farewell commentary last night, as reprinted in this morning's Washington Post, may be printed in the RECORD.

There being no objection, the commentary was ordered to be printed in the RECORD, as follows:

COMMENTARY BY ERIC SEVAREID

By my time of life one has accumulated more allegiances and moral debts than the mind can remember or the heart contain.

So I cannot enumerate my betters, my mentors and sustainers during so many years of trying to use, with sense, this communications instrument, as unperfected as the persons who use it. But they know that I know who they are.

Many are gone, including the man who invented me, Ed Murrow. Some died in the wars we were reporting. I have gone the normal span of a man's working life, rather abnormal in this calling, and it's a happy surprise.

We were like a young band of brothers in those early radio days with Murrow. If my affections are not easily given, neither are they easily withdrawn. I have remained through it all with CBS News, and if it is regarded as old-fashioned to feel loyalty to an organization, so be it.

Mine has been, here, an unelected, unlicensed, uncodified office and function. The rules are self-imposed. These were a few:

Not to underestimate the intelligence of the audience and not to overestimate its information.

To elucidate, when one can, more than to advocate.

To remember always that the public is only people, and people only persons, no two alike.

To retain the courage of one's doubts as well as one's convictions, in this world of dangerously passionate certainties.

To comfort oneself, in times of error, with the knowledge that the saving grace of the press, print or broadcast, is its self-correcting nature. And to remember that ignorant and biased reporting has its counterpart in ignorant and biased reading and listening. We do not speak into an intellectual or emotional void.

One's influence cannot be measured. History provides, for the journalist, no markers or milestones. But he is allowed to take his memories.

And one can understand, as he looks back, the purpose of the effort and why it must be done.

A friend and teacher, the late Walter Lippmann, described the role of the professional reporter and observer of the news in this manner:

"We make it our business," he said, "to find out what is going on, under the surface and beyond the horizon; to infer, to deduce, to imagine and to guess what is going on inside—and what this meant yesterday and what it could mean tomorrow. In this way we do what every sovereign citizen is supposed to do but has not the time or the interest to do it for himself. This is our job. It is no mean calling and we have a right to be proud of it and be glad that it is our work."

In the end, of course, it is not one's employers or colleagues that sustain one quite so much as the listening public when it be so minded.

And I have found that it applies only one consistent test—not agreement with one on substance—but the perception of honesty and fair intent. There is, in the American people, a tough, undiminished instinct for what is fair. Rightly or wrongly, I have the feeling that I have passed the test. I shall wear this like a medal.

Millions have listened, intently or indifferently, in agreement and in powerful disagreement. Tens of thousands have written their thoughts to me.

I will feel, always, that I stand in their midst.

This was Eric Sevareid in Washington. Thank you and goodbye.

WATERWAY USER CHARGES: THE REPORT OF THE CONGRESSIONAL BUDGET OFFICE

Mr. STAFFORD. Mr. President, the Congressional Budget Office recently completed a study entitled "Financing Waterway Development: The User Charge Debate." This review is but one of many recent studies on this issue. As I believe that it would be helpful to my colleagues if they reviewed CBO's analysis of the need for greater balance in our national transport system, I ask unanimous consent that the summary and the conclusions of this CBO study be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FINANCING WATERWAY DEVELOPMENT: THE USER CHARGE DEBATE

SUMMARY

The Federal Government builds, operates and maintains a network of inland waterways which barge operators use to carry about 11 percent of domestic freight. While there is general agreement that federal development and operation of waterways should continue, there has been recurring debate in the Congress on how these activities should be financed. Currently, federal expenditures are financed with general revenue. A frequently proposed alternative is to have direct waterway users pay at least part of the federally-incurred costs. User fees could be paid via a fuel tax, a tonnage fee, or some similar mechanism.

In the 94th Congress, the debate on the authorization for a Corps of Engineers project near Alton, Illinois rekindled interest in the issue of how to finance the waterways. As a result, the Senate Committee on Environment and Public Works is now considering an Alton authorization and user charge package (S. 790) which would both authorize a single-lock project at Alton and establish a system of user fees. The Carter Administration will also propose a user charge in the form of a fuel tax.

Major issues

Resolution of the question of waterway user charges requires examination of several key questions. The Congressional Budget Office has analyzed the available studies bearing on these questions including two important recent investigations of the likely impact of user charges on the barge industry. The major issues and the CBO findings on these issues include:

Issue: Do domestic waterway carriers now receive special treatment, particularly when compared with their competitors—railroads, trucks and pipelines?

Findings: Barge operators are the only domestic freight carriers who pay no part of the expense of building or maintaining their rights of way. Federal subsidies are equal to about 41 percent of all barge revenues, compared with 3 percent for railroads, 1 percent for trucking companies, and no subsidy at all for pipelines.

Issue: Would reducing the existing subsidy through introduction of user charges severely damage the financial position of waterway carriers?

Findings: A unique aspect of this year's debate on waterway user charges is that, for the first time, detailed studies are available of the impact of user charges on barge companies. One study concludes that the barge industry would lose 10 percent of its existing traffic to competitors if fees were charged for access to specific waterways. The fees would vary according to the costs of operating and maintaining each waterway segment. If fees were uniform across segments the study concludes that traffic losses could reach 12 to 15 percent. A second study estimates that the diversion of cargo would range from 7.1 percent to 9.5 percent. Both studies assumed fee levels that would cover all costs of operation and maintenance but none of the costs of construction. Both studies also assumed that railroads and other competing carriers would not raise their rates by amounts equal to the increases in barge rates following introduction of user charges.

The converse of these findings, of course, is that the waterway subsidy makes it possible for barge operators to hold rates at levels low enough to divert between 10 to 15 percent of cargo that might otherwise move by rail, truck, or pipeline.

Issue: Can the subsidy that gives barge operators a competitive edge over rail, truck, and pipeline be justified on secondary grounds such as energy efficiency and promotion of economic development?

Findings: Waterway representatives argue that barge transportation should be encouraged by a subsidy because it is more energy efficient that its competitors. Relative energy use varies greatly in specific circumstances because of differences in size, speed, and type

of shipments for barges, railroads, pipelines, and trucks. In the eleven reports surveyed by CBO, estimates of energy use for domestic water transportation generally fell in the range of 500 to 700 BTU's per ton-mile, while the usual range for rail freight was 300 to 700 BTU's and 400-500 for oil pipelines. Estimates of fuel use by truck is significantly greater than those for other modes.

Waterway interests also argue that subsidized barge transportation serves as a magnet for industrial location and thereby as a stimulus for economic development. However, the locational inducement of subsidized waterways is offered along some 15,000 to 25,000 miles of water-side areas in both large and small, rich and poor communities. Such a pervasive inducement cannot precisely lure industry to areas most in need of economic development. At best, the subsidy can be viewed as providing a locational advantage to all water-served areas. If these areas are generally depressed, the subsidy has the potential of serving as a developmental tool for this large region by attracting industries from other sections of the country. Unless this regional economic development is the goal, other policy tools such as business loans and public infrastructure grants are more obviously precise than a nationwide subsidy.

CONCLUSIONS

Inland water transportation is the only domestic, intercity freight mode whose users do not pay any of the costs of building and maintaining their rights-of-way. As a result, barge rates are significantly lower than would otherwise be the case. Lower freight rates that are made possible by federal subsidies have resulted in less traffic and lower revenues for railroads, pipelines and trucks. Barge transportation is not the only freight mode that is subsidized, but the Federal subsidy provided to inland waterways is substantially larger as a percentage of revenues than those of its closest competitors.

The waterway subsidy can be justified if it is an effective way to achieve national goals. A waterway subsidy can be used to pursue the goals of energy conservation and economic development. However, it is not clear that a nationwide waterway subsidy is a sufficiently precise policy tool for achieving these goals. Furthermore, there are other ways to achieve these goals.

The waterways subsidy lacks precision for energy goals because it encourages all barge transportation, whether or not it is more energy efficient than other systems. The waterway subsidy is not a precise economic development tool because it is not used selectively to aid communities that most need development.

The alternative policy for energy conservation is to allow low fuel costs reflected in low rates to naturally attract shippers to the fuel-efficient mode. For economic development, policy tools such as business loans and grants than can be targeted to areas most in need could be used as an alternative to the waterway subsidy.

For the first time, detailed studies are available that indicate the magnitude of the impact of user charges designed to recover some federal costs. Based on these studies, it is likely that limited waterway cost recovery will mean traffic diversions from barge operators from 10 to 15 percent. Traffic diverted to other modes because of user charges could force the barge industry to reduce the number and size of barge lines. The expected impact of user charges on consumer prices appears to be negligible.

If the Congress decides to impose user charges, several specific types are available. They key issue in the choice of a user charge is whether it should be nationally uniform or varied by river segment. According to DOT, a segment specific charge probably would drive all traffic from seven low traffic river segments; the remaining segments would not be severely affected. A uniform fee would more evenly spread the potential waterway traffic losses across all river segments.

COMMITTEE PRINT ON SMALL BUSINESS AND THE QUALITY OF AMERICAN LIFE

Mr. NELSON. Mr. President, as chairman of the Select Committee on Small Business, I would like to inform the Senate of a committee print entitled "Small Business and the Quality of American Life" which has just been published.

In addition to overseeing the operations of the Small Business Administration, the committee has been mandated by the Senate "to study and survey by means of research and investigation all problems of American small-business enterprises."

The print is an anthology of source materials which the committee has found valuable in the course of such research during the past 30 years. The print contains approximately two dozen articles, studies, statements and statistics by such distinguished authors as C. Wright Mills, Adm. Hyman Rickover, Ralph Nader, Walter Adams, and Irving Kristol. These commentators conclude that small business directly and measurably improves the daily lives of individuals and communities, and makes substantial contributions to the most valued economic and social objectives of this country: freedom, diversity, self-reliance, self-respect, efficiency, competition, and adequate reward for risk-taking and hard work.

I ask unanimous consent that the table of contents to this committee print be set forth following my remarks, so that those who are concerned with this subject can be informed of the wealth of material which is available to them. The print also contains an interpretive introduction and a bibliography of small business materials from 1969 to 1976.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

THE VALUE OF SMALL BUSINESS—YESTERDAY, TODAY, AND TOMORROW

Mr. NELSON. Mr. President, historically, most of our citizens recognize that, with the exception of a few outposts of British merchant houses, every business started in this country was a small business, and that the climate of enterprise served our youthful Nation well, in terms of both material wealth and national character.

The print's introduction cites Thomas Jefferson, at the threshold of the American experiment, commenting upon the value to democracy of the self-reliant farmers and small landowners who were independent enough to sustain free institutions.

In the early years of the Republic, deTocqueville was impressed by the "multitude of small undertakings" by which the new arrivals to this land were making their way up the economic ladder.

But America grew and spanned a continent. Big markets gave rise to big corporations. Now, in an era of giant multinational corporations, some people are questioning whether small business is still relevant.

The scholars in the committee volume have shown, and I strongly believe, that small business will be even more important to our Nation's future than it has been in years past.

Small, family and independent businesses remain the most economically efficient producers of the most basic commodities—food and shelter. They continue to predominate in the distribution trades. They consistently account for more than half of the new inventions and innovations in heavy and light industry, trade and consumer goods. They make competition an actuality, in products, services and prices. The new technological firms of today also account for a disproportionate share of job formation, economic growth and new overseas sales, say the professionals whose studies are included in this volume.

Small business—in its many facets—is thus essential to the American economy.

But, its worth for the present and the future runs deeper than that. As indicated by editorial writer, Colman McCarthy, in the lead article of this print:

When I go with my boys into these Washington, D.C., small shops, I know they will get the kind of service and products that the oversized and depersonalized chainstores can't care about. But more crucial, the children are exposed to grounded and proud craftsmen who are happy in their work.

Ownership of a small business satisfies some of the most strongly felt longings of the human personality and thus serves the needs of producers, consumers, and society in general. And the yearly statistics on business formations demonstrate that the "American dream" of business ownership has lost none of its luster.

Several of the article in this print tell us that issues of size and scale have reached a critical juncture because of bigness in this country and elsewhere in the world. Many Americans feel diminished, frustrated, and even threatened by the massive impersonal, inflexible, and uncaring institutions on which our daily lives are dependent. Big business, big labor, big schools and big government are increasingly "facts of life" with which we must cope.

Small business preserves something that is even more precious for the future than for the present, the "human scale" in our common pursuits.

Other commentators included in this print, such as Carter Henderson of Princeton University—document No. 4—and Dr. E. L. Schumacher, author of "Small is Beautiful"—document No. 12—especially those writing in recent years, stress the value of small business in pioneering techniques of producing renewable energy from the sun and wind; developing intermediate technologies valuable to the less-developed world as well as the less-favored areas of our own country; taking up the slack in structural unemployment; compatibility

of smaller enterprise with the Earth's ecology; and facilitating decentralization into smaller, more manageable, and more personal economic and governmental units.

Kurt Mayer—document No. 19—who examines the reality rather than the promise, sums up by stating that in modern society:

> The small businessman shares his predicament with the modern industrial worker, with the white-collar clerical employee, and even with the vast majority of corporate executives, all of whom have no chance to fulfill themselves as responsible personalities.

In Mayer's opinion, any genuine solution to the problems of small business must come through a general effort to "solve the burning questions of human dignity, of status and function in our industrial culture as a whole."

It is difficult to conceive of a more relevant agenda for public policy consideration than the issues raised by these authors.

SMALL FIRMS STRONGER IN SUPPORT OF THE COMMUNITY

Three critical studies contained in the print—Mills and Dr. Walter R. Goldschmidt in the 1940's and Prof. Jon G. Udell of the University of Wisconsin in 1969—establish that our towns and cities enjoy measurably higher benefits from the presence of small businesses with local owners than from comparable economic activity on the part of big corporations which are headed by executives who are transient and nationally oriented.

Professor Udell found that when locally owned companies are acquired by conglomerates, three-fourths of the companies shift their patronage away from local banks, local accountants, local lawyers, and local suppliers. Charitable gifts of these acquired businesses grew only half as fast as those that continue to be owned by persons living in the community.

Mills and Goldschmidt found that in cities characterized by smaller enterprise, infant mortality was lower, health care was better, public expenditures on libraries and education were substantially greater, housing was superior, church membership and activity was visibly higher and news coverage was wider.

The key finding of these authors, in the words of the Mills' study, is that the differences between communities:

> . . . in the cases studied (were) due largely . . . to the domination of big business on one hand and the prevalence of small business on the other . . . that in (small business cities) civic spirit was more pronounced, more widely shared and more active. The economically independent middle class was more abundant (and this group, usually took the lead in the voluntary management of civic enterprises.

At a time when we are searching for ways to revitalize neighborhoods and cities, these authors remind us just how many of the values that we hold as central to the American way of life are embodied in an independent small business community.

THE PROBLEMS OF SMALL BUSINESS

If it is true that small business is not a part of our economic and social problems; but on the contrary can play a very significant part of the solution to these problems, why is not small business in the forefront of national policy?

Irving Kristol's commentary of November 13, 1975 is that the small business owner is "the new forgotten man" of American society. He observed that—

> It is astonishing and dismaying how little interest there seems to be in the condition of small business in the United States today.

In the teeth of the multitude of advantages to larger companies in advertising, credit, personal recruitment, small business—according to SBA's definition—still manages to account for 97 percent of all U.S. enterprises, 55 percent of all private employment, 48 percent of the business output, 43 percent of the GNP and over half of all innovations and inventions. This is remarkable testimony to the persistence of American desire for the kind of economic independence and psychological rewards that business ownership can provide.

However, the tragedy is that the position of these entrepreneurs is being undermined by the governmental indifference, and neglect over the years. This creates a host of specialized problems to small business in question of fair and equitable treatment, and makes other inherent problems worse. The following examples are outlined in the introduction to the print:

First. Taxes—the tax structure had been frozen for a generation, until initial steps to recognize small business problems in the last 3 years.

Second. Overregulation—a series of three dozen consumer and environmental regulations since World War II, which have treated the local machine shop no differently than General Motors, have required costly alterations in small business plant, equipment, and operations. These rules have often been administered in ways that are insensitive to the distinctions between businesses of different sizes.

Third. Paperwork—reporting to the Government has grown geometrically during the last three decades, with almost no effort to stem or reverse this suffocating trend. The ERISA—Pension Reform Act—report forms of 1975 which were later withdrawn, are a classic case of paperwork gone out of control.

Fourth. Lack of small business representation on Government advisory bodies has been chronic at the level of rules, regulations, and forms. When we first looked into the major advisory body on business forms, there was one small business representative—having 45 employees and $1 million in sales—and 12 giant corporations averaging over $5½ billion in sales and over 167,000 employees.

Fifth. Exclusion of small business from major Government policymaking—one illustration from the energy field is that the Congress amended the legislation setting up the Energy Research and Development Administration to provide for consultation with the Small Business Administration on new energy projects susceptible to small business contributions, such as solar energy. In formulating this program, ERDA consulted with 14 agencies, but made no approach to the Small Business Administration.

Sixth. Disappearance of small and new firms from the Nation's securities markets—Between 1972 and 1976, first-time stock offerings—by new, young, or mature enterprises going to the public market for the first time—fell as a proportion of SEC-registered stock offerings from 62.05 to 16.37 percent.

Registered stock offerings by firms with less than $5 million in assets dropped from a high of 698 in 1969 to a low of 3 in 1975, and only 41 for the 3 years, 1974 through 1976. Less formal "regulation A" stock issues shrank from 817 in the prerecession year of 1973 to 240 in 1976. A recent survey of underinvestment in the U.S. economy in the October 17, 1977, Business Week magazine states:

> Access to the capital market has been pretty much open only to the nation's big companies for years now. And some contend that the top 1,000 or so corporations—the ones that can borrow—have been less innovative and less willing to commit funds to risky projects than they have in the past. The smaller companies, the argument goes, are willing to take the risks but cannot get the money.

A fair number of these difficulties could be at least mitigated if Government—at all levels—would pay more attention to the small business community.

It is for these reasons that the Small Business Committee proposed, and the Senate approved—in Senate resolution 105 earlier this year—that the overall approach to the complex, interrelated obstacles faced by new and small businesses would be a "White House Conference on Small Business." Such a conference could raise the visibility of these issues by attracting the best experts from business, small and large, labor, the economics profession, the universities, and government. Its report could carefully outline the problems and could produce a long-term 10- or 20-year blueprint for action by the executive branch, Congress, State and local governments and others to move against these difficulties in order to preserve a climate in free, private enterprise in this country.

SIGNIFICANCE OF THE PRINT

We of the committee regard this publication as significant because it puts together in one place so many of the pieces of the small business picture. The materials are rich in facts, figures, and insights for those concerned with the relationship of business enterprise to the fundamental values of our society. We hope it might serve as a source of research materials for a long time to come, as well as a guide for those who wish to pursue future inquiries into these vital areas. In our view, these thoughtful studies over a 30-year-period make the case for small business in a persuasive

manner, providing data and analysis to support intuitive feelings of many Americans that small business is vital to the free enterprise system and the American way of life.

The committee's introduction also contains a warning that entrepreneurs cannot exist forever in the face of adverse public policies, and that it is becoming ever harder to enter the system. Thus, our Nation can lose the benefits of small enterprise to our economy and society in the future. After reading these studies, I believe that many will conclude that if smaller business declines, the quality of our American life will suffer.

Accordingly, the small business community and all of those within government who are concerned with these matters, must redouble their efforts to enable new, small, local, independent businesses to contribute to the Nation's future as they have done so conspicuously to its past.

A limited number of copies of the print are available upon request to the committee office at 424 Russell Senate Office Building, Washington, D.C. 20510.

NOTICE OF A DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 43, PARAGRAPH 4 PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

Mr. STEVENSON. Mr. President, it is required by paragraph 4 of rule XLIII that I place in the CONGRESSIONAL RECORD this notice of Senate employees who propose to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics received a request for a determination under rule 43 on behalf of three staff members from Representative RICHARD BOLLING, chairman of the Joint Economic Committee. On the basis of the facts stated in his letter of November 4, 1977, it has been determined that the participation of these staff members in an educational exchange program in Taiwan, November 25 to December 2, 1977, at the expense of the Sino-American Cultural and Economic Association, to exchange views with Chinese officials on various economic subjects, is in the interest of the Senate and the United States. The proposed itinerary includes: departure from Washington, D.C., November 25 for Taipei, Taiwan; and return to Washington, D.C. on December 2.

Following are the staff members of the Joint Economic Committee who will participate in this program: Richard Kaufman, John Karlik, and Stephen Watkins.

"HOW IT ALL BEGAN": FINE ARTICLE BY FRANK JETER, JR.

Mr. HELMS. Mr. President, agriculture continues to be the backbone of North Carolina's economy as it was when our forefathers began growing tobacco and corn before the American Revolution. We are very fortunate that American farmers instituted sound soil and water conservation practices. If farmers had not taken responsible action to preserve America's natural resources, the United States would not be the most productive agricultural country in the world that it it is today.

An article in the August edition of Soil Conservation written by my friend, Frank H. Jeter, Jr., which is entitled "How It All Began" made me proud when I was reminded that my native State of North Carolina was the home of the first conservation district.

In 1937 the farmers of Anson County, N.C., formed the first conservation district to fight erosion that was plaguing farmland in the Tarheel State's southern Piedmont.

Mr. President, I ask unanimous consent that the article "How It All Began" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW IT ALL BEGAN

(By Frank H. Jeter, Jr.)

When 30 Anson County, N.C., landowners started circulating a petition to try to improve their own and neighboring land in the late 1930's, they had no thought of making history. They were simply interested in fighting the erosion plaguing farmland in North Carolina's Southern Piedmont.

The petition's sponsors sought support for establishing a conservation district, defining its boundaries, and holding a referendum of landowners to determine their sentiments about the matter.

Upon completion, the petition was mailed to the State Soil Conservation Committee, itself recently established by the 1937 North Carolina General Assembly following passage of the State's Soil Conservation Districts Law.

The committee, after examining the petition, approved a referendum. The election left no doubts about how interested Anson County farmers were in improved erosion control. By a lopsided margin of 300 to 1, the establishment of the district was approved. An enterprising reporter for the Charlotte Observer sought out the lone farmer voting against the district and discovered that "the one negative voter, after the program was explained, changed his opinion."

On August 4, 1937, North Carolina Secretary of State Thad Eure made history when he signed the certificate establishing the Brown Creek Soil Conservation District (SCD) as the first in the State, the Nation, and the world. The actual charter was issued 10 days later.

The event rated large headlines in the State's daily and weekly press, and the news soon spread beyond the State. A newspaper article of the time written by William D. Lee, extension soil conservationist of North Carolina State, gave an apt, still timely definition of a soil conservation district and a clear, concise statement of its potential. Where the author fell short was in his prediction that the district would do away with government subsidies. He failed to foresee the need for State and Federal funds to adequately control erosion.

Once started, the district flourished as it does to this day. First Memorandums of Understanding were worked out with the Forestry Division of the North Carolina Department of Conservation and Development and with the Soil Conservation Service. Hugh Hammond Bennett, SCS Chief, had helped create the district movement including development of model enabling legislation, which was quickly enacted by a number of State legislatures across the Nation.

The first conservation plan in the first district was on the farm owned by the family of Dr. F. Y. Sorrell. It involved 246 acres and included plans for crop rotation on 121 acres; terracing on 114 acres; waterways (also identified as "meadow strips") on 2.7 acres; one wildlife planting; and considerable land planted in trees.

Another early conservation plan, on 248 acres belonging to J. M. Liles, included 180 acres of improved pasture, 159 acres in rotation, 150 protected by terraces, and an impressive 2,000 feet of border plantings to shelter and feed wildlife.

C. D. Griggs is the present chairman of the Brown Creek SCD board and a farmer in the county. His father was one of the first cooperators and he has nothing but praise for the district's accomplishments through the years.

"I don't know what we would have done without the district," he said. "The people were desperate in 1937, watching their land wash away, and not knowing where to turn or what to do about it.

"The district has been here to guide and direct us," said Griggs, "and, as a result, the face of the land has been changed and safeguarded. Cotton no longer is the major crop, and there has been a great deal of conversion to woodland, particularly loblolly pines."

No-till farming is very popular today, and the farmers' economic prospects are vastly improved, he says.

The farmers of Anson County in 1937 undoubtedly felt gratified that a concerted program to curb severe soil erosion on their land was underway. But they may not have been aware of the historic significance of the step they had taken together.

LEGISLATION WITH FAR-REACHING RAMIFICATIONS

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent to add the distinguished Senator from Texas, Mr. TOWER, as a cosponsor of S. 2227, which was introduced by myself; the Senator from Kansas, Mr. DOLE; the Senator from Wyoming, Mr. HANSEN; the Senator from Nebraska, Mr. ZORINSKY; the Senator from Colorado, Mr. HASKELL; and the Senator from Indiana, Mr. LUGAR.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, S. 2227 would defer for 2 years, from December 31, 1976, to December 31, 1978, the carryover basis provisions of the 1976 Tax Reform Act.

Carryover basis operates so that the property of a decedent retains its original cost basis when it is passed to the decedent's heirs, a dramatic departure from pre-1976 law whereby the basis of property acquired by a person was stepped-up to its fair market value at the individual's date of death.

Many of my colleagues, I am sure, may not now realize the far-reaching ramifications of carryover basis as it was never considered by the Senate or the Senate Finance Committee.

In 1976, the Senate tax bill did not contain carryover basis, nor was carryover basis a part of the initial House bill which was sent to the Senate. This far-reaching concept was drafted by a conference committee and sent back to both the House and Senate as part of the overall conference report.

Thus, there were no Senate hearings prior to enacting this far-reaching change in the tax law.

I have now had an opportunity, as chairman of the Subcommittee on Taxation and Debt Management of the Senate Finance Committee to become more familiar with carryover basis during hearings conducted in July and recently in October and November.

The testimony presented in these hearings was startling. The hearings show that tax revisions in 1976 to provide tax relief for small estates and to assist farmers and small businessmen have been counteracted by the carryover basis portion of the tax law.

Carryover basis creates severe liquidity problems for small businesses and farms and places a tremendous recordkeeping burden upon taxpayers.

In addition, carryover basis is an incredibly complex part of an already complex tax law. The administrative burdens and complexity of the law make it totally unworkable.

The cost to taxpayers is not just in terms of tax dollars which must be paid but also professional fees and recordkeeping costs necessary to comply with the law.

It is my belief that carryover basis should be repealed. However, if we are to retain carryover basis, extensive revisions are necessary to make carryover basis fair and capable of being administered.

One example of the current unfairness of the present carryover basis law is the so-called "fresh-start adjustment."

The effect of the fresh-start adjustment is to discriminate against assets which are not marketable and do not have a readily ascertainable fair-market value as of December 31, 1976. Because these nonmarketable assets must apply the fresh start formula, which prorates the appreciation in an asset over the life of the asset, the basis as of December 31, 1976, for these assets is consistently declining the longer the taxpayer owns an asset. A taxpayer is caught in the situation that the longer he lives the lower will be his cost basis for pre-1976 assets and the higher will be his tax.

The law is also currently unworkable because of the severe recordkeeping problems which it presents. Persons who had no notice that records would be required, now must search for basis information for assets which were acquired many years in the past, when the old law did not require such information.

Furthermore, the person who owned the assets is dead. This means that relatives, friends, and lawyers and accountants must try to reconstruct the decedent's personal financial history. This includes not only investment assets but also antiques and other household effects which may have appreciated over time.

One step toward eliminating some of the practical problems associated with carryover basis today is to bring all assets purchased before December 31, 1976, under the old law. The so-called "grandfathering" of pre-1977 assets would eliminate some of the recordkeeping problems and complexity of the current law.

It would be a true "fresh start" for taxpayers who would be on notice that they must keep detailed records of financial affairs and would eliminate the present discrimination against persons who hold assets which do not have an easily ascertainable market value. The idea of grandfathering pre-1977 assets, is just one of many approaches that need to be explored to attempt to make carryover basis more workable.

To do so is a very complex matter and S. 2227 will permit the Senate the time necessary to look closely at carryover basis.

A final point which can be made in support of S. 2227 is that the revenue loss associated with deferring the effective date of carryover basis from 1976 to 1978 will be negligible according to estimates by the Joint Committee on Taxation. No great revenue loss will be associated with deferring carryover basis.

I might also add that carryover basis does not appear to be a measure de-

signed to raise revenues in the near future. Joint Tax Committee estimates show that in 1979 only $36 million will be raised through the carryover basis tax. In 1980, the revenues are $93 million, and in 1981, $162 million. For this relatively small amount of revenue, the cost to the taxpayer in terms of record-keeping and professional fees is not justified.

I emphasize again that this very fundamental change in the tax laws was done without committee hearings or Senate consideration.

Taxpayers and professional tax practitioners are now beginning to realize the unfortunate results of carryover basis. Many individuals have communicated their concerns to me, and I ask unanimous consent that the several communications be included in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

BOND, SCHOENECK & KING,
Syracuse, N.Y., November 3, 1977.

Hon. HARRY F. BYRD,
Chairman, Subcommittee on Taxation, Senate Finance Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR BYRD: I am a lawyer who has specialized in probate law for twenty-two years.

I am writing you about carryover basis, not because I think I can add anything to the testimony you have already heard from those more skilled than I about the evil practical consequences of the provision, but because, so far as I can ascertain, no one has ever publicly questioned the basic assumptions put forward to justify it.

One argument in justification heard frequently is that former law, by allowing the step-up in basis at death, created an inequity between two taxpayers, both having appreciated property and otherwise identically situated, when one sells the appreciated property and then dies and the other hangs on to it and then dies. The argument points out that what the first decendent passes on to his beneficiaries is diminished by the capital gains tax generated by the sale, while the beneficiaries of the second decedent receive more because there has been no sale and hence no capital gains tax, and they can now sell the appreciated property free of that tax.

All this is true, but the fact is that *both* taxpayers had an equal opportunity to take advantage of the rule allowing a step-up in basis, subject only to the peculiarities of their individual circumstances. The one who sold might have done so for a number of reasons, e.g., to change investments, to take advantage of capital losses to offset the capital gain on the sale, to pay a child's tuition at college, to buy a new car, etc. The one who did not sell might have hung on because he thought the asset was going to increase in value and he was waiting for a better price, or because he though the investment a good one to keep. The point is that carryover basis is only one element which might affect the decision to sell or to keep, and not necessarily the decisive element.

If in the event it turns out that one taxpayer is helped and one hurt, this is no more than the basic unfairness of life itself. If each man made a decision contrary to the one he made, their positions would be reversed.

It does not change the facts to characterize this as "unwarranted discrimination." Still a third taxpayer who bought the same asset at the same time as the first two, but elected to sell it at a time when it had temporarily (as it ultimately turned out) dipped in value, could complain that the result "discriminated" against him. The "discrimination" resulted from his own action. Free to hang on, he chose to sell with the result that he has less than either of the first two to leave to his beneficiaries.

I submit that because the choice is one left up to the taxpayer the results are his, as is the case in many transactions affected by the tax law, where the taxpayer has a choice.

A second justification refers to a substantial "lock-in effect" and suggests that older people who might otherwise sell "are effectively prevented from doing so because" they are aware that a sale before death will generate an income tax.

If the thrust of this reason is solicitude for the welfare of the elderly, I suggest that a short chat with the nearest senior citizen would quickly disabuse one of the notion that the taxpayer welcomes this gratuitous interference in his affairs, the result of which is to nail his property to a capital gains tax no matter what happens.

If the real thrust of the argument is that the "locking-in" is bad for the economy because it ties up money otherwise available to buy goods and services or to provide venture capital, I suggest that carryover basis is *not* the answer, it rather increases the evil.

Let us suppose that a taxpayer has property worth $10,000 for which he has paid $1,000. If he sells it, he realizes a capital gain of $9,000, which has to cost him a capital gains tax (absent offsetting capital losses). Thus the results are:

(1) There is still $10,000 (belonging to the purchaser) tied up in the asset and not available for goods and services or new capital,

(2) The taxpayer does not have $10,000 to spend; he has $10,000 *minus* a hefty capital gains tax,

(3) The government gets the capital gains tax.

There is thus *less* available for goods, services, and reinvestment than before the sale, and the same $10,000 tied up in the asset.

I submit, sir, that when the reasons for adopting carryover basis are examined closely they fall far short of justifying the conclusion they are so compelling as to warrant the horrendous and expensive tangle which carryover basis brings, and which has been so eloquently described before your subcommittee.

Sincerely yours,

CHESTER H. KING, Jr.

SOUTHERN BANK AND TRUST COMPANY,
Richmond, Va., November 1, 1977.

Hon. HARRY F. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: I understand the Senate Finance Committee's Subcommittee on Taxation and Debt Management has had hearings recently in connection with the proposed repeal of the carryover basis law enacted as part of the Tax Reform Act of 1976. I am writing to ask for your support for repeal of this legislation which is bad law and which never received public debate at the time it was enacted by the Joint Committee of the House and Senate in 1976.

Frankly, I have been appalled by the complexity and problems created for fiduciaries under the carryover basis law in the relatively short period of time that we have had to live with the Tax Reform Act of 1976. Not only has this made life more difficult for us in the fiduciary business, but it has added an unbelievable burden to our citizens in the need for detail recordkeeping, and in many cases we find people simply have no accurate records for assets acquired many years ago, particularly for assets where there was no original intent to sell for profit.

I could give a number of specific examples of how this law has proved burdensome, and will do so if you would find this additional information helpful.

Repeal of this complex carryover basis law would be a major step of progress, and would certainly be in furtherance of the present Administration's stated objective of simplifying tax administration for all citizens. I hope you share my concern in this regard and can add a voice to get some legislative relief.

With kindest personal regards, I am

Sincerely,

RIEMAN MCNAMARA, Jr.,
Vice Chairman.

UNIVERSITY OF NORTH CAROLINA,
Greensboro, N.C., November 16, 1977.

Hon. HARRY BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: As a college professor of taxation, a practicing attorney and, formerly a practicing CPA, I have discovered the "carry-over basis" provisions of the recently enacted 1976 Tax Reform Act to be among the most exasperating and difficult-to-apply of all I have ever experienced. Talk around local courthouses easily confirms my own reactions. Attorneys meet, discuss, argue and walk away no more certain of the law than they were before seeking assistance. Many attorneys are now simply refusing to handle small and medium-sized estates because the statutes are totally beyond their desire to even attempt to cope with them. The result, of course, will be to produce new tax attorneys and accountants whose higher fees will correspondingly deflect their specialty.

There is no question in my mind that the new provisions will have several profound effects. First, the cost of handling estates will certainly rise, decreasing both the amounts eventually reaching the heirs of an estate and the tax revenues based upon those amounts. Secondly, the government's administrative cost in attempting to assure compliance will probably offset any additional taxes that may result (not to mention that estate tax rates were substantially increased). Thirdly, these new provisions will prove to be a constant source of disagreement and litigation in much the same way the "contemplation of death" issue was before the 1976 Act resolved that issue.

Perhaps the basic issue is whether complicated rules and procedures are necessary to produce or are, in fact, going to produce a better and more equitable system of taxation. I would submit that they will not, and I will also suggest that Congressional adherence to such a policy will only serve to alienate both the professional community and the public from their government.

Please give the various new curative propcsed legislation your careful consideration.

Thank you for your public dedication and service.

Very truly yours,

DAVID B. POST,
Assistant Professor.

STERN & DIEHL,
Storm Lake, Iowa, November 14, 1977.

Senator HARRY BYRD,
Senate Office Building,
Washington, D.C.

DEAR SENATOR BYRD: I have just finished reading an article in The Wall Street Journal, dated Monday, November 14, 1977, in reference to your efforts to correct some of the problems created by the Tax Reform Act of 1976.

I have been practicing law here for over fifty years and largely handle probate. I find in many instances the small taxpayer has no record that is needed in order to establish a correct carry-over basis, as outlined in the new Bill.

For example, there is a lady here which has been incompetent for some years and is now

eighty seven years of age. About sixty years ago her father deeded a well located home to her and I can find no record of its value at that time; then about twenty years ago she did a complete renovation of the house and added an apartment. The contractor who did this work has been dead for about twenty years; I could learn nothing by talking to her and none of the relatives know anything about the original cost of the house or the improvements, so after her death and the property is sold, as required by the Will, it will be impossible to do anything as to guess as to the adjusted basis and certainly this shouldn't be the way taxes are figured

In my opinion, a return to the old basis would be best. The two year moratorium, if necessary, would be helpful.

I wish to express my appreciation for your efforts in amending this Bill.

Yours very truly,

ELLIS R. STEIN.

LYNCHBURG, VA., *November 15, 1977.*

Hon. HARRY F. BYRD, Jr.,
Senate of the United States,
Washington, D.C.

DEAR SENATOR BYRD: Edward Graves has informed me that he has discussed with you the difficulties of the carry-over basis and has told me that you have been interested in working on a substitute for the provision, possibly to be included in the Technical Amendments Act

I am named as Executrix of the Estate of Eva W. Macgregor of this City, who died at the age of 93 with a house full of antique furniture and other tangible personal property for which there is no record of the purchases There is no way that I know of in which an honest person could arrive at the carry-over cost basis of any item in her house.

I realize that you must have heard from hundreds of people about this measure, imposing on taxpayers a duty which they cannot perform, and which will inevitably create resentment toward the taxing authorities, if not a sense of rebellion. I hope that you and the other Legislators will be able to effect changes which will remove this inequity from our tax laws.

Sincerely yours,

ANNIE LAURIE S. BUNTS.

MCCUSH, KINGSBURY, O'CONNOR,
LUDWIGSON, THOMPSON & HAYES,
Bellingham, Wash., November 15, 1977.

FINANCE COMMITTEE,
Subcommittee on Taxation and Debt Management, U.S. Senate, Senate Office Building, Washington, D.C.

GENTLEMEN: I am a member of the Section of Taxation of the American Bar Association, although a rather inactive one. My principal interest is in estate and gift taxes. As such, I received a copy of the Statement of the Section of Taxation and the Section of Real Property, Probate and Trust Law of the American Bar Association dated October 28, 1977, which to a considerable extent is addressed to the matter of change in or repeal of the carry-over basis portions of the Tax Reform Act of 1976.

I heartily endorse what has been said by the ABA Section.

I give you a concrete example now current in my practice.

My client died in March 1977. He, with his wife of many years, owned (free of all debt) a small but first-class dairy farm in this county. All of his property was transferred to his wife upon his death by virtue of a Community Property Agreement, an instrument which is a creature of Washington statutory law and the effect of which is to provide for the transfer of Washington property at least without probate from the husband to the wife, or vice versa; but nothing more. Half of the community estate is subject to tax.

The entire community estate is valued at about $325,000. The principal asset is the farm, although there were substantial savings in cash and a trifle of investment in mutual funds.

This farm was acquired by this couple in five separate purchases, running from 1942 to 1956. They kept no record of the cost of the purchases and they have no records of the improvements which they built upon the properties they purchased, although the improvements were substantial, and they have no record of the depreciation taken nor allowable on the properties until the last several years when their income tax returns are available and show such depreciation.

I could only guess at the cost of the original purchase of the five parcels, which together constitute the farm, by ascertaining the revenue stamps placed on the deeds at the respective time and revenue stamps often were not precise by any means.

The farm has been sold by the widow and she has the problem of computing her and the estate's capital gain, since, of course, she and the estate both conveyed their half interests in the sale.

It is absolutely impossible for anyone, no matter how learned or how well-equipped with calculators and computers, to compute capital gain under the current carry-over basis law—absolutely impossible, i.e., according to any system.

Repeal the current carry-over basis law and do it quickly.

Sincerely yours,

BURTON A. KINGSBURY.

HISTORIC JOURNAL SALUTES HUBERT H. HUMPHREY

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Maryland (Mr. MATHIAS), and the material attached thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR MATHIAS

There is so much to record about the rich dimension of our friend and colleague, Hubert Horatio Humphrey, that I foresee no time when the last word will have been said. And so, I would like to add to the many tributes to Senator Humphrey that have been spoken in this chamber, one that was written in Annapolis, the capital of Maryland and once the capital of the United States.

I refer to the lead editorial of the November 5 edition of the Annapolis Evening Capital. This journal is published by Capital Gazette Newspapers, Inc., America's oldest newspaper publishing company, founded in 1727 and this year celebrating its 250th birthday. It seems fitting that such an august institution should join the chorus of those singing the praises of the august institution in our midst—Hubert Humphrey.

The editorial—entitled "Hubert Humphrey: Living tributes"—distills the essence of the tributes members of this Congress have paid to Senator Humphrey in recent weeks. It concludes with a sentiment in which many, many Americans wholeheartedly, if disappointedly, concur: "He never ascended to the presidency—and this country may just be worse off for it"

HUBERT HUMPHREY: LIVING TRIBUTES

Many people who have done good things in their lives are paid special tributes—but usually after they are dead.

That is what is so different about the tributes paid in the last two weeks to Sen. Hubert Humphrey. He was alive to enjoy them.

First was his long-dreamed-about ride on Air Force One. President Jimmy Carter picked up Humphrey in Minnesota on the President's return from the West Coast.

"For at least 20 years I have been trying to get on Air Force One," said the Happy Warrior, who entered the Senate in 1949 only to see his dreams of the presidency repeatedly crushed. "Just the thought of it, the vibrations, gave me new hope and new strength."

The best was yet to come.

His Senate colleagues gave him a surprise welcome. They rose en masse, along with the galleries, and unlike many other Senate greetings, no one attempted to bring them to order.

Senator after senator, Republican and Democrat, paid him tribute. Then it was Humphrey's turn.

Gaunt, his remaining hair silvery white, he was his old HHH.

"You have been very flattering with me," he said. "I want you to know that I am old enough and sufficiently wise enough at this stage of my life to know that all you have said is not exactly according to the facts. But I also want you to know that I am sufficiently fragile and weak as to want to believe every single word you have said."

Then, just two days ago, the House shattered precedent by convening in special session to pay tribute to the senator. Never before in the 200-year history of the House had it convened in special session to honor a senator.

Humphrey was equal to the occasion. He spoke for 20 minutes, far longer than House rules allow. The congressmen loved every minute of it.

"One of the reasons I never ran for the House," he said, "is that I found out they have a two-minute or five-minute rule. We have wonderful rules over in the Senate (there are no restrictions on how long a senator may speak)."

You don't have to agree with Hubert Humphrey, but you have to admire him—not only for his present gallant fight against inoperable cancer, but for his enthusiasm and zeal in fighting for the things he believed to be right.

He never ascended to the presidency—and this country may just be worse off because of it.

We are happy, however, that as frail as he looked he was alive to hear his friends and foes pay him tribute.

IONE AND DOUGLAS HUNT CELEBRATE 50 YEARS

Mr. ANDERSON. Mr. President, I would like to take this opportunity to pay tribute to two Minnesotans—Ione and Douglas Hunt—who will be celebrating their 50th wedding anniversary soon.

Ione Ellen O'Connor was born in Melrose, Minn., on November 13, 1906. Douglas P. Hunt was born on April 21, 1901, in Litchfield, Minn. After graduating from the University of Minnesota Law School in 1925, Mr. Hunt began practicing law in Minneapolis, where he met Ione. They were married on January 10, 1928 and moved to Montevideo in 1931 where Mr. Hunt continued to practice law. While in Montevideo, Mr. Hunt was elected probate and juvenile judge, a position he held for 38 years.

In addition to raising six children, the Hunts have been very active in community, State and national affairs. Judge Hunt lectured about and worked for juvenile justice reform and was instrumental in helping to establish legal counsel and representation in the courts for

juveniles. During the drought of 1933–34, he helped buy, ship and distribute hay to farmers in the drought-stricken areas of Minnesota. His actions saved many Minnesota farmers from bankruptcy.

In 1948 Mrs. Hunt was elected the first Democratic State chairwoman in Minnesota. In 1950 she became a national committee woman and served on the national executive committee of the Democratic Party until her retirement in 1960. She was also a member of the National Advisory Council and as such served with many of our Nation's most distinguished leaders, including Harry Truman, HUBERT HUMPHREY, Adlai Stevenson, Dean Acheson, John Kennedy, and Eleanor Roosevelt.

President Truman honored Judge and Mrs. Hunt with an invitation to attend the signing of the Atlantic Peace Treaty. In 1963 the Hunts, along with Senator and Mrs. Inouye and Congressman and Mrs. John Murphy, went as representatives of President Kennedy to South America to present a statute of George Washington to the people of Uruguay.

Judge Hunt retired in 1974. He and Ione have since moved to Minneapolis where, on December 30, 1977, they will celebrate with their children, 15 grandchildren, and many friends their 50 memorable years together.

The Hunts have served their State and their Nation well. They are distinguished Minnesotans in every sense of the word. It is a pleasure to honor them as they look back on 50 wonderful years of marriage.

NOTICE OF A DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 43, PARAGRAPH 4 PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN NATIONAL

Mr. STEVENSON. Mr. President, it is required by paragraph 4 of rule XLII that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics received a request for a determination under rule 43 on behalf of his staff member, John Colvin, who serves as his counsel to the Finance Committee, from Senator BOB PACKWOOD. On the basis of the facts stated in his letter of November 10, 1977, it has been determined that the participation of Mr. Colvin in an educational program in Europe for 4 weeks beginning November 13, 1977, at the expense of the European communities visitors program, to study tax policy in the European communities and to meet with European community and national parliamentary staff members, is in the interest of the Senate and the United States. The proposed itinerary includes: departure from Washington, D.C. on or about November 13, 1977, and, in a period of 4 weeks, he will visit the European Commission in Brussels and the European Parliament in Strasbourg, France, and meetings with officials in Bonn, Luxembourg, Rome, London, and Munich.

CIA PERSONNEL CUTBACKS

Mr. THURMOND. Mr. President, thoughtful constituent of mine, Mr. George F. McKamey of Mt. Pleasant, S.C., has called my attention to an excellent column by Patrick Buchanan on the personnel cutbacks at the Central Intelligence Agency. This column raises serious questions about the vigilance of the present administration in its conduct of foreign affairs. While I heartily endorse economy in government, this hardly seems the right time to cut back on our intelligence capabilities. The ongoing Soviet arms build-up makes it imperative that we learn as much as possible about their goals, plans, and operations. We cannot just stick our heads in the sand, ostrich-like, and hope that the threat will go away.

I ask unanimous consent that this column be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

[From the Charleston (S.C.) Evening Post, Nov. 17, 1977]

SWEEPING PURGES AT CIA

WASHINGTON.—"If the satellites are blinded, what have we got?" Thus did Defense Secretary Harold Brown express his public concern with Soviet testing of hunter-killer satellites—designed to poke out America's eyes in inner space.

Upon our satellites, the United States depends for knowledge of troop movements and naval operations, of strategic weapons testing and deployment.

That the Russians, moving inexorably toward a first-strike capability, should be developing the means to destroy U.S. space vehicles is understandable. What is inexplicable is that, with the apparent blessing of the president, the United States is rendering itself partially blind and partially deaf in the global arena.

At the CIA, a sweeping purge is being conducted by the Directorate of Operations, the clandestine services which deal with espionage and counter-espionage. CIA Director Stansfield Turner has scheduled some 800-plus personnel for severance from the elite corp over the next two years—a number representing at least 20 percent of the service.

Yet, more than numbers are at stake. Many of those being severed are among the most experienced and able men in the agency, including senior officers and stations chiefs in some of the most crucial posts in Europe. Together, these men represent thousands of man-years of invaluable intelligence experience, and irreplaceable contacts and confidences built up over long careers. When the purge is complete, part of the institutional memory of the CIA will be permanently destroyed.

An estimated 200 members of the clandestine services have already received a memo that can fairly be described in Hobbes' words as "nasty, brutish and short."

"Subject: Notification of intent to recommend separation.

"This is to inform you of my intent to recommend to the Director of Personnel your separation . . . in order to achieve the reduction in the operational strength order by the DCI (Turner)."

This is the heart of the 70 word Haldermanic message sent scores of veterans of the silent service. In a gracious parting gesture, the CIA has told the veterans that those who sever themselves by year's end will not have this brutal discharge note placed in their permanent file. Those who refuse to go quietly will be unceremoniously dispatched by spring.

Though the missive was signed by Director of Operations William Welles, it is repeatedly not his handiwork. Turner and his trigger man, special assistance Robert D. "Rusty" Williams, are said to be carrying out the purge at the behest of David Aaron of the National Security Council, one-time staffer on the CIA-baiting Church committee, and Walter Mondale, whom Mr. Carter has charged with oversight of the intelligence community "reform."

In this dangerous period of the Cold War we have chosen to call "detente," the decapitation of the clandestine services is a reckless form of false economy.

During a Midle East war, as in 1973, our satellites may be able to tell us that Soviet air-born divisions are being moved toward military air fields. But only human sources can tell us if Brezhnev is serious about intervention or is running a bluff. Gadgets can tell us about Russian capability; only human beings can tell us about motivation and intent.

Of passing interest is that this sweeping purge is being conducted to the indifference of the national press. If those 200 men however got their walking papers from the Peace Corps, the networks and national press would be ablaze with indignation.

THE ONE CHINA REALM

Mr. KENNEDY. Mr. President, often in our discussion of future United States-China relations we underestimate the psychological importance of a unified China to all Chinese, regardless of ideology. In an article published last month in the Washington Post, Robert Barnett offers an intelligent analysis of the One China "nation of realm, of homeland, of ethnic, and cultural identity" which is an important complement to all our discussions of diplomatic and legal formulas. I request unanimous consent that Mr. Barnett's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 8, 1977]

RESOLVING THE TWO CHINA'S QUEST FOR A "ONE CHINA" DREAM

(By Robert W. Barnett)

Taipei's friends declare that Washington's termination of the 1954 mutual defense treaty, which Peking has set as a condition for normalization of diplomatic relations, would be an act of craven dishonor, a betrayal of an old ally and the abandonment to Communist tyranny of 16 million freedom-loving Chinese friends.

The trouble with this extravagant warning is that it disregards crucial American realities. It disregards, also, the stubborn and compelling persistence of One China—a Realm of China—in the Chinese and in the world's imagination. And it ignores the true capabilities and the creative potentialities of the adversaries in a Chinese civil war in which, by virtue of the 1954 treaty, the United States remains a participant, and from which the United States should disengage itself.

What contribution to national honor is there in attributing presumed weight and

presumed reliability to a treaty tie with Taipei upon which Washington may be unable to perform?

The recent American debate over the President's decision to withdraw troops from South Korea brought up the credibility of U.S. treaty commitments. But the vigor and realism of that debate seem clearly to have confirmed—at least for the present—the national interest in fulfilling our treaty commitment to the Republic of South Korea. In contrast, however, there are grave indications that the American people, if put to the test, would not, despite the existence of the treaty of 1954, risk—in the Taipei-Peking confrontation in the Taiwan Strait—an investment of American lives, treasure and self-confidence like that which was made in Vietnam. Against the People's Republic of China, such an investment could be infinitely larger. Even if the executive branch tried, initially, to perform on the 1954 commitment, the War Powers Resolution gives to Congress authority to halt the military operation. There is no honor in perpetuating presumed commitment upon which performance is unsure.

Among all Chinese around the world, One China is a notion of realm of homeland, of ethnic and cultural identity far more than it is merely a matter of administrative nicety. One China has its legal and historical justification, but the concept has a separate and larger life in the imagination of the Chinese people. Both Chiang Kai-shek and Mao Tse-tung honored it. For many centuries it has shaped the feelings of Chinese confronted by threat of foreign exploiters and invaders from Central Asia or from the sea. Authors of China's dynastic histories have written about One China for 21 centuries. Challenges and encroachments of foreigners explain the sense of humiliation China has suffered from the end of the 18th century until today—humiliations over Treaty Ports, extraterritoriality, the Russians in Manchuria, the Japanese in Manchukuo, other foreigners in Tibet and Mongolia and elsewhere. For Peking, the presence of Americans in Taiwan belongs to that pattern.

It is to this wounding fact that Deputy Premier Li Hsien-nien referred recently when he said that Peking believed that Washington owed it a debt. In short, Peking sees the United States as having invaded, harassed and wounded China itself, with China never having caused injury to the United States. One China, is for all Chinese, an enduring concept, and one that should have, for us, solemn strategic implications.

This is Peking's perception and psychology as it relates to One China. But we can see the same perception and feeling, as well, when any American gesture of friendliness or move toward accommodation with Peking is construed by Taipei as a betrayal of the One China dream of the Republic of China. A failure to recognize that there is this realm of China, within which the Chinese, eventually, should be left alone to work out their problems, is strategically destabilizing and can present alarming consequences for the Pacific region and even for the United States.

When then-Sen. Hugh Scott returned from Peking last year, he unsuccessfully advised President Ford to encourage Taipei to commence trade and conversation with Peking. Such talks and contacts, handled entirely by Chinese negotiators, would bring out explicitly what must already be common knowledge on both sides.

Taiwan has a stable and self-reliant economy strongly competitive in the world community. Taiwan is not a helpless midget.

Japan's emotional attachments to Taiwan are so strong that a Chinese military attack could easily cause the Japanese government and general population to retreat from their present friendly and cooperative relationship with China, and possibly undertake a major rearmament program. Peking does not want this to occur.

The countries of Southeast Asia now normalizing their relations with Peking would view with great alarm a decision by Peking to attack Taiwan, and would perceive it as foreshadowing aggressive intention and capability elsewhere. The Soviet Union would try to make capital for itself from such a development.

The American relationship with Taiwan is the result of friendly and mutually advantageous interchanges over many years. A military clash between Peking and Taipei would complicate, and possibly end, the cooperation between Washington and Peking—cooperation to which Peking, so long as it is anxious about the Soviet Union, will attach paramount strategic importance.

Taiwan possesses a formidable independent military capability, which it can now sustain entirely from its own technical and economic resources. Peking cannot annex Taiwan by force with its present capabilities, and could not do so except by lowering its defenses elsewhere or by massive investment in new equipment, or both.

As Taipei and Peking try to work out together a Chinese solution to the role of Taiwan in One China, it should be these factors—and not the 1954 treaty—that should be Taiwan's leverage for achieving safety and prosperity. For that transaction to succeed, Taipei need only to give up the pretention that it can, itself, ever speak on matters of defense and foreign policy for the realm of One China, of which it would be recognized to be a part.

My view is that for Washington to terminate the 1954 mutual defense treaty with the Republic of China would be a responsible and wise action, even if "normalization" of relations with Peking were not the question. We should do it 1) to remove the United States from direct involvement in resolution of China's civil war, 2) to motivate Taipei to move toward arrangements for profitable coexistence with Peking, at a time when its bargaining leverage for autonomy within One China may be higher than it is ever again likely to be and 3) to join in international acknowledgement of One China—a realm made up of diverse Chinese elements for which only Chinese should be responsible—which is the only basis of enduring peace for China and for other societies, diverse in ideology, capability and system, that are China's neighbors in the Pacific region.

REFORMING CRIMINAL SENTENCES

Mr. STENNIS. Mr. President, on Monday, November 28, 1977, the Washington Star ran an outstanding editorial about the need for and desirability of legislation to reform the method of sentencing those convicted of crime.

I am in solid agreement with the views expressed in this editorial. Constructive action in this field is needed ond needed badly. I have long been convinced that the most effective deterrent to crime is the knowledge and perception by the criminal that there will be swift, sure, certain and appropriate punishment.

Penal rehabilitation is a fine goal and ideal. However, long and bitter experience shows that actual punishment of the criminal must always be a major element and factor in the sentence imposed. In addition, it is essential that the duration, extent and severity of the punishment fit the crime.

We must adopt proper and definite sentencing procedures and standards so that those who commit felonies and other serious crimes will know without doubt that, if they are apprehended and convicted, they will certainly be held fully responsible for their transgressions against society.

The monumental bill to codify, revise and reform the Federal Criminal Code, upon which our late colleague, Senator McCLELLAN, Senator KENNEDY and others worked so long and diligently, deals with substantive and procedural matters relating to the sentencing of those convicted in Federal courts of law violations. This codification is one of the greatest efforts in the area of Federal criminal law in the history of this Nation, and I hope that the reforms which it proposes can be enacted into law with such amendments as may be necessary early next year.

The logic and reasoning of the Washington Star editorial and the premise on which it is based are sound and convincing. The fact that the editorial was written at this time shows that more and more serious and sober thinking is being given by more and more people to the proposition that we must return to the practice of imposing proper, positive and reasonable punishment upon convicted criminals if the sentences handed out are to be a real deterrent to crime.

I commend the Washington Star for publishing this timely editorial and recommend very strongly the reading of it by my colleagues and the people of this Nation. Perhaps we are finally coming to the realization that the people must have the protection of the law to insure their safety and that the imposition of just and reasonable sentences as punishment for crimes is a part of this protection.

I ask unanimous consent that the editorial to which I have referred be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Star, Nov. 28, 1977]
1977]

REFORMING CRIMINAL SENTENCES

Illinois Gov. James R. Thompson is expected to sign into law a criminal-sentencing bill that, we hope, heralds a legislative trend in other states. The measure, which received final General Assembly approval Wednesday, is a sensible reaction against the devoutly held notion of penal rehabilitation and the idealistic but increasingly discredited attempt to tailor criminal sentences to the particular individual.

The bill creates a "Class X" category of felonies for 10 specific crimes, such as robbery, rape, kidnaping and deviant sexual assault (murder is a separate category with sentences of 20 to 40 years—and twice that time in certain circumstances—life or the death penalty). "Three time losers," convicted of three serious crimes including murder and most Class X crimes—would automatically receive life sentences. The bill also does away with parole boards and restricts judges' sentencing discretion by requiring determinate sentences—X years for conviction of crime Y—rather than the minimum-maximum prison sentences now usual, which often result in the minimum term being served.

The infatuation with rehabilitation and parole is beginning to wane under the dismal weight of recidivism rates. And not a moment too soon. The basic vulnerability of

both ideas is that they assume an ability to predict human behavior with precision beyond present skills.

The determinate sentence as a general replacement for minimum-maximum sentences conforms to a fundamental principle of criminal justice: swift and sure punishment. A stickup man, whether novice or journeyman, must know that he will serve a specific amount of time if he is nabbed and convicted. Street-wise cons, canny lawyers and judges of unfocused compassion not infrequently can make a mockery of that axiom, reducing deterrence to a joke.

The Illinois bill is, we gather, one of the first major state initiatives to reflect the fresh thinking about sentencing. We note that the pending recodification of federal criminal laws also would move somewhat in this direction (the measure, S. 1437, has been approved by the Senate Judiciary Committee and is expected to be considered by the full body early next year).

Under this bill—a heavily re-worked version of last year's hotly disputed S. 1—a sentencing commission would develop guidelines to provide a general direction for federal judges. The bill would also sharply curtail rehabilitation as a factor in criminal sentencing and would also limit the use of early releases on parole. The laudable intent of these provisions would be to insure more uniform and realistic sentences, sentences more consonant with time actually being served by convicted felons as opposed to the long maximum, and rarely served, sentences on the books.

There is a growing mood of pragmatism—rather desperately arrived at—in criminal sentencing. While the debate and the research continue, those with responsibility for containing criminality are more and more inclined to endorse such procedures as the determinate sentence and junking of parole. Our knowledge, for practical purposes, now is largely limited to the obvious. That an imprisoned felon is hampered in the commission of new crimes.

A society that concedes an inability to deal with criminality is a society in an advanced stage of atrophy. Perhaps one day we can be more confident of how criminal behavior develops and how it may be changed. Until then, however, those who commit serious crimes must know they will be held to account—as responsible agents of their own actions.

THE CONGRESSIONAL BUREAUCRACY STRIKES AGAIN—WITH IRRELEVANT REDTAPE

Mr. HELMS. Mr. President, I recently received copies of correspondence between members of the House Subcommittee on the City, a subcommittee of the House Committee on Banking, Finance, and Urban Affairs, and John J. Medlin, Jr., president of the Wachovia Corp. of Winston-Salem, N.C.

The House subcommittee wrote to Mr. Medlin asking, in essence, what his bank was doing to solve inner city problems. Of course, the Wachovia Bank does not operate in the Northeast or other areas of the country suffering from a severe inner city blight. In short, the request addressed to Mr. Medlin and the Wachovia Bank was, at best, inappropriate. But it is also, unfortunately, one more sign that the newest and fastest growing bureaucracy in the Federal Government is the congressional bureaucracy.

It is obvious that the letter addressed to Mr. Medlin was a form letter, probably prepared by subcommittee staff unfamiliar with the social and economic conditions of North Carolina and the Southeast. Mr. Medlin need not have replied to such an irrelevant inquiry, but I am glad that he did, because his reply was outstanding and perhaps gave the congressional bureaucrats a better concept of the consequences of attempting to design nationwide utopia in the Halls of Congress.

Mr. Medlin is quite to the point when he states:

[S]pecific answers . . . would be quite different for cities in the industrial Piedmont as compared to towns in the agrarian east or mountainous west.

This, in itself, illustrates a major difficulty in various units and functions of government attempting to evaluate and solve problems of this large and diverse nation in a standardized and simplistic format. Clearly, problems of the large metropolitan areas of the northeast may not be best approached in the same manner as the more typical population centers of the southeast. . . .

[T]he most helpful governmental policy would be to cease adding encumbrances which increasingly impede the successful pursuit of our present statutary obligation to serve the four constituencies mentioned above [shareholders, customers, employees, and public at large] in a responsible and balanced fashion. *Increasingly, our people are diverted from their normal customers and public service activities to gather information which is often of questionable use and relevance in response to questionnaires and studies from all facets of government.*

In addition, the rapidly growing and increasingly complex procedures and paperwork arising from so-called consumer protection legislation are adding inordinately to the expense of serving customers and to the cost they must share. *Our people are necessarily forced to concentrate more on the technical and legal side of the customer service process and less on the human needs and personal service.* [Emphasis added.]

As the saying goes, John Medlin "told it like it is."

Mr. President, I ask unanimous consent that the correspondence between John G. Medlin, Jr., and the House Subcommittee on the City be printed in the RECORD.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

SUBCOMMITTEE ON THE CITY,
Washington, D.C., November 14, 1977.

Mr. JOHN J. MEDLIN, Jr.,
President, Wachovia Corp., Winston-Salem, N.C.

DEAR MR. MEDLIN: The plight of our central cities and their unemployed is among the most pressing of this nation's problems. Concerted action by government and business will be required to revive and stabilize city economies and provide jobs for their residents.

A commitment by the nation's major corporations to maintain or increase their operations in high unemployment areas would help restore confidence in the revival of these cities, which represent a huge investment in public facilities, commerce, and housing. We urge you to make such a commitment and to make it publicly known.

We all recognize that central city locations may no longer be appropriate for heavy industrial plants. But these locations are suitable for distribution and warehouse centers, component manufacturing and repair facilities, executive and sales offices, research and development centers, as well as retail business and a wide variety of service industries.

The work of this Committee and its Subcommittees in considering proposals to aid city economies would be greatly assisted if you would provide the following information:

(1) Which of your corporation's operations are at present located in central cities, and how many persons do they employ out of your total work force?

(2) What plans do you have to expand or contract these operations in the next five years? What major factors have influenced these plans?

(3) What recruitment or job-training activities does your corporation sponsor that are specifically aimed at the unemployed in central cities?

(4) Which existing federal, state or local policies, if any, discourage you from maintaining or locating operations in central cities What new governmental policies would encourage you to maintain or locate operations in these areas?

We would appreciate receiving your response by December 15.

Sincerely,

Henry S. Reuss, Chairman; Edward W. Pattison, M.C., Mary Rose Oakar, M.C., John J. Cavanaugh, M.C., Stewart B. McKinney, M.C., Herman Badillo, M.C., James M. Hanley, M.C., Jim Mattox M.C., Millicent Fenwick, M.C.

WACHOVIA BANK &
TRUST COMPANY, N.A.,
Winston-Salem, N.C., November 23, 1977.

Hon. HENRY S. REUSS,
Chairman, Subcommittee on the City, Committee on Banking, Finance and Urban Affairs. U.S. House of Representatives, House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: It is not practically possible to give specific and concise answers to the questions raised in your letter of November 14 considering the wide diversity of this state, its cities and the statewide branch nature of this bank's operations. The 75 cities and towns in which Wachovia operates are relatively small by national standards. They range in size and nature from small, predominantly agricultural communities of a few thousand to the largest urban area of about one-quarter million people. Perhaps none of them would qualify as having a "central city" with a "plight" as envisioned in your letter.

Our bank's stated objectives and practices all emanate from a fundamental commitment to serve in balanced fashion the best interests of shareholders, customers, employees and the public at large. The public service portion of this commitment necessarily manifests itself in many different ways, depending on the characteristics and needs of the various localities where we are privileged to operate. For example, specific answers to the four questions would be different for cities in the industrial Piedmont as compared to towns in the agrarian east or mountainous west.

This, in itself, illustrates a major difficulty in various units and functions of government attempting to evaluate and solve problems of this large and diverse nation in a standardized and simplistic format. Clearly, problems of the large metropolitan areas of the northeast may not be best approached in the same manner as the more typical population centers of the southeast. While I applaud the concerns and apparent objectives of the Subcommittee, I question whether the results of this expensive information-gathering process will be helpful in formulating universally meaningful and workable proposals.

With respect to question No. 4 as it relates to the state of North Carolina and its banking

system, the most helpful new governmental policy would be to cease adding encumbrances which increasingly impede the successful pursuit of our present statutory obligation to serve the four constituencies mentioned above in a responsible and balanced fashion. Increasingly, our people are diverted from their normal customers and public service activities to gather information which is often of questionable use and relevance in response to questionnaires and studies from all facets of government.

In addition, the rapidly growing and increasingly complex procedures and paperwork arising from so-called consumer protection legislation are adding inordinately to the expense of serving customers and to the costs they must share. Our people are necessarily forced to concentrate more on the technical and legal side of the customer service process and less on the human needs and personal service. This is not to say each additional step of consumer protection and bank regulation has not been without some merit. But many have arisen from the isolated abuses of a few that could have and should have been dealt with vigorously and effectively under existing laws and regulations.

Our bank constantly strives to promote the strength and progress of all segments of the private sector in our market areas. We believe that the health, vitality, and effective functioning of the private sector offers the only fundamental and long-lasting solution to such problems as the plight of central cities and unemployment. In summary, if government will trust banking a little more and stop diverting banking's attention and time away from pursuit of the responsibilities inherent in its public charter, the public interest would truly be better served.

This response is offered with respect and appreciation for the objectives and reponsibilities of the Subcommittee and its members. You have always spoken with candor and clarity, and perhaps at times our industry is too timid in likewise presenting the substantial merits and successful performance of the banking profession in meeting its broad and specific responsibilities. For the public interest to truly be served, there must be an improved quality, and perhaps a reduced quantity, of information flow and regulation as well as a better understanding between the practical and the theoretical world of banking.

It was good having you in Winston-Salem and at Wachovia last year. I hope we can have the pleasure of your company at some time in the future for a longer exposure to daily life in one of the nation's leading banks. With best wishes for continued successful pursuit of your important responsibilities.

Sincerely,

JOHN G. MEDLIN, Jr.

OMNIBUS ANTITERRORISM ACT OF 1977

Mr. BENTSEN. Mr. President, I was pleased, on November 4, to join with Senator RIBICOFF and others in cosponsoring the Omnibus Antiterrorism Act of 1977. The Senator from Connecticut is to be commended for his efforts to devise a coherent, comprehensive strategy to deal with the evils of international terrorism.

With incidents of terrorist kidnapping, coercion, and extortion occurring at an alarming rate, the United States must take affirmative action to establish a position of world leadership in combatting international piracy and terrorism. Senator RIBICOFF's initiative is clearly a step in the right direction.

We cannot allow the irony of this ultimate deprivation of human rights to thrive at a time when this Nation is so firmly dedicated to the alleviation of suffering and the establishment of a world free from repression. I have sponsored and supported measures in the past, and I will continue to support, serious measures such as Senator RIBICOFF has designed to combat the reign of terror sown by these kidnappers, bandits, and murderers.

It is not enough for us to establish steadfast opposition to international terrorism as a national priority. We must also demand the active cooperation of all nations in resisting terrorism and in dealing effectively with apprehended terrorists, an alarming number of whom are repeat offenders. Aided and abetted by an increasingly sophisticated international terrorist network, the same terrorist leaders such as George Habash of the Popular Front for the Liberation of Palestine continue to leave their handiwork in airports in Paris, Rome, Athens, Tel Aviv, Jerusalem, and New York. No country is safe from these pirates.

The United States has made great progress in improving security and in virtually eliminating hijackings from our airports, but U.S. citizens still comprise one-third of the victims of all terrorist attacks since 1968. Therefore, for the security of our own citizens, we must be prepared to impose sanctions against countries providing refuge for terrorists and make public lists of countries considered dangerous for travel.

We cannot countenance the attitude of groups, such as the Palestinian Liberation Organization, that condone violence even for what they consider to be noble causes. Partly because of the attention given by the media to isolated acts of terrorism, groups such as the Bader-Meinhof gang and the Japanese Red Army have managed, though relatively few in number (the State Department's Office for Combatting Terrorism lists 737 terrorist acts resulting in 292 deaths from the beginning of 1973 through October 1976) to unnerve established nations through their senseless attacks at random times on innocent citizens. Unlike the lone killer, the terrorist has followers dedicated to perpetrating a continued rampage of terror. The creation of a Japanese terrorist organization that hires itself to perform wanton acts of aggression for any cause against any enemy is an endmost example of moral turpitude. The appalling statistics speak for the need for all countries in the world to cooperate in ending the current trend of unrestrained political violence.

According to a U.S. State Department document, 146 people classified as international terrorists had been arrested through 1975 in the Western countries surveyed. But of these, no fewer than 140 were known to have been released, the overwhelming majority as a result of further acts of terrorism such as hijacks. At this time I would like to commend the West Germany Government, recent victims of a Lufthansa jet hijacking, for their statement condemning international terrorism and affirming their dedication to become party to world efforts to stop such heinous acts of international piracy.

There are those who maintain that there is no defense against the random deprivations of determined terrorists, and it is true, Mr. President, that we cannot foreclose the possibility of future acts of terrorism. We can, however, as Senator RIBICOFF has suggested, constrict the environment in which the crazed killers, bomb-throwers, and blackmailers are permitted to operate. I have introduced legislation to provide for mandatory sentences, without probation or parole, for those convicted of terrorist crimes, including the death penalty in the most aggravated cases. I have introduced legislation to bring about economic sanctions against countries that harbor terrorists. I have introduced legislation that would prohibit bail in those terrorist cases in which the judge believes that such release would pose a danger to the community. Today, in cosponsoring the Omnibus Antiterrorism Act of 1977, I reaffirm the duty of this distinguished body and the United States to continue to impose measures against these terrorist murderers.

NOTICE OF A DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 43, PARAGRAPH 4 PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

Mr. STEVENSON. Mr. President, it is required by paragraph 4 of rule 43 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics received a request for a determination under rule 43 on behalf of David J. Krieger, the Senator's press secretary, from Senator PATRICK J. LEAHY. On the basis of the facts stated in his letter of November 9, 1977, it has been determined that Mr. Krieger's participation in the educational program in Canada, November 16–20, 1977, at the expense of the Canadian Association of Young Political Leaders, to study Canadian politics, is in the interest of the Senate and the United States.

The proposed itinerary to be paid for by the foreign organization includes: Departure from Toronto to Ottawa on November 18, and from Ottawa to Montreal on November 19. The round trip travel from Washington, D.C., to Canada on November 16 and November 20 is being furnished by a U.S. domestic organization, the American Council of Young Political Leaders.

HUMAN RIGHTS IN ARGENTINA

Mr. KENNEDY. Mr. President, last week Secretary of State Vance made an important trip to Argentina, Brazil, and Venezuela. The key issues on his agenda were nuclear nonproliferation, world oil prices, and human rights. In this connection, the Coalition for a New Foreign and Military Policy wrote asking him to en-

courage the Argentine Government to account completely for over 15,000 persons who have been kidnapped or detained, to permit prisoners under the state of seige to exercise their constitutional right to leave the country for exile, to provide safe passage for those who have taken refuge in foreign embassies, and to begin the essential process of restoring democratic rule.

When I met with Secretary Vance on November 17, I urged him to act favorably on the Coalition's requests, drew his attention to a number of particularly urgent cases which remain unresolved, and reminded him of continuing concern in the Senate about abuse of the most elementary human rights in Argentina. It is my understanding that the Secretary has followed up on these important points with the Argentine Government. I believe we should all watch closely the results of our interventions in the months ahead.

Mr. President, I request unanimous consent that the Coalition's letter to Secretary Vance and a prison population profile for Argentina be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COALITION FOR A NEW FOREIGN AND MILITARY POLICY.

Hon. CYRUS VANCE,
Secretary of State, U.S. State Department, Washington, D.C.

DEAR MR. SECRETARY: We have learned of your impending visit to Argentina in late November. We write at this time to submit our views as to what is important at this time for the improvement of U.S.-Argentine relations.

The Argentine military government has begun to acknowledge the pressure of your initiatives as well as those of the Congress with regard to human rights, by undertaking some cosmetic changes and by making some vague promises about an eventual return to electoral democracy in the distant future. In this context, President Videla indicated to President Carter in Washington that it was his intention to make public a list of detainees, to account for the disappeared persons, to release those being held without charges, and to expedite judicial proceedings for those awaiting trial. We fear that these promises are, for the most part, a public relations effort designed to confuse world public opinion and to cover up continuing repression.

The military has, for example, already announced that it would restore the "right of option" which allows prisoners held under State of Seige regulations—at their own choice—to opt to leave the country for exile. However, the military emphasized that it would reserve the right to decide in each case whether or not the release of a given prisoner would "endanger national security." Thus, the "restoration of the right of option" is in fact a reaffirmation of the "right" of the military to decide who should and who should not be kept in prison.

Similarly, recent Argentine government references to the number of political prisoners currently being held place the figure at around 4,000, while a partial list compiled in the United States already contains 8,000 names, and the total number of prisoners and missing persons is estimated to exceed 15,000. We submit this list to you and request that you deliver it on our behalf to the Government of Argentina as a sign of our awareness and continuing concern about the human rights situation in that country.

We feel that international pressure, particularly from the United States Government, can influence the extent to which the Argentine military feels compelled to fulfill its own commitments and to give substance to its widely-publicized moves to restore respect for human rights. It is for these reasons that we urge you at this time to make public the Administration's concern on these matters and, in your upcoming visit, to encourage the Videla government to comply with the following requests:

1. That the Argentine government make public a complete list of all those it holds in detention; and that it provide a complete accounting of those persons missing or disappeared.

2. That the Argentine government allow those being held under State of Seige regulations to leave the country for exile as guaranteed by the Argentine Constitution, without any restrictions.

3. That the Argentine government provide safe passage for those who have sought refuge in foreign embassies and allow them to leave for the country of their choice; of particular concern is the case of former President Dr. Hector Campora, who has been forced to remain inside the Mexican Embassy in Buenos Aires since the military coup of March 1976.

4. That the Argentine government begin the process of restoring democratic rule by lifting the ban on political parties and their activities, as a necessary prerequisite for the holding of free general elections in the near future.

We believe that the above are the basic criteria for judging any changes in the human rights situation in Argentina, and should be a precondition for improving U.S.-Argentine relations. Hoping that you will consider and accept these recommendations intended to contribute to the prompt restoration of democracy in Argentina, we remain.

Sincerely yours,

Rev. William Wipfler, Director, Human Rights Office, Nat. Council of Churches; Bruce Cameron, Legislative Coordinator, Americans for Democratic Action; Rev. Joseph Eldright, Washington Office on Latin America, Director; Ms. Olga Talamante, Coordinator for Human Rights, Amer. Friends Serv. Comm., Mr. Lawrence T. Birns Director, Council on Hemispheric Affairs, COHA; Mr. Gino Lofredo, Washington Representative, Argentine Comm. for Human Rights, (CADHU).

ARGENTINA: PRISON POPULATION PROFILE

A. PRISON POPULATION ESTIMATES [1]

	Low	High
Prisoners held in official jails, recognized as such by the government	5,500	7,500
Prisoners being held in makeshift camps within Army, Navy, Air Force and Gendarmerie bases around the country and in selected camps in ranches, unrecognized [2]	5,000	7,000
Prisoners being held in local police stations and underground detention centers, undergoing interrogation or being held as hostages, unrecognized [3]	1,500	2,500
Totals	12,000	17,000

B. BREAKDOWN OF PRISON POPULATION [4]

	Low	High	Presumed killed [5]
1. Intellectuals: writers, journalists, lawyers, psychologists, medical doctors, secondary and university level educators, with no active connection to subversive organizations. This group is generally referred to as "the ideologues of subversion" in official government statements	500	750	(200)
2. Government: individuals directly or indirectly associated with the Campora and Peron governments, accused of corruption and other economic crimes, or accused of being associated with subversion	250	500	(200)
3. Trade union activists: factory or shop delegates, members of the "Comisiones Internas", or "Coordinadoras sindicales", trade union officials being held for union related activities which were legal until enactment of legislation after 3/25/76, without any associations with the subversive groups	750	1,000	(500)
4. Rank and file workers: being held for participation in or association with strikes, slow downs, or other exercise of traditionally recognized trade union activities considered legal until 3/25/76 and intended to obtain redress for work related or salary related grievances	3,000	4,000	(750)
5. Marginally related: individuals indirectly connected to known or presumed activists of the subversive organizations such as relatives, former friends and acquaintances, co-workers, fellow students, etc. This group is being held and presumed guilty by virtue of kinship or other association. In most cases there are no specific charges against them	2,500	3,500	(1,000)
6. Other left wing activists unrelated organizationally or ideologically with the subversive organizations. This group would be made up of activists who for various reasons oppose any form of violent action against government or business officials and consider these terrorism	600	1,000	(500)

ARGENTINA: PRISON POPULATION PROFILE—Continued

B. BREAKDOWN OF PRISON POPULATION [4]—Continued

	Low	High	Presumed killed [5]
7. Active members of subversive organizations: (E.R.P., Montoneros, and others) arrested while executing, conducting or preparing subversive activities as broadly defined by the government [6]	1,500	2,500	(2,000)
8. Leading activists of the subversive organizations: i.e. individuals within local, provincial or national leadership structures	150	250	(250)
9. Mistakes: individuals with no particular political commitment or activity being mistakenly held, or falsely accused	750	1,000	(500)
10. Common law prisoners: being held for strictly criminal acts, usually having been tried and found guilty. No political connections except those developed in prison [7]	2,000	2,500	(100)
Totals	12,000	17,000	(6,000)

C. PERCENTAGE BREAKDOWN OF PRISON POPULATION

	Percent	Percent of those presumed killed
1. Intellectuals	4.15	3.3
2. Government	2.10	3.3
3. Trade union activists	6.30	8.4
4. Rank and file	25.00	12.5
5. Marginally related	21.00	16.7
6. Other left	5.00	8.3
7. Active subversives	12.50	33.3
8. Leading subversives	1.25	4.2
9. Mistakes	6.20	8.4
10. Common criminals	16.50	1.7
Total	100.00	

[1] These figures include prisoners known to have been detained and known to be held live, as well as others commonly referred to as "disappeared persons". Some of the "disappeared" are presumed dead and would be included in the 6,000 figure under B. The sources for these estimates are based on an average of figures given by Amnesty International, the International Commission of Jurists, the Permanent Assembly for Human Rights, Argentine Government sources, and other human rights organizations in Argentina (Argentine Commission for Human Rights, Movimiento Ecumenico por los Derechos Humanos, Argentine League for Human Rights, and others).

[2] Estimates based on testimonies from released prisoners or their relatives or friends as to the number of prisoners they were held with and where.

[3] Estimated on the basis of testimonies from prisoners and estimated number of such facilities existing in the country at this time.

[4] Estimated on the basis of a sample of 1,000 known prisoners whose background has been made public. The resulting proportions were corrected to take in consideration the tendency of certain social groups to be better able to make their cases known to international human rights organizations (intellectuals, trade union leaders, etc.) in contrast to other groups with lower social visibility and international contacts (rank and file workers, left wing and other activists).

[5] The total number of people presumed killed since October 1975 is estimated on the basis of government figures of casualties in confrontations between security forces and alleged guerrillas. It is commonly known that these official figures include a high (60%) proportion of people killed by security forces in situations other than in military confrontations, these include: executions of political prisoners after being in prison, people killed during or as a consequence of torture, individuals executed after interrogation or after having been identified as members of subversive organizations, mistakes, people killed accidentally by security forces in anti-subversive operations. The date October 1975 was chosen because it marked a drastic increase in the number of people killed by security forces.

[6] Based on official government figures as qualified by representatives of the subversive organizations currently in exile.

[7] Based on official government figures for 1975, and preceding years.

SMALL BUSINESSES IN AMERICA

Mr. DOLE. Mr. President, small businesses in America have always been an important part of our national economy. The individual entrepreneur provides a unique fact to our economy which is not present in many parts of the world. To a large degree, the innovative small businessman and woman who have a new idea and are willing to work hard to make it work are responsible for the continuing vitality of the free enterprise system in America. A shining symbol of the opportunity for realization of the American dream is the individual business man and woman who is his or her own boss.

SMALL BUSINESS CONTRIBUTIONS

Small business concerns are particularly important in my own State of Kansas, where over 133,000 of a total of 137,000 businesses are listed in the "small" category. Not only is their economic impact significant, but small businesses exemplify the kinds of traits which have given our Nation its reputation for independence and innovation. Free access to the market has traditionally been granted to any individual who wants to start out his own business. Someone with an idea is welcome to give it a try. It is the total accumulation of past trials which created a nation where millions of citizens have been able to look upon their work with pride and satisfaction—knowing that they have made a personal contribution to the overall goal of sustaining the United States as a nation where any individual is able to pursue his dreams and ambitions.

PROBLEMS WITH GOVERNMENT

Yet, the invaluable roles performed by small business men and women are often overlooked by the Federal Government, which also tends to overlook the special needs of small enterprise. This problem is illustrated by one simple question posed to me by a constituent: "Why can't the Government help the small operators instead of harassing them."

Despite the importance of the small business community to our country, a condition has been developing which has placed the future of these businesses in doubt. Each year Congress attempts to deal with the increasingly complex problems facing our Nation. All too often, Congress only sets the broad outline of policy which is filled in by the individual agency. The result has been an astonishing proliferation of rules and regulations to dictate the conduct of a business.

In the vast majority of instances, these rules fail to acknowledge the variety of forms of business they apply to. The mom and pop grocery store must meet the same requirements and fill out the same forms as Safeway. OSHA inspectors judge the performance of five-employee machine shops under the same standards as Ford or GM's largest plant. Only a few agencies have exempted small businesses from the full burden of these rules.

SMALL BUSINESSES REGULATORY TARGETS

The actions of the Federal Energy Administration in investigating the small oil and gas concerns which predominate in Kansas is an excellent example of such inequity. FEA data indicates that the level of penalties and rollbacks in areas with small, stripper crude producers has been much higher than in areas where the normal size of companies and volume of production is much larger. I have worked extensively with the FEA to correct this situation.

Another example involved the Consumer Product Safety Commission and a small businessman in Hutchinson, Kans. The CPSC demanded that this mattress manufacturer meet the same flammability tests as Simmons even though he had to burn nearly 1 percent of his total

production. When the businessman naturally balked, two officials from Washington and two from Kansas City were sent to investigate. After repeated communications to the CPSC from myself, a satisfactory arrangement was devised. While this problem was resolved for the small businessman, it is patently unreasonable for agencies like the CPSC to treat a two-man firm like an industry giant.

BURDENS OF REGULATION

Numerous other individuals have provided me with accounts of the burdens placed upon them in endless paperwork requirements, coupled with even more endless regulations. Federal bureaucrats have the same handicap as Congress in having difficulty understanding how small businesses work. Their technical understanding of the problems or process of small enterprise is frequently limited. Even worse, agency regulations apply tough uniform standards which end up creating huge difficulties for small business, which may fail to get at the big business abuses they were really after. Bearing down on small businessmen is much easier for an agency, as they have no legal advisers who can defend their interests or even interpret the complex regulations for them. The end result is unequal enforcement of the standards, with the bulk of the agency's efforts being directed at forcing small business to comply with requirements they did not need in the first place.

S. 1974 WOULD HELP

Mr. President, I am adding my support to efforts to help make special provisions for small businesses in all Government rules and regulations. S. 1974, which I am cosponsoring, would require an evaluation of the special situation of small business in the promulgation of any rule. The Office of Advocacy in the Small Business Administration would study each rule before it is finalized. The already existing expertise of the Office of Advocacy would be used to suggest exemptions or size limits for every regulation considered.

The procedure established in S. 1974 would also apply to agency requests for information. In too many cases, bureaucrats treat information as a free commodity and disregard the expense and loss of productivity occasioned by filling out the form.

S. 1974 IS A STEP FORWARD

All the Government impediments to small businesses will not be eliminated by passage of S. 1974. Yet, it would signal that congressional awareness of small business problems is increasing. I support this legislation because I am certain that America will continue its climb and small businesses will be an important part of that growth.

NOTICE CONCERNING NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Andrew E. Gardner, of North Carolina, to be U.S. marshal for the western district of North Carolina for the term of 4 years vice Max E. Wilson.

Edward P. Gribben, of South Dakota, to be U.S. Marshal for the district of South Dakota for the term of 4 years vice George L. Tennyson, resigned.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Thursday, December 8, 1977, any representations or objections they may wish to present concerning the above nominations with a further statement whether it is their intention to appear at any hearing which may be scheduled.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess awaiting the call of the Chair.

There being no objection, the Senate, at 12:15 p.m., took a recess, subject to the call of the Chair.

The Senate reassembled at 12:41 p.m., when called to order by the Presiding Officer (Mr. HOLLINGS).

AUTHORIZATION TO FILE CONFERENCE REPORT ON CLEAN WATER BILL UNTIL MIDNIGHT TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the conferees on the part of the Senate may have until midnight tomorrow night to file the conference report on the clean water bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBSTITUTION OF A CONFEREE ON H.R. 9346

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senator from Maine (Mr. HATHAWAY) replace the Senator from Colorado (Mr. HASKELL) as a conferee in the conference on the social security amendment (H.R. 9346).

I understand this has been cleared all the way around.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11 o'clock tomorrow morning, and that that session on tomorrow be strictly a pro forma session with no transaction of any business, no statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM TOMORROW UNTIL 1 P.M., TUESDAY, DECEMBER 6, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its pro forma meeting on tomorrow it stand in recess until the hour of 1 p.m. on Tuesday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR CERTAIN ACTION DURING RECESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that during the recess of the Senate over until 1 p.m. on Tuesday next, the Vice President of the United States, the President pro tempore, the Acting President pro tempore, and the Deputy President pro tempore be authorized to sign duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that during those same recess periods the Secretary of the Senate be authorized to receive messages from the other body and from the President of the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider a nomination.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE JUDICIARY

Mr. CANNON. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the nomination of Mr. B. Mahlon Brown, III, of Nevada, to be U.S. attorney for the district of Nevada for a term of 4 years, reported favorably earlier in the day by the Committee on the Judiciary.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. I ask unanimous consent that the same day rule be waived.

The PRESIDING OFFICER. The clerk will state the nomination.

The assistant legislative clerk read the nomination of B. Mahlon Brown III, of Nevada, to be U.S. attorney for the district of Nevada.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. CANNON. I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CANNON. I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER THAT SENATORS HAVE UNTIL 5 P.M. TO INTRODUCE LEGISLATIVE PROPOSALS AND TO SUBMIT MATERIAL FOR THE RECORD

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senators may have until 5 p.m. today to introduce bills and joint resolutions, and to submit statements, petitions, and memorials for the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 11 a.m. tomorrow.

The motion was agreed to; and at 12:57 p.m. the Senate recessed until tomorrow, Friday, December 2, 1977, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate December 1, 1977:

DEPARTMENT OF ENERGY

George S. McIsaac, of the District of Columbia, to be an Assistant Secretary of Energy (Resource Applications) (new position).

IN THE AIR FORCE

The following officers for temporary appointment in the United States Air Force under the provisions of Chapter 839, Title 10 of the United States Code:

Brig. Gen. Garry A. Willard, Jr., xxx-... xxx-xx-...FR, (colonel, Regular Air Force) U.S. Air Force.

CONFIRMATION

Executive nomination confirmed by the Senate, December 1, 1977:

DEPARTMENT OF JUSTICE

B. Mahlon Brown III, of Nevada, to be U.S. attorney for the district of Nevada for the term of 4 years.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Thursday, December 1, 1977*

The House met at 10 o'clock a.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Therefore I tell you, whatever you ask in prayer, believe that you receive it, and you will.—Mark 11: 24.

Our Heavenly Father, we give thanks that You have called us to serve You as we serve our country, that the challenges of each new day call for the best in us and that the opportunities for service in Your name are ever present. This day help us to be aware of Your presence and give to us the assurance that You are with us now and always.

Grant unto us the insight, the integrity, and the inspiration to respond more fully to the demands made upon us as we seek to meet the needs of our people and the people of our world. May we be constructive in our attitudes and in our actions, may we endeavor to heal and not to hurt, and may we give support to endeavors that are genuinely good for all and not for a few only.

Bless our Nation and lead our leaders and our people in the paths of righteousness and peace: for Your name's sake. Amen.

CALL OF THE HOUSE

Mr. BAUMAN. Mr. Speaker, under rule I, clause 1, of the rules of the House, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. WRIGHT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 758]

Abdnor	Evans, Del.	Montgomery
Akaka	Fascell	Murphy, Ill.
Alexander	Findley	Nix
Ambro	Fisher	Nolan
Andrews, N.C.	Fithian	Perkins
Archer	Foley	Poage
Armstrong	Ford, Mich.	Pritchard
Ashbrook	Ford, Tenn.	Quayle
Ashley	Frey	Quie
AuCoin	Gammage	Railsback
Badham	Giaimo	Rangel

Duncan, Oreg.	McKinney	White
Edwards, Okla.	Mazzoli	Wiggins
Evans, Colo.	Mitchell, Md.	Wilson, C. H.
Wilson, Tex.	Wydler	
Wolff	Young, Alaska	

The SPEAKER pro tempore (Mr. BRADEMAS). On this rollcall 310 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

THE LATE FORMER CONGRESSMAN CARLETON J. KING

(Mr. PATTISON of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATTISON of New York. Mr. Speaker, I join with my colleagues in paying tribute to my immediate predecessor, former Congressman Carleton J. King of Saratoga Springs, N.Y., who died on November 19 during the recess. A respected Member of the House for 14 years, he represented his constituents in upstate New York with responsibility, dedication, and integrity. He enjoyed a long political career on the local, State, and National levels, entering public service in 1936 as acting city judge for his hometown of Saratoga Springs, and serving for many years as assistant district attorney and district attorney of Saratoga Springs. First elected to the House of Representatives in 1960 when he resigned as Saratoga County district attorney, he served his district until 1974. Since then, he had served on the Board of Visitors of the U.S. Military Academy, as a consultant to the Veterans' Administration in Washington, and as a partner in his law firm in Saratoga Springs.

He was a loyal and devoted public servant, respected by his constituents, his friends, and his colleagues. He will be greatly missed, and I extend to Mrs. King and his family my deepest sympathy.

GENERAL LEAVE

Mr. PATTISON of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the life, character, and public service of the late Honorable Carleton J. King.

The SPEAKER pro tempore. Is there objection to the request of the gentlemen from New York?

There was no objection.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. PATTISON of New York. I yield to the gentleman from Arizona.

Mr. RHODES. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from New York (Mr. PATTISON).

Carleton King, our able former colleague, was a good friend to many of us and we shall miss him.

Mr. Speaker, I, too, extend my condolences to the King family.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. PATTISON of New York. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I, too, join with my colleague, the gentleman from New York (Mr. PATTISON), in paying tribute to our former colleague, Carleton King.

I had the pleasure of serving with him for 14 years in this body, including serving on the Committee on Armed Services for most of that time. He was a very staunch defender of the country, a man who had courage. He was outspoken in his views and was admired and respected by every Member of this body.

Mr. Speaker, I know that he will be missed, and I join in extending our sympathy to Mrs. King and to their family.

Mr. PATTISON of New York. Mr. Speaker, I thank the gentleman for his remarks.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. PATTISON of New York. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, the passing away of former Congressman Carleton King on November 19 brought sadness to the many friends, colleagues, and constituents throughout this Nation who he had touched during his 37 years of public service. I was one of them, and I know how much he will be missed.

After having served as a city court judge in Saratoga Springs and as Saratoga County district attorney, Carleton King came to the House of Representatives in 1960, where he worked diligently on behalf of his constituents until 1974. He was a leader in every sense of the word, fighting for what he felt would be beneficial to his constituents of upstate New York who sent him to Washington in seven different elections.

Carleton withstood the test of time in Congress, and I had the good fortune to serve closely with him on the U.S. Military Academy's Board of Visitors during the 93d and 94th Congress. As chairman of the Board of Visitors, Carleton worked to help bring about several significant improvements at the Academy.

Prior to my election to Congress in 1972, during my 6 years of service in the New York State Legislature, on numerous occasions Representative King assisted my office with projects of mutual benefit to the State of New York.

I know my colleagues join with me in offering our condolences to his widow, Constance, in Florida; his son, Carleton, and his daughter, Mrs. James Murphy.

Carleton King was a leader in public service who will long be remembered.

Mr. McEWEN. Mr. Speaker, will the gentleman yield?

Mr. PATTISON of New York. I yield to the gentleman from New York.

Mr. McEWEN. Mr. Speaker, I thank the gentleman for yielding.

I wish to associate myself with the remarks here today.

I express my condolences to Connie King and to her family.

Mr. Speaker, I knew Carleton King before coming to Congress. At that time I was in the New York Senate, and his congressional district overlapped my Senate district.

I enjoyed my congressional service with him for the decade that we were here in the House.

Mr. Speaker, I know how sorely missed he will be by all of his friends, and certainly we all send our deepest condolences to Connie, his widow, to his daughter, Mrs. Murphy, and to his son, Carleton.

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. PATTISON of New York. I yield to the gentleman from New York.

Mr. FISH. Mr. Speaker, I was deeply saddened to learn of the death of a former colleague and good friend, Carleton James King.

Many of us were fortunate to have had the opportunity of working with Carleton King while he served his 14 years in the House of Representatives. It was my good luck to have Carleton King represent a neighboring congressional district, so that we had the chance to develop a close working relationship trying to solve many of the common problems facing our two constituencies.

I would like to take this opportunity to express my personal deep regret and that of the people of the 25th Congressional District to the King family.

Mr. WALSH. Mr. Speaker, will the gentleman yield?

Mr. PATTISON of New York. I yield to my colleague, the gentleman from New York.

Mr. WALSH. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise to join with my colleagues in paying tribute to the late Carleton King.

I shall never forget when I first came to the Congress how his friendly and gracious manner and offer of assistance made me feel so at ease.

He was justly proud of his hard work, untiring efforts and achievements as a member of the House Committee on Armed Services.

Carleton had the reputation of being a sagacious lawyer from the time he served as acting city judge in his native Saratoga Springs, assistant district attorney and the district attorney of Saratoga County until his election as a Member of this great body.

He was admired and respected by the people he so ably represented for he was a knowledgeable, kind, and understanding human being.

My wife, Mary, and I extend our deepest sympathy to his family.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. PATTISON of New York. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I thank the gentleman for yielding to me and I too wish to join our colleagues in paying our deep respects to Carleton King. I might add that I became a member of the House Committee on the Judiciary shortly after the transferred from that committee to the Committee on Armed Services.

Mr. Speaker, my experience in this Chamber during the time when both Carleton King and I served together established in my mind that Carleton was, indeed, a conscientious and devoted legislator.

His particular concern with our national security and his thoroughness in exploring the relative strengths of our Nation as contrasted with those of our potential enemies helped materially in maintaining a position of superiority from which we were able at all times to negotiate.

Mr. Speaker, the physical difficulties which Carleton King experienced were most painful and trying during long periods preceding his final demise. The courage and tenacity which Carleton displayed were an inspiration to all of us who knew and worked with him.

Mr. Speaker, I know that Carleton King loved this House and was beloved by those with whom he served. In paying final tribute to our former colleague, Carleton King, I wish also to express my deep sympathy to his widow Constance, and other members of his family.

Mr. WYDLER. Mr. Speaker, I had the pleasure of knowing Carl King for many years when he served as a Member of Congress.

In addition to being a fine legislator, he was a kind and quiet man, whose presence added to the dignity of the House and earned him the respect of his colleagues.

Of course, we will miss his occasional visits, but we will remember the service he gave, not only to the people of his district and the country, but to the friendship he extended to so many of us who are still Members of this body.

He served the 29th District of New York from the 87th Congress through the 93d. Born in Saratoga Springs, June 15, 1904, he was educated in the public schools; graduated from Union University with an LL.B degree in 1926 and engaged in the practice of law in the firm of King, Duval, and Murphy, Saratoga Springs, N.Y. He was a member of the county and State bar associations and was admitted to practice before the U.S. Supreme Court. From 1936 to 1941 he was acting city judge, city of Saratoga Springs; assistant district attorney, Saratoga County from 1942 to 1950 and district attorney from 1950 until his election to Congress in 1960. Carl's offices included president of the New York State District Attorneys' Association in 1955 and president of the Saratoga County Bar Association in 1959 and 1960.

Mr. HANLEY. Mr. Speaker, I would like to add my voice to those paying tribute to our former colleague, Representative Carleton J. King of Saratoga Springs, N.Y.

Congressman King enjoyed a long political career on both the State and National levels, entering public service in 1936 as acting city judge for Saratoga Springs. He was first elected to the House of Representatives in 1960, when he resigned as Saratoga County district attorney.

Carleton King represented the 29th District of New York for 14 years, and he represented the people of his district in the true sense of the word, voting to reflect what he perceived were the wishes of his constituents.

Certainly, Carleton King and I differed on some of the issues, but no one can deny he was an exemplary public servant who earned and deserved the respect of his constituents, his friends, and his colleagues.

We will miss Carleton King, and our heartfelt prayers go out to Mrs. Constance King and her entire family.

Mr. ADDABBO. Mr. Speaker, Carleton King was one of the nicest men ever to serve in this House, as well as one of the most courageous. All of us who served with Carl remember how bravely he fought back from the debilitating results of a stroke. And we all remember with what good grace he accepted the limitations placed on his movements by the stroke. The best in a man comes out when he is faced with adversity, and in Carl's case. his best was impressive at the very least and inspirational to us all.

Carl came from Saratoga Springs and was lucky enough to have known it well throughout a long lifetime. In fact, if there was any area in which Carl would bend your ear mercilessly, it would be on the subject of his hometown. A legitimate pride, indeed, and he was more active in promoting its virtues than any Chamber of Commerce could ever be.

Carl and I came to Congress together in 1961 and although we differed on legislative approaches and politics in general, we formed a solid and friendly relationship that I am happy to say existed to the day of his death.

A man is many things in his lifetime, and Carl was husband and father to two children, a devoted family man. But he was also a highly visible public man, serving as city judge, assistant district attorney, district attorney, and for 14 years, a distinguished Member of this House. As a vital and active member of the Armed Services Committee he will be remembered as a strong advocate for and defender of our Nation's defense program.

He lived an enviable life, and he enjoyed himself through good times and bad, and he was a friend to all who needed help and encouragement. We have missed him here in the House since his retirement from Congress. I was deeply grieved to hear of his death at 73.

My sympathies and condolences go out to his family at this time.

Mr. KEMP. Mr. Speaker, it gives me great pleasure to join my colleagues in the House of Representatives to pay tribute to an outstanding American dedicated public servant, and dear personal friend, our former colleague, Congressman Carleton King. Carleton King was unquestionably an inspiration to all who touched his life, and as a freshman Congressman, I can well recall with great appreciation the moments of encouragement, assistance, and wisdom that he shared with me.

Carleton King's career as a Congressman was marked by loyalty not to personal interests, but to the American people. His unceasing efforts to serve and protect the taxpayers of our Nation during the seven successive terms in which he served in the Congress are proof of his dedication to enhance the welfare of all Americans.

Carleton King served his party by serving his country first. He is an example which each and every one of my colleagues are proud to acknowledge and for which all Americans can be grateful.

Mr. WOLFF. Mr. Speaker, I today join with my colleagues in mourning the loss of the Honorable Carleton J. King, former Representative from New York's 31st, 30th, and 29th Congressional Districts.

Carleton King distinguished himself as a public servant at both the local and national levels. He served 6 years as the acting city judge of the city of Saratoga Springs, followed by 9 years as assistant district attorney for Saratoga County. From 1950 until his election to the 87th Congress in 1960, Carleton King served as district attorney to Saratoga County. He was president of the New York State District Attorneys' Association, and president of the Saratoga County Bar Association.

Following his election to the 87th Congress, his deep concern for his constituents at home as well as for matters of national policy, led to his reelection to the following six Congresses. It was indeed my privilege and honor to serve in the Congress with him.

I extend my deepest sympathy to his wife, Constance, and to his family. He was a public servant of the highest tradition who will long be remembered by his countless friends and admirers in New York and Washington.

Mr. MURPHY of New York. Mr. Speaker, even in the best of circumstances, a eulogy is a difficult way to immortalize the memory of a friend. But perhaps that is one of the finest tributes I could pay to a man such as Carleton King: He was a true friend. It did not matter that he was among the best in his field of politics, nor did it matter that he differed widely from his colleagues on legislation as often as he agreed. Beyond all that—beyond the party politics, the pressing legislative issues of a given moment, or simply the continuing requirements of a life in publice service—his was a friendship to be treasured.

He was a lawyer, a judge, an assistant district attorney, and district attorney. He was all of these things in rapid succession because he excelled at each, and was able to contribute significantly to the concept of justice under the law. He also led the development of legislation designed to cope with organized crime at the specific request of New York Governor Averell Harriman following the much-publicized breakup of an Apalachin, N.Y., meeting of top-level crime figures. His expertise was highly valued at all levels of government.

After a career of accomplishment in the local and State legislative arenas, he moved to the national scene where he was chosen to serve for seven consecutive terms in the U.S. House of Representatives from New York's 29th Congressional District. Not only did he serve their interests in Congress, but he proved himself to be one of the ablest experts on military affairs during his service on the Armed Services Committee. He was not limited by his past experiences, but was inspired by his future challenges. Among other things, his military expertise and the high regard which the military community held for him led to his chairmanship of the board of visitors of the U.S. Military Academy, where I had the pleasure to serve with him in addition to our parallel careers in Congress.

During his final years, he was not in good health, and endured a number of operations. But in spite of such setbacks, he was always a busy man, expending every ounce of his energy in public service. If we are to believe the Roman poet Virgil's declaration that "the noblest motive is the public good," then Carleton King was, indeed, a noble man. I am proud to have been his friend.

Mr. LENT. Mr. Speaker, it is with great sadness that I rise today to pay tribute to a former colleague, a former member of the New York congressional delegation, and a friend, the late Carleton King.

Serving with Mr. King in the House of Representatives from 1971 through 1974 gave me the opportunity to witness the work of a distinguished American who truly personified conservative philosophy. His firm commitment to our American system was consistently demonstrated by his support for a strong national defense and his staunch belief in our free enterprise system.

Before the concept became popular, former Congressman King called for tax breaks for Americans bearing the rising costs of higher education.

Indeed, he served his constituents and our Nation well, and I want to extend to his family and loved ones my deepest sympathy upon his passing.

Mr. WHITEHURST. Mr. Speaker, while the House was on its recent recess, I received the sad news that our former colleague, Carleton King of New York, had passed away.

Mr. Speaker, although Carleton King had already ended his career in the House, I regard his loss as a loss for the Nation as well as a personal one. Few men have loved their country as much as he did.

I recall our joint service on the Armed Services Committee, and I particularly remember his vigilance and concern for the Nation's security. Alert to these needs, he could be depended upon to bring his persuasive powers to bear in the committee and in the full House. The logic and force of his arguments were invariably telling.

In my freshman term, I found his counsel wise and understanding. Above all, Carleton's friendly spirit made this body a more pleasant place in which to serve. His character and integrity enhanced the reputation of the House; both his district and the Nation were well served by his dedication and patriotism.

Mr. Speaker, I join with my colleagues both from the State of New York and from its neighbors, from within the Committee and in the House at large, in expressing my condolences to Carleton King's family. We and they are the poorer for his going, and we will all miss him.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE A FURTHER CONFERENCE REPORT ON H.R. 9375 MAKING SUPPLEMENTAL APPROPRIATIONS FOR FISCAL YEAR 1978

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a further conference report on the supplemental appropriations bill, H.R. 9375.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, I would ask the gentleman from Texas (Mr. MAHON) if we might have some explanation as to what this is all about.

Mr. MAHON. Yes; if the gentleman will yield, I would state that the House, ill advisedly, in my judgment, yesterday recommitted the conference report on the supplemental appropriations bill therefore delaying perhaps the adjournment of the House for recesses, and so forth. Also we will have to go back to conference. We have to meet with the Senate. The Senate was out yesterday and some of the Senators have not yet returned. As I say, we will have to go back to conference on the supplemental and produce another conference report, consideration of which will be scheduled, I assume, next Tuesday. The leadership will have to discuss the matter of scheduling.

Mr. ROUSSELOT. It will be scheduled for next Tuesday?

Mr. MAHON. That would be a matter for the leadership to determine. It cannot be brought back today.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, is it pretty well determined that it will come back to us on next Tuesday?

Mr. MAHON. I would have to refer to the distinguished majority leader, the

genleman from Texas (Mr. WRIGHT), with respect to that.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I will be glad to yield to the gentleman from Texas.

Mr. WRIGHT. First, let me state that I was hoping that after this colloquy that I would be able to discuss the program for today, the remainder of this week and next week. However, the simple answer to the gentleman's question is that yes, we except to bring it up on Tuesday next.

Mr. ROUSSELOT. Mr. Speaker, I appreciate that explanation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I take this time to inquire of the distinguished majority leader as to the program for the balance of this week and next week if the gentleman is prepared to do so.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the distinguished gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, the program for today and the balance of the week consists of two Houses committee funding resolutions, one for the Committee on Small Business, House Resolution 921; and House Resolution 915, providing additional funds for the Subcommittee on International Organizations of the House Committee on International Relations.

This should not take too much time. I see little if any controversy here, but I have learned not to underestimate the capacity of our colleagues to find controversies. I would hope that the House would be able to adjourn by noon today or shortly thereafter. However, the gentleman knows, as well as I do, that such hopes are not always rewarded.

There will be no session tomorrow.

On Monday the House will meet at 12 o'clock noon with no legislative business scheduled. It will be simply a pro forma session.

For Tuesday and the balance of next week: The House will meet at noon on Tuesday and, if necessary, on Wednesday, Thursday, and Friday at 10 o'clock a.m.

Here is what we have scheduled:

On Tuesday, the conference report on H.R. 9375, the Supplemental Appropriations Act of 1978. The reason it must be rescheduled for Tuesday of course, is because the House recommitted it yesterday.

Following that we will consider the Labor-HEW and the District of Columbia appropriations matters. As the gentleman knows, controversy over one provision of this bill is the stalemate that has held us here, and let us hope that it may be amicably resolved.

In addition to that, we have a conference report on H.R. 9418, the Public Health Service Act Amendments; and the conference report on H.R. 6666, the Legal Services Corporation.

We also will consider S. 1340, the Energy Research and Development Administration Authorization Act of 1978. As the gentleman knows, this is a modified version of the bill that was vetoed by the President. A somewhat trimmed bill has been prepared in anticipation that it would pass, embodying nothing that was not already in the bills previously passed, and that it will meet the approval of the President.

That is what we have on the schedule. We think it reasonable to expect that Tuesday and Wednesday would be sufficient for us to conclude the business next week, but that is not definite.

Mr. RHODES. I thank the gentleman.

May I inquire as to whether there is any reason to be hopeful that the Labor-HEW controversy will be solved? Since our colloquy of yesterday, has there been any action taken to the knowledge of my good friend?

Mr. WRIGHT. I will say to the gentleman that I have faith. Faith is the substance of things hoped for and the evidence of things not seen.

Mr. RHODES. I thank the gentleman for a very definitive answer.

Now may I inquire further as to S. 1340. It is my understanding that this will come to the House with a very special type rule which will allow one amendment, and one amendment only, which would in effect change the bill S. 1340 to conform to the objections expressed by the President of the United States at the time a similar bill was vetoed.

Mr. WRIGHT. Yes; I think the gentleman has described it precisely.

Mr. RHODES. And now, Mr. Speaker, may I inquire further—and I certainly do this without intending to try to run the business of the House because I do not have the votes to do that—but as to the conference report on H.R. 9418, the Public Health Service Act amendments. If that conference report is ready, could it not be brought up today after the two items of business the majority leader has mentioned, so that we could get that out of the way, and then possibly come in at 10 o'clock on Tuesday. It seems to me that with these changes there is a chance that we could finish the work of the House on Tuesday. I am sure from the inquiries I have gotten from Members on both sides this would be a very welcome development.

Mr. WRIGHT. In response to the gentleman's suggestion, I can only say that to the extent possible we always try to accommodate the chairman of the committee involved, and it is the wish of the chairman of this committee that the conference report on H.R. 9418 be brought up on Tuesday rather than today.

As for the gentleman's comment that he lacks the capacity to run the business of the House for want of having the votes to do so, let me simply say: Welcome to the club.

Mr. RHODES. I certainly must say this confirms my suspicion that nobody is running the House.

May I inquire further as to the possibility of coming in at 10 o'clock on Tuesday; it seems to me there may be some profit in that.

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield further, the decision was made by the Speaker and others this morning that inasmuch as Members will likely not be here on Monday and may have Monday night engagements and even Tuesday morning engagements to which they have committed themselves, it would be helpful to most Members to come in at noon, rather than at 10 o'clock on Tuesday. But on Wednesday or any other necessary day next week, we will come in at 10 o'clock, so as to expedite the business of the House.

With regard to the gentleman's remarks about nobody running the House, I think the basic problem is one that has frustrated self-styled leaders in Government ever since the days of Thomas Jefferson and even ancient Greece—the problem is a thing called democracy.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, this is a relatively minor item, but normally we have the Private Calendar on Tuesday. Do we intend to do that?

Mr. WRIGHT. I expect to ask unanimous consent that the Consent Calendar be set for Tuesday, rather than Monday, since we have a pro forma session Monday.

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield further, I think it is normally Tuesday, that is right. Is the gentleman talking about the Consent Calendar?

Mr. WRIGHT. Yes, the Consent Calendar.

Mr. ROUSSELOT. What about the Private Calendar?

Mr. WRIGHT. It would be my thought we could handle both the Private Calendar and the Consent Calendar on Tuesday. But the first order of business will be the conference report on the Supplemental Appropriations Act.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, is it still the plan, as referred to by the gentleman from Washington (Mr. FOLEY) the other day, for the majority to keep us here the remainder of December in these phony pro forma sessions, against the almost

impossible event that we will have an energy bill on which to vote.

I know the President has announced that he is leaving the country, no matter what the Congress does and no matter what the Congress does not do. Are we going to be kept here in these wasteful, costly sessions every day?

Since the season of Advent is with us, the sleighbells sound in the distance and Christmas beckons, can the Members go home to our children, our hearthsides, our families, or must we continue this legislative charade.

Mr. WRIGHT. Mr. Speaker, I thank the gentleman for his comments and wish him a happy Yuletide, too.

Mr. BAUMAN. Mr. Speaker, the gentleman by his nonresponse has again proved that nobody is running the House.

PERMISSION TO CALL CONSENT CALENDAR ON TUESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent to call the Consent Calendar on Tuesday next, rather than on Monday, when the House will be in a pro forma session only.

The SPEAKER pro tempore (Mr. YATES). Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule on Wednesday of next week be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, this is to bring up the Private Calendar, are we going to bring it up anyway?

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield, I believe the Private Calendar would be in order Tuesday without any unanimous consent request.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT TO MONDAY, DECEMBER 5, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on Monday next for a pro forma session.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

TO REQUIRE THE PRESIDENT TO ASSIST STRIKING FARMERS

(Mr. SEBELIUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SEBELIUS. Mr. Speaker, yesterday I introduced House Concurrent Resolution 423, a resolution calling upon President Carter to use all of the authority provided in the 1977 farm bill to assist farmers who are in the midst of the worst farm price, credit and cash flow crisis since the Great Depression.

In my remarks yesterday, I said the purpose of this resolution was to inspire the President and this administration to assist farmers. The blunt fact of the matter is that current farm policy is leaving hard-pressed farmers little alternative but to connsider militant action and strikes. Throughout the High Plains and other farm areas of the country a growing grass roots farm organization called American Agriculture is laying the groundwork for a nationwide farm strike December 14.

How could thousands of farmers, meeting in State after State be serious in considering action that few would have believed possible only a year ago? Mr. Speaker, these are not normal times. Our farmers are not crying wolf. In Kansas, a study conducted in my behalf by over 300 banks last summer, shows Kansas farmers in serious trouble. Mainstreet America is in trouble. The farm wives who came to Washington last spring warning we are in danger of losing a generation of farmers were not exaggerating. Farmers of all political persuasions who have joined the American Agriculture movement are serious in their strike intentions.

As a consequence, Mr. Speaker, I am introducing today legislation to require action by the President and the Secretary of Agriculture to increase farm income and to improve the effectiveness of farm programs. The administration can, and I hope will, utilize all of the authority within the new farm bill to provide practical help to farmers as I outlined in the resolution I introduced yesterday. However, should this action not be taken, the legislation that I am introducing today would require that action be taken.

PRESIDENT CARTER COMMENDED IN APPROACH TO KEY POLICY-MAKING POSITIONS

(Mr. DERWINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DERWINSKI. Mr. Speaker, President Carter is to be commended for his latest Executive order amending the civil service rules to except from the career service regional director positions in four agencies.

The President's action is a forthright approach to the problem of providing more flexibility and responsiveness in the executive branch of Government. It is a position which I have long advocated, and I certainly do not "view with alarm" the designation of certain key policy-making positions as noncareer.

Under the President's order, regional director positions in the Community Services Administration, ACTION, the Defense Civil Preparedness Agency, and the General Services Administration will be noncareer jobs.

If the President is to succeed in his effort to get a better handle on the Federal bureaucracy, there must be more political appointees in the executive branch of Government. Based upon his Executive order, President Carter is coming to grips with the problem in an open, honest, and proper way.

I certainly do not advocate or support wholesale raids on the career civil service system, but an administration, to be effective, must be able to depend upon the loyalty and responsiveness of persons in policymaking positions.

An increase in the number of political appointments in the executive branch is the key to effective reorganization. Rather than resort to manipulation of the civil service system, the President has chosen the honorable way to solve the problem. I congratulate him.

HOUSE OF REPRESENTATIVES SHOULD INITIATE HEW SUPPLEMENTAL APPROPRIATION BILL

(Mr. CARTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARTER. Mr. Speaker, it seems that the House and the Senate are hopelessly divided on the abortion issue. I think it is up to us, Mr. Speaker, since revenue bills originate in the House, to initiate a continuing appropriation. Then, the onus will be on the other body to act.

It reminds me, really, of when I was a doctor back in Kentucky, and I had two patients, John and Mary, who had been happily married for some time. Mary was a weakly little mountain girl and was in what we referred to as a delicate condition. John asked me to take care of her. I said, "Yes, John, if you will not let it happen again." John said, "I will hang myself before I let it happen again." So I cared for her, and a year went by uneventfully. One dark, rainy night, John came to me and said, "Doctor, Mary is in trouble. Will you come and help us out?"

I said, "Yes, I will." With fear and trembling, I got in the jeep and went to her home. But it seems that a benevolent Providence must have been hovering over that little house, because within an hour a bouncing baby boy was born, crying lustily as he came into the world, and Mary got along famously. I turned to John, and I said, "John, you told me that if this happened again you would hang yourself." He said, "Yes, sir, I did." I got a rope and a chair, and I threw the

rope over the rafter, put the rope around my neck, tied it to the chair and started to kick the chair away. Then I started to think. I thought that if I kicked that chair out, I might accidentally hang an innocent man.

If we pass the continuing appropriation, the onus will be on the "other body." And if anyone accuses us in the House of not doing our duty, he will be hanging innocent men.

REQUEST FOR PRESIDENT TO INTERVENE AGAINST FEDERALLY FUNDED ABORTIONS

(Mr. BAUMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BAUMAN. Mr. Speaker, today the gentleman from Minnesota (Mr. OBERSTAR), the gentleman from Kentucky (Mr. MAZZOLI), the gentleman from Illinois (Mr. HYDE), and myself have sent a letter to President Carter, asking the President to immediately and directly intervene to resolve the impasse that exists between the two Houses of Congress on the issue of federally funded abortions. The President has made clear his opposition to Federal funding of abortions, both as a candidate and as President of the United States. It seems to me that, since this is one of the last major issues remaining before we conclude this session, it is incumbent upon the President to intervene directly with the Members of the other body, especially the leadership of the Committee on Appropriations.

Mr. Speaker, it is inconceivable to me a member of my party should be able to control the administration's policy on this issue. But that is exactly what has happened in the other body, where one Senator of my party has constantly, without compromise, in a totally intransigent manner held up resolution of this matter. The House has repeatedly spoken and we are not going to sell out on the right to life issue.

So I hope President Carter will immediately talk to the Democratic leadership of the Senate, help resolve this issue, and stand by the principles of his enunciated policy. Then I think we can solve this in a reasonable period of time, possibly next week.

REPORT ON RESOLUTION AUTHORIZING FUNDS FOR INVESTIGATION OF KOREAN-AMERICAN RELATIONS BEING CONDUCTED BY SUBCOMMITTEE ON INTERNATIONAL ORGANIZATIONS OF COMMITTEE ON INTERNATIONAL RELATIONS

Mr. ANNUNZIO, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–826) on the resolution (H. Res. 915) authorizing funds for the investigation of Korean-American relations being conducted by the Subcommittee on International Organizations of the Committee on International Relations, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION TO PROVIDE FUNDING FOR THE COMMITTEE ON SMALL BUSINESS

Mr. ANNUNZIO, from the Committee on House Administration, submitted a privileged report (Rept. 95–827) on the resolution (H. Res. 921) to provide funds for the further expenses of the investigations and studies of the Committee on Small Business, which was referred to the House Calendar and ordered to be printed.

FUNDING FOR THE COMMITTEE ON SMALL BUSINESS

Mr. ANNUNZIO. Mr. Speaker, by direction of the Committee on House Administration, I call up a resolution (H. Res. 921) to provide funds for the further expenses of the investigations and studies of the Committee on Small Business, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 921

Resolved, That for the further expenses of the investigations and studies to be conducted by the Committee on Small Business acting as a whole or by subcommittee, not to exceed $160,000 including expenditures for the employment of investigators, attorneys, and clerical and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration.

SEC. 2. No part of the funds authorized by the resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House, and the chairman of the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with, and that it be printed in the RECORD.

The SPEAKER pro tempore. (Mr. YATES). Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE AMENDMENT

The SPEAKER pro tempore. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Strike out all after the resolving clause and insert: That for the further expense of the investigations and studies to be conducted by the Committee on Small Business acting as a whole or by subcommittee, not to exceed $120,000 including expenditures for the employment of investigators, attorneys, and clerical and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee signed by the chairman of such committee, and approved by the Committee on House Administration.

SEC. 2. No part of the funds authorized by the resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House, and the chairman of the Committee on Small Business shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the committee amendment be dispensed with, and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ANNUNZIO) is recognized for 1 hour.

Mr. ANNUNZIO. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Ohio (Mr. DEVINE) for debate purposes only, pending which I yield myself such time as I may consume.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Speaker, House Resolution 921 provides funds for the Committee on Small Business in the amount of $120,000. The committee's budget was approved by the House of Representatives on March 21, 1977. At that time, Mr. SMITH, chairman of the committee, indicated during a colloquy that the Subcommittee on Accounts recommendation of $515,000 budget was too steep of a cut. The committee originally requested $634,320. Mr. SMITH indicated that, due to the cut, he was certain that he would have to come back with a supplemental resolution.

In his supplemental resolution request to the Subcommittee on Accounts, Mr. SMITH requested $160,000. A review of his monthly reports indicated that he has substantially increased his staff during the last 4 months, so that, in the month of October, the committee was expending at a rate of $56,000. If one computes the supplemental request by the formula outlined in the continuing resolution—1/12 of a committee's budget is what they are to operate on for the months of January–March—$160,000 actually represents $675,000 annual budget. Based on that information and also the fact that they should be requesting an amount equal to their original request—$634,320—the Subcommittee on Accounts recommended a supplemental funding request of $120,000.

Mr. DEVINE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I agree with the remarks of the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. ANNUNZIO. Mr. Speaker, I move the previous question on the resolution, as amended.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution as amended.

The resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 9418, HEALTH PROFESSIONS EDUCATION AMENDMENTS OF 1977

Mr. OTTINGER. Mr. Speaker, I ask unanimous consent, on behalf of the chairman of the Committee on Interstate and Foreign Commerce, to file a conference report on the bill (H.R. 9418) to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition to medical schools' receiving capitation grants under such Act, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

CONFERENCE REPORT ON H.R. 9418, HEALTH PROFESSIONS EDUCATION AMENDMENTS OF 1977

Mr. OTTINGER (on behalf of Mr. STAGGERS) filed the following conference report and statement on the bill (H.R. 9418) to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition to medical schools' receiving capitation grants under such Act:

CONFERENCE REPORT (H. REPT. No. 95-828)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9418) to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition to medical schools' receiving capitation grants under such Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That (a) section 771(b)(3) of the Public Health Service Act is amended to read as follows:

"(3)(A) Except as provided under subparagraph (D), a school of medicine may not receive a grant under section 770 to be made in the fiscal year ending September 30, 1978, unless its application for such grant contains or is supported by assurances satisfactory to the Secretary that such school will increase its enrollment of full-time, third-year students as prescribed by subparagraph (B).

"(B) The enrollment increase referred to in subparagraph (A) is an enrollment increase in a school of medicine—

"(i) which is to occur in school year 1978–1979,

"(ii) in the number of full-time, third-year students over the number of full-time, second-year students who successfully completed the second-year program of such school in the preceding school year and enrolled in the third-year class of such school, and

"(iii) which is not less than 5 per centum of the number of—

"(I) full-time, first-year students enrolled in such school in school year 1977–1978, or

"(II) full-time, third-year students enrolled in such school in school year 1977–1978, whichever is less.

"(C) In determining the number of full-time, third-year students enrolled in a school in the school year in which the increase is required by subparagraph (B)(i)—

"(i) full-time, third-year students of such school who were not second-year students in such school and—

"(I) who are not citizens of the United States,

"(II) who were previously enrolled in a school of medicine to which the requirement of subparagraph (A) applies,

"(III) who were previously enrolled in a school of medicine to which the requirement of subparagraph (A) does not apply because of subparagraph (D) and for whom a position in the third-year class of such school was available in such school year,

"(IV) who first enrolled after October 12, 1976, in a school of medicine not in a State,

"(V) who were previously enrolled in a school of dentistry or a school of osteopathy, or

"(VI) who were previously enrolled in a school of medicine which is in a State and which is not accredited by the body or bodies approved for such purpose by the Commissioner of Education, shall not be counted; and

"(ii) full-time, second-year students enrolled in such year who are citizens of the United States and who were first enrolled before October 12, 1976, in a school of medicine not in a State shall be counted as third-year students.

"(D) The Secretary may waive (in whole or in part) the requirement of subparagraph (A) for a school of medicine—

"(i) if the Secretary determines, after receiving the written recommendation of the appropriate accreditation body or bodies (approved for such purpose by the Commissioner of Education) that compliance by such school with such requirement will prevent it from maintaining its accreditation;

"(ii) upon a finding that, because of the inadequate size of the population served by the hospital or clinical facility in which such school conducts its clinical training, an increase in its enrollment of third-year students to meet such requirement will prevent it from providing high quality clinical training for each of its third-year students; or

"(iii) if the Secretary determines that such school has made a good faith effort to meet the requirement of subpargraph (A) but has been unable to meet such requirement solely because there is an insufficient number of students who, under this paragraph, are eligible to be counted in determining if the school has met such requirement.

The requirement of subparagraph (A) does not apply to the application of a school of medicine for a grant under section 770 if in school year 1977–1978 such school had an enrollment of full-time, first-year students which exceeded its enrollment in such school year of full-time, third-year students by at least 25 per centum.

"(E) A school of medicine which did not receive a grant under section 770 because it did not comply with the applicable requirements of this paragraph shall not be eligible to receive a grant under such section to be made in the fiscal year ending September 30, 1979, or in the next fiscal year.".

(b) Section 772 of the Public Health Service Act is amended by adding at the end thereof the following new subsection:

"(e) For purposes of administering the requirements of section 771, a reference to a year class of students is a reference to students enrolled in that class for the first time.".

SEC. 2. Section 771(d)(2) of the Public Health Service Act is amended (1) by striking out "In" and inserting in lieu thereof "In the case of a school of dentistry which in school year 1976–1977 had at least six filled, first-year poistions in dental specialty programs, in", (2) by striking out "a school of dentistry's" and inserting in lieu thereof "such a school's", (3) by striking out "filled positions" each place it occurs and inserting in lieu thereof "filled, first-year positions", and (4) by striking out "shall be positions" and inserting in lieu thereof "shall be first-year positions".

SEC. 3. (a) Subsection (a) of section 748 of the Public Health Service Act is amended to read as follows:

"(a) The Secretary may make grants to—

"(1) accredited schools of public health, and

"(2) other public or nonprofit institutions which provide graduate or specialized training in public health and which are not eligible to receive a grant under section 749, to provide traineeships.".

(b) Section 748(b)(3)(B) of such Act is amended (1) by striking out "or" at the end of clause (iii), (2) by striking out the period at the end of clause (iv) and inserting in lieu thereof ", or" and (3) by adding after such clause the following:

"(v) preventive medicine or dentistry.".

(c) Section 748(c) of such Act is amended (1) by striking out "$8,000,000" and inserting in lieu thereof "$9,000,000", and (2) by striking out "$9,000,000" and inserting in lieu thereof "$10,000,000".

(d) The heading for section 748 of such Act is amended to read as follows:

"PUBLIC HEALTH TRAINEESHIPS"

SEC. 4. (a) Subsection (a)(1) of section 731 of the Public Health Service Act (relating to eligibility of student borrowers and terms of federally insured student loans) is amended to read as follows:

"(1) made to—

"(A) a student who—

"(i)(I) has been accepted for enrollment at an eligible institution, or (II) in the case of a student attending an eligible institution, is in good standing at that institution, as determined by the institution;

"(ii) is or will be a full-time student (as defined in section 770(c)(2) at the eligible institution;

"(iii) in the case of a student in a school of medicine, osteopathy, or dentistry, has been authorized by the institution in accordance with section 739(b)(2) to receive a loan under this subpart;

"(iv) has agreed that all funds received under such loan shall be used solely for tuition and other reasonable educational expenses, including fees, books, and laboratory expenses, incurred by such students;

"(v) for the school year for which such loan is made, receives no funds from a loan insured under a Federal, State, or nonprofit program provided or assisted under part B

of title IV of the Higher Education Act of 1965; and

"(vi) in the case of a pharmacy student, has satisfactorily completed three years of training; or

"(B) an individual who—

"(i) has previously had a loan insured under this subpart when the individual was a full-time student at an eligible institution;

"(ii) is in a period during which, pursuant to paragraph (2), the principal amount of such previous loan need not be paid; and

"(iii) has agreed that all funds received under the proposed loan shall be used solely for repayment of interest due on previous loans made under this subpart; and".

(b) Subsection (a)(2) of such section is amended—

(1) by inserting before the semicolon at the end of subparagraph (D) the following: ", except that the note or other written agreement may provide that payment of any interest otherwise payable (i) before the beginning of the repayment period, (ii) during any period described in subparagraph (C), or (iii) during any other period of forbearance of payment of principal, may be deferred until not later than the date upon which repayment of the first installment of principal falls due or the date repayment of principal is required to resume (whichever is applicable) and may further provide that, on such date, the amount of the interest which has so accrued may be added to the principal"; and

(2) by striking out "student" in subparagraph (E).

(c) Subsection (b) of such section (relating to maximum interest rates) is amended by striking out "10 percent per annum" and inserting in lieu thereof "12 percent per annum".

(d) Such section is further amended by adding after subsection (c) the following new subsection:

"(d) No provision of any law of the United States (other than subsections (a)(2)(D) and (b) of this section) or of any State that limits the rate or amount of interest payable on loans shall apply to a loan insured under this subpart.".

(e) Subpart I of part C of title IV of the Public Health Service Act is amended as follows:

(1) In section 727(a), insert "(and certain former students of)" after "students in".

(2) In the first sentence of section 728(a), strike out "students" and insert in lieu thereof "borrowers".

(3) In the second sentence of section 728(a), insert "or to obtain a loan under section 731(a)(1)(B) to pay interest on such prior loans" after "to continue or complete their educational program".

(4) In section 728(c), strike out "student".

(5) In the second sentence of section 729(a)—

(A) strike out "student" the first time it appears and insert in lieu thereof "borrower"; and

(B) insert "borrower who is or was a" before "student" the second and third time it appears.

(6) In section 731(a)(2)(B), strike out "student" and insert in lieu thereof "borrower".

(7) In the heading to section 731, strike out "STUDENT".

(8) In subsections (a) and (b)(2) of section 732, strike out "student" and insert in lieu thereof "borrower" each time it appears.

(9) In subsections (b)(1) and (e) of section 732, strike out "student".

(10) In section 733, strike out "student" each time it appears.

(11) In the heading to section 733, strike out "STUDENT" and insert in lieu thereof "BORROWER".

(12) In section 738, strike out "student".

(13) In section 739(a)(1), strike out "student" and insert in lieu thereof "borrower".

(f) Section 737(1) of the Public Health Service Act is amended (1) by striking out "and public health" and inserting in lieu thereof "or public health", and (2) by inserting "(A)" after "that" and by inserting before the period the following: ", or (B) was not eligible to receive such a grant for such fiscal year solely because it did not meet the applicable requirements of section 771(b)(3)".

(g) The amendments made by this section shall take effect on October 1, 1977.

SEC. 5. Effective October 1, 1977, section 751(d)(2) of the Public Health Service Act is amended to read as follows:

"(2) second, to applications made (and contracts submitted)—

"(A) for the school year beginning in calendar year 1978, by individuals who are entering their first, second, or third year of study in a course of study or program described in subsection (b)(1)(B) in such school year;

"(B) for the school year beginning in calendar year 1979, by individuals who are entering their first or second year of study in a course of study or program described in subsection (b)(1)(B) in such school year; and

"(C) for each school year thereafter, by individuals who are entering their first year of study in a course of study or program described in subsection (b)(1)(B) in such school year.".

SEC. 6. (a)(1) Section 1515(b)(2) of the Public Health Service Act is amended (1) by striking out "which may not" and inserting in lieu thereof "which, except as otherwise provided in this paragraph, may not", and (2) by adding after the first sentence the following: "The Secretary may, upon application of a conditionally designated entity, extend for an additional period of not to exceed 12 months the period of such entity's conditional designation if the Secretary determines that (A) unusual circumstances exist or existed which prevent such entity from qualifying for designation under subsection (c) within 24 months of such entity's conditional designation under this subsection, (B) such extension should enable such entity to qualify for designation under subsection (c), and (C) such extension is necessary to carry out the purposes of this title. Each such determination shall be in writing and shall include a summary of the reasons for it.".

(2) The second sentence of section 1516(a) of such Act is amended by inserting before the period at the end a comma and the following: "except that in the case of a grant made to a conditionally designated entity with which the Secretary will not enter into a designation agreement under section 1515(c), such grant shall be available for obligation for such additional period as the Secretary determines such entity will require to satisfactorily terminate its activities under the agreement for its conditional designation".

(b) Section 1521(b)(2)(B) of the Public Health Service Act is amended by striking out "twenty-four months" and inserting in lieu thereof "thirty-six months".

SEC. 7. The Secretary of Health, Education, and Welfare shall conduct a study to determine whether schools of medicine, nursing, or osteopathy deny admission or otherwise discriminate against any applicant to such schools because of the applicant's reluctance, or willingness, to counsel, suggest, recommend, assist, or in any way participate in the performance of abortions or sterilizations contrary to his or her religious beliefs or moral convictions. Not later than March 1, 1978, the Secretary shall complete such study and report his findings and recommendations to the Committee on Interstate and Foreign Commerce of the House of Representatives and the Committee on Human Resources of the Senate.

SEC. 8. (a) Section 1121(b)(5) of the Public Health Service Act is amended by inserting "fiscal year" before "ending September 30, 1977".

(b) Section 206(b)(6) of the Public Health Service Act is amended by striking out "senior" and inserting in lieu thereof "junior".

(c) Section 772(b) of the Public Health Service Act is amended by striking out "section 778" and inserting in lieu thereof "section 788".

SEC. 9. Section 4839 of the Revised Statutes (24 U.S.C. 165) is amended by inserting after the fourth sentence the following: "With the approval of the Secretary of the Treasury, the disbursing agent may invest funds of the account in excess of current needs in interest-bearing obligations of the United States with maturities suitable for the needs of the account, and any interest on such investment shall be credited to and form a part of the account.".

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9418) to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition to medical schools' receiving capitation grants under such Act, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment to the text of the bill struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

U.S. FOREIGN MEDICAL STUDENTS

EXISTING LAW.—The Health Professions Educational Assistance Act of 1976 (Public Law 94-484) amendments to the Public Health Service Act required schools of medicine, in order to be eligible for capitation grants, to reserve positions in each of school years 1978-79, 1979-80, and 1980-81 for an

identified pool of United States students in foreign medical schools. Under these amendments a number of positions equal to the number of U.S. citizens who had enrolled in foreign medical schools prior to October 12, 1976 (the date of enactment of Public Law 94–484), had completed 2 years in such school, and had passed part I of the National Board of Medical Examiners' examination are to be equitably apportioned among schools of medicine receiving capitation grants. Public Law 95–83, enacted on August 1, 1977, expanded the pool of students to include students enrolled in special 2 year educational programs in the United States designed to prepare individuals to enter the third year classes of schools of medicine. The Secretary of Health, Education, and Welfare is to identify those individuals who meet the specified criteria by August 15, 1977, and August 15 of each of the next 2 years. A school of medicine would not be required to accept an identified student who did not meet the school's entrance requirements (other than academic or residency requirements) or if such acceptance would cause the school to lose its accreditation. Finally, the Secretary is authorized to waive the enrollment requirement upon a finding that, because of the inadequate size of the population served by the clinical facilities of a medical school, compliance with the requirement would prevent such school from providing high quality clinical training for the transfer students.

The House bill amended existing law to require a school of medicine, as a condition to receipt of capitation support, to increase its third-year enrollment. The increase was to occur in each of the school years 1978–1979 and 1979–1980 and was to be an increase over the number of students who were enrolled in and successfully completed the second year in the preceding school years by a number which was at least six percent of the lesser of the school's first year enrollment or third year enrollment in school year 1977–78. In making the required enrollment increase, schools of medicine could not count transfer students (1) who are not U.S. citizens, (2) from U.S. schools of medicine which have a place for such students in the third year, (3) who first enrolled in a foreign medical school after October 12, 1976, (4) from schools of dentistry or osteopathy, or (5) from unaccredited U.S. schools of medicine.

In addition, the House bill authorized the Secretary to waive, in whole or in part, the application of the required enrollment increase, if a schcol's accreditation would be threatened or because of the inadequate size of the population served by the clinical facility of the school it would be unable to provide high quality clinical training for each of its third-year students. In addition, the enrollment increase would not be required of a school of medicine whose first year enrollment in school year 1977–78 exceeded its third year enrollment by 25 percent.

Finally, under the House bill, any school of medicine which did not receive a capitation grant in either fiscal year 1978 or fiscal year 1979 because it did not comply with the enrollment increase requirement, did not receive a waiver, and was not exempt would be ineligible to receive a capitation grant for fiscal year 1980.

Under the Senate amendment, the requirement that schools of medicine enroll transfer students in order to be eligible for capitation support was repealed.

The conference substitute conforms to the House bill except that (1) the third year enrollment increase requirement is made applicable only with respect to school year 1978–79 (as a condition of receipt of fiscal year 1978 capitation grants), (2) the amount of increase is reduced to 5 percent, (3) additional authority to waive the requirement is provided the Secretary if he determines that a school has made a good faith effort to meet the requirement but there is an insufficient number of students who are eligible to be counted, and (4) if a school does not comply with the fiscal year 1978 capitation requirement, it is ineligible for receipt of capitation support appropriated for fiscal year 1979 or 1980.

The conferees do not intend the additional waiver authority to be used for schools who simply apply their normal admissions standards and find no student eligible to be counted can meet such standards.

The conference substitute would make eligible to be counted all those students who were eligible under the House bill. For example, schools can count as transfer students those students who had enrolled in foreign medical schools prior to October 12, 1976, who had successfully completed two years in a special educational program in the United States such as that of the Center for Biomedical Education of the City College of New York, or who had been enrolled in special Ph. D.-M.D. programs in the United States.

In addition, the conference substitute contains the provision of the House bill which permits schools of medicine to count as third year students, for the purposes of the enrollment increase, transfer students enrolled in the second year who were first enrolled in foreign medical schools prior to October 12, 1976.

In the view of the managers, this enrollment increase requirement in no way impinges on the academic freedom of schools of medicine to apply their own admissions criteria, while at the same time honoring, to the extent possible, the commitment made to those medical students studying overseas. The managers emphasize that the third year enrollment increase provision is a one year requirement only, and it is not their intent to resurrect this provision in future years.

The decision of several schools to forego capitation support unless the conditions for receipt were altered raises a significant question about the utility of this funding mechanism as a vehicle for accomplishing public policy objectives. Capitation support is an economic necessity for many schools. Other schools are not economically dependent on these funds. These schools would thus always retain the option of refusing capitation funds because of the attendant conditions, while the poorer schools could not afford to do so. This places the burden for implementing capitation related policies exclusively upon those schcols which cannot survive without capitation support. Federal policy, however, is intended to apply to all schools.

Thus the conferees have agreed to reexamine the manpower legislation early next year, and will pay particular attention to evaluating alternative approaches to the funding of medical education.

In addition, the conferees will examine the primary care residency requirements contained in existing law. This is necessitated by the development of new and accurate data by the Department of Health, Education, and Welfare, which indicates that the 1980 goal for primary care residencies, as stated in current law, has already been exceeded by the Nation's medical schools, yet the actual intent of the provision has not been fulfilled. The conferees reaffirm their original intention that 50 percent of all residents be trained in—and only in—primary care. The realization of this objective will require a revision of the current formula so that only residents trained exclusively in primary care will be counted.

The managers intend to examine closely the capitation and primary care issues during hearings which will be conducted early in 1978, and, if legislative revisions are necessary, the conferees intend that legislation be reported to the House and Senate floors by May 15, 1978.

DENTAL SCHOOL CAPITATION QUID PRO QUO

Existing law requires that, in order to be eligible for capitation grants for fiscal year 1979, 1980 and 1981, dental schools must provide assurances that at least 70 percent of any of the schools' new residency programs must be in general dentistry or pedodontics (children's dentistry). Under the House bill, this requirement was made applicable only to dental schools which, in school year 1976–77, had at least six first year positions in dental specialty programs.

Tht Senate amendment contained no comparable provision.

The conference substitute conforms to the House bill.

STUDY OF FOREIGN MEDICAL GRADUATES

The House amendment required the Secretary of HEW to conduct a study of the type and quality of training provided by foreign medical schools, the need in the United States for physicians trained in such schools, licensure requirements for such physicians, and the adequacy of such requirements to assure that health care provided by such physicians is of high quality. The Secretary was to report the results of the study to the House Committee on Interstate and Foreign Commerce and the Senate Committee on Human Resources by December 1, 1979.

The Senate amendment contained no comparable provision and the conference substitute does not include the House provision.

PRIORITY FOR AWARD OF NATIONAL HEALTH SERVICE CORPS SCHOLARSHIPS

The Senate amendment contained a provision, not included in the House bill, which required that, in the awarding of scholarships for school year 1978–79, the Secretary of HEW give priority to applications of individuals entering their first, second, or third year of study; for school year 1979–80 to individuals entering their first or second year; for school year 1980–81 and thereafter to individuals entering their first year of study. Existing law does not give a priority to individuals entering third year of study in school year 1978–79. Such students, prior to the enactment of the 1976 amendments and the increased authorization for scholarships had not been able to receive scholarships because HEW had awarded scholarships only to third and fourth year students.

The conference substitute conforms to the Senate amendment.

The conferees are concerned with respect to geographic allocation of the National Health Service Corps scholarship awards. The conferees are aware of the fact that a large percentage of these awards is going to a relatively small number of schools and that certain schools have very few scholarship recipients. The conferees feel strongly that NHSC scholarship awards should be more evenly distributed among the nation's medical schools since the ultimate objective of the program is to meet national health manpower needs. The managers intend to examine this issue carefully next year to consider if any legislative revisions are necessary.

MAXIMUM ALLOWABLE INTEREST FOR GUARANTEED STUDENT LOANS

The House bill contained a provision, not included in the Senate amendment, under which the maximum annual interest rates that a lender may charge under the guaranteed student loan program was raised from 10 to 12 per centum.

The conference substitute conforms to the House bill.

AMENDMENTS TO PL 93–641

Under the National Health Planning and Resources Development Act of 1974, the Secretary of HEW is required to enter into agree-

ments for the designation of health systems agencies. The Secretary is authorized to make such designation conditional for a period of up to 24 months. The House amendment contained a provision which authorized an entity's conditional designation for a period of not more than 12 months if the Secretary finds that the extension will enable the entity to qualify for full designation. In addition, the House amendment authorized that grants made to conditionally designated entities with which the Secretary will not enter into a designation agreement may be available for expenditure beyond the period of designation in order for the entity to satisfactorily terminate its activities under the agreement for its conditional designation.

Finally, under PL 93-641 the Secretary is required to enter into agreements with Governors of States for the designation of State health planning and development agencies. Such agreement may provide for the designation of a State agency on a conditional basis for a period of up to 24 months. Under the House bill, this period is extended to 36 months.

The Senate amendment contained no comparable provisions.

The conference substitute conforms to the provisions of the House bill except that, prior to extending the conditional designation of an entity seeking to become a health systems agency, the Secretary must determine in writing that unusual circumstances exist or existed which prevented the entity from qualifying for full designation. Each determination is required to include a summary of the reasons therefor.

The managers emphasize that the Department of Health, Education, and Welfare must move immediately to implement the amendments to title XV permitting an extended period of conditional designation for some health system agencies. Changes in existing regulations or new regulations should not be necessary. It is particularly important that those health systems agencies who will soon complete 24 months of conditional designation have the option of applying for an additional year of conditional designation or for full designation.

It is not the managers expectations, however, that this amendment be used to simply allow a marginal health systems agency another year of fundings. The Secretary must determine that the additional year will in all likelihood make the HSA qualified for full designation. Circumstances which might cause the Secretary to make such a determination include (but are by no means limited to) the following:

Health systems agencies which have received only minimal funding in the first year or two, and which were thus unable to obtain sufficient staff in order adequately to assume all the functions required for full designation.

Agencies serving areas that in whole or in large part have had to devote a greater portion of their effort and resources in the first two years to organizational development, community involvement, basic needs assessment, and the like.

Those health systems agencies which as a result of litigation brought against them have encountered delays in fully staffing up, proceeding with plan development, or taking other appropriate action.

Agencies which may not be able to move to full designation withln two years because belated designation of the State health planning and development agency has resulted in the late issuance of common plan formats and other requirements by the State agency; or because the State agency recently may have significantly revised the review procedures or criteria to be followed by the health systems agencies conducting proposed capital expenditure or other required reviews.

The managers wish to make it clear that in requiring the Secretary to make certain determinations about the HSA being reviewed it is not their intent to force new administrative requirements on the Department but rather to assure that the reasons for the extension, which are made public, are compelling.

USE OF NONPROFIT AGENCIES TO ASSIST IN RECRUITMENT FOR INDIAN HEALTH SERVICE

The Senate amendment contained a provision, not included in the House bill, which reinstated a provision of the Indian Health Care Improvement Act which authorized the Secretary of Health, Education, and Welfare to utilize nonprofit recruitment agencies to assist in obtaining personnel for the Public Health Service. This provision was inadvertently repealed by the 1976 health manpower legislation.

The conference substitute conforms to the Senate amendment.

ELIGIBLE PARTICIPANTS IN THE GUARANTEED STUDENT LOAN PROGRAM

Under existing law, students enrolled in schools which do not meet the various requirements in order to be eligible for capitation are not eligible to participate in the guaranteed health professions insured student loan program. The Senate amendment contained a provision, not included in the House bill, which excluded from this prohibition students enrolled in medical schools not participating in the U.S. foreign medical student transfer provision.

Under the conference substitute, students enrolled in schools which are not eligible for capitation support solely because such schools did not fulfill the third year enrollment increase requirement are nevertheless eligible to receive student loans.

PROHIBITION ON DISCRIMINATION IN ADMISSIONS PROCESS BECAUSE OF ABORTION OR STERILIZATION BELIEFS

The Senate amendment contained a provision, not included in the House bill, which prohibited any health professions school which receives support from the Secretary of HEW from denying admission or otherwise discriminating against an applicant because of his or her views on abortion or sterilization.

The House bill contained no comparable provision.

Under the conference substitute, the Secretary of Health, Education, and Welfare is required to conduct a study to determine whether schools of medicine, nursing, or osteopathy deny admission or otherwise discriminate against any applicant to such schools because of the applicant's views on abortions or sterilization. The Secretary is required to complete the study and report his findings to the Committee on Interstate and Foreign Commerce of the House of Representatives and the Committee on Human Resources of the Senate not later than March 1, 1978.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On November 4, 1977:

H.R. 2817. An act to provide for certain additions to the Tinicum National Environmental Center; and

H.R. 4297. An act to amend the Marine Protection, Research, and Sanctuaries Act of 1972 to authorize appropriations to carry out the provisions of such Act for fiscal year 1978.

On November 7, 1977:

H.J. Res. 611. Joint resolution to extend the authority of the Federal Reserve banks to buy and sell certain obligations.

On November 8, 1977:

H.J. Res. 621. Joint resolution approving the Presidential decision on an Alaska natural gas transportation system, and for other purposes;

H.R. 2850. An act to suspend until the close of June 30, 1978, the duty on certain latex sheets, and for other purposes;

H.R. 2982. An act to suspend until the close of June 30, 1980, the duty on synthetic tantalum/columbium concentrate, and for other purposes;

H.R. 3093. An act to provide duty-free treatment for certain copying lathes used for making rough or finished shoe lasts and for parts of such lathes, and for other purposes;

H.R. 3259. An act to continue to suspend for a temporary period the import duty on certain horses, and for other purposes;

H.R. 3461. An act for the relief of Chin-Ho An;

H.R. 5101. An act to authorize appropriations for activities of the Environmental Protection Agency, and for other purposes; and

H.R. 9090. An act to exempt disaster payments made in connection with the 1977 crops of wheat, feed grains, upland cotton, and rice from the payment limitations contained in the Agricultural Act of 1970 and the Agricultural Act of 1949.

On November 9, 1977:

H.R. 6010. An act to amend title XIII of the Federal Aviation Act of 1958 to expand the types of risks which the Secretary of Transportation may insure or reinsure, and for other purposes; and

H.J. Res. 643. Joint resolution making further continuing appropriations for the fiscal year 1978, and for other purposes.

On November 10, 1977:

H.R. 1139. An act to amend the National School Lunch Act and the Child Nutrition Act of 1966 in order to revise and extend the summer food program, to revise the special milk program, to revise the school breakfast program, to authorize the Secretary of Agriculture to carry out a program of nutrition information and education as part of food service programs for children conducted under such Acts, and for other purposes.

On November 12, 1977:

H.R. 1403. An act to authorize the Secretary of the Interior to convey the interest of the United States in certain lands in Adams County, Mississippi, notwithstanding a limitation in the Color-of-Title Act (45 Stat. 1069, as amended; 43 U.S.C. 1068);

H.R. 2527. An act to authorize the Secretary of Agriculture to convey certain lands in the Sierra National Forest California, to the Madera Cemetery District;

H.R. 2849. An act to suspend until July 1, 1978, the rate of duty on mattress blanks of latex rubber, and for other purposes;

H.R. 3373. An act to extend for an additional temporary period the existing suspen-

sion of duties on certain classifications of yarns of silk, and for other purposes; and

H.R. 3387. An act to extend certain Social Security Act provisions, and for other purposes.

On November 14, 1977:

H.R. 4458. An act to amend certain provisions of the Internal Revenue Code of 1954 relating to distilled spirits, and for other purposes.

On November 15, 1977:

H.R. 2501. An act to eliminate a conflict between the official cadastral survey and a private survey of the so-called Wold Tract within the Medicine Bow National Forest, State of Wyoming;

H.R. 7278. An act to amend section 10 of the Merchant Marine Act, 1936;

H.R. 8499. An act to amend the Alaska Native Claims Settlement Act;

H.R. 8992. An act to amend title 3 of the United States Code to change the name of the Executive Protective Service;

H.R. 9512. An act to amend the Higher Education Act of 1965 to include the Trust Territory of the Pacific Islands in the definition of the term "State" for the purpose of participation in programs authorized by that act;

H.R. 9704. An act to amend the Federal Crop Insurance Act, and for other purposes; and

H.R. 9836. An act to authorize the Architect of the Capitol to furnish chilled water to the Folger Shakespeare Library.

On November 16, 1977:

H.R. 8346. An act to amend the Urban Mass Transportation Act of 1964 to revise the program of Federal operating assistance provided under section 17 of such act;

H.R. 9019. An act to rescind certain budget authority contained in the message of the President of July 19, 1977 (H. Doc. 95-188), transmitted pursuant to the Impoundment Control Act of 1974; and

H.R. 9710. An act to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, to promote the accountability of the Federal Reserve System, and for other purposes.

On November 18, 1977:

H.R. 6348. An act to convey to the Ely Indian Colony the beneficial interest in certain Federal land; and

H.R. 8777. An act to amend the Appalachian Regional Development Act of 1965 to permit an extension of the period of assistance for child development programs while a study is conducted on methods of phasing out Federal assistance to these programs.

On November 19, 1977:

H.R. 2770. An act to amend section 142 of title 28, United States Code, relating to the furnishing of accommodations to judges of the courts of appeals of the United States.

On November 23, 1977:

H.R. 422. An act to amend the Tariff Schedules of the United States to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled within the United States if duty was paid on such replacement engine during a previous importation;

H.R. 2661. An act for the relief of Patricia R. Tully;

H.R. 4049. An act to amend the Regional Rail Reorganization Act of 1973 to authorize additional appropriations for the United States Railway Association, and for other purposes;

H.R. 7074. An act to provide improved authority for the administration of certain National Forest System lands in Oregon;

H.R. 8175. An act to amend the Veterans' Administration Physician and Dentist Pay Comparability Act of 1975, as amended, in order to extend the authority to enter into special-pay agreements with physicians and dentists; to amend title 38 of the United States Code to modify certain provisions relating to special-pay agreements; and for other purposes; and

H.R. 8701. An act to amend title 38, United States Code, to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons, to make improvements in the educational assistance programs, and for other purposes.

FUNDING FOR SUBCOMMITTEE ON INTERNATIONAL ORGANIZATIONS OF COMMITTEE ON INTERNATIONAL RELATIONS

Mr. ANNUNZIO. Mr. Speaker, by direction of the Committee on House Administration, I call up a resolution (H. Res. 915) authorizing funds for the investigation of Korean-American relations being conducted by the Subcommittee on International Organizations of the Committee on International Relations, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 915

Resolved, That (a) there shall be paid out of the contingent fund of the House of Representatives, in accordance with subsection (b), for the period beginning January 3, 1978, and ending at the close of March 31, 1978, such sums as may be necessary for the continuance of necessary projects, activities, operations, and services, by contract or otherwise, including payment of staff salaries for services performed by the Committee on International Relations, acting through its Subcommittee on International Organizations, in carrying out the investigations and studies authorized by the resolution adopted by that committee on February 3, 1977 (such investigations and studies hereafter in this resolution being referred to as the "investigation of Korean-American relations").

(b) For purposes of the Investigation of Korean-American Relations, the Committee on International Relations shall be entitled, for each month or portion of a month occurring during the period specified in subsection (a), to payments out of the contingent fund of the House of Representatives in amounts equal to one-ninth of the total amount authorized for use for such investigation during the first session of the Ninety-fifth Congress by H. Res. 319, adopted March 9, 1977.

SEC. 2. For the period beginning December 1, 1977, and ending at the close of March 31, 1978, not to exceed $10,000 in expenses for foreign travel on official business by members and staff of the Subcommittee on International Organizations of the Committee on International Relations in carrying out the Investigation of Korean-American Relations shall, to the extent that such expenses are in excess of the amounts available for such expenses under the first section of this resolution or under H. Res. 319, adopted March 9, 1977, be paid out of the contingent fund of the House of Representatives.

SEC. 3. Amounts authorized by section 2 of this resolution or by H. Res. 319, adopted March 9, 1977, for the Committee on International Relations for purposes of the Investigation of Korean-American Relations shall not be considered as payments authorized for use by the Committee on International Relations during the first session of the Ninety-fifth Congress in determining the entitlement of that committee to payments out of the contingent fund under the first section of H. Res. 879, adopted November 2, 1977.

SEC. 4. The entitlement of the Committee on International Relations to payments out of the contingent fund of the House of Representatives pursuant to the provisions of this resolution shall cease to be effective on the effective date of the primary expense resolution adopted with respect to the Investigation of Korean-American Relations.

SEC. 5. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with law.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ANNUNZIO) is recognized for 1 hour.

Mr. ANNUNZIO. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Ohio (Mr. DEVINE), for debate purpose only, pending which I yield myself such time as I may consume.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Speaker, House Resolution 915 provides funds in the amount of $10,000 to the Subcommittee on International Organizations for the purposes of carrying on the investigation of Korean-American relations.

During the hearings, the subcommittee chairman, the gentleman from Minnesota (Mr. FRASER), informed the committee that this amount was necessary because they were not allowed to use counterpart funds.

There were no objections from the ranking minority member, the gentleman from Illinois (Mr. DERWINSKI).

Mr. DEVINE. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, the matter involved here is $10,000, basically for travel, which is made necessary because of the change in rules with respect to using counterpart funds.

The gentleman from Illinois (Mr. ANNUNZIO) properly indicated that there is no opposition on the part of the minority to this specific amount. However, at the House Administration Subcommittee meeting and here today, I serve notice that I will discuss in full detail the budget of the subcommittee for the forthcoming year. I would like to point out to the Members that service on the subcommittee is not necessarily a bed of roses. We have major differences of opinion and considerable controversy. The Committee on House Administration should take a

good, hard look at the subcommittee budget and especially its administration when they undertake next year's budget process.

However, this particular item is necessary.

Mr. DEVINE. Mr. Speaker, I have no further requests for time, and reserve the balance of my time.

Mr. ANNUNZIO. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DEL CLAWSON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 366, nays 2, not voting 66, as follows:

Mr. Danielson with Mr. Latta.

Mr. Dellums with Mr. Goldwater.

Mr. Fithian with Mr. Wydler.

Mr. Dent with Mr. Ashbrook.

Mr. Jones of Oklahoma with Mr. Whalen.

Mr. Dodd with Mr. Young of Alaska.

Mr. Koch with Mr. Cohen.

Mr. Badillo with Mr. Kelly.

Mr. Baucus with Mr. Thone.

Mr. Mazzoli with Mrs. Heckler.

Mr. White with Mr. Wiggins.

Mr. Duncan of Oregon with Mr. Kemp.

Mr. Rosenthal with Mr. Ruppe.

Mr. Rogers with Mrs. Smith of Nebraska.

Mr. Reuss with Mr. Quie.

Mr. Tsongas with Mr. Snyder.

Mr. Udall with Mr. Quayle.

Mr. Conyers with Mr. Charles H. Wilson of California.

Mr. Hightower with Mr. Lent.

Mr. Krueger with Mr. Railsback.

Mr. KREBS changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Resolution 921 and House Resolution 915 just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

AMENDING PRIVATE LAW 95–21 TO MAKE A TECHNICAL CORRECTION THEREIN

Mr. RONCALIO. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the Senate bill (S. 2328) to amend Private Law 95–21 to make a technical correction therein, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2328

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1(1) of the Act entitled "An Act to eliminate a conflict between the official cadastral survey and a private survey of the so-called Wold Tract within the Medicine Bow National Forest, State of Wyoming", approved on November 15, 1977 (Private Law 95–21), is amended by striking "1,000.8 feet" and inserting in lieu thereof "100.8 feet".

Mr. RONCALIO. Mr. Speaker, this bill, S. 2328, merely makes a technical correction in Private Law 95–21 and was passed yesterday without objection in the Senate.

Private Law 95–21, signed by the President on November 15, 1977, eliminates a conflict between the official survey and a private survey of the so-called Wold tract within the Medicine Bow National Forest, Wyo.

After passage by the Congress on November 3, 1977, it was discovered that during the course of being reprinted, one of the numbers contained in the legal description of the tract was misprinted as 1000.8 feet rather than the correct figure of 100.8 feet.

The Department of Agriculture Solicitor and Wyoming legal experts determined that the error would convey no more land than that originally intended by the act. Under rules of construction and other legal concepts, only the lands intended by Congress will be conveyed. The administration agreed with this assessment and the President signed the bill, H.R. 2501, into law on November 15, 1977 as Private Law 95–21.

Thus, while it is not essential to amend the law, I believe this action should be taken to eliminate any ambiguity which may result from the typographical error. I urge passage by unanimous consent of S. 2328.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANNUAL REPORT OF NATIONAL ADVISORY COUNCIL ON EXTENSION AND CONTINUING EDUCATION FOR FISCAL YEAR 1977—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

To the Congress of the United States:

Enclosed is the "Annual Report of the National Advisory Council on Extension and Continuing Education for FY 1977," prepared in accordance with the requirement of Section III(b) of Title III of the Higher Education Act of 1965, covering calendar year 1976, preceding my term of office.

This report addresses the need for continuing education programs and the Council's recommendations for policies, funding and administrative structures toward this end.

The Report of the Council is being carefully studied and evaluated. I am forwarding the Report so that it is available to the Congress for its deliberations.

JIMMY CARTER.

THE WHITE HOUSE, *December 1, 1977.*

ELEVENTH ANNUAL REPORT ON OPERATION OF AUTOMOBILE PRODUCTS TRADE ACT OF 1965—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection referred to the Committee on Ways and Means:

To the Congress of the United States:

I hereby submit the Eleventh Annual Report on the Operation of the Automotive Products Trade Act of 1965. This Report covers a time period before the commencement of my term of office.

JIMMY CARTER.

THE WHITE HOUSE, *December 1, 1977.*

ADELIDA REA BERRY

Mr. EILBERG. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5555) for the relief of Adelida Rea Berry, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 4, strike out "Adelida" and insert "Adelaida".

Amend the title so as to read: "An Act for the relief of Adelaida Rea Berry.".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, is my understanding correct that this is nothing more than a spelling error which is being corrected?

Mr. EILBERG. If the gentleman will yield, that is correct.

Mr. BAUMAN. It has already passed the House without objection?

Mr. EILBERG. The House bill misspelled the first name of the beneficiary involved.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

A motion to reconsider was laid on the table.

IN MEMORY OF THE LATE JOHN L. McCLELLAN, SENATOR FROM ARKANSAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. HAMMERSCHMIDT) is recognized for 60 minutes.

GENERAL LEAVE

Mr. HAMMERSCHMIDT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous matter on the life, character, and public service of the late Honorable JOHN L. McCLELLAN, Senator from Arkansas.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HAMMERSCHMIDT. Mr. Speaker, I take this time in behalf of my Arkansas colleagues Mr. ALEXANDER, Mr. THORNTON, Mr. TUCKER, and for myself so that we in the House of Representatives will have the opportunity to honor the memory and service of a great man.

JOHN L. McCLELLAN, who passed away in his sleep November 28, 1977, in Little Rock, Ark., in my opinion was one of the greatest Senators to ever serve this Nation in its 200-plus year history.

On the sad occasion of his passing, all who knew him and all those he served so faithfully and well, know that we have suffered a grievous loss.

JOHN L. McCLELLAN was a tower of strength. He was a man of unassailable integrity and diligence.

I only regret that, after a lifetime of publicly serving others, he had no time left in which to enjoy a few years of well-earned retirement in which to serve himself.

Last February 25 in the historic city of Fort Smith, Ark., I had the distinct honor of addressing a gathering of friends of the late Senator. It was a happy occasion—a special heartfelt tribute to that great, beloved man on the occasion of his 81st birthday.

Now, Mr. Speaker, on this sad day, as I struggle to share with you some of my thoughts about a truly great American, I wonder how, in a few words, or even a few thousand words, to really capture the story of JOHN L. McCLELLAN; his contributions and achievements; his impact upon our State and Nation?

What can really be said—in a few minutes, or in a few hours—about JOHN McCLELLAN, that can begin to approach the core of his greatness?

How could I begin to express the deep feelings of appreciation and affection we hold for him in our hearts?

Arkansans are proud of the history of our State and the role it has played in the development of our Nation.

During the past four decades, those developments have been tremendous, and far-reaching. Frequently during that time, much of the history of the world has been written by fast-moving, day-by-day events in official Washington.

And, throughout most of that critical period, JOHN L. McCLELLAN, the gentleman from Arkansas, has been here—and has been a vital part of that history—and of those developments which have shaped it—4 years in the House, as Representative from the old Sixth Congressional District of Arkansas, followed by 34 years in the Senate.

Over those years, we have come to associate him with all of those ideals dear to America and our way of life. We found great and constant comfort—and reassurance—in the knowledge that this most distinguished son of Arkansas— with his keen intelligence, his vast wisdom, and his tremendous integrity—was in Washington and in the Senate—as a tower of strength, and decency, and justice, upon whom we could depend.

This sense of great security came, not so much from his long tenure of service, but from the great character and quality of that service.

Current conditions are quite different from those of the depression—and the dust bowl—of the 1930's—when JOHN McCLELLAN first came to Washington. We could speak at great length regarding Senator McCLELLAN's role in improving the well-being of our Nation.

In taking his seat as a freshman Member of the 74th Congress—in January, 1935—he sought, and won, committee as-

signments which included the urgent jurisdictions of that time: flood control, irrigation and reclamation, and roads.

Moving to the Senate, his basic concerns were expanded and strengthened through the jurisdiction of the Senate Committee on Public Works—and through the necessary support of the Committee on Appropriations, which, later, he chaired so very ably.

To appreciate Senator MCCLELLAN's foresight and leadership, consider just one of the many possible examples—his coordinated effort with another giant of the Senate, Bob Kerr, to bring to reality, the McClellan-Kerr Arkansas River navigation system.

Today, with everyone concerned about rising costs we can appreciate that the navigable waterway foreseen by Senator MCCLELLAN is the least costly means of transporting bulk cargo. In today's energy-conscious environment, coal and oil constitute 60 percent of all waterways traffic.

During JOHN MCCLELLAN's 38 years in the Congress, eight Presidents have occupied the White House—Franklin Roosevelt, Harry Truman, Dwight Eisenhower, John Kennedy, Lyndon Johnson, Richard Nixon, Gerald Ford, and now Jimmy Carter.

As early as his very first congressional term, JOHN MCCLELLAN demonstrated that, while he sought to support the President wherever he could, he did not hesitate to differ with even a President of his own party when policies were in conflict with his understanding of the best interests of our country.

And, when in the 1940's the differences became so great, so vital, as to concern his concept of the rights of the State, he was not afraid to break with his President and his party platform to run on his own unassailable integrity as an independent Democrat.

What greater commentary could be offered on JOHN MCCLELLAN's long-running concern for the size and cost of government, than his lengthy record of practical fiscal prudence—not only as an individual Congressman, but as a member, and chairman of, the powerful Senate Committee on Appropriations—and as a member, and former chairman, of the Committee on Government Operations.

JOHN MCCLELLAN's innate respect for the law, and for the order it assures, came to light at the age of 12, when he determined that it was to be his profession.

At that early age, in Grant County in his native Sheridan, he actually began his study of the law in his father's law office.

Five years later, at the age of 17, he was to become the youngest lawyer in the history of Arkansas when—by special act of the State legislature—he was admitted to the bar.

Following his honorable discharge from World War I as a first lieutenant, he returned to the law, first as attorney for the city of Malvern, and then, as prosecuting attorney for the Seventh Judicial District of Arkansas.

In that position he so distinguished himself as to move, next, to election to the Congress of the United States.

It was, of course, in the Senate, in the 1960's, in which the name MCCLELLAN became nationally recognized, as he gained attention and respect as an able and effective investigator of crime and criminal activity.

It was against that prestigious reputation that, in 1968, he became the sponsor, and floor manager, of the landmark piece of anticriminal legislation that was the Omnibus Crime Control and Safe Streets Act. Then, 2 years later, it was he who proposed the Organized Crime Control Act.

And, as we know, he continued to serve as a member of the permanent Subcommittee on Investigations—and, as ranking member of the full Committee on the Judiciary of which he was a recognized expert.

No greater, more poignant, commentary could one offer on JOHN MCCLELLAN's long-running advocacy of a strong national defense—with firm, positive, and reliable alliances, than in his long record of support of our military forces—and in his early support of the North Atlantic Treaty Organization (NATO).

Attempting to pay proper tribute to the memory of JOHN L. MCCLELLAN challenges the most intimate knowledge of the workings of the U.S. Senate and of the past 40 years of history.

During his life, many were privileged to know him in various capacities. It has been my great personal privilege—and source of tremendous inspiration, to be permitted to know him as a respected colleague, a good friend, a kindly teacher, and a considerate mentor.

Sometimes, we were moved to cry with him—or for him—in moments of terrible personal tragedy. But, even then, we saw in him a tremendous philosophy. A greatness of faith, a gigantic discipline, and an incredible inner strength.

Fortunately, we had more frequently, the opportunity to rejoice with him—or for him, and to smile with him—in his moments of achievement.

On occasion, of course, we were also able to share with him the hurt imposed by those who failed to appreciate his wisdom in rejecting the easy, short-range, momentarily popular route in favor of the noble route of principle—and long-range good for all of the people of America.

JOHN MCCLELLAN was a very special friend—and great statesman—whose lifetime of consistent, dedicated service to God and country is, in itself, a superlative story—with the benchmark of greatness etched into every milestone. I shall miss him—his leadership, his friendship, and his wise counsel.

As lawyer, soldier, prosecutor, Representative, and Senator—he remained the faithful son of Arkansas; the devoted defender of human dignity and freedom, under the American system of government and the majesty of the law, of which he had such profound knowledge—and tremendous respect.

My wife Virginia and our son John, join me in expressing our deepest sympathy to Senator MCCLELLAN's wife Norma, and all the Senator's family.

Mr. THORNTON. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I am very pleased to yield to my good friend and distinguished colleague, the gentleman from Arkansas (Mr. THORNTON).

Mr. THORNTON. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I would like first to express my deepest sympathy to Senator MCCLELLAN's wife, Norma, and to his family. JOHN MCCLELLAN was not only a great national leader but a true friend, and I would like for them to know the depth of the personal loss I feel.

When I was growing up in Sheridan, Ark., the Senator's father, Isaac McClellan, early counseled me to go into the field of law.

Later, when I was attending the University of Arkansas, I served with his son, John L. McClellan, Jr., on the school's debating team. We were close friends, and I understood how deeply the Senator was affected by the tragic automobile accident which took John Jr.'s life.

I also understood the painful loss he suffered when an airplane crash cut short the life of his third son, James. As young lawyers starting our careers in central Arkansas, we had been close friends, as well.

Although personal adversities prove overwhelming for some, JOHN MCCLELLAN faced tragedy with great dignity and turned the most awesome of challenges into outstanding achievements.

Across our Nation stand such lasting, tangible monuments to his hard and effective work as the McClellan-Kerr navigation project.

Less tangible, but even more lasting, are such monuments as the reform of committee investigative procedures which he brought about and the work toward criminal code revision which he had begun.

I would like to share with my colleagues the following tribute, which appeared in the Washington Post on Tuesday, November 29:

JOHN LITTLE MCCLELLAN

John L. McClellan, the Arkansas Democrat, was nearing the end of his fifth term in the Senate when he died yesterday at the age of 81. So, his career spanned some enormously important—and occasionally convulsive—changes in the country's public life; and it also brought him the entitlements and rank that go with longevity in office: Sen. McClellan was chairman of the Senate Appropriations Committee when he died, and he had previously been chairman of the Senate Committee on Government Operations. He had played a prominent role in the civil rights battles of the postwar years, the Army-McCarthy hearings, the labor and crime legislation that took shape in the past two decades.

In much of this we had found ourselves on the opposite side from John McClellan, especially where racial and civil-liberties questions were concerned. But none of that alters our view that Sen. McClellan was a man of personal dignity and fairness, who did not abuse his power in the Senate or seek to close out the views of those who disagreed with him. And wherever others, ourselves included, may have fetched up concerning his principal interest—i.e., the creation of conditions that would restore respect for authority in this country—no one could deny the relevance of this preoccupation to our public life in recent years. One didn't have to share Mr. McClellan's conclu-

sions on how to deal with crime to share his outrage at the organized depredations of the labor and Mafia racketeers.

Sen. McClellan does leave one indisputably monumental achievement: the enormous and enormously complex codification of the nation's criminal laws on which he had worked for many years and which he had not so long ago managed to accommodate to the views of some of his critics, such as Sen. Edward Kennedy. The negotiated result, now before the Congress, is legislation of great stature and importance—truly of landmark quality.

We would mention only one further aspect of the senator's record. That is the sad and terrible record of personal tragedy that befell him as a father three times bereaved in a life that was stark and Job-like in its accumulated ordeals. John McClellan fought back, mastered his sorrow, overcame the temptation to self-pity and, with hard work, built a new life. This is a town where accomplishment is often measured in terms of legislative monuments alone. But we put Sen. McClellan's personal strength in the face of adversity at the top of the list of his life achievements.

JOHN MCCLELLAN'S accomplishments in public life demonstrate the remarkable impact which one man can have on our resources, our values, and our laws.

When we think of them, I hope we will keep in mind the manner in which they were achieved. For JOHN MCCLELLAN always held his high standard of integrity in full view of the American people.

Through times of peril and doubt, this gentleman maintained a personal honesty and candor which serves as an example for us all.

As the flags of this Nation were lowered to half-mast in mourning, I know all of us were touched; but my own thought was that the flag flying at half-mast does not symbolize JOHN MCCLELLAN to me. The flag that JOHN MCCLELLAN served so well is a high-flying flag at the top of its staff, waving freely and proudly in the breeze.

His work has strengthened our Nation, and JOHN MCCLELLAN'S life has strengthened our faith in its institutions.

Mr. HAMMERSCHMIDT. Mr. Speaker, I thank the gentleman for his contribution.

I now yield to our distinguished minority leader, the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, I was saddened to learn of the passing of one of the Nation's great citizens, Senator JOHN L. MCCLELLAN. He served in the Congress for 39 years and spent nearly a half century in public service.

It was my privilege to have worked with Senator MCCLELLAN on many appropriations measures as we went to conference to reconcile House and Senate bills. I found him to be both fair and forthright, but also a likeable person.

JOHN MCCLELLAN had many interests, among them reorganization of Government, which he pursued as chairman of the Government Operations Committee at the time of the first Hoover Commission.

He was a strong force in combatting crime and presided over many investigations of racketeering. His most recent major project was reform of the Nation's Federal Criminal Code, on which he had worked for nearly a decade. He helped shape major anticrime legislation in 1968 and 1970. He believed strongly in strict punishment for major crimes and supported the efforts of law enforcement agencies to control criminal activities.

He took part in many historic hearings and was an advocate of law and order and a strong national defense.

I share with my colleagues our sense of loss at the passing of our long-time colleague. My wife Betty and I offer our condolences to his family.

Mr. MAHON. Mr. Speaker, I want to join my colleagues in paying tribute to the memory of JOHN MCCLELLAN.

In his capacity as chairman of the Senate Committee on Appropriations and in my capacity as chairman of the House Committee on Appropriations we were associated together on many occasions and under many circumstances.

He was an able and effective statesman who made a major contribution to the Nation. He was my friend.

At a later moment, I shall make further comments in regards the life and record of this distinguished American.

Mr. WAGGONNER. Mr. Speaker, the death Monday of Senator JOHN MCCLELLAN ended the career of a great Senator and a devoted public servant. I am honored to join the other Members of the House in mourning his passing and honoring his memory.

Because my district of Louisiana borders Arkansas and the peoples of these two great States share the same beliefs, traditions, and values, I have an especially warm spot in my heart for Senator MCCLELLAN. Grant County, where the Senator was born, grew to manhood and began his distinguished public career, is literally in the heart of Arkansas, and the people of Arkansas took him to their hearts. Values go deep there, and people place much stock in a person's character. In JOHN MCCLELLAN, the people of Arkansas found a personal strength and dignity that was matched only by an innate sense of fairness and integrity. Anyone who knew the Senator, even in a casual way, knew that his word was his bond and a promise had meaning and could be counted upon. In an age when strength of character seems to be an old-fashion virtue, JOHN MCCLELLAN stood out as a man who knew what he believed and held tight to those convictions throughout his life.

In a career that spanned 50 years at the local and national level, he saw enormous changes in this country. We are fortunate that he was a part of that change, because we needed his wise leadership during those troubled times. He was a calm voice of reason amid the shrill outcries that shook America during the 1950's and 1960's. His influence was one of moderation. He grew in public stature when the country saw his uncompromising probes into organized crime and labor corruption as chairman of the Senate Permanent Subcommittee on Investigations. In his 18 years as chairman, JOHN MCCLELLAN pursued wrongdoing wherever it was uncovered, but under his guidance the rights of witnesses before his subcommittee were scrupulously protected.

As chairman of the Appropriations Committee, he championed a strong national defense and fiscal responsibility. The taxpayers had a friend in JOHN MCCLELLAN because he believed that tax money should be spent wisely. He looked after the interest of the average working, taxpaying American.

Only eight Members of the Senate served longer than JOHN MCCLELLAN, but few have served more honorably. His list of achievements in public office are numerous. His memory will be enshrined in Arkansas because of his untiring work on the Arkansas River Navigation project which benefited that entire region of the country. His long-cherished dream became a reality under his guidance, and he lived to see the fruits of his hard labor.

Our hearts and sympathy go out now to his beloved wife, Norma, during this time of sorrow. In his passing, Arkansas has lost one of the greatest native sons it ever produced, we in Congress lost a dear and valued friend, and the country has lost a great American.

The memory of Senator JOHN LITTLE MCCLELLAN will live on, and this country is a better place for him having served it so well.

Mr. RODINO. Mr. Speaker, the people of our Nation and the Members of the Congress of the United States today mourn the loss of the late senior Senator from Arkansas, JOHN L. MCCLELLAN.

As a man coming from a poor and simple background, Senator MCCLELLAN achieved success through hard work, diligence and personal sacrifice. He was an individual of great compassion and understanding. Throughout his nearly 50 years of public service to his community, his State and his country, Senator MCCLELLAN was committed to bringing about a safer society free from the influence of crime.

To accomplish that goal, he became a guiding force in all major law enforcement legislation, especially in the last 10 years. As chairman of the House Judiciary Committee it was my privilege to work with the late Senator in improving the Federal criminal justice system. Senator MCCLELLAN'S interest was broad enough and wise enough to encompass the innocent victims of violent crime. He was always a strong supporter of such legislation.

Earlier this year, Senator MCCLELLAN and Senator KENNEDY introduced a landmark bill, S. 1437, which will revise and codify the entire body of Federal criminal law. At the same time, I introduced a parallel bill, H.R. 6869, which is being considered by the House of Representatives. The eventual passage of the revised Federal Criminal Code and the Victims of Crime Compensation Act, along with his many other achievements in the criminal justice field, such as the Omnibus Crime Control and Safe Streets Act of 1968 and 1970, will bear witness to his efforts to bring about a safer society. The ambitious nature of these undertakings and Senator MCCLELLAN'S commitment to their eventual success

will stand forever as a tribute to his many contributions to our Nation.

Senator McCLELLAN not only made his presence felt in the criminal justice field, he was also deeply involved in the financial management of the United States in his position as chairman of the Senate Appropriations Committee. As such, the Senator strove to assure the people of this country that the major legislative programs were properly funded and administered. However, his voice was heard loudest in Congress' efforts to streamline the Federal Government and to avoid wasteful spending.

To many, the late Senator will be remembered as a tough and responsible investigator, who as chairman of the Senate Government Operations Committee and the Select Committee on Improper Activities brought to light the improprieties and corruption in the labor management field. To others, he will be remembered for his work in revitalizing the rural areas of the United States. Despite the wide range of Senator McCLELLAN's accomplishments over his 38-year stay in the Congress, we all pay tribute to him because he was a man whose finest qualities were his decency, his integrity, his loyalty, his leadership and most importantly, his compassion for his fellow man.

Mr. ALEXANDER. Mr. Speaker, it is in a mood of sadness and one of meditation on greatness that I have come to the task before us today. Senator JOHN L. McCLELLAN is dead. One of the final notes of the symphony of a political era has been silenced. We in Arkansas feel that a giant oak has fallen with the passing of our senior Senator.

Thousands of words will be spoken and written in our days of remembering the service of this man of vision, this man of purpose, this man of principle. It will be difficult if not impossible to capture the essence of this dedicated and determined man who, with his family, gave a half century of thought, energy, initiative, and creativeness to serving his people. It is in keeping with the Senator's legacy that we strive for success.

This is the second time I have prepared remarks for presentation in this Chamber in praise of Senator McCLELLAN. That other time was 7 years ago. We were moving then to recognize his contributions to the commerce and the inland waterway transportation system of the Nation by naming the navigation system which connects Oklahoma with the Mississippi River in honor of Senator McCLELLAN and the late Senator Robert S. Kerr of Oklahoma.

Then, as now, I found the words of Daniel Webster, which are engraved on the stone of the frieze of this Chamber's walls symbolic of the Senator's dedication to work:

> Let us deliver the resources of our land, call forth its powers, build up its institutions, promote all its great interests, and see whether we also in our day and generation, may not perform something to be remembered.

Senator McCLELLAN performed much to be remembered.

Born in Sheridan, Ark., in 1896, the Senator was a person whose sense of achievement, dignity, fairness, and honor was tested in the crucibles of success and tragedy. His mother died when he was 3 weeks old. But, by the time he was 5, JOHN L. McCLELLAN was a fourth grade student.

Like his father before him, he read for the law. At 17 the future Senator became a lawyer, but only after the Arkansas legislature approved a law allowing the underage youth to take the bar examination.

In 1917, Senator McCLELLAN interrupted his legal career to join the Army. He became a first lieutenant. By the time he reached the age of 30, he would become an elected prosecuting attorney. And, 1935 would see him beginning his congressional career, as a Member of the House of Representatives.

That career was almost cut short when his second wife died of spinal meningitis. She was the mother of two of his sons and his daughter, Mary Alice. Family and friends persuaded JOHN McCLELLAN to continue his work.

Later, in Washington, he would meet and wed Norma Myers Cheatham in a marriage that lasted his lifetime.

During World War II Max McClellan, the son of his first marriage, died of spinal meningitis while serving in North Africa. Two days before the funeral for his son, whose body was returned to the United States after World War II, a second son, John Jr., was fatally injured in an auto accident in Arkansas. A third son, James, died in an airplane crash in 1958.

Throughout his years of service in Congress, Senator McCLELLAN's capacity for work and his methods raised him to a position of formidable power and earned him a reputation for tenacity, fairness, and determination. He was known as a congressional investigator of courage and ability and as a prolific legislator.

During his years as chairman of the Senate Investigation's Subcommittee his work focused on national and international attention on subjects ranging from labor racketeering, to crime syndicates, and military construction scandals. His investigations included the implications of the civil strife that racked our Nation's cities in the 1960s.

Senator McCLELLAN introduced at least 100 bills which became law. He was the chief sponsor of the Organized Crime Control Act of 1960 and the Omnibus Crime Control and Safe Streets Act of 1968.

Although his work had already earned him much honor, respect, and recognition and his years had earned him the right to leisure, Senator McCLELLAN continued to work for his vision of the best interests of his State and Nation.

Last year he played a major role in the passage of the first complete revision of the U.S. copyright laws since 1909.

He was deeply involved in the formulation of a proposal to make the first comprehensive revision of the Federal criminal code in the Nation's history. The bill was introduced last spring as the Criminal Reform Code Act of 1977.

Senator McCLELLAN's life and career now belong to history, but his congressional achievements will long influence the current and future life of our Nation. His example of personal dignity and his record of fairness in the exercise of power should provide generations with a challenge to greatness.

Mr. MICHEL. Mr. Speaker, the death of Senator JOHN McCLELLAN is a sad event, not only for his colleagues in the Congress, not only for the people of Arkansas, but for the Nation. He brought to his duties a combination of integrity, civility, peerless skill, and that difficult-to-define quality most of us call character.

As a member of the Appropriations Committee, I had the opportunity to work closely with Senator McCLELLAN on a number of occasions when House and Senate met to confer. I found him a man who not only knew his facts but knew human nature as well. He did not bully or cajole or try to batter down by argument—he persuaded and reasoned and sought to create areas of cooperation rather than exploit areas of difference.

I know that he will receive many eloquent tributes and that he will be remembered as one who graced the Congress and brought honor to his State. But it seems to me that considering the kind of man he was, JOHN McCLELLAN would be satisfied with the simple but enviable title which has served as the chief glory of our Nation's greatest men: he was a patriot. It is my hope that this patriot's example will continue to inspire us all now that he is gone, just as it did in life.

Mr. TUCKER. Mr. Speaker, the Nation and the people of Arkansas lost a distinguished and dedicated public servant this week when Senator JOHN L. McCLELLAN passed away at his home in Little Rock.

JOHN McCLELLAN spent nearly half a century in public service. He served as a military officer in World War I and then as a prosecuting attorney of the 7th District of Arkansas. He was elected to the U.S. House of Representatives in 1934, reelected in 1936 and from 1942 until this week, JOHN McCLELLAN served as a U.S. Senator.

His career and achievements in the Senate reflect his determination to serve the best interests of Arkansas and the Nation. His accomplishments are recorded for all time in the annals of our legislative history and will long be remembered by the people he served so well.

Senator McCLELLAN came to national attention in 1954 as a member of the Senate Permanent Subcommittee on Investigations. As the ranking Democrat on the subcommittee, he courageously spoke out against the tactics of harassment used in the committee's inquiries. The following year he became chairman of the Government Operations Committee and Investigations Subcommittee and for the next 18 years he worked in this role to carry out the legislative oversight function. Indeed, no other Senator in American history has influenced the congressional investigative process to the degree that JOHN McCLELLAN did.

Since 1972, Senator MCCLELLAN had served as chairman of the Senate Appropriations Committee. In this capacity he exhibited his strong commitment to reasoned and responsible spending policies. He was a tempering influence—a calm and deliberate voice against excess and waste.

Senator MCCLELLAN also served on the Senate Judiciary Committee where he chaired two of its subcommittees. It was in this capacity that he best demonstrated his intense respect for the law. He played a leading role in passage of several major bills to improve law enforcement, including the landmark Omnibus Crime Control and Safe Streets Act of 1968 and 1970, and the Organized Crime Control Act of 1970. It is also significant to note that one of the most important bills ever to be reported out of the Senate Judiciary Committee bears the name of JOHN MCCLELLAN. This bill, now pending on the Senate Calendar, will revise and codify the entire body of Federal criminal law. Certainly, this measure will serve as a fitting memorial to a man who gave of himself in an effort to modernize American criminal law.

The people of Arkansas and adjoining States owe a particular debt of gratitude to JOHN MCCLELLAN for his efforts to develop the Arkansas River navigation system. This waterway, named in his honor, was one of the accomplishments which Senator MCCLELLAN took most pride in. He often liked to point out that the development of the Arkansas River effectively opened the gates to unlimited opportunity and progress in Arkansas and the Southwest. The success of the system has confirmed the wisdom of JOHN MCCLELLAN'S vision and nearly 9 million tons of cargo will be carried on the waterway this year.

The name of JOHN L. MCCLELLAN will always be linked with some of the most important legislation of the 20th century. The memory of his integrity and dedication to duty will long remain in the minds of us who were privileged to know JOHN MCCLELLAN and to the countless numbers of Americans who held him in such high esteem. JOHN MCCLELLAN was a man of character, a man of vision, a man of courage, and a man of great patriotism. The Nation and the people of Arkansas have lost a dedicated friend and servant.

One final note, on a more personal level, JOHN MCCLELLAN gave me my first job in Government service. For this I will be eternally grateful to him.

My wife, Betty, joins me in extending our deepest sympathy to Senator MCCLELLAN'S gracious wife, Norma, and the members of their family in this time of sorrow.

Mr. STEED. Mr. Speaker, throughout my 29 years of service here I have had the privilege of working frequently in association with Senator JOHN MCCLELLAN. Many times we have gone to House-Senate conference together on appropriations measures. Many other times he has taken effective leadership on problems common to Arkansas and Oklahoma. And of course we are all familiar with his performance, which has always commanded the greatest respect, on the national legislative level.

His vision and leadership for Arkansas and Oklahoma are epitomized by his role in the development of navigation on the Arkansas River in our two States. Arkansas and Oklahoma are linked by many mutual economic problems. Thus no State except Arkansas itself has suffered as great a loss as Oklahoma in Senator MCCLELLAN'S passing.

The monumental navigation system that is transforming the economy of the two States was widely regarded 30 years ago as a visionary and impractical project. The fortunate combination of three men of tremendous ability who achieved key positions in our country enabled the dream to become a reality. Arkansas River development would probably still be simply the subject of conversation today if it had not been for Senator Robert S. Kerr, Senator JOHN MCCLELLAN, and President Lyndon B. Johnson. They had the foresightedness and the power to make the basic decisions that opened the way to the economic progress of today.

Senator MCCLELLAN was a man who in his congressional work always was well prepared and diligent, and socially a delightful personality. He and Mrs. McClellan became good friends to Mrs. Steed and me, and we express our deepest sympathy to the entire family.

Mr. NATCHER. Mr. Speaker, it was my privilege to be elected to the Committee on Appropriations in the House of Representatives in January of 1955. At that time, my friend, JOHN L. MCCLELLAN was a member of the Committee on Appropriations in the Senate.

As a member of the Committee on Appropriations, it has been my privilege and honor to sit in conference on appropriation bills on many occasions with JOHN L. MCCLELLAN. His concept of public trust was without parallel and never did he hesitate to speak out against any proposal which he felt was not sound and not to the best interests of our people. I have lost a true friend and this country has lost a great statesman.

His character, achievements, and faithful service will long be remembered and will be an inspiration to generations yet to come. He served the people of the State of Arkansas with distinction and honor. His service in all of his assignments, was marked by a high sense of consciousness and duty. In every position he held, either private or public, he achieved distinction. Senator MCCLELLAN had those outstanding moral and intellectual qualities necessary for the position of chairman of the Committee on Appropriations. As chairman of this committee, he presided with dignity and firmness. Senator MCCLELLAN will have a high place in the history of his country and in the hearts of his countrymen. May God let the light of His countenance shine upon him and give him peace.

The status of our Nation is built on the careers of such men as JOHN L. MCCLELLAN. He had a charm and wit and he extended a warm courtesy and consideration toward others at all times. He loved his country, his State and the U.S. Senate.

Mr. Speaker, I extend to Mrs. McClellan and to the members of his family, my deepest sympathy in their loss and bereavement.

Mr. ROBERTS. Mr. Speaker, I was deeply saddened by the tragic death of an outstanding and distinguished colleague, Senator JOHN MCCLELLAN of Arkansas on Monday, November 28. His half a century of public service placed him in a select group of Americans, including men of the stature of the legendary Sam Rayburn.

Although his personal life was marked with numerous tragedies which would have staggered ordinary men, Senator MCCLELLAN shouldered these grave blows and redoubled his dedication to a better way of life for all Americans.

The Arkansas Democrat first came to the national spotlight during the Army-McCarthy hearings in the 1950's. He earned the respect and admiration of his colleagues and the entire Nation for his sense of fairness and his diligent dedication to honest performance of duty. He maintained and enhanced his reputation for fair play and honesty throughout the remainder of his career.

It would be impossible to list all of his accomplishments throughout the course of his 50 years of service to his Nation. Those of us who had the privilege of serving in the Congress with him will deeply feel the loss of this great legislator. The entire Nation will also be acutely aware that a man of the caliber of Senator JOHN MCCLELLAN is gone from the Halls of the Capitol.

Mr. BROYHILL. Mr. Speaker, I join with my colleagues here in the House of Representatives in paying tribute to a great American, Senator JOHN MCCLELLAN, who loved his country and who served it so well. Senator MCCLELLAN was known throughout our Nation as a crime fighter and his leadership in this area, as well as numerous others, was made greater by his courage, his loyalty and his integrity.

JOHN'S lovely wife, Norma, grew up in North Wilkesboro and Lenoir, N.C., and through the years, they have been greatly respected and admired by the citizens in my area. We will sorely miss JOHN. He was a wise and compassionate statesman and we will long remember and be grateful for his service to his country and mankind.

Mrs. Broyhill joins me in extending to Norma and the entire family our most sincere condolences at this time of sorrow.

Mr. ROGERS. Mr. Speaker, with the passing of Senator JOHN L. MCCLELLAN, the Congress and the country have lost an outstanding national leader.

In 39 years of service on Capitol Hill, Senator MCCLELLAN embodied the best tradition of public service. He was dedicated to his State, pursuing vigorously the development of the Arkansas River. And he was dedicated to the national interest, in his courageous pursuit of investigations which helped to root out crime and corruption in our national life.

He was a man of high principles, and knew the meaning of hard work. For those of us who came here when he was already midway in his career, he served as an example of honorable conduct in office.

Becky and I have had the pleasure of knowing him and his lovely wife, Norma, and have valued their friendship. We share the sense of loss of Mrs. McClellan, the Senator's family, his State and his country.

Mr. CEDERBERG. Mr. Speaker, I join my colleagues, from both sides of the aisle, in mourning the passing of our dear friend, Senator JOHN MCCLELLAN. In his long and illustrious congressional career, he distinguished himself as a faithful and devoted public servant. His counsel will be sorely missed.

He served in many capacities while in the Senate, probably the most famous of which was his attack on organized crime, corruption, and the rackets. However, while chairman of the Senate Appropriations Committee, he served with no less distinction and dedication. His first concern was always for his country. The national interest was uppermost in his mind at all times.

Likewise, he demonstrated an equal concern for the interest of the taxpaying public. Never one to question funding for programs where the money would be used wisely, he was quick to challenge any appropriations that appeared to be wasteful, or of only marginal benefit. For this service, he will probably never receive the recognition that he deserves. But it was most likely in this position that he provided his greatest contribution to this Nation.

His personal standards were impeccable; his integrity was unquestionable. He provided a strong example of ethical conduct in public office for his peers and the public. He was ahead of his time in the sense that he always required more demanding standards for himself than others asked of him.

Never a man to be deterred from a worthwhile purpose once he set his mind to it, he worked at a pace that belied his years. Hard working and energetic, he pushed himself on to greater heights in the pursuit of the public good, never pausing to reflect on himself.

Always a Senator, forever a southern gentleman, and undeniably a patriotic American, JOHN MCCLELLAN will be remembered by us and subsequent generations. His contributions have been many, leaving an indelible mark on this Congress. In future years, when the historians look back on the last 40-plus years, Senator JOHN MCCLELLAN's name will stand out as one of the most significant in the proceedings of the House and the Senate. His passing is truly our loss.

Mr. MCCLORY. Mr. Speaker, Senator JOHN MCCLELLAN of Arkansas has been a veritable institution in the U.S. Congress since long before I became a Member of this body.

A brilliant and highly respected lawyer, legal scholar and lawmaker, Senator MCCLELLAN epitomized the anticrime and law, order, and justice forces on Capitol Hill.

Fearless in his willingness to do battle with the most vicious elements of the crime syndicate, Senator MCCLELLAN held tenaciously to the high principles which characterize his entire public service.

Mr. Speaker, for my own part I was privileged to serve on several conference committees with Senator MCCLELLAN in the development of the omnibus crime bill and related anticrime legislation over which our respective House and Senate Judiciary Committees had jurisdiction.

These were enriching experiences for me in which I learned firsthand to respect both the wisdom and tenacity of this champion of the law-abiding citizens of our society.

Mr. Speaker, I am privileged today to join with my colleagues in this final tribute to one of the great lawmakers of our era, Senator JOHN L. MCCLELLAN of Arkansas.

Mr. ICHORD. Mr. Speaker, this week Missourians lost a respected neighbor and this country a great statesman and friend. But the sadness we all feel from the loss of JOHN MCCLELLAN is buoyed by our feelings of admiration for his achievements, appreciation for his friendship, and pride in the fact that we live in a country which can produce this kind of man.

JOHN MCCLELLAN was the youngest person ever to pass the bar in Arkansas, and he did so without ever attending law school. This was an incredible achievement in itself, but for JOHN MCCLELLAN it was only an early indication of an intense determination and personal integrity. He went on to express his deep respect and understanding of the law by serving his State of Arkansas for over 35 years in Congress and, consequently, by making numerous contributions to all Americans.

We have much to thank him for. As chairman of the Subcommittee on Investigations, Senator MCCLELLAN conducted an estimated 2,729 hours of hearings, setting an unofficial congressional record, and did so often in the face of great pressures from the highest levels of Government. These hearings produced landmark law enforcement legislation, but illustrate only one area of his far-reaching interests. As chairman of the Senate Appropriations Committee, he worked energetically to unite the often-conflicting goals of suitable energy, public works, and defense spending with streamlined bureaucracy and responsible government spending. And, certainly, his tremendous foresight in the development of the Arkansas River navigational system, which so justly bears his name, will remain a principal cause for tribute.

Mr. Speaker, I understand that JOHN MCCLELLAN was not a frequent dancer but that, on occasion, he was known to execute a mean polka with his wife. It appears that everything he did, he did well. And it is my sincerest hope that the fine memories of a devoted husband, father, and dancing partner will sustain his family during this sad time, just as JOHN MCCLELLAN's many accomplishments will continue to benefit the American people.

Mr. JOHNSON of California. Mr. Speaker, the Congress of the United States lost one of its most outstanding members with the passing of the Honorable JOHN L. MCCLELLAN, the senior Senator from the State of Arkansas. His lengthy and distinguished service in both Houses of the Congress gave him a rare opportunity to leave his mark on this Nation he loved so dearly. His accomplishments are many and varied, but each, in its own right, is a compliment to the man and to his unyielding devotion to public service and the good of the Nation.

It was my pleasure to work with JOHN on matters relating to the Nation's natural resources. Through his interest in this country's environment and its natural riches, he was able through effective leadership to help mold many of the major pieces of legislation that have an effect on the land and its treasures. More recently as chairman of the Committee on Appropriations, he has had the special opportunity to give guidance to the Nation's public works and natural resources efforts through funding decisions.

Throughout my association with the Senator from Arkansas, I have found him to be extremely knowledgeable and uncompromisingly fair. His legislative skill is matched by few and his dedication is exemplary.

Mr. Speaker, I think special note should be made not only of his many legislative achievements, but also of JOHN MCCLELLAN's strong personal strength. He has lived through adversity and tragedy and has come through these periods a stronger man and even more determined to make every minute of his life count.

We are fortunate to have had him serve this Nation as a Senator for so many years, and amid our sadness, we are thankful for his many contributions to the betterment of America.

Mrs. Johnson joins me in extending to Mrs. McClellan and her family our deep sympathies and condolences. They can be proud of JOHN and his service to this Nation.

Mr. MURPHY of New York. Mr. Speaker, Senator JOHN MCCLELLAN was a man whose career in public service was enormously important to this Nation. His legislative accomplishments have seldom been equaled, and his personal strength in the face of adversity was an achievement few men are likely to match. The fact that in the entire history of the U.S. Senate only eight Members have served longer than JOHN MCCLELLAN is a monument to his service to the people of Arkansas, who sent him to Washington to represent their best interests for six terms.

His 35 years of service have spanned some of the most impressive and influential periods and events in modern political history. He was an investigator of the first order in undertaking such inquiries as the activities of organized labor, underworld crime, college riots, and military administrative procedures. Yet he refused to be associated with the abuses of such congressional investigative powers when he led the boycott of Joseph McCarthy's controversial Permanent Investigations Subcommittee during the famous "Army-McCarthy hearings."

But his specific achievements are overshadowed by his completely selfless record of integrity and consistent accomplishment. He led the never-ending fight for a strong national defense and upheld

the integrity of the operations of government through his masterful leadership of the Government Operations Committee and later the Appropriations Committee. His was a total dedication to bring about necessary change, such as his major role in the first revision of U.S. copyright laws since 1909, and the first restructuring of patent laws since 1836. His most significant contribution to legislative improvement, however, is the pending complete overhaul of the U.S. Criminal Code. His was the art of compromise in developing the final language, acceptable to all interests, which will become the first comprehensive revision of the Federal Criminal Code in the Nation's history.

Only last week, Senator McCLELLAN announced that he would retire from public service to spend his remaining years at ease. At that announcement, he stated that "there is a proper time to aspire, a time to achieve, and a time to retire."

The Senator aspired in the face of adversity; he achieved more than most men could ever hope to do in a lifetime; and he retired at the pinnacle of one of the most inspiring careers in the history of that legislative body. His memory will live for a long time in the contributions he has made to this Nation's body of law. In this time of change, leadership such as his will be greatly missed.

Mr. CONTE. Mr. Speaker, it is with great sadness that I join my colleagues today in paying tribute to the memory of one of the giants of this institution, Senator JOHN L. MCCLELLAN.

As a member of the House Appropriations Committee, I was privileged to serve on many joint House-Senate conference committees with the distinguished senior Senator from Arkansas and it was here that I learned first hand of his almost legendary command of legislative matters, his tenacity, but also his fairness.

But long before that, as a student of good government, I was an admirer of the late Senator and his vigorous deportment as chairman of the Senate Government Operations Committee and its Permanent Subcommittee on Investigations. Probing, challenging and questioning, he no doubt set an example for responsible, effective investigation.

In his almost four decades in public service in Washington his accomplishments are many and diverse. His announcement of his intention to retire at the completion of his current term was greeted with deep regret. His untimely passing this week leaves this Congress greatly and prematurely diminished.

Today, I join with my colleagues on both sides of the aisle in expressing brotherhood with the people of Arkansas who were so ably served for so many years by Senator MCCLELLAN and who mourn his passing. My wife, Corinne, joins me in expressing our personal and deep condolences to the Senator's widow, Norma, and to their family.

Mr. ADDABBO. Mr. Speaker, as I look back over the years the distinguished gentleman from Arkansas has spent in the service of the people of his State and his country, I see the legacy of a man who served with distinction. We may not have always agreed with some of his philosophies, but no one can take issue with the integrity of his efforts.

One of the most effective legislators of our times, justice became the hallmark of his many endeavors. As an investigator he mirrored the same integrity inherent in his personal life, as all who knew him also knew that his word was law. More like a judge, open-minded, yet highly scrutinizing, he could get to the bottom of any matter without overstepping the rights of a witness. Indeed, he was one of the first to walk out of the Army-McCarthy hearings, and the first to set up guidelines for congressional investigators.

Other legislative areas have not escaped his touch, and each will be remembered for its monumental impact on the personal lives of every one of us.

Having worked with Senator MCCLELLAN on House Appropriations Conferences, I have always found him diligent, a hard bargainer, but fair. I have learned much from him.

My sincerest sympathies are extended to Mrs. McClelland and his two surviving daughters in their time of sorrow.

Mr. JONES of Oklahoma. Mr. Speaker, I join with my colleagues in mourning the passing of a great American, a distinguished public servant, a man of great vision, Senator JOHN LITTLE MCCLELLAN.

He lived a long, productive life. He was a man with great personal dignity and an acute sense of fairness. His work, now pending before us, on the complex codification of the country's criminal laws is an accomplishment which has been termed "monumental" and "legislation of great stature and importance—truly landmark quality" by the Washington Post and legal scholars across the land.

He meant a great deal to my home State of Oklahoma. On Wednesday, November 23, 1977, after the Senator's announcement he would not seek reelection, the Tulsa Daily World said in an editorial:

> For Oklahoman's having Senator McClellan in the U.S. Senate was almost like having a third Senator, so close were his political philosophies and projects to Oklahoma. His announcement is a loss to Oklahoma as well as Arkansas.

The editorial went on to say:

> The voters are fortunate he chose to give his life to public service . . . he will be missed.

His career in public life spanned 50 years, including nearly 40 years in Congress.

I recall vividly during my boyhood days near the Oklahoma-Arkansas border going with my dad, a rural mail carrier, and seeing first hand the destruction and suffering caused by the annual spring flooding of the Arkansas River.

Homes were destroyed each year, hundreds of families were left without property. Many lost loved ones. JOHN MCCLELLAN perceived, as did the late Senator Robert S. Kerr of Oklahoma, the need to stop the flooding and human suffering. The Arkansas River Navigation project was born. Senator Kerr never lived to see it completed.

But Senator MCCLELLAN continued the fight and spoke at its dedication. A man cannot be measured by one piece of legislation. The McClellan-Kerr Arkansas River Navigation idea was an undertaking of such a magnitude that it boggled the mind when they proposed the legislation.

Some three decades have passed since those spring floods brought havoc to Arkansas and Oklahoma. They are no more. Senator MCCLELLAN and Senator Kerr stood firm.

They maintained their course in the face of opposition determined the idea should never come to fruition. Today we in Oklahoma and Arkansas are tied directly to the sea routes of the world, and the McClellan-Kerr Arkansas River Navigation project is a major factor in the economic and recreational life of the great Southwest.

JOHN MCCLELLAN was a hard-working public servant—a man whose career will be a model for those who enter public service in the future.

From his days as prosecutor in his hometown of Sheridan, Ark., to the final day of his life, despite great personal tragedies, he persevered and served.

Our Nation is far the better for his having been with us the past 81 years.

Mr. DERWINSKI. Mr. Speaker, I wish to join my colleagues in paying a special tribute to the late Senator JOHN LITTLE MCCLELLAN, who will long be remembered for his dedicated and diligent service to his State and to the Nation.

Senator MCCLELLAN was a man of personal dignity and fairness, who did not abuse his power in the Senate or seek to close out the views of those who disagreed with him. As a skilled legislator, he was greatly admired for his sound grasp of the legislative process. He demonstrated this fine quality in his fight against organized crime and abuses within the labor movement as chairman of the Senate Investigations Subcommittee. He continued his fight against crime in his most recent achievement of the codification and modernization of the Nation's criminal laws on which he had worked for many years.

Senator MCCLELLAN had a very distinguished political career. In addition to his 35 years of effective leadership in the Senate, he served 4 years in the House. Senator MCCLELLAN was a highly respected and dedicated Member and always a man of integrity.

During his 38 years of public service, he was a strong spokesman for national defense and upheld integrity in the operation of Government. As chairman of the Senate Appropriations Committee, he exercised his interest in maintaining a strong defense policy while pursuing fiscal conservatism.

He was wholeheartedly responsive to the needs of our Nation as well as to the State of Arkansas. One of his long time interests was waterways projects. He will long be remembered for his contribution to the economic development of the Arkansas River in which he took deep personal pride.

Not only was he an objective man, especially in analyzing the great issues before our country, Senator MCCLELLAN was a man of compassion, good will and

foresight. His knowledge and vast experience in Government contributed to his effective legislative leadership.

His deep sense of right and wrong and his love for his country will be a great loss not only to the Nation but to the people of Arkansas to which he dedicated his life to their service.

Mrs. Derwinski joins me in extending our heartfelt condolences to his wife, Norma and daughter, Mary Alice.

Mr. FORD of Tennessee. Mr. Speaker, I join my colleagues in mourning the death of Senator MCCLELLAN of Arkansas. As a representative from the neighboring State of Tennessee I have known Senator MCCLELLAN personally for several years and admired his work long before I met him. As a freshman in this body in 1975 I was often the recipient of advice and guidance from Senator MCCLELLAN as I was learning my way around Capitol Hill. I will always remember his kindness.

Mr. Speaker, the loss of Senator MCCLELLAN is much greater than a personal one to me: the South and the Nation, as well as the people of Arkansas, have lost a dynamic leader. It was Senator MCCLELLAN who, by walking out of the Senate McCarthy hearings, led our Nation out of that horrible chapter in our history. It was Senator MCCLELLAN who took the lead in reforming our criminal laws. When this legislation is finally enacted it will stand as a tribute to JOHN MCCLELLAN.

Mr. Speaker, Arkansas has lost a statesman, the Senate has lost a leader, and I have lost a friend.

Mr. WON PAT. Mr. Speaker, the American people have lost one of our greatest champions in the battle against organized crime, Senator JOHN L. MCCLELLAN of Arkansas.

His passing marks the end of a distinguished career in the U.S. Senate. As chairman of the Select Committee on Improper Activities from 1957 to 1960 and the Permanent Subcommittee on Investigations, Senator MCCLELLAN became nationally famous for his tenacious, energetic, and responsible fight against crime.

As a leading advocate of improved law enforcement, Senator MCCLELLAN had a prominent role in winning congressional backing for such landmark anticrime legislation as the Omnibus Crime Control and Safe Streets Act of 1968 and 1970, the Organized Crime Control Act of 1970, and many other related measures to control the traffic of drugs.

The American citizens of Guam owe a great debt of gratitude to this man for his enthusiastic support of these measures which have provided the financial support for our own efforts to control crime.

Late in his career, Senator MCCLELLAN turned his attention to his duties as the new chairman of the Senate Appropriations Committee where he performed an outstanding service to the Nation by overseeing that the taxpayers money was used as wisely as possible.

The Senator's efforts to produce needed changes in the Nation's copyright laws produced the first major changes since 1909.

He was a man of many talents and shall be missed.

Mr. FARY. Mr. Speaker, I know that all of us are deeply saddened to learn of the recent death of Senator JOHN MCCLELLAN, of Little Rock, Ark. He was, without a doubt, one of the finest and most respected Members of the Congress.

Senator MCCLELLAN served as Congressman from 1935 to 1938 and was elected to the Senate in 1942 where he served with a distinguished career until his death on November 28, 1977. His reputation and his circle of friends grew with each passing year, and his patience and good humor and thoughtful approach to problems smoothed over many a rough spot in the legislative process. His kindness and consideration for his colleagues made all of us happier to have had the opportunity to serve with him.

JOHN MCCLELLAN was a man who loved his country and its people and tried to help all of them. He was a skilled legislator, a soldier, lawyer, a public servant, and a man of true decency and good will. He served his Nation well during varied and difficult times, and worked with purpose, determination, and with an expert competence that only comes through experience and dedication.

It is these qualities which will be sorely missed by the Congress and by his constituents, and by the Nation he served so well.

I know I speak for all his friends in the Congress when I say JOHN MCCLELLAN will be genuinely missed. It was a real pleasure to know him.

Mr. SIKES. Mr. Speaker, I wish to join my colleagues in paying tribute to the memory of Senator John L. McClellan whose career in local and national politics spanned a full 50 years. He was an able and effective statesman whose outstanding leadership in the Senate will be sorely missed.

As a member of the House Appropriations Committee, I was privileged to serve on many joint House-Senate conference committees with the distinguished senior Senator from Arkansas and it was in these meetings that I learned firsthand of his command of legislative matters, his diligent work, and also his fairness. As chairman of the Senate Appropriations Committee, he championed a strong national defense and fiscal responsibility. He believed the taxpayers money should be spent wisely and he kept their interest in mind at all times.

His service was not limited to the Appropriations Committee. He served in many capacities while in the Senate. Probably the most famous of which was his attack on organized crime, corruption, and the rackets. It was in 1954 during the televised Army-McCarthy hearings that his work first came to national attention. These hearings led to the ultimate imprisonment of David Beck and James R. Hoffa. He also served on the Senate Judiciary Committee where he chaired two of its subcommittees. It was in this capacity that he best demonstrated his intense respect for the law. He played a leading role in the passage of major bills to improve law enforcement, including the landmark Omnibus Crime Control and Safe Streets Act of 1968 and 1970, and the Organized Crime Control Act of 1970. A bill now pending on the Senate Calendar to revise and codify the entire body of Federal criminal law bears the name of John L. McClellan. This legislation, if enacted, will serve as a fitting memorial to a man who gave of himself unselfishly in an effort to modernize American criminal law.

Senator McClellan was my good friend and I will miss him. His achievements and faithful, dedicated service will long be remembered. His work has strengthened our Nation. His passing is truly our loss. He was truly a great statesman; truly a great American.

My sincere sympathy is extended to Mrs. McClellan and the family. They can be very proud of John McClellan's service to this Nation.

Mr. DON H. CLAUSEN. Mr. Speaker, the Congress of the United States has lost one of its most illustrous Members. Senator John McClellan has come to symbolize in the minds of many Americans those standards of impartiality, thoroughness, and integrity which all Members strive to achieve.

His efforts to investigate organized crime were highly successful in making Americans aware of the dangers organized crime posed to our way of life. His legislative accomplishments are many and varied. He performed great service to the Nation as chairman of the Senate Appropriations Committee, and as the chairman of the Criminal Laws and Procedures Subcommittee of the Senate Judiciary Committee he made significant contributions to the codification of Federal criminal law.

His seat in the Senate will be filled by others, but no one will ever take the special place with which we hold him in our hearts.

A REALISTIC STEP TOWARD WELFARE REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MICHEL) is recognized for 30 minutes.

Mr. MICHEL. Mr. Speaker, Winston Churchill once said that democracy is the worst form of government, except for all the other forms of government that have been tried. Almost the same can be said of the current welfare program. It is a badly operated program, but even at that it is better than the alternatives that have been proposed thus far.

There is need for change, and today I am introducing our Welfare Improvement and Cost Reduction Act of 1977, which I hope will serve as an efficient, speedy and economic reform of the current welfare system.

The bill I am proposing is based on the premise that the existing welfare system is structurally sound, but in need of improvement.

This legislation rejects the notion that the system should be scrapped entirely. The Welfare Improvement and Cost Reduction Act is designed to streamline management operations, rid the system of fraud and abuse, strengthen work requirements and ultimately save the Fed-

eral and State Governments more than $5 billion a year—savings which can be translated into improved benefits for the needy or badly needed tax reductions for all citizens.

These reforms should eventually put to rest any notions of scuttling the present welfare system and embarking on some costly long-range program that will provide no immediate relief. At the very least, these reforms will buy us enough time to bring about long-term improvements the way it should be done—carefully, conscientiously and comprehensively.

Before discussing the specifics of this bill, however, let me just highlight a few of the shortcomings of the welfare changes proposed by the Carter administration.

Among the most troublesome features is the cost. We have just learned from the Congressional Budget Office that the Carter plan will cost the Federal Treasury $10 billion more than what was originally projected. The figure is staggering, especially in light of current economic conditions and the effect it would have on inflation.

Second, the program would add a significant number to the welfare rolls, far more than the projected 2 million. Under the plan a family of four earning up to $8,400 a year would be eligible for benefits. Today there are some 17 million Americans working full time and earning less than $8,000.

Another concern I have is the fact that the Carter plan will not really be felt until the next decade. The need for change is now.

Also a factor is the ultimate impact the administration proposals would have on family life. I do not believe the claims that their plan will keep families together. The facts say otherwise.

For example, if no job is available, a two-parent family of four would receive $4,200 annually, but if the parents live apart, the total would be more, $4,700. Likewise, an elderly couple would receive $3,700 annually, while two elderly people either living apart or living together but unmarried would get $2,500 each for a total of $5,000. Clearly the incentive in the Carter plan does not promote family life.

The jobs section of the Carter plan raises even more questions. The work requirements appear to be weaker than what we already have on the books.

Finally, the Carter proposal is just too complex and too confusing. The current director of the California Department of Welfare Benefit Payments says:

> I don't understand it . . . the first time I tried to read it my brain turned to mush . . .

The executive director of the National Public Welfare Association offers a ray of hope for passage of the legislation, but that does not comfort me. He says the plan is so complicated the Congress may not take time to unravel it and just pass the measure out of sheer confusion.

Mr. Speaker, it is one thing to criticize. It is another to come up with a plan that can work and work in the interests of the taxpayers, the States, the underprivileged, and the Nation.

I believe the Welfare Improvement and Cost Reduction Act is such a plan. Very briefly this is what it will do.

Our program:

Assumes that the present welfare system is basically sound and can be made more workable through basic management improvements.

Provides immediate relief of up to $2 billion to financially strapped State and local governments.

Provides incentives, mostly through matching grant programs, for the States to save billions in tax dollars by improving monitoring and administration of welfare programs.

Retains State and local control over welfare programs.

Encourages experimentation and new approaches to welfare needs.

Provides strong work incentives to help move employable recipients from welfare to self-sustaining jobs.

This legislation admittedly does not do a great deal to increase benefits or improve services to the needy. However, I think it is vitally important to remember that given the current economic crisis in welfare programs, we cannot make significant improvements in benefits or services until we have cleaned up the management, fraud, and waste. Second, there is an obvious corporation between improving operations and helping people on welfare. By implementing improved management techniques, we will be releasing billions of dollars which can be earmarked for welfare recipients. Beyond that, modernization and computerization of monitoring and recordkeeping activities hopefully will reduce redtape and paperwork and enable social workers to increase their contact with recipients and do a better job providing human services.

One new program in the bill I want to emphasize is the monthly retrospective reporting system in AFDC, food stamps, and medicaid. The Department of Health, Education, and Welfare estimates that this program will result in significant savings to both the States and the Federal Government.

Here is how it works:

This system requires a recipient to file at the beginning of each month a report of income and circumstances for the preceding month, and then pays the recipient a benefit based on the information contained in the report. This is in sharp contrast to the existing procedures in most welfare programs, including AFDC and food stamps. Most reporting requirements used today are semiannual or annual. Under current procedures in AFDC, payments are based on a prospective estimate of a family's monthly income and circumstances and are only redetermined once every 6 months.

The current reporting procedures are based on the outmoded notion that the income and circumstances of welfare recipients change infrequently and that recipients have little attachment to the labor force. Welfare quality control statistics and studies both indicate that the primary causes of overpayments in welfare programs are the infrequency of their recipient reporting requirements and the fact that they are prospective systems, that is, payments are based on a prediction of future income and circumstances rather than on known past income and circumstances.

Department of Health, Education, and Welfare field tests have shown that the utilization of a monthly retrospective reporting system in the AFDC program would result in substantial reductions in the rates of ineligibility and amounts of overpayments, and thereby produce substantial savings in program costs. At the same time such a system would also improve program responsiveness to the changing needs of families by reducing underpayments and by improving the accuracy of all payments to recipients. The tests show that two and one-half times as many families received a grant adjustment under this system as compared with the current system. Of these adjustments, the value of grant increases exceeded the amount under the present system by 75 percent, while the value of grant decreases exceeded the current system's amount by 100 percent.

All told, HEW estimates that a monthly retrospective reporting system would save from 8 to 10 percent in payment costs, and projects total dollar savings of up to $1 billion for AFDC, and $500 million for food stamps if the system were implemented nationwide. A similar projection for medicaid would show savings of in the neighborhood of $1.5 billion.

I think the provisions I have described constitute a moderate and sensible approach to solving one of the most pressing problems facing Government assistance to the needy. I am not pretending that this legislation will solve all of our welfare problems, but I am convinced that the money saved through these reforms will go a long way toward easing the burden on the American taxpayer and improving services to welfare recipients at the same time. I am also convinced that an orderly step-by-step renovation of the welfare system is a far cry better than a rush-to-judgment expensive, cure-all approach proposed by the administration.

We cannot afford not to take this first step.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the distinguished minority leader, the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, I want to congratulate my good friend the gentleman from Illinois (Mr. MICHEL) on the program the gentleman has outlined. Of course, as yet I have not had a chance to study the program thoroughly, but from listening to what the gentleman has said today it certainly sounds to me as if he has a program which is not only workable, but certainly far superior to anything which we have on the books or in operation now.

It represents a very definite improvement. I have heard a wise man say that there is no such thing as a good welfare program, there are just some that are worse than others. I think the gentleman's program shows a very definite improvement and a step toward the time when we can perhaps have a welfare program that really makes sense to all of us.

I congratulate the gentleman from Illinois.

Mr. MICHEL. I thank the gentleman from Arizona for his contribution.

I would reemphasize that we have basically a pretty good program. It is primarily a problem if improving management and the capacity for monitoring and checking.

Regardless of how affluent a society we eventually are going to have, there will always be a certain number of persons who will have need for welfare and we are going to take care of them. But, I think to build the confidence of the American people, those who pay the bill for those who are less fortunate, we should use the most modern management techniques.

This is now particularly possible because of knowledge of computerization to achieve accountability and measure actual performance of programs.

In the State of Colorado there has been a test where 10-percent savings have resulted through retrospective reporting. Expanded to AFDC, medicaid and food stamps nationwide, such a system could save at least $3 billion for the Federal and State Governments combined.

Mr. COLLINS of Texas. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Texas.

Mr. COLLINS. Mr. Speaker, I was interested in the statement made by the gentleman from Illinois. On this subject of welfare in my own district they are very much concerned with trying to reduce the amount of welfare and the dollars we are spending particularly while employment seems to be full and we have made improvements in the program.

Did the gentleman say that under the Carter plan they plan to spend $10 billion more for welfare?

Mr. MICHEL. That is not by my estimate but by the estimate of the Congressional Budget Office. They made that public this week. Their projections are $10 billion over and above the cost initially shown in the President's proposal.

Mr. COLLINS of Texas. I certainly do hope the gentleman will continue to fight and that his alternatives will get full consideration.

Mr. MICHEL. As the gentleman knows, there are currently hearings going on with respect to welfare reform. We thought it appropriate that before the Congress adjourns at least get our proposal in for consideration.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate the distinguished minority whip yielding.

I am very much appreciative of what the gentleman from Illinois has brought to the attention of the House today. I testified before the Corman Welfare Reform subcommittee in Los Angeles recently. Also the Budget Committee has had testimony from people at the grassroots level who receive welfare. What my colleague, the gentleman from Illinois, has brought to the attention of the House is correct about the amount of fraud currently in the program. If we just trim that alone, and it is possible to trim that, there would be very substantial savings.

I am very appreciative that in the bill the gentleman has submitted, as I understand it, there are requirements that would save the present amount of welfare being spent at the Federal level by almost $1.5 billion.

Mr. MICHEL. Yes.

Mr. ROUSSELOT. It would also require State governments to reappraise and reevaluate their supplemental benefit programs and there might be a savings of up to $3.7 billion in their expenditures—a savings which could be translated into tax cuts for the already overburdened taxpayers.

So I join with our minority leader, the gentleman from Arizona (Mr. RHODES) in thanking the gentleman from Illinois for taking the time to do the research and for also asking that the administration utilize the resources at hand to consider alternatives to the Carter plan, which is the $50 billion guaranteed annual income.

Mr. MICHEL. Mr. Speaker, I thank the gentleman. I know full well that the gentleman from California (Mr. ROUSSELOT), our minority leader, and I strongly oppose the federalization and nationalizing of the program to the extent that the States would be frozen out. What we are proposing here are grant mechanisms to encourage the States to be more diligent and effective. This proposal provides up to 90 percent Federal matching contribution to improve State administration. So we are not saying, "You do it and we will give you no resources to pay for it."

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield further, I am especially appreciative of what the gentleman said about the necessity of State and local governments computerizing welfare recipient data. In California, as the gentleman knows, under Governor Reagan, information concerning the great number of people receiving welfare payments was put on computers. As a result, we were able to eliminate duplication where the same recipient was receiving checks in three or four different counties. For that reason alone, it is more than worth the relatively small expense of computerization in every State.

Additionally, I believe that combining that system with the employment service or job bank in each State can help welfare recipients, who want to work, find employment.

Mr. MICHEL. Mr. Speaker, I might add that in our labor appropriations bill for the last several years we have been appropriating significant sums of money to provide for that kind of national job bank. It has not really got as far along as I would like to see it.

Mr. ROUSSELOT. Or as it should be.

Mr. MICHEL. When you think that only one-third of job availabilities are those that you see published publicly, obviously there is a deficiency. We have tried to move the Department of Labor to more aggressively and forcefully find and publicize these job availabilities. It can be done.

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield further, I want to compliment my colleague again for forcing the discussion here today in the House and also I hope the gentleman will go before the subcommittee now holding hearings in the Committee on Ways and Means. I think we should all do it, those of us who want to participate in the formulation of this issue. I compliment my colleague for doing it.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the distinguished minority leader.

Mr. RHODES. Mr. Speaker, as the gentleman from Illinois knows, a task force of the Republican Research Committee came out with a very important report on illegal immigration. Part of the report, of course, was to use the social security system as a means of trying to check whether or not a person who applied for a job was actually an illegal alien or not. My own personal refinement to that was to computerize people on social security, as the gentleman has indicated for the welfare recipients, so it would be possible for an employer who is interviewing a possible employee to check the social security card to make sure it was not forged. He would be able to call an 800 number and give a number to the computer and the computer would then give him back the name. That way an individual could be pretty certain that the person in front of him was legally in this country.

It seems to me that this goes hand in glove with the gentleman's proposal as far as computerization of welfare recipients is concerned. The illegal immigrant problem is an increasingly difficult problem to solve, and an increasingly important one that we do so. I am sure that the gentleman may have had this in mind when he prepared his program.

Mr. MICHEL. I appreciate the gentleman bringing up that additional subject matter, because it does tie in so very closely, and we have that capability for making that kind of a check in this legislation.

I was a bit disturbed, incidentally, in an illegal alien provision in the supplemental appropriation bill that is in conference again right now. The Department of Labor currently is not sharing information on illegal aliens as freely as they should be with the States. I think it ought to be just about mandatory. The Department has been reluctant to do that. The State now has to initiate the action. But I think as long as we have the capability at the Federal Government level, we ought to freely share that information, and voluntarily do it as a means of solving that overall problem. The supplemental appropriation bill contains additional funds to enable the Department to step up the effort regarding illegal aliens but contains no provision requiring the Department to share its information or otherwise work with the States in this regard. Such a provision should have been in that bill.

Mr. MILLER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to my friend from Ohio.

Mr. MILLER of Ohio. I thank the gentleman for yielding to me. A few moments ago, the gentleman had mentioned

about job availability. In newspapers all over the country, we see that there are jobs available, but apparently the current system makes it more encouraging to receive welfare in many instances instead of accepting a job. In the local papers, we have jobs available. As a matter of fact, we often see two, three, four, or five full newspaper pages of jobs available for those who would want to work.

When the gentleman made the statement that under the administration proposal to change the welfare system, welfare costs would increase some $10 billion; did it indicate that we would have additional people on welfare under that proposal by the administration? Can the gentleman from Illinois convey to us, and for the RECORD, how many additional people would be added to the welfare roles under the Carter plan?

Mr. MICHEL. Well, I cited the example that under the figures presented in the administration's initial proposal, a four-member family, with two parents, earning up to $8,400 would be eligible for welfare. Then, I cited the fact that there are today 17 million Americans working full time and earning less than $8,000. Presumably most of these people are not currently receiving welfare but apparently a good many of them would be eligible for welfare under the administration proposal.

Mr. MILLER of Ohio. It has been some time ago since the proposal came up, and if my memory serves me correctly, there will be around 2 million additional people added to the welfare roles; is that correct?

Mr. MICHEL. The other point is, you can play all the games you want to with numbers, but it would obviously bring on board far more than just the 2 million they initially talked about. If we add up the figures it is conceivable there could be many times that number.

Mr. MILLER of Ohio. I thank our minority whip for yielding to me.

FRED TELONICHER — HUMBOLDT'S CHAMPION OF NATURAL AND HUMAN RESOURCES

The SPEAKER pro tempore (Mr. GLICKMAN). Under a previous order of the House, the gentleman from California (Mr. DON H. CLAUSEN) is recognized for 5 minutes.

Mr. DON H. CLAUSEN. Mr. Speaker, Professor Emeritus Fred Telonicher of Humboldt State University was highly respected by his academic peers, genuinely admired by the people in the community, and greatly appreciated by those athletes and students fortunate enough to be associated with him during his long tenure at Humboldt State University. He passed away on November 13. I have enjoyed a very personal friendship with Fred Telonicher and his marvelous family and can state categorically that he was a "hero" to many of us involved in athletic endeavors in Humboldt County.

It has been said that the best way to succeed in life is to act on the advice we give to others. Fred Telonicher was a very successful man who continually demonstrated that goodness depends not on things, but on the use we make of things. His strength of character was an inspiration to all who knew him, but particularly his students and athletes, who demonstrated the sincerest form of flattery by patterning themselves after him. Our Redwood Empire communities are filled with outstanding civic and community leaders who greatly benefited from their association with this fine man.

As his close friend and colleague, Dr. Homer Balabanis said of him—

He belonged to an era of teachers who considered their profession as a call and the intellectual and moral growth of their students as their chief reward and satisfaction.

I want to record permanently the eulogy contained in the faculty and staff bulletin of Humboldt State University and call it to the attention of my colleagues in the Congress and the readership of the CONGRESSIONAL RECORD throughout the Nation.

Fred Telonicher was a champion of natural resource programs and an extraordinary motivator of human beings and human resource programs.

We shall miss him but he has truly left his mark on the sands of time.

FRED TELONICHER

Humboldt State lost one of its most beloved and popular faculty members with the passing November 13 of Professor Emeritus Fred Telonicher. He was 74.

Telonicher's tenure at HSU spanned forty years, from his appointment in 1927 as an instructor in physical education to his retirement in 1967 as professor of wildlife and zoology. He was a graduate of Fresno State and took his graduate study at Stanford where he earned membership to the Sigma Xi honor fraternity. He served as the first president of the General Faculty and also as head of his department. For years, he was in charge of men's physical education and athletics and represented Humboldt State in its conference associations.

In recognition of his excellence as a professor he was nominated by the faculty in 1965 for the Trustees Award as the CSUC's Outstanding Professor. A laboratory in the University's marine station at Trinidad bears his name in commemoration of his interest in marine zoology and his many contributions to that science.

He was an ardent duck hunter and fly fisherman and belonged to a number of wildlife and conservation associations including Ducks Unlimited and Conservation Unlimited.

But he was perhaps best known and remembered for his extraordinary talents as a teacher.

He was so eulogized, in part, by his close friend and longtime colleague, Dr. Homer Balabanis:

"Fred Telonicher envisioned, conceived and gave birth to the program which in our day has developed into the ramified program of Natural Resources that attracts students from all over the world. But his chief contribution to human betterment was as a classroom teacher—and as a teacher, I knew him well. He belonged to an era of teachers who considered their profession as a call, and the intellectual and moral growth of their students as their chief reward and satisfaction. By his modesty, fierce integrity, high standards of personal conduct, and his faithful performance of duty, he dignified the teaching profession and earned the respect and affection of all those who knew him.

"He loved both learning and the learner. Every statement he made in his class was the product of a clear, brilliant mind, and it was backed by meticulous research and preparation; and he taught his studnets to observe the same standards. His knowledge came less from books and more from the study of nature and man, and his students were motivated to do likewise.

"But Fred's influence extended and will continue to extend far beyond his classroom; for his thoughts and actions will continue to live in the hearts and minds of his students, now become teachers, physicians, dentists and pharmacists who carry on his work."

A memorial scholarship has been established at the University and contributions may be sent to the Fred Telonicher Biological and Sciences Scholarship.

GOVERNOR THOMSON: STRONG SPOKESMAN ON ENERGY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 10 minutes.

Mr. CLEVELAND. Mr. Speaker, the national debate on the future of our energy policy has been seriously undermined by the shortage of political leaders who are willing to advocate unpopular positions or ones which have vocal opponents. Thus, there has been little public advocacy of nuclear power, or defense of the record of the oil companies in providing for the energy needs of this country.

The result has been a debate in which certain points of view have had numerous articulate spokesmen, but in which some other points of view have been rather silent.

New Hampshire's Governor, Meldrim Thomson, Jr., is characterized by his willingness to state his views eloquently and strongly, and to speak out whether he is in agreement with the politically popular position or sharp disagreement. He speaks his mind on his beliefs, and does not mince words in doing so.

Therefore, I believe it is a healthy addition to our debate on energy policy to insert into the RECORD at this time remarks that Governor Thomson of New Hampshire made at price monitoring hearings before the Department of Energy in Boston, Mass., on October 21, 1977.

Governor Thomson's eloquent comments follow:

STATEMENT OF GOVERNOR MELDRIM THOMSON, JR., NEW HAMPSHIRE PRICE MONITORING HEARINGS

Mr. Chairman, Members of the Committee,

My name is Meldrim Thomson, Jr. I have the privilege of serving the sovereign State of New Hampshire as Governor.

Since becoming governor in 1973 I have spent more of my time in the fight for a national energy policy that would make America independent of foreign sources of energy than in any other gubernatorial activity. Without an adequate supply of energy the citizens of New Hampshire suffer just as do those in other states.

We in this great country of opportunity have been blessed by the possession of 33 percent of the fossil fuels of the world. But since the crucial oil embargo of 1973 we have done little to produce the energy resources that could keep America moving in prosperity for centuries yet to come.

I am deeply disappointed with President Carter's public statement of last week in which he pointed the finger of scorn at the oil industry in a blunt attempt to force the

Congress into accepting his production deficient, massive tax energy policy.

Revealing his frustrations at the studied analysis which the United States Senate and well informed technical experts throughout the nation have given his proposed National Energy Policy in the past few months, the President responded by raising the demagogic alarm of "the biggest ripoff in history" by the oil companies.

Just what is "the potential war-profiteering in the energy crisis" to which the President referred?

For the ten year period from 1967 to 1976, the rate of return on invested capital averaged 13.8 percent in the petroleum industry. This is slightly above the average figure of 13.1 percent for all manufacturing industries in the United States.

While the petroleum industry return was 13.8 percent, the drug industry enjoyed a 19.9 percent return; computers, 15.8 percent; and printing and publishing, 14.1 percent.

In 1974, petroleum industry rate of return reached the high point of 19.1 percent due to increased inventory valuations. In 1975, the rate of return was 13.9 percent; in 1976, 15.1 percent and in the first six weeks of 1977, 13.7 percent.

Recently Business Week indicated that for the 12 months ending June 30 the largest oil, gas and coal companies had a return on equity of 14.2 percent. By contrast radio and broadcasters had a return of 23.3 percent; manufacturers had a return of 17.9 percent; and savings and loan companies a return of 15 percent.

Actually, whether the Carter plan is accepted or the market is deregulated, American consumers will be paying the so-called world price for their oil.

The difference is whether the decontrol money will be given through the market place to American producers. These American companies plan to spend the money in the United States developing oil and gas and will pay taxes on their profits to the state and federal government.

Under the Carter proposal, the American consumers will pay the difference between the controlled price and the world price in the form of taxes which will not be spent on energy development.

More and more oil will have to come from abroad in exchange for the real wealth of our nation. Increasingly we will suffer a shortage of dollars with which to buy fruit, vegetables and meat while the OPEC countries continue to spend freely on the weapons of war.

It was the inventive genius, the initiative and hard work, the enormous risk of capital by our oil companies that put America on wheels and made us the greatest industrial nation in the world.

If the producers of energy are the great villains that populist politicians like to accuse them of being, why haven't they brought the culprits to heel?

There is no big oil in New Hampshire! The nameless, faceless villains of the President, some Congressmen and Washington bureaucrats, are the small businesmen who run oil dealerships in our state.

They are our neighbors and our friends. They are the ones we call for burner repairs after midnight, who contribute to our local churches and charities, who are the leaders in 4-H, Scouts, and Little League, who have the time for youth activities or civic committees.

They are active members of the community and are on a first name basis with their customers and most of the people who live in our cities and towns.

They are the ones who have been hardest hit by the rising oil prices and government monitoring and controls.

They are the ones who will have to sustain the burden of reporting prices monthly to the Department of Energy.

Like other small businessmen, they have been swamped by the investigations and harassments of the IRS and OSHA, more recently they suffer exquisitely at the hands of the FEA and the EPA.

The oil dealers of our state, like all small businessmen, have seen their costs rise rapidly throughout the period since the oil embargo.

The salaries of their employees have risen. Social Security contributions have increased as have hospitalization and insurance.

Our oil dealers pay more for utilities, gas for their trucks, new equipment and repairs.

One dealer told our state Energy Office he had recently obtained prices on a new truck. He had not purchased one since 1972. At that time, he bought a new truck chassis for $7,000. Now the price is $14,000.

Our dealers pay more for the money they borrow to keep their businesses running. With the higher fuel prices their collections are slower and their accounts receivable are astronomical by the end of the winter!

In New Hampshire, over 50 percent of the dealers do not charge interest or late charges for overdue accounts. Certainly that is a poor example of the war profiteering.

In this day of escalating oil costs, we too often forget those persons deeply enmeshed by today's oil problems—the small oil dealers.

In a recent survey in the magazine "Fuel Oil and Oil Heat" for the 1976–1977 winter, the squeeze that price monitoring and controls have placed on dealers is revealed.

Profit margins for heating oil dealers increased by 8 percent but total costs went up 13 percent. This means profits were down about 8 percent in the year.

Before the embargo, dealers operated on a 35 percent margin. Today if they are lucky, they average 20 percent.

Since 1973, fuel prices have doubled, margins have increased 24 percent, but costs have increased 36 percent.

Let's look at profits. Per customer profit for the year averaged $27.50 in 1973. By 1976, the profit margin had dropped to $22.61 per customer per year. In 1977, an extreme winter that was 10 percent colder than normal, and thereby produced a higher demand for oil, profits climbed only 29 cents to $22.90.

Still we pay lip service to price monitoring. We understand that 3,000 of the 15,000 oil dealers in the nation will now be monitored. This group of dubious distinctive faces increased pressure to keep their prices down, even if their competitors raise their prices to meet rising costs.

The government threatens full scale audits of dealers who exceed the complex trigger mechanism prices and will publish lists, black lists, of "so-called" profiteers who raise their prices to meet the rising costs of doing business.

The dealer who is audited must have an accountant, a lawyer, and his staff available to assist in the audit.

In order to survive, the dealers will be compelled to cut their costs because controls and the fear of controls have made them hesitate to increase their business. Controls will make our people, the oil customers, afraid to seek a new dealer.

As we push conservation nationally, the dealers must cut back on the very personnel and services needed for business efficiency.

Most dealers in New Hampshire lose money on their burner service operation which must be made up from product sales profits. To survive they must cut down on the quality of their personnel who service burners, on the equipment they use and the time they spend to service each burner.

Good service and burner maintenance, FEA agrees, can cut fuel consumption 10 to 20 percent or more in each oil heated home and yet the proposed monitoring would discourage good burner services.

We oppose continued price monitoring by the Department of Energy.

We oppose government controls on small businesses by intimidation.

We reject the implication that our oil dealers are profiteering on the basic need for heat during our cold New England winters.

We resent the continued involvement of the government in private industry and the destruction of our efficient oil marketing system.

We resent government intervention and the constant threat of intervention that has driven almost 30 percent of our New Hampshire dealers out of business since 1973. In that year, there were 290 fuel dealers in our state; now there are less than 200. In fact, we understand that five more are in the process of closing their businesses right now.

We resent the FEA and industry haggling over a 2 cent per gallon discretionary provision before prices are triggered, while the President threatens a $5.00 per barrel, or 12 cents per gallon tax on imported crude oil.

Let me stress that New Hampshire relies heavily on oil and that our people, like others in New England, are struggling to pay for their energy needs.

In New Hampshire, over 70 percent of our homes are heated by oil.

Over 70 percent of our electricity is generated from oil.

Bluntly, let's start calling a spade a spade!

The blame for our continuing energy crisis lies squarely on government and its role of interference; not on the oil industry.

We must get back to the free marketplace and true competition among companies, and brands and dealers.

Price is not the only indicator for the marketplace and if we are to set price as the criteria, we must also set up criteria for service, for courtesy, for insurance coverage, for friendliness.

Let the FEA set the number of night deliveries a month, the number of service calls, interest on late charges allowable, and the number of times the switchboard receptionist can say "Thank you, for your order," if it must monitor the prices of our oil dealers.

There is no more certain way to destroy the great American free enterprise system than for government to continue riding the backs of the small businessman of this nation.

I can say with some authority, and much emphasis, that the people of New Hampshire will have a warm and happy winter if left alone to burn the stacks of federal reports, regulations and studies they now have on hand. We have no need for more, thank you.

PROCEDURES FOR CONDUCTING CONGRESSIONAL BUSINESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS) is recognized for 30 minutes.

Mr. COLLINS of Texas. Mr. Speaker, today I have asked for a special order to discuss the general issues regarding our procedures for conducting congressional business. When the House meets next week, I will submit a privilege of the House resolution under rule IX, which gives to each Member of Congress the right to directly approach the Speaker on a matter regarding the integrity of the proceedings of the House of Representatives.

I am the ranking Republican serving on the subcommittee which handles the oversight and investigations for the Interstate and Foreign Commerce Committee.

I am asking that the information of our subcommittee that is not classified nor proprietary should be made public if a Member of Congress so requests.

Let me give you some background on the manner in which our subcommittee operates. We operate under the committee rules. The committee rules consist of a dictatorial arrangement of the complete and final control being rested in the hands of the majority party.

A recent hearing and investigation was conducted by our subcommittee regarding the manner in which the Chairman of the Federal Power Commission directed some of his staff. In this investigation the issue involved was that the former Chairman of the FPC was charged with transferring employees of the FPC who may have differed with his policy procedures. No one was fired. No one was reduced in financial grade. The question was whether the Chairman had acted in good faith in transferring people who may have different viewpoints than his own in regards to his policies.

As we reviewed this issue, I was astounded that our subcommittee would ever question the way that any chairman ran his operation. I summarized the dictatorial procedures which we have in our own committee. Here is my statement which was part of the Oversight Committee Report on Adverse Personnel Actions Against Professional Staff Members at the Federal Power Commission, which was dated September 1977:

We should broaden the comparison in reviewing the management actions of the Chairman of the FPC. Our own Oversight and Investigations Subcommittee provides a comparable situation.

Our subcommittee has a staff of 32 persons, which is selected in accordance with the following provision in the committee rules: "Subcommittee chairmen, subject to the approval of the majority party members of the committee, shall be entitled to make such appointments to the professional and clerical staff of the committee as may be provided in the budgets." This means that the chairman names the entire staff subject only to the approval of his majority members. The chairman also has complete jurisdiction in discharge and in compensation matters subject only to the approval of the majority members. On the subcommittee there is no personnel review procedure, nor is there any Civil Service procedure.

Out of the 32 members of the subcommittee staff, 12 have senior assignments. Three make between $44,000 and $46,000. Four make between $35,000 and $40,000, and five make between $21,000 and $30,000. These positions are filled on the basis of personal selection by the chairman with no boards, no examinations, nor any voice in the matter by the minority members of the subcommittee.

The minority has one staff member, an attorney. He has one secretary who spends one third of her time helping him. These minority positions come from the full Commerce Committee's budget not the subcommittee's. The lawyer's office is located three blocks away from the committee hearing rooms.

The chairman has ruled that the minority lawyer may not have access to the raw data developed as investigations are being prepared. The chairman has also ruled that members may not Xerox any material that is being reviewed and that only members may see, as a matter of right, investigative material.

The projects for oversight review are determined entirely by the chairman subject only to approval by the majority members. The minority has never been given an opportunity under the present chairman to develop or make studies.

The responsibility of oversight should be bipartisan, but with the selection of all matters for review being entirely in the hands of the chairman, the subcommittee might lack full incentive for necessary reviews. The chairman decides topics for investigation; decides who will testify; decides when hearings and meetings will be held; decides which staff member will investigate and on which research matters; decides how staff time will be devoted to those matters; and decides place of hearings.

The executive branch of the Federal Government at this time is controlled by the same political party as the controlling party in Congress. Our committee system requires the chairman to review the performance of both executive and independent agencies. The new President with his appointments will soon control not only the executive branch but independent agencies as well. With our subcommittee, the minority does not have the right to select any of the subjects for review or oversight.

Additionally, our committee rules provide that "The right to interrogate the witnesses before the committee or any of its subcommittees shall alternate between majority and minority members. Each member shall be limited to 5 minutes in the interrogation of witnesses until such time as each member who so desires has had an opportunity to question witnesses. No member shall be recognized for a second period of 5 minutes to interrogate a witness until each member of the committee present has been recognized once for that purpose." However, our chairman usually follows a procedure whereby witnesses selected by him present their statement, then the majority counsel develops the majority's points extensively. Finally, the five minute rule applies when the minority is allowed to question the witnesses on the matter being heard.

This all points up the fact that the subcommittee report regarding the FPC Chairman is critical of one man making personal decisions subject only to the approval of a few of his peers. Our subcommittee's personnel situation provides for an all-powerful chairman with only one political party having any input into the hiring, firing, or remuneration of employees and in determining investigative matters.

On questions of procedure the chairman always answers that he goes by the House and committee rules. The majority wrote the rules. The majority passed their rules. Furthermore, many of the investigative practices and procedures utilized by the subcommittee are reminiscent of those established 25 years ago by the Senate committee headed by Senator Joe McCarthy.

The budget for the subcommittee was $202,000 in 1972. It was $720,000 in 1976. The 1977 budget request was $898,000 plus an additional request of $159,500 for a total of $1,057,500.

In our subcommittee I have not taken issue with any of the members of the staff. They have impressed me as being hard working, sincere, and have been well mannered in all of our relationships. I have the utmost respect for our chairman who is an authority on parliamentary law, who works diligently at the investigative process, and who is a man of deep experience. What I do take exception to, is the fact that our committee lacks the balance that should be provided through the views of the minority and through the oversight of the public itself.

I have recently written a letter to Chairman HARLEY STAGGERS of the Committee on Interstate and Foreign Commerce but have not received a reply. I requested that subcommittee files that are not classified or proprietary be made public where I have so requested. I further asked that the complete personal records of a staff member who is no longer with our staff be made available for my study. I also asked that $150,000 be provided for legal and technical staff for the minority to conduct a full review of these materials, as this is the same amount of money that has been provided as supplementary funds for the majority staff.

My concern with the current issue under review is with a matter of principle. It does not concern individuals or personalities. But I believe that a subcommittee study under review had not had full and accurate reporting to the public. I further believe that an issue that has been before the subcommittee for 2½ years should have been concluded with a statement from our subcommittee saying that there was no justification or merit in this review.

MINIMUM PENALTIES FOR WELFARE FRAUD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. MARLENEE) is recognized for 5 minutes.

Mr. MARLENEE. Mr. Speaker, a lot has been said about the urgent need for reform of the welfare system in our Nation. Nearly everyone from welfare caseworkers to average taxpaying citizens even to the recipients themselves, agrees that the system we have today is confusing, costly, and largely a failure.

In 1977, a total of 26 million individuals, or 12 percent of the Nation's population, received some form of welfare. This costs American workers more than $64 billion—4 percent of the gross national product. Another 10.6 million individuals received benefits from the unemployment compensation program in 1977 at an additional cost of $13.9 billion.

Most recipients of welfare assistance are truly needy people who are lawfully entitled to receive benefits from these programs because of income level, physical disability, age, or some other criteria measuring eligibility.

However, millions of Federal dollars are wasted annually in welfare overpayments. An exact figure is difficult to determine because there are numerous and complex programs included in what we define as welfare. But for the AFDC program alone, the most recent quality control check estimated between 10 and 13 percent of AFDC cases involved fraud that could be attributed to the recipient.

The need for comprehensive reform of the entire welfare system has been agreed upon. Just what form this overhaul should take is a point of disagreement among experts in the field of social services, and carries over into an array of legislative remedies. While we are trying to figure our how to make the system work better, millions of tax dollars are being wasted because many of those who cheat the system are never punished.

It is my feeling that too little attention has been given to making sure those who defraud the system are punished.

Therefore, I am introducing legislation that would require mandatory minimum penalties for those who are convicted of purposely defrauding the Government to obtain welfare benefits for which they are not entitled.

The cash assistance programs which I have included in my proposal are medicaid, SSI, food stamps, AFDC, and unemployment compensation. My bill would require that unlawful recipients be required to pay back no less than the value of the services they received illegally.

Current statutes contain no mandatory penalty of any sort for proven cases of welfare fraud. I think the very least we should expect from those who commit such fraud against the Federal Government is for them to repay what they have received illegally. Requiring such a pay-back would serve notice to those contemplating fraud against the Government that if convicted they will be penalized no less than what they owe the system they cheated, and that the penalties can be far more severe. They should not expect to get off scot-free.

Every day the Government finds more and more uses for the hard-earned tax dollar. I think we owe it to the American workers to try and protect their contribution to the Nation's welfare system.

RURAL HEALTH CLINIC SERVICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 10 minutes.

Mr. PEPPER. Mr. Speaker, both the House and Senate have adopted the conference report on H.R. 8422, to provide medicare and medicaid coverage for the services of nurse practitioners and physician assistants in rural health clinics which meet appropriate standards, clearing the measure for the President.

I supported this legislation, which signals several important developments in the delivery of health care. As chairman of the Select Committee on Aging and its Subcommittee on Health and Long-Term Care, I am particularly encouraged by the promise this bill holds for improving the care that is available to older Americans.

First, the bill is further acknowledgment by the Federal Government of the maldistribution of physicians which impedes the delivery of health care in rural areas. Despite such Governmtnt programs as the National Health Service Corps, which encourage medical practice in medically underserved areas, physicians remain clustered around metropolitan areas. The bill signals the determination of Congress that residents of rural areas are to have equal access to medical care services in their communities without the necessity of traveling great distances.

By providing coverage for the services of nurse practitioners and physician assistants, the bill addresses an important but underemphasized aspect of our health care system, our failure to utilize properly the services of nonphysician health personnel, who in many cases are able to perform procedures which are now covered only if carried out by physicians—at higher cost both in terms of dollars and in terms of efficiency.

I have stressed the need to reevaluate the utilization of health care personnel, to allow direct reimbursement for licensed practical nurses, registered nurses, and others who are educationally prepared and licensed to perform certain medical procedures. Legislation I have introduced, H.R. 2851, would provide for medicare and medicaid reimbursement for the services of LPN's. We must look upon health care delivery as a cooperative effort, drawing upon the skill and experience of every member of the health care team—doctors, nurses, LPN's, physician assistants, and so on. Failure to do so results not only in enormous unnecessary expenditures but in top-heavy administrative burdens as well, with the patient often bearing the heaviest burden of high cost and inefficient care.

I applaud another provision of this bill which seeks to make home health care available to those who reside in rural areas. The bill provides for medicare and medicaid reimbursement for rural health clinics which provide part-time or intermittent nursing services and related supplies furnished by a registered nurse or a licensed practical nurse to homebound patients where there is a shortage of home health agencies.

As my colleagues are aware, I am deeply concerned over the problems which exist in making home health care available to our citizens, especially the elderly and homebound who often are forced to seek unnecessary and inappropriate institutionalization when these services are not available. Legislation I have introduced, primarily H.R. 1116 and H.R. 1126, would remove the restrictions which make home health coverage so difficult to obtain under medicare and expand the definition of home health care under both medicare and medicaid to include such services as nutritional counseling and periodic chore services. But these efforts must include encouragement of the development of home health agencies where none exist. A report issued last year by the Subcommittee on Health and Long-Term Care entitled, "New Perspectives in Health Care for Older Americans," pointed to HEW statistics which indicated as of April 1975, 54 percent of the Nation's counties had no medicare-certified home health agencies. We must do everything possible to assure that home health care is available in all parts of the country, and this provision of H.R. 8422 is an important component of this effort.

The bill requires those States which authorize nurse practitioners and physician assistants to provide reimbursement under medicaid for services provided in rural health clinics, to assure the poor, as well as the elderly, of access to these vital services.

The House-Senate conference addresses other important aspects of medical care in rural areas by requiring the Secretary of HEW to report to Congress by April 1978 on the advantages and disadvantages of extending medicare coverage to mental health centers and centers for treatment of alcoholism and drug abuse. Moreover, it was made clear in the conference report that the Secretary is to conduct demonstration projects under section 222 of Public Law 92–603—Social Security Amendments of 1972—on providing coverage for preventive services furnished by these clinics.

I strongly believe that we must press for greater emphasis on preventive health services, particularly under medicare, which currently covers principally acute, episodic illness. This orientation prevents realistic assistance to millions of elderly Americans whose greatest medical need is treatment of chronic illness and preventive health services such as hypertension screening, diagnosis, and treatment and physical checkups. It is my hope that these demonstrations will be carried out expeditiously.

Finally, the bill includes other provisions which can make these rural clinics operate effectively. They will be required to perform diagnostic services, including clinical laboratory services, to have on hand those drugs which are determined to be necessary for treatment of emergency cases as allowed by State and Federal law, and to make provision for utilization review to the extent the Secretary determines to be necessary.

Mr. Speaker, I commend the authors of the bill, the members of the health subcommittees of the Ways and Means and Interstate and Foreign Commerce Committees, which are chaired by my distinguished and able colleagues, DAN ROSTENKOWSKI and PAUL ROGERS, and their counterparts in the Senate for bringing this legislation to early enactment. It is my hope that its passage signals congressional action on a host of pending bills which can make long-overdue improvements in medicare and medicaid even prior to adoption of a national health insurance program.

THE SOCIETY OF MARY—PIONEERS OF TEXAS EDUCATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, Europeans first appeared in what is now San Antonio in 1718, and there founded the most important and most lasting of the Spanish missions in Texas. Almost 100 years after the founding of Villa de Bejar, as San Antonio was called, Father William Joseph Chaminade founded the Society of Mary at Bordeaux.

Father Chaminade had been witness to the destruction, chaos, and terror that accompanied the French Revolution, and his vision was to create an order that would have as its purpose the restoration of some of the values that had been destroyed, some of the institutions that had been damaged. He intended for the Society of Mary to be dedicated to education, and the best means of achieving his vision and purpose.

Father Chaminade could not have known that within a few decades his society would found the first private school in the faraway town of San Antonio, Tex. In fact, his Marianists

founded the first private school anywhere in Texas.

The Society of Mary sent four of their French brothers to Texas in 1852. The four brothers arrived at the town of Indianola, and immediately went on to San Antonio. By August their school was open. The first school was the most humble of beginnings for what is today a vast educational enterprise. The Brothers' School, as it was known started with 12 students, and it was located on the second floor of a livery stable near the San Fernando Cathedral.

The Marianists were not without resources, and in 1853 they opened St. Mary's Institute in a stone building on the banks of the San Antonio River. In a city of great Spanish influence, their building was distinctive, for it was built in the French style. Possibly it was the French brothers, or their unusual building, that led people to call the school simply, "the French school." The old building still stands, and is still owned by the society. It was used as the St. Mary's University Law School until 1967, and since that time has been used as a popular, unusual, and most beautiful hotel. The French architecture is still there, a rare example of this style in a part of Texas that was overwhelmingly influenced by Spanish and German cultures.

The Marianists did not labor in vain. The "French school" grew and prospered, and by 1894 the brothers were ready to open a college in the western outskirts of San Antonio. This college they called St. Louis University, but renamed it St. Mary's College in 1923.

The Society of Mary did not rest, either then or now; they founded St. Joseph's School at Victoria in 1906, a school that still operates. They founded the Central Catholic High School in San Antonio in 1932. In 1937 they founded Camp Tecaboca, in what is today an extremely popular area for summer camps. Then in 1943 the Marianists founded Our Lady of Guadalupe Parish and School in the town of Helotes. In 1949 they established the Holy Rosary Parish and School in San Antonio. They reached out to El Paso to found St. Joseph's School in 1959. Of all these schools, only that last one ever closed its doors; the rest are alive and well.

St. Mary's University has in recent years quadrupled its physical plant, and the Central Catholic High School is ready to embark on its own ambitious program of construction. These are sure signs, if any are needed, that the Marianists have lost none of the vision, the determination and the vigor their four brothers brought to Texas 125 years ago.

In January, the Marianists will celebrate the 125th anniversary of the arrival of their Order in Texas. They have much to celebrate. In San Antonio alone the Marianists are represented by 90 members. Their educational work just at St. Mary's University alone reaches 3,200 students, a number that is just about equal to the total population of San Antonio itself, at the time the Marianists founded their first school.

I am among those fortunate enough to have had my life touched by the Marianists. I learned law at the old school in downtown San Antonio, and it was as good a legal education as could be had in Texas or anywhere else. The same is true today. The Marianists provide a unique opportunity to learn, and learn well, in what is very nearly a family atmosphere.

It is a testimony to the truth of their vision that the schools founded by these good brothers have stood the test of time. The schools stand where they were founded, and though the world changes around them, they have remained secure. They have endured because they stand where they are needed, and provide the kind of care and concern that are always a necessity. Probably no one knows how many young people in Texas have received all or part of their education from the Marianist schools; it is certain, though, that for many the brothers offered the only chance for a decent education. This was certainly true in my own legal education, for other schools were too distant and too expensive to be within the realm of possibility for me. The "French school" of 125 years ago, housed in the same place where I went to law school, likewise provided for many the main, and often only, chance in life for a good education. The truth is that back then the brothers stood on a distant frontier, but even though the physical frontier has long since vanished, they still remain on the leading edge of life—true pioneers in education, the embodiment of the vision their founder had, and the eternal renewers of the human mind, vision, and spirit.

CONCURRENT RESOLUTION TO ASSURE QUALITY HEALTH CARE FOR RURAL POPULATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

Mr. BEDELL. Mr. Speaker, on September 23, 1977, HEW published some proposals for national health planning guidelines in the Federal Register. As currently written, only a few of the hospitals in my district could meet these proposed guidelines, and it is my understanding that many hospitals in other areas across the Nation are in a similar position. This fact has caused grave grassroots concern that many community hospitals, which are unable to meet these guidelines in the future, will actually be forced to close.

While I agree that cost containment for health care services is a matter of critical importance, I believe that it is imperative that we reassure the American people that the Congress will not allow the unjustifiable closing of small community hospitals which are so important to our citizens. I have thus drafted a resolution which would make it clear that it is not the intent of Congress that the proposed HEW guidelines for health planning be used to close small community hospitals, and when the House meets next Tuesday I intend to ask unanimous consent that this resolution be called up for consideration by the House.

The text of this resolution follows:

Concurrent Resolution to assure quality health care for populations located in rural areas

Whereas the Notice of Proposed Rulemaking regarding National Guidelines for Health Planning filed by the Secretary of Health, Education, and Welfare on September 22, 1977 (42 Fed. Reg. 48502–48505), has generated great public concern that the guidelines may impose unrealistic performance requirements upon small, rural hospitals;

Whereas many small, rural hospitals provide local communities with medical care of a kind and a quality that are not readily available at less accessible metropolitan hospitals; and

Whereas quality health care at a reasonable cost for populations in rural areas is a priority of the Federal Government: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the National Health Planning Guidelines should include sufficient flexibility to allow a Health Systems Agency, if it can demonstrate that its area has special characteristics, to establish a goal or standard that is different than the national goal or standard, therefore assuring that needed rural hospital services will continue.

SEEING AN ABORTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

Mr. LAFALCE. Mr. Speaker, the subject of abortion continues to arouse deep feelings in citizens throughout our Nation. Both those opposed to it and those who argue for its widespread use continue in many forums to advocate their beliefs. I have made clear in the past my opposition to abortion and want to insert an article sent to me by a constituent which appeared in the January 1976 issue of Esquire. It is entitled, "What I Saw at the Abortion" by Richard Selzer. This description of a late, but legal abortion by a doctor identifies his very personal sensations in a very revealing way. I want to share it with my colleagues:

WHAT I SAW AT THE ABORTION

(By Richard Selzer)

I am a surgeon. Particularities of sick flesh is everyday news. Escaping blood, all the outpourings of disease—phlegm, pus, vomitus, even those occult meaty tumors that terrify—I see as blood, disease, phlegm, and so on. I touch them to destroy them. But I do not make symbols of them.

What I am saying is that I have seen and I am used to seeing. We are talking about a man who has a trade, who has practiced it long enough to see no news in any of it. Picture this man, then. A professional. In his forties. Three children. Lives in a university town—so, necessarily, well—enlightened? Enough, anyhow. Successful in his work, yes. No overriding religious posture. Nothing special, then, your routine fellow, trying to do his work and doing it well enough. Picture him, this professional, a sort of scientist, if you please, in possession of the standard admirable opinions, positions, convictions, and so on—on this and that matter—on *abortion*, for example.

All right.

Now listen.

It is the western wing of the fourth floor of a great university hospital. I am present because I asked to be present. I wanted to see what I had never seen. An abortion.

The patient is Jamaican. She lies on the table in that state of notable submissiveness I have always seen in patients. Now and then she smiles at one of the nurses as though acknowledging a secret.

A nurse draws down the sheet, lays bare the abdomen. The belly mounds gently in the twenty-fourth week of pregnancy. The chief surgeon paints it with a sponge soaked in red antiseptic. He does this three times, each time a fresh sponge. He covers the area with a sterile sheet, an aperture in its center. He is a kindly man who teaches as he works, who pauses to reassure the woman.

He begins.

A little pinprick, he says to the woman.

He inserts the point of a tiny needle at the midline of the lower portion of her abdomen, on the downslope. He infiltrates local anesthetic into the skin, where it forms a small white bubble.

The woman grimaces.

That is all you will feel, the doctor says. Except for a little pressure. But no more pain.

She smiles again. She seems to relax. She settles comfortably on the table. The worst is over.

The doctor selects a three-and-one-half-inch needle bearing a central stylet. He places the point at the site of the previous injection. He aims it straight up and down, perpendicular. Next he takes hold of her abdomen with his left hand, palming the womb, steadying it. He thrusts with his right hand. The needle sinks into the abdominal wall.

Oh, says the woman quietly.

But I guess it is not pain that she feels. It is more a recognition that the deed is being done.

Another thrust and he has speared the uterus.

We are in, he says.

He has felt the muscular wall of the organ gripping the shaft of his needle. A further slight pressure on the needle advances it a bit more. He takes his left hand from the woman's abdomen. He retracts the filament of the stylet from the barrel of the needle. A small geyser of pale yellow fluid erupts.

We are in the right place, says the doctor. Are you feeling any pain? he says.

She smiles, shakes her head. She gazes at the ceiling.

In the room we are six: two physicians, two nurses, the patient, and me.

The participants are busy, very attentive. I am not at all busy—but I am no less attentive. I want to see.

I see something!

It is unexpected, utterly unexpected, like a disturbance in the earth, a tumultuous jarring. I see something other than what I expected here. I see a movement—a small one. But I have seen it.

And then I see it again. And now I see that it is the hub of the needle in the woman's belly that has jerked. First to one side. Then to the other side. Once more it wobbles, is *tugged*, like a fishing line nibbled by a sunfish.

Again! And I *know*!

It is the *fetus* that worries thus. It is the fetus struggling against the needle. Struggling? How can that be? I think: *that cannot be*. I think: the fetus feels no pain, cannot feel fear, has no *motivation*. It is merely reflex.

I point to the needle.

It is a reflex, says the doctor.

By the end of the fifth month, the fetus weighs about one pound, is about twelve inches long. Hair is on the head. There are eyebrows, eyelashes. Pale pink nipples show on the chest. Nails are present, at the fingertips, at the toes.

At the beginning of the sixth month, the fetus can cry, can suck, can make a fist. He kicks, he punches. The mother can feel this, can *see* this. His eyelids, until now closed, can open. He may look up, down, sideways. His grip is very strong. He could support his weight by holding with one hand.

A reflex, the doctor says.

I hear him. But I saw something, I saw *something* in that mass of cells *understand* that it must bob and butt. And I see it again! I have an impulse to shove to the table—it is just a step—seize that needle, pull it out.

We are not six, I think. I think we are *seven*.

Something strangles *there*. An effort, its effort, binds me to it.

I do not shove to the table. I take no little step. It would be . . . well, madness. Everyone here wants the needle where it is. Six do. No, *five* do.

I close my eyes. I see the inside of the uterus. It is bathed in ruby gloom. I see the creature curled upon itself. Its knees are flexed. Its head is bent upon its chest. It is in fluid and gently rocks to the rhythm of the distant heartbeat.

It resembles . . . a sleeping infant.

Its place is entered by something. It is sudden. A point coming. A needle!

A spike of *daylight* pierces the chamber. Now the light is extinguished. The needle comes closer in the pool. The point grazes the thigh, and I stir. Perhaps I wake from dozing. The light is there again. I twist and straighten. My arms and legs *push*. My hand finds the shaft—grabs! I *grab*. I bend the needle this way and that. The point probes, touches on my belly. My mouth opens. Could I cry out? All is a commotion and a churning. There is a presence in the pool. An activity! The pool colors, reddens, darkens.

I open my eyes to see the doctor feeding a small plastic tube through the barrel of the needle into the uterus. Drops of pink fluid overrun the rim and spill onto the sheet. He withdraws the needle from around the plastic tubing. Now only the little tube protrudes from the woman's body. A nurse hands the physician a syringe loaded with a colorless liquid. He attaches it to the end of the tubing and injects it.

Prostaglandin, he says.

Ah, well, prostaglandin—a substance found normally in the body. When given in concentrated dosage, it throws the uterus into vigorous contraction. In eight to twelve hours, the woman will expel the fetus.

The doctor detaches the syringe but does not remove the tubing.

In case we must do it over, he says.

He takes away the sheet. He places gauze pads over the tubing. Over all this he applies adhesive tape.

I know. We cannot feed the great numbers. There is no more room. I know, I know. It is woman's right to refuse the risk, to decline the pain of childbirth And an unwanted child is a very great burden. An unwanted child is a burden to himself. I know.

And yet . . . there is the flick of that needle. I saw it. I saw . . . I felt—in that room, a pace away, life prodded, life fending off. I saw life avulsed—swept by flood, blackening—then out.

There, says the doctor. It's all over. It wasn't too bad, was it? he says to the woman.

She smiles, It is all over. Oh, yes.

And who would care to imagine that from a moist and dark commencement six months before there would ripen the cluster and globule, the sprout and pouch of man?

And who would care to imagine that trapped with the laked pearl and a dowry of yolk would lie the earliest stuff of dream and memory?

It is a persona carried here as well as person, I think. I think it is a signed piece, engraved with a hieroglyph of human genes.

I did not think this until I saw. The flick. The fending off.

We leave the room, the three of us, the doctors.

"Routine procedure," the chief suregon says.

"All right," I say.

"Scrub nurse says first time you've seen one, Dick. First look at a purge," the surgeon says.

"That's right," I say. "First look."

"Oh, well," he says, "I guess you've seen everything else."

"Pretty much," I say.

"I'm not prying, Doctor," he says, "but was there something on your mind? I'd be delighted to field any questions. . . ."

"No," I say. "No, thanks. Just simply curiosity."

"Okay," he says, and we all shake hands, scrub, change, and go to our calls.

I know, I know. The thing is normally done at sixteen weeks. Well, I've since seen it performed at that stage, too. And seen . . . the flick. But I also know that in the sovereign state of my residence it is hospital policy to warrant the procedure at twenty-four weeks. And that in the great state that is adjacent, policy is enlarged to twenty-eight weeks.

Does this sound like argument? I hope not. I am not trying to argue. I am only saying I've seen. The flick. Whatever else may be said in abortion's defense, the vision of that other defense will not vanish from my eyes.

What I saw I saw as that: a defense, a motion from, an effort away. And it has happened that you cannot reason with me now. For what can language do against the truth of what I saw?

THE COUNTERCYCLICAL AID PROGRAM IS A WASTEFUL FAILURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 5 minutes.

Mr. LEVITAS. Mr. Speaker, I would like to call to the attention of my colleagues a report which was issued on November 29 by the General Accounting Office entitled, "Antirecession Assistance—An Evaluation." It is a very interesting report on the so-called countercyclical program providing Federal taxpayer funds to State and local governments presumably to offset the effects of a recession, such as cutbacks in their services. Its conclusions, though, are not surprising. GAO testified before my Subcommittee on Intergovernmental Relations last spring that its preliminary studies showed that this program was not achieving its goals, and this final report confirms that.

To refresh the memories of my colleagues, the antirecession assistance or countercyclical program for State and local governments was originally enacted as title II of the Public Works Employment Act last year. As set forth in the conference report, title II was designed to meet three criteria as an antirecession program: First, to provide assistance directly into the economy with as little administrative delay as possible; second, to provide selectively targeted assistance, so that only those governments substantially affected by the recession would receive funds; and third, to phase itself out as the economy improves. Unemployment rates were to be used as both the triggering and targeting mechanism.

Despite GAO's testimony last spring that the program was not meeting the first two aims, Congress, over my objections and that of many other Members, voted to extend this ineffective and wasteful program for an additional year

which, by the way, also meant that it was not going to meet the third objective either.

Now we have the benefit of GAO's final report, and its conclusions are the same. Quoting from portions of the findings, the GAO reports says:

First, the present antirecession assistance program is not a particularly effective tool for stimulation of the economy during a downturn;

Second, the present antirecession aid formula does not allocate aid in proportion to the needs of state and local governments as measured by recession-induced budgetary disruption. This reflects the fact that the level of excess unemployment is a measure of limited statistical reliability for jurisdictions and, even if statistically reliable, does not necessarily correspond to the impact of a recession on state and local government budgets;

Third, the antirecession assistance allocation does roughly correspond to the incidence of secular decline in a jurisdiction; but if it is the intent of Congress to provide assistance to meet such problems, a formula more specifically tailored to secular decline can be devised.

Mr. Speaker, I do not like to say "I told you so," but it is now clear that Congress should not have extended the so-called countercyclical program. The antirecession program is not only not countercyclical, it is not even effective in meeting the legitimate needs of State and local governments. Yet, here we have the program for another year, and I would not even be surprised if some people on the dole talk about renewing this wasteful program again next year. GAO was telling us the program was ineffective last spring, but we went ahead and renewed it anyway, with arguments that the funds were needed, that State and local governments already had budgeted this money and were counting on it, and so forth. Now GAO has put its evaluation in a pretty blue booklet. Will that change our minds when this question comes up again, or will the old arguments persist?

I do not question that many State and local governments need additional financial assistance, but when are we going to wipe this program off the books and work on a program that really answers their needs in a fiscally responsible way? When are we going to stop throwing good money after bad, not only for this particular program but for many others as well? Do we continue to waste money because the programs have attractive sounding names, but do not work?

Mr. Speaker, we hear a lot of rhetoric in this Chamber, and these could be considered rhetorical questions, but we really need to act upon them. For too long the Congress has complained about waste of taxpayers' dollars but has been responsible for a large amount of that waste by creating and perpetuating wasteful, ineffective programs. Now is the time to do something constructive about ending waste and this program of so-called countercyclical financial assistance is a good place to begin.

ACTIVITIES OF THE SMALL BUSINESS COMMITTEE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. SMITH) is recognized for 5 minutes.

Mr. SMITH of Iowa. Mr. Speaker, in 1977 the House Small Business Committee has been more active on behalf of small business, enacted more meaningful legislation, and by any meaningful measurement accomplished more than in any year since it was established. The activities have been so extensive that I believe a review of those activities should be set forth so those interested in small business matters may be more fully informed.

Under the Rules of the House of Representatives, 95th Congress, the Committee on Small Business has jurisdiction over bills, resolutions, and other matters relating to assistance to and protection of small business, including financial aid.

One hundred House bills, House resolutions, and Senate bills passed by the Senate were referred to the committee. Of these: 33 were considered and enacted into law, passed the House or were otherwise disposed of; 34 were the subject of hearings not completed; and 33 are awaiting action.

The committee has held or scheduled 91 days of hearings—as compared to 54 in the first session of the 94th Congress, 1975—62 days being on legislation and 29 days being on investigations.

Also, the committee this year has filed 10 reports with the House—as compared to 9 in 1975—and has printed three staff reports and compiled and printed the Small Business Act, the Small Business Investment Act, and major related laws of importance to small business.

The committee has also continued to work with the Budget and Appropriations Committees to secure much needed additional funding for SBA programs. For fiscal year 1978, SBA's financial assistance program—excluding physical disaster loans—were increased to $3.491 billion from $2.962 billion in fiscal year 1977, an increase of 17.9 percent; and guarantees on surety bond and pollution control agreements were increased from $888 million to $2.1 billion, an increase of 136.5 percent.

MAJOR CHANGES IN SBA

There have been some major changes in 1977 affecting the Small Business Administration. In addition to the appointment of a new Administrator, the Honorable A. Vernon Weaver, the SBA has had many of its programs changed by the enactment of Public Law 95–89 and has voluntarily made other substantial changes, some subsequent to suggestions or urging by the House Small Business Committee.

WOMEN IN BUSINESS

The House committee through its chairman set as one of the priorities of the 95th Congress greater recognition of women within the agency and as owners of small businesses. The agency has recognized these objectives and in addition to continuing its efforts to eliminate barriers, SBA is now actively recruiting women for placement in SBA at all levels. Patricia M. Cloherty has been appointed as Deputy Administrator and Patricia L. Burr has been appointed as Assistant Administrator for Management Assistance. It is also attempting to identify special problems confronting prospective women business owners and to provide special assistance to them.

MINI-SMALL BUSINESS

SBA has also recognized the financial needs of the really small, small business and its inability to obtain loans under $25,000 in many instances from normal commercial establishments. Banks often are not interested in servicing these small loans or even participating in a guaranteed loan program where the borrower would not be paying enough interest to justify the time required. This need for relatively small amounts of financing can be overcome only with continued and greater emphasis upon SBA's direct loan programs.

8(a) CONTRACTING

SBA historically has used its 8(a) contracting program to assist in the establishment and growth of small companies owned by socially and economically disadvantaged individuals. Under this program, SBA contracts with a Federal department or agency to supply goods and services and then subsequently contracts with a small concern to actually perform the contract for SBA and hence indirectly perform the contract with the Federal agency. Over the years a number of abuses had crept into this program and in some instances small concerns not really owned by socially or economically disadvantaged individuals were reaping its benefits. This year SBA temporarily ceased accepting new companies into the program and is weeding out current participants who do not really belong in it. Hopefully SBA will complete drafting of more definitive guidelines on the program and will be able to more accurately select firms to participate in it without excluding those for whom the program was designed.

PHYSICAL DISASTER ASSISTANCE

Also, the large number of physical disasters which have occurred this year has imposed a large responsibility upon the agency which makes loans available to victims of these physical disasters. It appears that the drought in the Midwest and southeastern areas of the country, flooding the Southeast, Kansas City, and Johnstown, Pa., and the civil disorder in New York City will result in SBA making more disaster loans than it has since 1972 when Hurricane Agnes struck the northeastern United States, resulting in outlays of $1.3 billion.

SBA AUTHORIZATIONS

H.R. 2647 was enacted—Public Law 95–14—as a temporary measure to authorize appropriations for SBA for the remainder of fiscal year 1977. Among its provisions was a major increase in the surety bond guarantee program under which SBA guarantees up to 90 percent of a loss sustained by a surety company on a payment or performance bond issued on behalf of a small business. This will permit small businesses to meet the bidding requirements on many contracts on which they previously had been excluded from bidding.

OMNIBUS SMALL BUSINESS BILL

H.R. 692, enacted as Public Law 95–89, is one of the most extensive small business and disaster relief laws ever passed by Congress. It could have been split into

more than a dozen bills but the House committee is following a new policy of preferring omnibus bills. This gives more time for extensive, substantive deliberation which otherwise would be wasted on procedural matters. Among its major provisions, in addition to authorizing the Small Business Administration's budget for the next 2 years, Public Law 95–89 authorizes SBA loans to physical disaster victims at 3 percent interest; permits SBA to make loans to small homebuilders; expands the authority of SBA to make loans to small concerns suffering substantial economic injury as a result of being forced to move by a governmental program or project; expands the authority of SBA to make loans to a small concern which must change its operations in order to comply with Federal standards; authorizes up to a 5-year moratorium on repayment of SBA loans; and authorizes SBA loans to small concerns suffering substantial economic injury from extraordinary, severe, and temporary natural conditions or economic dislocations.

These loans could be made, for example, to small businesses in resort areas which have lost substantial business due to weather and to small businesses along the Mexican border which lost substantial business due to the peso devaluation. It also authorizes SBA to assist small concerns in obtaining Government contracts. If a small concern is the low bidder but the agency's contracting officer does not have sufficient information about the capability of the company to perform the contract, SBA will evaluate the company and certify its determination to the agency.

It also establishes priorities for the awarding of Government contracts to small business and to concerns in labor surplus areas.

SUBCOMMITTEE ACTIVITIES

SUBCOMMITTEE ON SBA AND SBIC AUTHORITY AND GENERAL SMALL BUSINESS PROBLEMS

First. ERISA. The subcommittee is conducting an extensive study and investigation of the impact of the Employee Retirement Income Security Act on small business.

Recently ERISA has come under fire as potentially being one of the major factors contributing to the alarmingly large number of pension plans terminated since that law was enacted. As of August 27, 1977, the Pension Benefit Guaranty Corporation, the body established by Congress to handle certain plan terminations, had received more than 18,000 notices of intent to terminate defined benefit plans. In addition, many penson plans are not of the defined benefit type and, therefore, are not required to report their termination to the PBGC. The IRS has estimated that as many as 150,000 plans of all types may actually have been terminated.

The committee has conducted a survey of employers terminating plans to determine why so many companies were terminating retirement, deferred income or pension plans.

The vast majority of the individuals responding to the survey were small businesses and 69 percent of those responding indicated that ERISA had been at least a substantial reason for terminating their retirement plan.

The survey also revealed the amount costs associated with pension plans had increased as a result of ERISA. For the smallest plans, those with one through five participants, the administrative cost before ERISA averaged $538. This nearly tripled, to an average of $1,410, after ERISA. The average benefit costs of plans this size were $5,643 before ERISA and $9,101 after. Thus, while benefit costs increased about 60 percent, the administrative costs almost tripled.

This kind of change is even more dramatically shown in the statistics for plans with 6 to 10 participants. In the responses received from this group, the administrative cost before ERISA averaged $600. This increased more than 3½ times to an average of $2,274. The benefit costs for this group averaged $10,413 before ERISA and $22,247 after. Thus, benefit costs more than doubled while administrative costs more than tripled.

The subcommittee has commenced hearings and hopes to develop corrective legislation. It is anticipated that any such legislation would attempt to minimize the burden imposed upon small business concerns by a reduction in governmental regulation and paperwork, including reporting requirements, but at the same time maintaining protection for workers and retirees. The net result would be greater benefits for retirees because more of the contributions would go to benefits instead of being drained off for administrative costs.

Second. Meat industry. The subcommittee has commenced a multi-year study and investigation on impediments to marketing. The subcommittee is looking at restrictions on the movement of goods, especially those restrictions and activities which might be anticompetitive and result in lower prices to producers, higher prices to consumers, or restrict the access of small business to goods and services.

A number of complaints have been received that some small business closings are the result of the inability of the small business to obtain timely delivery of goods at a competitive price. Other complaints have involved marketing practices which are anticompetitive and possibly illegal under existing law.

During the initial stages, the subcommittee is concentrating on the meat industry and has conducted hearings. Throughout the hearings, witnesses have expressed their concern over the inadequate information published by the marketing news services, information which serves as the basis for a formula pricing system which is used to price approximately 70 percent to 80 percent of all the beef consumed in America.

The subcommittee anticipates recommending legislative and/or regulatory changes to correct this and other problems which are being explored.

Third. Physical disaster assistance. The subcommittee is reviewing the Federal programs which provide assistance, including loans from SBA, to victims of physical disasters. Although Public Law 95–89 established the interest rates and eligibility standards for disaster loans, the program expires October 1, 1978. A staff report has been issued and is under study and, in addition, one bill has been reported to modify interest rates for the period expiring October 1, 1978—S. 1306. The subcommittee expects that legislation will be ready for consideration by the House next year extending and perhaps modifying the interest rates of physical disaster assistance programs.

SUBCOMMITTEE ON MINORITY ENTERPRISE AND GENERAL OVERSIGHT

First. Women in Business. The subcommittee conducted hearings and issued an investigative report on women in business, the first ever dealing with the specific problems of women desiring to start or expand a business concern. The subcommittee concluded that social prejudice has had a cumulative effect which unmistakably hampers women from assuming their rightful place in our economy as business owners.

The report contains a number of recommendations to the President, Federal agencies, and departments. Among them are proposals for SBA and the Department of Commerce to:

Enter into an inter-agency agreement which will result in coordinated activities to obtain an adequate data base on women in business; isolate and define specific problems besetting female and minority female business persons; and enumerate and evaluate both short-term and long-term strategies needed to correct or lessen the effect of such problems.

Jointly promote, in cooperation with appropriate Federal agencies and departments, local boards of education and business people, an educational program designed to expose women to business opportunities and to inform them of the requisite skills for the business world.

Second. Minority Enterprise. The subcommittee has conducted numerous hearings on legislation to promote the establishment and growth of small businesses owned by minorities. The Nation's minority business community is composed of some 382,000 businesses, most of which are small retail and service establishments having few, if any, employees beyond the owner and his family. Although minorities constitute 17 percent of our population, minority businesses comprise only 4 percent of the Nation's total businesses and account for less than 1 percent of the total United States business dollar.

Among the bills being considered are:

H.R. 567, probably the most comprehensive piece of proposed legislation ever introduced to assist minority entrepreneurs. Included within its provisions are increased loan limits for potential SBA loan applicants and a requirement that not less than 25 percent of all SBA direct business loans be made to minority-owned small business concerns. The bill also would substantially revamp SBA's section 8(a) subcontracting program for the socially or economically disadvantaged and impose percentage goals on certain Federal contracts and subcontracts for the utilization of minority enterprises.

H.R. 4960 would amend the Small Business Investment Act of 1958. That law authorizes SBA to license and finance certain investment companies,

which in turn, provide debt and equity capital to businesses owned by the economically or socially disadvantaged. H.R. 4960 would greatly liberalize this program by allowing these investment companies, among other things, to receive "cheaper" financing from the SBA.

The subcommittee anticipates marking up these and related bills very soon.

Third. Procurement Assistance. The subcommittee has also held hearings to help small concerns in obtaining a fairer share of Federal spending.

H.R. 2377 would allow the SBA to reduce or waive the payment or performance bonds on 8(a) contracts. Under SBA's 8(a) program, SBA contracts with Federal agencies and departments and then relets the contract with small companies which would actually perform the work or provide the goods.

H.R. 2379 would impose as a condition for receiving most Federal assistance—whether it be by grant, insurance, guarantee, or otherwise—that the receipient undertake an obligation to utilize small business, to the maximum extent practicable, in any procurements which may be paid by such Federal assistance. In effect, this bill would attach to most forms of Federal financial assistance a commitment to aid small business, if such assistance is eventually used for procurements, similar to that imposed upon contractors with whom the Government contracts.

The subcommittee anticipates marking up this proposed legislation very soon.

Fourth. Labor Surplus Areas. The subcommitte also held hearings on channeling more defense contracts to major cities with high unemployment rates.

SUBCOMMITTEE ON ANTITRUST, CONSUMERS AND EMPLOYMENT

First. Antitrust. The subcommittee continued hearings on the protection afforded small business by the Robinson-Patman Act. The hearing focused on suggestions by representatives of large food chains that the law be clarified to permit sellers of merchandise, who price on a uniform delivered price basis, to sell their merchandise to buyers FOB the seller's shipping points at different prices. Under this proposal, action to permit such prices and practices would be without regard as to whether or not different prices would be justified by differences in cost incurred by the seller or whether or not the effect of the differences in the prices would be to injure or destroy competing small business firms.

Small business interests have complained that if different prices for some purchases should be effectuated, it would result in a favoritism of prices to large food chains as against their small competitors—although both large and small business would be buying identical goods from a supplier at the supplier's loading platforms. This, small businesses contend, would result in removing the small business firms as competitors of the large food chains, and would ultimately eliminate competition, forcing consumers to pay whatever prices food chains would dictate.

Second. AM–FM radios. The subcommittee also held hearings on allegations that the pricing policies and practices of the major automobile companies for automobile radios are excessive and possibly in violation of the antitrust laws to the detriment of the listening radio audience, consumers, the broadcast industry and, more particularly FM radio broadcasters, virtually all of whom are small businessmen.

Complaints received by the subcommittee indicate that the consumer pays well above the manufacturing cost of a unit. AM radios cost less than $20 to manufacture and install, but the consumer is charged $70. The manufacture and installation of an average AM/FM radio costs $26.95, but the consumer is charged over $140. For the manufacture and installation of an AM/FM stereo system, the consumer is charged $210.

Third. TRIS ban. The subcommittee held hearings on the effect of the TRIS ban on small garment and clothing manufacturers. TRIS is one of many antiflame chemicals applied to fabrics as required by Federal law. However, TRIS has been determined to be carcinogenic by the National Cancer Institute, and accordingly, Federal law requires that TRIS be banned from interstate commerce. The Consumer Product Safety Commission required a recall on all TRIS treated garments and in effect required that the losses associated with this recall be borne solely by the private sector.

Subsequently, a Federal court reversed the Commission's recall order, but many retailers, including large chain stores, have required wholesalers and manufacturers to repurchase these garments some of which were even used by consumers.

The SBA has attempted to help avoid the financial ruin this would have caused small manufacturers by making low interest loans available to them.

Fourth. Problems of rural small business. The subcommittee also has held joint hearings with the Committee on Agriculture. These hearings focused on national programs concerned with the role of agricultural, business, industrial, and community development with particular reference to the identification of credit and human needs, the accessibility to, and delivery of, private and public financial resources, and to the saving and creation of jobs.

SUBCOMMITTEE ON ENERGY, ENVIRONMENT, SAFETY AND RESEARCH

First. OSHA. The subcommittee conducted extensive hearings on the impact of the Occupational Safety and Health Act on small business. Its investigative report concluded that big businesses which employ lobbyists and lawyers to deal with Federal Government have better access to OSHA than the small businessman, and that there is a need for development of a mechanism to allow small business informal input to the standard setting process.

Some of the recommendations are: elimination of nonserious penalties; establishment of a Federal penalty-free on-site consultation program; credit of abatement costs against the amount of serious penalties, where timely abatement has occurred; no further exemptions from the act by size of business; expansion of training programs for inspectors, consultants, employers and employees; and in situations where a small businessman has taken out an SBA loan to install expensive equipment to comply with the act, that OSHA certify that the change is adequate to meet its standards.

Second. Solar energy. The subcommittee has also held hearings on numerous bills to provide various types of assistance to small business concerns for plant construction, conversion, or expansion, acquisition of equipment facilities and supplies to enable small business to design, produce, distribute, install or maintain solar energy equipment.

These bills, particularly H.R. 3981 and 3984, would provide SBA loans for purchase and installation of solar heating and cooling equipment; research moneys in the form of grants, loan and loan guarantees for small business innovation; training moneys for small businessmen who wish to pursue the design, installation, and maintenance of solar energy equipment; low interest SBA loans to small business to design, produce, distribute, or manufacture solar energy heating and cooling equipment; and would establish an Office of Invention and Innovation for small business inventors.

Third. Availability of energy to small business. The subcommittee conducted hearings on problems of small businessmen connected with tight supplies of natural gas, gasoline, heating oil, and hydroelectricity. Amonk the allegations were that the processing time for SBA energy shortage loans is excessive; that large corporations, like the major oil companies, have highly developed access to Federal agencies, but that small businessmen like gas station owners do not; that major Federal agencies, such as the SBA, FEA, and FPC maintain no information on the impact of severe natural gas curtailments on small business; and that FEA guidelines, in at least some cases, work unfairly against small gas station owners and benefit the major oil companies.

The subcommittee also examined the impact of a decision by the major oil companies to eliminate an incentive for fuel oil distributors to purchase fuel oil before the heating season commenced. This incentive, the summerfill program, previously provided a 1 percent discount for product purchased during summer months.

SUBCOMMITTEE ON CAPITAL, INVESTMENT AND BUSINESS OPPORTUNITIES

First. Product liability. The subcommittee has held extensive hearings on the inability of many small business firms to obtain product liability insurance at a reasonable cost.

Testimony has shown that, first, there is a critical problem facing many small businesses in their ability to obtain product liability insurance at reasonable rates and that some firms are unable to obtain this essential form of insurance at all. Second, data concerning the reasonableness of product liability rates is not available, nor is reliable information concerning the insurance industry's profitability for writing product liability insurance. Third, the present tort system

may be a primary causative factor. Various proposals for reform have been advocated, including making a workers' compensation system the sole remedy of an injured employee, limiting the contingency fee system of compensating plaintiffs' attorneys, abbreviating statutes of limitations, and authorizing SBA to guarantee an insurance company against most of the losses it might sustain on a product liability policy issued to a small concern—H.R. 4200 et al. The latter proposal would be similar to SBA's surety bond guarantee program.

The subcommittee has also solicited and collected data with respect to product liability insurance from what was believed to be the 15 largest insurers of this line in the country. The questionnaire was designed to find out precisely what is happening with respect to product liability insurance at the level of the individual insurance company. These responses are being collated and reviewed and should be published by the end of the year.

Second. Access to capital. The subcommittee also has held hearings on the difficulty of small concerns in obtaining venture and equity capital. Because the small innovative entrepreneur is typically without sizable assets and cannot demonstrate a proven track record, at least insofar as his new product development is concerned, he is hard pressed to obtain the type of long-term capital with flexible terms that he needs from commercial banks. Most banks make short-term loans of 3 years maximum with fixed principal and interest repayment terms. Further, most banks prefer to stay away from lending to relatively new companies whose products are untested in the marketplace.

As a result, the businessman seeking investment capital for a new or growing venture must seek the capital he needs in a rather narrow marketplace. This marketplace appears to be narrowing even further. For example, the number of stock offerings made by companies having net worth of $5 million or less has fallen drastically from 548 offerings in 1969 to only 4 in 1975.

Third. Business district revitalization. The subcommittee also is holding hearings on the coordination of programs presently administered by various agencies affecting business district revitalization. For example, the Small Business Administration administers a "502 Program" through low-interest loans from SBA, which are combined with seed money from the community and traditional commercial loans to create a "package" approach for specific financing problems. HUD has several programs including the community block program effective for urban redevelopment in older areas, the section 312 rehabilitation program, which can be used for commercial buildings, and the Urban Development Act grant program recently enacted into law, which can be especially helpful to halt decay in our smaller cities. Similarly, the Economic Development Administration, which has recently shifted its focus from rural areas, can provide invaluable technical assistance to structural economic problems, and has business loans and public works programs to assist local government and the private sector in effecting commercial revitalization.

Fourth. Labor surplus areas. The subcommittee also conducted hearings on the channeling of Federal contracts into labor surplus areas. These hearings were both prior and subsequent to enactment of Public Law 95–89 which set priorities in the awarding of these contracts: concerns in labor surplus areas which are also small business concerns; concerns which are small businesses, and concerns which are located in labor surplus areas.

SUBCOMMITTEE ON SPECIAL SMALL BUSINESS PROBLEMS

First. Trucking industry. The subcommittee has continued extensive hearings on regulatory problems of the independent owner-operator in the trucking industry and a staff report has been issued. Among the problems being examined are: ICC entry restrictions which require a company wishing to enter the interstate trucking industry to first obtain approval of the ICC for both the routes it plans to serve and commodities it plans to carry; the cumulative effect of the multiplicity of State requirements; the lack of effective bargaining power owner-operators have with common carriers in signing lease agreements; "skimming", a practice by which a carrier improperly reduces compensation actually due an owner-operator under a division of revenues by misstating the weight of a given shipment, the rate applicable thereto, or the revenue derived therefrom for transportation service; and the unloading procedures at warehouses. For example, it has been alleged that at some warehouses, a "gratuity" to the forklift operators and checkers makes the difference between having the truck unloaded immediately or having it wait at the unloading dock all day.

Second. Movie ratings. The subcommittee also held hearings on movie ratings and the independent producer. Among the matters being examined are the movie ratings system, including the appeals process; how and by whom ratings are determined; what purpose the system serves; and how it operates on a day-to-day basis.

Third. FDA labeling regulations. The subcommittee also has held hearings on the effect of the Food and Drug Administration's regulations requiring that all bakery product ingredients be listed on the wrapper by full chemical name. It has been alleged that this will be relatively meaningless to consumers and will put the small baker at a disadvantage by forcing him to either materially increase his inventory of packaging materials or lose his essential flexibility for changing ingredients to cover for shortages and stabilize prices.

Fourth. Crime. The subcommittee also has commenced a series of hearings on crime and its impact on small business. In recent years, little study has been done on the impact of crime on the small business community. Shoplifting, employee theft, bad checks, credit card fraud, arson, vandalism, and robbery threaten a small business concern's existence and in the inner cities, the cost of security has all but destroyed small business. The subcommittee is receiving testimony on these crimes and attempting to discover any new information on crime resistance or other resistance which would be helpful to the small business community.

CRISIS GROUP VOLUNTEERS TIME TO CONTROL HEALTH CARE COSTS

(Mr. Hanley asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HANLEY. Mr. Speaker, at this time, when we are concerned with skyrocketing costs of health care while striving to maintain excellent quality, it is a pleasure to learn of citizens who volunteer their time to help remedy this situation.

The CRISIS group, Coalitions of Relatives and Indignant Sponsors for Improved Services, has shown dedication through a positive-action approach. This organization was conceived at the 28th annual convention of the New York State Health Facilities Association. It is a fast-growing organization with a current membership of over 60 chapters throughout New York State.

These groups, consisting of families and friends of long-term-care patients, seek to uphold the fine standards which these long-term care facilities have demonstrated they can achieve.

They are concerned with costs and cutbacks and the most efficient means to handle such financial matters. CRISIS groups review nursing home procedures and problems and meet with administrators to discuss their findings. They are considered to be advisory councils, whose opinions and positions do constructively add to the administration of such hospitals.

Review procedures are necessary and contribute input that is very helpful in determining policies of large or small-scale matters.

Volunteer groups that aid in such reviews of the functions and maintenance of these facilities are doing a great service to them as well as to the Government. They are helping to make the most efficient use of resources in an area that greatly needs their help.

I commend this group which has taken the initiative to perform these duties for the benefit of their relatives and friends. Their work will be a great aid and incentive to us all.

NEW DRIVE FOR ANTIGUN LEGISLATION IN PROSPECT

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, last year the House Judiciary Committee approved a bill that would have imposed sharp new limits on the rights of American citizens. Disguised as a crime-control measure, this legislation proposed stringent additional restrictions on the commerce in

firearms and would actually have removed from the market many handgun models highly prized by Americans both for sporting and defense purposes. Though falling short of the measures advocated by some of the more radical antigun people, there can be no question that H.R. 11193 of the 94th Congress posed a serious threat to the constitutionally guaranteed right of Americans to keep and bear arms.

The enemies of the second amendment did not prevail in 1976. Instead of just looking on while one more bite was taken from the substance that has made the citizens of this republic the proud, independent, and resourceful people they are, Americans from all walks of life and persuasion rallied to the cause. Singly and through various organizations they made their strong opposition known and they succeeded in killing the bill.

The successful outcome of the 1976 campaign was justifiably celebrated by the opponents of unnecessary restrictions on firearm commerce and ownership. Once again, through hard work and good organization, they brought their viewpoints to the attention of Congress, peacefully but forcefully, and managed to persuade key people of the wisdom of letting the proposed legislation perish.

That was last year. It is now my duty to remind the good people who fought that battle that it is once again time to gird their loins and prepare to withstand another determined attack by pro-gun controllers.

By now it has been well established by way of newspaper reports and statements by White House officials that the Carter administration has every intention of reviving the divisive gun control issue next year. According to the best information available, the President will be sending a proposal to the Congress early in the next session that will in all likelihood closely parallel the House Judiciary Committee bill that was turned back last year. A news item in the October 3 issue of the Christian Science Monitor, a pro-control journal, had this to say:

> The draft proposal, said to be in all-but-finished form and cleared by all affected Federal agencies, reportedly is patterned on the relatively moderate (sic) gun-control bill passed by the House Judiciary Committee last year . . .
>
> Key provisions: a ban on the manufacture, assembly and sale of the cheap, poorly constructed, and easily concealed handguns known as "Saturday night specials"; a "cooling off" period between sale and delivery of a handgun; a limit of one handgun purchase per month for private citizens; a boost in license fees for gun dealers to squeeze out frivolous suppliers; new controls on noncommercial handgun transfers.

In view of the fact that he campaigned in 1975 and 1976 on behalf of additional handgun controls, it is not surprising that Mr. Carter is giving his approval to this measure, which was drafted by the Justice Department and presumably approved by Treasury officials. Those of us who support the right-to-bear-arms principle were hoping the President would see antigun legislation in a different light when he became more familiar with the pros and cons of this controversial subject. His two immediate predecessors did not support and, in fact, opposed, antigun legislation. His position makes the problem a more difficult one for those who believe in the right of law-abiding, responsible American citizens to own weapons, and who oppose unduly restrictive gun legislation. Now, we must once again begin to get our house in order and be ready for the struggle to come.

It is difficult to comprehend the reluctance of the committees of Congress to approve a simple measure, requiring mandatory sentencing for those convicted of crimes in which the use of a gun was involved. This approach would do much more to reduce the ills which are charged to guns than all the antigun legislation that can be conceived.

WILDLIFE HABITAT CONSERVATION

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, the authority for carrying out important conservation and rehabilitation programs on military and public lands as provided under Public Law 94–452 expires on December 31, 1977. Together with my distinguished colleague, the Honorable JOHN DINGELL, I am today introducing a bill to extend the authorization for these programs.

The original Sikes Act of 1960, known as Public Law 86–797, authorized, fish and wildlife programs on military lands. The 1974 amendments extended the act's provisions to other public lands including national forests, national resource lands, national energy lands, and National Aeronautic and Space Administration lands.

The act directs that comprehensive plans for fish and wildlife habitat improvements on those lands be developed and implemented by the Federal agencies through cooperative agreements with State fish and wildlife agencies.

Although the act has never been fully implemented because of insufficient funds, many fine programs have been developed and tremendous progress has been made. Many installations acting largely on their own have successfully complied with the intent of this legislation. Eglin Air Force Base, Fla., in my district, developed an extensive program of recreation use. The progressive leadership of Eglin in the fields of land use conservation and natural resource management has been well recognized. The same is true of Tyndall Air Force Base. Year after year, these installations have been among the top finalists in the Air Force Annual Conservation Award and in nationwide conservation awards. These installations and the Air Force are not unique in excellence in these programs. The excellent public programs of the Marines at Quantico, the AP Hill Army Installation, and many other military installations, provide an important recreation resource to the military and civilian personnel in their areas. The basic fact remains, however, that neither the Department of Defense nor the Department of the Interior has provided the leadership necessary to fully implement this program. There are many who see the value of the program and who have worked to take advantage of its opportunities. Much has been done but more could be done. With the growing diversity of outdoor recreation pursuits and with the energy and economic problems forcing many people to seek recreation experiences nearer home, Interior and Defense should wait no longer. The need is there. The opportunities are there. Only the leadership is lacking.

I am happy to report that the Subcommittee on Resource Protection of the Senate Committee on Environment and Public Works has held hearings on this subject and a bill to extend the Sikes Act is expected to be offered in the Senate soon. The Senate committee is providing important and needed leadership in this matter.

I am very hopeful that the bill which Mr. DINGELL and I are introducing today will be quickly and favorably considered in committee and in the House.

CARLETON J. KING

(Mr. MILLER of Ohio asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MILLER of Ohio. Mr. Speaker, it was with deep sorrow that I learned of the passing of our former colleague from New York, Carleton J. King.

Carleton was a good friend and dedicated public servant. For 8 years I had the privilege of serving with Carleton. His legal expertise was valued and his judgment always respected. Carleton was a gentleman, a man of purpose and highest integrity. His word was his bond.

In all he said and did, Carleton King was a credit to this body and the people of New York's 39th Congressional District, who he so ably served for 14 years.

To all of us who knew and worked with Carleton, we regret his passing and express our condolences to his family.

JOHN L. McCLELLAN

(Mr. MILLER of Ohio asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MILLER of Ohio. Mr. Speaker, America has lost one of the true giants of the legislative arena with the passing of Arkansas' senior Senator, JOHN L. MCCLELLAN.

Senator MCCLELLAN was for 35 years a voice for reason and restraint in government.

When it came to being tough fisted on crime, Senator MCCLELLAN had no match. All of us remember his dogged investigation of labor union corruption in the 1950's. It typified his strong, determined leadership throughout his senatorial career.

The Senator was among a vanishing breed of legislators who respect tradition and resist change for the sake of change.

His passing leaves a vacuum which will not be easily filled.

CONFERENCE REPORT ON H.R. 9375

Mr. MAHON submitted the following conference report and statement on the

bill (H.R. 9375) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes.

CONFERENCE REPORT (H. REPT. NO. 95–829)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9375) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes, having met, after further full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 9, 12, 18, 24, 34, 36, 38, 39, 40, and 41.

That the House recede from its disagreement to the amendments of the Senate numbered 11, 13, 14, 17, 19, 20, 27, 33, 46, and 47, and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert: "$44,200,000"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert: "$1,836,000"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

HIGHER EDUCATION

For an additional amount for "Higher education", $5,000,000 for the support of the construction of two demonstration model intercultural centers as authorized by section 721(a)(2) of the Higher Education Act of 1965 as amended: *Provided*, That in addition the Commissioner is to make available new construction loans not to exceed $7,200,000 from amounts available in the Higher Education Facilities Loan and Insurance Fund for the construction of two demonstration model intercultural centers.

And the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$101,000,000"; and the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

AIRCRAFT PROCUREMENT, NAVY

For an additional amount for "Aircraft Procurement, Navy", $73,900,000, to remain available for obligation until September 30, 1980.

And the Senate agree to the same.

Amendment numbered 45: That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert: "$240,500,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 5, 7, 8, 10, 15, 16, 22, 23, 25, 28, 29, 31, 32, 35, 37, 43, 44, 48, 49, 50, 51, 52, and 53.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the further conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9375) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I

Chapter I

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

Marketing Services

Amendment No. 1: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, which reads as follows:

Agricultural Marketing Service

Marketing Services

For an additional amount for the "Agricultural Marketing Service, Marketing Services," $2,000,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The $2 million will fund new grading and inspection positions and related training for USDA to assume quality assurance activities previously performed by Defense Department military personnel and to develop a government-wide plan for Federal food quality specification and procurement policy. Should additional funds for this purpose be required in fiscal year 1978, the committees will consider a supplemental request.

Federal Crop Insurance Corporation

Subscription to Capital Stock

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, which reads as follows:

Federal Crop Insurance Corporation

Subscription to Capital Stock

To enable the Secretary of the Treasury to subscribe and pay for capital stock of the Federal Crop Insurance Corporation, as provided in section 504 of the Federal Crop Insurance Act (7 U.S.C. 1504), $30,000,000.

The conferees have agreed to an appropriation of $30 million to subscribe additional capital stock for the Federal Crop Insurance Corporation as proposed by the Senate. Legislation that has passed the House and the Senate would authorize a capital stock increase from $150 million to $200 million. The full $150 million is issued and outstanding. This additional authority of $30 million is needed in the immediate future to meet heavy crop losses resulting from the continued drought now affecting much of the country. The Corporation has indicated that unless these funds are provided, it may not be able to meet its contractual obligations beginning in December of this year.

In addition, the conferees direct the Secretary of Agriculture to conduct, within available administrative funds not to exceed $200,000, a comprehensive study of alternative crop insurance and disaster assistance programs. To the extent possible, the Secretary should consult with other federal departments as well as private entities in the preparation of this study, and submit his findings to the appropriate committees of Congress by March 1, 1978.

Farmers Home Administration

Very Low-Income Housing Repair Grants

The conferees agree that the $4 million shall be primarily for weatherization grants to the elderly.

Agricultural Credit Insurance Fund

Amendment No. 3: Deletes Senate language which would have provided $100 million for farm ownership loans. The conferees noted that there is a substantial backlog in demand for these loans. The Small Business Committees and the Agriculture Committees are considering programs to meet these needs along with reforms in the disaster loan programs of the Small Business Administration and Farmers Home Administration. Action is expected early in the next session.

Accordingly, the conferees agreed to defer action on an increase in loan authority at this time. The conferees direct the Department of Agriculture to examine carefully the needs for farm ownership loans, farm operating loans and disaster loans and report to the appropriate committees of Congress early next spring. Careful consideration will be given to adjusting loan authorizations at that time to reflect such assessments. The Department should pay particular attention in its report to the worsening of the credit situation with respect to farm ownership and the appropriate loan levels that can meet the urgent needs in this area.

Soil Conservation Service

Watershed and Flood Prevention Operations

Amendment No. 4: Appropriates $30 million for section 216 funds as proposed by the House instead of $26,704,000 as proposed by the Senate.

Agricultural Stabilization and Conservation Service

Agricultural Conservation Program

Amendment No. 5: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, which reads as follows:

Agricultural Stabilization and Conservation Service

Agricultural Conservation Program

For an additional amount to carry out the Agricultural Conservation Program, $36,600,000, to incur obligations for the period ending September 30, 1978, and to liquidate such obligations for soil and water conserving practices in major drought or flood damage areas as designated by the President or the Secretary of Agriculture: *Provided*, That not to exceed 5 per centum of the amount herein may be withheld with the approval of the State committee and allotted to the Soil

Conservation Service for services of its technicians in the designated drought or flood damaged areas.

The conferees agree that moneys appropriated for this program be for reimbursement to farmers for expenditures incurred beginning on the date of the Presidential disaster declaration as authorized by law.

Chapter II

INDEPENDENT AGENCIES

Environmental Proiection Agency

Amendment No. 6: Appropriates $44,200,000 for research and development instead of $40,500,000 as proposed by the House and $47 million as proposed by the Senate.

Amendment No. 7: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate regarding the distribution of construction grants with an amendment as follows: "the table on page 15 of Senate Report numbered 95-564".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

General Services Administration

Amendment No. 8: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing the Consumer Information Center an additional $5,000 for travel from funds previously appropriated.

Veterans Administration

Amendment No. 9: Deletes language proposed by the Senate providing $139,100,000 for construction, major projects. The committee of conference has deleted without prejudice the funding for the replacement of the existing Veterans Administration hospitals at Portland, Oreg., and Vancouver, Wash. Funding will be considered in the next supplemental appropriations bill, following a thorough review of the House Committee's Surveys and Investigations Staff report.

Amendment No. 10: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing that all unobligated balances in the grants for construction of State extended care facilities account may be used pursuant to recently enacted legislation expanding the scope of the program (Public Law 95-62).

Amendment No. 11: Appropriates $3,847,000 for assistance for health manpower training institutions as proposed by the Senate.

Chapter III

DEPARTMENT OF THE INTERIOR

United States Fisheries and Wildlife Service

Amendment No. 12: Deletes language proposed by the Senate appropriating $2,600,000 for resource management.

Geological Survey

Amendment No. 13: Appropriates $2 million for surveys, investigations, and research as proposed by the Senate instead of $5 million as proposed by the House.

Office of Surface Mining Reclamation and Enforcement

Amendment No. 14: Appropriates $30,880,000 for enforcement and research as proposed by the Senate instead of $24,080,000 as proposed by the House.

The managers are in agreement that up to $2,500,000 of the appropriation for abandoned mine reclamation may be used for inventory and data gathering on abandoned mine land reclamation needs.

Amendment No. 15: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which amends the Surface Mining Control and Reclamation Act of 1977 to provide for an Executive level V rather than an Executive level IV.

Bureau of Indian Affairs

Amendment No. 16: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $8,374,000 for operation of Indian programs instead of $8,054,000 as proposed by the House and $7,224,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The total amount appropriated includes $6,329,000 to aid Indian livestock operators in drought areas, $375,000 for fisheries management operations, and $520,000 to develop an energy minerals resources technical assistance program. The Bureau of Indian Affairs is directed to insist on the highest professional and technical competence in awarding contracts under the energy minerals resources technical assistance program in consultation with the new Department of Energy.

Amendment No. 17: Appropriates $2,166,000 for construction as proposed by the Senate instead of $1,866,000 as proposed by the House.

The managers are concerned over the inadequacy of site selection work prior to commencing construction of the Tamgass Fish Hatchery on Annette Island, Alaska. The funds provided in this bill were necessitated by the requirement to change the site of the hatchery after construction had begun. Prior to obligating construction monies at the new site, the Bureau of Indian Affairs is directed to review carefully and approve the selected site to ensure the fitness of the location for hatchery construction.

Amendment No. 18: Deletes Senate language authorizing the Secretary of Interior to recognize validly executed assignments made by Alaskan Regional Corporations of their rights to receive payments from the Alaska Native Fund.

Office of Territorial Affairs

Amendment Nos. 19 and 20: Deletes language making appropriations for administration of territories subject to enactment of authorizing legislation as proposed by the Senate.

RELATED AGENCIES

Department of Agriculture—Forest Service

Amendment No. 21: Appropriates $1,836,000 for forest land management instead of $3,672,000 as proposed by the Senate.

Conferees are mindful of the employment needs of the Forest Service. The House Committee has asked that an investigation of the personnel utilization practices of the Forest Service be performed to make certain that the Forest Service is obtaining the maximum possible from its employees. If on completion of the investigation it becomes apparent that the Forest Service is obtaining maximum utilization of its personnel and OMB and the Department do not provide employment ceilings adequate to administer the program mandated by the fiscal year 1978 appropriation, the committee will consider further action in the second supplemental for fiscal year 1978 and the regular appropriation bill for fiscal year 1979.

The conferees are in agreement that the inability of the Forest Service to obligate all available funds in a timely manner as a result of employment ceilings shall result in prompt submission of rescission or deferral proposals. This will provide the Congress adequate opportunity to take appropriate action.

Energy Research and Development Administration

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $1 million for operating expenses, fossil fuels, instead of $5 million as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Federal Energy Administration

Amendment No. 23: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

Federal Energy Administration

Salaries and Expenses

For an additional amount for "Salaries and expenses", $273,194,000, of which $253,110,000 shall become available only upon enactment of authorizing legislation as follows: (1) for conservation grants for schools and health care facilities, $200,000,000; for conservation grants for local government buildings, $25,000,000; for grants for financial assistance to utility regulatory commissions, $6,630,000; for solar heating and cooling installations in Federal buildings, $20,000,000; to remain available for obligation until September 30, 1979; and (2) for administration of grants for schools and health care facilities, local government buildings, and utility rate reform, $1,480,000: *Provided*, That of the total amount of this appropriation, not to exceed $6,000,000 shall remain available until expended for a reserve to cover any defaults from loan guarantees issued to develop underground coal mines as authorized by Public Law 94-163: *Provided further*, That the indebtedness guaranteed or committed to be guaranteed under said law shall not exceed the aggregate of $62,000,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The $3,150,000 decrease below the amount proposed by the Senate is in the energy information and analysis program.

Chapter IV

DEPARTMENT OF LABOR

Departmental Management

Salaries and Expenses

Amendment No. 24: Deletes language proposed by the Senate earmarking $1,210,000 for 82 new permanent positions. The conferees are agreed, however, that the funds in this bill are to be used to support 82 additional permanent positions.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Resources Administration

Medical Facilities Guarantee and Loan Fund

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment, which allows the Secretary to reallocate funds from unused allotments of other States to the State of Illinois for the purpose of making loans and loan guarantees for hospital construction and modernization.

Office of Education

Higher Education

Amendment No. 26: Appropriates $5 million instead of $9,100,000 as proposed by the House for grant support of the construction of demonstration model intercultural centers at Georgetown University, Washington, D.C. and Tufts University in Massachusetts; and authorizes loans not to exceed $7,200,000 from amounts available in the "Higher education facilities loan and insurance fund" for the construction of the two aforementioned demonstration model intercultural centers as proposed by the House.

The conferees agree that this is the final amount to be provided for these projects until higher priority items are funded.

Social Security Administration

Special Assistance to Refugees From Cambodia, Vietnam, and Laos in the United States

Amendment No. 27: Appropriates $124 million as proposed by the Senate. This item was not considered by the House.

Departmental Management

General Departmental Management

Amendment No. 28: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $1,719,000 for compensating the State of Washington for losses incurred in vacating and turning over to the United States the land and all improvements thereon which was formerly the site of Tacoma (Washington) Indian Hospital.

RELATED AGENCIES

Community Services Administration

Community Services Program

Amendment No. 29: Reported in disagreement. The managers on the part of the House will offer a motion to insist on disagreement to the amendment of the Senate numbered 29.

Chapter V

Energy Research and Development Administration

Operating Expenses

Amendment No. 30: Appropriates $101 million for "Operating Expenses" instead of $121 million as proposed by the House and $99 million as proposed by the Senate. The increase over the Senate allowance is for the wind turbine energy program.

Amendment No. 31: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which earmarks $17 million of previously appropriated funds for the relocations necessary to consolidate activities within the Department of Energy as proposed by the Senate, instead of providing an additional appropriation of $17 million as proposed by the House.

The largest component presently located in the Forrestal Building is the Corps of Engineers. As part of the relocation effort, the conferees agree with the House and Senate report language directing that the Corps be moved to 20 Massachusetts Avenue, N.W., Washington, D.C. The Corps should be located in accordance with GSA standards and criteria in that space which will be vacated by the DOE. The conferees have been advised that this could accelerate the relocations and the building would not have to be substantially modified to accommodate the Corps under GSA standards and criteria thereby minimizing costs, which will save Federal funds. The building is currently in the GSA space inventory.

Department of Defense—Civil

Department of the Army

Corps of Engineers—Civil

The conferees agree that, within available funds under Construction, general, $300,000 is available for phase 1 preconstruction planning of the Calleguas Creek, Simi Valley to Moorpark, Calif. project as proposed by the House.

Alaska Hydroelectric Power Development Fund

Amendment No. 32: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $5,450,000 for the Alaska hydroelectric power development fund as proposed by the Senate.

Administrative Provision

Amendment No. 33: Deletes language proposed by the House restricting the use of appropriated funds to process applications for proposed coastal zone activity in the State of Washington.

The conferees concur with the intent of the House provision but believe that it is unnecessary in view of the recent enactment of a more comprehensive restriction on transshipment of crude oil through Puget Sound in Public Law 95-136. The recently enacted ban on expansion or modification of marine terminal facilities designed to accommodate additional transshipment of oil applies only to permits needed to expand or modify dock and related facilities, not to pipelines, refineries or other shore based facilities and is consistent with the Coastal Zone Management program of the State of Washington, which has been approved by the U.S. Department of Commerce. This new statute should expedite consideration of which system for shipment of excess west coast crude oil should be adopted while also providing for the petroleum needs of Washington, Oregon, and the Pacific Northwest.

Amendment No. 34: Deletes language proposed by the Senate limiting the use of funds for the Corps of Engineers.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

The Conferees agree that, within funds available under Construction and rehabilitation, $400,000 is provided for rehabilitation and betterment work on the Sun River, Greenfields Division project in Montana.

Upper Colorado River Storage Project

Amendment No. 35: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which transfers $875,000 to the Upper Colorado River storage project from Construction and rehabilitation as proposed by the Senate.

Chapter VI

DEPARTMENT OF COMMERCE

Bureau of the Census

Periodic Censuses and Programs

Amendment No. 36: Appropriates $7,000,000 as proposed by the House instead of $7,500,000 as proposed by the Senate.

RELATED AGENCIES

Office of the Special Representative for Trade Negotiations

Salaries and Expenses

Amendment No. 37: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum named in said amendment, insert "*$15,000*".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Chapter VII

INDEPENDENT AGENCIES

General Services Administration

Federal Buildings Fund

Limitations on availability of revenue

Amendment No. 38: Makes available an additional $48,913,000 for construction of federal buildings as proposed by the House instead of $34,130,000 as proposed by the Senate.

Amendment No. 39: Establishes a limitation of $69,392,000 for construction of certain federal buildings as proposed by the House instead of $54,609,000 as proposed by the Senate.

Amendment No. 40: Makes typographical change.

Amendment No. 41: Makes available $14,783,000 for construction of the Springfield, Massachusetts Courthouse, Federal Office Building, and parking facility as proposed by the House.

Chapter VIII

DEPARTMENT OF DEFENSE

Procurement

Aircraft Procurement, Navy

Amendment No. 42: Appropriates $73,900,000 instead of $151,600,000 as proposed by the House. The Senate had proposed no funding for this appropriation.

The fiscal year 1978 budget included $697,300,000 for the production of 44 F-14A aircraft during fiscal year 1978 and $210 million in advance procurement funding toward the production of 60 F-14A aircraft in fiscal year 1979. Congress authorized and appropriated $623,400,000 to produce 40 aircraft during fiscal year 1978 and $132,300,000 in advance procurement funding toward the production of 36 aircraft in fiscal year 1979.

The $151,600,000 proposed by the House included $73,900,000 to fund four additional F-14A aircraft in fiscal year 1978 and $77,700,000 in advance procurement funding. This proposal was based on the fact the House authorization bill on the fiscal year 1978 supplemental bill had recommended that $151,600,000 be authorized to restore the fiscal year 1978 authorization to the original budget request. The conference agreement on the fiscal year 1978 supplemental authorization bill (S. 1863) included $73,900,000 for four F-14A aircraft, and no advance procurement funding.

The conferees on the fiscal year 1978 supplemental appropriation bill (H.R. 9375) agreed to provide $73,900,000 for the production of four additional F-14A aircraft during the current fiscal year.

Other procurement, Navy

The Senate report contained language recommending that the Navy use available funds to procure AN/SSQ-77 sonobuoys in fiscal year 1978. This recommendation was intended to avert or minimize a gap in production that would otherwise exist between procurement for research and development and full scale production. The managers are in agreement that the Navy may proceed as recommended by the Senate if the prospective savings for a follow-on procurement and the initial testing results justify such an action. The managers note that this sonobuoy will not be approved for service use until October 1978, and there are risks inherent in proceeding with production before testing is complete. The Navy should utilize available funds in the research and development appropriation rather than other procurement since this procurement will come before approval for service use. The managers expect the Navy to follow normal reprogramming if it elects to follow this recommendation.

Aircraft procurement, Air Force

Amendment No. 43: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment rescinding $462 million of appropriations provided under this heading in the Department of Defense Appropriation Act, 1977.

The Senate amendment proposes rescission of $462 million of the $1,073 million appropriated in fiscal year 1977 for production of B-1 aircraft numbers 5, 6, and 7, as proposed by the President on July 19, 1977. The rescission deletes uncommitted funds for the first three B-1 production aircraft and allows for termination costs. With this rescission, B-1 aircraft production will be terminated after fabrication of aircraft number 4, the last research and development aircraft. The House has voted twice to deny B-1 production funds for fiscal year 1978.

Missile procurement, Air Force

Amendment No. 44: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment rescind-

ing $1,400,000 of appropriations provided under this heading in the Department of Defense Appropriation Act, 1977.

The Senate amendment proposes to rescind $1,400,000 of the $20,800,000 appropriated in fiscal year 1977 for Short Range Attack Missile (SRAM) production startup and tooling costs, as proposed by the President on July 19, 1977. The SRAM–B missile was to be used on the B–1 bomber. Since Congress voted to terminate B–1 production for fiscal year 1978, production of the SRAM–B missile is no longer required and $35 million budgeted for related SRAM–B production effort was deleted from the fiscal year 1978 Defense Appropriation bill.

Research, Development, Test, and Evaluation

Research, Development, Test, and Evaluation, Air Force

Amendment No. 45: Appropriates $240,500,000 instead of $233,470,000 as proposed by the House and $260,500,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

Program	Budget request	House amount	Senate amount	Conference amount
Cruise missile carrier aircraft	90,000	5,000	15,000	15,000
Strategic protective system	2,500	7,500	5,000	5,000
Missile surveillance technology	8,000	10,470	0	0
Perimeter acquisition radar	10,000	0	10,000	10,000
FB–111H aircraft			20,000	0

FB–111H aircraft

The conferees are in agreement that the deletion of the fiscal year 1978 funds for the FB–111H is without prejudice to the program. If the Department of Defense submits an official request for funds in the regular fiscal year 1979 budget, in a supplemental request, or in a reprogramming request, the Committees on Appropriations will consider such request.

Chapter IX

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Grants to the National Railroad Passenger Corporation

Amendment No. 46: Appropriates $18 million as proposed by the Senate. The conferees are aware of the train frequency reductions which have or were to become effective on October 30, 1977, or thereafter. The conferees believe these frequency reductions are inconsistent with the implementation of the congressionally mandated route and service criteria. The conferees direct Amtrak to immediately restore these frequency reductions, including New Haven-Springfield, and to refrain from any further frequency reductions during the balance of the fiscal year.

The conferees are of the opinion that a comprehensive reexamination of Amtrak's route structure from a zero base should be undertaken and hereby direct the Department of Transportation, in cooperation with Amtrak, to prepare and submit its recommendations for a route structure that will provide an optimal national railroad passenger system based upon current and future market and population requirements. Included as an integral part of such recommendations should be projections of operating and capital appropriations that will be required to support the system for fiscal years 1979 through 1982. The conferees intend that this route structure analysis be submitted at the appropriate time for use in the authorization and appropriations processes during the second session of the 95th Congress, but not later than March 1, 1978. The conferees intend that necessary funding to accomplish this task be taken from the transportation planning, research and development account, for which $25 million has been previously appropriated for fiscal year 1978.

Chapter X

DEPARTMENT OF STATE

Migration and refugee assistance

Amendment No. 47: Appropriates $6,300,000 to provide assistance for the transportation and reception and placement of Indochinese refugees resettling in the United States as proposed by the Senate.

TITLE II

General provisions

Amendment No. 48: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate making the recently established position of "Deputy Chief Guide" eligible for longevity pay.

Amendments Nos. 49 through 51: Reported in technical disagreement. Inasmuch as these amendments relate solely to the Senate and in accordance with long practice under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer motions to recede and concur in the Senate amendments Nos. 49 through 51.

Amendment No. 52: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which reads as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 209. The Secretary of Transportation shall, not later than 60 days after the date of enactment of this Act, designate as a route on the National System of Interstate and Defense Highways, from mileage withdrawn from such System before the date of enactment of this Act under authority of 23 U.S.C. 103(e), and which is available for such a designation, 1.5 miles in the State of Washington for a connection with Interstate Route 5 and the City of Tacoma, Washington.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 53: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which allows the possible renewal, reissuance, modification or replacement in event of lapse, of any export license referred to in section 11 of Public Law 95–92 issued initially on or before September 30, 1978, provided that any such renewal, reissuance, modification or replacement in event of lapse, does not change significantly any such license as initially issued.

Conference total with comparisons

The total new budget (obligational) authority for the fiscal year 1978 recommended by the Committee of Conference, with comparisons to the fiscal year 1978 budget estimates, and the House and Senate bills for 1978 follow:

Budget estimates of new (obligational) authority, fiscal year 1978	[1] $7,907,424,000
House bill, fiscal year 1978	7,182,602,000
Senate bill, fiscal year 1978	7,890,246,000
Conference agreement	[2] 7,599,898,000
Conference agreement compared with:	
Budget estimates of new (obligational) authority, fiscal year 1978	−307,526,000
House bill, fiscal year 1978	+417,296,000
Senate bill, fiscal year 1978	−290,348,000

[1] Includes $71,700,000 of budget estimates not considered by the House.

[2] Excludes $200 million reported in true disagreement by the Committee of Conference. Excludes rescission of prior year budget authority in the amount of $463,400,000 reported in technical disagreement.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. WOLFF (at the request of Mr. WRIGHT of Texas), for today, on account of official business.

Mr. CORMAN (at the request of Mr. WRIGHT of Texas), until 10:30 a.m. today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DON H. CLAUSEN) and to revise and extend their remarks and include extraneous matter:)

Mr. DON H. CLAUSEN, for 5 minutes, today.

Mr. CLEVELAND, for 10 minutes, today.

Mr. COLLINS of Texas, for 30 minutes, today.
Mr. MARLENEE, for 5 minutes, today.
Mr. FRENZEL, for 60 minutes, today.
(The following Members (at the request of Mr. CORNWELL) to revise and extend their remarks and include extraneous material:)
Mr. PEPPER, for 10 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. BEDELL, for 5 minutes, today.
Mr. LAFALCE, for 5 minutes, today.
Mr. LEVITAS, for 5 minutes, today.
Mr. SMITH of Iowa, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:
(The following Members (at the request of Mr. EMERY) and to include extraneous matter:)
Mr. ASHBROOK in three instances.
Mrs. HOLT.
Mr. YOUNG of Florida.
Mr. BURGENER.
Mr. WHALEN.
Mr. FINDLEY.

(The following Members (at the request of Mr. THORNTON) and to include extraneous matter:)
Mr. HOLLAND in three instances.
Mr. FORD of Michigan.
Mr. OBERSTAR.
Mr. BONKER.

ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1904. An act to suspend until July 1, 1980, the duty on intravenous fat emulsion, and for other purposes;
H.R. 7345. An act to amend title 38 of the United States Code to increase the rates of disability and death pension and to increase the rates of dependency and indemnity compensation for parents, and for other purposes; and
H.R. 8159. An act to establish uniform structural requirements for intermodal cargo containers, subject to the jurisdiction of the United States, designed to be transported interchangeably by sea and land carriers, and moving in, or designed to move in, international trade, and for other purposes.

ADJOURNMENT

Mr. THORNTON. Mr. Speaker, I move that the House do now adjourn.
The motion was agreed to; accordingly (at 12 o'clock and 5 minutes p.m.), under its previous order, the House adjourned until Monday, December 5, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2763. A letter from the Architect of the Capitol, transmitting his report of expenditures during the period April 1 through September 30, 1977, pursuant to section 105 (b) of Public Law 88–454, as amended; to the Committee on Appropriations.
2764. A letter from the Comptroller General of the United States, transmitting his review of the deferrals and revised deferrals of budget authority contained in the message from the President dated November 10, 1977 (H. Doc. No. 95–262), pursuant to section 1014 (b) and (c) of Public Law 93–344 (H. Doc. No. 95–266); to the Committee on Appropriations and ordered to be printed.
2765. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to amend the Communications Act of 1934, as amended; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DENT: Committee on House Administration. House Resolution 915. Resolution authorizing funds for the investigation of Korean-American relations being conducted by the Subcommittee on International Organizations of the Committee on International Relations (Rept. No. 95–826). Referred to the House Calendar.
Mr. DENT: Committee on House Administration. House Resolution 921. Resolution to provide funds for the further expenses of the investigations and studies of the Committee on Small Business; with amendment (Rept. No. 95–827). Referred to the House Calendar.
Mr. STAGGERS: Committee of conference. Conference report on H.R. 9418 (Rept. No. 95–828). Ordered to be printed.
Mr. MAHON: Committee of Conference. Conference report on H.R. 9375 (Rept. No. 95–829). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRINKLEY:
H.R. 10183. A bill to amend the Internal Revenue Code of 1954 to permit long-term lessees to take the amortization deduction, in lieu of depreciation, for rehabilitation of certified historic structures; to the Committee on Ways and Means.
By Mr. BUTLER:
H.R. 10184. A bill to amend the Patent Act of July 19, 1952; and for other purposes; to the Committee on the Judiciary.
By Mr. GUDGER:
H.R. 10185. A bill to amend the Payment in Lieu of Taxes Act (31 U.S.C. 1601–1607); to the Committee on Interior and Insular Affairs.
By Mr. LUJAN:
H.R. 10186. A bill to increase the amount of privately owned land eligible to receive irrigation water under the Federal reclamation laws, and remove Federal subsidies from water delivered to excess lands, and for other purposes; to the Committee on Interior and Insular Affairs.
H.R. 10187. A bill to amend the act entitled "An Act to promote the development of Indian arts and crafts and to create a board to assist therein, and for other purposes", approved August 27, 1935; to the Committee on Interior and Insular Affairs.
H.R. 10188. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for the cutting and removal of corns, warts, and calluses and the reduction of club nails; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.
By Mr. McKINNEY:
H.R. 10189. A bill to permit suits under section 1983 of title 42, United States Code, against persons acting under color of any law or custom of the District of Columbia; to the Committee on the Judiciary.
By Mr. MAGUIRE:
H.R. 10190. A bill to amend title IV of the Public Health Service Act to provide for an expanded research program for the prevention of environmental and occupational cancer, and for other purposes; to the Committee on Interstate and Foreign Commerce.
By Mr. MARLENEE:
H.R. 10191. A bill to provide for minimum fines for certain offenses relating to welfare and unemployment fraud; jointly, to the Committees on Agriculture, Interstate and Foreign Commerce, and Ways and Means.
By Mrs. MEYNER:
H.R. 10192. A bill to establish a Commission on Proposals for a U.S. Academy for Peace and Conflict Resolution; jointly, to the Committees on International Relations, and Education and Labor.
By Mr. MICHEL:
H.R. 10193. A bill to amend the Social Security Act to make needed improvements in the program of aid to families with dependent children and to provide fiscal relief for State and local welfare costs; to the Committee on Ways and Means.
By Mr. MIKVA:
H.R. 10194. A bill to amend the Hazardous Materials Transportation Act to prohibit the transportation of radioactive materials to or from any civilian airport, and for other purposes; jointly, to the Committees on Armed Services, Interstate and Foreign Commerce, and Public Works and Transportation.

By Mr. MIKVA (for himself and Mr. GIBBONS):

H.R. 10195. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to defer a portion of his income tax based upon the amount of certain expenses paid or incurred by him in connection with the education or training at an institution of higher education or a vocational school of the taxpayer, his spouse, or any dependent; to the Committee on Ways and Means.

By Mr. MIKVA (for himself and Mr. JACOBS):

H.R. 10196. A bill to amend the Internal Revenue Code of 1954 to provide a deduction for certain amounts paid to a reserve for payment of product liability losses; to the Committee on Ways and Means.

By Mr. NATCHER:

H.R. 10197. A bill to protect the economy of the United States; domestic agriculture, labor, and industry, by the maintenance of farm income and purchasing power; to the Committee on Agriculture.

By Mr. O'BRIEN (for himself, Mr. CHARLES WILSON of Texas, Mrs. KEYS, Mr. MURPHY of Pennsylvania, Ms. MIKULSKI, Mrs. SCHROEDER, and Mr. HARKIN):

H.R. 10198. A bill to amend the Civil Rights Act of 1964 to make it an unlawful employment practice to discriminate against individuals who are physically handicapped because of such handicap; to the Committee on Education and Labor.

By Mr. SEBELIUS:

H.R. 10199. A bill to require action by the President and Secretary of Agriculture to increase farm income and to improve the effectiveness of farm program; to the Committee on Agriculture.

By Mr. WYLIE (for himself, Mr. ST GERMAIN, Mr. STANTON, Mr. EVANS, of Delaware, Mr. GRASSLEY, Mr. QUIE, Mr. WHITEHURST, Mr. LENT, Mr. RISENHOOVER, Mr. ERTEL, Mr. ANDREWS of North Dakota, Mr. MANN, Mr. KEMP, Mr. QUAYLE, Mr. OTTINGER, Mr. ALLEN, Mr. ROUSSELOT, Mr. GUYER, Mr. HANSEN, Mr. HARSHA, Mr. HOLLENBECK, Mr. HYDE, Mr. PATTISON of New York, Mr. MCKINNEY, and Mr. BARNARD):

H.R. 10200. A bill to amend the Truth in Lending Act; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PRESSLER:

H.R. 10201. A bill to direct the Secretary of Agriculture to establish a price support program for honey; to the Committee on Agriculture.

By Mr. PRESSLER (for himself and Mr. NOLAN):

H.R. 10202. A bill to provide primarily for the reduction of soil blowing; and to control snow deposition and conserve moisture; to protect crops, orchards, and livestock; to provide food and cover for wildlife; to conserve energy; to increase the natural beauty of the landscape; and form other purposes; to the Committee on Agriculture.

H.R. 10203. A bill to amend section 16(b) of the Soil Conservation and Domestic Allotment Act, as amended, providing for a Great Plains conservation program; to the Committee on Agriculture.

By Mr. SIKES (for himself and Mr. DINGELL):

H.R. 10204. A bill to authorize appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1979, 1980, and 1981; to the Committee on Merchant Marine and Fisheries.

By Mr. BEDELL:

H. Con. Res. 424. Concurrent resolution to assure quality health care for populations located in rural areas; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. BEDELL (for himself, Mr. JOHN T. MYERS, Mr. WRIGHT, Mr. HARKIN, Mr. RICHMOND, Mr. SIMON, Mr. HAGEDORN, Mr. RONCALIO, and Mr. YOUNG of Texas):

H. Con. Res. 425. Concurrent resolution to assure equal access to quality health care for populations located in rural areas: jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. BONKER (for himself and Mr. PEASE):

H. Con. Res. 426. Concurrent resolution providing that the President should implement measures to discourage activities which benefit the Government of the Republic of Uganda; to the Committee on International Relations.

By Mrs. COLLINS of Illinois:

H. Con. Res. 427. Concurrent resolution expressing the sense of Congress with respect to the recent military actions of Rhodesia in Mozambique; to the Committee on International Relations.

By Mr. DINGELL:

H. Con. Res. 428. Concurrent resolution expressing the sense of the Congress with respect to the Baltic States; to the Committee on International Relations.

By Mr. GIBBONS (for himself, Mr. BURKE of Florida, Mr. PEPPER, Mr. BENNETT, Mr. CHAPPELL, Mr. FASCELL, Mr. SIKES, and Mr. YOUNG of Florida):

H. Con. Res. 429. Concurrent resolution to urge the U.S. Postal Service to issue a commemorative stamp to honor Francis Bellamy, author of the "Pledge of Allegiance"; to the Committee on Post Office and Civil Service.

By Mr. MILFORD (for himself, Mr. MARRIOTT, Mr. FLOOD, and Mr. CHAPPELL):

H. Con. Res. 430. Concurrent resolution expressing the sense of the Congress regarding the sovereign rights of the United States in the Canal Zone; to the Committee on International Relations.

By Mr. RYAN:

H. Con. Res. 431. Concurrent resolution designating May 3, 1978, as Sun Day; to the Committee on Post Office and Civil Service.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

354. By the SPEAKER: Petition of the International Woodworkers of America, AFL–CIO, Portland, Oreg., relative to full employment; to the Committee on Education and Labor.

355. Also, petition of the International Woodworkers of America, AFL–CIO, Portland, Oreg., relative to national health insurance; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

356. Also, petition of the International Woodworkers of America, AFL–CIO, Portland, Oreg., relative to log exports and reforestation; jointly, to the Committees on Agriculture, Interior and Insular Affairs, and International Relations.

EXTENSIONS OF REMARKS

DAVIS-BACON ACT

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. HAGEDORN. Mr. Speaker, slowly there seems to be developing the realization that the Davis-Bacon Act works to the detriment not only of the taxpayer, but also to those groups in society which are the primary consumers of Government. The act annually results in a sort of reverse redistribution of $2 to $6 billion taking dollars from the average taxpayer and channeling them directly to a relatively small group of workers already earning incomes far in excess of the average. Further, the act insures that these dollars will never be received by the intended beneficiaries of Government programs.

There is probably no single piece of legislation that better combines the worst qualities of special interest legislation with the worst qualities of regulatory legislation gone awry than Davis-Bacon. It is legislation born of racial prejudice that still frustrates the legitimate aspirations of racial minority groups in our society. I would like to call to the attention of my colleagues several brief comments on the Davis-Bacon Act that have recently appeared in the press:

[From the Washington Post, Nov. 28, 1977]

UNIONS: ARE THEY FRIENDS—OR FOES—OF CITIES?

(By Neal R. Peirce)

Is a strong labor movement a good or bad thing for the nation's cities, and particularly the millions of city residents living near or below the poverty line?

The popular wisdom has always been "yes," that unions, cities and poor people have practically synonymous interests.

Most unions, after all, got their start in big cities. They forced up abysmally low wages paid by employers, assuring a dramatically improved standard of living for city residents. Unions have fought for minimum wages, for lower interest rates, for a rapid expansion of the national economy that should aid cities and poor folk everywhere.

Across the nation, however, several issues are now crystallizing that raise serious questions about private-sector unions and cities. The questions may be just as serious as the much-publicized problem of high wages and pension benefits won by municipal-employee unions.

The gut question now is whether central cities, locked in tight competition with their suburbs for jobs and development, can survive as viable political economies—especially for the large share of the nation's minorities, poor, often unskilled and unemployed people who live within their borders.

Many of the problems of older cities have little to do with unions: outmoded industrial plants, lack of land for new plants, industries that unconscionably desert the city that gave them their start.

But other city problems are union-related. The fact is that unions, by their very suc-

cess, now represent an increasingly middle-class group of workers—many of whom live in suburbs. And that's the constituency unions must represent—not the unorganized and chronically unemployed, the poor, the very young or old, the demoralized element that so often ends up living on welfare and estranged from society.

Recent congressional approval of a minimum wage boost—from the present $2.30 an hour to $2.65 next year and $3.85 by 1981—is a prime example of a union-backed action that looks good for the city poor, but could turn out to be disastrous. The typical minimum-wage worker, the AFL–CIO contends, is unskilled—young, black or female—and this group will benefit.

But the unions' real motive, critics say, is to bolster their own organizing and collective-bargaining efforts. Most economists agree that the newest increase will cause teenagers to lose hundreds of thousands of jobs—at the very time cities are coping with the social dynamite of a 40 per cent black teenage unemployment rate. "It's absolutely insane," Brandeis University economist Leonard Hausman contends, "to raise the minimum wage when teenage unemployment is high and rising."

The minimum wage, says St. Louis urbanologist Norton Long, has come to be "a protective tariff against the cities, to store people off the labor market, so they won't compete with the unions. In fact it's taking away their bread card." To survive, he adds, cities must find employment for their vast reservoirs of unskilled minorities, undercutting the suburbs in labor costs. "But us bubble-headed liberals," he says, "are opposed to doing that because we think it's degrading and demeaning"

Even if one supports minimum wages in general, it's hard to comprehend Congress' refusal to back a proposed 15 percent lowering of the minimum wage for teenagers during their first six months on entry-level jobs. The unions said the provision would cause employers to fire older workers and employ teenagers in their stead. But experience in Europe—where virtually all countries have subminimum wages for teenagers—shows no harm to adult employment.

Construction trade unions pose a dire threat to neighborhood and city renewal across the country through the 45-year-old Davis-Bacon Act. The law requires paying so-called "prevailing wages"—in practice ultra-high union construction wages, generally 50 to 100 per cent above what non-union contractors pay—on virtually any job paid for or subsidized by the federal governent.

Davis-Bacon was originally motivated in part by racial prejudice—fear that out-of-state contractors, using inexpensive black labor, would undercut local builders. Today, by effectively prohibiting wage competition, Davis-Bacon costs the taxpayers $2 to $6 billion annually in inflated construction costs on highways, military and public-works projects. Yet to the AFL–CIO Davis-Bacon is a sacred cow; any urban Democrat would think long and hard before questioning it.

When city, neighborhood or non-profit groups try to use any form of federal manpower or interest-rate subsidy to rehabilitate poor people's housing, they run head-on into Davis-Bacon and often find there's no way to build the project economically. The situation is particularly tragic when an attempt is made to use minority contractors (almost all non-union) or residents' own "sweat equity" in rehabilitation. That approach lets poor people develop valuable job skills while fixing up their own housing. But unions can, and often do, blow the whistle on such projects. The Secretary of Labor can grant waivers, but rarely does.

"I hate to come off anti-union, but boy, it makes me mad," says Philip St. George of the Urban Homestead Assistance Board in New York. "They're destroying neighborhoods."

Sometimes unions let housing projects proceed, especially if their own members are used to train minority apprentices. Neighborhood groups, unions and the city government have begun a model effort along these lines in Allentown, Pa. Yet the unions—or thoughtless bureaucrats—can stymie federally subsidized projects at will, simply by invoking Davis-Bacon.

There are other points of neighborhood-union contention. Construction unions, for instance, support freeways that decimate city neighborhoods. Transit unions can stop federally subsidized transportation projects—jitneys, mini-buses, possibly even deregulation of taxis to create better service for low-income areas—if they can show their jobs might, however remotely, be endangered.

Milton Kotler, executive director of the National Association of Neighborhoods, believes such impasses can be overcome through local neighborhood-union task forces. But as long as the unions, through their muscle in Washington, hold a trump card on so many fronts, poor city neighborhoods and their residents will be at a permanent—and perhaps fatal—disadvantage.

[From the New York Times, Oct. 22, 1977]

THE BURDENSOME CARGO OF REGULATION

Chalk one up for consumers. The House has defeated "cargo preference" legislation that would have required 9.5 percent of imported oil to be transported on American-built, American-crewed tankers. The bill was a contrivance of the ship construction industry and maritime unions to fatten profits and salaries; it would have raised the price of oil by $300 million to $600 million a year.

If its defeat indicates a change of mood in Congress toward special-interest legislation, this would be good news indeed. The American economy is plagued by laws and legally mandated regulations that favor groups with political and financial clout. At a cost of tens of billions, important industries are sapped of initiative by import restrictions, price regulation and outright bans on competition. This not only leads to higher consumer prices and tax bills but leaves the economy more vulnerable to inflation. Firms shielded from competitive forces by regulation typically take advantage of good times by raising prices and profit margins. Then, in bad times, regulation protects them from the need to cut prices. The result is a general increase in inflationary pressures, which make the policymakers reluctant to stimulate business activity that might further raise the cost of living. Billions of dollars in productive resources remain idle and millions of people remain unemployed, at least in part because business and labor find it easier to compete for favor in Congress than in the marketplace.

It would take years to untangle the snarl of inefficient practices created over the past century in transportation, the sector most crippled by special-interest regulations. But if Congress wishes to follow the admirable precedent set by the rejection of cargo preference, we offer some simpler, lesser-known targets.

The Capper-Volstead Act exempts agricultural cooperatives from antitrust price-fixing sanctions, provided they do not "unduly enhance" product prices. As a practical matter, the law permits huge marketing co-ops, in league with Federal and state officials, to manipulate sales of billions of dollars in farm produce to keep prices high.

The Davis-Bacon Act requires that laborers on all Federal and some Federally-assisted construction projects be paid the prevailing wage. "Prevailing," in this case, means the highest wage paid to union construction labor, even when the nearest union local is 50 miles away.

The Robinson-Patman Act restricts the right to charge different prices to different commercial buyers of merchandise. It was meant to protect small retailers from chain stores that use their buying power to obtain goods at a discount. The law never achieved this dubious goal, but it has inhibited cost-cutting by manufacturers, particularly in the food industry. The result has been less competition and higher food prices.

Cargo preference may have been put to rest this week, but the struggle to rescue the economy from regulations that frustrate competition has only begun. For those left unemployed by slow recovery from recession and for everyone who feels the pinch of inflation, it is a battle worth fighting.

[From the Washington Star]

THE WAGES OF METRO

The dispute over wage rates on the I–66 highway project in nearby Virginia gets curiouser and curiouser.

The I–66 segment, you will recall, runs from the Potomac River in Arlington to the Beltway in Fairfax County—at least it will if the controversial project is completed—and contains four lanes of roadway and a center section in which a Metrorail will bo installed.

Virginia officials discovered last spring when letting a contract for a 1½-mile section that the Labor Department required workers on the Metro portion be paid about double the wage rates paid in Virginia to highway workers who do the same type of work. That meant that laborers, heavy equipment operators and others working within a few feet of one another and doing similar work would be paid vastly differing salaries.

Gov. Mills Godwin called this a "patent absurdity," which it certainly was, and the Labor Department's wage appeal board agreed to let Virginia's highway wage scales prevail for all workers under the contract.

Now the Virginia Department of Highways and Transportation is ready to advertise another 1½-mile section for bids. But the Labor Department again is insisting that workers on the center section be paid the going rate for other Metro projects. That would mean that workers in the middle and on the sides of the first section and workers on the sides of the second section would be getting highway construction rates, while workers in the middle of the second section—if you still follow us—would be getting the higher Metro rates.

Governor Godwin again fired off a letter to the Labor Department calling the latest decision "inflationary," "arbitrary" and "inequitable," in addition to which it is "absolute nonsense" because workers would be doing essentially the same type work on both projects, and the construction techniques to be used on the Metrorail portion are the same as those followed every day by highway contractors throughout Virginia.

The reference to construction techniques, we gather, goes to a dispute between the Labor Department and Virginia highway officials over one of the structures involved in the second contract that will carry Metro trains under the roadway and off to a service yard. Labor Department officials call it a tunnel and contend that workers on it should be paid Metro construction rates. Virginia Transportation Director John Harwood calls it a "concrete reinforced boxed culvert" that "we build all the time on highways."

Whatever it is, Virginia apparently has been getting them installed at about half the labor cost that Metro has been paying.

Governor Godwin said he was "astonished" that the Labor Department is sticking to a wage scale that he thought the wage appeals board had overturned in the ruling on the first I–66 section. Frankly, we're not only astonished at that but at Metro's apparently paying twice as much as Virginia for the same type of work.

If a way could be figured to put Virginia officials in charge of all Metro contracting and keep the Labor Department out, perhaps Metro dollars and the Metro lines could be stretched a lot farther.

BATTLE HYMN OF AGING

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. LEHMAN. Mr. Speaker, there are many senior citizens in south Florida's 13th Congressional District. I often see them at meetings of their clubs, condominiums, and neighborhood and community groups. Like most older people, those in south Florida have more than their share of problems in terms of health, finances, and loneliness.

The resident of Rolen Lake Gardens, however, will not let these problems get them down. They have expressed in song the predicament of their generation.

The first four verses describe how senior citizens are trapped between fixed incomes and rising prices, and how medicare is inadequate for their medical needs. In spite of this, the last verse provides a sense of optimism and determination. After all, this song is a battle hymn.

Although the words alone cannot fully express the spirit of those who enthusiastically sang this song, I would like to share the "Battle Hymn of Aging" with my colleagues.

The lyrics are as follows:

BATTLE HYMN OF AGING

(Tune of Battle Hymn of the Republic)

We reach the age of sixty five,
Our golden years are here,
They tell us that the age begins
A happy new career,
For now our Uncle Sam becomes
Our permanent cashier
As we go marching on.

CHORUS

Our social security from Baltimore is sent.
We buy a little bit of food and maybe pay the rent,
And after that we're stony broke
And left without a cent
But we go bravely on.

CHORUS

And as for checks from Medicare
Will someone tell us how
They always find some doctor bills
They sadly dis-allow
And dental costs, as we well know,
They wholly disavow
But we go bravely on.

CHORUS

We don't know how we make it
As we live from day to day
With income fixed, and prices up
There is always more to pay,
So minding our arthritis,
Let's get on our knees and pray
That we'll go bravely on.

CHORUS

And first of all, let's thank the Lord
That we are still alive,
The dreams we have may still come true,
When we are ninety-five,
So, please, dear Lord, give us the
Strength our troubles to survive
As we go bravely on.

CHORUS

Glory, glory hallelujah
Glory, glory hallelujah
Glory, glory hallelujah
As we go bravely on.

A TRUE PROFESSIONAL: SALISBURY TIMES EDITOR DICK MOORE, RETIRES

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BAUMAN. Mr. Speaker, it was with profound regret that the citizens of the Lower Eastern Shore of Maryland and the adjoining areas of Virginia and Delaware recently learned of the impending retirement of Richard L. Moore, editor of the Salisbury Times for the past dozen years. Dick, as everyone knows him, has been with the Times since 1939, almost as long as this Member of Congress is old. During that time he has justly earned a respect and affection from the local community that can only come from hard work, professional competence and a love of people, as well as a sympathy for their problems.

The press takes a lot of criticism for its short comings, real and imagined, but people such as Dick Moore not only enable the Fourth Estate, they are true public servants, as much as, if not more, than any public official.

My family joins with many thousands of citizens of the Delmarva area in wishing Dick and his wife a well-deserved and long retirement.

At this point I include an editorial from WBOC in Salisbury:

DICK MOORE

When a person has been on the job with a particular company for a long period of time, and in leadership capacity, there seems to be a tendency to consider him as the embodiment of all that a particular organization actually is. One person who would fit that general description would be Dick Moore, editor of the Daily Times. And while Dick would be the first to admit that the growth of that paper has been an organizational affair . . . and not an individual feat . . . the fact remains that to many people, Dick Moore is the Daily Times.

Now, Dick is going to retire at the end of the year . . . and we had to let you know how happy we are for him, but how we also shall miss him. Richard L. Moore joined the paper in 1939 as a reporter . . . became managing editor in 1942 . . . and upon the death of Oscar L. Morris twelve years ago, became the editor. He has seen the paper grow from an 8 page, 4,000 daily circulation paper to what it is today . . . and while company growth is never a one-man job, his efforts were part of the pattern.

We can remember the days when call letters on our microphones were blacked out if they were going to be visible in a picture to be printed in the daily paper—and we were not always charitable in our comments either. But those days have long gone . . . and there exists mutual rapport and respect between the printed and electronic press in this town . . . and Dick Moore had much to do with this.

His retirement comes a full year ahead of mandatory age. He has things he wants to do . . . including free-lance writing and public relations work . . . and he is an expert with a camera too.

Dick Moore has fully earned his retirement. We will miss him, but wish him well. We suspect he will continue to contribute to the community, even tho his efforts will no longer be made over the editor's desk.

RACIAL QUOTAS MAY RUIN ANOTHER SMALL BUSINESS

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. ASHBROOK. Mr. Speaker, liberals are continually arguing that their racial quotas in labor and contracts are only to help minorities, not to hurt whites. This is insane. You simply cannot discriminate for somebody unless you discriminate against somebody else. If liberals would just look around in the districts they are supposed to be representing, they would find plenty of examples of white workers and white-owned businesses employing all races hurt or even ruined by these racist practices liberals have instituted.

If liberals do not want to look in their backyards for examples, I will give them one—I should say one more—I found about this week. In this letter, an employer of over 100 workers puts his situation more poignantly and more eloquently than I could hope to.

ALL SUPERVISORS, ———, Inc., ——— Ohio.

GENTLEMEN: This is an extremely difficult letter for me to write.

Unless the present laws pertaining to affirmative action with regard to subcontracting on Federal Aid Construction Contracts, ———, as we know it today, will cease to exist.

Over the last few weeks we have not gotten one subcontract for curb & gutter or sidewalk, although we have been low bidder on many. The only reason being that we are not a "Minority Business Enterprise". We see no prospect for getting any of this work until such time as subcontractors are again hired on the basis of lowest and best bid without regard to the race—color—creed etc. of the corporate ownership.

As you are aware about 90% of our work is subcontracting curb & gutter and sidewalk, and there is no possible way we can survive on the other 10%—where during the last few seasons we usually had about 15 crews out, we will be fortunate to furnish work for 2 crews in the immediate future.

I have written to all 100 Senators as well as our own Representative John Ashbrook. . . .

Unless we can get the 10% Minority Business Enterprise set aside outlawed, the future at ——— is indeed very bleak.

I do not know what more I can do. It might help if you people contacted Washington.

Sincerely,

—— ——.

Mr. Speaker, I have tried every remedy I know in these cases. The hard fact is that so long as liberals rule here, it will do no good for victims of reverse discrimination to "contact Washington."

BIRMINGHAM POLICE CHIEF ON LEAA

HON. JOHN BUCHANAN

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BUCHANAN. Mr. Speaker, just recently, Mr. James C. Parsons, chief of the Birmingham Municipal Police Department, testified before the Subcommittee on Crime of the House Committee on the Judiciary. Chief Parsons has worked with the Birmingham Police Department since 1954, rising from the rank of patrolman to chief of police, the position he assumed in 1972.

Chief Parsons holds both a bachelor of arts in sociology, and a master of arts in educational administration from the University of Alabama, where he is currently pursuing his Ph. D. Chief Parsons is presently serving as treasurer of the Police Executive Research Forum, an organization of major city police chiefs interested in research in the debate on critical issues in policing.

Chief Parsons also serves as an advisory consultant to the National League of Cities, and a member of the advisory board of the Criminal Justice Center at the John Jay College in New York City. He is the author of numerous articles, including a candid analysis of police corruption, police organizations, and the art of effective change, which appeared in the International Journal of Criminology and Penology.

Chief Parsons manages a department of 900 persons, which has been described in a recent book as a department which "has been transformed into one of the most open, progressive, and approachable police forces in the Nation." I can personally attest the quality of his work. All of us in Birmingham are deeply proud of Chief James Parsons and I commend him to the distinguished Members of this body.

Chief Parsons' remarks on the future of the Law Enforcement Assistance Administration before the Crime Subcommittee follow:

STATEMENT OF JAMES C. PARSONS

Mr. Chairman, thank you for this opportunity to present the views of the Police Executive Research Forum on the future course of the Law Enforcement Assistance Administration.

The Forum is a year-old organization of 50 chiefs from the nation's larger police departments. We believe that, as yet, policing does not provide citizens with the level of services to which they are entitled and that improvement of policing demands research, open debate of issues, and development of better management and innovative programs.

Our position on LEAA recognizes the tremendous potential that a federal funding program can have for improving policing and the rest of the criminal justice system in the United States.

Our faith in federal efforts to date is tempered by our own experiences with the shortcomings of LEAA. But I am not here today as the Forum's representative to dwell on the failures of the past. Rather, we of the Police Executive Research Forum want to focus our hopes on the future.

We believe that a significant restructuring of the federal criminal justice assistance effort is required. We recommend:

A program of direct federal criminal justice assistance to state and local units of government; and

The creation of an independent federal criminal justice research institute responsible for conducting and supporting basic and applied research.

LEAA was conceived as a means for the federal government to assist state and local jurisdictions in their fight against crime. Regrettably, sufficient federal funds have not been funneled to where serious crime is most prevalent, the nature of crime most complex, the control of crime most difficult, and the delivery of productive police services most important to the maintenance of the social fabric. It has long been obvious to concerned police executives and officers that the density and heterogeneity of urban populations contribute measurably to the tough and delicate job of serving and protecting citizens. In sum, too often federal criminal justice money has not been directed to the larger cities and suburban areas where it is most needed, both to curb crime and assure an efficient criminal justice system.

The 250 police departments which qualify for membership in our organization, based on a minimum of 200 full-time employees, account for 1.4 percent of the 18,500 police agencies in this country. Yet, in 1974 this small number of departments accounted for 49 percent of full-time police employees who had to deal with 67 percent of the violent crimes, 79 percent of the robberies, and 74 percent of the murders.

With half the police personnel employed by a relative handful of agencies and confronted with most of the nation's serious crime, it makes obvious sense to put most of the available federal anticrime resources in these jurisdictions.

This has not happened in the past. And, frankly, there are probably police chiefs from some smaller jurisdictions who would be happy for old formulas of distribution to continue. LEAA has granted money to the states, which in turn have retained a sizable portion and allocated the remainder to cities of all sizes. Under this arrangement, larger jurisdictions have been forced to compete with all other local jurisdictions in a state for what funds are available. This competition was not necessarily based on need, but in many cases was simply a process of political accommodation. In the worst cases, where state planning agencies have been controlled by small jurisdictions, there has been an active effort to undercut larger jurisdictions.

To remedy this situation, the Police Executive Research Forum recommends a program of direct federal criminal justice assistance to state and local units of government. The funds should go directly to the local jurisdiction rather than through an extra layer of state bureaucracy. Minimum levels of assistance to all local units of government serving a population of 100,000 or more should be established. Supplemental grants should be provided to jurisdictions of 100,000 or more based on a formula which takes into account total population and the percentage of total state criminal justice expenditures provided by the jurisdictions.

This formula does not include crime rates as an element in determining direct assistance allocations. While we agree that crime rates eventually should be a consideration, we question the accuracy of currently available crime measures for use as a specific factor in allocation formulas. Perhaps with the creation of a centralized criminal justice statistics agency in the Department of Justice, we will, some time in the future, have more reliable crime indicators which can be used in the formula. While the formula we propose favors more heavily populated jurisdictions, states and other local jurisdictions, of course, would also receive direct assistance in proportion to their population and percentage of state criminal justice expenditures.

Direct assistance has two advantages: First, it eliminates a level of bureaucracy which previously had biased the allocations against local needs. Second, it removes earmarking and other forms of federal direction and restores local initiative and discretion. Rather than the federal government determining the solution to local problems, local jurisdictions should have the job. If the control of crime is to be a local responsibility, let localities decide their own programs for dealing with the problem. They can far better decide their own priorities, and their own unique needs based on their history than some far-removed bureaucrat.

In describing our position, I want to stress that the Police Executive Research Forum does not believe that with direct assistance localities can do anything they want. Obviously, the federal government must maintain strong restrictions prohibiting supplantation, criminal misuse, and discrimination. For example, it would be a great mistake if the Jordan Amendment on civil rights requirements were dropped in any new crime control bill.

Of course, new federal funds must be used to improve the criminal justice system. However, if the Congress legislatively attempts to define "improvement," it undertakes an almost impossible task in light of local variations in needs and guarantees extensive, subjective executive branch guidelines with accompanying red tape. The Forum does, however, recommend that there be some restrictions which assure that federal monies are not wasted. Examples of these restrictions are:

1. Outlays for ongoing personnel costs for employees not involved in short-term demonstration projects;

2. Expenditures for capital construction and renovation; and

3. Purchase and maintenance of hardware not related to demonstration programs.

The Forum's other major recommendation, as I indicated, involves research. Belief in research as a means for improving policing is one of the cornerstones of our organization. We, therefore, believe that research in policing must be an essential component of the federal government's efforts to improve criminal justice. A federal institute of research should be established to lead the way in searching for new knowledge and better methods for controlling crime. Local jurisdictions alone cannot fulfill this need.

Research is expensive. Local government is financially burdened just in maintaining continually increasing operating budgets for criminal justice agencies. Research is long term. Local jurisdictions are pressed by everyday crises. Research requires skilled resources. Municipalities cannot easily obtain the many different technical skills necessary for complex research. Research builds on a series of interrelated findings. Localities cannot coordinate research results as easily as the federal government. This is not to say that local jurisdictions cannot conduct research. They can; they just cannot carry out the systematic development of a body of knowledge about crime and criminal justice administration which is envisioned for a federal institute of criminal justice research.

The Police Executive Research Forum believes that an independent research insti-

tute, led by a director appointed by the President and confirmed by Congress, offers the best hope of developing the type of research the police need. The work of an independent institute must be coordinated so that its findings are not unrelated to each other. And its policies must be guided by criminal justice practitioners so that its efforts are not impractical.

The productive utilization of research findings, of course, can only occur when police officers have a certain basic level of education. Indeed, efficient and effective policing today increasingly demands that officers receive academic training. For these reasons, it is important that the federal government continue the Law Enforcement Education Program which, in recent years, has done so much to assist law enforcement officers in obtaining the benefits of a college education.

Before concluding, the chiefs in the Police Executive Research Forum do not believe—as may be the belief of some other police executives—that the police never get a fair share of federal criminal justice funds. We recognize the interdependence of the agencies in the criminal justice system and the importance of improving the whole system. We also recognize the critical function citizens play in crime control. There is much that must be done in policing. But there is also need for improvement in other components of the system.

More efficient courts, more productive and effective prosecutor and public defender offices, better corrections systems, and improved citizens' programs all aid the job for the police.

Because the police are not solely responsible for the control of crime, we must work in cooperation with our associates in the criminal justice system and with the public so that crime rates can be curbed.

Finally, Mr. Chairman, the Police Executive Research Forum recognizes that this is a time for reevaluation and reorganization of the federal criminal justice funding effort. This process could be a very beneficial one. That is why we are privileged to appear before you and your Committee in its efforts to give a new, stronger, and more productive form to the expenditure of federal anticrime funds. But we caution that the federal anticrime effort should not be allowed to drift too long without firm direction. Study of and reflection on the future of federal criminal justice programs may be necessary, but they must not be allowed to continue to the point that shortcomings of the past are compounded. We therefore urge the President to appoint an Administrator of LEAA so that changes in the program can begin while deliberations continue. And we strongly urge that funding for federal criminal justice programs be maintained at least at current levels.

Thank you, Mr. Chairman, for the opportunity of appearing at this hearing.

ABILITY FOR ADMISSION

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. WALKER. Mr. Speaker, a recent Gallup poll has revealed that Americans overwhelmingly oppose the use of racial quotas to determine who should be admitted to colleges or hired for a job. According to the poll, which was taken in late October, 80 percent of American adults oppose giving preferential treatment to some groups in order to make up for past discrimination. Such preferential treatment was opposed by all sectors of the public, including women and nonwhites, who would be among those granted special privileges.

As a sponsor of H.R. 9286, which would bar Federal enforcement of discriminatory quotas, I am pleased that the Gallup poll confirms my belief that the American public supports the ideal that individual merit, not membership in a certain favored group, should be the determining factor in both hiring and admission policies. It is time that Congress and the administration respond to the clearly stated will of the people and put an end to Government-sanctioned reverse discrimination.

The Washington Post of November 20th carried the Gallup poll results in detail. I commend the Post article to my colleagues' attention:

EIGHTY PERCENT MAJORITY FAVORS ABILITY AS CRITERIA FOR ADMISSIONS

(By George Gallup)

PRINCETON, N.J.—The U.S. public continues to believe that ability, as determined by examination, and not preferential treatment to correct past discrimination, should be the main consideration in selecting applicants for jobs or students for college admission.

An overwhelming proportion of the public—eight in 10—oppose preferential treatment. Even nonwhites and women, who have most to gain by affirmative action, vote for making ability, as determined by tests, the main consideration in filling places in industry and college.

At the same time, however, a majority of Americans, 53 per cent, would favor preferential treatment in the form of a federal government program offering free educational or vocational courses that would enable members of minority groups to do better in tests.

The issue of 'affirmative action"—described by its critics as reverse discrimination—is now before the Supreme Court.

Most in favor of offering free courses to help minorities compete for educational and occupational opportunities are women, nonwhites, persons with a college background and younger adults (18–29 years old). Even among those opposed to preferential treatment, opinion is 5-to-4 in favor of free courses being provided.

The results reported today are based on interviews with 1,517 adults, 18 and older, conducted in more than 300 scientifically selected localities during the period Oct. 21-24.

TRIBUTE TO RUDOLPH VARGAS, INSPIRED ARTIST AND SKILLED SCULPTOR

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. ROUSSELOT. Mr. Speaker, on Sunday, December 4, the auxiliary of Santa Teresita Hospital, which is located in my congressional district in California, the hospital staff, the 70 Carmelite Sisters of the Sacred Heart in residence, and the people of the community which they serve will join together to pay tribute to Mr. Rudolph Vargas, an artist extraordinaire who has given of his talent for 50 years. His expression and execution of beautiful works of sculpture have offered pleasure and execution of beautiful works of sculpture have offered pleasure and inspiration to a countless number. While Rudolph Vargas' work is primarily in wood-sculpture, an art which seems to be fading from existence, at this event a bronze statue of Christ with the Children, by Mr. Vargas, will be unveiled and dedicated as a memorial to Evelyn Owens Lerned, who, was a member of the Christ Child Society, helped the hospital in its early days and carried on that work through the bequest of her husband, a noted pediatrician.

The Vargas statue is the first bronze plaque to be dedicated at Santa Teresita Hospital in Duarte, Calif., where there are 60 works of art on display, 26 of which have been carved in wood by Mr. Vargas.

All of the works contained within this collection were donated by friends and benefactors of the Carmelite Sisters. Much of Mr. Vargas time is also donated.

Rudolph Vargas is a native of Mexico and became a U.S. citizen in 1950. During his 50 years in this country, his great contribution to an almost dying art has been widely recognized. He has been listed in Who's Who in American Art, Who's Who in the West, Profiles, published in London, and in the International Encyclopaedia of Artists.

In addition to his religious works, Mr. Vargas has been responsible for a great contribution to the field of commercial art, including many works in the motion picture studios.

Santa Teresita Hospital has planned this surprise tribute to Mr. Vargas on Sunday, December 4 so that he may feel something of the magnitude his creations inspire in the hearts of those who share his talent through their appreciation of it, and I have taken this opportunity to further recognize Rudolph Vargas through this public record and praise him for his artistic achievements, selfless giving to others of his blessed talent.

POLITICAL CAMPAIGNS, THEN AND NOW

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. STOKES. Mr. Speaker, last Tuesday, millions of Americans went to the polls to elect State and local officials. I am pleased to announce that in my own city of Cleveland, Ohio, we elected a new chief executive, Dennis J. Kucinich, who at 31 will become the youngest mayor of a major city in the United States.

Mr. Speaker, starting with the preprimary campaigns last summer, the Cleveland news media has been in full swing covering the many candidates for political office. Hundreds of pages of copy and hundreds of production hours

have gone into publicizing the candidates and the issues.

Last week a column appeared in a local newspaper which, in my opinion went far beyond the ordinary in capturing the flavor of the 1977 elections. It is not just a Cleveland story but a saga which has been played time and time again across this land.

Mr. Speaker, I would like to take this opportunity to share this sensitive article with my colleagues in the House. Therefore, I respectfully submit to you the column by Dick Feagler which appeared in the November 3, election night edition of the Cleveland Press newspaper:

THE COLOR STORY PALES OVER PAST DECADE

(By Dick Feagler)

I have to work tomorrow night to do what is known in the trade as a "color piece" on the election.

The color piece is the story that doesn't have to tell you who won until the fifth paragraph. It is the story that tells you what the band played in the ballroom ("Happy Days Are Here Again," "Melody of Love") and what the signs said and all about the tears and the hurras!

I'll be there scribbling notes so you shouldn't miss a second of this intense drama. It'll be hot in the ballroom. Hot and sweaty and noisy and I'll begin to get the pain behind my right shoulder that I always get when I have to stand around at elections, fires, hostage-holdings and similar kinds of group enterprises.

What you are supposed to tell in these color pieces is the "story behind the story." But where, I ask myself, is the story behind the story of tomorrow night's election.

Three men are applying for a job. A lousy job at that. Two men will survive the night—Dennis Kucinich and Ralph Perk. If I read the teacup right, Kucinich will get more votes than Perk. If I read it wrong—so then I read it wrong.

Color piece? I wrote the color piece of my modest career 10 years ago. A color piece that has made every one I've written since colorless. A color piece that, if the truth be told, let me jaded.

I look at the clipping, written in the early morning hours after Carl Stokes became (it says here) "the first Negro mayor of a major American city."

It all seemed so important then. So significant. So portentous. I had covered the candidate—ridden through the dark streets of the city as he drove and talked. He would stop at a light and a cabbie would holler, "Hey, Brother. You do it, you hear?"

And covering him, I rooted for him. Very bad journalistic form, I know. I haven't rooted for a candidate since. It's been easy not to.

Ten years ago, we'd stop at his house and Shirley, his wife would be gracious and winsome. She had one of those organs with a button you could push and an ersatz drum would bang out rhythm. I played the organ and covered the race and both things were fun.

But a lot more than fun. I don't know how to tell you. It all seemed to mean so much, that's all. You felt that, if this man were elected, it would give the city some class. That he would, somehow, carry all of us to someplace we had not been.

And then they sent me on election night over to his headquarters on W. Superior to do the color piece. Why it wrote itself. The people cheered and cried when he won. And he told them:

"Never before have I known the meaning of the words, 'God Bless America'."

What that was supposed to mean was that the system actually worked. That despite all the rottenness and hypocrisy, the sham and banditry of politics—beneath all that, there was still the people and the people still had their ideals. And it could come out all right in the end, after all.

"This city was built by a combination of people (my 10-year-old notes tell me he said) "all people, Hungarian, Lithuanian, Irish, Italian, Negro. And we need their support to make this city take its rightful place among the great cities of the nation."

Ah, I hear it in my mind. What a night that was to write the color piece. I hear it in my mind and then it starts to run down like a record on a busted machine . . . slowly running down into . . .

Into what?

Into Sirhan Sirhan and James Earl Ray, My-lai and the Glenville shootouts and Fred (Ahmed) Evans sitting on Death Row. Support your local police and Lyndon Johnson quitting. Richard Nixon's secret plan and four students at Kent State, MIA-POW-KIA—body counts. Covert CIA actions. Watergate. The government putting LSD in somebody's soup. Tapping phones. All the horrors of 10 years.

And the candidate went to work for a television network and the family was broken up. I don't know who got the organ. The voice that said it finally knew the meaning of the words "God Bless America" now comes at me out of my car radio sometimes. Just another working reporter covering somebody else's sins.

And the city is still grimy and nobody has solved racism and the great cities of the nation are begging on the streetcorners. And I'm ten years older and have my own scars which, like the rest of us, I try to hide.

I'll do the color piece tomorrow night, but I owe it to you to tell you that I've lost my taste for it. There isn't any story behind the story any more. There's just the story. What it needs is a rewrite man.

SLOTH: ONE OF SINS THAT AFFLICTS US

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. SIMON. Mr. Speaker, the New Republic has had a series of articles by Henry Fairlie on "The Seven Deadly Sins." The series is an unusual one for a political journal but one that is thought provoking. In the issue with the article that deals with sloth—from the October 29, 1977 issue—Mr. Fairlie makes some comments that are at least partially accurate. Much as an actor in a play has to be overly dramatic in order to convey to an audience the sense of what is taking place, so Mr. Fairlie, perhaps, goes further than accuracy demands in order to jolt us.

I am inserting into the RECORD the final paragraphs from Mr. Fairlie's comments on sloth:

Sloth is eating at us, devouring all inclination to continue the human endeavor at even the level which has been sustained in the past. For we are reaching the stage at which we will no longer regard ourselves as part of that endeavor. We barely know our civilization any more. We do not read the ancients. Even the classics of our own literatures are becoming closed books to us. We make little or no effort to understand our science, with the instructions it has to give and the wonders it has to show. We allow no authority to the past, and entertain no obligation to the future. We do not observe the rules of grammar or syntax. We disdain our dictionaries and let our vocabulary grow slack. We think we can communicate without speaking accurately, and even without speaking at all in any language that is complex and discriminating. We will rely on touch and feel, and the human race will end its long caravan across the centuries as a speechless race of touchy-feelies. We think that we can think even without the process of thinking. And we think we are not slothful?

Children are too idle to obey. Parents are too sluggish to order. Pupils are too lazy to work. Teachers are too indolent to teach. Priests are too slack to believe. Prophets are too morbid to inspire. Men are too indifferent to be men. Women are too heedless to be women. The sexes are too bored to engage each other. Doctors are too careless to care for their patients. Shcemakers are too slipshod to make shoes. Writers are too inert to try to write well. Street cleaners are too bored to clean streets. Shop clerks are too uninterested to be courteous. Philosophers are too faint-hearted to make philosophies. The faithful are too dejected to bear witness. And we think we are not slothful?

Of all the sins, Sloth is the nearest to having become a religion to us. We have faith in it. And what is most terrible about it is that even in our slothfulness we move across our landscape like a cloud of locusts devouring everything by doing nothing.

ANTHONY JAMES DELPOPOLO, SR.

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. FISHER. Mr. Speaker, numbered among the outstanding correctional educators in my 10th District is Anthony James DelPopolo, Sr., a young-spirited man of 63. He was recently the recipient of many honors for his accomplishments. I would like to add my congratulations.

Anthony James DelPopolo, Sr., professor of administration of justice at the Northern Virginia Community College, Annandale campus, was honored last Thursday, November 10, 1977, by the officers and members of the Corrections Club, 125 students, relatives, friends, and colleagues, celebrating his recent appointment to full professorship by Dr. Richard J. Ernst, college president, as well as completion of 30 successful years in the corrections service as a correctional educator, a prison administrator, and a college professor.

There are a small number of persons in the United States who are equal to Professor DelPopolo's educational and experience background, as he possesses 24 years of prison experience, 10 years college teaching—all in the field of sociology, criminology, penology, and corrections; 4 graduate degrees and author of over 50 articles, books, and research contributions in the field. He has achieved international fame as distinguished scholar, author, publisher, criminologist, sociologist, penologist, and correctional educator.

Professor DelPopolo received a B.S. degree in education from New York State College for Teachers at Buffalo in 1937, and an M.A. degree in school ad-

ministration at the New York State College for Teachers at Albany in 1950.

He went on to merit three other advanced degrees; that is, an M.S. in adult education from George Washington University in 1948, a degree in advanced graduate study—DAGS—majoring in correctional education and administration, from University of Virginia in 1958, and an M.S. in correctional administration from American University in 1971.

Currently, Professor DelPopolo heads the corrections program at the college, instructing such courses as juvenile delinquency, criminology, jail operations and administration, criminal behavior, correctional counseling, and so forth. DelPopolo became associated with NVCC in 1969 upon the recommendation of Prof. Lander C. Hamilton, administration of justice program head. After 3 years as a part-time instructor he was appointed on a full-time basis.

Prior to coming to NVCC, he was on the professional staff of the District of Columbia Department of Corrections, having been appointed by Donald Clemmer, former director, as supervisor of academic education in 1947. During DelPopolo's 24 years with the department he distinguished himself and was promoted to such positions as associate superintendent of the Youth Center, educational programs coordinator, and staff training specialist for the Training Academy. A majority of his many articles, research papers, and instructional materials were published in personnel manuals and periodicals closely related to corrections, correctional education, and juvenile delinquency.

Much of DelPopolo's active life was spent as an officer and/or member of many social and professional organizations, such as Toastmasters International, American Correctional Association, Correctional Education Association, American Sociological Association, Italian Executives of America, Third Order of St. Francis, Washington Area Council of Alcoholism and Drug Abuse, and the Georgetown University's Speakers Bureau.

Prior to coming to the Nation's Capital, he wrote several volumes on citizenship titled "The American Way of Life," "My America, Land of Liberty," "How to Prepare for United States Citizenship," and "Our American Way of Government."

As a specialist in the field of alcohol education, Professor DelPopolo developed a special program at the Annandale Campus in 1971 in coordination with the Fairfax County (Virginia) Alcohol Safety Action Project (ASAP) for instructing men and women arrested for driving while intoxicated. His publication "Just One for the Road" was selected as a basic text for all class instruction. Other related writings included the editing and publishing of two issues of the "Alcohol Information Digest," a national magazine on alcohol, alcoholism, and alcohol safety. For the past 2 years DelPopolo has been invited to teach a class on "Alcoholism and Society" as an adjunct professor at the center of the administration of Justice at American University.

Among his many distinctions, honors, and special recognitions are delegate to two White House Conferences, one on narcotics and dangerous drugs (1963) and another on education (1965), a recipient of the Donald Clemmer Award for outstanding achievement in the field of correction in youth institutions (1965) and winner of several Toastmaster International excellent speaking awards.

Professor DelPopolo is preparing for future publications such titles as "Donald Clemmer—Dean of Modern Corrections," "Dictionary of Corrections," "A Glossary of Criminal Slang." "Drug Terminology—An Up-To-Date Introduction," and "Corrections, An Introduction to Crime, Criminals and Punishment."

He lives with his wife and family in McLean, Va.

NATIONAL ACADEMY OF SCIENCES RECOMMENDS CHANGES AT EPA

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. WAMPLER. Mr. Speaker, the National Academy of Sciences recently completed an analytical study of the Environmental Protection Agency's processes for acquisition and use of scientific and technical information in pesticide regulatory decisionmaking. The study was commissioned in the appropriations bill for fiscal year 1974, wherein the Congress directed the Agency to contract with the Academy for a series of analytical advisory studies (87 Stat. 468 Public Law 93-135).

In this particular study, volume VII, "Pesticide Decisionmaking," the Academy sets forth a number of deficiencies in EPA's decisionmaking processes in implementing its regulation of pesticides under the FIFRA law. Most of these deficiencies are concerned with the role or the lack thereof that science and technology plays in pesticide decisionmaking. The Academy also recommends a number of specific changes to correct and improve these deficiencies.

Unfortunately, Mr. Speaker, the Academy's study had not been completed when amendments to the pesticide law (FIFRA) were considered in committee or on the floor in either the House or the Senate. While the conferees have been named, they have not met to consider the differences between the House and Senate bills. Inasmuch as the House bill would exercise greater oversight over EPA's regulatory authority than the Senate bill, EPA's attitude toward the Academy's recommendations for changes to its decisionmaking procedures would be vital as to which bill prevails.

I have written the Administrator of EPA, Mr. Costle, and requested that he give the conferees written assurances of the actions he is taking to implement the recommendations of the Academy.

In order that my colleagues are made more fully aware of the nature of this problem, I insert the full text of my letter to the Administrator of EPA in the RECORD:

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 29, 1977.

Mr. DOUGLAS COSTLE,
Administrator, U.S. Environmental Protection Agency, Washington, D.C.

DEAR MR. COSTLE: This is to thank you for your five page reply of July 26 to my letter of June 3 seeking your assistance in preparing legislative amendments to the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, to insure that decisions made by the Environmental Protection Agency in its regulation of pesticides rested on a sound base of technical information which had been accorded the degree of independent scientific review intended by Congress.

While you pledged in your letter "that under my direction this Agency (EPA) will fully consider the best scientific data available in reaching its decisions on pesticides," you then proceeded for several pages to play down the role of science in pesticide decision-making by saying that "Pesticide decision-making is trans-scientific. That is, regulatory issues under FIFRA commonly contain scientific elements but cannot be answered by science."

I must take issue with your hypothesis that trans-science is more important in EPA's decision-making process than science. Perhaps this is the real reason there is so much controversy over the rules, regulations and decisions EPA promulgates in administering the FIFRA Act. Even the author of the article "Science and Trans-Science," Dr. Alvin M. Weinburg, is not supportive of your position and says: "In principle, one exhausts all of the scientific elements, one answers every question which can be answered scientifically before dealing with the trans-scientific residue."

The way I read Dr. Weinburg's article, he doesn't question the appropriateness of, the necessity for, nor the use of physical science input into EPA's decision-making process; to the contrary, he endorses it. The point Dr. Weinburg raises is: After the physical science input has been exhausted—then and then only does trans-science enter the arena. Here EPA "is then expected to say whether the society ought to proceed in one direction or another. The scientist and science provide the means; the politician and politics decide the ends."

The National Academy of Sciences put its finger on the problem in a series of analytical studies, particularly in Volume I, "Perspectives on Technical Information for Environmental Protection," March 18, 1977, referred to in my June 3 letter; and more specifically in Volume III "Pesticide Decision-Making," released October 20th, which concerns itself "with how EPA acquires and uses scientific information in its decision-making functions for the regulation of pesticides." Science states:

In this regard the National Academy of "The Committee on Pesticide Decision Making is concerned about the controversy over pesticides and the fact that opinions have become polarized over this issue. Furthermore, many of the arguments put forward in the controversy have failed to address the question of how problems in the regulation of pesticides can best be resolved.

Clearly, risk/benefit analyses must be used in decision making on pesticide use and control. It is not possible to state definitely the weight that should be given to scientific information in these analyses because of the many uncertainties and unknowns in the factors involved. At all stages of the decision-making process, however, EPA should have access to the best available scientific information and should obtain adequate peer review of the scientific information it uses in making decisions. EPA also must aggressively sponsor and participate in research

so that society, whose exposure to pesticides usually is involuntary, can make decisions about acceptable risks on the basis of improved scientific knowledge, especially in relation to any carcinogenesis that may be caused by the use of pesticide chemicals. These are among the central issues discussed in this report, which recognizes that the complex issues involved in the nation's effort to regulate pesticides can and must be resolved."

Additionally, the Academy has made a number of specific recommendations in its latest study, "Pesticide Decision-Making," for EPA to better acquire and utilize scientific information and thus make needed improvements in the agency's pesticide decision-making processes.

Among these recommendations are the following:

—"The carcinogenic potential of any pesticide that exceeds EPA criteria for chronic toxicity (oncogenesis) should be evaluated by cancer experts. Initially, the EPA Cancer Assessment Group should make this evaluation, and its conclusions should be reviewed by other cancer specialists.

—"EPA should sponsor research to obtain broad determinations of the levels of human exposure to carcinogens in the environment. In addition, a multiagency effort should be undertaken to develop national criteria for interpreting data on carcinogens, and for assessing the carcinogenic risks of human exposure to pesticides."

—"EPA regulations (40 CFR 162.11(a)(5)(iii) should require, and not simply permit, the consideration of benefits in determinations of whether to issue a notice of intent to deny or to cancel a registration. This would conform with Section 2 bb of FIFRA, as amended."

—"EPA should develop detailed procedures for assessing the risks and benefits resulting from the use of a pesticide and for analyzing trade-offs between the risks and benefits. In doing so, EPA should seek outside review and comment from the scientific community."

—"By emphasizing scientific data and judgment, EPA should in some instances permit use of a concept similar to that of negligible residues, as defined in 40 CFR 180.1 (l)."

—"EPA should clear all contracts and grants for research on pesticides through its Office of Research and Development (ORD) to gain better coordination and centralized technical review of the research."

—"EPA should seek publication of the results of its research contracts and grants in scientific and technical journal rather than in Agency reports."

—"OPP should take the lead in developing a modern data system to identify important sources of scientific and technical information on pesticides and to provide a reliable method for collecting, evaluating, validating, indexing and computerizing data on pesticides."

—"Each major OPP division should add at least one senior scientist to its staff; additional scientists also are needed to increase OPP effectiveness in several occupational categories, including toxicology, pathology, and the mathematical, statistical, environmental, agricultural, social and computer sciences."

In each of the above recommendations our Country's most august scientific body, the National Academy of Sciences, has made specific findings relating to your Agency's use of science in making decisions that affect pesticides. In other related volumes the Academy made similar findings and recommendations in your other regulatory responsibilities. Taken in their entirety, I believe the Academy's findings and recommendations represent a serious indictment of EPA's pesticide decision-making process. I regret that the latest study by the Academy was not available during the period this amended FIFRA Act was considered by the House Committee on Agriculture and unfortunately copies were also too late to be thoughtfully and adequately considered during the debate of the bill on the House floor. The Academy's study is now available for the Conference when we consider the House and Senate bills.

As a Conferee, I request that you give the House-Senate Conferees written assurances of the actions you are taking (together with an implementation timetable) and/or the legislative remedies required to implement the recommendations made in the National Academy of Sciences study, "Pesticide Decision-Making," to correct the serious deficiencies in your Agency's pesticide decision-making procedures.

Sincerely,

WILLIAM C. WAMPLER,
Member of Congress.

EVERGREEN ARCADE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. RODINO. Mr. Speaker, recently I had the privilege of participating in groundbreaking ceremonies for a major improvement in my home district funded by the U.S. Department of Commerce. The Evergreen Arcade, to be constructed along Central Avenue near Evergreen Place in the city of East Orange, is very important to me because it represents a new era in Federal-local government cooperation.

The mayor of East Orange, William Hart, was largely responsible for bringing together the business groups and government officials to create a revitalized downtown East Orange. When Mayor Hart came to me with the idea of building the Central Avenue Arcade-Mall I saw it as the perfect opportunity for the Federal Government to work with local government officials and community leaders. I was confident that we could get the Federal Government to support our efforts because the people of East Orange have always shown a willingness and ability to help themselves.

Let me say a few words about this section of East Orange. Central Avenue is the premier commercial street in East Orange. Its large department stores and many specialty shops are combined with professional buildings where doctors, lawyers, and investment brokers carry on their businesses.

The mall project will improve the street conditions, plant shrubbery, install new street lamps, and increase the parking facilities along Central Avenue. Not only the commercial and professional people of the area but all the citizens of East Orange and neighboring communities will benefit from this revitalization.

OUTSPOKEN WILDCATTER SPEAKS OUT

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. TEAGUE. Mr. Speaker, a longtime friend of mine, Mr. Michael T. Halbouty, is an independent oil and gas producer, better known as a wildcatter. Mr. Halbouty had a lot to say about Federal rules and regulations recently, and I would like to share his comments with my colleagues.

[From the Washington Post, Nov. 27, 1977]

OUTSPOKEN WILDCATTER SPEAKS OUT

(By Martin Merzer)

HOUSTON, November 26.—Most of the new discoveries of oil and gas are made by the major oil firms, right?

Wrong. Most of those finds are made by the nation's 10,000 independent producers, also known as wildcatters.

Wildcatters often use other peoples' money to drill for oil and gas in unlikely places; as a result, they tend to be brash, colorful people who don't much like federal rules and regulations.

Meet Michel T. Halbouty:

"I think there's a conspiracy to nationalize the petroleum industry. And once they've nationalized the petroleum industry, every other industry will become nationalized and we will become a socialist state. Why don't you write that down?" he asks.

Halbouty, in his 60s, has a tendency to speak that way—with emphasis. He wears tinted glasses and expensive suits, and his long, graying hair is combed straight back. When he appears for an interview, he sits down, crosses his legs and fixes his eyes directly on those of his questioner. The position remains unchanged for the duration of the session.

He dislikes Democrats, bureaucrats and—most of all—federal regulations.

"Instead of country of the people, by the people and for the people, we have a country that is being regulated by Washington," he says. ". . . Unless it is stopped, this country will come completely under the control of Washington. Every human facet will be regulated.

"I'm a son of immigrants. I'm a Lebanese-American. My parents came over here and, because they had the opportunity to open up a litle grocery store, they were able to survive and educate their children.

"If I had to start today as the son of an immigrant, my chances of arriving where I am would be less by 75 per cent because of the controls all over the United States. The opportunities don't exist any more."

Halbouty is one of those souls who made his own opportunities. Born in Beaumont, Texas, he graduated from Texas A&M University in 1930 with a degree in geology and petroleum engineering, and later received a master's degree in the same subjects.

He worked for various firms, building a fund that he used for oil exploration. An acquaintance says Halbouty made and lost two fortunes wildcatting before he was 30 years old.

After serving in the U.S. Army during World War II, he started the ball rolling again and is now considered one of the most successful wildcatters in history. Re-

ported to be a multi-millionaire, Halbouty is believed to have struck oil or gas in well over 100 locations.

In 1974, the last year for which statistics are available, independent producers drilled 89.2 wildcat wells, defined as test wells in previously unexplored areas. And they discovered 53.8 per cent of the oil and gas found in that year.

Like many oil men, Halbouty says President Carter's proposed energy plan does not include enough incentives for increased exploration—exploration which all involved in the controversy admit is needed to reduce the nation's heavy reliance on imports.

"Carter's plan creates a disaster upon disaster because it doesn't have anything to increase exploration or production," Halbouty says. "All he does is conserve, conserve, conserve. All conservation does is prolong the demise of the patient.

"If you don't put back into the cracker barrel what you take out, you're eventually going to reach down and there won't be any more crackers, and that's just what this program does."

Halbouty estimates that between 50 billion and 100 billion barrels of U.S. oil could be recovered if prices were decontrolled. That compares with the 110 billion barrels of oil produced in the nation's history.

Halbouty also didn't appreciate the President's remarks recently about possible "war profiteering" by oil producers and the possibility of the "biggest ripoff in history."

"I thought those were some of the most dastardly comments I've ever heard in my life coming from a head of state, especially the United States," Halbouty says. "His bill is nothing but a tax bill. He wants to raise more money to create more welfare and in turn that would create more votes, and I think that's wrong."

The administration denies all that, saying that there are ample incentives in its plan and most of the money collected through taxes would be rebated to consumers.

Is the industry holding back production, waiting for higher prices?

"Hell no!" Halbouty barks. "Nobody's holding back production. That's for the birds—especially in the independent ranks because we put money up and we want that money back!"

Are Halbouty's views representative of those in the industry? One acquaintance says Halbouty is "a bit out on the fringe." But another says he is "not so out of line with many industry types."

Halbouty himself claims that "90 per cent of the people (in the industry) feel as I do. Those in big business won't say it because they're not independent I'm an independent and I'll say what I want. There's nobody looking over my shoulder."

In 1960, Halbouty warned that the continual growth of oil imports would threaten national security.

"I can safely predict that between now and 1975 we will have an energy crisis in this country which will cause repercussions throughout the width and breadth of this great nation of ours like a devastating earthquake," he said at that time.

In 1973, the Arab oil embargo caused massive upheavals in the nation's business health and Americans' personal lifestyles. But imports are still on the rise and almost 50 per cent of the nation's oil now comes from foreign countries.

"We're in serious, serious trouble—strategically, nationally, economically," Halbouty says now. "We've got to get out of this situation or we'll find ourselves in the worst economic chaos that the world has ever known."

But despite it all, Halbouty says he's an optimist.

"I have faith in the United States people and I have faith that we'll work it out," he says. "I think there will be compromises."

BASIC HUMAN NEEDS: AN EMERGING APPROACH

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. SIMON. Mr. Speaker, the organization which lobbies in behalf of church groups for the world's hungry, Bread for the World, recently devoted a portion of its bulletin to the topic: "Basic Human Needs, an Emerging Approach to Hunger and Poverty."

What was of particular interest to me was the reference to the specific goals in the area of basic human needs. Just as we in Congress ought to have a specific goal of eliminating involuntary unemployment within the Nation and should move much more vigorously on that, so the specific goals outlined in their bulletin, it seems to me, are both desirable and attainable for our world by the year 2000. They suggest these goals:

First, An average life expectancy of 65 years or more (at present 50 years on average in the poor countries as a group);

Second, An average literacy rate of 75 percent (at present 33 percent);

Third, An infant mortality rate of 50 per 1,000 (currently 125); and

Fourth, A birth rate of 25 or less per 1,000 (currently 40).

I hope my colleagues will take the time to read this significant comment on our world; where we are and where we must go.

BASIC HUMAN NEEDS: AN EMERGING APPROACH TO HUNGER AND POVERTY

President Carter's interest in world hunger comes at a time when basic approaches to hunger and poverty are being re-examined. The food crisis of several years ago stimulated this new concern. So has the fact that recent bumper harvests worldwide have meant little change for an estimated 450 million or more victims of chronic malnutrition. The Vietnam war played a part, too, by revealing the near bankruptcy of U.S. policy toward poor countries—seen for example in 1974, during the height of the famines, when most of this country's dwindling food aid went to South Vietnam and other countries where security, not hunger, was the primary consideration.

The search in Congress for "new directions" in foreign aid, the Right to Food resolutions, and various major reports, such as the National Academy of Sciences' World Food and Nutrition Study, both reflect and have spurred the re-examination of strategies against hunger and poverty. That assessment continues within every public policy group, including Bread for the World, that gives substantial attention to world hunger and poverty.

The Administration is obviously not alone in trying to develop a better way of responding to hunger and poverty. But President Carter is in a unique position to offer leadership, and therefore current White House interest in piecing together a new response to hunger presents an exceptional opportunity, as well as the considerable risk of flawed conclusions.

AGREEMENT ON A GOAL

Fortunately the Administration is considering a new initiative at a time when this fairly broad consensus has emerged: that hunger and poverty should be countered by a direct effort to meet certain basic human needs of the poorest billion people on earth. The same consensus does not exist, however, regarding a strategy for meeting those basic human needs.

The area of agreement begins with an understanding that hunger cannot be effectively addressed unless we deal with the poverty from which it emerges. Hunger can exist side by side with food surpluses, if people cannot afford to buy the food they need. An isolated focus on food production, food aid, population growth or any other single facet of the problem will not work. People are hungry because they are desperately poor. Their poverty can be overcome only through an interlocking package of measures that will enable poor people to improve their standard of living.

In addition, there is widespread agreement that economic growth by itself will not end hunger and poverty. Brazil's astounding growth rate for the past decade made it the "economic miracle" of the developing countries, but its growth almost completely bypassed the poor majority. In most developing countries economic gains tend to benefit those who are already prosperous, seldom reaching the very poor. For the most part they are isolated from the modern economic sector, often condemned by the development process itself to remain poor.

"In retrospect, it is clear that too much confidence was based on the belief that rapid economic growth would automatically result in the reduction of poverty—the so-called 'trickle down' theory," said World Bank President Robert McNamara in his recent annual address to the bank's board of governors. He added, "There has been growth; in some countries very rapid growth. But it has not notably helped the severely disadvantaged break out of their poverty."

Thus the experience, both good and bad, of poor countries since 1950 has paved the way for a widespread opinion among development specialists that growth must occur at the bottom, among the poorest fourth of the world's population, and that development policies must assure that such growth helps impoverished people meet their most fundamental needs. This basic human needs approach has become a development goal around which broad agreement now exists. It has gained currency in, among other places, the Administration. There it has become "routine rhetoric," according to Washington Post columnist Stephen Rosenfeld, who calls it "Carter's grandest idea." The White House appears to be testing the idea for public reaction, while key aides are drafting tentative proposals.

DEFINING BASIC HUMAN NEEDS

What are included in basic human needs? The 1976 World Employment Conference, the first major international gathering to propose basic human needs as an essential approach to development, produced a comprehensive definition. Basic needs, it says, include two elements:

First, they include certain minimum requirements of a family for private consumption: adequate food, shelter and clothing, as well as certain household equipment and furniture. Second, they include essential services provided by and for the community at large, such as safe drinking water, sanitation, public transport and health, educational and cultural facilities.

Not surprisingly the conference also emphasized employment "both as a means and as an end." Employment, it stressed, "provides an income to the employed, and gives the individual a feeling of self-respect, dignity and of being a worthy member of society."

A narrower definition of basic human needs is now being widely discussed in Washington. This definition, which comes from Reshaping the International Order (the Tinbergen report) and has supporters at the World Bank, the Overseas Development Council and within the Administration, sets four quantitative goals to be met by the year 2000:

1. an average life expectancy of 65 years or more (at present 50 years on average in the poor countries as a group);

2. an average literacy rate of 75 percent (at present 33 percent);

3. an infant mortality rate of 50 per thousand (currently 125); and

4. a birth rate of 25 or less per thousand (currently 40).

These objectives target hunger implicitly, because it would be improbable to reduce infant mortality rates so sharply and increase life expectancy so much without also eliminating most malnutrition. The experiences of China, Taiwan, South Korea and Sri Lanka are cited among countries that in 1950 were extremely poor, but have since reached these targets.

PROBLEMS AND POSSIBILITIES

So while there is wide agreement on meeting basic human needs as an overall aim of development, two definitions of basic human needs have been proposed. The second and narrower of these contains very specific targets and, therefore, the beginnings of a strategy. Although both definitions of basic human needs have considerable moral and humanitarian appeal, the narrower approach has special attractions and dangers. Among its assets:

1. It names four precise goals—a digestible list.

2. It sets a timetable for achieving those goals.

3. It would include especially vulnerable persons who might be left out by a strategy that concentrated heavily on employment and income.

4. It might more easily gather public support, attract a solid national commitment, and lead to a "global compact" among nations to rid the world of hunger and poverty.

At the same time, this approach also brings with it real or potential liabilities that raise the following questions:

1. Would it evolve along lines that encourage dependency and foster a permanent substrata of global welfare recipients, who should instead be assisted toward self-help development?

2. Does this approach risk becoming a panacea that will attract enthusiastic support at first, but lead to frustration when the problems prove more complex and intractable, and the solutions more costly than expected? Would the temptation—perhaps even the need—to gather public backing produce such a scenario?

3. Would this approach take sufficiently into account the social, economic, cultural and physical diversity of each country, as well as the need for more data and further analysis of factors that in combination could either prevent or enable the meeting of human needs?

4. Would this approach sufficiently respect the need for a variety of development strategies? Or would it attempt to lock countries into Western economic and political preferences?

5. Could this approach be used as a substitute for international economic reforms being sought by the low-income countries—a way for rich nations to "buy off" the poor at a lower cost? Or would it be integrated with such reforms?

6. Would this plan ensure that people at the local level, especially small farmers and laborers, take part in making decisions and developing their own institutions? Or at this point would development revert back to the trickle down process and ignore the importance of local initiative.

Many other questions could be asked about this—or any other—development effort aimed at meeting basic human needs. How can we be sure that assistance will reach those in need? that it continues, in order to enable long-term planning? that it is not politicized?

These questions do not discredit either definition of basic human needs, but they do indicate some of the pitfalls. No matter what approach is devised, much depends upon the the assumptions that lie behind it, the depth of commitment for it and the thoroughness with which it is pursued. It is simply too early in the Carter Administration to get a fair reading on these counts. The signals so far are mixed, though President Carter seems far more receptive than was President Ford to a serious global effort against hunger.

The picture, in brief, is one of support coalescing around basic human needs as the appropriate development goal, but without any clear agreement yet on the strategy or strategies needed to accomplish that goal. We know what does not work. We know what does need to happen, at least in broad outline. But no one has absolute clarity about how it should happen.

This gives us a rare opportunity to influence the President on world hunger. The fact that serious questions remain to be answered should not be viewed as a liability, but as a chance to help shape policies during coming months and years. In this connection we can hope that if a major proposal does come from the Administration (and that is by no means certain) it will explain the complexity of the task, as well as our own limitations, and invite further discussion.

Meanwhile we can urge President Carter to place the full weight of his office behind the struggle against hunger, knowing that if he does, Bread for the World will have an even greater opportunity to help formulate and lobby for public policies that will implement the right to food.

A FEW COMPONENTS

In short, we welcome the mushrooming interest in a basic human needs approach to hunger and poverty. That all the answers about it aren't in doesn't mean that none of the answers are in. The list below sketches a few of them:

1. Development should not foster dependency, but self-reliance and human dignity. Insofar as possible, it should enable the poor to work their way out of hunger and to participate in decision-making concerning this process.

2. Food production must sharply increase in the poor countries, at this stage primarily through modern, labor-intensive technologies made available to subsistence farmers and smallholders.

3. Farming should meet local, domestic food needs before crops are produced for export sale—unless it can be shown that profits from export cropping are being used to reduce hunger and poverty more effectively than would the growing of food for domestic consumption.

4. An internationally coordinated food reserve system should be negotiated as soon as possible, including one program for emergencies and another for stabilizing the supply and price of grain.

5. Reforms within poor countries should move toward: (a) full employment, with a stress on labor-intensive industries to match the policy on farming; (b) more even distribution of income; (c) ownership and control of land by small family farmers; and (d) making basic health care and education available to all.

6. International economic reforms are needed, including agreements to stabilize the price and supply of commodities, expand trade opportunities, and increase capital flows to low-income countries without piling up their debt burdens.

7. Economic aid from high-income countries should (a) reach at least 0.7% of GNP; (b) be attached to very specific criteria aimed at achieving adequate nutrition and other basic human needs; (c) be depoliticized; (d) go increasingly in the form of grants rather than loans; and (e) be withheld from use in export cropping, except under the conditions mentioned (No. 3).

8. Food aid should go only for emergencies, unless directly linked to increasing small-farm food production.

9. Research should help smallholders, promote in-country capability in research and its application, seek high-yielding strains more responsive to the sun, rainfall and soil conditions in poor countries, and be environmentally sound.

10. Efforts to eliminate hunger and poverty in the United States must be compatible with the above approach, especially stressing reforms that lead to full employment, better income distribution and self-reliance.

TOWARD A MORE CONSISTENT HUMAN RIGHTS POLICY IN AFRICA

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BONKER. Mr. Speaker, I have obtained information which indicates that the United States is continuing to provide valuable assistance, both directly and indirectly to the Government of Uganda. In fact, there is reason to believe that some members of Idi Amin's personal execution squad, the "State Research Bureau," and the Ugandan military have received technical training here. Not only are we helping to train Idi Amin's forces, but we are also supplying them with sophisticated equipment, such as airplanes and communications systems, helping them to operate and maintain this equipment, and providing them with the foreign exchange to pay for all these services through our trade relations. All this has been taking place despite recent authoritative reports that the abysmal human rights situation in Uganda is deteriorating even further.

I do not believe that the United States can remain credible as a leading proponent of human rights without taking steps to completely disassociate itself from the Ugandan Government and the acts of genocide it is perpetrating on its people. Therefore, I am introducing a concurrent resolution calling on the President to take immediate steps to discourage activities which benefit the Ugandan Government in any way.

The United States is not alone in its concern about the situation in Uganda. Many Africans, including the All-Africa Conference of Churches, have expressed their outrage at the killings and called

for international action to discourage further acts of repression.

I share many of my colleagues' concern about inconsistencies in the U.S. human rights policy in Africa. Recently Congress passed a resolution by an overwhelming margin, expressing our deep concern about repression in South Africa. While the resolution did not recommend any specific actions, it provides a foundation on which we can build in the future. However, without a more even-handed and consistent approach, our complementary responses to human rights violations in both black- and white-ruled parts of the African Continent are likely to suffer. We should not focus on egregious human rights violations in Africa in such a highly selective manner that we call into question the legitimacy of our concern about these violations.

BILL AMENDS FEDERAL RECLAMATION LAW

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. LUJAN. Mr. Speaker, this bill amends Federal reclamation law by increasing the acreage limitation, removing Federal subsidies from water delivered to excess lands and mandating the use of class 1 equivalency formulas on all irrigation projects.

The bill is vitally needed by western farmers who are faced with the imminent possibility of having their irrigated land holdings broken up into 160-acre plots to be sold at give-away prices through a national lottery. Swift passage of this bill will stop that scheme in its tracks.

For 50 years, the law has limited delivery of Federal water to farms of 160 acres or less per owner. But every administration since 1926 has ignored that law, permitting farm size to keep pace with modern farming technology. Now, after 50 years of Federal encouragement of farm growth, this administration has reversed that policy and intends to cut farm size back to the 1926 level of 160 acres.

Studies by New Mexico State University show that a farmer on the Rio Grande cannot buy and operate a farm on the income from 160 acres. It would require a farm at least three times that size to permit a family to survive economically.

This bill triples the basic eligible farm size to 480 acres. Further, it permits a farmer who owns more land than that to buy Federal water, providing he pays full price for that water, without subsidy.

Under the old law, a man and wife could own 320 acres, and each of their children could own 160 acres each. This family ownership pattern is retained in this bill, except that the amount of acreage in each case is tripled. This will permit children who grow up on a farm and who wish to remain on the farm to do so and still earn a living.

The final provision of this bill authorizes the Secretary of the Interior to renegotiate existing contracts with irrigators—at the option of the irrigators—to bring the provisions of the contracts into line with the new provisions of this bill. In other words, an existing contract limiting deliveries of water to 160-acre plots could be renegotiated to permit deliveries to 480-acre plots.

Mr. Speaker, this bill represents a positive and workable congressional response to the dilemma that western irrigators now face through no fault of their own. As ranking minority member of the Water and Power Subcommittee of the House Committee on Interior and Insular Affairs, I can assure my colleagues that our committee is committed to changing the basic reclamation law to bring it into line with the facts of modern farming. This bill will do that and I earnestly hope it will receive swift and positive consideration.

WARD SINCLAIR, FRONT PAGE AGAIN

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. CARTER. Mr. Speaker, for the second time this week a front page article by Ward Sinclair has appeared in the Washington Post.

While Ward's byline is perhaps unfamiliar to some here in Washington, for 10 years his stories appeared in the largest newspaper in my State, the Louisville Courier-Journal.

Ward covered our congressional delegation as Washington bureau chief for that paper, and I think that I speak for my colleagues when I say that we respected him; we respected his ability and we respected his uncompromising integrity. That is not to say that we always enjoyed seeing our names in some of his stories, but we knew that they were always written fairly.

His knowledge of the concerns of Kentucky, especially in eastern Kentucky which I represent, and his empathy with the little guy affected by events which became news gave an added human dimension to the fine coverage he provided his readers.

I regret that the people of Kentucky no longer will be able to enjoy his talent in the Courier-Journal, but I wish him well in his new job. He is a fine journalist and a credit to his profession.

Mr. Speaker, I include for the RECORD a copy of Ward Sinclair's story from today's paper.

A HEAD-ON COLLISION—NADER ANGRILY DENOUNCES A FORMER ALLY

(By Ward Sinclair)

For years they were the one-two punch of the consumer movement, he blasting away at the corporate robber barons and she adroitly lobbying on Capitol Hill.

It ended yesterday with the finality of two Corvairs totaling each other—head on.

Ralph Nader demanded that his close friend and erstwhile chief lobbyist, Joan Claybrook, resign as head of the National Highway Traffic Safety Administration.

In a word—actually, in an 11-page, single-spaced "Dear Joan Claybrook" letter—Nader said she has been, in her eight-month tenure, a failure.

Just as resolutely, Claybrook responded that she has no intention of quitting. She said she promised President Carter she would serve four years and that she will honor the pledge.

What's more, Claybrook added in a brief statement handed to reporters, she is proud of her accomplishments at the NHTSA, although she genially conceded "we still have a long way to go."

And in a subtle dig at her old crony, Claybrook said she is "fully aware" of the complexities of running a regulatory agency, an experience Nader has not yet had—from the inside, at least.

Transportation Secretary Brock Adams, her boss, quickly spoke up in support of Claybrook, calling her "the kind of person who gets things done."

Then, maybe echoing the consumers who looked to Nader and Claybrook as their gurus, Adams said he thought it "sad that two of the leading safety advocates in the country have to be split by this kind of thing."

Before Claybrook, a 40-year-old Baltimore native, was nominated by the President in March, she was director of Congress Watch, a Nader organization that lobbies and monitors Capitol Hill.

She was one of Nader's closest personal friends, and shared with him the policy and personnel decisions affecting the Nader public-interest groups.

In his lengthy, itemized indictment, thoroughly as tough as any of the dozens he has launched against corporate captains and bureaucrats, Nader charged that Claybrook has "etched a trail of averted or broken promises" in highway safety.

He said that she took the job full of idealism and knowledge about "the neglected potential of the 1966 auto safety law" but that she had fallen far short of meeting her promise to turn NHTSA into a model agency.

Nader listed nine of Claybrook's previous positions, each a tough stance on different facets of highway safety, and then compared them with her performance.

"This is more than a failure of leadership; it is a failure of nerve," Nader said. The issue, he added, is not that specific goals have not been met but that "nothing has been initiated toward so many of those goals."

Nader's chief complaint was that Claybrook had disagreed philosophically, yet publicly supported Secretary Adams' decision this year to allow the auto industry to delay a phase-in of passive safety restraints, such as airbags, until the 1982 model year.

"You did not believe in this decision. Yet, you supported and defended it against your well-known conviction that a requirement for across-the-board 1981 model year was ample lead time for even the footdragging of the auto companies," Nadar wrote.

"Through a profound mismanagement of NHTSA's role in the decision, you undermined the regulatory integrity of your own agency," he added.

Claybrook's brief, written statement did not respond to specifics of the indictment. But she said the Carter administration "has done more than any other in advancing the cause of highway safety."

Among Nader's other complaints:

The agency has done nothing to fill the gaps in safety standards for vans and light trucks of which more than 3 million are sold annually, despite Claybrook's belief in such standards.

Claybrook apparently has changed positions on the need for "dynamic test requirements" for safety belts. He said she is now "negative" on the issue.

She has failed to live up to her belief that tough, competent advocates should be re-

cruited into the agency—advocates who would have the fortitude to criticize their superiors when necessary.

"Resignation, accompanied with full explanation and revelation, is now your most constructive course of action . . . Returning to the citizen movement will permit you to have far greater impact . . . than your current incarceration of spirit and behavior," Nader concluded.

Yesterday afternoon Nader showed up uninvited at an impromptu meeting Claybrook held with reporters. He listened to her read her response, and then, with a smile, asked a technical question. She answered.

Then the bureaucrat under attack went to a meeting. Ralph Nader conferred with reporters in the hall.

ILLEGAL ALIENS EARNING MILLIONS AND RECEIVING MILLIONS MORE

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. ASHBROOK. Mr. Speaker, the entry of illegal aliens into the United States poses a growing problem. An estimated 7 to 10 million illegal aliens are already within our borders. And hundreds of thousands more are pouring in every year.

This flood of illegal aliens adds to our unemployment problem. It also costs our taxpayers billions of dollars every year in lost earnings and taxes, in welfare benefits and public services.

Some idea of the economic cost of illegal aliens can be seen by looking at the State of Virginia. According to the Immigration and Naturalization Service, there are at least 40,000 illegal aliens in Virginia alone. More than half of them have good paying jobs they are not entitled to.

As a result, Virginians suffer an estimated $140 million in lost earnings annually to illegal aliens. Another $45 million goes out in the form of unemployment and social service benefits. This means an overall loss of $185 million a year in the form of wages and public service benefits.

A recent General Accounting Office study produced similar bad news. According to the GAO, abuse of Federal welfare payments by aliens in five States alone costs taxpayers more than $72 million a year. In these five States—California, Florida, New York, New Jersey, and Illinois—more than 37,000 aliens received $72.3 million in supplemental security income payments in 1976.

Our Nation can ill afford such heavy losses. That is why I have introduced legislation to deal with the illegal aliens by reducing their employment possibilities and by strengthening the border patrol. I urge Congress to consider this or similar legislation as soon as possible.

Following is an article from the November 26 issue of Washington Star that discusses the illegal alien situation in Virginia:

ILLEGAL ALIENS EARNING MILLIONS—20,000 HOLD JOBS IN VA.—AND THE JOBS ARE GOOD ONES

RICHMOND.—Virginia may be surrendering as much as $185 million a year in wages and public service benefits to ineligible aliens.

Thousands of Virginians are on welfare rolls because jobs they otherwise could have are being held illegally by non-citizens.

Immigration and Naturalization Service officials estimate there are at least 40,000 illegal aliens in Virginia, and more than half of them have good paying jobs they're not entitled to.

"Most of the illegals in Virginia have good jobs paying above minimum wage," said Charles Seamon of the INS Norfolk office. "Most of the illegals we've apprehended have jobs Americans would love to have," he added.

Exact figures on the number of aliens illegally employed in Virginia are hard to come by because, as a recent magazine article noted, it's mostly a "silent invasion."

"We have no precise figures but we know they're there, and they're showing up more and more all the while," said William C. Bobbitt, Jr., manpower services coordinator for the Virginia Employment Commission.

He said there's little truth to the popular notion that aliens flock to menial jobs unwanted by most Americans such as domestics or fruit pickers.

Records reveal illegal aliens in Virginia as a $30,000-a-year physician, a ski instructor at one of the state's most popular resorts and a teacher at a prestigious private school.

"Even we got caught in this," Bobbit said, recalling that a VEC unemployment claims officer turned out to be an alien with no right to hold the job.

It's roughly estimated Virginia's annually lose earnings totaling nearly $140 million to illegal aliens.

Ironically, many aliens collect unemployment benefits upon losing jobs they had no right to in the first place. Unemployment and social service benefits enjoyed by ineligible aliens in Virginia may exceed $45 million a year.

The combined total of $185 million in wages and benefits is more than Virginia gets each year from corporate income taxes, at least a third of a year's state sales tax proceeds and six times more than the annual tax on alcoholic beverages.

INS officials said the problem is compounded by the fact that many aliens illegally employed evade personal income taxes and send home large portions of their earnings that otherwise would help prime the state's economic pump.

Bobbitt said many of the offenders are aliens who jumped ship somewhere, slipped across the Mexican or Canadian borders or otherwise entered the country illegally.

But many more are aliens who came here on student, visitor or diplomatic visas and then "just disappeared."

He emphasized that some aliens are legally entitled to employment in this country, but most are not.

While Mexico, Canada and a variety of central American countries contribute to the majority of illegal aliens in this country, the broad spectrum includes virtually every nation.

Bobbitt said Virginia is one of a relatively small handful of states trying to do something to halt the silent invasion of its work force.

The 1977 general assembly passed a law making it a crime to knowingly employ ineligible aliens. A violation could bring a $1,000 fine or a year in jail, or both.

Since July 1 the prohibition has applied only to private employers, but after Jan. 1, 1978, it will apply to government employment as well.

Under the law, employers are urged to ask every job applicant whether he or she is legally eligible for employment in the United States.

Aliens will be required to furnish INS documents proving their eligibility.

Bobbitt serves on a committee comprised of VEC, State Chamber of Commerce and labor and industry representatives looking for ways to ensure the law's effectiveness.

He said the chief thrust will be an educational program aimed mainly at employers.

The State Chamber of Commerce already has taken the lead in beginning statewide distribution of a pamphlet entitled "Questions and Answers About Illegal Aliens in Virginia."

It describes the problem, spells out the law and suggests ways of compliance.

Bobbitt said few employers "knowingly" give jobs to illegal aliens.

"When someone applies for a job, you tend to automatically assume he or she is entited to work," he said.

"But under the new law," he added, "you're either going to have to confirm the right or run the risk of violating the law. "Once we educate employers that they're liable for a fine or jail sentence, I think we'll have gone a long ways towards curtailing the problem." Bobbitt said.

AMBASSADOR ANDREW YOUNG

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. FAUNTROY. Mr. Speaker, Ambassador Andy Young recently spoke at a press conference in Haiti on the subject of human rights. His remarks, I believe, were quite profound, and I wish to share them with my colleagues.

The article follows:

ANDREW YOUNG STATEMENT

I come here this morning to share with you the concerns of the American people. Our statement is not so much a judgement on you or your country but in a sense a judgement of ourselves. For it has taken us almost two hundred years to realize certain things about life, liberty and the pursuit of happiness. We attempted, I think, for much of that period a compromise on our basic principles, and for almost half of our history those principles and concerns were denied to people who were black.

For even longer we did not understand the full implication of those principles for women in our society. In our pursuit of wealth and power, we took for granted basic human rights. And I think we neglected them to our own peril. For in the past decade we found this government of which we are so proud having been responsible for the creation of and propping up of many of the military dictatorships and most corrupted governments of the world. The American people found their tax dollars for which they worked very hard going abroad only to make the rich richer, and essentially not contributing very much to the poorest of the poor.

We found military assistance creating military dictatorships that imprisoned their own citizens and denied them all human rights, all legal processes. We heard stories of our allies, very well documented, of savage practices of torture. We ourselves in Vietnam contributed to the destruction of almost an entire region. And the American people in 1976, in the election of Jimmy Carter as President said: "No more." That we would use the resources at our command to help the poor, to bring freedom in the world, and hopefully to be responsible for extending the kind of human rights around the world that we have come to feel are the very essence of our society, the basis of our success and also the inspiration for our future.

I am here in Haiti simply to share that message with the people and with the gov-

ernment of Haiti. We have no intention of interfering or through clandestine actions encouraging efforts that go against your government's policies, whatever they may be. But we do intend to share our experience that imprisonment of the voices of freedom and dignity among the society, denying them access to their families, treating them with brutality, does not do anything to further the growth and development of a country. In fact it contributes ultimately to its downfall. We would hope that in the context of the Organization of American States the Government of Haiti would avail herself to the Interamerican Commission of Human Rights, and that the progress that has been espoused by the President might find technical assistance and guidance in implementation, so that human rights in Haiti could become an immediate reality, and that you would not have to suffer the 200 year struggle that we did.

For the barriers that we experienced on the basis of race are equally as tragic when they are experienced on the basis of class or when the urban population is attended to and the rural population neglected. Yesterday we were in the Dominican Republic and the President of the Dominican Republic told us that it was his intention to sign the Convention on Human Rights. And that while they too are not perfect, they accepted the ideals of human rights and civil liberties and were pledged to work in that direction.

I think that we also see human rights, in addition to the right to vote, the right to free speech, the right of freedom of religion as simply the right to eat. For the basic economic right to survival has to be considered as the most fundamental human right and in order for that human right to be realized, then every honest attempt to share the existing wealth and resources has to be utilized and that those who have been entrusted with the authority of feeding the hungry necessarily must be the ones by their own sacrifice, their own dedication and their own honesty see to it that the hungry are fed, and that the sick are healed, and that those who have not had the opportunity of education be brought into the mainstream of modern intellectual life.

We know that these are ambitious goals but we pledge ourselves not only for the United States of America, not only to the Western Hemisphere, but we pledge ourselves to work with our friends and our adversaries alike to protect the basic human rights of the ordinary people, the little people. What Martin Luther King used to call "The least of these our brethren" and we would hope that we would have the support of the Haitian Government and of the Haitian people as we attempt to make this entire world a more civilized place.

WINTHROP COLLEGE—MODEL UNITED NATIONS

HON. KENNETH L. HOLLAND

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. HOLLAND. Mr. Speaker, a fine university in my district will be the host of an innovative learning project in the coming year, and I would like to take a few moments to share it with my colleagues of the House:

WINTHROP COLLEGE—MODEL UNITED NATIONS

Winthrop College, located in Rock Hill, South Carolina will host a Model United Nations April 19–22, 1978 on the Winthrop Campus. This higher education simulation project will pair the talents of high school and college students.

Delegations from more than 50 high schools will convene at Winthrop for participation in this substantive educational experience. I am proud of the ongoing efforts of the faculty and student population at this fine institution of higher learning in my District in encouraging our youth to become more involved in international concerns.

This Model U.N. Conference is supported and aided by a host of international diplomats led by Geoffrey F. Bruce, Minister and Deputy Permanent Representative of Canada to the United Nations. Again, Winthrop's initiative in enlisting the support of international diplomats is commendable and I want to recognize all those responsible for arranging this Model U.N., especially the students at Winthrop through their Student Government Association.

HUMPHREY-HAWKINS IS A FRAUD

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mrs. HOLT. Mr. Speaker, the Humphrey-Hawkins bill is apparently with us again. Originally conceived to establish national economic planning and control by large central bureaucracies, it represented a terrible threat to future economic freedom and growth.

The Carter administration is reviving it in modified form. In fact, it is so diluted that it is difficult to perceive what it would do. The Baltimore Sun of November 16, published an excellent editorial in which the concluding sentence makes this point: "It threatens an open-ended lurch into nothing or too much."

I submit this editorial for the consideration of the House:

HUMPHREY-HAWKINS IS A FRAUD

The White House has a problem: The more realistic it tries to make the Humphrey-Hawkins "full employment" bill, the more fraudulent it becomes.

To ease the President's distaste for the measure and concoct a bill that might get through Congress, the administration got the Black Caucus, the AFL–CIO and other Democratic interest groups to agree that H–H would be more exhortatory than programmatic. That means a much ballyhooed "goal" of 4 percent unemployment by 1983, but no requirement for specific steps to achieve it. Mr. Carter would not have to acknowledge the 4 percent figure is unattainable—if it becomes so—until after the 1980 elections. So much for political fraud.

Now for economics. Many experts, including Mr. Carter's chief economic adviser, Charles L. Schultze, have long believed that a government commitment to Humphrey-Hawkins unemployment goals could be achieved only through highly inflationary policies. So, to calm the President's fears of inflation, the compromise Humphrey-Hawkins bill also commits the government to "price stability." There are no numbers applied, thus making anti-inflation aspirations even more rhetorical than unemployment goals. So much for the economic fraud.

Perhaps because it is such a phony, the Humphrey-Hawkins bill may be pigeon-holed by Congress or ignored if, per chance, it is enacted. This would not speak very well for the legislative process, but then, as the White House tells us, the measure is largely symbolic anyway. But what if it turns out to be more than symbolic? What if it becomes an irresistible political force, despite Mr. Carter's prudent efforts to render it harmless? What then?

Hypothetically, at least, the Humphrey-Hawkins measure could force not only the White House and the Congress, but the Federal Reserve Board as well, to shape government economic policies to achieve arbitrary unemployment goals. This, in turn, could mandate a degree of government central planning and, quite probably, wage and price controls that many Americans would find oppressive.

In our view, the Humphrey-Hawkins bill should be junked in favor of economic policies that can produce results in a free society. Seven million new jobs have been created in this country since the current recovery began 2½ years ago. Joblessness has remained stubbornly at or above 7 percent because of an unprecedented influx of women into the work force and because so many black teenagers have been denied opportunity. They can be given work only if the private sector expands and if the government combats hard-core unemployment with job training and temporary employment programs. Humphrey-Hawkins does none of these. It threatens an open-ended lurch into nothing or too much.

IN MEMORY OF MRS. MAJORIE LYNCH

HON. JOHN BUCHANAN

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BUCHANAN. Mr. Speaker, on November 8, Mrs. Majorie Lynch, former Under Secretary of the Department of Health, Education, and Welfare, died in Tacoma, Wash., of cancer. It was with much regret that I learned of the untimely death of such a distinguished woman, who was dedicated to serving a country which she cherished. I join the many of her friends and family who mourn the loss of this devoted woman, administrator, and legislator.

Mrs. Lynch was named by President Ford as the Under Secretary of HEW during Dr. David Mathew's tenure as Secretary. She took office on November 13, 1975, and held the position until early this year, when she became associate vice president for extended services at the University of Alabama.

A native of London, England, Mrs. Lynch came to the United States in 1945, and resided in the State of Washington where she was active in many community services including the Red Cross, the Heart Association, and the chamber of commerce. From 1971 to 1974 she served with ACTION, the agency responsible for administering all of the federally funded volunteer programs. She served 10 years in the Washington State Legislature, 5 years as the chairman of the higher education committee. Her legislative record includes: Group homes for the mentally retarded; licensing child care agencies; mandatory education for the handicapped; State scholarship programs; and particular concerns for the problems of mental retardation, mental

health, and child abuse. She came to HEW from her position of Deputy Administrator of the American Revolution Bicentennial Administration, where she served from October 1974 until the HEW appointment.

The impact of her efforts will be felt for many years to come. I know that my colleagues share the sorrow of her death and join with me in extending sympathy to her family.

AMTRAK FUNDING

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. YOUNG of Florida. Mr. Speaker, a parliamentary situation prevented me and my colleagues from offering debate on the motion of the gentleman from Tennessee (Mr. GORE). Therefore I use this method to record the debate I was prevented from delivering in person.

Mr. Speaker, I rise in support of the motion to recommit the conference report on H.R. 9375, supplemental appropriations, fiscal year 1978 to provide additional funding for Amtrak and to agree with the Senate amendment which appropriates $18 million for Amtrak. I am convinced that the passenger rail service provided by the Floridian from the Midwest to Clearwater and St. Petersburg, as well as to Miami, is an important service, and I am very anxious to do everything possible to see that this service is not only kept operating, but also improved and promoted so that it may operate more efficiently in the future.

Nevertheless, I am disappointed in Amtrak's poor record of service along the route of the Floridian, especially when that service is compared to Amtrak's performance along the Northeast Corridor. It is almost as if the Wright Brothers' first airplane was being used alongside the Boeing 747. The Midwest to Florida route is not given the attention it needs to become self-sufficient and attractive, and it is not right to hold those persons dependent on rail service hostage while Amtrak officials continue their money demands to Congress. Maybe the time has come for Congress to determine if the Amtrak experiment is a failure.

For example, Amtrak's Board of Directors ordered suspension of the Floridian on November 16, 1977, because of a lack of money. Prior to this announcement, Amtrak conducted 12 public hearings and received numerous comments from interested persons, associations, and State and local officials. One of those hearings was held in St. Petersburg, and there, as in other communities, the comments received overwhelmingly supported the Floridian, and most suggested rerouting the train through Chattanooga, Atlanta, and Savannah, as well as suggesting service improvements. The Board thus proceeded to designate this preferred new route for the Floridian only if the funds were made available.

In addition, Amtrak today informed me that it has begun to seek public comment on five other lines in the Midwest and West which are being identified as candidates for potential service changes or elimination. It is thus possible that these trains and their riders—the Empire Builder, the North Coast Hiawatha, the Lone Star, the Inter-American, and the San Joaquin—will suffer the same fate as the Floridian.

Before the fiscal 1979 appropriations are considered, the Department of Transportation and Amtrak are to complete a comprehensive reexamination of Amtrak's route structure. This report, due early next year, would enable Amtrak and the Congress to analyze the routes more closely. Perhaps we will then find that the Amtrak experiment is not a viable alternative to providing needed rail passenger service for our country. But, until then, I do not believe that Amtrak should arbitrarily begin reducing rail service throughout the United States. Therefore, I urge the House to recommit the conference report so that instructions to Amtrak to continue to operate the routes now in operation can be made.

FINLAND'S 60TH ANNIVERSARY OF INDEPENDENCE

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. JEFFORDS. Mr. Speaker, in the aftermath of our own country's Bicentennial celebration, it seems appropriate to direct the attention of Members to another Republic which has enjoyed remarkable staying power, Finland.

On December 6, Finland marks the 60th anniversary of its independence. This is a significant event for 4.7 million citizens of that nation and for 400,000 Americans of Finnish descent. In this rapidly changing world, the continued stability of a government which recognizes basic rights and freedoms of its people should be a source of encouragement for all of us.

Although Finland is a neutral nation, it has played an active and constructive role in world affairs. It has provided neutral ground for the SALT talks, and provided the initiative for the Helsinki accords, signed by 35 nations including the United States.

Finland's cultural contributions are numerous, and have enriched our lives in many respects. Random examples include the music of Jean Sebelius, the architecture of many magnificent U.S. buildings including Washington's Dulles Airport, and the Finnish sauna which has become so popular in this country.

Our Governments have enjoyed an open and friendly relationship since 1919 when President Hoover sent ships of food to Finland—a loan which has been promptly repaid—and persuaded the Allied governments to recognize Finland's independence.

The winning and maintaining of Finnish independence is a magnificent achievement, which deserves the attention and recognition of all of us in this Chamber. I would like to quote briefly from a recent letter I received from Dr. Karl A. Kurt of Charlotte, Vt., chairman of the Finnish American Cultural Institute:

It is the recording of Finland's 60th anniversary by the United States Congress, the highest recognized 'freedom peer group', that will witness Finland's greatest contribution to others. Independence is worth preserving, though sometimes the cost can be staggering. December 6th is certainly a day for Finnish Americans because of personal identification. It is at the same time a day Americans of all heritages may rejuvenate their belief in our priceless freedoms

MORE ON THE RUSSIAN "STING" FROM OKLAHOMA

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. SYMMS. Mr. Speaker, yesterday I placed in the RECORD two articles relating to the so-called Russian "sting" and grain robbery.

Reprinted below is an article written by Herb Karner of the Tulsa World for November 14, 1977, which sums up his concern for the Carter administration's handling of the recent Russian grain purchases. Mr. Karner quotes Bridgewater Associates, a commodity advisory service, a portion of which concludes:

So by USDA keeping quiet and not announcing the information on a short Soviet crop, Bridgewater ends by saying, "USDA either wants us to believe that they're incredibly naive or that they wanted to help the Russians book cheap grain, because these are the only two possible alternatives."

FENCE TALK

(By Herb Karner)

Whose side is Secretary of Agriculture Bergland on anyway? It appears action of USDA in the recent Russian grain purchases favored the Soviets against the best interests of American agriculture.

Recently in a speech celebrating the 60th anniversary of the Soviet Union, Leonid Brezhnev announced that the total USSR grain harvest for 1977 was only 194 million tons—21 million tons below the most recent USDA estimate. But get this—the estimate was only 19 million tons below the official Soviet goal of 213 million tons for 1977.

In other words, USDA insisted the Soviets would produce 215 million tons, and the Reds never went above 213 million tons. The result is obvious—this added to the expected total world grain stock and kept prices depressed—to the advantage of the Soviets.

Bridgewater Associates, a commodity advisory service, New York, flays Bergland deservedly for USDA's part of what Bridgewater considers a dirty deal for farmers. Bridgewater, referring to Bergland's estimate of 215 million tons of Red production, said: . . . "most private estimates were between 200

and 205 million tons. In his news conference did Bergland say that he was surprised that the USDA was 21 million tons off in their estimated? No.!

"No, Bergland stated that USDA agreed with the Soviet estimate. One has to wonder why the USDA didn't hint of this feeling prior to the Russian announcement? The USDA also said that based on the crop size, Soviet purchases could be approximately 20–25 million tons.

"But Bergland clarified all this by saying that this figure is an estimate of Soviet needs, not necessarily import requirements. Ah! Farmers are confused by Bergland, the grain trade is confused by Bergland, and maybe even Bergland is confused by Bergland," Bridgewater said.

Bridgewater insists—and we agree—that an argument can be made that the Soviets will walk away with a good price for the corn due to the generous assistance of USDA. Consider that USDA resisted any downward adjustments in crop size despite everyone's opinion that it was somewhat lower (although not as low as the Russians finally admitted); that USDA readily accepted the Soviet figure without any show of surprise; and that since we (the grain trade) all knew, USDA almost certainly must have also known of their sales being made by exporter foreign affiliates at the same time as domestic grain companies were covering them on the board of trade.

What Bridgewater is saying is that USDA knew all the time the Russians had a short crop; the USDA knew all the time that the Soviets were buying grain at low prices. The 1972 Russian grain deal should have taught us the Soviets are crafty and no fools. Brezhenev did not announce publicly that shortage until the necessary purchases had been made to cover their needs, thus the announcements had little impact on the market.

So by USDA keeping quiet and not announcing the information on a short Soviet crop, Bridgewater ends by saying, "USDA either wants us to believe that they're incredibly naive or that they wanted to help the Russians book cheap grain, because these are the only two possible alternatives."

Bridgewater correctly maintains the announcement is bearish: "While it tells you the Russians will buy more wheat and corn (the quantities are more than reflected in price), it also tells you that they're done buying, which is a more important piece of information. Brezhnev wouldn't have made the announcement unless he had bought what he had to."

With the ruinous low prices farmers are suffering, they do not need this kind of help.

FRANCISCAN SISTERS OF THE POOR RECEIVE PROVERELLO AWARD

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. APPLEGATE. Mr. Speaker, rarely does a representative of the people have the opportunity to bring to the attention of this House, an award presentation as significant to any one area as the Proverello Award is to the Steubenville, Ohio, area, in the heart of the 18th Congressional District. This award has traditionally been given at Founder's Day at the College of Steubenville. It recognizes persons who serve their fellow man in the spirit of St. Francis of Assisi—the same spirit who is the very foundation of the college itself.

This year's recipient of the Proverello Medal will be the Franciscan Sisters of the Poor, who have operated the Catholic Social Services in downtown Steubenville since 1948. This group of women has labored quietly among the very communities which the College of Steubenville calls home.

The Sisters have touched the lives of the poor, the tired, the hungry, and the depressed. They have been there when they were needed for whatever purpose. When they began their work in Steubenville, there were none of the various welfare agencies which now exist. They clothed, fed, and sheltered the poor of the area. The Sisters also arranged for employment for jobless fathers and mothers and counseled the children of those families; counseled them so that they might have a chance to escape the deadening cycle of poverty.

The world has changed a lot in 30 years. There now exists a multitude of agencies, all formed to deal with the problems the Sisters have known firsthand for many years.

Mr. Speaker, I feel that we, as a nation, should be thankful for this group and others like it who have exemplified self-sacrifice to the point they have. On behalf of the thousands of individuals in the 18th Congressional District, I personally want to thank the Franciscan Sisters of the Poor for their outstanding contributions for a better life in the Upper Ohio Valley.

JEWISH MINORITY IN SOVIET RUSSIA

HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. ZEFERETTI. Mr. Speaker, the plight of the Jewish minority in the Soviet Union is one of suffering and degradation. As concerned Americans, we are shocked at the attitude of the Soviet Union. Russian officials have consistently ignored the human rights of certain individuals in their country by denying Jews the right to emigrate to Israel.

I would like to call the attention of my colleagues to Iosef Mendelevich, a Soviet Jew, who is presently incarcerated at Vladimir Prison. Mr. Mendelevich and his family were refused permission to emigrate to Israel three times between 1967 and 1970. Because of the intolerance on the part of Soviet officials, Mr. Mendelevich and 12 of his colleagues chartered a plane to fly them to Israel on June 15, 1970. Before arriving at the airport, they were arrested for allegedly hijacking an airplane, and simultaneously, Soviet Jewish activists were apprehended in cities throughout the Soviet Union.

At his trial, he was accused of publishing anti-Soviet articles which were actually writing on the significance of the Jewish holidays and on the anniversary of the Warsaw Ghetto Uprising. A deeply observant Jew, Mendelevich refuses to eat certain foods in his subsistence 1,200 calorie diet because they are not kosher, even though he is forced to work long hours at hard labor.

Mr. Mendelevich's parents have repeatedly been threatened with forced eviction from the Soviet Union for their outspoken protests of the inhumane conditions in the labor camp and are no longer allowed the regulation visit with Iosif.

On the eve of the 60th anniversary of the Soviet Revolution, I call upon the Soviet Union to mark this occasion by granting amnesty to Soviet Jewish prisoners of conscience. I have written to General Secretary Brezhnev, Minister of Interior Shchelekov, and Ambassador Dobrynin to protest the treatment of Iosef Mendelevich and commend this letter to my colleagues attention:

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 1, 1977.

DEAR GENERAL SECRETARY BREZHNEV: As the 60th Anniversary of the Soviet Revolution draws upon us, I call upon you to mark this occasion by granting amnesty to Iosef Mendelevich, a Jewish Prisoner of Conscience.

Mr. Mendelevich, who is presently incarcerated at Camp Vladimir, Uchr. POB OD–1 St-2, Moscow, is serving a twelve year sentence for publishing articles on the significance of the Jewish holidays as well as on the anniversary of the Warsaw Ghetto Uprising. In addition to this, Mr. Mendelevich's parents are no longer allowed to visit with him and there are reports of his deteriorating health due to poor conditions at the prison.

As a signatory of the United Nations Declaration on Human Rights and as a party to the Helsinki Agreement of 1975, the Soviet Union has advised the world of its commitment to let Soviet citizens enjoy internationally recognized human rights. The world's regard for Soviet attitudes on human rights can only be hurt by the unjust imprisonment of Iosef Mendelevich. In the spirit of these important agreements, it is my hope that Iosef Mendelevich will be accorded the rights that he so desperately deserves.

Sincerely,

LEO C. ZEFERETTI,
Member of Congress.

HEARING ON THE COMPETITION REVIEW ACT OF 1977

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. RODINO. Mr. Speaker, I wish to announce that the Subcommittee on Monopolies and Commercial Law will hold 1 day of hearings on H.R. 6089, the Competition Review Act of 1977.

The hearing will be held in room 2141, Rayburn House Office Building, on Tuesday, December 6, 1977, beginning at 9 a.m.

The witnesses will be the Honorable MORRIS UDALL, a Member of Congress

from the State of Arizona; Mr. John Shenefield, Assistant Attorney General for Antitrust, Department of Justice; and Mr. Michael Pertschuk, Chairman, Federal Trade Commission.

The bill establishes a Competition Review Commission to study competition in major industries, and the effect of governmental regulation thereon.

INDICTMENT OF PRESENT GRAND JURY SYSTEM

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BIAGGI. Mr. Speaker, recently, the nationally syndicated columnist, Jack Anderson, wrote an article which in a sense, is an indictment against the present grand jury system. In his column, Mr. Anderson was especially critical of the system's failure to protect the rights of defendants against the assaults of certain overzealous prosecutors. I contend that there is no more serious disease infecting our present criminal justice system, than the lawlessness of prosecutors.

The grand jury system was conceived to protect the rights of individuals. The reality of 1977 is that grand juries have become pawns in the hands of prosecutors, and through them, the press. The result is a trampling, rather than a championing, of individual rights.

Grand juries are no longer impartial. Instead, they are adversary proceedings for many defendants. This is caused in large part by the great amount of influence which the prosecutor has in the presentation of evidence before the grand jury proceeding—and the limitations placed on defendants to protect their rights in the event of faulty evidence.

A real concern is that many of the indictments handed down by grand juries are not worth the paper they are written on. In some instances, all a grand jury is doing is giving a rubber stamp approval to the views of the prosecutor, no matter how they came about. I strongly believe that all indictments should be subject to judicial review before filing, to prevent continued abuses.

I firmly support the requirement that prosecutors inform all defendants of their complete rights, including the specific scope of the inquiry, before going to the grand jury, to prevent fishing expeditions.

It is also obvious that we must adopt a stricter code of conduct for prosecutors. All too often, prosecutors use their office as a springboard to fulfill their higher political aspirations, and use their violations of individual rights which lead to convictions, as a means of capturing attention. This practice must be stopped. It saps the integrity of the criminal justice system, not to mention the integrity of those prosecutors who carry on their work with the highest of standards.

There have been several cases noted in recent months of people filing suits against prosecutors for violating their civil rights in criminal justice proceedings. A few favorable verdicts for the individuals may deter prosecutors from engaging in this type of conduct in the future.

The Anderson column clearly identifies the major shortcomings of today's grand jury system. The problems are rectifiable and many solutions are proposed in the Grand Jury Reform Act now pending in the House. I suggest that a close reading of this column will generate additional support for reform. For the benefit of my colleagues, the article by Jack Anderson entitled "Grand Juries These Days Ain't So Grand," follows:

GRAND JURIES THESE DAYS AIN'T SO GRAND

(By Jack Anderson)

WASHINGTON.—The post-Watergate crusade against corruption has spurred aggressive prosecutors across America into enforcing the law with a vengeance. It is the Day of the Prosecutor.

Some don't always wait for a crime to occur. They organize a task force, select the "bad guys" and crack down. They sometimes conduct what one prosecutor described approvingly as "investigation by terrorism." Suspects are harassed; witnesses are intimidated; the uncooperative are jailed for contempt.

Some prosecuting attorneys use grand juries to hound victims and compel their associates to testify against them. Witnesses can be subpenaed and interrogated under oath. Those who refuse to answer questions can be cited for contempt; those who lie can be indicted for perjury.

Unfortunately, this has perverted the original purpose of the grand jury, which was established to protect innocent citizens from overzealous prosecutors. The grand jury was supposed to consider the prosecutor's charges in secret, weed out the irresponsible accusations and permit only substantive charges to reach open court.

MODERN KANGAROO COURTS

Now the grand jury, like the appendix, has lost its function and no longer filters out the poison. Raw, unsubstantiated allegations not only reach open court but the open press. The derogatory information is sometimes leaked by the prosecutors, who have turned grand juries into kangaroo courts.

Martin G. Holleran, former executive director of the New Jersey State Commission of Investigations, told prosecutors at a closed-door seminar that every Justice Department task force should have "a special grand jury impaneled exclusively" for its use. "You can use this grand jury as an investigative and intelligence-gathering tool by calling organized crime figures" before it. The tactics, he acknowledged, "is subject to cries of harassment . . . But so be it; that is the way it goes."

Many lawmen were elated over the 1974 Supreme Court ruling which allows evidence seized in violation of the Constitution to be used in grand jury proceedings. As Maryland Judge Charles E. Moylan Jr. observed ruefully: "The prosecutor can burn the Bill of Rights seven days out of seven and bring the fruits of unconstitutional activity to a grand jury. No court in the country has the power to look behind what the grand jury considers or why it acts as it does."

Not only are aggressive prosecutors using grand juries to harass alleged wrongdoers, with little real regard for constitutional rights and guarantees; they are also sending suspected criminals to prison without a trial.

Martin Holleran explained to his fellow prosecutors how to do it. Simply grant the suspect immunity so he can't plead the Fifth Amendment against self-incrimination, Holleran advised. Organized crime figures, he said, have "a code of omerta, a code of silence." Therefore, they usually "refuse even to give their addresses" and place themselves in contempt. "They have the key to the jailhouse door in their own pocket," he said.

No doubt many of these witnesses belong behind bars. But if they can be put in prison without a trial, every citizen suddenly is in jeopardy. As one troubled prosecutor put it: "That's totalitarian. It offends me."

A former assistant U.S. attorney for Virginia, Rodney Sager, warned a House Judiciary subcommittee behind closed doors: "The simple fact is today our system clothes the prosecutor with virtually unbridled powers. It's interesting to note from the historic comments that the so-called function on the grand jury is to act as a protector of the individual's rights. I would respectfully suggest that in modern-day practice that term is completely meaningless. To the contrary, the person protected by the modern-day grand jury is the prosecutor."

TRIBUTE TO COL. ARTHUR STEWART MEARNS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. DORMAN. Mr. Speaker, Col. Arthur Stewart Mearns was honored by burial with full military honors in Arlington National Cemetery on our traditional Veterans' Day, November 11 of this year, exactly 11 years from the date his plane was shot down by Communist gunners over North Vietnam. I would like to present here the brief biography which appeared in Colonel Mearns' funeral program. Even it, however, cannot capture the spirit of this brave American but perhaps we can share some of that spirit through the words that follow his biography, which I was privileged to read during the graveside service. It is a poem that Colonel Mearns loved very much, "High Flight." His beautiful daughters, Missy and Frances, and his devoted wife, Pat, remembered that Art had memorized this lilting tribute to the lure of flight during his pilot training.

Also missing from full mention was the courageous fight waged by his loyal wife for over a decade, to achieve a fair accounting from the Communists of American prisoners and missing-in-action in Southeast Asia. It is a fight that has not ended. But we are thankful that the earthly remains of Art Mearns now lie at rest, in honor, on a hillside not far from here. Mr. Speaker and distinguished colleagues, please consider the noble life and spirit of one of our Nation's courageous heros—the kind of excellent man who has purchased with his life's blood our precious liberty.

The biography and poem follow:

ARTHUR STEWART MEARNS

Arthur Stewart Mearns, upon graduation from Colgate University and Air Force ROTC, was commissioned a second lieutenant in the U.S. Air Force, May 23, 1952. Through pilot training at Malden, Missouri, James Connally AFB and Nellis AFB, he commenced

his career as a fighter pilot. Flying the F–86, he served a tour in Korea, May 1955 through May 1956.

During a long stint as gunnery and academic instructor at Luke AFB, Art was able to share his love of flying, along with his experience and skill, with scores of younger pilots, establishing a lasting camaraderie, which has endured through the years.

Art and Mary Ann "Pat" Patterson were married January 18, 1958. Art and Pat together occupied a central position in that unique and blessed fraternity of fighter pilots, with all the joys and the exhilaration, the sorrows and the profound caring for one another. And this great community supported and sustained them all throughout the Vietnam years.

Their beloved daughters Mary Ann ("Missy") and Frances—they too have been intimately a part of the Air Force family, nourished and sustained by it.

On November 11, 1966, eleven years ago today, Colonel, then Major, Mearns, with his family not far removed in Japan, set out as the flight leader of a flight of F–105s for a target area northeast of Hanoi. Low clouds and generally bad weather, coupled with heavy enemy fire made the mission virtually impossible. Yet in heroic fashion Major Mearns and his fellow airmen performed the impossible; the target was hit. In leaving the area the flight leader's aircraft was badly damaged by enemy groundfire and burning.

The attempt to reach the coast was nearly successful. Art's wingman saw a canopy deploy, but low fuel supplies and heavy concentrations of ground troops made rescue impossible.

Those intervening years affected the entire family, naturally; they were in a prolonged period of limbo. So many were touched by these years of uncertainty: Art's father and mother; she died of cancer nearly three years ago; he, a retired U.S. Navy Commander, now invalided; Art's sister and her husband, the latter a U.S. Navy captain. And Pat's parents, sister and brother-in-law. They have kept their faith, by the grace of God and the love of many friends. They also worked and cared for others in the same situation, serving among the leaders of the National League of Families of Servicemen Missing in Action in Southeast Asia.

The long vigil is now ending. Colonel Mearns' earthy remains were returned to the country he served so nobly in September of this year, and positive identification was made 26 October 1977.

Decorated with the Silver Star, the Distinguished Flying Cross with two oak leaf clusters, and the Air Medal with three oak leaf clusters, Colonel Arthur Stewart Mearns is honored by burial in Arlington National Cemetery. What is more, he brings honor and distinction to this historic place. The heroic quality of his life and service veritably hallow this ground, his final resting place. Rest in peace, brave airman and faithful Christian; may light perpetual shine upon you.

HIGH FLIGHT

Oh, I have slipped and surly bonds of earth
And danced the skies on laughter-silvered wings;
Sunward I've climbed; and joined the tumbling mirth
Of sunsplit clouds—and done a hundred things
You have not dreamed of—wheeled and soared and swung
High in the sunlit silence. Hov'ring there,
I've chased the shouting wind along, and flung
My eager craft through footless halls of air.
Up, up the long, delirious, burning blue
I've topped the windswept heights with easy grace
Where never lark, or even eagle flew,
And, while with silent, lifting mind I've trod
The high, untrespassed sanctity of space
Put out my hand, and touched the face of God.

EXPOSURE TO RADIATION

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. CARTER. Mr. Speaker, I find very interesting a news report by Bill Richards in the Washington Post. In it is described an area in Russia devastated by an atomic explosion. I submit, Mr. Speaker, that our own nuclear blasts here within the United States have been conducted many times without knowledge of their dangerous effects on the environment and of their carcinogenic effect on human beings.

During the past year it has been brought to my attention that many men in our Armed Forces have been needlessly exposed to atomic radiation. I am thankful that the Center for Disease Control in Atlanta and Dr. Glyn Caldwell have been given a list of those exposed at an atomic blast called "Smoky" which occurred on August 31, 1957, at Camp Desert Rock, Nev. At the present time, 432 of these men have been checked; six of them have proven leukemia, several other cases of leukemia are suspected and many others have cancerous tumors of diverse natures. The usual incidence of leukemia in the 40 to 44 age group is 4.1 per 100,000, which is roughly 1 in 25,000, while the incidence of leukemia discovered thus far among those exposed at Smoky is 1.3 per 100.

I submit, Mr. Speaker, that this shows a definite correlation between the exposure to radiation from nuclear blasts and the incidence of leukemia and other forms of cancer. I trust that in the future full cognizance of the potent carcinogenic effect of alpha, beta and gamma rays and neutrons from atomic blasts will be realized, and that such explosions will be confined to a minimum and that if and when our coutnry sees fit to explode a nuclear device that sufficient precautions will be taken.

I include for the RECORD the article by Mr. Bill Richards, which shows what occurs after a nuclear blast in a populated area:

[From the Washington Post, Nov. 26, 1977]

CIA DATA CONFIRM TWO BLASTS AT SOVIET ATOMIC SITE IN 1950's

(By Bill Richards)

Newly released U.S. intelligence documents show that two major explosions at a top-secret Soviet nuclear facility in the southern Ural Mountains killed or burned hundreds of persons in the late 1950s and left a large tract of land lifeless and contaminated with nuclear fallout.

It is not clear from the heavily censored Central Intelligence Agency files whether a 1958 blast at the Russian nuclear installation at Kyshtym was an atomic explosion. However, Soviet scientists apparently did set off a nuclear blast at the site during the following year which caused a wide fallout in the area.

A CIA informant traveling in the Kyshtym region in 1961 described the scene of the two blasts in these stark terms, according to the documents:

"We crossed a strange, uninhabited and unfarmed area. Highway signs along the way warned drivers not to stop for the next 20 to 30 kilometers because of radiation. The land was empty. There were no villages, no towns, no people, no cultivated land; only the chimneys of destroyed houses remained.

"I asked the driver to stop because I wanted to drink water." The driver refused. "One doesn't stop here. You drive quickly and cross the area without any stops," he said.

The documents were obtained this week under a Freedom of Information Act request by Ralph Nader's Critical Mass Energy Project and by The Washington Post. The CIA released 14 of the 29 documents it had on the incident and said some of the withheld reports were too sensitive to be released even with deletions.

The documents made available by the CIA confirm a report last year by exiled Soviet scientist Zhores Medvedev that thousands of persons were killed or suffered radiation sickness when buried nuclear waste at a site in the Urals overheated and exploded in 1958. Medvedev said the explosion released a radioactive cloud covering hundreds of miles in the area.

Other U.S. sources speculated last year that the explosion may have occurred at a site west of the Urals where they said it was believed plutonium-contaminated waste was stored in vats above ground. The sources said the vats may have been toppled by an earthquake.

The latest CIA documents make no mention of an earthquake. They note that the Kyshtym facility was closely guarded and closed to all outsiders except for a select group of Communist Party members and their dependents who were brought to the site from across the Soviet Union. The plant apparently manufactured components for nuclear weapons.

According to a CIA summary of information about the plant, hundreds of persons were exposed to radiation and injured in the 1958 explosion. In October of 1959 Soviet scientists apparently conducted an atomic test over the plant site contaminating food for at least 100 miles.

One CIA informant reported that after the 1958 blast, food purchased in Chelyabinsk, nearly 100 miles away from the plant site, was being carefully checked by authorities and in some cases destroyed because it was radioactive. The informant said some villages near Kyshtym were burned to the ground by authorities and the inhabitants evacuated with only the clothes on their backs.

The CIA records note that the raw data supplied to the agency by its informants had not been evaluated for accuracy. Several informants' reports, for example, give different dates for the Kyshtym explosions than those contained in the CIA's own information summary.

The overall picture of the area following the blast is described by various informants, however, as one of devastation.

One report dated 1957–58 said all food stores in the region were shut and food was brought in two days later by truck and train. "The resulting queues were reminiscent of those during the worst shortages during World War II," the report says. Some residents, it says, became hysterical with fear after the appearance of "mysterious" diseases while others walked around wearing radiation counters.

Another informant told the CIA in 1960 that after what was apparently the second blast in the area a fine red dust filtered

down on the region around Chelyabinsk. "Very quickly," the informant said, "all the leaves curled up and fell off the trees."

The blast—which one CIA document indicated may have been a 20-megaton bomb deliberately set off over the site—was marked by a bright flash and a shaking of the ground in the area.

Victims of the nuclear explosion were treated in a local hospital where a wing was sealed off for them and all outsiders kept away. One informant at the hosptal during that time reports, "Some of them were bandaged and some were not. We could see the skin on their face, hands and other exposed parts of their body to be sloughing off . . . It was a horrible sight."

In an interview yesterday Nader said the blast was apparently the first serious nuclear accident involving massive casualties. Nader accused the CIA of deliberately holding up release of the documents about the blast for 20 years in order not to frighten persons in this country who might be concerned about nuclear development here.

"This information would have made people in the U.S. very concerned over nuclear installations, whether civilian or military," Nader said. He said also that he would seek to obtain at least some of the material withheld by the CIA on security grounds.

A CIA spokesman had no immediate comment yesterday on Nader's charges.

PHI BETA KAPPA'S VIEW

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. PRESSLER. Mr. Speaker, I would like to call the attention of the Members of the House to a splendid article in the Key Reporter, the national publication of the United Chapters of Phi Beta Kappa throughout the United States. The article is entitled "Phi Beta Kappa and Academic Standards." For some time my staff and I have been wrestling with the issue of excellence in education. It seems that many congressional programs, such as title I, help those who are underachievers. Except for a short period after the Sputnik experience, we have not recognized or encouraged excellence in the degree to which we probably should. A very bright student who is excellent at math or reading or art or vocational education or whatever else, may well be pulled down to the average performance of his class. Indeed, peer pressure, combined with a feeling that if a student is doing well she or he does not need attention—causes some of our brighter students to be bored. While this is occurring, very gifted students who might someday find a cure to cancer; or a solution to some of our social ills; or compose great music or build innovative projects—are not being fully developed.

My staff and I are now struggling to come up with a possible title that would provide for curriculum enrichment and recognition of the excellent student. I have been concerned with the seeming lessening of respect for the work ethic as well as excellence. The attached article points out some of the problems with grade inflation and also some causes of concern to Phi Beta Kappa, which tries to recognize excellence in college students.

I have been an advocate of some marriage of the humanities and the vocational trades on the same campus. I note that the following article also suggests that sometimes vocational subjects lower standards. I happen to disagree. I advocate a marriage of the humanities and trades. However, this does not necessarily mean a lessening of academic standards or a loss of pursuit for excellence. In terms of the job needs in our society in the next 20 years, we may have to blend more technical subjects in. I believe that Phi Beta Kappa and other fine organizations that recognize academic excellence should be able to meet the challenges of these changes. Nevertheless, the debates that surround this are worthy of our deepest attention in this body. As a member of the Education Committee, I wish to insert into the RECORD this fine article from Key Reporter.

PHI BETA KAPPA AND ACADEMIC STANDARDS

Deteriorating academic standards and their impact on liberal education have been issues of much concern at every level of the Phi Beta Kappa constituency. They were the subject of a wide-ranging discussion at the 1976 Triennial Council in Williamsburg. The annual reports of the chapters indicate that almost all the campus units have been dealing with related problems. And individual members of the Society have addressed many inquiries about these questions to the Washington office.

At Williamsburg, the Conference of Chapter Delegates was devoted to the topic of "Grade Inflation and Academic Standards." Dr. Howard R. Swearer, Phi Beta Kappa Senator and President of Brown University, was chairman of the session. Participating with him were Professor William Vincent of Michigan State University, Professor Harry G. Day of Indiana University, and Dr. Kenneth Greene, Secretary of the United Chapters.

There was general agreement that the most frequently noted example of declining standards—grade inflation—was a serious problem on most campuses. Each of the speakers emphasized, however, that the usual method of coping with the situation, "tinkering with the mechanics of the grading system," affected only the highly visible symptom and failed to come to grips with the complexities underlying this phenomenon. The panelists cited the abolishing of distribution and general education requirements as perhaps the primary cause of grade inflation. When students are permitted to choose all their courses in areas that interest them and in which they are likely to do well, they obviously will get higher grades. It is clear that more troubling than inflated grades are the implications of this condition for traditional scholarship. Dropping the core of required work in the humanities, the social sciences and the natural sciences and eliminating foreign language and mathematics requirements threaten the basic definition of liberal learning.

Additional pressures upon the liberal arts curriculum have come from the shift of students to professional and vocational majors in which they are expected to take programs heavily weighted with narrowly specialized courses. Current financial stringencies are another factor in the erosion of standards. The insistence of state legislators that funding be based on "productivity," as measured by enrollment, has led to competition among divisions and departments. Faculty members feel impelled to develop courses with popular appeal, less demanding assignments and generous grading practices.

In the face of these difficulties most Phi Beta Kappa chapters have persisted in meeting their responsibilities of identifying and recognizing students with the highest academic achevements. To deal with grade inflation, chapters have been raising the minimum grade point average necessary for initial consideration for membership and reducing the percentage of a class eligible for election in a given year. This tightening of standards is revealed in the number of new members elected. United Chapters records shows that from 1952 through 1976 the numbers of members elected annually rose fairly consistently with increases in the enrollments of the sheltering institutions and with the addition of new chapters until the 1973–79 triennium. Since 1952 and up to the 1973–76 triennium, the number of new members elected increased in each successive year. In the 1973–76 triennium, however, that pattern was reversed. In 1973–74, 17,184 new members were elected; in 1974–75, 16,-173; and in 1975–76, 15,754.

Nor are new members being elected solely on the basis of their grades. Many chapters give careful attention to the breadth and difficulty of a candidate's program, to departmental recommendations and to the quality of honors work. Several, such as those at Stanford, Indiana, and Ohio State have devised new methods of evaluating the academic performance of potential members.

The Society's commitment to its traditional policies is also reflected in the actions of the Committee on Qualifications. When studying applications for charters, the committee has maintained its rule that only institutions with strong programs in the liberal arts and sciences are to be considered for new chapters. In response to requests from the Council and the Senate, the committee is also reviewing its constitutional mandate to study existing chapters where there may be deterioration of standards.

From recent surveys and from chapter correspondence and 1976–77 reports, there are indications that grade inflation has levelled off and that some curricular reform is being undertaken. A number of institutions have begun to reinstate general education and distribution requirements and mandatory writing courses. Chapters, while not excessively optimistic, seem more confident of their ability to judge the quality of students eligible for membership. By maintaining rigorous standards and by encouraging the current reassessment of liberal education, Phi Beta Kappa may now have the opportunity and the obligation, as one chapter secretary has said, "to make its principles operative on the campus."

CONGRESSIONAL SALUTE TO THE WAYNE HILLS HIGH SCHOOL FIELD HOCKEY TEAM, 1977 NORTH BERGEN, N.J., INTERSCHOLASTIC LEAGUE CHAMPIONS

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. ROE. Mr. Speaker, it is a pleasure to call to the attention of you and your colleagues here in the Congress the outstanding achievements of a young ladies' hockey team in my congressional district—The Wayne Hills High School field hockey team—whose standards of excellence in achieving championship honors have brought great pride, recreation and refreshment of spirit to our people. I know that you will want to join with me

in extending our warmest greetings and felicitations to the Wayne Hills High School field hockey team, their parents and faculty advisors for the outstanding record of performance that they have accomplished in this most important student sports program. The team captains and members are as follows:

Susan Dacey, captain; Julie Unger, captain; Robyn Argentero, Holly Breithaupt, Denise Cole, Janie Drexler, Carole Finamore, Holly Karl, Katie Keil.

Pam Kreitz, Liz Kraus, Chris Marino, Diane Muratore, Melissa Nerone, Ann Rusiniak, Diane Sombathy, Lisa Symes, Janet Tichansky, Linda Trapani, Jody Trappe.

May I also commend to you the principal of the school, their coach and athletic director, as follows:

The Honorable Harold Eaton, Principal; Roy Bruno, athletic director; Elaine Watson, coach.

Mr. Speaker. With a season record of 16–2–3, the team's blue-ribbon winning performances in 1977 included:

The North Bergen Interscholastic League (NBIL) championship—third year in a row; second year, undefeated.

The Passaic County championship.

Victory over the previously undefeated Bergen County Champions.

Runner-up, State Sectional championship, group IV.

It is interesting to note that their coach, Mrs. Watson was named NBIL "Coach of the Year."

Individual team honors were, as follows:

Holly Breithaupt, first team, all county team high scorer, 22 goals, high scoring school record, second high scorer, all county and area.

Melissa Nerone, first team, all county; second team, high scorer, 15 goals.

Lisa Symes, first team, all county.

Linda Trapani, first team, all county, 80 serves on goal.

Sue Dacey, second team, all county, captain.

Julie Unger, second team, all county, captain.

Jody Trappe, second team, all county.

Liz Kraus, honorable mention, all county.

Diane Muratore, honorable mention, all county.

Sixteen schools from North Bergen competed in the NBIL tournament with Wayne Hills winning the championship in the final match against the town of Ramsey by 2 to 1. Wayne Hills was the best of 18 teams from the county of Passaic in winning the Passaic County championship with a score of 4 to 0 in the preliminary finals against West Milford and 3 to 2 in the semi-finals against Passaic Valley.

Mr. Speaker, we in New Jersey take great pride in the quality of performance of the Wayne Hills High School hockey team which certainly serves as a fine tribute to each of the members and the preparation, training, personal efforts, and hard work that they have devoted to attain this victorious achievement. I am indeed pleased to extend heartiest congratulations to each of the members and seek, through our historical journal of Congress, this national recognition of their good deeds. We join with their family and friends in extending this congressional salute to these fine young ladies for their distinguished contribution to the recreational and cultural enrichment of our community, State, and Nation. We wholeheartedly salute the Wayne Hills High School hockey team.

THE HOLY CROWN OF ST. STEPHEN

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. DORNAN. Mr. Speaker, Americans of the Christian faith and of Hungarian birth or heritage are outraged at the planned return of the crown of St. Stephen—a great Christian religious relic and symbol of Hungarian political independence, liberty, and legitimacy—to the Communist oppressors of that tragic nation. In such a case, concerned American citizens should be heard, directly or through their representatives, before a pledge made by our Nation decades ago is reversed and the priceless legacy of a free people given up to their murdering conquerors and the Judas of Hungary Janos Kadar.

There are those today who say the Communists have eased their oppression over Hungary. That claim was refuted at a recent hearing on the crown of St. Stephen by the House Committee on International Relations, when Eleanor Schlafly testified as executive secretary of the Cardinal Mindszenty Foundation, Inc. This national nonprofit educational organization has members in all 50 States and has dedicated its 19 years to preserving freedom under God and opposing atheistic communism through educational programs. The foundation is named for Cardinal Joseph Mindszenty of Hungary and its council is comprised of distinguished clergy who have experienced firsthand the horrors of Communism in various countries. It is my privilege to offer to you the testimony of Miss Schlafly as it was delivered on November 9, 1977:

STATEMENT OF MISS ELEANOR SCHLAFLY

On November 4, 1956 Soviet tanks and troops poured into Budapest and brutally murdered and ensalved the young Freedom Fighters, the rescuers of Cardinal Mindszenty and the people of Hungary.

On November 4, 1977 the U.S. State Department announced that the Crown of St. Stephen—the ancient symbol of Hungarian Christianity and nationhood—will be handed over to the illegitimate Communist government of Hungary by Secretary of State Cyrus Vance in December.

We believe that this is a cynical betrayal of America's commitment to freedom and human rights.

The Crown was placed on Hungary's first King, Stephen, in the year 1000 by Pope Sylvester II. Since then it has been the most precious relic of the Hungarian nation. What General Patton's troops rescued from the Soviets in 1945 and what the United States has preserved ever since in safekeeping from Soviet desecration, is now being handed over to the Communists.

Every United States President since the end of World War II has honorably abided by the original promise to keep the Crown in safety until Hungary is free. President Nixon personally promised Cardinal Mindszenty in 1970 that our government would never return the Crown to the Communists. Last year President Ford announced that the Crown would remain in the United States. Today the government of Hungary is as much Soviet installed and controlled as it was in 1947 and 1956, and it is kept in power by the presence of 200,000 Soviet troops. It was Janos Kadar who suppressed and stifled the Freedom Fighters of 1956 and who continues to stifle freedom of religion and human rights.

Why should United States policy on the Crown of St. Stephen change now? Why should we dignify this godless regime with a Holy relic symbolic of Christianity and freedom?

The Communists know the Hungarian tradition that says no state ceremony is considered legitimate and no ruler is legitimate without the Crown. The Communists want to give Dictator Kadar the appearance of despite a long record of taking power by force and violence. That is why over the years the Communists have steadily pressured our State Department and officials for the return of the Holy Crown of St. Stephen to give Dictator Kadar the appearance of legality. They want to be considered legitimate and cover up their sins of naked aggression, murder and inhumanity.

We became keenly concerned about the Crown of St. Stephen in 1971, for it was then that His Eminence Joseph Cardinal Mindszenty, at age 79, was finally released by the Communists after 23 years of imprisonment and confinement due to his belief in God and God-given human rights. We visited him, received his blessing, approval and encouragement in the Foundation's activities, and then he made his first request of us. He said, and I quote: "Action is very necessary to keep the Holy Crown in freedom. It must never be returned to the Communist government. Ask your members to help save it." Unquote.

We are asking you, Mr. Chairman and your Members to save the Holy Crown of St. Stephen. We sincerely hope and pray that your Committee will take all necessary steps to see that the Crown remains in the United States until Hungary is once again a free nation.

Thank you.

ALTERNATIVE SOURCES OF ENERGY NEEDED

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. OBERSTAR. Mr. Speaker, the dwindling supplies of conventional fossil fuels have generated considerable and much needed interest in alternative sources of energy. Research and development activities have focused primarily on solar, nuclear, and geothermal sources. A school district in northeastern Minnesota, however, has returned to a traditional source of fuel.

The public school at Grand Marais, serving Cook County, Minn., is scrapping its oil heating system in favor of a system fueled by wood chips. The town's lack of railroad service makes it difficult to use coal, and its oil must be trucked in from Duluth, over 100 miles away. Its location in the timber coun-

try on the north shore of Lake Superior makes wood the perfect energy source for the Grand Marais school.

It was my privilege during a recent Grand Marais visit to tour the school and the new wood conversion facility. The wood-fired furnace requires a separate building and a 30-foot silo to store wood chips—left over from logging operations. The chips are fed by conveyor into the plant and shot into the furnace firebox by a blower.

The school, which serves 750 students in grades 1 through 12, has used an average of 65,000 gallons of heating oil per year. For the past 3 years, the annual cost has been $26,000. The cost of converting to the wood-burning system was $288,000. Heating with wood will cost $10,000 per year, a more than 50 percent saving over current costs. Not only will the system pay for itself in 18 years, it will be conserving scarce fuel oil.

Mr. Speaker, the Grand Marais school district has shown the kind of inguenity that will be needed to solve the energy problem. I particularly want to congratulate Superintendent Vern Lueth and the Grand Marais school board for their imaginative and constructive contribution to the resolution of our energy problems. I also want to commend the people of Grand Marais, who have enthusiastically supported this project which would not have been possible without their backing.

The people of Grand Marais, in a State which is totally dependent on imported energy, have rediscovered a very old-fashioned, but conservative, fuel source, which might otherwise have been discarded as a waste product.

I want to commend to my colleagues the efforts of the people of Cook County and to share with them articles on this subject which appeared in the Minneapolis Tribune and in the Duluth News-Tribune during this past summer:

[From the Minneapolis Tribune, Aug. 13, 1977]

SCHOOL RETURNS TO WOOD STOVE AS SOLUTION TO ENERGY SHORTAGE

(By Dane Smith)

The energy crisis is bringing back a modern—and more expensive—version of the old potbellied wood stove to the school house in Grand Marais.

A $288,000 heating system using wood chips instead of fuel oil will be operating in the Grand Marais school complex, possibly by Jan. 1, 1978, Superintendent Vern Lueth said Friday.

"We know we're the only school in the state, and, to the best of our knowledge, the only school in the country that has converted to wood," Lueth said.

The Grand Marais school, which has an enrollment of 750 to 800 students in grades one through 12, used an average of 65,000 gallons of fuel oil per year, costing $26,000 annually, over the last three years, he said.

Wood chips to heat the school's two connected buildings for a year (an estimated 1,000 tons) will cost only about $10,000, saving the district $16,000 annually.

"Plus we will be generating some income locally instead of paying some Arab in Kuwait," Lueth added. Two lumber firms on the north shore of Lake Superior near Grand Marais produce the kind of chips the new system needs, the superintendent said.

"There's no question that it was the energy crunch that prompted the school board to look into the conversion" two years ago, Lueth said.

Grand Marais, more than 100 miles northeast of Duluth, is far from conventional energy sources and lacks rail service, so all fuel oil must be brought in by truck. The board "foresaw the same transportation costs if we were ordered to convert in the future to coal or something else," Lueth said.

"We saw the solution in the tremendous resource we have around here; just from trees that have fallen over we could get enough wood," he said.

The board began to talk last fall to representatives from companies that manufacture wood-burning heating plants. Earlier this week Ryan Co. of Minnetonka was awarded the contract for the system, which involves construction of a separate building.

Lueth said he tried to get money for the project from state agencies and the federal Energy Research and Development Administration but was turned down.

He said the new plant will work something like this: Wood chips, no larger than two inches square by a half-inch thick, will be stored in a 30-foot-high silo and fed by conveyor to the plant, where they will be shot into the firebox by a blower. The chips, burning in suspension in a furnace that is a little larger than most oil furnaces, will heat water that will run through the school's existing pipes.

Estimates on the efficiency of the furnace were based on the use of "wet wood," which has a 50 to 55 percent moisture content. A ton of wet wood is the equivalent of 60 gallons of oil. The $10,000 per year figure may be reduced substantially if the school can get wood with a 30 percent moisture level. A ton of the drier chips is the equivalent of 86 gallons of oil, Lueth said.

Lueth doesn't expect any pollution problems from the use of the chips.

"Nothing at all you can burn is cleaner than wood. . . . It does present a problem with fly ash, but the heating unit will be equipped with a particulate collector. I foresee no problems with pollution control agencies," he said.

The wood-burner will require more maintenance than the oil furnace, but not enough to require hiring an additional maintenance man, according to Lueth. The oil furnace will be kept for emergencies.

The new system will pay for itself in 18 years if the present ratio between the cost of fuel oil and wood chips remains constant. Lueth is fairly sure that oil prices will shoot up much faster than the cost of wood.

A hospital three blocks away is interested in tying into the plant, another factor that may lead to an earlier return on the investment. The school board specified that the heating plant be equipped with a boiler large enough to serve the hospital.

[From the Duluth Tribune, Aug. 13, 1977]

COOK IN WITH WOOD—GRAND MARAIS SCHOOL TO SWAP FUEL FOR CHIPS

GRAND MARAIS.—The Cook County school here will be heated with wood by the first of the year if all goes well with a plan to install an innovative heating plant.

Supt. Vernon Lueth reported Friday the county school board has voted unanimously to accept bids totaling $288,700 for the new system. The heating plant will consist of a new boiler and storage and handling facilities in a building adjacent to the school.

The existing fuel oil furnace will be used as a backup heating system. The new heating system will burn locally produced wood chips rather than No. 2 fuel oil.

Lueth believes the Grand Marais school is the first public school in the nation to convert to wood fuel in response to the energy crisis.

Lueth said the wood heating system should pay for itself in 18 years in fuel savings. Over the last three years, it has cost an average of $26,000 a year to heat the school with fuel oil. Wood chips can do the same job at a cost of about $10,000 a year, Lueth said.

About 1,000 tons of wood chips will be needed each year. There are at least two local sources available and possibly more, Lueth said.

They are Northern Chips Inc., which has a portable wood chipper and sells to Superwood in Duluth, and the Hedstrom Sawmill, where chips are a byproduct of lumber production, Lueth said. The sawmill already uses wood chips to heat its lumber-drying kiln, he pointed out.

The school district will either call for bids on chips or negotiate a contract with a supplier, Lueth said.

The chips will be burned in a Fyr-Feeder furnace and heat a boiler. The kindergarten-through-high school's present steam and hot water system will carry the heat to the classrooms.

Wood is the best alternative fuel for the district, Lueth said. Fuel oil prices are rising and the district cannot easily convert to coal. Grand Marais is not served by a railroad so all fossil fuels have to be trucked in from Duluth, Lueth said.

"This (changeover) assures us of heat here," he said. "We don't have to depend on outside sources for our heat now."

The North Shore Hospital may also become part of the system and buy steam from the school district.

The school board decided to purchase the Fyr-Feeder system after studying a number of bids. It will be installed by Ryan Construction Co. of Minnetonka. Work will start almost immediately, Lueth said.

OHIO COUNCIL OF CHURCHES SUPPORTS PANAMA CANAL TREATIES

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. WHALEN. Mr. Speaker, concern on the part of many thoughtful Americans that the new Panama Canal treaties be ratified is assuming an increasingly active character. For example, many eminent American statesmen and public personalities, in a group called the Committee of Americans for the Canal Treaties Inc., are reaching out to the American population in a modest media campaign to explain their endorsement of the treaties. This represents a much-needed balance to the hue and cry raised by opponents of the recently negotiated agreement between Panama and the United States.

An especially welcome voice in the controversy is that of the Ohio Council of Churches (OCC). On November 15, the Annual Assembly of the Ohio Council adopted two items addressing major foreign policy issues. First, the assembly commended the United States/Soviet initiatives toward the resumption of a

Geneva Peace Conference on the Middle East. This occurred before the now-historic journey to Israel by President Sadat of Egypt. Second, a resolution strongly supporting the Panama Canal treaties was adopted. In addition, the delegates to the assembly, elected by their 25 denominational judiciaries, will urge members of their respective churches also encourage ratification of the treaties and the agreements that implement those treaties. The last item of the resolution directs the OCC task force on international concerns to develop "a program of education among the members denominations of the council clarifying the crucial elements of the treaties, providing an accurate perspective to U.S. involvement in Panama, and highlighting the larger diplomatic implications of the ratifications of these negotiated treaties."

The final decisions of individual Senators regarding ratification of the treaties will undoubtedly be strongly influenced by American public opinion. Recent polls suggest a definite correlation between an individual's understanding of the treaties and of the historic relationship between our two countries and his approval of the treaties. Thus, the Council of Churches' involvement in this area is potentially a most important one. Mr. Speaker, at this time, I insert the resolution in the RECORD at this point:

RESOLUTION ON PANAMA CANAL TREATIES

Whereas the General Board on May 18, 1976 supported "the negotiation of a treaty between the U.S. and Panama that will allow for the effective and total recovery of jurisdiction and sovereignity by Panama over all its national territory" and

Whereas on September 7, 1977 the governments of the U.S. and the Republic signed the Panama Canal treaties which provide the terms of a new relationship between the two countries to govern the future operation and defense of the Canal and establish its permanent neutrality and

Whereas these Panama Canal treaties assume a particular significance because they represent a stance in U.S. foreign policy that demonstrates our nation recognizes that all nations, however small or new, are to be treated with respect as they assume an important role in world affairs and

Whereas the treaties symbolize the understanding that the true security for our nation rests on the power of respect for justice rather than on the power of armed might,

Therefore be it resolved that the annual Assembly of the Ohio Council of Churches

(1) Commends the governments of the U.S. and the Republic of Panama for negotiating and signing the new Panama Canal Treaties.

(2) Commends the Statement of Understanding of October 14th between President Jimmy Carter and Brig. General Omar Torrijos Herrera responding to the concerns raised by Congress.

(3) Urges the U.S. Senate to ratify the treaties at an early date.

(4) Calls on the House of Representatives to enact expeditiously the implementing agreements within its jurisdiction necessary to make the Treaties full effective.

(5) Directs the OCC Task Force on International Concerns to undertake a program of education among the member denominations of the Council clarifying the crucial elements of the Treaties, providing an accurate perspective to U.S. involvement in Panama, and highlighting the larger diplomatic implications of the ratifications of these negotiated treaties.

CONGRESSIONAL SALUTE TO THE PEQUANNOCK REFORMED CHURCH, WAYNE, N.J., UPON THE CELEBRATION OF ITS 50TH ANNIVERSARY

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. ROE. Mr. Speaker, during the month of December the Pequannock Reformed Church of Wayne will commemorate the 50th anniversary of its founding. The anniversary celebration will commence with a homecoming worship service on Sunday, December 4, with a special program by the choir and recognition of charter members. A golden anniversary dinner will be held on Saturday, January 21, 1978 at the fellowship hall of its mother church, the Pompton Plains Reformed Church, where the guest speaker will be the Rev. Albert Smith of the Preakness Reformed Church and an audiovisual presentation of slides and memorabilia of the past half-century and a special performance by the Ringers on the Green, a distinguished group of bell ringers from Morristown, will help commemorate the history of the Preakness Reformed Church.

I know that you and our colleagues here in the Congress will want to join with me in extending our heartiest congratulations and best wishes to the pastor, Rev. Gordon L. Robinson, and members of his congregation on this most important golden anniversary celebration.

Mr. Speaker, the faith and devotion of our people in a full communion of understanding, ever-caring and respecting the individual religious beliefs of his fellowman has been the lifeline of our democracy—ever inspiring our people with hope and urging the individual on to great achievements and purpose in pursuing the fulfillment of his dreams and ambitions. The exemplary leadership and outstanding efforts of our citizens so important to our quality of life are in the vanguard of the American dream and today we express our appreciation to the pastors and administrators of the Pequannock Reformed Church whose esteemed dedication and unselfish devotion in promulgating goodwill, fellowship, and brotherhood in service to God have truly enriched our community, State, and Nation.

With your permission I would like to insert at this point in our historical journal of Congress an excerpt on the background history of the Pequannock Reformed Church which was transmitted to me by a prominent member of the church who also serves on the 50th anniversary committee, the Honorable Harold Shauger, as follows:

THE FIRST REFORMED CHURCH OF PEQUANNOCK—OUR HISTORY

In the Fall of 1927 a petition was circulated requesting, "the organization of a Reformed Church for the people of Pequannock, N.J. A committee comprised of E. B. Lawrence, Chairman; Charles Possien, Secretary; Thomas Morgan, Samuel Arthur, Fred Troman, Henry Morris, Thomas Reilly, Stanley McClelland, and Arthur Speed obtained a total of 190 signatures. On November 16, 1927, the Rev. F. K. Shied, Field Secretary of the Board of Home Missions of the Reformed Church of America met with 35 town people for the purpose of putting into effect the preliminary steps to incorporate the Church. Let the records show, "after due deliberation the proposed name of 'The First Reformed (Church) of Pequannock,' was voted upon and unanimously accepted."

On the evening of November 22, 1927, a committee representing the Classis of Paramus, N.J. of the Reformed Church of America met at the Pequannock Chapel for the purposes of accepting members into the Church. The Committee was composed of Rev. Simpson of Mahwah, N.J., Rev. Reens of Paramus and Rev. Keator of Pompton Plains, N.J. The campaign workers had secured the names of one hundred forty-two individuals. Seventy-four (74) were received into the Church on transfer of membership and sixty-eight (68) on confession of faith. Thus on November 22, 1927, The First Reformed Church of Pequannock came into being. The first Elders of the Church were S. H. Keifer, P. G. McGregor, Thomas Morgan, George Glover, William Lowe and Charles Possien. The Deacons were Edgar S. Morgan, Arthur Speed, Fred Troman, Samuel Arthur, E. B. Lawrence and G. O. Parker. The Church was incorporated on January 11, 1928. The Rev. F. K. Shield supplied the pulpit needs until a permanent minister was obtained.

The year of 1928 was a very busy one in the life of the Church. The need for a permanent minister, a parsonage to build and land to build it upon were items of pressing need and took much time of the Consistory and Committee members. The Rev. Dr. A. MacCracken of Bogota, N.J., answered the call and was installed as Pastor of the Church on October 11, 1928. At a special Consistory meeting held on the 16th day of September, 1928, with the Rev. MacCracken presiding, the contract for the building of the Parsonage was awarded. It was to be built on a lot on the south-easterly side of Black Oak-Ridge Road. The cost of the lot was $1000.00 and the house approximately $6000.00. The Parsonage was completed in the late spring of 1929.

In November of 1929 Rev. McCracken resigned as Pastor of the Church. He continued to reside at the parsonage through May 1, 1930. During the summer of 1930, the services were conducted by Student Minister William Heydorn from the New Brunswick Theological Seminary. He, and a Rev. Hughes, filled the pulpit needs for the remainder of the year.

On January 16, 1931, the Rev. William H. Vander Borgh was installed as Pastor and served the Church faithfully for the next 18 years. He resigned on June 15, 1949 to accept a call as Pastor of the Greenpoint Reformed Church of Brooklyn, N.Y. Just prior to Rev. Vander Borgh leaving, a major improvement was made in the Church—the installation of the present pews. Up until this time, the congregation had to sit on wooden folding chairs.

The Rev. William Vander Borgh passed away in January, 1957, and a memorial stained glass window shines in tribute to the man who guided the Church through

these trying times of the "Great Depression" and the years of World War II.

Mr. Charles O. Bennet, a student minister from New Brunswick Seminary, was engaged to fill the vacancy and served the Church from June 15, 1949 through September 30, 1951.

December 12, 1951 marked the installation of Rev. George Berens, the Church's third full-time minister. During Rev. Berens' pastorate considerable renovation and improvements were made in the physical structure of the Church. In the spring of 1952 the kitchen was installed in the basement of the Church. Much of this work was done by Pastor Berens, along with the men of the Church. Other projects in 1952 included a new pulpit and the moving of the garage in the rear of the Church and attaching same to the Church building. This supplied space for rest rooms and a nursery department. With fitting services of rededication, November 23, 1952 marked the 25th Anniversary of the First Reformed Church of Pequannock.

1956 was a year of further expansion. The present balcony and the rear upstairs room were installed, adding much needed space for a growing church. The Chancel was rebuilt, with the front finished in oak paneling and a double set of stairs. In 1957, the interior walls of the Church were completely done over. Four stained glass memorial windows were installed.

On November 17, 1957, the celebration of the Church's 30th Aniversary took place. At a special litany, all the memorial windows were dedicated. Presentation messages were given by church members on behalf of themselves as donor, or representing the Church group that placed these beautiful memorials in our Church. It was also fitting to dedicate all those improvements made over the past five years. In June of 1958, Pastor Berens requested that his pastorate be terminated as of August 31, 1959.

It should be noted that with the increased housing development of the 50's, the Church was in great need of additional space for Sunday School classes. In October of 1958 the Consistory set up a committee to study this problem.

It is fitting to close this very productive period in the history of our Church with the following excerpt from the Consistory minutes of September 11, 1959—"This being the last meeting Rev. Berens would attend as Pastor of the Pequannock Reformed Church, the Consistory thanked him for his service to the Church and wished him and Mrs. Berens Godspeed and success as they continued in their work of the Lord in new fields." During this pastorate the stewardship of the congregation was greatly enhanced.

At a special Congregational meeting held December 11, 1959, the Rev. Warren G. Martens was elected as the new Pastor of the Church and began his ministry with us on February 2, 1960.

Progress moved slowly in the matter of the additional building space, however, a building program was formulated, and at a special meeting held September 21, 1960, the congregation approved a new addition to the Church at a cost of approximately $30,000.00. Further approval was given on October 28, 1960 to hire an outside firm to raise money for the new unit. June 4, 1961, at the conclusion of the Sacrament of Holy Communion, groundbreaking services were held for the new building, to be known as Fellowship Hall. Much time and effort were spent by the members of the Consistory and the Building Committee working on all phases of this big undertaking, and on October 13, 1961, the contracts were awarded for the construction of the new unit.

"Unless the Lord builds the house, those who build it labor in vain." Psalm 127:1. Many years ago the writer of this psalm gave us this wise thought concerning our relationship to our new building: We shall erect it; we shall meet our financial obligations as we realize that we labor not only for a building, but for the extension of Christ's Church and the greater glory of God's Kingdom upon earth. So wrote Pastor Martens in the foreword of the booklet issued for the Fellowship Hall Fund Drive.

It was with great pride that four years after a spark of need was kindled, the members of the Church saw their hopes, their needs and their prayers answered with the dedication of Fellowship Hall on October 28, 1962.

The Rev. Warren G. Martens terminated his pastorate with our Church on August 1, 1964 to accept a new position in New York State.

At a special Congregational meeting held August 31, 1964, by unanimous vote a call was extended to the Rev. Gordon L. Robinson and on November 1, 1964, he was installed.

The year 1965 proved to be a very busy one for the governing body of the Church. Many important decisions had to be made and carried out that would have long lasting effect on the Church.

Due to the inadequacy of the original parsonage, approval was granted to sell it and purchase a new one. It was sold in August of 1965. Just prior to this, title to and occupancy of the present parsonage was consummated in July.

The physical condition of the exterior of the Church and other factors led to the perusal of the possibility of the expansion of the the Church structure, the building of a new church, or a major improvement program. Due to the prohibitive costs, the latter program was adopted and completed by the end of 1966. The new brick-crete siding changed the color of the Church exterior from brown to white. Later, aluminum siding was added to all wooden surfaces. A circle drive and parking lot were also added.

On May 7, 1967, the "Words of Commemoration at the 40th Anniversary Vesper Service" was highlighted by a concert given by the Church Choir.

In 1972, the interior of the Church was redecorated and the Chancel opened to provide more open space for new forms of worship. The choir area was expanded to provide for a greatly enlarged choir. During the decade—late 60's and early 70's—music became a strong emphasis in our Church life.

Also, in 1972, forty-three of our members caravanned to the Family Festival at Estes Park in the Rockies, camping to and from and there. It was a memorable experience, in which Pastor Robinson assumed some of the characteristics and problems of the ancient Moses, leading the people of Israel through the wilderness.

In August of 1976, AIM Worker, Jan Folkert, was engaged for the period of one year. The year Miss Folkert spent in our presence greatly enriched the life of the Church.

This year of our anniversary (1977) saw the installation of a new Hammond Organ—made possible by the gifts and dedication to this cause by a few members.

During the years, 738 persons have joined our communion, although the membership of the Church has not greatly changed, being 158 at Charter and 160 today. The growth in the immediate Church neighborhood has stabilized in recent years, after reaching a peak in the 60's.

Three "sons" of our Church entered the Gospel ministry: Victor Turdo—no longer in active ministry; Samuel LaPenta—now Pastor of the Reformed Church, Colts Neck, N.J.; Lee David Donow—to be ordained in June of 1978.

As we celebrate our 50th Anniversary, it is hard to realize that another 10 years have passed by—10 years of much work and dedication by the Members, the Consistory and our Pastor. Years that have brought sadness—but also joy and exultation—with always the goal to serve humanity and to make a better tomorrow.

Mr. Speaker, our Nation was founded on the cornerstone of our people's faith in God which is truly the spirit, conscience, and very being of our society. The dedication, devotion, and untiring efforts of the esteemed clergy of the Pequannock Reformed Church in pursuit of the noble cause of service to God and brotherhood, goodwill, and understanding among all mankind is applauded by all of us. We do indeed salute the pastor, Rev. Gordon L. Robinson, and the parishioners of the Pequannock Reformed Church upon the celebration of their Golden Anniversary.

HEAD START FUNDS DISTRIBUTION FORMULA

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. QUIE. Mr. Speaker, when the Education and Labor Committee marked up the extension of the Community Services Act which authorizes the Head Start program, the committee found problems with the manner in which the office that administers the program in HEW—Administration for Children, Youth, and Families (ACYF), formerly known as the Office of Child Development (OCD)—allocated funds. A request was made to the Congressional Research Service of the Library of Congress to study the manner in which the funds were distributed. In its report to the Congress CRS illustrated that ACYF was not following the law in distributing Head Start funds to the States. In fact, the CRS went further and charged that ACYF was in clear violation of the law.

Essentially, the formula works as follows: The Secretary is allowed to withhold up to 2 percent of the total for the trust territories (0.4 percent is actually withheld). Then the Secretary may reserve up to 20 percent for discretionary programing. Of the remaining money, one-half is distributed on relative number of children living with families below the poverty line in each State as compared to all States. The other half is distributed on the basis of the relative number of public assistance recipients in each State as compared to all States. This then becomes the base for each State's allocations. There is a third factor which comes into play after the first two are calculated, and that is a hold harmless which guarantees that no State will receive less than it received in fiscal year 1975.

ACYF distributed the money by interpreting the formula by starting at the hold harmless level and then giving money to States based upon the two poverty factors. CRS contended that because ACYF is not following the law, 12 States—Arizona, Connecticut, Georgia, Illinois, Maryland, Michigan, New York, Ohio, Oregon, Pennsylvania, South Dakota, Wisconsin—and the Commonwealth of Puerto Rico, receive less than the minimum required by law if the money were allocated as required by the

formula. After receiving the CRS report the committee asked the General Accounting Office to review the charges made. GAO confirmed that the CRS charges were accurate and that ACYF is in violation of the law. The issue of how the funds are distributed is particularly pertinent this fiscal year (1978) because the Head Start program's appropriation was increased by $150 million.

The problems we faced in resolving this matter were difficult and a look at the history of the formula will explain why. A formula was first put into the Head Start legislation in 1975. Prior to that date there was no rational way of distributing Head Start funds. Money was simply given out at the whim of HEW. This is not to say that the money was misused or not needed, but it simply was not distributed in an equitable or rational way. The most dramatic example of the uneven funding is that the State of Mississippi for a variety of reasons actually receives approximately 10 percent of all the Head Start money available to the entire Nation each year. In fiscal year 1977 Mississippi received $41,117,693. If the 1975 hold harmless was not in effect, under the existing formula, Mississippi would only be eligible to receive $9,304,990. The formula was an attempt to distribute the funds on a fairer basis.

OCD, in fiscal year 1976 and 1977, by its method of distribution, actually circumvented the hold harmless concept which was supposed to freeze the States which were over their allocation and give States who were behind an opportunity to catch up. OCD did so by giving all States a 6 percent cost of living increase each fiscal year. In doing so, the inequitable distribution becomes greater because every time all States were given the identical increase, it caused the distribution figures to spread even further rather than move closer. One of the reasons why it was not caught earlier was that the appropriation increases were minimal during the last 2 fiscal years, and the results of OCD's allocation appeared to be an accurate utilization of the formula with the exception of the cost of living increase.

Because Headstart money has already been appropriated for this fiscal year (1978), the committee found it necessary to give directions to ACYF to insure that a fair distribution occurs to guarantee that no State or children will be hurt, and at the same time correct past inequities. The members of the subcommittee resolved the matter for fiscal year 1978 in the following way: The money will be distributed on the basis of the formula as described above. Those States that received more money in fiscal year 1977 than they are entitled to in fiscal year 1978 will be brought up to their actual fiscal year 1977 allotment level. The money to cover this adjustment will come from the Secretary's discretionary funds.

After all States are brought up to their highest level—fiscal year 1977 or fiscal year 1978—then all States will receive a 6 percent cost-of-living increase on top of whatever the maximum figure is for the State. Column VI of the following chart shows what each State will receive for this fiscal year.

In taking this action the committee clearly intends that all moneys allocated during this fiscal year shall be available to Headstart grantees until expended so that there is no need for any grantee to spend its increase in a less than responsible manner. With grantees knowing that they have time in which to expend dollars they should be able to plan and responsibly initiate programs which will benefit all children.

Finally, there is an agreement to bring the entire Headstart formula question back to the committee so that we can review the formula distribution in future years beginning in fiscal year 1979. At that time there will also be an amendment offered to allow fiscal year 1978 funds to be available until expended.

The chart follows:

[Fiscal years]

States	Col. I 1977 allocation	Col. II Supplement required to bring to 1977 level	Col. III 1978 allotment under current formula	Col. IV 1978 or 1977 minimum allotment	Col. V 6 percent cost-of-living increase	Col. VI Final allotment 1978 (cols. IV and V)

PANAMA CANAL TREATY

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. TEAGUE. Mr. Speaker, Mr. R. Richard Rubottom of Dallas, Tex., recently had an editorial printed in the Dallas Times Herald concerning the Panama Canal Treaty which I feel all of our colleagues will find interesting and informative.

PANAMA TREATY—KEY ELEMENTS OF THE PROPOSED NEW CANAL PACT POSE GRAVE DANGERS TO U.S. INTERESTS

(By Richard Rubottom)

(NOTE.—R. Richard Robottom, now a professor at Southern Methodist University, was formerly Asst. Secretary of State for Inter-American Affairs. He served with the State Department from 1941 to 1964.)

For most U.S citizens the decision regarding the pending new Panama Canal treaties is likely to be a close call. After careful study I have decided that the prospective disadvantages outweigh the benefits that might flow from ratifying the treaties as presently written

No doubt about it, the subject is vital to our relations with Panama and elsewhere in the world. Because of its importance it should be faced with reason, not with emotion. The average citizen knows more about the Panama Canal, its history and its significance today, than has been recognized, and is quite capable of making an informed decision when presented with the issues. Without reviewing history since 1903 and simply looking at the language of the treaties I suggest the following points are worthy of discussion.

Ambiguity and Conflicting Interpretation: Before the mutual euphoria over the elaborate signing ceremonies Sept. 6 had subsided, spokesmen for the United States and Panama separately revealed serious conflicts in interpretation of Articles IV and VI of the "Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal," one of two treaties signed. (The other and much longer treaty is entitled "The Panama Canal Treaty".)

Article IV states that the two nations "agree to maintain the regime of neutrality established in this treaty." Based on that language, the American public has been told this assures the right of the U.S. to intervene when, as and if necessary in the future to defend the neutrality and continued use of the Canal. Panamanian negotiators, however, repeatedly denied this interpretation in press conferences on their home ground.

Article VI would entitle war vessels and their auxiliaries of the United States and Panama "to transit the canal expeditiously". Panama's spokesman told their citizens that this did not mean that U.S. vessels could in an emergency go to the head of the line. In fact, they revealed that they had rejected language proposed by the U.S. to provide privileged passage. This revelation cannot be minimized in President Carter's undertaking to clarify the meaning of these two articles.

The Carter-Torrijos Statement of Oct. 14 is an important step forward in overcoming the ambiguity of Articles IV and VI, and might even suffice as long as they are in office. However, given the frailty of man and the unpredictability of future Panamanian leadership, the only satisfactory and prudent action to take now is to revise the language of the treaty so as to remove the basis of the conflict in meaning. This step, and only this step, would assure future generations as to what was intended.

Loss of negotiating Rights to Other Possible Canal Sites. The United States, according to Article XII of the new Panama Canal Treaty, "shall not negotiate with third states (during the life of the Treaty) for the right to construct an interoceanic canal on any other route", unless Panama agrees which seems unlikely. I find it incomprehensive that the United States government would enter into a solemn pact which would, at one and the same time, give up all rights to and within the Panama Canal by the year 2000 and yet deprive it of the right to negotiate for another site should its national interest require it.

The same Article grants to the U.S. the right to add a third lane of locks to the existing Panama Canal, presumably at U.S. expense since there is no mention of how the cost would otherwise be defrayed. Yet little would remain out of Canal operating revenues for any purpose after Panama receives its payments, as proposed in the new treaty. It is noteworthy that Article XII has hardly been mentioned by U.S. negotiators, nor indeed by the information media.

Escalation of Payments to Panama. U.S. representatives estimate that, under the payment schedule set forth in Article XIII of the new Treaty, Panama would receive approximately $65 million per year revenue from Canal tolls and operations. Panamanian estimates run as high as $80 million per year. Regardless of which figure one accepts, payments to Panama will be massive in recognition of its claim (a defensible claim if staked out fairly) that the narrow isthmus is its principal natural resource. But that is just the beginning! The base rate on which Panama is to be paid, $.30 cents per Panama Canal net ton, "will be adjusted to reflect changes in the United States wholesale price index for total manufactured goods" every two years, beginning five years after the Treaty becomes effective. It shouldn't take much reflection for one to realize how such indexed payments would raise costs cumulatively to Canal users in the future. And who will have responsibility for such increases before the rest of the world"? The United States principally. Yet, to my knowledge, this vital point in the new Treaty has been virtually overlooked in public commentary, and certainly no U.S. spokesmen have called attention to it. One must ask why?

What is U.S. Responsibility to Other Nations? For 60 years the U.S. set Panama Canal toll rates, without a single increase, with the objective of providing a service to world shipping at cost rather than charging the true value of the service. While in retrospect one might challenge the wisdom of that policy, and while the U.S. should not expect appreciation for doing something so obviously in its own interest as well as that of others, one could safely wager that, as toll rates climb, the U.S. will be accused of abdicating its responsibilities to other Canal users.

The first increase ever in toll rates, 20 per cent, occurred in 1974, followed by another in 1976. One U.S. negotiator has estimated another 30 to 40 per cent increase if and when the treaties are ratified. That would be just the beginning. One can foresee the adverse impact on the commerce just of Latin America, not to mention others, where the percentage of trade transiting the Canal ranges from 30 per cent to 75 per cent in the affected countries. In contrast, only 8 per cent by value and 13 per cent by volume of U.S. commerce transits the Canal.

It is fair and prudent to ask, "What will happen if the U.S. fails to ratify these treaties?" First, it would signal to friends and potential adversaries alike that the U.S. people would not countenance further withdrawal from its unsought but undeniable responsibilities as a leading world power. Second, it would be momentarily a stern test of the Panamanian Government's ability to interpret to its people where their long-term national interest resides. Third, assuming a suitable climate for negotiations, the U.S. and Panama would need to return to the negotiating table to draw up another draft suitable to both nations, just as was done in 1936, in 1955, and in 1967. It is important to recall that the draft 1967 treaties were rejected by General Torrijos and never submitted for ratification to the U.S. Senate. Indeed, some of Torrijos' critics today are saying that the 1967 drafts were more favorable to Panama than the current ones. I do accept the necessity of negotiating a mutually satisfactory, modern treaty.

However, before the U.S. relinquishes the "perpetuity" clause in the original 1903 treaty there should be public recognition of the impact that this action would have on the U.S. position at the Guantanamo Bay Naval Base in Cuba. In that case, while there is no perpetuity clause, the U.S. exercises "complete jurisdiction and control" over approximately 29,000 acres of land and water and can do so indefinitely unless the U.S. withdraws or formally agrees with Cuba to alter the treaty. No one of the parties may change or abrogate that document. Both would have to agree. Thus it is no wonder that Fidel Castro and General Torrijos are on such friendly terms. Apart from any ideological commitment they may share, one could almost assume that Panama has been acting also as surrogate negotiator for Castro Cuba.

Should the new Panama Canal treaties be ratified, it would be logical to assume that Fidel Castro will follow General Torrijos on stage with the demand that the U.S. set a date to leave Guantanamo Bay.

I accept the necessity of negotiating another treaty with Panama, to repeat. But, this should be done on a strictly bilateral basis without interference from other parties. There is no way that the U.S. can expiate all the past errors of U.S. policy toward the nations of Latin America. Neither the present drafts nor any others will alleviate the problems and concerns of Colombia or Mexico or any other nation.

As I learned all over again during my recent three months stay in Colombia, each Latin American nation has its own set of demands on the United States. The symbolic and vicarious value of the treaties would be short-lived. Then each nation quite properly would pursue its own interests which ironically might include hard questions about the cost of the new custodianship for the Canal.

Relations with the peoples of Latin America should be given the highest priority by the United States. We have cultural, political and spiritual ties that go back to the Wars of Independence and even earlier. Our joint economic and commercial interests, including energy supplies, are equally important. Our citizens will remain strong in their commitment to assist the peoples of all of Latin America to resolve their problems wherever and whenever such help is feasible and welcome, taking into account the individual characteristics and requirements of each nation.

PRIME MINISTER VORSTER AND THE NATIONALIST PARTY WINS BIG THANKS TO THE CARTER SOUTH AFRICAN POLICY

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BAUMAN. Mr. Speaker, the electoral victory yesterday of the Nationalist Party in the Republica of South Africa,

has greatly increased their majority in the parliament. The 30-year rule of the Nationalists has been extended and the white voters of that country have given a clear mandate to the Vorster government. It is not the province of this gentleman or the U.S. Government to dictate the outcomes of political contests in other nations. But it is not out of place to note that this massive victory would hardly have been possible without the insensitive and stupid policy toward South Africa put forward by the Carter administration in the time since it took control in January.

I include an article from the Baltimore Sun, which has had perhaps the most extensive and perceptive recent coverage of South African affairs, following my remarks. I also hope and pray the Vorster government will be able to provide solutions to the many problems facing South Africa, as well as for a much more intelligent South Africa policy on the part of our own Government:

SOUTH AFRICAN LIBERALS COMPLAIN U.S. HAS UNWITTINGLY BOOSTED NATIONALISTS

(By Peter J. Kumpa)

CAPE TOWN.—A Cape area candidate of the Liberal Progressive Federal party was bitter over what he called the blundering and inept diplomacy of the United States toward South Africa. His complaint is a common one.

He expected that—as a minimum—his party would lose a substantial number of seats in Wednesday's elections because it had been tied to the American position, rightly or wrongly.

The Progressives are seeking an open society to replace the rigid apartheid system with the longer range goal of political power-sharing with all races.

The Progressive candidate, well-versed in American politics, felt the greater damage was the apparent success of Prime Minister John Vorster's Nationalists in wooing the English-speakers, traditionally opposed to the Nationalists in the past, to cross the line to join the Afrikaner-based party.

With a broadened base and overwhelming command of the white electorate, Mr. Vorster would have considerable political leeway to pursue his own policies and ignore outside pressures for change.

The situation is the opposite of what the Carter administration intended.

From the standpoint of domestic liberals, the most damaging single incident was Vice President Mondale's one-man, one-vote prescription for South Africa.

Attempts by the Secretary of State Cyrus R. Vance to explain this away did not succeed. Mr. Vance expounding American policy for Africa said he looked for a start of the process of reform and power-sharing. He omitted the one-man one-vote formula.

In South African terms or in the broader African context one-man one-vote means nothing less than turning over the political power structure to blacks.

No party in South Africa not even the Progressives advocates such a course.

In the political spectrum here the Progressives are well to the left of all the other opposition parties. But they propose a common roll of voters without regard to race but judged on educational qualifications.

What the Nationalists have done is to take the real example of what one-man one-vote applications have meant to other African nations. They have drummed into the electorate here that it would mean economic and social chaos. And they insist it would mean the end of democracy (though that luxury is restricted to whites) in South Africa.

The record of independent black African states has been an easy target for Nationalist politicians. Economically their record has been dismal. Many countries formerly surplus food producers have dipped into deficit positions.

Experiments in a variety of forms of socialism have largely failed. Democracy in black Africa has just about died surrendering to one-party states tribal dictatorships or military control. In not a single African nation has there been a change of government through the democratic process. And in only two smaller states (Botswana and the Gambia) has any effective opposition been permitted.

Using such examples, Nationalists, employing a blatant fear campaign have won over anxious white moderates. They charge that the United States wants nothing less than black rule and destruction of the prosperous society that has been built here.

The liberals say the United States should have exerted more subtle, quieter pressure to push South Africa down the racial-sharing path. They claim that Henry A. Kissinger, former secretary of state, had asked for 14 changes in Pretoria's policy, but gave up his quiet demands in exchange for assistance to solve problems in Rhodesia and South-West Africa.

Liberals feel here that the Carter administration should have sought specific reforms rather than use the broad-brush human rights attack, as this allowed the Nationalists to defend themselves with a double standards argument.

Past American administrations, according to South African Progressives, share as much of the blame for the present impasse as the Carter administration. For too long South Africa was ignored, allowed to continue its racial restrictions and discriminations without serious warnings from the West and particularly the United States, they say.

Western investments buoyed up the system to profit all sides except the nonwhite majority.

These critics feel that if persistent though subtle pressure had been employed by Washington by the Kennedy, Johnson, Nixon and Ford administrations, South Africa would have backed away from its present harsh apartheid system. And they believe the country would not be moving into its laager, or siege, against the rest of the world.

TAX INCENTIVES FOR MEETING OUR NATION'S ENERGY DEMANDS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. KEMP. Mr. Speaker, the shape of the Nation's energy program will be determined by what is resolved in the joint House-Senate conference committee and accepted by the respective Houses. It is appropriate, therefore, to look at what ought to emerge from that conference committee.

It must be said that one of the principal deficiencies in the House-passed bill was its lack of incentives for new energy resources. As a matter of fact, the House version created disincentives. The House bill says, in essence, that the American people must learn to suffer under the hardships of energy shortages, because it is better to have shortages if they are a product of Government decisionmaking than to have adequate supplies if they are a product of market forces.

This would be true even though tax incentives are needed to evaluate and demonstrate the commercial viabilities of production of oil from the eastern shales and other unconventional energy sources. The conference committee has an opportunity now to deal with this question of incentives.

Some thoughtful direction has been given to where the conference committee and Congress ought to be going with respect to incentives by Dr. Gibson Jaworek. Dr. Jaworek is a consulting energy economist with whom I have worked first on increasing natural gas production from the Devonian shales—production badly needed to supplement natural gas supplies in the Northeast and Midwest during the winter months—and subsequently on increasing the yield of oil from shale.

I call this article to the attention of all of the Members of the House, but most particularly those serving on the conference committee.

The article follows:

TAX INCENTIVES NEEDED TO EVALUATE AND DEMONSTRATE THE COMMERCIAL VIABILITY OF OIL FROM EASTERN SHALES AND OTHER UNCONVENTIONAL SOURCES

(By W. Gibson Jaworek, Ph.D.)

INTRODUCTION

In assessing the future fuel production potential of the United States, as a response to the now evident national energy problem, the oil and natural gas contained in shales of the Eastern states have been consistently overlooked. It has been assumed that this region has solely coal resources, while oil shales are thought to occur exclusively in the Western states.

This has been a serious oversight and reveals, perhaps, that the Congress, the Executive Branch, and the public have been misled in this and other aspects of the future fuel outlook and its impact on economic growth. Needless to say, all domestic fuel sources, producible at reasonable costs, would be preferable to an over-dependence on insecure foreign supplies. However, federal responses to the energy problem—creation of ERDA, for example—have not engendered the right type of incentives to proceed with immediate research and commercialization of oil shale in the West, and have overlooked the potential in the Eastern states. Valuable time has been lost.

The Carter energy plan, stressing conservation of fuel usage and higher taxes on energy consumption, continues the lack of desire to expedite development of domestic fuel resources, particularly new fossil fuel sources, as compared to the more exotic energy possibilities exemplified by solar energy.

To reverse this governmental trend of timidity in energy supply innovation, which prevails also in the private sector, it is suggested herein that *direct* and substantial tax incentives be given to those companies and governmental units which will assess and demonstrate new technology for domestic oil and gas supplies such as those known to be contained in Eastern shales.

EASTERN SHALES—WHAT THEY ARE AND WHERE THEY ARE

Crude oil and natural gas are the present remains of a multitude of microplants and microanimals which lived in and around the basins of inland seas throughout geologic history, which spans hundreds of millions of years. And these basins were filled with sediments from rivers flowing from adjoining land areas, the organic remains were enclosed in muds and sands, which were later transformed into shales and sandstones by the pressure and temperature of succeeding sediments. Over millions of years columns

of these sediments accumulated to as much as 20 to 25,000 feet, sometimes more.

Within the earth, organic remnants of animals and plants were transformed by high pressure and temperature into kerogen, a substance containing combinations of hydrocarbons, which in turn were distilled into crude oil and natural gas. Much of these hydrocarbons traveled through the shales into adjoining sandstones and limestones and, finally, were trapped by impervious rock barriers. These traps are the sites of present oil and gas fields discovered by drilling.

Importantly, however, a great part of the oil and gas could not leave the originating shales and is still entrapped therein. Subsequent ercsion of the earth's surface, over millions of years, has resulted in much of the organic-rich black shales being exposed at or near the present earth's surface. The Eastern shales, for example, underlie large areas of the Appalachian states from New York to Alabama.

The present surface outcrops of shales from the Devonian geologic period roughly delineate the Appalachian Basin, an inland sea described previously as ideal for accumulation of oil and natural gas, i.e., hydrocarbons. As this basin became filled with sediments, it became shallow and was finally luxuriant with woody vegetation, which became the source of coal, which is essentially carbon, not hydrocarbons.

In fact, most of the Eastern oil shales are coaly, that is, contain carbon and hydrocarbons, which explains in part why they have been overlooked when compared to the more familiar Western oil shales which are not coaly. For this reason geologic knowledge and research effort on Eastern shales has, until recently, been minimal in comparison to the shales of the West.

ERDA'S EASTERN GAS SHALES PROJECT

During the early 1970's geologists in the Appalachian states took renewed interest in the natural gas potential of the Devonian shales, and with strong Congressional support ERDA was instructed to begin a research program on this vast energy source. In 1976 the program was begun and is described in the accompanying brochure.

The current estimate of potential natural gas from Devonian shale is 2,400 trillion cubic feet, of which 10 percent or 240 Tcf is believed now to be recoverable. This volume would double current U.S. proved reserves.

The ERDA Devonian Gas Shale Program, it should be noted, is focused on improving production techniques to increase output from wells already drilled or to be drilled in the future. These brown shales are largely in the interior Appalachian Basin.

DEVONIAN BLACK OIL SHALE

Refining oil from black, organic-rich Devonian shales is not new. During the 1860's a company mined and processed "rock oil" from a shale oil plant at Buena Vista, Ohio, on the Ohio River. Oil supplies discovered by "drilling" in Pennsylvania, Ohio, and New York made this plant noneconomic after 1870.

While geologists in the Appalachian states have occasionally noted the oil content of these shales during the past century, no serious evaluations have been undertaken. As a result, geologic data is still scarce and very incomplete.

During the postwar period some attention has been given to the uranium content of the shales, which to date has been found to be low-grade, although the vast extent of the shale makes the potential uranium reserves considerable. For example, 6 trillion tons of uranium is estimated to be contained in the shale in Eastern Kentucky alone. Thus, uranium could be considered a possible byproduct from a shale oil plant.

The few samples of the Eastern shales analyzed in the past have indicated that about 5 to 10 gallons of oil per ton could be extracted by processing. Western shales average from 25 to 30 gallons per ton.

It is now known that these assays were wrong or at best misleading because the analysis was based on a technique—the Fischer Assay method—which is only applicable to Western shales. In simplest terms, this assay was only recovering the hydrocarbon content of the shale, but not the coaly (carbon) content of the shale.

As a result, an average oil recovery from a sample of Eastern black shale can have 25 to 30 gallons of oil per ton, or be equivalent in liquid volume to the more familiar Western shales. Higher yields, also, have been measured. These findings were the result of laboratory tests conducted by the Institute of Gas Technology (IGT) in Chicago using their "hydroretorting" process.

A quotation from a recent IGT status report will emphasize the importance of this laboratory finding:

"We discovered some time ago, and have confirmed in more extensive testing during the past year, that when we process Eastern Devonian shale with the IGT hydroretorting process, we obtain yields of useful products equivalent to those from conventional retorting of Colorado shale." (Status report on the Development of the IGT Hydroretorting Process for the House Subcommittee on Environment, Energy and Natural Resources; July 12, 1977, by Frank C. Schora).

On the basis of preliminary sampling of black shale from seven states—West Virginia, Ohio, Kentucky, Tennessee, Alabama, Indiana, and Illinois—IGT estimates that "a new potential resource of 1,000,000,000 (1 trillion) barrels of oil is now available." By using the IGT process, an additional 3,400 trillion cubic feet of synthetic natural gas would also be available for extraction, a value higher than now estimated to be contained in Devonian brown shale by ERDA's Eastern Gas Shale Project.

With such a large potential of oil and gas, a major research project to commercialize this resource is strongly indicated.

The IGT hydroretorting process, when applied to Eastern black shales, has a number of distinct advantages, vis-a-vis Western oil shales. These are:

1. Devonian shales are good retorting feedstock, the oil is easily pumped through pipelines, and produces a large distillate yield, i.e., gasoline, jet fuels, and home heating oils—products most easily marketed.

2. The industrial infrastructure already exists in the East to support mining and process operations. Open pit or strip mining is less hazardous to miners.

3. Processing and mining can be carried out in an environmentally accepted manner since areas of shale occurrence are agriculturally and commercially less desirable.

4. Alkaline impurity content of Eastern shales is quite low, less than 1 percent compared to 15 percent in Western shales. The IGT process does not "swell" the shale, thus spent shale disposal is not a serious problem. Spent shale can be used as road fill and aggregate.

5. Uranium and other minerals might be extracted as byproducts from the shale.

6. Process Water in the Appalachian region is ample to support a shale oil industry, unlike the West.

Finally, even if all geological, technological and environmental advantages of Eastern shales, when compared to Western shales, are disregarded, the savings in transportation costs of Eastern shale oil (and gas) to principal fuel markets along the East Coast and the Middle West would be considerable. Numerous interstate crude oil, petroleum product and natural gas pipelines cross the shales outcrop areas and interconnections with Appalachian shale oil and gas production would not be difficult.

In fact, an oil and gas shale industry in the Appalachian states could be a foundation for new industries to locate nearby, providing cheaper and cleaner fuel supplies than available from other regions and foreign countries. However, to begin such an industry, as with most "infant" industries, governmental encouragement, support and tax incentives are a necessity.

THE NEED TO FOCUS ENERGY SUPPLY POLICY TOWARD UNCONVENTIONAL OIL AND GAS RESOURCES

Statistics of petroleum supply for the United States in January of 1977 are noteworthy. For the first monthly period domestic production of crude oil was less than 8 million barrels per day, compared to 9.5 million in 1972, before the embargo. Crude oil imports during the same month topped 6 million barrels per day, also for the first time (the quantity was 2.2 million in 1972). Just as important, however, is the fact that U.S. crude oil prices in January 1977 averaged $8.56 per barrel. In 1972 the value was $3.39 per barrel.

Likewise, the creation of ERDA and the vast increase of funds to that agency since 1972 has not produced a significant research development to indicate a breakthrough in increasing oil, gas, or even coal output in the immediate years ahead.

The conclusion is inescapable. Higher domestic crude oil prices have not provided any impetus to retard or reverse the exhaustion of present U.S. oil fields, or even more importantly, significantly induce greater and successful exploration programs to discover new fields.

In a similar manner, government sponsored energy research programs have been plagued with delay, skepticism and, in some instances, failure, as exemplified by the recent recognition by ERDA to suspend the so-called Coalcon project to demonstrate new technology to produce liquids from coal.

Still, the nation's unconventional oil and gas resources are known to be immense, enough to last for centuries. These include the following:

Oil resources

Shale Oil—Western
Shale Oil—Eastern
Coal Liquids
Enhanced Oil Recoveries

Gas resources

Devonian Shale
Western Tight Sands
Methane from Coal Seams
Geopressurized Water (Gulf Coast)
High BTU from Coal (Surface)
Underground Coal Gasification

A conclusion can be drawn, and should be. To insure future ample domestic oil and gas supplies and prevent serious overdependence on overseas sources and the financial and national security threats attendant thereto, U.S. energy policy should be focused directly to unlocking these unconventional oil and gas resources. Maintaining price incentives for conventional oil and gas sources has, and will continue to, attract only more overseas supplies to the inflated and cartel-induced U.S. energy price level. The Carter plan to increase the energy price level by a crude oil equalization tax prolongs and solidifies the false assumption that government research programs and higher-risk private investment will relieve the oil and gas supply problem.

The policy, to date, has not been advanced to channel private efforts to increase oil and gas supply, particularly from nonconventional resources. Quite the reverse. Consumer tax proposals, guised to reduce energy consumption, have disenchanted both the energy consumer and producer.

TAX INCENTIVES TO INCREASE OIL AND GAS SUPPLY—GENERAL PROPOSALS

The heart of obtaining additions to U.S. oil and gas supply is greater emphasis and expenditures on geological investigations and resource evaluations. Until only recently Devonian black shales were believed to be inferior in oil content. This is now known

to be untrue. Other geologic fallacies could be prevalent. Significantly, the U.S. Geological Survey was not included in the new Department of Energy.

Private U.S. geological efforts, particularly during the past 20 years, has been directed toward offshore areas and foreign oil and gas prospects. Onshore domestic investigations, as a result, have been limited, and as a consequence, drilling since 1973 has been largely near or within known oil and gas geologic structures. Vast areas of the nation are barely explored, and geologic information in these areas is often poor or nonexistent. Wildcat drilling in the U.S., wells drilled far from present oil and gas reservoirs, is still less than during the early 1960's, a period of a large excess of U.S. crude oil producing capacity in relation to demand. Currently a severe shortage of onshore drilling rigs and drilling crews exists. Most U.S. construction of new rigs has been, ironically, for use in the North Sea and foreign areas.

These facts suggest at least five tax law changes bearing on the oil and gas industry:

A. Reduced tax liability for geological and geophysical efforts to locate new oil and gas supplies.

B. Liberal amortization of investments in onshore drilling rigs and equipment, and training of crews.

C. Deferred tax liability for investment and expenses spent for "wildcat" drilling.

D. Tax disincentives for activities listed in A, B, and C in foreign areas.

E. Tax disincentives for companies holding oil and gas leases, without drilling, for lengthy periods.

These tax law changes would apply to the search for more conventional oil and gas supplies. More importantly, the tax laws should be reformed toward expediting development of nonconventional supplies. Among numerous methods possible, this could be done particularly by:

F. Providing tax credits for energy research, development and demonstration expenditures against current corporation tax liabilities. Geological and related resource evaluation expenditures should be expressly included.

G. A "tax-free" period of operation for unconventional energy plants, designated by the Secretary of Energy, could accelerate completion of such projects. This technique has been utilized in Canada to spur coal mining projects.

H. Tax preferences for corporate entities chartered for unconventional energy development projects with allowance for capital participation by local, State and regional governmental bodies.

THE "SELF-HELP" CONCEPT OF LOCAL ENERGY RESOURCES DEVELOPMENT

The national media, Congressional hearings, and Administration proposals have given almost no consideration to a slowly evolving trend of mutual cooperation or "self-help" energy resource projects. The lack of attention is surprising, since many of the projects, though small, have a high success rate.

In essence, these projects are mutual undertakings of energy producers, energy consumers, and governmental agencies. The idea is to provide funding, usually from several agency sources, to provide monies to develop a local energy resource for industrial fuel usage which will provide local employment. The link of energy supply and jobs usually guarantees governmental support.

These projects can be distinguished from "national" energy plans and programs in that they recognize, and take advantage, of:

1. Regional energy resource availability.

2. Regional industry and transportation characteristics.

3. Regional, state, or local governmental laws, regulations and "ways of doing business."

4. Provide means to assure long-term fuel availability to industries, which cannot be guaranteed by usual suppliers.

The variation in genesis of these self-help, local energy resource projects illustrates the possibilities which tax legislation could encourage their further expansion. For example:

1. A town supervisor in western New York, unable to fund a senior citizen's facility for lack of gas supply, successfully drilled a natural gas well with a HUD grant which will fuel the facility, as well as help fill local school needs.

2. A county government in Kentucky funded a feasibility study to construct low-BTU coal gasifiers for an industrial park, which was then approved from monies provided by the state, the Appalachian Regional Commission and ERDA. The county will raise revenue bonds to meet the final portion of funds required.

3. The governor of Ohio implemented a program to coordinate state agencies to reduce red tape which encouraged industries to drill their own gas wells. Over 100 companies now have their own gas supplies, usually teaming with independent producers.

4. A county in Kentucky has funded a natural gas pipeline from shut-in wells to its industrial park. As a result, the industries were not cut off from natural gas last winter.

5. A county in New York is setting up a revolving fund of money to encourage industries to drill their own wells, the loans to be recovered and paid back to the fund as the gas is produced.

In each of these instances private capital was unwilling to undertake the local energy resource development. The usual reason given was that each project would take too long to pay out. Another reason is that companies are unfamiliar with doing business in partnership with local governments.

A final fiscal approach to encourage local, self-help energy resource development, therefore, could be:

I. Enactment of changes in revenue-sharing legislation to provide "up-front" monies to State, regional and local governments for energy supply projects related to industrial development and local job creation.

In summary, tax law changes to encourage local energy supply projects, including unconventional fuel sources, would be a positive and new approach to the U.S. energy problem. The recent past has shown that higher prices and a vast federal research agency have had minimal impact on reversing production trends. The results of expanded geologic investigations, as compared to new energy conversion technology, may uncover oil and resources throughout the U.S. which would otherwise be overlooked.

It is usually not mentioned, but for decades Europe was thought to be devoid of oil and gas. The drilling of a "wildcat" well in the Netherlands in the early 1960's discovered the vast Groeningen natural gas field, which was the impetus for exploration in the adjoining North Sea. In 1976 the Netherlands, besides utilizing this gas for its local needs, was the largest exporter of natural gas in the world.

TRIBUTE TO VINCENT J. MAROTTA—NATIONAL ITALIAN MAN OF THE YEAR

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BIAGGI. Mr. Speaker, it is my distinct privilege and honor to pay tribute to an outstanding Italo American, Vincent J. Marotta, president and chief executive officer of North American Systems, Inc., who on October 9 was awarded the prestigious National Italian Man of the Year Award.

Mr. Marotta is more popularly known as Mr. Coffee to millions of Americans. He was awarded this honor in recognition of his many accomplishments in the business world. He is respected in the business world as one of its most innovative and successful executives. Through his leadership, Mr. Coffee is America's largest selling coffeemaker.

Mr. Marotta's main business offices are in Cleveland with a third located in Los Angeles. He employs more than 3,500 persons and consistently produces quality products used and enjoyed by millions of American consumers.

Perhaps one of Mr. Marotta's most recognizable and successful talents is his ability to recruit big name stars to promote his products. The official spokesman for Mr. Coffee is none other than the legendary Yankee Clipper, Joe Di Maggio. It should be noted that Joe was in attendance the night Mr. Marotta received his National Italian Man of the Year Award. Vincent Marotta's most recent coup was signing Sophia Loren to a 3-year contract to promote his newest product "Filter Fresh," a new water filtration product.

Foresight combined with ingenuity and integrity characterizes the career of Vincent Marotta. Even before assuming his position in North American Systems, Marotta distinguished himself as president of the Glazer Co. which was responsible for the construction of thousands of homes and several shopping malls in the greater Cleveland area.

Vincent Marotta has been an achiever all of his life. He had an outstanding career in the world of sports including making the first team of all Ohio football in college. He also had the unique distinction of playing both professional football and baseball for the Cleveland Browns and St. Louis Cardinals.

Vincent Marotta has been cited on several occasions for awards. For his prowess in football, he was inducted into the Mt. Union College Hall of Fame. He was named Housewares Man of the Year in 1974. He won the coveted Horatio Alger Award in 1975. Identity magazine cited him as one of the top 50 Italian-American businessmen. His latest award is perhaps his greatest but it is by no means his last.

Vincent Marotta despite his many time-consuming duties finds time to keep active in numerous civil, religious, fraternal, and Italo-American organizations. He also regularly and generously contributes to charities.

I extend my warmest congratulations to this outstanding Italo-American. He has amassed a career which is complete with accomplishments. I extend my warm regards to his wife Ann, his three sons, Charles, Timothy, and Vincent, Jr.; his three daughters, Mary, Jane, and Susan; and his beloved mother Josephine. They are all proud of Vincent's accomplishments and in their own right have all played a role in his success. May the beam of success continue to shine down on the Marotta family for years to come.

EGYPTIAN/ISRAELI DIPLOMACY DESERVES U.S. SUPPORT

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. MAZZOLI. Mr. Speaker, I commend to the attention of my colleagues the following New York Times editorial of November 29, 1977, encouraging this country to support wholeheartedly the peace negotiations between Egypt and Israel recently initiated by President Anwar Sadat.

I have been disappointed by the reticence of the U.S. policymakers to show enthusiasm for the significant efforts of Egypt's President to end the Mid East belligerency.

The closing words of the editorial are worth repeating here:

In any case, Mr. Sadat has made his break and is trying to create a continuing process of negotiation to escape the cycle of frustration in both war and diplomacy. The place for the United States is at his side and at Israel's, so that their noble effort may proceed. It is too late to play the Sphinx.

The editorial follows:

THE UNITED STATES AS SPHINX

The Carter Administration's enthusiasm for President Sadat's diplomacy could freeze the Nile. It has been grudging, chilling and altogether unworthy of the United States, which should be cheering and rewarding every act of moderation in the Middle East.

For the second time this month, the Egyptian President has signaled his genuine acceptance of Israel and a desire to get on with the negotiations for an epochal settlement. Both times, despite formal words of support, Washington has chosen to emphasize the dangers instead of the opportunities in Mr. Sadat's enterprise, thereby contributing to the risks. Even now, the Administration hesitates to accept his invitation to a Cairo conference, preferring instead to consult with the Soviet Union and other recalcitrants and giving no help whatever to the moderate Arab parties now torn among contending forces.

Consider the possible motives for this strange behavior in Washington:

1. Resentment of Mr. Sadat's diplomacy-by-surprise, reflecting not just injured pride but a desire to influence his tactics before they take shape.

2. An excessive attachment to the preferred American path to negotiations, a Geneva conference offered to all the parties through considerable diplomatic labor.

3. A deference to Soviet sensibilities, reflecting a conviction that peace in the Middle East will never be achieved or preserved without Moscow's participation and commitment.

4. A desire to signal Syria or perhaps Saudi Arabia or even the Palestine Liberation Organization that their best interests lie in accepting American leadership in the Middle East negotiations.

5. A fear for Mr. Sadat's safety and Egypt's stability, taking more seriously than he does the threats on his life and position.

6. A fear of diplomatic failure, unless Mr. Sadat is restrained, with bitter consequences for all parties.

The evidence suggests that all these calculations have figured in Washington's responses, but only the last is deserving of serious consideration. Resentment and inflexibility have no place in a situation that has frustrated all peacemakers for 30 years. The Middle East conflicts have always been the primary burden of Israeli and Egyptian societies. Do we dare ask how dare they now take diplomacy into their own hands?

The Soviet Union in its way, and Syria and the P.L.O. in theirs, have contributed mightily to the hostilities over the years; they should be persuaded that they may be missing a historic opportunity to press their interests at the conference table, not encouraged to avoid the table. And surely Mr. Sadat himself is a better judge than any American of his relations with Saudi Arabia, or of his chances of survival.

Fear that he may fail is reasonable enough, but it should have produced an extra measure of American support, rather than coolness. Mr. Sadat could fail if moderate Palestinians, Jordanians and Lebanese, though tempted to join him, are frightened off by the Soviet-Syrian campaign of rejection. Courage does not usually come in multiple doses. The United States should be celebrating Mr. Sadat's invitations to Cairo, urging their acceptance and promising to reduce the risks and enhance the rewards for those who agree.

Mr. Sadat could fail also if the Israelis harden the terms for their other neighbors, and perhaps even for him. That temptation will grow to the extent that other Arabs refuse even a gesture of comparable recognition of Israel, spurn direct negotiation and force the Egyptians to back down or risk a separate peace. Here again the American obligation is to help broaden the talks.

The hesitation in Washington suggests that the Administration has still not grasped—or accepted—the radical turn of events that took Mr. Sadat to Jerusalem last week. He served notice that he would neither wait nor fight again for any Arab party that refuses even to negotiate with Israel or which belabors procedural issues to the point where Israel does not have to negotiate seriously. He thus rejected the American approach to a Geneva conference, and particularly the Administration's deal with Moscow to make a Russian co-chairman of every future bargaining session. Better Begin than Brezhnev.

Mr. Sadat may have been too ambitious, or too daring, or too trusting of Israel's readiness to reciprocate a dramatic break with the past. We think not; Egypt and Israel have not only earned the right to define the patterns of accommodation, they also have the power to do so, provided only that they have the energetic support of the United States.

In any case, Mr. Sadat has made his break and is trying to create a continuing process of negotiation to escape the cycle of frustration in both war and diplomacy. The place for the United States is at his side and at Israel's, so that their noble effort may proceed. It is too late to play the Sphinx.

BUREAUCRATIC ROULETTE ON THE POTOMAC

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. WAMPLER. Mr. Speaker, an article, "Hobson's Choice," appearing in yesterday's Wall Street Journal, November 30, by Vermont Royster in his column "Thinking Things Over," points up the dilemma faced by today's American consumer. As Mr. Royster paints the picture, FDA, EPA, OSHA, USDA, and NCI—all Federal agencies—have left consumers with little choice as what to eat, drink, wear, or breathe without fear of death due to heart attacks, cancer, fire, or some other horrible ending.

Is a game of bureaucratic roulette on the Potomac being played with the American consumer?

Perhaps much of this confusion could be ended if we had some unanimity in our Government as to how we should protect our people's health and the environment from pollution and toxic substances. For starters, whatever methods we adopt regulatory decisions should be based on commonsense, a balancing of risks against benefits, backed up by a broad consensus of the best scientific information and testing methods available. Recent studies by the National Academy of Science strongly recommend vast improvements in regulatory decisionmaking for at least one of these regulatory agencies—the Environmental Protection Agency.

Mr. Speaker, I commend Mr. Royster's article to my colleagues and request its insertion in the RECORD. The article follows:

HOBSON'S CHOICE

(By Vermont Royster)

It wasn't so long ago—remember?—when we were bombarded with dire warnings about how we were killing ourselves with all those polysaturated fats. They were supposed to fill us full of cholesterol, clogging our arteries and causing us to pop off from heart attacks.

That was when the lady at my house put me on a strict diet of polyunsaturated fats. Not a drop of cream on that morning cereal. No butter on the toast or those lovely rolls and corn muffins. Even skimmed milk with my peanut butter sandwich, and of late a special kind of skimmed milk called sweet acidophilus, which doesn't taste as bad as it sounds and is supposed to be full of all kinds of healthy bacteria for the digestive tract.

All of which seemed like a splendid idea until we got some bad news from those ubiquitous laboratory mice. Two research scientists from Boston University reported to the American Society for Microbiology that all those polyunsaturated fats are bad for you, too. The laboratory mice placed on a high diet of polyunsaturated fats developed colonic cancer.

That seemed to leave a real Hobson's choice. Pop off from heart attacks or waste away with cancer of the large bowel.

Then there was sugar. Health authorities have long been warning us against all those sweet rolls, sugar in our coffee and in those bottles of Pepsi and Coke. They cause fat to collect around our hearts and could give us diabetes and sundry other ailments.

Indeed, on a recent CBS "Sixty Minutes" there was a whole segment devoted to charges that the food industry is poisoning us all, beginning with little children, by sneakily putting sugar in all manner of foodstuffs to make them taste better. There was a horrendous tale of one little girl who got hooked on sugar hidden in her cereal, and had to take a cold-turkey cure just like a heroin addict and with all the same shakes from withdrawal pains.

So banish the sugar bowl and switch to diet sodas. At first the cyclamates were used as sugar substitutes, but then it turned out they didn't do the mice, or rather the rats, any good either, so the government banned the cyclamates. Next it was saccharin, but up in Canada they fed huge quantities of saccharin to the little rodents and they died.

But it seems all is not well with sodium nitrite either. It can react with amines, an organic compound of nitrogen which is present in most meats and in the human stomach. In sufficient quantities it can

combine to produce nitrosamines, which is a cancer-causing compound.

So the Department of Agriculture is threatening to ban the use of sodium nitrite as a meat preservative unless the meat industry can "prove" by next January it isn't giving us all cancer.

If the department does ban sodium nitrite, presumably that will leave us with another vexatious choice since there is no other preservative now known as effective against botulism.

* * * * *

But back to milk, once thought the perfect food. It's thumbs down already on whole milk, the cream supposedly adding to your cholesterol count. Now comes at least one dietary expert to charge that all milk is bad for you, whole or skimmed, with or without acidophilus.

Dr. Frank Oski, president of the Society for Pediatric Research, says it's all those proteins in milk. You may have thought proteins were good for you, but Dr. Oski claims his research has found that milk proteins are something special. They can give you allergies, kidney damage, cramps, bloated gas, intestinal bleeding and increase the risk of luekemia. There's also a link, he claims, between milk proteins and multiple sclercsis, a disease that sneaks upon you slowly.

It's not from food alone, though, that we are surrounded by perils. You'll remember Tris, the chemical coating put on children's nightgowns at the government's insistence to make them fire-resistant. After the industry duly complied, the government decided that Tris itself could be a cancer-causing agent if aborbed long enough through the skin. Exit Tris.

The latest peril is 2,4-diaminoanisole sulfate. That's not a food but a dye long used to color hair. The National Cancer institute fed a lot of it to rats and mice and, according to Newsweek, found that when ingested in large does it produced thyroid tumors in 24 percent of the female rats.

I suppose few ladies at the beauty parlor drink it, but the cancer institute worries that if it is carcinogenic when taken internally there is at least a "potential risk" of its being so if absorbed through the sclap.

A layman confronted with that horrendous list of perils can't help being confused; he can't know who's right about what. He begins to suspect, though, that in the chemical world in which we live there's hardly any substance which eaten, drunk, breathed or absorbed in sufficient quantities isn't deleterious to our health.

That leaves him to marvel that with all those named perils the species has somehow managed not only to survive but to grow taller, stronger and longer-lived. And to wonder if maybe those laboratory rats aren't getting out of hand.

ECONOMIC RUSSIAN ROULETTE BEING PLAYED WITH INCREASED IMPORTS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BIAGGI. Mr. Speaker, as we examine the activities of our so-called leading economic indicators we find two showing very little improvement—our balance of trade and unemployment. Certainly one reason for this is the continuing adverse effects on our economy caused by imports.

A recent feature article in the New York Sunday News focused on this problem and its special effect on certain industries. It shows a direct one to one relationship between increases in imports and unemployment in the affected industry.

One industry which has felt the brunt of this problem has been the apparel and textile industries. Twenty years ago, 4 imported garments were sold for every 100 garments made. Today it is 25 to every 100. The relationship between these increases and unemployment is graphically illustrated by the fact that between 1965 and 1976 as imports rose—unemployment in the industry increased by 24 percent.

American consumers as a group are affected by our present import policy as reflected in higher prices for certain goods and reduced quality for others. High unemployment prolongs inflation which prolongs a higher cost of living.

There is growing militancy in the affected industries to try and obtain some changes in present U.S. policy. There is wide division between the Congress and the President on this matter. Many here including myself believe that increases on tariffs are necessary to lessen the reliance on imports. Correspondingly the slack from reduced imports will have to be taken up by increasing domestic production which in turn will mean more Americans back on the job.

No one advocates eliminating imports entirelv. However, a continuation of present policies represents reckless and callous economic policy—reckless in that we are already too reliant on foreign powers for such vital commodities as oil—to add steel and clothing to the list makes us vulnerable to the whims of these foreign powers. The callousness stretches from the increasing number of American workers who are losing their jobs because of imports. America is the land of opportunity—but that opportunity should first be extended to our own people and industries instead of those from foreign nations.

I insert for the benefit of my colleague the article entitled "Made in U.S.A.—For How Long." It was written by Mark Andrews, a News national reporter:

MADE IN USA—FOR HOW LONG?

(By Mark Andrews)

The Carter administration and the nation's industries are on a collision course over foreign trade. Several head-on clashes have already taken place, and the outlook is for many more to come.

The problem is as old as the nation. But never has it been so serious as it is today. Foreign imports have wiped out the jobs of at least 400,000 Americans over the past decade, and some of the country's most important industries may be in mortal danger. For instance, in the last month alone:

Four American steel companies—Youngstown Sheet & Tube Co., Bethlehem Steel Corp., U.S. Steel Corp. and Armco Steel Corp.—have announced plans to lay off a total of almost 10,000 workers. All four companies say they were forced into their actions by foreign competition.

The American Iron and Steel Institute reported Friday that steel imports had hit a 32-month high in August, with foreign producers accounting for one in every five tons of the nation's steel supply.

Zenith Radio Corp., the last major manufacturer of American-made television sets, finally threw in the towel and decided to move its key operations to Taiwan and Mexico. That will cost 5,000 Americans their jobs.

Copper companies, putting the blame on imports, have been laying off thousands of miners and plant workers in the western United States.

Makers of tires, household appliances, sporting goods and industrial equipment have also been laying off workers by the thousands because of inability to compete with companies that manufacture goods abroad.

The Labor Department has approved special federal assistance payments for workers laid off because of imports. But that is small comfort to people whose jobs simply vanish. "We want work, not welfare," has been their cry.

Leaders in all the suffering industries, along with producers of items ranging from swimming pools to digital scales, have been pleading with the government to slap tariffs or impose stronger quotas on imports of inexpensive—and increasingly high-quality—foreign goods.

The key word is "quality." Gone are the days when the label "Made in U.S.A." automatically meant "best." Leaders in the American textile, steel and electronic industries admit that products manufactured by their foreign competitors are often as good as—if not better than—their own. And because foreign labor is cheap, foreign products are cheaper, too.

But, whatever the reason for the problem, Carter does not feel that it can be solved with protectionist measures such as higher tariffs and lower quotas. He believes that the way to ease the nations' economic woes is to increase, not decrease, foreign trade.

This difference of opinion became clear five months ago when 500,000 members of the International Ladies Garment Workers Union staged mass demonstrations across the nation to demand a slowdown in the steadily increasing growth of imported garments. The ILGWU says that textile imports over the last decade have robbed 200,000 American workers of their jobs.

When the union's complaint was presented to Carter, he said through his trade negotiator, Robert S. Strauss, that he was studying the problem but would not resort to protectionism and did not favor reductions in imports while he was deciding what to do.

At the same time that the ILGWU protests were going on, employes in the shoe industry were complaining to the administration that 70,000 shoe workers had lost their jobs since 1968 because of imports.

Carter responded to their plight by instructing Strauss to seek agreements with other countries to restrict shoe exports to the U.S. But the President rejected a recommendation of his own International Trade Commission to put higher tariffs on shoes.

On Sept. 29, after thousands of layoffs had been announced in the steel industry and Zenith had disclosed that it was packing up to go overseas, Carter said he had negotiated a "voluntary constraint" with Japanese leaders on the question of television imports. Some of the steel industry's problems, he added, are "chronic."

The President said once again that he was studying the situation and was not ready to propose any solutions. However, he promised to meet with industry and labor to discuss their problems.

But he asserted: "I don't think any basic changes need to be made in our import laws or in the national statutes."

Carter does not want any new laws restricting trade because he believes that they would be self-defeating in the long run.

Economists who share his view explain that international trade is a two-way street; that if the U.S. barred imports of Korean shoes, for example, Korea would then stop buying American products, such as the computers this country wants to sell. As a result, the U.S. economy would suffer, they say.

But if trade barriers around the world were eased, Carter reasons, then the economy of the entire world would grow healthier and the huge U.S. trade deficit—which is virtually certain to set a new record this year—would improve.

That is the view that the administration has been presenting over the past few weeks at the so-called Tokyo round of trade talks, a 97-nation conference being held in Geneva to negotiate an international agreement for lower tariffs. The U.S., represented by Ambassador Alonzo L. McDonald, is reported to be supporting a Swiss formula for a multilateral 44% tariff cut around the world.

McDonald said in Geneva last week that he was hoping for an agreement that would increase trade between the U.S. and Europe from $40 billion to $100 billion a year over the next decade. But management and union leaders in industries losing jobs because of imports are inclined to take a more short-range stand.

Don Smith, a spokesman for the United Steelworkers Union, said in an interview last week: "The foreign steel industry is either subsidized or socialized. The American steel industry must operate at a profit. There is no such thing as fair trade anymore. What we have is unfair trade. What we want is some restraints on steel imports, either through so-called orderly marketing arrangements or some type of restraints, such as quotas."

Smith added: "We are already dependent on foreign oil. If we were dependent on foreign steel, we would really be in bad shape."

Japan is the major producer of steel imported into the U.S., and Japanese trade officials say that the American steel industry's main problems are antiquated equipment and poor productivity, not imports.

Some Americans, even some American steelworkers, agree. But E. B. Speer, chairman of the board of U.S. Steel, points out that "$20 billion has been spent over the last 20 years for the purpose of updating steelmaking tools."

Youngstown Sheet & Tube Co., which is laying off 5,000 workers this month at its aging mills in Youngstown, Ohio, is one American steel company that is trying hard to modernize.

On Sept. 23, shortly after it had announced its layoffs, the company said that it was buying 12 new steel-rolling cylinders for its Indiana Harbor works near Chicago at a cost of about $100,000.

The new rollers were ordered from a company in Japan.

SOCIAL SECURITY: NO EASY ANSWER

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. LEVITAS. Mr. Speaker, many Americans and many Members of Congress view the recently passed social security bill with great concern. Simply to raise taxes again without doing something to change the system is totally unacceptable. We also know that unless short-term financing is provided, the social security system will begin to go bankrupt next year, as many of us warned that it would a number of years ago.

Therefore, many Members of Congress voted for the recent social security bill only to avoid the imminent bankruptcy of the social security system while at the same time creating the National Commission on Social Security which will provide the mechanism for bringing about basic changes including considering alternatives to the present programs.

This approach to social security legislation was recognized as an essential and proper approach by even such a staunch fiscal conservative columnist as James J. Kilpatrick, who, in his syndicated column which appeared in the Atlanta Constitution and other newspapers on November 29, 1977, recognized the need to provide the additional short-term financing to keep the commitment to millions of Americans in order to avoid the imminent bankruptcy of social security, but at the same time underscore the immediate need to bring about alternatives to the present system. The National Commission on Social Security, which I first and originally proposed approximately 3 years ago, was finally adopted as part of the social security bill passed by the House.

I offer for the consideration of the Members the column by Mr. Kilpatrick, as follows:

[From the Atlanta Constitution, Nov. 29, 1977]

SOCIAL SECURITY: NO EASY ANSWERS

(By James J. Kilpatrick)

House and Senate leaders have resumed their search this week for a solution to the Social Security problem. They might as well have stayed in recess. There is no satisfactory solution to the Social Security problem. The best that can be said of the various proposals is that some are less distasteful than others.

The general nature of the problem is well known. The Social Security system is now paying out more than it takes in. The fund went $1.2 billion in the hole in 1975 and $3.2 billion in 1976. This year's deficit is estimated at $5.6 billion. The long-term deficit, assuming present tax schedules go unchanged, is projected at $17 trillion over the next 75 years. In brief, the system is headed for disaster. Mr. Carter and the congressional leaders are on sound ground in seeking to do something now.

But what? Political realities have to be faced. The Congress cannot break faith with the 33 million men nad women now receiving Social Security benefits. Most of them have arranged their lives in terms of dependency, in some degree, upon the monthly check. This is an obligation that has to be met.

The problem, looking to the future, is so to arrange revenues and disbursements that the program takes on some semblance of actuarial soundness.

On the revenue side, none of the alternatives is attractive. Mr. Carter has proposed to dip into the general fund in times of high unemployment, but neither the House nor the Senate has warmed to the prospect. Both chambers are thinking instead of massive payroll tax increases on both employers and employees.

The Senate would get away from the system of equal taxes that has obtained for 40 years. By 1985, under this proposal, employers would be paying full Social Security taxes on an employee's salary up to $75,000 a year; the employee would pay on the first $33,900. In the House version, the principle of equal taxes would be retained, with significant increases in both the tax rate and the taxable wage base. One way or another, working people will get clobbered.

The House already has refused to take one step that should be taken to increase revenues. Federal, state and local employees—seven million of them—ought to be dragooned into the Social Security system. Under the present system, virtually all of these public employees qualify for public pensions; vast numbers of them, by taking moonlight jobs, manage to pay minimal Social Security taxes and still reap maximum benefits also. Bringing them into Social Security would produce $12.5 billion in annual revenues.

On the disbursement side, proposed remedies are as painful. Privately, some influential members will concede that they know what ought to be done. The problem lies in screwing up the political courage to do it.

For example, it is generally acknowledged that the retirement age under Social Security should be raised from 65 to 67 or 68. Commerce Secretary Juanita Kreps advanced the thought some months ago, but such howls arose on the Hill that the thought was hastily shelved. If a new age limit were phased into the system over the next ten years, workers now in their 40s and 50s would have abundant time to adjust to the change.

For a second necessary step, Congress ought to decouple the regrettable combination of future increases now written into the law. Recipients may be entitled to automatic adjustment of benefits according to the cost of living, but they are not entitled to a second upward adjustment by reason of higher wage levels.

On a third point, unfair as it may appear, Congress ought to stick to the rule that penalizes recipients for continued earnings. Social Security is neither an insurance program nor a welfare program. It is a tremendous transfer program, by which money is taken from the young and productive and given to the old and unproductive. There is no rational reason to burden young workers with transfer payments to their elders who keep on working.

Neither higher taxes nor altered benefits will be gratefully received by the people. Until an alternative voluntary program is devised—if, indeed, such a program can be devised—we have no true choice. If Congress will impose the least of the evils, that will suffice.

U.S. ACADEMY FOR PEACE AND CONFLICT RESOLUTION COMMISSION ACT OF 1978

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mrs. MEYNER. Mr. Speaker, I am introducing today the U.S. Academy for Peace and Conflict Resolution Commission Act of 1978. The purpose of this bill is to establish a Commission to consider whether a U.S. Academy for Peace and Conflict Resolution should be established, the nature of the Academy if it is found desirable, and alternative proposals which might accomplish the same purpose.

This bill is very similar to several bills introduced by former Representative Andrew Young and myself, some of them with cosponsors. It is also similar to S. 469, which was passed by the Senate in June. Hearings are anticipated on all of these measures before the Subcom-

mittee on International Operations of the House International Relations Committee early in the second session.

This legislation does not represent a new idea. George Washington recommended the creation of a "proper peace establishment." Since 1935, over 140 bills have been introduced to establish some kind of department or academy of peace.

The shape of these proposals has been modified in recent years by the development of the field of conflict resolution. Many people properly criticized the idea of a Department of Peace as excessively vague: Just what would it do? The new discipline of conflict resolution helps to give practical and concrete form to the noble idea of promoting peace and social harmony. Conflict resolution has become a respected and significant discipline within the social sciences in recent years. Its techniques have been applied with great success by the Community Relations Service of the Department of Justice, the Federal Mediation and Conciliation Service, the American Arbitration Association, many international mediators, and numerous State and local governments and police forces.

The peaceful outcome of the Hanafi incidents in Washington earlier this year was directly attributable to the use of conflict resolution techniques. Many of the successful applications of these techniques, especially by the Community Relations Service, are not well known because of the desire of the agencies and individuals to maintain a low profile for the sake of their credibility, but the record of accomplishments is impressive.

The Community Relations Service was decisive in handling the potentially disastrous Indian problem at Wounded Knee. President Carter, while Governor of Georgia, put conflict resolution techniques to work in alleviating racial and prisoner problems, thereby freeing State Patrol officers for other law enforcement duties. A mediator was very instrumental in assisting opposing forces in the Dominican Republic to communicate and resolve their differences during the uprising of 1965. Most of the successful attempts at conflict resolution have occurred on a small scale, however, defusing potentially explosive situations in schools, factories, and neighborhoods.

The primary reason why more conflicts have not been resolved by impartial mediation is the lack of trained and experienced mediators. The need for more qualified mediators will increase with the pressures of population growth, increasing competition for scarce resources, and intensified contact and interdependence among peoples and nations.

An academy dedicated to the training of mediators would be of great assistance in filling this shortage. In addition, the academy could also serve as a focus for data collection, research coordination, and public education in the field of conflict resolution.

On the other hand, it is certainly possible that an objective study of this issue could determine that there are better ways of encouraging conflict resolution than by the establishment of a new institution. Therefore, I am proposing the creation of a 9-member Commission to examine this issue thoroughly for 1 year and report its conclusions to the President and the Congress.

It is unfortunately true that many people become very skeptical at the mention of a "peace" academy. There are many others who are highly dubious about the creation of any new commissions.

I believe that it would be tragic if we were to let our cynicism convince us to forego a real chance to promote peace. We are reaching the point where we simply cannot afford the enormous costs of conflict that we now pay. Is it not worth $500,000 to find out if we can save billions?

Earlier this year, we voted in favor of a $114 billion defense budget. We routinely fund four service academies and five war colleges dedicated to the teaching of war. Is it not time to encourage the teaching of peace?

WAYNE AND TORRIJOS: TWO TO TANGO?

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. DORNAN. Mr. Speaker, on Tuesday, October 25, the Washington Post carried an article by "blind-spot" conservative, John Wayne, which explained why he supports the Panama Canal treaties. I say "blindspot" because his arguments as propounded in this article smack of nothing but the pap which is being ground out by the administration and the remains of Dr. Kissinger's State Department.

Now, I have the highest regard for Mr. Wayne's motives. I am sure that he believes that his arguments are valid. But believing does not make it so—no matter what the fairy stories say. So since, as the world knows I have the highest regard for Mr. Wayne, I can only surmise that he has not read the treaties thoroughly. In other words, he "done been took," just as slick and professional as an underground sting.

Anyway, that was the only explantion I could come up with after reading the October 25 article. It just did not wash—sort of like Carrie Nation endorsing Boone's Farm wine because she loves Pat.

But I was reassured in my judgment since it seems that the Duke's apologies did not jive with others who are familiar with Mr. Wayne's past. One of those was John Lofton, whose open letter to John Wayne appeared in the Los Angeles Herald Examiner.

"John, Senator ALAN CRANSTON is running around excitedly quoting you for the first time in his liberal life. Repent."

[From the Los Angeles Herald Examiner]

DUKE'S HEADED OFF AT THE PASS

WASHINGTON.—An Open Letter to John Wayne:

DEAR MR. WAYNE: Since you're a straight-from-the-shoulder kind of guy, I'll mince no words: you've been had. By whom I don't know, but you've definitely been sold a bill of goods.

In your four-page, single-spaced letter to me, and presumably others who have asked you about it, you say that you support the Panama Canal Treaties because: "We do not give up one single active military installation for the next quarter of a century."

Well, Duke, you're wrong. You say that you have "carefully studied" the treaties. But in order to fully understand what they commit us to doing, you have to read not only the treaties but also the accompanying documents as well. One man who has done this is Sen. James Allen (D-Ala.).

In testimony before the Senate Foreign Relations Committee, Sen. Allen says of the Executive Agreement in Implementation of Article IV of the Canal Treaty:

"The defense provisions set forth in the executive agreement are themselves unworkable and portend a complete withdrawal of the U.S. forces from the Canal Zone well in advance of the projected date of 2000 A.D. The Administration proposes in this first executive agreement to surrender 10 out of 14 bases. Thus, we are asked at the outset to permit the surrender of 10 out of 14 military bases and to permit our forces defending the Canal to be hemmed in from day one to four relatively small enclaves.

"These bases would indeed be enclaves because our freedom of action outside of the four bases would be severely limited by the treaty requirement for approval of operations by a joint military board in which the U.S. and Panama will have equal authority. Apparently, the doctrine of unity of command is imperfectly understood at the Department of State, but the Panamanians no doubt recognize fully that this provision of the executive agreement would give a de facto veto of U.S. operations outside of the four retained bases.

"So our forces would be restricted to four relatively small enclaves, and only the naive would doubt that we would very soon see pressure on our forces to withdraw from the four sites retained. That process of withdrawal would be facilitated by the fact that the executive department could close down any one or all of the remaining bases by amendment of the executive agreement with the stroke of a pen without the consent of the Senate or the consent of the Congress."

In your letter you also say that the Canal Treaties are "worthy of the Conservatives' backing" because "although we had the rights to the ownership and jurisdiction of the Canal that Panama had not surrendered sovereignty (sic) of same . . . as it was originally stated in the 1903 agreement." But, again, you are mistaken, Duke. In a detailed thoroughly-documented analysis for the American Enterprise Institute, Hanson Baldwin, The New York Times' military affairs reporter for 40 years, writes:

"History and the law appear to indicate that there is no merit whatsoever to the concept that the treaty of 1903 vested so-called titular sovereignty or residual sovereignty in Panama.

Finally, Duke, you say that the new Canal Treaties will not "cost the American taxpayer one cent," that "we will not be required to pay $1 to Panama . . . But, once more Duke, you haven't done your homework. First, by the very act of giving the Canal and the Zone to the Panamanians, we are relinquishing something that over the past 74 years has cost the United States an estimated $7 billion.

Sincerely,

JOHN LOFTON, Jr.

CRITIQUE OF FOREIGN MILITARY TRANSFERS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues a paper prepared recently by Spider Burbank of the Military Audit Project here in Washington.

While I cannot pass judgment on the statements and conclusions of this paper, I feel it does raise several serious questions which deserve careful scrutiny by the Congress. In particular the possible role of the Federal Financing Bank, under the supervision of the U.S. Treasury, in facilitating arms transfers needs to be examined.

I am writing the Department of Defense and the Department of the Treasury about the allegations made in this paper and will put their replies into the RECORD when they are received.

The paper of the Military Audit Project follows:

FOREIGN MILITARY TRANSFERS—CREDIT ARRANGEMENTS AND SALES TO THE THIRD WORLD: METHODS, LOOPHOLES, AND CIRCUMVENTIONS

Contrary to the stated intent of Jimmy Carter's arms transfer policy statement of May 19, foreign policy sales have increased throughout fiscal year 1977. The ineffectiveness of this "new" policy demonstrates the difficulty of limiting an arms transfer program which has become an integral and important part of the nation's military-industrial economy and of U.S. foreign policy. Since 1965 the U.S. has dominated the world arms market; it is presently the supplier for over 50% of global arms sales. As a result of the exploitation of the commercial possibilities of arms sales, and of the increasing political usage of arms sales, weapon transfers have grown from $3.5 billion in foreign military orders, military assistance grants, and commercial exports in 1970 to over $9 billion in 1976. For the fourth month period from May 19, 1977 to September 15, 1977 the Pentagon has notified Congress of specific foreign military sales which amount to over $4 billion.[1] The administration's most recent figure for total fiscal year 1977[2] arms sales is $11.3 billion, or $1.4 billion more than previously estimated.

THE FOREIGN MILITARY SALES CREDIT PROGRAM

Part of this weapons sales program is a credit program administered by the Department of Defense (DoD) to enable foreign countries to buy weapons on credit supplied by the U.S. government. As funds for the military assistance program (a straight give away of arms) have been cut (from over $2 billion in fiscal year 1957 to $247 million in fiscal year 1977), foreign military credit sales have become more important. These sales are financed with direct credit from DoD or with DoD guarantees of loans to foreign governments for weapon purchases. Ceilings on these aggregate credit sales were over $2 billion in 1974, 1976, and 1977. "[A]s of October 1, 1977, DoD was guaranteeing 117 loans with an unliquidated value of $3.1 billion."[3]

The credit program is sanctioned by section 23 of the Arms Export Control Act of 1976 which states that the "president is authorized to finance procurements of defense articles and defense services by friendly foreign governments and international organizations . . ." Additionally, section 24 states that the president may guarantee any corportation or other juridical entity doing business in the U.S. "against political and credit risks of nonpayment arising out of their financing of credit sales of defense articles to friendly governments . . ."[4] These credit and guarantee authorizations are under "Chapter 2—Foreign Military Sales Authorizations" of the Arms Export Control Act. They are mandated for the foreign military sales program, i.e., government to government transactions.

THE FEDERAL FINANCING BANK

The role of another government agency, the Federal Financing Bank (FFB) adds another, complicating, dimension to arms transfers. The FFB was established in 1973 to meet the growing demands for funds for federal and federally assisted borrowing proposals. The bank is under the supervision of the U.S. Treasury; its funds are provided by the Treasury. As an off-budget agency, the bank's loans are not directly appropriated and authorized by Congress. Consequently, they are freed from the discipline of the federal budget and are not included in budget outlays. Thus, while the FFB has $33.8 billion in outstanding loans as of August 31, 1977 none of these outlays have been or will be recognized as federal expenditures.

After 1973, when Congress prohibited the Export-Import Bank (also a government agency) from financing arms purchases by foreign governments, DoD, through its guarantee program, began channeling FFB funds to foreign countries for such purchases. Paradoxically, Congress opened up this source of funding by amending, in 1974, section 24 of the Arms Export Control Act to allow DoD guarantees of FFB credit extended for foreign military purchases.[5] This FFB-financed arms sales credit program is enormous: borrowings totalled $2.6 billion as of October 1, 1977.[6] Additionally, FFB loans are at an interest rate set only to recover the cost of money to the U.S. government (a rate which is substantially below that of prime commercial loans). As a result, the FFB is effectively subsidizing the purchase of arms by foreign countries which could not otherwise gain such low interest loans.[7]

Section 31(a) of the Arms Export Control Act appropriated $740 million for fiscal year 1977 to the executive branch to carry out the credit and guarantee programs for foreign military sales as authorized by sections 23 and 24 of the same act. However, use of FFB financing by DoD involves another $2.6 billion more in U.S. government money. Thus, while Congress appropriated $740 million for the credit and guarantee programs, over $3 billion in public funds is actually being utilized for these programs.

Section 31(b) of the Arms Export Control Act states that "the aggregate total of credits . . . extended pursuant to this Act and of the principal amount of loans guaranteed by the U.S. government . . . shall not exceed . . . $2,022,100,000 for the fiscal year 1977 . . ." DoD exceeded this ceiling in March, April, May, June, July, and August 1977 solely with aggregate guaranteed borrowings from the FFB of $2.046, $2.069, $2.114, $2.145 $2.189, and $2.293 billion respectively.[8] However, DoD has interpreted the above legislation to apply only to credits extended and loans guaranteed with fiscal year 1977 appropriations. Many of the loans currently outstanding were guaranteed in fiscal years 1976 and 1975 with money appropriated for those years. By virtue of its literal and perhaps extralegal interpretation DoD unilaterally exempts these loans from the Congressional ceiling and thereby circumvents this ceiling.

The wording of the legislation, as quoted above, refers to "aggregate," i.e., total borrowings. This concept implicitly includes all outstanding loans, whether borrowed during fiscal year 1977 or previous to then. However, Congress did not explicitly include under the credit ceiling current borrowings on commitment agreements established previous to fiscal year 1977. This lack of exact limitations was seized upon by DoD as a method by which to escape the aggregate dollar limitations imposed by Congress for fiscal year 1977. During this fiscal year actual borrowings from the FFB for arms purchases more than doubled, growing from $1.1 billion on September 30, 1976, to $2.6 billion on October 1, 1977.

"COMMERCIAL" TRANSACTIONS

As stated above, the credit and guarantee programs are authorized within the context of the foreign military sales program, and, as such, are limited to government to government transactions. No commercial purchases (i.e., direct foreign country-private contractor deals) may be legally financed with direct credit from DoD or with DoD guarantees of FFB loans (or any other loans). However, in the first four months alone of fiscal year 1977 54 separate commercial transactions, totalling more than $41 million, were arranged with total financing through DoD credit and guarantee programs in gross disregard of the law. The "commercial" sales are less easily monitored than sales under the foreign military sales program. This makes disclosure and knowledge of these sales less probable.

Public ignorance about the fiscal year 1977 sales to Uruguay provides a case in point. Seven "commercial" sales were made to that country in the first four months of fiscal year 1977, involving over $294,000 in credit, guarantees, and/or loans. Furthermore, from September 30, 1976, to August 31, 1977, eight loans, amounting to over $1 million, were extended from the FFB through DoD, with DoD guarantees, to Uruguay for the purchase of armaments. These deals appear illegal in light of the prohibition written into the Foreign Assistance Act of 1977 (which authorized and appropriated the funds for the Arms Export Control Act programs, [i.e., foreign military sales]). Section 505 of this Foreign Assistance Act states:

"None of the funds appropriated or made available pursuant to this Act shall be used to provide military assistance, international military education and training, or foreign military credit sales to the Government of Uruguay."

However, the credits used by Uruguay in fiscal year 1977 are drawdowns on two commitment agreements established and guaranteed previous to fiscal year 1977. They do not involve any fiscal year 1977 expenditures and therefore are not prohibited by the 1977 Foreign Assistance Act legislation.[9]

The arrangement of these commitments illustrates how DoD circumvents the intent of the law. One commitment agreement, for $2.5 million, was guaranteed by DoD on September 29, 1977, that is, two days before the beginning of fiscal year 1977. The other agreement, for $7.5 million, was signed on June 30, 1975. The commitment period continued until June 30, 1977. However, this agreement was extended through December 30, 1977, by an amendment signed by DoD on August 8, 1977.

The existence of these agreements and the borrowings and sales based upon them brings into question the willingness of Congress to back the intent of the law it legislates. As in the case with the ceiling on loans guaranteed by DoD, Congress, by allowing the present procurement of weaponry financed by current loans made available through past commitment agreements, offers DoD a method by which to circumvent its intent. Thus, the pipeline of armaments to Uruguay can

Footnotes at end of article.

continue unimpeded partially due to the neglect or tacit assent of Congress.

This lack of control over past commitments is neither necessary nor inevitable. Congress could have enacted stricter prohibitions, by simply disallowing drawdowns on commitments previously established, or by cancelling those borrowing commitments to Uruguay. The recent French action of refusing to deliver naval vessels already built for and bought by South Africa offers a viable, refreshing, and forceful policy alternative.

DISCLOSURE REQUIREMENTS

Any attempt to monitor and control weapon sales to foreign countries is limited by the weak disclosure requirements of the Arms Export Control Act. Under sections 36(a) and (b) of that act, Congress must be notified only of sales of $1 million or more of major defense equipment if that equipment is exported commercially.[10] For sales of major defense equipment under $1 million and all other sales of defense articles of any value no notification is required. The exporter need only obtain a license from the Department of State. Under the foreign military sales program the same requirements apply, except that Congress must be notified of and has veto power over sales of any defense articles of $25 million or more and over sales of major defense equipment of $7 million or more.[11]

SALES TO THIRD WORLD COUNTRIES

The disclosure requirements, within the context of Carter's arms transfer policy, may have some success in limiting multi-billion and multi-million dollar sales to oil rich and/or economically developed countries (although the AWACS sale to Iran demonstrates the superficial nature of these requirements and of Carter's policy).[12] However, the same requirements are completely ineffective in limiting (and in acknowledging) 1) the transfers of less costly weapons, especially counter-insurgency weapons, to third world countries in Latin America, Africa, and Asia and 2) the use of DoD credit and guarantee programs for the financing of some of these arms transfers. Although such transfers represent a minor percentage of total U. S. arms sales[13] their military significance is crucial for the stability of the governing regimes in these third world countries. Additionally, because direct purchase of armaments would threaten the relative health of the already shaky economies of many of these poor countries, the availability and usage of DoD credit and guarantee programs are essential for the purchase of military equipment. Thus, while the sales and credits extended to third world countries make up a relatively small percentage of total U. S. foreign military sales and credits,[14] they are of major significance for the maintenance of global economic and political spheres of influence.

Within this context it is appropriate to analyze the impact of Carter's arms transfer policy on the sales of arms to third world countries.[15] Unfortunately, despite its declared intent, this policy has had and will have little impact on these arms transfers. Numbers 2, 3, and 4 of the set of controls included in the May 19, 1977 policy statement refer to "advanced weapons systems" and "significant weapons." They have no effect upon the sale of less costly weapons to third world countries.[16] Number 5 and 6 of the set of controls pertain to retransfers of weapons (to third party countries) and to the actions of sales agents. Number 1 of these controls states that the dollar volume of new foreign military sales commitments will be reduced in fiscal year 1978 from the fiscal year 1977 total. However, weapon sales to poor countries represent, as stated above, a minor percentage of total weapon sales already, and thus will not be substantially affected by an overall reduction in sales. Also, commercial sales are explicitly exempted from Carter's ceiling.[17] DOD need only continue its illegal practice [18] of labelling "commercial" sales which are financed through the foreign military sales program. In this way, these sales circumvent any limitations imposed by the "ceiling" stated in the new policy. With commercial arms sales steadily growing, from less than $500 million in 1970 to over $1.2 billion in 1976, and with the prediction of a further increase in these commercial sales in fiscal year 1977, the significance of this loophole cannot be underestimated.

Two assertions within the policy statement extend some possibility of limiting arms transfers to third world countries. "In formulating security assistance programs consistent with these controls, we will continue our efforts to promote and advance respect for human rights in recipient countries." Also, as an introduction to the controls, it is stated that "the United States will henceforth view arms transfers as an exceptional foreign policy implement . . ." However, the next sentence provides the catch for both assertions: "We will continue to utilize arms transfers to promote our security and the security of our close friends."

"Our security" refers to the maintenance of the United States' political and military spheres of influence, and to the corporate economic interests which these spheres of influence protect. Many of these economic interests are based in the economies of countries dominated by repressive governments, the same governments which are, not incidentally, within the United States' political and military spheres of influence. "The security of our close friends" allows for arms transfers to such third world countries. These transfers, especially of counter-insurgency weapons, help to insure the security of the repressive governing regimes and of the U.S. economic interests found in those countries. Under Carter's "new" policy, such transfers to these third world regimes can continue unimpeded.

Actual fiscal year 1977 borrowing commitments to foreign countries for the purchase chase of armaments bear out this assertion. As noted previously, the total amount of outstanding loans guaranteed by DOD for arms purchases has increased by over $1.5 billion in fiscal year 1977, with at least one third of that increase coming after May 19, 1977. Furthermore, according to Robert Hammond, Comptroller of the Defense Security Assistance Agency of DOD.[19] DOD guaranteed 22 new loan commitments to third world countries for borrowings of over $500 million from the FFB. Additionally, from May 19 through August 31, 1977, over $165 million was drawn down from the FFB on commitments previously established for military purchases by third world countries.[20] The countries which are beneficiaries of these borrowings include Argentina, Brazil, Haiti, Indonesia, Nicaragua, Uruguay, Thailand, South Korea, and the Philippines. The fact that Carter's policy has not curtailed arms sales to these countries, in which human rights have been flagrantly denied,[21] challenges the sincerity and demonstrates the ineffectiveness of Carter's stance.

CONCLUSION

Carter's position both reflects and takes advantage of Congressional ambiguity. The Arms Export Control Act asserts ". . . it remains the policy of the United States to encourage regional arms control and disarmament agreements and to discourage arms races." It also states that it is ". . . the sense of Congress that sales [of weapons] and guarantees [of borrowings for such sales] . . . shall not be approved where they have the effect of arming military dictators who are denying the growth of fundamental rights or social progress to their own people . . ." However, Congress, in the same sentence, gives authority to the president to waive this limitation when "it would be important to the security of the United States . . ." Furthermore, section 4 of this act states that defense articles and services shall be sold to friendly countries for "internal security".

DOD has taken advantage of these loopholes and those in Carter's own policy statement to continue without abatement arms transfers and the financing of such transfers. Thus, the contradictions within the law and the weakness of Carter's policy provide the means by which the declared intent of the law and of the "new" policy are overridden. Indeed, the institutional policy determinations of the Department of State and Department of Defense have led to an increase in the availability and usage of military armaments at the nation-state, regional, and global level. Total foreign military sales, total commercial weapon sales, and the aggregate value of outstanding loans for arms purchases guaranteed by DOD have all increased in fiscal year 1977, with much of the increase coming after the announcement of Carter's policy. The fact that the recipients of this weaponry include many repressive and dictatorial regimes underscores the frightful and repulsive reality of this sales program.

FOOTNOTES

[1] Because of weak disclosure requirements, this figure does not include numerous commercial and governmental sales. See below, "Disclosure Requirements".

[2] Fiscal year 1977 ran from October 1, 1976 to September 30, 1977.

[3] *DMS Intelligence on Aerospace*, 5 (45), November 7, 1977, p. 2.

[4] When DoD guarantees a commitment for borrowing it puts aside the equivalent of 10% of the commitment in a reserve fund. As the commitment is amortized (or cancelled,) proportionate sums of money are withdrawn from the reserve fund and transferred to the Treasury. If a country defaults on a loan, as Zaire has recently done, the bank which extended the loan is paid the total amount of principal and interest owed it with money from the aggregate guarantees deposited in the reserve fund. (Zaire was recently unable to pay $9.7 million in unliquidated balances on loans from two U. S. commercial banks. DoD assumed and repaid these debts in total. Thus, the arms which Zaire "purchased" with this financing are in fact free transfers paid for by the U. S. these debts in total. Thus, the arms which government. See *DMS Intelligence on Aerospace*, p. 1–2.)

[5] Previously, no DoD guarantees were allowed for loans extended by *any* U.S. government agencies.

[6] *DMS Intelligence on Aerospace*, p. 2.

[7] The FFB had loans to DoD for over $2 billion in April, May, June, July and August 1977. The rates of interest varied from 5.94% to 7.804%. The current prime rate on lending (the rate at which money is available to commercial banks) is around 9%. Banks usually charge 1 percent to 2 percent above the prime rate. When the FFB began providing loans for arms purchases many countries switched from commercial financing to DoD financing. However, section 2 of the Federal Financing Bank Act of 1973 states that borrowings from the FFB should be "financed in a manner least disruptive of private financial markets and institutions." Therefore, the substitution of FFB credit for commercial credit may be contrary to the intent of the law establishing the FFB.

[8] These figures do not include DoD direct credits or DoD guarantees for private commercial financing. If these monies are included with the FFB loans the aggregate totals exceed the ceiling even more substantially. As quoted previously, "According to a

Footnotes at end of article.

DoD spokesman, as of October 1, 1977, DoD was guaranteeing 117 loans with an unliquidated value of $3.1 billion." (DMS *Intelligence on Aerospace*, p. 2).

[9] There may be some minor administrative costs which are actual fiscal year 1977 expenditures. Such costs do appear to be illegal in light of the 1977 Foreign Assistance Act language.

[10] Articles which are classified as "major defense equipment" have non-recurring research and development cost of more than $50 million, or have a total production cost of more than $200 million.

[11] Congress must also be notified of the cumulative value of all foreign military sales to each country. However, not even this minimal reporting requirement applies to commercial sales. In any event, such cumulative reports are useless for the identification of specific low cost sales, including those of counterinsurgency weapons. See below, "Sales to Third World Countries".

[12] See Klare, Michael T., "How We Practice Arms Restraint", *The Nation*, September 24, 1977.

[13] From fiscal year 1950 to fiscal year 1976 these weapon transfers amounted to less than one seventh of total foreign military sales agreements and of total commercial exports.

[14] Less than 20 percent of U.S. weapon sales to foreign countries are financed though DoD credit and guarantee programs. Of this 20 percent, approximately two thirds is extended to Israel, Greece, Turkey, and Spain. This leaves less than one billion dollars in financial assistance for poor third world countries.

[15] For a detailed critique of the impact of Carter's policy on all types of sales, see Klares.

[16] It should be noted that these weapons include light helicopters and airplanes, machine guns, and antipersonnel devices, all of which are essential for counter-insurgency operations by repressive regimes.

[17] Control No. 1 of Carter's set of controls reads, "[t]he dollar volume . . . of new commitments . . . for weapons and weapons-related items in [fiscal year] 1978 will be reduced from the [fiscal year] 1977 total. Transfers . . . classified as services are not covered, *nor are commercial sales* . . ." (emphasis mine).

[18] See above, "Commercial Transactions."

[19] ——.

[20] These figures exclude loans to Israel, Turkey, all European countries, and oil rich nations such as Iran, Saudi Arabia, and Kuwait.

IMPOSSIBLE BURDEN ON FAMILY CORPORATIONS

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. HAGEDORN. Mr. Speaker, while the Tax Reform Act of 1976 effected a great number of significant changes in Federal tax law, none, in the long run, is likely to prove as costly to the average property owner as section 1023 which provides for the carryover of basis at death. As noted by Theodore Gelt in the American Bar Association Journal, section 1023 will "increase the cost of dying and the complexity of estate administration."

The impact of section 1023 will be felt most heavily, as is normally the case with tax increases, by the middle class and by owners of moderately sized estates. I would like to insert, at this point in the RECORD, a brief discussion of the impact of the new capital gains tax upon family corporations. The discussion is taken from the Estate and Tax Letter published in my district by Orris M. and Douglas W. Johnson, C.L.U.'s.

Their recommendation that the new "carryover basis" be repealed is one with which I agree strongly. The ultimate purpose of our tax code is to raise revenue, not to alter the lifestyles of Americans or to redistribute wealth in a manner favored by the social planners in Washington.

The text follows:

NEW CAPITAL GAINS TAX IMPOSES IMPOSSIBLE BURDEN ON FAMILY CORPORATIONS

The 1976 Tax Reform Act provides, for the first time, that when an individual dies the cost basis of his property will "carry over" to his estate and his heirs. Congress eased the immediate impact of this law by providing a "fresh start" on December 31, 1976, but for new businesses started after 1976 the effect of the new law is to impose a capital gains tax at death on all future sales of appreciated assets, even when they are sold to raise money to pay estate and inheritance taxes and expenses of administration. This tax would be added on top of the present estate tax, which starts at a 30% rate. The serious impact of these combined death taxes on one's incentive to start and build a family business is graphically demonstrated by the following figures:

1. Assume a $100,000 business started after 1976, which at the time of the founder's death is worth $3,000,000, no marital deduction and no other assets:

Funeral and administration expenses	$125,000
Estate taxes and inheritance tax credit	1,225,000
Capital gains tax (after adding the proportion of estate and inheritance tax to basis)	267,000
Minimum tax on capital gain	40,000
Total taxes and expenses	1,657,000

There is not one medium-size family business out of 100 that could come up with this amount of money without wrecking the business. Nor could such a company afford to purchase enough life insurance to pay such taxes. And the installment payment provisions will merely serve to convince the founder that building such a business is not worth the effort.

But this is not all. Section 303 is not available to provide funds to pay the two capital gains taxes. But they must be paid. The corporation can only pay them by declaring a dividend. But the estate must pay income tax on the dividend. Calculations will demonstrate that a dividend of at least $870,000 will be needed to pay all the income taxes, both ordinary and capital gain. Thus $2,220,000 will have to come from the $3,000,000 corporation to pay administration expenses, death taxes and income taxes.

2(a). Assume the same $100,000 business organized after 1976, which is worth $3,100,000 at death, a maximum 50% marital deduction and no other assets:

Funeral and expenses of administration	$130,000
Estate taxes and inheritance tax credit	501,000
Capital Gains Tax	172,000
Minimum tax on capital gains	27,000
Total death taxes and expenses	830,000
Plus additional dividend to pay ordinary income tax on $199,000	368,000
Total taxes and expenses	1,198,000

2(b) When the wife dies later on, the expenses, death taxes and income taxes on her $1,485,000 estate would aggregate $870,000.

Total administration expenses, estate and inheritance taxes, and income taxes on both estates would amount to over $2,000,000, thus leaving less than $1,000,000 to represent the lifelong efforts of the founder of the business.

It must never be forgotten that the carryover basis also applies to "old" family businesses, i.e., those organized or acquired before 1977, pursuant to an arbitrary formula that prorates total appreciation between the period before 1977 and the period after 1976. If, for example, the business was organized in 1967 and the owner died in 1987, one-half the appreciation would be taxable. Thus, the amount of capital gains tax will increase automatically as each year goes by, regardless of whether there is actually any appreciation.

There are only two possible solutions:

1. The best step would be to eliminate the "carry-over basis", which (a) causes serious multiple administrative and tax problems never foreseen; (b) destroys the incentive to build medium-sized businesses; and (c) would produce no meaningful revenue during the next two decades.

2. The only alternative, as we see it, is to provide that the basis of assets be stepped up in an amount that would equal the total of the following estate liabilities by (a) funeral expenses, administration expenses; (b) estate taxes, and (c) inheritance taxes. These are the same items as those listed in Section 303, which authorizes the redemption of sufficient stock in a family corporation to raise funds to pay them. To be fair, this step-up of basis should apply to all estates, whether Section 303 can be used or not. Perhaps the best and most easily understood solution would be to let the executor select assets having a value equal to the Section 303 liabilities.

Looking at the realities of the situation there is no other solution, if Congress is to give effect to its oft-stated view that family businesses constitute the fundamental basis of our private enterprise system.

VEYSEY SOUNDS WARNING ON ACREAGE LIMITATIONS

HON. CLAIR W. BURGENER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. BURGENER. Mr. Speaker, although he no longer serves in this Chamber, I know that our former colleague, Vic Veysey, still enjoys tremendous respect among those he served with here. Vic Veysey was my predecessor in representing the people of Imperial County, Calif., who are currently under economic ransom at the hands of the U.S. Department of Interior because of proposed regulations to enforce the outmoded Reclamation Act of 1902. Vic Veysey recently presented testimony at public hearings on these proposed regulations, and his observations, both as a family farmer and former Member of this House, are some of the most enlightening I have read on this controversial issue. I am certain those who know Vic Veysey know he does not indulge in exaggerated or overblown rhetoric.

I commend his provacative words to those of you who are unfamiliar with just what the Interior Department is seeking to do.

STATEMENT OF VICTOR V. VEYSEY BEFORE HEARING PANEL ON PROPOSED REGULATIONS ENFORCING 160-ACRE LIMITATION OF THE RECLAMATION ACT

1. My name is Victor V. Veysey. I own and operate a farm of about 800 acres north of Brawley, California, in Imperial County. We lease additional land, farming a total of 1200 to 1500 acres.

2. Although I currently live in Pasadena, California, I have resided much of my life on the farm near Brawley.

3. I have had the honor of serving the people of Imperial and Riverside Counties as their Representative in the State Legislature and in the U.S. Congress. I can tell you that there has been no issue with respect to government in the past 25 years which has so united and galvanized the people of this area as has the perceived betrayal by Washington in seeking to apply the Reclamation Act of 1902 after making solemn pledges that this would never happen. Their cry for "FAIRNESS" will not be silenced until you in Washington understand that lands within the Imperial Irrigation District are not, have not, and should not, be subject to the restrictions of the Reclamation Act.

4. The farm I own was, in major part, reclaimed from the desert by my father who joined with his neighbors to develop canals and ditches, to level and tile the land, and to convert the blowing sand to highly productive acres which have fed and clothed thousands. This conversion from desert waste to a garden spot was accomplished by private effort; no federal funds or input were involved.

5. Following my father, I have farmed this land since 1949. My three sons are now farming this and other land in Imperial Valley, and they would like to continue to do so. We feel we have won the right to farm that land and we have firmly established our rights to the water prior to Federal intervention here. We plan to maintain our rights.

6. I would not know what the definition of a "family farm" is from a technical point of view—but I think I can show one (ours) and I believe I have just described one.

7. During a flood on the Colorado in 1905, the River broke out of its banks and flowed for 2 years through Imperial Valley to form the Salton Sea. That flow cut a canyon 50 feet deep and several hundred feet wide across our farm. The Federal government did nothing to help, but the flow was finally controlled by private endeavor and private funding.

8. I recall as a young boy hearing my father discuss whether or not the Imperial Irrigation District should join in the Federal compact which brought major Federal changes in the Colorado River. There were advantages:

(a) Controllable supply of water despite drought or flood;

(b) Clear water—free from silt for low cost ditch maintenance;

(c) Lower maintenance cost of irrigation system.

And there were disadvantages:

(a) Loss of fertile silt deposited annually to renew the soil;

(b) Obligation to repay costs of improvements;

(c) Concern that if the Federal government came in, they might apply the 160 acre limitation and thus imperil our rights and property.

9. Doubts on the last point were so strong for my father and other land owners that they opposed the compact until:

a. A good faith, categorical answer in writing was obtained from the then Secretary of the Interior that Imperial Valley would never be under the restrictions of the Reclamation Act, and

b. A legal action was settled by a Court determination that the 160 acre limitation would not apply to Imperial Valley.

With these good faith assurances, my father and others dropped their opposition and voted in the compact, and entered into a bargain with the Federal government. Now it appears that the government wants to back out of the bargain.

10. Although spasmodic talk about invoking the 160 acre limitation has been heard over the 40 years since those decisions, there has not been, until 1977, any policy decision by the government to overturn the good faith assurances of long standing. Now, I perceive a group within the Interior Department desiring to bring about land reforms without specific legislative authority other than a tortured application of the Reclamation Act of 1902.

11. As I understand the 160 acre and residency restrictions of the Reclamation Act of 1902, they were designed to prevent any person from obtaining a windfall by acquiring large tracts of unwatered desert land at a very low price and selling it at a high price after the government had brought the land under irrigation in a reclamation project. This does not match the factual situation of the Imperial Valley where the land and irrigation were developed by private initiative and private resources. There was no windfall; only dust and sweat.

12. Apparently Interior in promulgating the proposed regulations before us today has decided to apply restrictions of the Reclamation Act to areas never intended to be subject to it, and has decided to include other restrictions not authorized by any law. My answer to these efforts is: "Go to Congress and ask for that type of authority—if you think you can get it. Don't use your bureaucratic, non-elected status to undertake agrarian reforms. You have a responsibility to establish faith and credibility in government."

13. In sum, the official history and activities of the United States Government over this entire century have been that the Reclamation Act of 1902 does not apply to Imperial Valley. More than seventy years of history sustain the rights of private landowners to their land and to their water. How can you undertake, without new legislation, to reverse that? To do so is perfidy by the government against its people. It would be an unconstitutional taking without compensation—and it will have major consequences.

14. While my position is that this area has not, is not, and should not be subject to the Reclamation Act restrictions. I nonetheless will state some problems with the regulations you have out for comment.

15. The unsupported finding that the regulations do not necessitate an Environmental Impact Statement and an Economic Impact Statement as required by law is a piece of arrogance that has seldom been matched in government. Of course you are subject to the general laws of the United States! Of course there are major environmental and economic effects of these regulations! The law requires that these be analyzed and presented publicly—and the obligation is on you. I am dismayed that a Secretary of the Interior, purporting to be a prominent environmentalist, can move with such disregard for the National Environmental Protection Act. I understand that the Secretary is required by the President to read all regulations, and I assume he approves what he reads and publishes in the Federal Register.

16. The 160 acre concept is outmoded and should be reexamined. Is that the correct number? Should this figure, derived from the Homestead Law, be adjusted or abandoned because it does not fit the circumstances of today? Interior should be addressing these concerns with the Congress.

17. A complex and arbitrary set of rules has been proposed defining the status of individuals, partnerships, corporations, relatives, lineal descendants, etc., under the regulations. They produce some illogical results that are indefensible. Sure, I have plenty of grandchildren to whom I can parcel out land. But what about the person not so situated? And why should I or my sons have to go through a legal sham to enjoy rights won from the desert and a rebellious river long before the government had any concern?

18. Your regulations place a limit of 160 acres on leased land. Where, in law, do you find any authorization to do that?

19. The proposed regulations require residency within 50 miles of the land to obtain delivery of water. Where and when has that standard ever been applied? Do you mean to strip a person of advanced years of his only assets because his health no longer permits residency in this severe climate?

20. What kind of concept of fairness empowers you—by promulgating severe regulations on which you have already waffled—to bring the economy of Imperial Valley to a halt? Sales of land have ceased under your threat. Tiling, levelling, and concrete ditch improvements have stopped. You have done substantial harm and have accomplished nothing.

21. Your concept of taking excess lands to offer in a lottery has no merit. Don't you believe the owner has some rights in the negotiation of any sale? Why play the role of a demagogue in raising the hopes of landless people that they may receive, by lottery, a well developed 160 acre farm on which they may live in prosperity?

22. The economics of farming work strongly against the viability of a 160 acre tract under conditions of modern agriculture. Look around you while you are here on this visit. Consider what the economic fate of the small operator will be, then decide if you want to condemn people to a lifetime of toil, heartbreak, and failure by acting as Robin Hood.

23. In closing, let me tell you what I will do if you apply these regulations to me. I will avoid them to the legal limit of my ability. I will not execute any contracts to sell nor turn the land over to the government. I will farm with the water I am granted and I will sue you for the rest of my entitlement. That part of the farm that goes dry will quickly turn barren, and the dust will blow. I invite you to sit on the porch and rock with me while we discuss the merits of a powerful Federal government and watch the world's most productive acres turn back to desert.

SENATE—*Friday, December 2, 1977*

(Legislative day of Tuesday, November 1, 1977)

The Senate met at 11 a.m. on the expiration of the recess, and was called to order by the Acting President pro tempore (Mr. METCALF).

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate stands in recess until Tuesday next.

RECESS UNTIL 1 P.M. TUESDAY, DECEMBER 6, 1977

Thereupon (at 11 o'clock and 4¾ seconds a.m.) the Senate recessed until Tuesday, December 6, 1977, at 1 p.m.

EXTENSIONS OF REMARKS

INSURANCE COMPANY PROPAGANDA UNTRUE

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. LaFALCE. Mr. Speaker, as chairman of the Subcommittee on Capital, Investment and Business Opportunities of the Committee on Small Business, I have been studying the problem of the lack of availability/affordability of product liability insurance presently being experienced by many businesses across our Nation.

Many of you have seen insurance company advertising reciting the legendary product liability case wherein a lawnmower was used to trim a hedge, the user injured, and a successful suit brought against the manufacturer. Further, many of you have seen insurance company advertising reciting the "fact" that product liability cases have increased to almost 1,000,000 per year. Recently it has been revealed that the now famous lawnmower case cannot be substantiated, and that the million claim figure is blatantly overstated.

In an article appearing in Business Insurance by Jerry Geisel, he traces the development of the lawnmower story and attributes its origination to a lawyer in Wichita, Kans. That lawyer claims to have read this in a newspaper article but is unable to further document this case. Despite this somewhat dubious origin, this story was circulated by the Insurance Information Institute, a public relations and educational organization supported by property and the liability insurance companies, and was carried by Crum & Foster in advertising which ran in Time, Newsweek, and Business Insurance as late as September 1977.

The 1,000,000 annual product liability claims figure was also widely circulated by the Insurance Information Institute and was mentioned recently in advertising by Aetna Life & Casualty Co. The validity of this figure was questioned as early as 1976 by representatives of the Insurance Services Office (ISO), the major product liability statistical-gathering and ratemaking organization for product liability insurers. ISO presently estimates the number of claims to range between 60,000 to 120,000 annually.

While both statements have recently been repudiated by the Insurance Information Institute and taken out of their literature, the incident nevertheless points out how portions of the insurance industry have used the advertising media to "sell" American industry on higher product liability rates through false advertising. Because of the lack of reliable data, it is presently impossible to determine whether the rate increases experienced by many firms in the product liability area are justified or result merely from panic pricing and will provide the insurance industry with windfall profits.

The insurance industry's accounting methodology helps to obfuscate the problem further. In information circulated by the Insurance Information Institute, an underwriting deficit of $2.22 billion was reported for 1976. However, during the same period, the industry reported an increase in net worth of approximately $5.73 billion, up 22 percent from the previous year. Further, assets increased an additional $18 billion representing a 20-percent increase from the previous year. If such substantial increases in net worth and asset size can occur during a period in which underwriting deficits are sustained, serious questions as to the meaning of these underwriting deficits must be raised.

The insurance industry, historically exempt from Federal regulation or monitoring, is becoming increasingly important in our complex and sophisticated society. This is evidenced by the product liability problem at present, the medical malpractice problem of recent years, and the false propaganda circulated in periodicals read by millions. The exemption from Federal scrutiny is becoming increasingly more difficult to justify and bears a continuing reevaluation from us in Congress.

HOUSE OF REPRESENTATIVES—*Monday, December 5, 1977*

The House met at 12 o'clock noon.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. ROSTENKOWSKI) laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
December 5, 1977.

I hereby designate the Honorable DAN ROSTENKOWSKI to act as Speaker pro tempore for today.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

The world passeth away and the lust thereof; but he that doeth the will of God abideth forever.—I John 2: 17.

O God, our Father, above us yet within us, far away yet ever near, grant unto us clear minds, clean hearts, and creative spirits as we begin the work of another week. In this center of freedom we do not ask for easy tasks but for strength to support us in our hard tasks, not for light burdens but for power to carry heavy burdens, not for smooth ways but for wisdom to walk in worthy ways.

We thank Thee for this America of the past and for the sacrifices and suffering which made her great. We thank Thee for the America of the present and pray that by our endeavors we may keep her great. We pray for the America of the future that to her greatness may come an increasing sense of goodness. Thus may our America be great and good for this age and for the ages to come. God help us so to do. Amen and amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of the clerks, announced that Mr. HATHAWAY be a conferee on the bill (H.R. 9346) entitled "An act to amend the Social Security Act and the Internal Revenue Code of 1954 to strengthen the financing of the social security system, to reduce the effect of wage and price fluctuation on the system's benefit structure, to provide for the conduct of studies with respect to coverage under the system for Federal employees and for employees of State and local governments, to increase the earnings limitation, to eliminate certain gender-based distinctions and provide for a study of proposals to eliminate dependency and sex discrimination from the social security program, and for other purposes," vice Mr. HASKELL, excused.

ADDITIONAL PROGRAM FOR TOMORROW

(Mr. MAHON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAHON. Mr. Speaker, according to the present schedule, tomorrow the House will consider the supplemental appropriation bill conference report and House Joint Resolution 662, a continuing resolution for the District of Columbia for the balance of this fiscal year. When I call up that resolution I plan to offer an amendment which will include the Departments of Labor and Health, Education, and Welfare at the rate of the conference agreement. That amendment will be printed in the RECORD of today in accordance with the rule providing for the consideration of House Joint Resolution 662.

As soon as I have offered my amendment, I will yield to the gentleman from Illinois (Mr. MICHEL), the ranking minority member of the Committee on Appropriations Subcommittee on Labor-HEW for an amendment concerning the abortion issue.

It is my understanding that Mr. MICHEL will offer the following amendment:

Provided, That none of the funds provided for in this paragraph shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term; or except for such medical procedures necessary for the victims of forced rape

or incest, when such rape or incest has been reported promptly to a law enforcement agency or public health service; or except in those instances where severe and long-lasting physical health damage to the mother would result if the pregnancy were carried to term.

Nor are payments prohibited for drugs or devices to prevent implantation of the fertilized ovum, or for medical procedures necessary for the termination of an ectopic pregnancy.

The Secretary shall promptly issue regulations and establish procedures to ensure that the provisions of this section are rigorously enforced.

This language is similar to that which the House voted on last week but it adds the words "forced" and "promptly" and strikes the phrase "or its equivalent."

I am hopeful that this language will be satisfactory to the House and that the Senate can reluctantly accept it, although I must make it clear to the House that there is no agreement with the Senate to that effect.

Mr. Speaker, this has been a long and difficult issue and I believe the time has come to get it behind us. I am hopeful that tomorrow will be the last vote on this issue.

COMMUNICATION FROM COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the Committee on Public Works and Transportation, which was read and without objection referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, D.C., November 30, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of section 2 of the Watershed Protection and Flood Prevention Act, as amended, the Committee on Public Works and Transportation has approved the following work plan transmitted to you which was referred to this Committee:

State, Iowa; project, Little River; Exec. Comm., 3758; approved, 11/29/77.

Sincerely,

HAROLD T. (BIZZ) JOHNSON,
Chairman.

PRESERVE U.S. CITIZENSHIP FOR AMERICANS WHO ARE BORN AND RESIDE ABROAD

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, I am introducing today a measure which will repeal certain residence requirements of citizenship for children of American citizens who are born outside of the Continental United States. This measure would benefit those families where one of the parents is an American citizen who desires to retain such American citizenship for his or her child.

Mr. Speaker, there are today many Americans residing abroad on a permanent or semipermanent basis, including many who are serving the interests of American business and Government, as well as many of our loved ones who are married to foreign nationals but who are anxious to retain their American citizenship and, of course, their American loyalties.

Mr. Speaker, it is quite understandable that such American parents would want to retain for their children the opportunity to continue American citizenship and we should encourage such an attitude, and make possible the means by which such American citizenship may be retained or established.

Mr. Speaker, I commend my colleague, Congressman JOSHUA EILBERG of Pennsylvania, chairman of the Subcommittee on Immigration and Naturalization of the House Judiciary Committee, who has likewise sponsored this measure (H.R. 9637).

Mr. Speaker, the Eilberg bill undertakes to repeal certain existing provisions of the law which, according to my information, have been held unconstitutional. However, my special interest is with respect to the provisions of section 301(b), and to a lesser extent with respect to section 350, relating to children of American citizens who are born overseas and who thus automatically acquire American citizenship at birth when one of the parents is an American citizen.

The requirements of section 301(b) presently provide that such foreign-born American citizens must reside for 2 continuous years within the United States between the ages of 14 and 28 years of age, or, in the alternative, lose his or her American citizenship. Indeed, the present requirement is such that American citizenship automatically expires on the 26th birthday of such American citizen unless 2 years' continuous residence in the United States begins prior to age 26.

Mr. Speaker, whether other sections referred to in the bill which I have introduced are repealed or not, it would seem most important to repeal this discriminatory requirement. In other words, American citizens, whether born here or abroad, should be entitled to equal protection of the laws as set forth in the 14th amendment to the U.S. Constitution. The repeal of section 301(b) would assure such equal protection.

Mr. Speaker, I feel also that the provisions of section 350 are unduly harsh with respect to American citizens who are born and reside abroad and who require dual citizenship by reason of their birth in a foreign country. Under the provisions of section 350, such American citizens automatically lose their U.S. citizenship where he or she resides in the foreign state of his or her birth for a period of 3 years after attaining the age of 22 unless, prior to the expiration of such 3-year period, he or she appears before a U.S. diplomatic or consular officer and takes an oath of allegiance to the United States. It is my understanding that much hardship and unintended results have been created by this requirement of section 350.

Mr. Speaker, I am pleased to join Congressman EILBERG in sponsoring this measure, and I hope that early hearings will be conducted, with the result that this proposal may be enacted promptly into law.

PANAMA CANAL: PROPOSED GIVEAWAY—TREATIES OPPOSED BY ADM. HORACIO RIVERO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

Mr. FLOOD. Mr. Speaker, one of the most perceptive statements in strong opposition to the proposed Panama Canal giveaway treaties, which were transmitted on September 16, 1977 to the U.S. Senate to secure its advice and consent to ratification, was an article by Adm. Horacio Rivero, U.S. Navy, retired, in a recent issue of the San Diego Evening Tribune.

The career of this distinguished officer includes the following assignments: 1945–48, in the Office of Atomic Defense, Navy Department, when he was an active participant in the naval collaboration with Isthmian Canal studies by the Governor of the Panama Canal under Public Law 280, 79th Congress; 1955–57, with the Armed Forces special weapons project; 1963–64, in naval planning and programing, Navy Department; 1964–68, as Vice Chief of Naval Operations; and 1968–72, as Commander in Chief, Allied Forces, South Europe.

In these capacities, he became well informed on the problems of the Panama Canal as well as its value in the defense of the United States and, indeed, of the entire free world.

The fact that Admiral Rivero is of Latin American origin and after retirement from active naval service served as U.S. Ambassador to Spain, 1972–74, add weight to his views. Among the major points in his article, Admiral Rivero makes the following:

First. Condemns the proposal for a sea level canal as "not only not required," but as a "fabulously expensive solution which would result in a canal infinitely more vulnerable than the present one."

Second. Stresses the strategic value of the Panama Canal as requiring "unquestionable assurance that the canal will be available under all and any circumstances."

Third. Supports the views expressed in the June 8, 1977, letter of four former Chiefs of Naval Operations to the President in opposition to the projected treaties.

Fourth. Exposes the fallacies in the "fear of sabotage" argument for new canal treaties by showing that the removal of the presence of the United States from the isthmus "would increase the probability that any sabotage attempted or any external attack would be successful."

Fifth. Refutes the major arguments of Ambassador Sol Linowitz for phasing out U.S. presence on the isthmus.

Mr. President, because of the authority and timeliness of the indicated article by Admiral Rivero, it should help clear away some of the crucial fallacies and distortions in current prosurrender treaty propaganda, and aid Members of the

Congress in their consideration of the complicated problems involved in the Isthmian Canal situation. Accordingly, I quote it as part of my remarks:

[From the San Diego Evening Tribune, Oct. 1977]

ADMIRAL OPPOSES CANAL TREATIES

(By Adm. Horacio Rivero)

The central issue can be narrowed to two questions.

Is the Panama Canal important to the security of the United States?

Will the security requirements be satisfied if the U.S. cedes the canal and zone to Panama?

Some proponents of the new Panama Canal treaties have deemphasized the strategic and commercial importance of the canal and its current value to our Navy.

The President, for instance, stated to the press: "Any large ship, an aircraft carrier, for instance, can no longer pass through it" and "In the last 12 months only four or five Naval vessels" have transited the canal.

Ambassador Sol Linowitz, one of the treaty negotiators, in his speech before the American Legion convention August 19, 1977, stated: "It is no longer vital, clearly no longer as useful as it once was for the shifting of combat forces."

The President was obviously misinformed. For it is not "any large ship" but only the 12 attack aircraft carriers, out of a naval inventory of almost 500 ships, that cannot use the canal, and it is not its utilization in normal peacetime that is important to the Navy, but the availability of the canal for redeployment of naval vessels in time of war or in time of crisis or in anticipation of war, as the international situation may demand.

In time of need some of the attack carriers can be redeployed around South America at high speed, taking advantage of their high endurance; those powered by oil might be accompanied by a fast replenishment ship (AOE) to insure their arrival with a full fuel load, while the three nuclearpowered ones could proceed on their own at an even higher speed. It is for the other types of naval vessels—the cruisers, destroyers, submarines, frigates, amphibious and mine warfare ships and logistic support ships which constitute the bulk of the Navy and do not have the great endurance at high speeds possessed by the attack carriers that the canal provides the greatest benefits. Of course it would be desirable for the attack carriers to be able to use the canal also; this can be made possible in the future by enlarging the canal locks or constructing additional, wider locks alongside the present ones, a project of reasonable magnitude. A sea level canal is not only not required, but would represent a fabulous expensive solution which would result in a canal infinitely more vulnerable than the present one.

A Navy like ours, which has been reduced in size to the point that it cannot be described as a two-ocean Navy, must have one means for quick and timely transfer of its ships from one ocean to the other, as demanded by strategic and operational needs. This is obviously important in wartime but equally important in periods of crisis or of international tension. The strategic mobility which is a characteristic of naval vessels and the ability to utilize this quality that we currently obtain from possession of the Panama Canal balance to a degree the risks inherent in the naval force level deficiencies. Without unquestionable assurance that the canal will be available under all and any circumstances, these risks would loom much larger.

The importance of the canal for "the shifting of combat forces" was well demonstrated in World War II and in the Korean and Vietnam conflicts. It has also been shown in time of crisis.

For instance, during the Cuban missile crisis, when military operations to remove the missiles by force were at one point imminent, it was possible to reenforce rapidly the Atlantic Fleet with a brigade of Marines from the Pacific, with their armament, ammunition, and full equipment, providing a most valuable addition to the Atlantic Fleet forces. If the canal had been in the hands of a government under Cuban or Soviet influence, or sympathetic to those countries, could the safe and timely passage of the ships have been assured in those circumstances?

To the opinion of Ambassador Linowitz is opposed that of four former chiefs of naval operations, one of whom had previously commanded the Atlantic and the Pacific fleets and later became chairman of the Joint Chiefs of Staff.

In their words: "Contrary to what we read about the declining strategic and economic value of the canal, the truth is that this interoceanic waterway is as important, if not more so, to the United States than ever." It is doubtful if any knowledgeable naval officer would dispute their view.

The commercial importance to the canal is also great but it is secondary to the military aspect. Ships with beam of slightly more than 100 feet cannot use the locks, but they constitute but a small fraction of the merchant vessels of the world. In any event, the passage of both merchant and war vessels in normal time of peace is a matter of convenience, in that it permits the saving of time and money. It is a different matter in time of war, or in preparation for war operations.

The question remains whether the security requirement can be equally well satisfied by a regime of control and occupation different from the existing one—that is if the canal is neutralized and placed under the control of another country and the U.S. military presence is removed, which are the stated objectives of the new treaties.

The proposed Panama Canal Treaty provides for assumption of sovereignty over the Canal Zone by Panama six months after final ratification, but until Dec. 31, 1999, the U.S. will have primary responsibility for the security and defense of the canal and is authorized to maintain forces in the Republic of Panama for this purpose. During that period the U.S. will be in a position to enforce its rights of passage, even if the current for a future Panamanian government should choose to interfere with them, although our ability to prevent or thwart violent action against our personnel and property and against the canal will be substantially reduced because of the absence of the protection of a U.S.-occupied and owned zone. Thereafter only Panamanian military forces would protect the canal.

The Canal Neutrality Treaty would become effective concurrently with the Canal Treaty and provides that the canal shall be open, both in peace and war, to the war vessels of all nations without distinction, including those of nations at war with the U.S.

From that date the U.S. would not be able legally to deny passage to vessels that may pose a threat to the U.S., and after 1999 it would have neither the legal right nor the inplace military capacity to do so.

It is argued by the proponents of the treaties that their ratification, the elimination of the Canal Zone and the phasing out of the U.S. military presence would enhance the security of the canal and the assurance of its availability to all. In the words of Ambassador Linowitz before the House Committee on Merchant Marine and Fisheries: "The greatest danger to our security interest in the canal would be an effort to maintain and continue the present status." The implication is that it is the U.S. presence which gives rise to the security threats to the canal and that these threats would be reduced if the U.S. military presence were removed, and the canal neutralized.

The argument rests on the fear of sabotage and plots which might result from anti-American feeling generated by our continued presence in the Isthmus of Panama. Removal of our forces may reduce the causes of anti-American feeling, but will not necessarily remove the possibility of sabotage, either by disaffected Panamanians intent on changing their regime or by Soviet-inspired or other anti-American groups desiring to cause damage to the United States at a time of international crisis or in time of war, or would it remove the external threat. Rather, it would increase the probability that any sabotage attempted or any external attack would be successful.

There is also in the argument the underlying assumption that the security interests of the U.S. would be served by permanent neutralization of the canal. It is clear that the security interests of the U.S. demand that the availability of the canal for its own ships be assured and that it be denied to its enemies.

This in turn demands differentiation between use by the U.S. and use by its enemies or potential enemies whenever, in the sole judgment of the U.S. government, the security of the U.S. requires it. Such differentiation is incompatible with the principle of neutrality, would be made illegal by the Neutrality Treaty and after 1999 would be impracticable for the U.S. to effect.

It is argued that in time of war, through resort to "force majeure," the U.S. could denounce or ignore the provisions of the treaty and effectively deny passage to enemy vessels, with or without Panamanian acquiescence or concurrence. (No one has suggested that this might be done in time of tension or in advance of hostilities, to prevent redeployment of potentially hostile ships.) If Panamanian agreement is obtained and as long as U.S. military forces remain within Panamanian territory this would be readily possible. After 1999 it would be necessary to reintroduce military forces, not into U.S. territory where they now are, but into the territory of the Republic of Panama under Panamanian terms and after inevitable delays.

A more likely scenario is one in which Panama would not agree to abrogation or violation of the treaty either in time of war or in periods of international tension which might or might not lead to war but which would demand the taking of prudent measures of increased security, including the denial of passage to potentially hostile ships. This scenario is assured if Panama should be under a Communist, Communist-oriented or neutralist government, and may occur even with a nominally friendly government in power which may wish to demonstrate its independence of dictation by the U.S.

In such circumstances the U.S. would be forced to take military measures against Panama in Panamanian territory in clear violation of that country's sovereignty, under conditions where our forces stationed there would be at a decided disadvantage.

After 1999 a full-scale invasion would be required which would undoubtedly succeed but might well result in the canal being rendered unusable for a protracted period, since Panama would be in position to damage or destroy key installations, including the locks and Gatun Dam, if it should choose to do so, before U.S. forces could be introduced to provide protection.

It has been maintained by proponents of the treaties that the U.S. will retain the right to intervene at any time to protect the canal.

A careful reading of the treaties will disclose that they contain no provision whatsoever for intervention. Article IV of the Neutrality Treaty contains the following wording:

"The United States of America and the Republic of Panama agree to maintain the regime of neutrality established in this Treaty, which shall be maintained in order that the canal shall remain permanently neutral . . .

Even if this wording were to be stretched to imply a U.S. right to intervene, it could only be claimed to enforce neutrality—since Panama will be the sovereign, and in actual possession of the canal after a certain date, a request for intervention would have to originate with Panama.

CONGRESSMAN BILL FRENZEL, CHAIRMAN OF THE HOUSE REPUBLICAN RESEARCH COMMITTEE REVIEWS THE 1ST SESSION OF THE 95TH CONGRESS

(Mr. FRENZEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FRENZEL. Mr. Speaker, on November 8, on pages 37490 through 37498, the distinguished majority whip (Mr. BRADEMAS) summarized the "achievements of a landmark 1st session" of the 95th Congress. Each observer will have a slightly different review of the session, but only a few will see it as a landmark.

Mr. BRADEMAS says the congressional partnership with President Carter "has produced a series of accomplishments which, in quality and quantity, are paralleled only by the first year of Franklin D. Roosevelt's administration." Specifically, he cites four goals established by President Carter and congressional leaders a year ago—the energy bill, an economic stabilization plan, a strong financial ethics code, and authority for the President to propose reorganizations.

Touching base briefly with reality, each Member will recall that:

First. The energy bill is in disarray. If, indeed, any bill is passed this year, it will likely be only another system of taxes. According to various committees of Congress, the House-passed bill will not reduce our reliance on foreign oil.

Second. The "centerpiece" of Carter's economic stabilization plan, the $50 rebate, was the subject of general derision and eventually was withdrawn by its embarrassed sponsor. The rest of the economic package was merely a repeat of what Congress does best—spending.

Third. The strong financial ethics codes turned out to be partly that, but it became more notable as a scheme to "buy ethics" by increasing allowances by $5,000 per Member. Following on the heels of an unvoted pay raise, it was, of course, handled under a closed rule which prevented real reforms proposed by Republicans.

Fourth. The Presidential reorganization authority was an old authority granted to several Presidents and opposed by no one. If it makes a landmark session, the king is not wearing any clothes.

Truth, of course, exists only in the eye of the beholder, but a more balanced review of the session reveals a pretty slow year, typical of the first year of a new administration. Actually it was a routine year—more of the same old stuff.

After approving a profligate budget for a $62 billion deficit in a recovery year, Congress managed to get most of the money spent. The routine of authorization and appropriation hardly makes a landmark, except in catastrophic terms of deficits, interest, and inflation.

Major bills passed—strip mining, farm bill, Tax Reduction Act, housing, community development, minimum wage and unemployment compensation—were largely extensions of old programs or they were ideas that have been around a while.

A few, like Hatch Act repeal, were sent to the Senate for a decent burial.

The two tough ones, social security and energy threaten to hang over until next year.

Perhaps the brightest feature of the year was the legislation that failed. Cargo preference, situs picketing, Consumer Protection Agency and most of the President's misguided election package all were rejected as unworthy. That is not a landmark, either, but perhaps it is a sign of increasing maturity in the House.

I do note, however, that despite Presidential campaign promises, and congressional self-praise, that:

First. Unemployment has not been reduced this year, nor is it expected to decline significantly next year;

Second. Inflation is higher this year and expected to climb;

Third. Government regulation has increased;

Fourth, The budget is not in danger of being balanced.

Those after all are the real landmarks.

The staff of the Republican Research Committee and I have prepared the following material on the first session of the 95th. It stresses the positive activities of the minority in proposing meritorious programs and opposing those which it found lacking in merit.

Our minority role gives us the responsibility to challenge bad legislation. We found plenty of that this year. We are often frustrated by unfair procedures, notably closed rules, imposed by the majority. We found these procedures increasing this year. Nevertheless, I believe all Republican Members can take pride in our constructive, often productive, work.

Unlike our majority counterparts, we claim no landmarks. We claim only that we are trying to act constructively in our minority role. We believe that the material which follows will give evidence of that:

DECEMBER 1977.

SPECIAL REPORT: SUMMARY OF THE FIRST SESSION

PART I.—MAJOR REPUBLICAN INITIATIVES

During the First Session the Republican Party answered the call for responsible legislation with a host of timely proposals. The following list includes some of the most important Republican initiatives.

1. Energy policy

The Republicans unveiled a complete substitute for the Administration's confused National Energy Act. Whereas the Carter Plan assumes that more energy cannot be found and seeks to discourage demand, the Republican alternative proclaims that there are large recoverable energy reserves, which can only be tapped and utilized at costs above current levels. The GOP plan would increase domestic production, reduce energy consumption, and pare down imports of foreign oil. In serving notice on the Nation that the era of cheap energy is over, the Republicans gave their full support to cleaning up an environment polluted through misuse of cheap energy. The Republicans broke new legislative ground by proposing that trust-funds be set up (to be financed by a tax on crude oil) for (1) mass transit; (2) development of synthetic fuels; and (3) highway maintenance.

The Republican proposal contains a detailed plan for increasing domestic production. Among the noteworthy features regarding crude oil.

Retention of price controls on lower-tier oil (oil produced prior to May, 1972).

New taxes on lower-tier oil to bring domestic price up to world price in three stages—$3.50 in 1978, $7 in 1979 and in 1980, a tax equal to the average difference between lower tier oil and the prevailing world price. Taxes would be levied against the producers.

Pricing of upper-tier oil (oil produced after May, 1972) at $12.17, which is the current price. Upper-tier oil prices would be levied on this type of oil.

Raising prices of crude oil to the consumer by one-third cent a gallon in 1978 and 1.1 cents in 1979. *From that time, until 1985, price increases proposed by the Minority Members would be lower than those proposed by the Carter Administration.*

Use of $36.5 billion dollars in crude oil taxes for the trust funds to stimulate synthetic fuel production and mass transit systems. A third trust fund would be established using a portion of this money to maintain existing roads and bridges. This is necessary because states lose gasoline tax revenues as gasoline use decreases.

Deregulation of upper-tier oil and all enhanced recovery oil. Enhanced recovery oil is oil reclaimed from wells after the first drilling. About two thirds of the oil in a particular well is left in the ground due to technological limitations. Enhanced recovery uses special techniques to remove some of this additional oil.

Exploration of the outer continental shelf and other currently little-used resources.

The Republican energy policy also sets new pricing guidelines for natural gas.

Decontrol of all newly discovered gas.

Retention of controls on gas currently under control, while allowing gas under intrastate contract to be available for interstate use when existing intrastate contracts expire.

Phasing in decontrol of all offshore natural gas over a five-year period.

Enacting a windfall profits tax to protect consumers from paying for high company profits.

2. Social security financing

The GOP issued a 15-point program that promises to place the ailing system on a solid financial basis for the next 75 years while eliminating many of its present inequities. Among the major provisions, the plan would:

Require no new taxes, until at least 1982. Beyond that date, taxes would increase a total of 1.5 percent, in three stages, over the 75 year life-span of the proposal.

Eliminate entirely the income limitation on outside earnings by Social Security recipients. This punitive feature has penalized senior citizens who seek work.

Redress the numerous inequities the present set-up imposes on women via: (1) a "working spouse" benefit to aid wives who now find themselves worse-off financially than if they had never left home to take a job. (2) a "widow/widower" benefit so that the formerly married are allowed to keep their benefits upon remarriage.

Include all federal employees—and Members of Congress—within the Social Security system. This initiative would not only strengthen the system's solvency, but would also tend to minimize the notorious practice of "double-dipping" by some civil servants—a phenomenon which stems from the maintenance of dual retirement systems.

Other far-reaching Republican proposals would solve the Social Security's immediate cash-flow problems while insuring financial soundness for the generations to come. The GOP program accomplishes this by:

Freezing the minimum benefit and "decoupling" the present benefit mechanism which has grossly distorted disbursement rates.

Re-deploying that portion of taxes earmarked for the Hospital Insurance Trust Fund—now in good financial condition—to the Old Age Survivors and Disability Trust Funds which are facing exhaustion.

Permitting the major trust funds to borrow from each other to prevent depletion—with appropriate arrangements and safeguards for repayment with interest.

3. Tax policy and taxpayer relief

The Republican Minority introduced a sweeping array of tax measures to revitalize the American economy. At the same time, GOP proposals would ease the burden on the individual taxpayer. GOP initiatives include:

An across-the-board tax cut on all personal income taxes. These rate reductions—phased in over a 3-year period—would reduce the tax burden for a family of four: earning $8,000 by 90%; earning $10,000 by nearly 50%; earning $20,000 by nearly 33%.

A tax exemption to each taxpayer of up to $1000 on a new savings account, money added to existing savings, or new investments in stocks and bonds.

And end to the double-taxation of corporate dividends—which has greatly reduced investment benefits to individuals.

A reduction of the tax-rate on small business—to encourage faster expansion.

Adjustment of personal and corporate income taxes to the level of the consumer price index (CPI) so that individuals and businesses are not penalized as they are catapulted into higher tax brackets *simply because of inflation.*

4. House ethics reform

The Republican House Membership demanded full public accountability for many of the House's more questionable practices. Highlights of the GOP ethics reform proposals include:

Institution of an auditing authority to provide an effective mechanism to guard against a recurrence of past abuses.

Full disclosure of the expenditure records of the House. This feature would ensure prompt public accountability.

Thorough personnel review by outside experts—for proper utilization of House resources.

Democratizing House procedures via: (1) improved lobby disclosure; (2) open committee records; (3) ban on proxy voting; (4) open rules; (5) revamped committee jurisdictions.

5. Revision of civil rights legislation

The Republican leadership is at the forefront of a drive to bring order to the crazy-quilt tangle in our civil rights law. The GOP understands that an inefficient system of enforcement machinery fails to accomplish its task—and creates a heavy burden on the taxpayer. The Republican initiative would replace the current civil rights polyglot of 47 statutes and executive orders with:

A single comprehensive statute mandating a single uniform procedure for defining rights and responsibilities.

Elimination of existing duplication and inconsistency by centralizing responsibility for civil rights compliance in one office—thus avoiding administrative duplication and overlap.

An end to "double jeopardy" problems for regulated organizations and establishment of due process hearings before sanctions are imposed.

Streamlining of reporting requirements.

6. Food stamps

During the first session, the GOP offered comprehensive reforms of the Nations' sprawling Food Stamp program. The Republicans developed a set of "minimum standards" as the centerpiece of its program, so that Food Stamps go to the truly needy. Republican proposals include:

Exclusion of "junk food" purchases from Food Stamp eligibility.

Provide an incentive to purchase a nutritionally adequate diet by retaining the requirement that recipients contribute a portion of their incomes to buy Food Stamps.

Enable the government to recover excess benefits paid Food Stamp recipients whose annual income exceeds twice the poverty level.

Permit states and localities to establish "workfare programs for able-bodied Food Stamp recipients."

Those recipients unable to find employment through work registration would perform public service work.

7. Illegal aliens

The House Republican leadership pushed vigorously for passage of the Illegal Aliens Act of 1977. GOP proposals to stem the tide of illegals crossing our borders called for action on a number of fronts, namely:

Beefing up the Border Patrol and utilizing increased technology to screen potential entrants.

Providing for strict identification procedure verified by the Social Security Administration—of all prospective employees and welfare recipients.

Mandating that all employers and welfare administrators verify identification.

Providing increased penalties for anyone who knowingly employs or provides such benefits to an illegal alien.

Permitting limited, controlled entry by aliens into the U.S. for temporary employment during periods of high labor demand which cannot be met through the employment of U.S. citizens or lawful aliens.

PART II.—MISDIRECTED DEMOCRAT INITIATIVES

This list contains a few of the most misguided Majority proposals.

Welfare

The Carter Welfare Package—carrying a "reform" misnomer—has been stalled by deserved bipartisan criticism. For the past eight years, the GOP has advocated fundamental welfare reform through a formula based on closed-ended budgetary policies and sound management control. The Carter plan grossly missed the mark on these basic principles. A review of the Administration's proposals reveals a glaring understatement of cost. Among the defects are:

Inflated costs: due to relaxation of eligibility requirements, the total price tag for welfare would have reached *at least* $50 billion—more than $10 billion over the present cost.

Poor oversight of the job seeker: Although touted as work-inducting and family-bolstering, the plan is on shaky ground with its sketchy analysis of implementing these critical elements.

Retention of many of the system's current defects: by continuing the current provision for income "disregards" which allows higher income persons to become eligible for increased benefits, welfare benefits would accrue to persons earning as much as $15,600 through tinkering with the earned income tax credit (EITC).

An even greater burgeoning of the welfare bureaucracy: by comprehensive federal administration of benefit computation and eligibility determination, a new super-welfare agency would be created, duplicating existing state systems.

Social security financing

House Democrats bulldozed passage of their Social Security financing proposals near the end of the Session. Consequently, both employers and employees will face steep rises in their payroll taxes. Rather than consider responsible alternative financing plans offered by the GOP (see Part I), the House Democrats advanced a plan which guarantees a host of negative economic repercussions. The proposal's foremost failing lies in its needless, inflationary tax increases and in its embrace of standby power to tap general revenues in case of future deficits.

The demise of the present self-financing concept is a negation of the fundamental thesis undergirding four decades of the Social Security system.

The plan's major flaws will almost certainly trigger:

Reduced hiring: added labor costs—through tax increases—will dampen employers' incentives to create new jobs.

A surge in unemployment: an estimated 100,000 workers will be displaced due to the inability of the private sector to absorb the tax hike.

Loss in personal income: by increasing payroll "assessments" the Administration must recoup foregone Treasury revenues via greater inflationary borrowing and/or higher personal income taxes.

An inflation hike of nearly a percentage point.

A deleterious impact on private pension plans: by reducing amounts available for savings and pensions, the bill retards capital accumulation, which in turn limits investment potential and future economic growth.

Hospital cost containment

Early in the Session, President Carter unveiled his controversial hospital cost containment program. The Democrat measure feature two major sections: (1) a limit on annual *revenues* which the hospital can receive from its payors—pegged arbitrarily at 9% during the first year of the program and (2) a ceiling on capital spending of $2.5 billion (on a nationwide basis) during the first year. Republicans helped to bottle-up the Carter bill (H.R. 6575) in committee. The major criticism of the proposal—also directed toward like-minded hospital cost initiatives such as the Kennedy-Corman bill—is that:

The bill is actually a euphemism for "wage-price" control over only one sector of the health care industry—hospitals. The measures for the most part, ignore the spiraling costs of physicians fees, hospital supplies, and technological equipment. As such, it is a discriminatory policy.

The revenue per admission requirements will vastly increase not only administrative costs of government, but also of private insurance companies and related intermediaries.

An arbitrary lid on hospital spending may cause service cuts which translate into second-rate health care for many, and unavailable care for others.

It contradicts the President's promise to cut bureaucracy and red-tape. Overbearing governmental regulation can only lead to a breakdown in service delivery.

Minimum wage

House Democrats pushed through an inflationary minimum wage bill with the aid of a massive lobbying effort orchestrated by the AFL–CIO. Although the bill increased the minimum wage in increments to $3.35 per hour by 1981, the GOP was able to blunt some of the onerous provisions contained in the original proposal, namely:

It defeated the inflation-fueling "indexing" measure which would have provided for automatic future increases.

The GOP thwarted Democrat efforts to remove the "tip credit" for restaurant employees. This effort saved thousands of jobs which would have been eliminated due to exhorbitant labor costs.

Republicans gave a needed boost to small retail and service businesses (with annual sales under $500,000) by exempting them from minimum wage requirements.

Sadly, a GOP backed proposal to create a sub-minimum wage to stimulate youth employment was defeated by a razor-thin margin of 1 vote. As a result, the minimum wage bill will make it even more difficult for young people, especially minorities, to find jobs.

Hatch Act changes

The Democrat majority pushed its bill to revise the Hatch Act through the House. For 38 years the Hatch Act has protected the nation from potential efforts to organize the federal bureaucracy into a political legion supporting incumbents. As amended, the revision grants 2.8 million civil service workers great leeway in aiding candidates and working in political campaigns. The Republican Minority had succeeded in crippling an earlier consideration of the bill by adding amendments which would have nullified a gain by Big Labor Bosses. In spite of the GOP's ultimate defeat in this issue, Republicans were able to parry the Democrat thrust with amendments to protect civil service workers from *overt* coercion, such as:

Prohibiting solicitation of political contributions by superior officials and making or soliciting political contributions in government rooms or buildings.

Prohibiting any federal employee from soliciting a political contribution from any individual over whom his agency has jurisdiction.

Prohibiting the extortion of money for political purposes from federal employees.

Requiring that Federal employees who seek elective office do so on their own time.

NOTE.—Fortunately, the Senate seems to be less enthusiastic than the House to scrap the Hatch Act protection of our federal employees. The bill is currently stuck in the Senate Committee on Governmental Affairs.

PART III.—MAJOR DEFEATS FOR THE DEMOCRATS

Republicans led, or played a major role in the defeat or stalemate of a number of Democrat initiatives. A few examples follow:

Universal voter registration

Out of the entire Carter Election reform package, only the universal voter registration bill (H.R. 5400) emerged to win committee approval by both the House and Senate. The Senate bill was stopped by filibuster. House Republicans mobilized the opposition in stopping further consideration of this poorly thought-out measure. The GOP objected to the bill's enormous potential for election fraud and abuse. Other negatives revolve around government incapacity to administer such a huge program. A litany of the bill's major defects includes:

The opportunity for fraud. The guidelines for proper identification at the polls are vague and inadequate.

The administrative burden on local officials—who are charged with verification of voters' credentials—might be unbearable due to the crush of unexpected numbers at the polls. Vast majorities of secretaries of State and local registration officials opposed it.

Increased sanctions for voter fraud are nearly meaningles. Enforcement is the measure of any statute's effectiveness. The difficulty posed in detecting and proving fraud poses too great a risk to the integrity of our elections process.

Such a system would redound to the benefit of groups with formidable organizational power to turn out the masses, e.g., Big Labor's political action committees and large city fiefdoms such as Chicago under Richard Daley.

In the House, the Democrat leadership, uncertain about support, refused to bring the bill to the floor.

There is little evidence that the system increases voter turnout. There is some reason to believe that the fraud potential will simply alienate more citizens from the voting process.

Public financing of House elections

Republican opposition to Mr. Carter's proposal for public financing of Congressional campaigns crystallized in a thumping defeat for the Democrat-inspired measure. The Senate blocked the bill on the eve of the Summer recess. Over in the House, various bills are being formulated for consideration by the Administration Committee during the Second Session. The House and Senate bills are similar although variations exist on major provisions such as: (1) the threshold for matching funds, (2) the spending ceiling and (3) the inclusion of primaries. (Note: see RRC paper of 23 June 1977 for details). House Republicans view public financing with skepticism because:

It acts to protect incumbents—the majority party. In the course of a two-year term, incumbents receive nearly a million dollars in expense allowance, giving them a built-in advantage against potential challengers.

It assumes unfairly that special interest money is a pernicious influence. In fact, Americans have traditionally been active through political organizations—this right is a centerpiece of our constitutional heritage. *The GOP supports full disclosure of campaign funds*—rather than government restriction of the private sector—to insure the integrity of the political process.

It lacks public support—the overwhelming majority (74%) of American taxpayers fail to mark the checkoff provision on their income tax form.

It discourages citizen participation. A recent poll commissioned by the Federal Election Commission indicates most Congressional campaigns are small-scale operations. New Federal regulations will only serve to further burden aspiring candidates.

It provides an advantage to organized labor. By using dues money to promote candidates to union members and by directing ostensibly non-partisan voter education projects and registration drives through union dues, Big Labor has significantly aided candidates of its choice—most of whom are Democrats. A conservative dollar estimate of Labor's value to the Carter-Mondale ticket is $8.5 million. No public financing bill has yet addressed this obvious inequity.

Cargo preference

Cargo preference would have required 9.5% of all U.S. oil imports to be carried on U.S. flag tankers. The Republican minority accounted for more than half the votes in the dramatic defeat of Mr. Carter's multi-million dollar sop to the maritime industry and its allied unions. In lending support to the measure. the President overruled the overwhelming majority of his economic and Cabinet advisers. Aptly labeling the cargo preference bill a "blatant political payoff" the GOP helped to deliver a stunning defeat to this Democrat streamroller attempt.

Decisive GOP action avoids:

As much as $2 billion per year in added fuel costs;

The spectre of increased unemployment;

Greater inflation; and

A significant decline in GNP.

Common situs picketing

The bill would have given craft unions the right to picket an entire construction site even though the labor dispute is only with one contractor doing work on a project. Republicans provided the leadership for the narrow defeat of this legislation.

The demise of common situs represented:

A major loss for Big Labor bosses who had pushed the measure for over 25 years.

An estimated saving to the American tax payer/consumer in the realm of hundreds of millions of dollars annually.

Consumer protection agency

This measure would have created a federal consumer advocate agency to argue the cause of the consumer in legal and regulatory proceedings. Republicans opposed the measure due to its: (1) inability to define consumer interests; (2) vesting inordinate power in CPA administrators; (3) exemption of labor and other interests from review; (4) escalation of bureaucracy and red-tape; (5) inevitable slowdown of decisions important to consumers.

Critical Republican analysis alerted the House to the flaws of this bill. As a result, Democrat leaders never brought it to the floor.

The failure of the CPA to pass saved:

At least $10 million annually.

The saddling of consumers with yet another layer of bureaucracy. A consumer protection agency *would not* aid the consumer, it would only increase the government's tax bite and lower the consumer's purchasing power.

PART IV.—KEY VOTES ON SIGNIFICANT ISSUES ILLUSTRATING REPUBLICAN CONSENSUS

The Honorable John Rhodes, Minority Leader, has described the Republican House minority as "the single most cohesive force in Congress." The minority repeatedly has presented a strong collective position on the major issues.

1. *Tax Policy.*—Rather than one-shot rebates, or spending programs, Republicans consistently called for permanent tax cuts. Republicans supported tax cuts as a matter of equity for taxpayers pushed into higher brackets by inflation, and as a stimulus to the economy and to the confidence of all Americans. Republicans were able to force recorded votes four times on across-the-board tax cuts:

A. Rousselot Amendment to H. Con. Res. 110—Defeated 148–258. Republicans supported 123–10. Roll Call #25.

B. Gradison motion to recommit H.R. 3477—Defeated 194–219. Republicans supported 140–1. Roll Call #56.

C. Latta substitute to H. Con. Res. 195—Defeated 150–250. Republicans supported 126–9. Roll Call #163.

D. Conable Substitute to H. Con. Res. 214. Defeated 150–240. Republicans supported 129–5. Roll Call #203.

2. *Excessive Spending.*—Republicans generally opposed profligate Democrat spending programs calculated to produce a $62 billion deficit in a recovery year. The following votes are illustrative of the Republican position:

A. H. Con. Res. 195—A budget Resolution calling for a huge deficit. Defeated 84–320—Republicans 2–135. Roll Call #165.

B. H. Con. Res. 214.—A similar budget Resolution. Passed 213–179. Republicans 7–121. Roll Call #204.

C. *H. Con. Res. 341*—the second Budget Resolution (more deficits)—passed 199–188. Republicans 4–129. Roll Call No. 525.

3. *Reform of the House*—Republicans opposed gag rules which limit debate and

prevent amendments from being offered. Three typical votes on closed rules:

A. H. Res. 5—adoption of House Rules, Closed Rule.

Passed 261–140. Republicans 0–140. Roll Call No. 3.

B. H. Res. 287. Ethics. Closed Rule. Adopted 267–153.

Republicans 3–138. Roll Call No. 36.

C. H. Res. 766—Commission on Administrative Review—closed rule. Defeated 160–252. Republicans 0–139. Roll Call No. 643.

Republicans unsuccessfully opposed unneeded increases in Members allowances. Allowances in the "billion dollar Congress" are too high now, and increases tend to be used mainly to enhance the already enormous election advantages of incumbents. Two examples:

A. H. Res. 287—Ethics bill—Frenzel motion to delete $5,000 increase in office allowances. Defeated 187–235. Republicans 126–15. Roll Call No. 37.

B. H. Res. 687.—Increase District office space. Passed 215–193. Republicans 29–103. Roll Call No. 568.

4. *Miscellaneous*—a few bills already discussed were defeated because of strong Republican opposition:

A. H.R. 4250—Common Situs Picketing. Defeated 201–217. Republicans 14–129. Roll Call No. 98.

B. H.R. 1037—Cargo Preference. Defeated 167–253. Republicans 12–131. Roll Call No. 670.

Republicans achieved mixed success in proposing, or supporting, amendments to important bills. H.R. 3744, the Minimum Wage Bill, was a good example.

A. H.R. 3744, Erlenborn amendment to delete the "automatic indexing." Passed 223–193. Republicans 126–15. Roll Call No. 546.

B. H.R. 3744. Quie amendment to restore "tip credit." Passed 264–161. Republicans 132–11. Roll Call No. 549.

C. H.R. 3744—Cornell amendment for a "youth differential." Defeated 210–211. Republicans 130–12. Roll Call No. 551.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CHARLES H. WILSON of California, for from December 1 through this week, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DAVIS) to revise and extend his remarks and include extraneous matter:)

Mr. FLOOD, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LONG of Maryland, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FRENZEL, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,046.50.

(The following Members (at the request of Mr. DUNCAN of Tennessee) and to include extraneous matter:)

Mr. CRANE in five instances.

Mr. DERWINSKI in two instances.

Mr. FRENZEL in five instances.

(The following Members (at the request of Mr. DAVIS) and to include extraneous matter:)

Mr. RODINO in five instances.

Mr. DE LA GARZA in 10 instances.

Mr. AUCOIN.

Mr. OBERSTAR.

Mr. BYRON in 10 instances.

Mr. ROSENTHAL in 10 instances.

Mr. SISK.

Mrs. LLOYD of Tennessee in five instances.

Mr. ANNUNZIO in six instances.

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. BROWN of California in 10 instances.

Mr. HAMILTON in 10 instances.

Mr. VENTO.

Mr. MCFALL.

Mr. MAZZOLI.

Mr. FRASER.

Mr. DODD.

BILLS PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on December 1, 1977, present to the President, for his approval, bills of the House of the following title:

H.R. 7. To authorize a career education program for elementary and secondary schools, and for other purposes;

H.R. 1904. To suspend until July 1, 1980, the duty on intravenous fat emulsion, and for other purposes;

H.R. 7345. To amend title 38 of the United States Code to increase the rates of disability and death pension and to increase the rates of dependency and indemnity compensation for parents, and for other purposes;

H.R. 8159. To establish uniform structural requirements for intermodal cargo containers, subject to the jurisdiction of the United States, designed to be transported interchangeably by sea and land carriers, and moving in, or designated to move in, international trade, and for other purposes; and

H.R. 8422. To amend titles XVIII and XIX of the Social Security Act to provide payment for rural health clinic services, and for other purposes.

ADJOURNMENT

Mr. DAVIS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 9 minutes p.m.) the House adjourned until tomorrow, Tuesday, December 6, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2766. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature and estimated cost of various construction projects proposed to be undertaken by the Army National Guard, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

2767. A letter from the Assistant Secretary of the Army (Research, Development, and Acquisition), transmitting a report covering the period April 1 through September 30, 1977, on Army research and development contracts, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

2768. A letter from the Assistant Secretary of the Navy (Research, Development, and Acquisition), transmitting a report covering the period April 1 through September 30, 1977 on Navy research and development contracts of $50,000 and over, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

2769. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense equipment to Australia (transmittal No. 78–6), pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

2770. A letter from the Attorney General, transmitting his annual report for fiscal year 1977 on the enforcement of title II (Extortionate Credit Transactions) of the Consumer Credit Protection Act of 1968, pursuant to section 203 of the act; to the Committee on Banking, Finance and Urban Affairs.

2771. A letter from the Comptroller of the Currency, transmitting his annual report for 1976, pursuant to section 333 of the Revised Statutes; to the Committee on Banking, Finance and Urban Affairs.

2772. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council act No. 2–46, "To amend the Charter of the District of Columbia to provide for the power of initiative, referendum, and recall", pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2773. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council act No. 2–201, to order the closing of an east-west public alley from 50th Street, N.E. to the rear property lines of lots 42 and 53 in square 5202, 50th and Meade Streets, N.E., pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2774. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council act No. 2–102, to order the closing of an east-west public alley abutting on lot 110, lot 111, and two north-south public alleys in square 754, bounded by 2d, E, 3d, and F Streets, N.W., pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2775. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council act No. 2–103, to order the closing of a north-south public alley between the East Washington Railroad right-of-way and an east-west public alley in square 5217, bounded by 55th, Nannie Helen Burroughs Avenue, 56th, and Foote Streets, N.E., pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2776. A letter from the Deputy Assistant Secretary of the Interior, transmitting a report on the Department's disposal of foreign excess property during fiscal year 1977, pursuant to section 404(d) of the Federal Property and Administrative Services Act of 1949, as amended; to the Committee on Government Operations.

2777. A letter from the Comptroller General of the United States, transmitting a report on GAO legislative recommendations which have not been acted on by Congress (OCR–78–1003, December 5, 1977); to the Committee on Government Operations.

2778. A letter from the Assistant Secretary of State for Congressional Relations, transmitting proposed country allocations of military assistance and of international military education and training for fiscal

year 1978, pursuant to section 653(a) of the Foreign Assistance Act of 1961, as amended; to the Committee on International Relations.

2779. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to section 112(b) of Public Law 92-403; to the Committee on International Relations.

2780. A letter from the Senior Adviser and Director for International Narcotics Control, Department of State, transmitting proposed changes in fiscal year 1978 allocations of international narcotics control program funds, pursuant to section 653 of the Foreign Assistance Act of 1961, as amended; to the Committee on International Relations.

2781. A letter from the Director, Defense Security Assistance Agency, transmitting the quarterly report on foreign military sales as of September 30, 1977, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on International Relations.

2782. A letter from the Director, Defense Security Assistance Agency, transmitting the quarterly report on foreign military sales letters of offer as of September 30, 1977, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on International Relations.

2783. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Australia (transmittal No. 78-6), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2784. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act (66 Stat. 182); to the Committee on the Judiciary.

2785. A letter from the National Adjutant Paymaster, Marine Corps League, transmitting the annual report of the organization, pursuant to section 3 of Public Law 88-504; to the Committee on the Judiciary.

2786. A letter from the Adjutant General, Veterans of Foreign Wars of the United States, transmitting a report on the audit of the books of the Quartermaster General of the VFW for the year ended August 31, 1977, pursuant to section 3 of Public Law 88-504; to the Committee on the Judiciary.

2787. A letter from the Chairman, Federal Election Commission, transmitting a copy of correspondence sent to the President, pursuant to section 310(d)(1) of the Federal Election Campaign Act, as amended; jointly, to the Committees on Appropriations, and House Administration.

2788. A letter from the Comptroller General of the United States, transmitting a report on inequities in the Federal withholding tax system (PAD-78-5, December 2, 1977); jointly, to the Committee on Government Operations, and Ways and Means.

2789. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting the 10th report on abnormal occurrences at licensed nuclear facilities, pursuant to section 208 of the Energy Reorganization Act of 1974; jointly, to the Committees on Interior and Insular Affairs, and Interstate and Foreign Commerce.

2790. A letter from the Inspector General, Department of Health, Education, and Welfare, transmitting his quarterly report for the period July 1 through September 30, 1977, pursuant to section 204(b) of Public Law 94-505; jointly, to the Committees on Education and Labor, Interstate and Foreign Commerce, and Ways and Means.

2791. A letter from the Comptroller General of the United States, transmitting a report on the effectiveness of Federal law enforcement agencies along the United States-Mexico border (GGD-78-17, December 2, 1977); jointly to the Committees on Government Operations, the Judiciary, and Ways and Means.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FRENZEL:

H.R. 10205. A bill to amend the Tax Reform Act of 1976 to allow, for taxable years beginning after December 31, 1975, certain insurance companies to adopt, for purposes of filing a consolidated return, the taxable year of the common parent corporation; to the Committee on Ways and Means.

H.R. 10206. A bill to amend the Tax Reform Act of 1976 to allow, for taxable years beginning after December 31, 1975, certain insurance companies to adopt, for purposes of filing a consolidated return the taxable year of the common parent corporation; to the Committee on Ways and Means.

By Mr. FRENZEL (for himself, Mr. LAGOMARSINO, Mr. LEDERER, Mr. WALKER, Mr. WON PAT, Mr. MARLENEE, Mr. PRESSLER, Mr. FREY, Mr. MICHAEL O. MYERS, Mr. CORRADA, Mr. CORNELL, Mr. COLLINS of Texas, Mr. THONE, Mr. WALSH, Mr. LEVITAS, Mr. KINDNESS, Mr. KOSTMAYER, Mr. HARSHA, Mr. KASTEN, Mr. LUJAN, Mr. DUNCAN of Tennessee, Mr. HUGHES, Mr. FLORIO, Mr. EILBERG, and Mr. MARTIN):

H.R. 10207. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to claim a credit for amounts paid as tuition to provide education for himself, for his spouse, or for his dependents, and to provide that such credit is refundable; to the Committee on Ways and Means.

By Mr. McCLORY:

H.R. 10208. A bill to repeal certain sections of title III of the Immigration and Nationality Act and for other purposes; to the Committee on the Judiciary.

By Mr. BEDELL (for himself, Mr. CARTER, Mr. MARLENEE, and Mr. MAHON):

H. Con. Res. 432. Concurrent resolution to assure quality health care for populations located in rural areas; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURGENER:

H.R. 10209. A bill for the relief of Rolf Erik Tibblin, Annica Maria Tibblin, Anna Maria Tibblin, Malin Louisa Tibblin, and Rolf Johan Tibblin; to the Committee on the Judiciary.

By Mr. COLLINS of Texas:

H.R. 10210. A bill for the relief of Martina Navratilova; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

357. By the SPEAKER: Petition of the Archbishop of Boston, Brighton, Mass., and the Bishop of the Albanian Orthodox Church, Jamaica Plain, Mass., relative to religious freedom in Albania; to the Committee on International Relations.

358. Also, petition of the Illinois Commerce Commission, Springfield, Ill., relative to customer-owned telephone service; to the Committee on Interstate and Foreign Commerce.

359. Also, petition of Henri Galabert, Neuilly Sur Seine, France, relative to gravitational electromagnetic energy; to the Committee on Science and Technology.

AMENDMENTS

Under clause 6 of rule XXXIII, proposed amendments were submitted as follows:

H.J. Res. 662

By Mr. MAHON:

On page 2, after line 9, insert the following:

Such amounts as may be necessary for projects or activities provided for in the Departments of Labor, and Health, Education, and Welfare, and Related Agencies Appropriation Act, 1978 (H.R. 7555), at a rate of operations, and to the extent and in the manner, provided for in such Act as modified by the House of Representatives on August 2, 1977, notwithstanding the provisions of section 106 of this joint resolution.

FACTUAL DESCRIPTIONS OF BILLS AND RESOLUTIONS INTRODUCED

Prepared by the Congressional Research Service pursuant to clause 5(d) of House Rule X. Previous listing appeared in the CONGRESSIONAL RECORD of November 11, 1977 (page 37522).

H.R. 6771. April 29, 1977. Judiciary. Permits the Attorney General to adjust the status of any alien who is a native or citizen of Vietnam, Cambodia, or Laos from that of parolee to that of an alien lawfully admitted for permanent residence without regard to immigration quotas or lack of possession by such alien of required immigration documents. Makes the provisions of this Act applicable to the children and spouse of such alien who are residing with the alien in the United States.

H.R. 6772. April 29, 1977. Ways and Means. Requires that, under the Internal Revenue Code, the tax exempt status accorded to a mutual or cooperative telephone company be determined without taking into account any income received or accrued from a nonmember telephone company for the performance of communication services which involve members of such mutual or cooperative telephone company.

H.R. 6773. April 29, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals a limited income tax credit for the rent paid for their principal residence.

H.R. 6774. April 29, 1977. Education and Labor. Amends the Higher Education Act of 1965 by making certain technical and miscellaneous amendments to provisions contained in the Education Amendments of 1976.

H.R. 6775. April 29, 1977. Veterans' Affairs. Increases the period of veterans' education assistance from 45 to 54 months, and eliminates the delimiting period. Grants eligibility for such assistance to any veteran of World War II, the Korean conflict, or the Vietnam era whose previous entitlement terminated without such veteran's availing himself of all the assistance to which he was entitled.

H.R. 6776. April 29, 1977. Education and Labor. Sets forth requirements for educational agencies, educational institutions, and testing agencies using standardized tests, such requirements being designed to increase the awareness in people of the uncertain re-

liability in such tests and to impose restrictions upon the use of information obtained by such tests.

Terminates Federal funding under any applicable program to an educational agency or institution failing to comply with the requirements imposed by this Act.

Sets forth the rights of test subjects, educational researchers, and the Federal Government with respect to such tests and test data.

H.R. 6777. April 29, 1977. Merchant Marine and Fisheries. Amends the Marine Protection, Research, and Sanctuaries Act of 1972 to prohibit the Administrator of the Environmental Protection Agency from issuing permits for ocean dumping of sewage sludge after 1981. Establishes a Sewage Sludge Damage Claims Fund to provide compensation for damages caused by such dumping. Imposes a dumping assessment against holders of permits for ocean dumping of sewage sludge to finance the Fund's operation.

H.R. 6778. April 29, 1977. Veterans' Affairs. Directs the Secretary of Defense to place a plaque and a permanent display of medals, ribbons, and tributes of the Vietnam era on the crypt at the National Cemetery at Arlington, Virginia, reserved for an unknown American serviceman who lost his life in Southeast Asia.

Directs the Secretary to perform the duties required by this Act even though the remains of such serviceman have not yet been placed in the crypt.

H.R. 6779. April 29, 1977. Judiciary. Prescribes, with specified exceptions, the knowing solicitation, provision, or receipt of anything of monetary value, or the promise of anything of monetary value, for: (1) seeking to place, placing, or arranging to place any child for permanent care or adoption; or (2) coercing any individual to place any child for adoption, to provide any child with permanent care, or to adopt any child under circumstances which result in the transportation of such child or individual in interstate or foreign commerce.

H.R. 6780. April 29, 1977. Veterans' Affairs. Provides that recipients of veterans pensions and compensation will not have the amount of such pension or compensation reduced because of increases in social security benefits.

H.R. 6781. April 29, 1977. Science and Technology. Establishes an Energy Extension Service in the Energy Research and Development Administration to assist in the development of energy conserving practices.

Establishes criteria for the development of State energy conservation implementation plans. Directs the Administrator of Energy Research and Development to develop energy conservation plans for Federal programs.

H.R. 6782. April 29, 1977. Agriculture. Permits marketing orders under the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to include provisions concerning marketing promotion, including paid advertisement, of raisins. Authorizes distribution among producers of the pro rata costs of such promotion.

H.R. 6783. April 29, 1977. Banking, Finance and Urban Affairs. Authorizes the President to create an Interagency Task Force on Consumer Cooperatives with the Small Business Administration serving as the lead agency of the task force.

Authorizes the Small Business Administration to administer a pilot loan program for cooperatives.

H.R. 6784. April 29, 1977. International Relations; Interior and Insular Affairs; Merchant Marine and Fisheries. Establishes a Federal program to regulate deep seabed resourse development pending the development of an international regime to govern the use of the oceans and their resources. Prohibits enterprises from engaging in deep seabed resource development without prior approval of the Secretary of Commerce in accordance with specified requirements.

H.R. 6785. April 29, 1977. Judiciary. Amends the Immigration and Nationality Act to remove specified aliens from the class of aliens whose status may be adjusted to that of an alien lawfully admitted for permanent residence.

Makes it unlawful to knowingly hire an alien not lawfully admitted into the United States. Requires that employees of the Department of Health, Education, and Welfare disclose the names of illegal aliens who are receiving assistance under the Social Security Act.

Makes punishable by a fine or imprisonment the making of false border crossing cards, alien registration receipt cards, and other documents used for entry into the United States.

H.R. 6786. April 29, 1976. Judiciary. Directs that orders of a State court or a court of the District of Columbia relative to the custody of children of divorced or separated parents be given full faith and credit by every other State and the District of Columbia until such issuing court no longer has under the law of the State in which it is located, or declines to exercise, jurisdiction over modifications of such orders.

H.R. 6787. April 29, 1977. Merchant Marine and Fisheries. Amends the Merchant Marine Act, 1936, to authorize the possession and use of gambling devices aboard a passenger vessel documented under the laws of the United States while such a vessel is within the territorial seas of the United States or the special maritime and territorial jurisdiction of the United States if the vessel is engaging in foreign trade, offshore domestic trade, or a cruise approved by the Secretary of Commerce.

H.R. 6788. April 29, 1977. Public Works and Transportation; Ways and Means. Authorizes the Secretary of Transportation to approve Federal participation in State projects to replace bridges not located on any of the Federal-aid systems. Amends the Highway Revenue Act of 1956 to extend appropriations authorized under such Act for the Highway Trust Fund through fiscal year 1990. Amends the Land and Water Conservation Fund Act to extend such fund through fiscal year 1990. Amends the Internal Revenue Code of 1954 to postpone specified excise tax reductions and to increase the excise tax on gasoline, diesel fuels, and special motor fuels.

H.R. 6789. April 29, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for optometric and medical vision care under the supplementary medical insurance program.

H.R. 6790. April 29, 1977. Government Operations. Establishes a Consumer Protection Agency within the executive branch to represent the interests of consumers before Federal agencies, to receive and act upon consumer complaints, to perform research on consumer products, and to gather and disseminate information on consumer products and services.

Requires Federal agencies considering policies or regulations which may affect the interests of consumers to notify the Agency, and to consider the interests to consumers.

H.R. 6791. April 29, 1977. Ways and Means. Amends the Internal Revenue Code to authorize any taxpayer to elect to have any portion of any overpayment of tax or any contribution in money which the taxpayer forwards with the return for such taxable year be available, as the taxpayer may designate on such return, for the National Endowment for the Arts or the National Endowment for the Humanities.

H.R. 6792. April 29, 1977. Interstate and Foreign Commerce. Amends the Regional Rail Reorganization Act of 1973 and the Department of Transportation Act to extend for one year the period during which the Federal Government pays 100 percent of the cost of local rail service assistance programs involving rehabilitation and maintenance of rail properties.

H.R. 6793. April 29, 1977. Interstate and Foreign Commerce. Amends the Solid Waste Disposal Act to authorize the Administrator of the Environmental Protection Agency to make grants to localities for the purchase of sanitation vehicles designed to improve area-wide solid waste management in a manner consistent with the purposes of the Act.

H.R. 6794. April 29, 1977. Interstate and Foreign Commerce. Authorizes appropriations to the Federal Energy Administration for fiscal years 1977 and 1978. Authorizes additional appropriations for specified energy conservation activities.

Extends energy regulatory authority under the Federal Energy Administration Act of 1974 and the Energy Supply and Environmental Coordination Act of 1974 until 1978. Directs the Federal Energy Administrator to establish additional rules and procedures governing use of commercial standards and possible conflicts of interest.

H.R. 6795. April 29, 1977. Post Office and Civil Service. Authorizes the payment of a civil service annuity to those employees of the Bureau of Indian Affairs and the Indian Health Service who are not entitled to full retirement benefits and who meet specified employment and length of service requirements.

H.R. 6796. April 29, 1977. Armed Services; International Relations; Science and Technology; Armed Services; International Relations. Authorizes appropriations to the Energy Research and Development Administration for fiscal year 1978 for programs relating to fossil energy development, solar energy, geothermal energy, energy conservation, environmental and safety research, and nuclear research and development.

H.R. 6797. April 29, 1977. Armed Services. Grants survivor benefits to dependents of present or former members of the armed forces who die before becoming entitled to retired pay for non-regular service.

H.R. 6798. April 29, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to extend the coverage of such act to individuals 65 or over, and to make unlawful seniority systems and employee benefit plans which require the retirement of individuals 40 or over.

H.R. 6799. April 29, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to extend the coverage of such act to individuals 65 or over, and to make unlawful seniority systems and employee benefit plans which require the retirement of individuals 40 or over.

H.R. 6800. April 29, 1977. Judiciary. Requires specified organizations which employ lobbyists to register and file quarterly expense reports with the Comptroller General. Makes such reports available to the public. Establishes civil and criminal sanctions to enforce this act.

H.R. 6801. April 29, 1977. Judiciary. Authorizes classification of a certain individual as a child for purposes of the Immigration and Nationality Act.

H.R. 6802. May 2, 1977. Judiciary. Amends the Indochina Migration and Refugee Assistance Act of 1975 to extend through 1980 funds for the provision of financial, medical, employment, and relocation assistance to refugees from Cambodia, Vietnam, or Laos.

H.R. 6803. May 2, 1977. Merchant Marine and Fisheries; Public Works and Transportation. Establishes a fund for the purpose of paying for otherwise uncompensated losses resulting from oil pollution.

Imposes, within certain monetary limits, joint, several, and strict liability on the owners and operators of each pollution source. Requires petroleum facilities and certain

vessels to maintain evidence of financial responsibility in an amount equal to applicable liability limits.

Sets forth procedures for identifying and publicizing pollution sources.

H.R. 6804. May 2, 1977. Post Office and Civil Service; Government Operations. Establishes a Department of Energy in the executive branch. Transfers all functions of the Federal Energy Administration, the Energy Research and Development Administration, and the Federal Power Commission to the Department. Transfers specified functions from other departments and agencies to the Department.

Establishes a Federal Energy Regulatory Commission to assume specified regulatory functions of the Federal Power Commission.

H.R. 6805. May 2, 1977. Government Operations. Establishes a Consumer Protection Agency within the executive branch to represent the interests of consumers before Federal agencies, to receive and act upon consumer complaints, to perform research on consumer products, and to gather and disseminate information on consumer products and services.

Requires Federal agencies considering policies or regulations which may affect the interests of the consumer.

H.R. 6806. May 2, 1977. International Relations. Repeals the authority for suits against, or for imposing liability on, consular officers for neglect of duty or malfeasance.

H.R. 6807. May 2, 1977. Amends the Marine Mammal Protection Act of 1972 to establish a procedure for increasing quotas on marine mammals which may be taken incidental to commercial fishing operations if such quotas are found to have a detrimental effect on local employment. Requires the Secretary of the Interior or the Secretary of the Department in which the National Oceanic and Atmospheric Administration is operating to determine the effects of such quotas upon unemployment and underemployment in areas where tuna processing plants are located, and to increase such quotas in order to permit tuna to be supplied to such plants if necessary.

H.R. 6808. May 2, 1977. Ways and Means. Amends the Internal Revenue Code to require an automatic cost-of-living adjustment in the income tax rates, the amount of the standard deduction, personal exemption, and depreciation deduction, and the rate of interest payable on certain obligations of the United States.

H.R. 6809. May 2, 1977. Ways and Means. Amends title XX (grants to States for services) of the Social Security Act to provide cost-of-living increases in social services funding for child care beginning with fiscal year 1978.

H.R. 6810. May 2, 1977. Government Operations. Amends the Public Works Employment Act of 1976 to extend the authorization of appropriations of payments to State and local governments for economic recovery efforts. Amends the State and Local Fiscal Assistance Act of 1972 to add a new title authorizing the Secretary of the Treasury to make payments to States and local governments to help counter the effect of an economic recession.

H.R. 6811. May 2, 1977. Veteran's Affairs. Provides that recipients of veterans pensions and compensation will not have the amount of such pension or compensation reduced because of increases in social security benefits.

H.R. 6812. May 2, 1977. Ways and Means. Amends the Internal Revenue Code to provide an income tax credit for expenses incurred in the conversion of farm and ranch land into qualified wind erosion control or wildlife habitat areas.

H.R. 6813. May 2, 1977. Banking, Finance and Urban Affairs. Allows the inclusion of clauses which require payment in gold or any particular kind of coin or currency in contracts entered into on or after the date of enactment of this Act.

H.R. 6814. May 2, 1977. Ways and Means. Amends the Internal Revenue Code to exclude intangible drilling and development costs from the minimum tax on tax preferences.

H.R. 6815. May 2, 1977. Ways and Means. Amends Title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act to make benefits under such Title payable only to individuals who are both citizens and residents of the United States.

H.R. 6816. May 2, 1977. Ways and Means. Amends Title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act to make benefits under such Title payable to a resident alien only if such alien has continuously resided in the United States for at least five years.

H.R. 6817. May 2, 1977. Education and Labor. Amends the National Labor Relations Act to declare that it shall not be an unfair labor practice for an employer to discharge or discipline an employee whose conduct renders the employer liable for the assessment of a penalty under the Occupational Safety and Health Act of 1970.

H.R. 6818. May 2, 1977. Agriculture. Repeals the Food Stamp Act of 1964. Directs the Secretary of the Treasury to make payments to each State during each of the five fiscal years following enactment of this Act for the purpose of financing a program which is established and maintained by each State to assist in meeting the nutritional needs of its citizens.

H.R. 6819. May 2, 1977. House Administration. Directs that Presidential and Congressional elections be conducted on the first full weekend in November and that corresponding primaries be conducted on the last full weekend in the preceding June.

H.R. 6820. May 2, 1977. Interior and Insular Affairs. Authorizes the Secretary of the Department of Health, Education, and Welfare to convey specified lands in the State of California to D-Q University.

H.R. 6821. May 2, 1977. Ways and Means. Amends the Internal Revenue Code to authorize the Secretary of the Treasury to disclose the mailing address of taxpayers, upon written request, to officers of the National Institute for Occupational Safety and Health for epidemiologic and mortality studies of worker populations, and for health care and referral of workers.

H.R. 6822. May 2, 1977. Government Operations. Amends the Federal Property and Administrative Services Act to authorize the Administrator of General Services to assign surplus Federal real property to the Secretary of Commerce for disposal of such property to States and local areas threatened by unemployment as a result of the closing of Federal facilities. Requires that such property be used by the transferees for economic development purposes.

H.R. 6823. May 2, 1977. Merchant Marine and Fisheries. Authorizes appropriations for the Coast Guard for fiscal year 1978. Sets forth the authorized end strength for active duty personnel and prescribes the average military student loads for the Coast Guard for such fiscal year. Stipulates that the obligated balances against appropriations for use by the Coast Guard for operation and maintenance and Reserve training purposes for the two preceding fiscal years shall be merged with the current appropriations.

H.R. 6824. May 2, 1977. Interior and Insular Affairs. Authorizes the Secretary of the Interior to provide technical and financial assistance to the State of Alabama for the purpose of correcting slope failures and erosion problems along the Coosa River at the Fort Toulouse National Historical Landmark and Taskigi Indian Mound.

H.R. 6825. May 2, 1977. International Relations. Amends the United Nations Participation Act of 1945 to permit importation of chrome, shipped from a country other than Rhodesia under a contract entered into prior to March 18, 1977, if the seller is not of Southern Rhodesia origin.

H.R. 6826. May 2, 1977. Ways and Means. Amends the Internal Revenue Code to extend the time for a small business corporation to elect subchapter S status from the first month to the 15th day of the third month of the taxable year, and to any time during the preceding taxable year.

H.R. 6827. May 2, 1977. Interstate and Foreign Commerce. Amends the Public Health Service Act to authorize appropriations to extend through fiscal year 1979, Federal aid to States for public water system supervision programs.

Requires the Administrator of the Environmental Protection Agency to submit a report to Congress analyzing the anticipated cost of compliance with revised national primary drinking water regulations and methods of paying costs of compliance.

Authorizes the Administrator to provide technical assistance to States and publicly owned water systems to assist in alleviating emerencies respecting drinking water which may endanger public health.

H.R. 6828. May 2, 1977. Interior and Insular Affairs. Establishes the Lincoln Homestead National Recreation Area in Coles County, Illinois.

H.R. 6829. May 2, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion from gross income for any amount received as an annuity, pension, or other retirement by persons aged 65 or more.

H.R. 6830. May 2, 1977. Ways and Means. Amends the Internal Revenue Code to allow a distinct $10 income tax credit for contributions to candidates for Congress from the district, or in the case of Senator from the State, of the taxpayer, while maintaining the existing $25 credit for all other candidates.

H.R. 6831. May 2, 1977. Interstate and Foreign Commerce; Government Operations; Public Works and Transportation; Ways and Means; Banking, Finance and Urban Affairs. Establishes national energy goals for 1985. Establishes energy conservation programs for homes, schools, and hospitals. Requires the establishment of energy efficient standards for household appliances and rate design policies for electric and natural gas utilities. Imposes restrictions on the use of petroleum and natural gas as energy sources.

Establishes tax incentives for residential and industrial energy conservation. Establishes a system of taxes and rebates based on motor vehicle fuel consumption. Imposes a standby gasoline tax if consumption targets are not met. Establishes a program of energy assistance payments to certain individuals.

H.R. 6882. May 2, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 6833. May 3, 1977. Interior and Insular Affairs. Authorizes the Secretary of the Interior to construct and operate the Horsehead Flats and Winona irrigation units of the Pick-Sloan Missouri Basin program, North Dakota.

H.R. 6834. May 3, 1977. Education and Labor. Amends the Occupational Safety and Health Act of 1970 to exclude certain employers from coverage.

Revises certain procedures dealing with (1) standards and their promulgation; (2) inspections; investigations, and recordkeeping; (3) actions and notices, and (4) enforcement.

Provides for (1) certain affirmative defenses by employers; (2) consultative visits by the Secretary upon employer request; and (3) voluntary compliance agreements between the Secretary of an employer.

H.R. 6835. May 3, 1977. Education and Labor. Amends the Occupational Safety and Health Act of 1970 to provide that any employer who successfully contests a citation or penalty under such Act shall be awarded a reasonable attorney's fee and other reasonable litigation costs.

H.R. 6836. May 3, 1977. Judiciary. Requires all officers and agencies in the executive branch to submit to each House of Congress any rule or regulation, or change in a rule or regulation, proposed for use in the administration of any Federal law or program, together with a report containing an explanation thereof.

Prohibits any such rule, regulation, or change from taking effect if either House adopts a resolution stating that such rule, regulation, or change is contrary to law, inconsistent with the intent of Congress, or exceeds the mandate of the statute.

H.R. 6837. May 3, 1977. Judiciary. Amends provisions of the Gun Control Act of 1968 imposing additional sentences for using or unlawfully carrying a firearm during the commission of a Federal felony to (1) increase minimum additional sentences and (2) permit the Government to appeal a suspended or probationary sentence given with respect to a first conviction under such provisions.

H.R. 6838. May 3, 1977. Merchant Marine and Fisheries. Amends the Endangered Species Act of 1973 to exempt certain Federal public works projects from prohibitions against the jeopardizing or taking of endangered species, and the destruction or modification of their habitats.

H.R. 6839. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to prohibit the taking of a business deduction for expenses paid or incurred to advertise alcoholic beverages.

H.R. 6840. May 3, 1977. Interstate and Foreign Commerce; Judiciary. Amends the Federal Trade Commission Act to prohibit the application of a per se rule of illegality under the antitrust laws in the case of territorial market allocation agreements made as part of a licensing agreement: (1) for the manufacture, distribution and sale of a trademarked soft drink product; or (2) for the distribution or sale of a trademarked private label food product.

H.R. 6841. May 3, 1977. Banking, Finance and Urban Affairs; Education and Labor. Directs the President, through the Secretary of Labor, to carry out a program of projects, by means of contracts with public and private employers and institutions of higher education, to: (1) increase employee participation in decisionmaking and gains due to increased productivity; and (2) demonstrate programs and guidelines to maintain employment levels and improve the quality of working life.

Establishes a Human Resources Advisory Council to furnish advice and assistance in the administration of such projects.

Authorizes the Secretary to guarantee loans made to small businesses to enable them to participate in projects under this Act.

H.R. 6842. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to repeal the carryover basis provisions enacted by the Tax Reform Act which provide that beneficiaries receiving property from a decedent's estate will retain the decedent's basis in the property. Restores prior law which "stepped up" or "stepped down" the property's basis to its market value at the time of death without imposing tax consequences on the appreciation or depreciation the property underwent while held by the decedent.

H.R. 6843. May 3, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to establish a Long-Term Care Services program to provide home health, homemakers, nutrition, long-term institutional care, day care, foster home, and outpatient mental health services. Specifies that these services shall be delivered by community long-term care centers under the direction and control of a State long-term care agency.

H.R. 6844. May 3, 1977. Interstate and Foreign Commerce. Directs the Secretary of Transportation to prescribe minimum safety standards for liquefied natural gas facilities. Prohibits construction or operation of such facilities without a permit certifying compliance with such standards. Authorizes appropriations for studies designed to reduce risks associated with liquefied natural gas facilities.

H.R. 6845. May 3, 1977. Judiciary. Authorizes the Law Enforcement Assistance Administration to purchase a group life insurance policy or policies from private life insurance companies for the benefit of public safety officers.

Sets forth guidelines relative to such group plan.

Establishes an Advisory Council on Public Safety Officer Group Life Insurance composed of the Attorney General, the Secretary of the Treasury, the Secretary of Health, Education, and Welfare, and the Director of the Office of Management and Budget.

H.R. 6846. May 3, 1977. Merchant Marine and Fisheries. Establishes a program of Federal insurance against losses incurred by eligible ocean mining prototype operations. Directs the Administrator of the National Oceanic and Atmospheric Administration to develop criteria designed to protect the marine environment from such operations.

Stipulates that this Act shall be transitional in nature pending the outcome of the United Nations Conference on the Law of the Sea.

H.R. 6847. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to allow certain low- and middle-income individuals a limited, refundable income tax credit for the property taxes or rent paid by them for their principal residence.

H.R. 6848. May 3, 1977. Veterans' Affairs. Denies veterans' benefits to an individual whose discharge from military service during the Vietnam era under less than honorable conditions as administratively upgraded, under temporarily revised standards, to discharge under honorable conditions; but only when such veteran's claim for benefits is based solely on such upgraded discharge.

H.R. 6849. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to provide honorably discharged veterans of the Vietnam War refundable, $500 income tax credit for taxable years ending between 1976 and 1980.

H.R. 6850. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to prohibit the taking of a business deduction for expenses paid or incurred to advertise tobacco products.

H.R. 6851. May 3, 1977. Public Works and Transportation; Ways and Means. Authorizes the Secretary of Transportation to approve Federal participation in State projects to repair or replace unsafe highway bridges. Amends the Highway Revenue Act of 1956 to extend the appropriations authorized under such Act for the Highway Trust Fund through fiscal year 1990. Amends the Land and Water Conservation Fund Act to extend such fund through fiscal year 1990. Postpones specified excise tax reductions under the Internal Revenue Code of 1954.

H.R. 6852. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to allow taxpayers maintaining households to elect a $250 income tax credit for each dependent aged 65 or over who resides in their homes.

H.R. 6853. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to provide that the manufacturer's excise tax imposed on fishing equipment shall be due at the close of the quarter immediately following the quarter in which the goods are shipped.

H.R. 6854. May 3, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Titles XVIII (Medicare) and XIX (Medicaid) of the Social Security Act to require hospitals with 50 or more beds providing service under such Titles to furnish patients with written notice of charges for inpatient hospital services within ten days after the last day of each service period.

H.R. 6855. May 3, 1977. Banking, Finance and Urban Affairs. Authorizes the Secretary of Housing and Urban Development to make grants to local agencies for converting closed school buildings into community centers, senior citizen centers and specified educational, medical or social service centers.

Directs the Secretary to serve as a national clearinghouse for local agencies by providing information on possible alternative uses for closed school buildings.

H.R. 6856. May 3, 1977. Interior and Insular Affairs. Repeals provisions granting lands to Mono County, California, to the city of Los Angeles, California, for designated uses; and granting rights-of-way over public lands and reserved land to the city of Los Angeles.

H.R. 6857. May 3, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to repeal the earnings test, to eliminate special dependency requirements for husband's and widower's benefits, to permit payments of benefits to a married couple based on their combined earnings record, to allow individuals age 65 and over to elect to be exempt from social security coverage, to provide prorated benefits for the month of a beneficiary's death, and to eliminate the five-month waiting period for disability benefits.

H.R. 6858. May 3, 1977. Judiciary. Amends the Voting Rights Act of 1965 to extend the prohibition against durational residency requirements and the right to absenteen voting in congressional elections.

H.R. 6859. May 3, 1977. House Administration. Amends the Federal Election Campaign Act of 1971 to require that any listing of candidates for Federal office appear on election ballots before any other listing.

H.R. 6860. May 3, 1977. Interstate and Foreign Commerce. Provides protection for certain sales representatives terminated from their accounts without justification by requiring the principals to indemnify the sales representatives.

H.R. 6861. May 3, 1977. Post Office and Civil Service. Repeals the requirement that Federal employees be mandatorily retired upon reaching the age of 70 years.

H.R. 6862. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion for persons aged 65 or over for amounts received as an annuity, pension, or other retirement benefit, and for all persons receiving retirement benefits under a public retirement system.

H.R. 6863. May 3, 1977. Ways and Means. Amends Title XVI (Supplemental Income for the Aged, Blind, and Disabled) of the Social Security Act to require the Secretary of Health, Education, and Welfare to pay a special housing allowance to each eligible individual whose housing expenses exceed 25 percent of income or $1,200 a year, whichever is less.

H.R. 6864. May 3, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for hearing aids and dentures under the supplementary medical insurance program.

H.R. 6865. May 3, 1977. House Administration. Provides for the nomination of party Presidential and Vice Presidential candidates

by popular vote in a national closed primary election.

Sets forth guidelines for such elections, including those relative to (1) eligibility for placement of parties and candidates on ballots, (2) eligibility to vote, and (3) in the event no candidate receives a majority of the votes cast by party members, runoff elections.

H.R. 6866. May 3, 1977. Judiciary. Requires specified organizations which employ lobbyists to register and file quarterly expense reports with the Comptroller General. Makes such reports available to the public. Establishes civil and criminal sanctions to enforce this Act.

H.R. 6867. May 3, 1977. Judiciary. Requires specified organizations which employ lobbyists to register and file quarterly expense reports with the Comptroller General. Makes such reports available to the public. Establishes civil and criminal sanctions to enforce this Act.

H.R. 6868. May 3, 1977. Judiciary. Requires specified organizations which employ lobbyists to register and file quarterly expense reports with the Comptroller General. Makes such reports available to the public. Establishes civil and criminal sanctions to enforce this Act.

H.R. 6869. May 3, 1977. Judiciary. Revises and recodifies Title 18 of the United States Code (Crimes and Criminal Procedure).

H.R. 6870. May 3, 1977. Judiciary. Amends the Indochina Migration and Refugee Assistance Act of 1975 to extend through 1980 funds for the provision of financial, medical, employment, and relocation assistance to refugees from Cambodia, Vietnam, or Laos.

H.R. 6871. May 3, 1977. Interstate and Foreign Commerce. Amends the Interstate Commerce Act to direct the Administrator of the Federal Railroad Administration to provide financial assistance to railroads to cover rehabilitation and operation costs for unprofitable railroad lines when the Interstate Commerce Commission finds that the public convenience and necessity does not permit the abandonment or discontinuance of such a line.

H.R. 6872. May 3, 1977. Interstate and Foreign Commerce. Prohibits the use of any appropriated funds to carry out any research activity on a living human fetus which is removed alive from the womb of its mother or to assist any person in carrying out such research activity.

H.R. 6873. May 3, 1977. Banking, Finance and Urban Affairs. Amends the Housing Act of 1949 to extend and increase specified rural housing assistance programs.

Directs the Secretary of Agriculture to withhold assistance for specified programs from any otherwise eligible borrower who fails to incorporate energy conservation features into such structure.

Permits the payment of reasonable attorney's fees for the representation of persons and organizations seeking to enforce rights under Title V of the Housing Act of 1949.

H.R. 6874. May 3, 1977. Agriculture. Amends the Agricultural Act of 1970 to require daily release by the Secretary of Agriculture of reports of large export sales of agricultural commodities.

H.R. 6875. May 3, 1977. Banking, Finance and Urban Affairs. Amends the Truth in Lending Act to require each appropriate regulatory agency to conduct biennial examinations of every creditor subject to the requirements of this Act. Calls for public disclosure of specified information obtained in such examinations for disclosure to consumers of the discovery of apparent substantial violations.

Sets forth a limited exemption from civil liability for creditors in error.

H.R. 6876. May 3, 1977. Education and Labor. Amends the Wagner-Peyser Act to direct the Secretary of Labor to provide technical and management assistance to State public employment offices, establish a national clearinghouse for employment service information in the United States Employment Service, and implement an assistant program for certain State employment office job placement projects.

Directs the Secretary to study the merits of a nationwide job bank system and of replacing the State employment office system with a Federal office system and to modify any requirement that unemployment benefit claimants register with State unemployment offices.

H.R. 6877. May 3, 1977. Ways and Means. Amends the Internal Revenue Code to allow small business investment companies electing to be taxed as regulated investment companies, and having a tax deficiency as a result of a judicial judgment or administrative dividend deductions to satisfy such deficiencies by paying out dividends within 90 days after the judgment or settlement.

H.R. 6878. May 3, 1977. Ways and Means. Amends the policy of Congress to restrict to 750,000,000 pounds the annual aggregate importation of fresh, chilled, or frozen beef, goat, or sheep meat after December 31, 1974. Prescribes a formula for adjustment of such quota. Directs the Secretary of Agriculture to allocate such quota among supplying countries according to certain criteria.

H.R. 6879. May 3, 1977. Ways and Means. Amends the Tariff Schedules of the United States to prohibit the entry of meat imports produced or manufactured in foreign trade zones, possessions, or territories of the United States unless: (1) the quantity of such meat is within the import limitations on such imports established by international agreements or restrictions under the Tariff Schedules; or (2) the quantity is deducted from the quantity which may be entered under other quantitative import restrictions.

H.R. 6880. May 3, 1977. Interstate and Foreign Commerce. Amends the Federal Trade Commission Act to render invalid any provision of a cease and desist order issued by the Commission when such provision requires affirmative action; unless such requirement is specifically provided for in a rule which is general in application and effect.

H.R. 6881. May 3, 1977. Judiciary. Amends a specified Act for the relief of certain individuals to restore certain benefits to such individuals.

H.R. 6882. May 3, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 6883. May 3, 1977. Judiciary. Authorizes classification of a certain individual as a child for purposes of the Immigration and Nationality Act.

H.R. 6884. May 4, 1977. International Relations. Amends the Foreign Assistance Act of 1961 to authorize appropriations for FY 1978 for disaster relief, international narcotics control, military assistance, security supporting assistance, international military education and training, and the Middle East Special Requirements Fund.

Amends the Arms Export Control Act to authorize appropriations to carry out such Act. Increases the ceiling of credits and loans for foreign military sales. Exempts arms exports to certain countries from restrictions on major arms exports.

Prohibits assistance for military operations in Zaire, or for aiding foreign governments in the repression of human rights.

H.R. 6885. May 4, 1977. Veterans' Affairs. Requires the Administrator of Veterans' Affairs to pay (in addition to any already paid) a monthly pension to $150 to each veteran of World War I who meets specified service requirements, or to the surviving spouse of each such veteran, or when there is no surviving spouse; to the child or children of each such veteran.

H.R. 6886. May 4, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce. Grants additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange service.

H.R. 6887. May 4, 1977. Ways and Means. Repeals the provision of the Emergency Jobs and Unemployment Assistance Act of 1974 which denies assistance and waiting period credits under the special unemployment assistance program between academic years or terms to certain nonprofessional employees of educational institutions or agencies.

H.R. 6888. May 4, 1977. Interior and Insular Affairs. Amends the Atomic Energy Act of 1954 to prohibit the commercial licensing of plutonium-fueled nuclear reactors and nuclear fuel reprocessing facilities designed to recover plutonium.

H.R. 6889. May 4, 1977. Interior and Insular Affairs. Amends the Atomic Energy Act of 1954 to prohibit the commercial licensing of plutonium-fueled nuclear reactors and nuclear fuel reprocessing facilities designed to recover plutonium.

H.R. 6890. May 4, 1977. District of Columbia. Amends the District of Columbia Self-Government and Governmental Reorganization Act to transfer certain powers and authorities of the President and the Senate with regard to the District of Columbia Government to the Mayor and City Council respectively.

H.R. 6891. May 4, 1977. Public Works and Transportation. Amends the Flood Control Act of 1954 to authorize the Corps of Engineers to furnish technical assistance to any State for removing snags and clearing and straightening channels in navigable streams.

H.R. 6892. May 4, 1977. Small Business. Amends the Small Business Act to limit to three percent the rate of interest on the Small Business Administration's share of disaster relief loans made to business affected by: (1) catastrophes such as floods, riots, or civil disorders; (2) disasters, as defined by specified laws; or (3) disease or toxicity introduced into products intended for human consumption.

H.R. 6893. May 4, 1977. Judiciary. Prohibits any State or political subdivision thereof, in which a Member of Congress maintains a place of abode for purposes of attending sessions of Congress from (1) treating such Member as a resident or domiciliary thereof, or (2) treating any compensation paid by the United States to such Member as income for services performed within, or from sources within, such State or subdivision, for income tax purposes unless such Member represents such State or district therein.

H.R. 6894. May 4, 1977. Armed Services; Banking, Finance and Urban Affairs; District of Columbia; Education and Labor; Interstate and Foreign Commerce; Post Office and Means. Creates a U.S. Health Service Organization to provide without charge to all residents comprehensive health care services delivered by salaried health workers.

H.R. 6895. May 4, 1977. Interstate and Foreign Commerce; Ways and Means. Amends title XVIII (medicare) of the Social Security Act to provide payment for optometric and medical vision care under the supplementary medical insurance program.

H.R. 6896 May 4, 1977. District of Columbia. Restates the charter of the George Washington University, Washington, D.C., in its entirety.

H.R. 6897. May 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion from gross income for any amount received as an annuity, pension, or other retirement benefit.

H.R. 6898. May 4, 1977. Ways and Means. Increases to $5,000 the amount of outside earnings which is permitted an individual each year without any deduction from benefits under title II (old-age, survivors, and disability insurance) of the Social Security Act.

H.R. 6899. May 4, 1977. Education and Labor. Increases the dollar amount of contracts to which the Davis-Bacon Act applies and provides for future increases tied to cost-of-living increases. Makes such act applicable only to unskilled laborers. Details the method for computing the "prevailing wage" under the act. Establishes a Federal Construction Appeals Board to hear appeals regarding wage rate determinations under the act.

H.R. 6900. May 4, 1977. Interior and Insular Affairs. Amends the National Trails System Act to include historic trails, in addition to recreation and scenic trails, within the National Trails System.

Designates the Oregon National Historic Trail and Travelway in the States of Oregon and Washington, as a unit of the National Trails System.

H.R. 6901. May 4, 1977. Rules. Requires review of Federal programs to determine if they warrant continuation. Requires the President to conduct such review of the programs covered by the annual budget. Requires Congress to make such review every four years.

Requires that all rules proposed by any Federal agency be submitted to Congress for approval.

H.R. 6902. May 4, 1977. House Administration. Requires each State and local government to permit an individual who is eligible under applicable State and Federal law to register to vote in any Federal election to register on the date of a Federal election at the appropriate polling place.

Directs the Federal Election Commission to make grants to States for approved voter registration outreach programs.

Establishes the positions of Administrator and Assistant Administrator of Voter Registration within the Commission.

Prohibits commercial use of any list compiled by a State or local government of individuals registered to vote in a Federal election.

H.R. 6903. May 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide for the reimbursement of all of a taxpayer's reasonable litigation expenses, including attorneys' fees, in any legal action commenced by the Government, or any action instituted by a taxpayer contesting the accuracy of a deficiency assessment or claiming a refund, in which the taxpayer substantially prevails, or the Government withdraws.

H.R. 6904. May 4, 1977. Agriculture. Amends the Agricultural Adjustment Act of 1938 to set formulas for the national marketing quotas for the 1978 through 1981 crops of peanuts. Sets the price supports for such crops.

H.R. 6905. May 4, 1977. Veterans' Affairs. Exempts courses which lead to a standard college degree from the "85–15" rule whereby the Administrator of Veterans' Affairs is required to disapprove enrollment of any eligible veteran, not already enrolled, in any course offered by a proprietary profit or proprietary nonprofit educational institution where more than 85 percent of the students enrolled have their fees paid by either the Veterans' Administration or the institution itself.

Revises the application of rules governing the two-year period a course must be in operation before enrollment of eligible veterans or persons can be approved.

H.R. 6906. May 4, 1977. Interior and Insular Affairs. Authorizes the Federal Power Commission to issue a license for the construction of Hualapai Dam, under an exemption from park land use laws.

Amends the Colorado River Basin Project Act to repeal the exemption of portions of the Colorado River from the water resources development licensing provisions of the Federal Power Act.

H.R. 6907. May 4, 1977. Merchant Marine and Fisheries. Amends the Marine Mammal Protection Act of 1972 to require the Secretary of the Interior or the Secretary of the department in which the National Oceanic and Atmospheric Administration is operating to issue permits for the taking, incidental to commercial tuna fishing operations, of specified numbers of certain stocks of marine mammals, during a certain period.

Requires the Secretary to place an observer aboard fishing vessels engaged in fishing for tuna or porpoise.

H.R. 6908. May 4, 1977. Banking, Finance and Urban Affairs; Judiciary. Prohibits any United States entity or representative from obtaining copies of, or access to, information contained in the financial records, toll records, or credit records of any customer of a financial institution, communication common carrier, credit card issuer, or consumer reporting agency. Lifts such prohibition if: (1) the records are described with sufficient particularity; and (2) the customer has authorized disclosure, the disclosure is obtained in response to an administrative subpoena, search warrant, or judicial subpoena, or disclosure is in compliance with specified provisions of the Fair Credit Reporting Act. Restricts the use of mail covers and the interception of wire and oral communications for purposes of supervisory observing by communication common carriers and others.

H.R. 6909. May 4, 1977. Merchant Marine and Fisheries. Prohibits the taking of wolves or other predators on public lands by private individuals or Federal or State agencies. Permits the taking of any individual predator, upon order of the Secretary of the Interior or the Secretary of Agriculture, upon a demonstration that such predator has been killing domestic livestock. Prohibits the use of aircraft in taking predators.

H.R. 6910. May 4, 1977. International Relations. Sets forth United States policy on (1) non-proliferation of nuclear weapons, and (2) strengthening the International Atomic Energy Agency and its safeguards system. Establishes a nuclear safeguards training program. Directs the Energy Research and Development Administration to expand the uranium enrichment capacity of the United States. Requires agreements for non-military nuclear cooperation to include certain non-proliferation and nuclear safeguard provisions. Restricts the amount of nuclear material which may be distributed by ERDA. Revises the criteria and procedures for nuclear export licensing by the Nuclear Regulatory Commission. Requires annual review of governmental non-proliferation activities.

H.R. 6911. May 4, 1977. Post Office and Civil Service. Amends the Postal Reorganization Act Amendments of 1976 to extend to December 31, 1978, the period during which the Postal Service is prohibited from: (1) increasing rates and fees to levels exceeding those in effect on the date of enactment of the Act; (2) offering levels and types of services which are less than those available on July 1, 1976; and (3) closing certain postal facilities which were in operation on July 1, 1976.

H.R. 6912. May 4, 1977. Agriculture. Requires all exporters of specified agricultural commodities, under the Agricultural Act of 1970, to report specified items of information to the Secretary of Agriculture within 24 hours after entering into export contracts involving a substantial quantity of such a commodity.

H.R. 6913. May 4, 1977. Education and Labor. Amends the Older Americans Act of 1965 to authorize the Commissioner of the Administration on Aging to make grants to States for the purposes of (1) supporting a staff person within the State agency responsible for the delivery of legal services to the elderly, and (2) supporting direct legal services by providing funds to area agencies. Authorizes the Commissioner to make grants to or contract with national resource centers to support organizations providing legal services to the elderly and provide legal advice to the elderly.

H.R. 6914. May 4, 1977. Judiciary. Directs the Attorney General to make grants to qualified State programs for the compensation of victims of crime.

Establishes an Advisory Committee on Victims of Crime to advise the Attorney General with respect to the administration of such grant program and the compensation of victims of crime.

H.R. 6915. May 4, 1977. Veterans' Affairs. Subjects the decisions of the Administrator of Veterans' Affairs on any question of law or fact under any law administered by the Veterans' Administration providing benefits for veterans and their dependents or survivors to judicial review by a district court in the district where the claimant resides.

Substitutes for the present ten limit on attorney's and agent's fee for claims to requirement that such fees be reasonable.

H.R. 6916. May 4, 1977. Education and Labor. Amends the Older Americans Act of 1965 to extend the surplus commodities program under such Act for fiscal year 1978.

H.R. 6917. May 4, 1977. Ways and Means. Amends the Tariff Schedules of the United States to increase for a five-year period the customs duty on specified hand tools.

H.R. 6918. May 4, 1977. Ways and Means. Amends the Internal Revenue Code to extend the corporate surtax exemption to political organizations provided they were not organized to use the exemption.

H.R. 6919. May 4, 1977. Ethics. Prohibits any Member of the House of Representatives from soliciting or accepting gifts of money for personal use.

H.R. 6920. May 4, 1977. Science and Technology. Establishes a five-year program in the Energy Research and Development Administration designed to develop advanced automobile propulsion systems. Directs the Secretary of Transportation and the Administrator of the Environmental Protection Agency to evaluate test vehicles for compliance with applicable environmental, energy efficiency, and motor vehicle safety requirements.

H.R. 6921. May 4, 1977. Interior and Insular Affairs. Authorizes the Secretary of the Interior to designate lands in Hyde Park, New York, as the Eleanor Roosevelt National Historic Site and to acquire and manage such lands.

H.R. 6922. May 4, 1977. Ways and Means. Amends the Tariff Schedules of the United States to raise the resident tariff exemption on items imported for personal use or gifts to $500.

H.R. 6923. May 4, 1977. Ways and Means. Amends the Social Security Act by adding Title XXI—Minimum Income Maintenance Benefits which establishes a national program to guarantee a minimum adequate income for all qualified residents of the United States.

H.R. 6924. May 4, 1977. Education and Labor. Directs the Secretary of Labor to (1) contract with Opportunities Industrialization Centers, Incorporated, for the provision of skills training to certain types of unemployed persons through such Centers, and (2) contract with other national community based organizations, for the provision of comprehensive employment services, including counseling, job creation and development, remedial education, and followup.

Directs the head of each agency having administrative authority with respect to specified Federal grant and construction programs to take steps to assure that special consideration be given national community based organizations in providing employment services and job opportunities for unemployed individuals pursuant to such authority.

H.R. 6925. May 4, 1977. Education and Labor. Directs the Coordinating Council on Juvenile Justice and Delinquency Prevention to organize and convene a National Conference on Learning Disabilities and Juvenile Delinquency.

Directs the Conference to formulate methods of disseminating extant knowledge and the results of ongoing research related to learning disabilities and handicaps to appropriate agencies and individuals.

H.R. 6926. May 4, 1977. Education and Labor. Permits the Commissioner of Education to provide financial assistance to local educational agencies determined to be within an area in which an emergency has occurred prior to July 1, 1978, or which has had its public elementary or secondary school facilities destroyed or seriously damaged prior to July 1, 1978.

H.R. 6927. May 4, 1977. Post Office and Civil Service. Authorizes the payment of a civil service annuity to those employees of the Bureau of Indian Affairs and the Indian Health Service who are not entitled to full retirement benefits and who meet specified employment and length of service requirements.

H.R. 6928. May 4, 1977. Merchant Marine and Fisheries. Amends the Marine Mammal Protection Act of 1972 to require the Secretary of the Interior or the Secretary of the department in which the National Oceanic and Atmospheric Administration is operating to issue permits for the taking, incidental to commercial tuna fishing operations, of specified numbers of certain stocks of marine mammals, during a certain period.

Requires the Secretary to place an observer aboard fishing vessels engaged in fishing for tuna or porpoise.

H.R. 6929. May 4, 1977. Interstate and Foreign Commerce. Amends the Railroad Retirement Act of 1974 to allow an individual otherwise eligible to receive an annuity under such Act to receive such annuity even though the individual continues employment elsewhere on the basis of less than a 35-hour workweek.

H.R. 6930. May 4, 1977. House Administration. Requires each State and local government to permit an individual who is eligible under applicable State and Federal law to register to vote in any Federal election to register on the date of a Federal election at the appropriate polling place.

Directs the Federal Election Commission to make grants to States for approved voter registration outreach programs.

Establishes the positions of Administrator and Assistant Administrator of Voter Registration within the Commission.

Prohibits commercial use of any list compiled by a State or local government of individuals registered to vote in a Federal election.

H.R. 6931. May 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow certain annual additions for pension plan participants to exceed 25 percent of the participant's compensation.

H.R. 6932. May 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 6933. May 6, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 6934. May 4, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 6935. May 4, 1977. Judiciary. Permits a certain individual to be naturalized as a citizen of the United States.

H.R. 6936. May 5, 1977. House Administration. Authorizes the appropriation of a specified sum to the Federal Election Commission for fiscal year 1978.

H.R. 6937. May 5, 1977. Agriculture. Directs the Secretary of Agriculture, through the Statistical Reporting Service, to take an enumeration of horses in the United States, by the "sampling" method if preferred, beginning in 1978.

H.R. 6938. May 5, 1977. Ways and Means. Amends the Tax Reform Act to delay its provisions relating to the minimum tax for one year.

H.R. 6939. May 5, 1977. Judiciary. Amends the Immigration and Nationality Act to make it unlawful to knowingly hire an alien not lawfully admitted into the United States. Requires that employees of the Department of Health, Education, and Welfare disclose the names of illegal aliens who are receiving assistance under the Social Security Act.

Makes punishable by a fine or imprisonment the making of false border crossing cards, alien registration receipt cards, and other documents used for entry into the United States.

H.R. 6940. May 5, 1977. Ways and Means. Amends the Internal Revenue Code to qualify certain trusts established to provide benefits and satisfy claims under the Black Lung Act as tax exempt organizations.

H.R. 6941. May 5, 1977. Judiciary. Increases penalties and imposes mandatory minimum sentences for the commission of certain crimes involving narcotic drugs.

Sets forth procedures and standards for: (1) pretrial and posttrial release of persons charged with or convicted of certain crimes involving drugs; and (2) pretrial release and treatment of narcotics addicts charged with noncapital Federal crimes.

H.R. 6942. May 5, 1977. Interior and Insular Affairs. Amends the Geothermal Steam Act of 1970 to increase the maximum amount of acreage which may be held by a single lessee. Requires that lessees be given access to existing right-of-way and existing transmission lines and an opportunity to participate in the planning of rights-of-way for new lines and facilities.

Authorizes the use of phased environmental assessments upon the request of a majority of the potential bidders from geothermal resources.

H.R. 6943. May 5, 1977. Merchant Marine and Fisheries. Provides for the sale of nonessential real property in the Panama Canal Zone to appropriate individuals and nongovernmental entities under a plan to be drafted by the President and subject to congressional veto. Directs the President to prepare a detailed proposal for self-government of the Canal Zone under the Constitution.

H.R. 6944. May 5, 1977. Education and Labor. Amends the Employee Retirement Income Security Act of 1974 to exempt from regulatory provisions thereunder employee benefit plans maintained solely for the purpose of complying with health insurance laws.

H.R. 6945. May 5, 1977. Ways and Means. Provides that the income tax treatment of certain transportation expenses between the taxpayer's residence and place of work shall be determined without regard to Revenue Ruling 76-453 or any other ruling, regulation or decision reaching the same result.

H.R. 6946. May 5, 1977. Ways and Means. Provides that the income tax treatment of certain transportation expenses between the taxpayer's residence and place of work shall be determined without regard to Revenue Ruling 76-453 or any other ruling, regulation or decision reaching the same result.

H.R. 6947. May 5, 1977. Education and Labor. Prohibits the sexual exploitation of children by making it unlawful for any individual to (1) cause or permit a child to be photographed or filmed engaged in a sexual act prohibited under this Act; (2) photograph or film a prohibited sexual act; (3) knowingly transport a film or photograph depicting a prohibited sexual act; or (4) receive for sale or sell any such film or photograph, if such individual knows or should know such film or photograph has or may be transported in such a manner as to affect interstate or foreign commerce.

H.R. 6948. May 5, 1977. Interstate and Foreign Commerce. Amends the Public Health Service Act to require the Secretary of Health, Education, and Welfare to establish criteria and minimum standards for the training and licensure of radiologic technologists. Directs that State and local governments be encouraged to minimize exposure of the public to ionizing from all sources.

Authorizes the Secretary to make grants to States to carry out such purposes.

Requires promulgation of performance standards and inspection programs for x-ray systems.

H.R. 6949. May 5, 1977. Interstate and Foreign Commerce. Amends the Public Health Service Act to require the Secretary of Health, Education, and Welfare to make grants to public or nonprofit entities for research projects in fertility and sterility in humans and the human reproductive process.

H.R. 6950. May 5, 1977. Armed Services. Revises the special pay structure for active duty medical officers of the uniformed services to direct the Secretaries of Defense and Health, Education, and Welfare to promulgate regulations through which variable incentive pay may be adjusted to reflect (1) amounts that the Federal Government has paid to, or (2) benefits received by, medical officers prior to the commencement of active duty.

H.R. 6951. May 5, 1977. Banking, Finance and Urban Affairs. Amends the Council on Wage and Price Stability Act to extend the authority of the Council on Wage and Price Stability through fiscal year 1979 and to authorize the appropriation of funds to carry out such Act for fiscal years 1978 and 1979.

Directs the Council to focus attention on the need for full employment.

H.R. 6952. May 5, 1977. Judiciary; Post Office and Civil Service. Requires financial disclosure by all officials in the executive branch from persons classified GS-16 through the President. Establishes within the Civil Service Commission an Office of Government Ethics to monitor compliance with this act and to audit financial disclosure statements for signs of illegal conflicts of interests. Extends the current prohibition on appearance before agencies of employment by former Federal personnel to informal as well as formal contacts and extends the period of such prohibition.

H.R. 6953. May 5, 1977. Post Office and Civil Service. Entitles a Federal employee whose position is reduced in grade to have the grade of such position treated as if such reduction had not occurred so long as such position is continued to be filled by such employee without a break in service.

H.R. 6954. May 5, 1977. Armed Services; Judiciary; Post Office and Civil Service. Requires financial disclosure by all officials in the executive branch from persons classified GS-16 through the President. Establishes within the Civil Service Commission an Office of Government Ethics to monitor compliance with this act and to audit financial disclosure statements for signs of illegal conflicts of interest. Extends the current prohibition on appearance before agencies of employment by former Federal personnel to

informal as well as formal contacts and extends the period of such prohibition.

H.R. 6955. May 5, 1977. Judiciary. Establishes in the Department of Justice a Victims Compensation Commission to compensate intervenors and victims in cases of personal injury or death resulting from certain violent or potentially violent criminal offenses. Establishes within each U.S. attorney's office a witnesses of crime assistance bureau to create and administer witness assistance programs that encourage and enable witnesses of crime to testify.

Increases the expense fees for witnesses to crime who testify in Federal court.

H.R. 6956. May 5, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XVI of the Social Security Act to prohibit the payment of supplementary security income benefits to an alien unless he is a permanent resident of the United States and has continuously resided therein for at least 1 year.

H.R. 6957. May 5, 1977. Interstate and Foreign Commerce. Amends the Railroad Safety Act of 1970 to direct the Secretary of Transportation to issue regulations requiring that the locomotive and rear car of all passenger, freight, and commuter trains be equipped with bulletproof glass and equipment which is capable of providing controlled temperatures.

H.R. 6958. May 5, 1977. Post Office and Civil Service. Authorizes the Director of the Administrative Office of the United States Courts to place 15 positions in grades 16, 17, and 18 of the General Schedule.

H.R. 6959. May 5, 1977. Agriculture. Amends specified provisions of the Emergency Livestock Credit Act of 1974 with regard to the principal, interest and repayment terms of guaranteed loans.

H.R. 6960. May 5, 1977. Ways and Means. Amends the Internal Revenue Code to exclude from gross income the first $5,000 received by an individual as a civil service or other Federal retirement annuity.

H.R. 6961. May 5, 1977. Armed Services. Credits female members of the armed forces for purposes of computing years of active service in the armed forces, with services performed during World War I by such individuals as members of the telephone operating units of the Army.

H.R. 6962. May 5, 1977. Public Works and Transportation. Amends the Water Resources Development Act of 1974 to prohibit the Congress from authorizing well drilling for the water needs of the Washington metropolitan area if the county in which the drilling is to take place disapproves such drilling by referendum.

H.R. 6963. May 5, 1977. International Relations. Amends the Mutual Educational and Cultural Exchange Act of 1961 to disallow Federal employees to accept grants and other types of assistance provided by a foreign government to facilitate participation of such employees in certain cultural exchange programs.

H.R. 6964. May 5, 1977. Public Works and Transportation. Authorizes the Secretary of the Army, acting through the Chief of Engineers, to design and construct on an expedited basis certain flood control facilities on portions of the Big Sandy River, and the Cumberland River, in Kentucky.

H.R. 6965. May 5, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to authorize payment for specified services performed by chiropractors, and physical examination, and related routine laboratory tests.

H.R. 6966. May 5, 1977. Armed Services. Revises eligibility standards for receiving the gold star lapel button.

H.R. 6967. May 5, 1977. International Relations. Amends the Peace Corps Act to authorize appropriations for the Peace Corps for fiscal year 1978.

H.R. 6968. May 5, 1977. Public Works and Transportation. Authorizes the Secretary of the Army, acting through the Chief of Engineers, to construct a water supply system in Ohio.

H.R. 6969. May 5, 1977. Ways and Means. Amends the Internal Revenue Code to allow a $200 income tax deduction for purchase installation expenses for residential smoke detectors.

H.R. 6970. May 5, 1977. Merchant Marine and Fisheries. Amends the Marine Mammal Protection Act of 1972 to require the Secretary of Commerce or the Interior, as appropriate to their respective jurisdictions under such Act, to issue permits for the taking of marine mammals in specified numbers incidental to commercial fishing operations for yellowfin tuna.

Requires the Secretary to establish a program to place observers aboard fishing vessels to observe fishing methods and gear for the purpose of reducing such incidental taking.

H.R. 6971. May 5, 1977. Veterans' Affairs. Exempts courses which lead to a standard college degree from the "85–15" rule under which the Administrator of Veterans' Affairs is required to disapprove enrollment of any eligible veteran, not already enrolled, in any course where more than 85 percent of the students enrolled have their fees paid by either the Federal Government or the educational institution itself.

H.R. 6972. May 5, 1977. Government Operations. Establishes the Commission on the Reorganization of the executive branch of the Government to study all instrumentalities of the Government except those of the legislative or judicial branches to determine what changes are necessary to eliminate duplication and improve efficiency. Requires the Commission to submit to the President and Congress a final report by December 31, 1978, at which time the Commission shall cease to exist. Permits the President to submit to Congress reorganization plans to implement any recommendation of the Commission until January 1, 1980.

H.R. 6973. May 5, 1977. Education and Labor. Directs the Secretary of Labor to make financial assistance available for the establishment and operation of service, employment, and redevelopment centers. States that such centers shall offer classes specifically designed to assist disadvantaged unemployed and underemployed Spanish-speaking persons. Specifies additional education, employment, and training services to be included in the service, employment and redevelopment program.

H.R. 6974. May 5, 1977. Post Office and Civil Service. Authorizes the Director of the Administrative Office of the United States Courts to place a total of 15 positions in grades 16, 17, and 18 of the General Schedule.

H.R. 6975. May 5, 1977. Post Office and Civil Service. Increases from 240 to 340 the number of hearing examiner positions which the Civil Service Commission may establish and place at grade 16 of the General Schedule.

H.R. 6976. May 5, 1977. Armed Services; Interstate and Foreign Commerce; Post Office and Civil Service; Ways and Means. Declares that time spent by civilian citizens and permanent residents of the United States in prisoners-of-war camps, internment centers, or similar places, on or after December 7, 1941, shall be considered: (1) service in the active military or naval service for purposes of certain veterans' benefits; (2) military service during war for purposes of the Railroad Retirement Act of 1937; (3) military service for purposes of Civil Service retirement; and (4) active service for purposes of Armed Forces retirement pay.

H.R. 6977. May 5, 1977. Banking, Finance and Urban Affairs. Amends the National Flood Insurance Act of 1968 to make additional coverage available for residential properties.

Requires the Secretary of Housing and Urban Development to purchase certain real property located in flood-risk areas or covered by flood insurance which has sustained substantial damage. Authorizes loans by the Secretary for the elevation of damaged single-family dwellings within a regulatory floodway.

H.R. 6978. May 5, 1977. Judiciary. Declares a certain individual eligible to receive veterans' educational assistance during the period of time necessary for her to complete her program of study for a bachelor of arts degree.

H.R. 6979. May 6, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to exclude from the definition of a food additive as defined by such Act any substance used as a component of food-contact articles provided it is not reasonably expected to contribute more than 0.05 part per million to the contacted food as determined under conditions provided for by this Act.

Authorizes the Secretary of Health, Education, and Welfare to establish a lower limit for a substance in order to protect the public health.

H.R. 6980. May 6, 1977. Interior and Insular Affairs. Adds the site of the salt cairn utilized by the Lewis and Clark Expedition while encamped at Fort Clatsop, Oregon, to the Fort Clatsop National Memorial.

H.R. 6981. May 6, 1977. Post Office and Civil Service. Upgrades the offices of Chairman of the Board of Governors of the Federal Reserve System from position II to position I of the Executive Schedule and the Members of the Board of Governors of the Federal Reserve System from position III to position II of the Executive Schedule.

H.R. 6982. May 6, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) and Title XIX (Medicaid) of the Social Security Act to include in the coverage provided under such programs the services of licensed (registered) nurses.

H.R. 6983. May 6 1977. Banking, Finance and Urban Affairs. Allows the inclusion of clauses which require payment in gold or any particular kind of coin or currency in contracts entered into on or after the date of enactment of this Act.

H.R. 6984. May 6, 1977. Interstate and Foreign Commerce. Prohibits any agent of the United States from acquiring or inspecting medical and dental records of patients whose care is not provided by Federal funds without the patient's authorization.

H.R. 6985. May 6, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XI (General Provisions) of the Social Secrity Act to abolish the Professional Standards Review Organizations which were established to review services covered under the Medicare and Medicaid programs.

H.R. 6986. May 6, 1977. Interstate and Foreign Commerce; Ways and Means; Rules. Requires any officer or agency in the executive branch to obtain congressional review of all proposed regulations relating to cost and expenditures for health care.

H.R. 6987. May 6, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to condition certain assistance to States, local governments, and agencies thereunder on the adoption of a law enforcement officers' bill of rights.

H.R. 6988. May 6, 1977. Interstate and Foreign Commerce. Amends Title XIX (Medicaid) of the Social Security Act to permit the Secretary of Health, Education, and Welfare to waive the freedom of choice of health service provider requirement of a State Medicaid plan.

H.R. 6989. May 6, 1977. Ways and Means. Amends the Internal Revenue Code to increase the number of mutual deposit guaranty funds qualifying as tax exempt organi-

zations and to allow such organizations to provide reserve funds for and insure deposits in both savings and loan associations and credit unions.

H.R. 6990. May 6, 1977. Armed Services. Authorizes the Secretaries of Defense, the Army, Navy, and Air Force to establish or develop military installations at specified locations. Authorizes the Secretary of Defense to construct or acquire military family housing in specified numbers at specified locations. Authorizes the Secretary of Defense to install energy consumption devices on military family housing units and to assess charges against members who exceed the Secretary's established energy consumption ceiling. Authorizes specified land transfers in California, New Hampshire, and Colorado.

H.R. 6991. May 6, 1977. Small Business. Amends the Small Business Act to reduce the rate of interest on the Small Business Administration's portion of disaster relief loans with respect to major disasters occurring on or after April 1, 1977, and prior to June 6, 1977.

H.R. 6992. May 6, 1977. Public Works and Transportation. Establishes the Federal Protective Service, a police force within the General Services Administration, to enforce the law within public buildings and other areas under GSA jurisdiction.

H.R. 6993. May 6, 1977. Post Office and Civil Service. Requires the Secretary of Commerce to transfer population census records to the Administrator of General Services for deposit with the National Archives within 50 years of the date of such a census. Makes such information available 50 years after the census date for purposes of medical research and 75 years after such date for geneological or historical purposes.

H.R. 6994. May 6, 1977. Ways and Means. Amends Title II (Old Age, Survivors, and Disability Insurance) of the Social Security Act to increase to $5,400 the amount of outside earnings which is permitted an individual each year without any deduction from benefits under such title.

H.R. 6995. May 6, 1977. Post Office and Civil Service. Requires the Civil Service Commission, in the event a contractor providing group health insurance for Federal employees intends to reduce the benefits provided under its contract, to publish in the Federal Register, 180 days before any such proposed reduction is to take effect, a statement explaining such proposal and giving the time and place of a hearing with respect to such proposal. Directs the Commission to hold such a hearing not later than 120 days before such proposal is scheduled to take effect.

H.R. 6996. May 6, 1977. Armed Services. Authorizes the Secretary of Defense to budget funds for certain specified purposes to assist the Civil Air Patrol. Authorizes the Secretary of the Air Force to give, sell, or lend to the Civil Air Patrol excess property acquired by the Air Force under the Federal Property and Administrative Services Act of 1949.

H.R. 6997. May 6, 1977. Interior and Insular Affairs. Authorizes the Secretary of the Interior to convey all right, title, and interest of the United States in and to a specified tract of lands located in the Fairbanks Recording District, Alaska, to the Fairbanks North Star Borough.

H.R. 6998. May 6, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 6999. May 6, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 7000. May 9, 1977. Public Works and Transportation. Reaffirms the percentage of local cash contribution required for construction of navigation facilities at the Barber's Point deep-draft harbor, Hawaii. Declares that material dredged during such construction shall become the property of Hawaii for disposal.

H.R. 7001. May 9, 1977. House Administration. Amends the Federal Election Campaign Act of 1971 to direct that copies of documents required to be filed with States be filed with the State officer charged with maintaining State election campaign reports.

Revises the period for which copies of such documents must be retained.

Requires that only those portions of filed documents which relate to candidates for election in the State of filing need be preserved.

Authorizes the appropriation of specified sums to the Federal Election Commission for the purpose of reimbursing during 1977 and 1978 State offices with which campaign documents are filed.

H.R. 7002. May 9, 1977. Education and Labor; Ways and Means. Provides, through the Department of Labor, specified adjustment assistance to certain workers adversely affected by the termination of a major government procurement program.

Establishes a Job and Retraining Information Service within the Department of Labor to facilitate the implementation and operation of such assistance program.

Amends the tax credit under the Internal Revenue Code for expenses of work incentive programs to permit a limited credit for wages paid to retrained defense workers.

H.R. 7003. May 9, 1977. Ways and Means. Amends the Internal Revenue Code to exempt, in certain circumstances, the leasing of property by a corporation, all the stock of which is owned by a private foundation, to a person affiliated with the foundation, from the excise tax on self-dealing by private foundations.

Extends specified temporary provisions of the Tax Reform Act of 1969 which exempt certain transactions between private foundations and affiliated persons from the self-dealing tax.

H.R. 7004. May 9, 1977. Judiciary. Authorizes the Law Enforcement Assistance Administration to purchase a group life insurance policy or policies from private life insurance companies for the benefit of public safety officers.

Sets forth guidelines relative to such group plan.

Establishes an Advisory Council on Public Safety Officer Group Life Insurance composed of the Attorney General, the Secretary of the Treasury, the Secretary of Health, Education, and Welfare, and the Director of the Office of Management and Budget.

H.R. 7005. May 9, 1977. House Administration. Amends the Federal Election Campaign Act of 1971 to (1) prohibit all political committees other than National, State or local committees of national political parties from making contributions to candidates or their committees and (2) forbid all political committees from making contributions to other political committees, with the exception of transfer between and among National, State and local party committees.

H.R. 7006. May 9, 1977. International Relations. Amends the United States Information Educational Exchange Act of 1948 to require the United States Information Agency (USIA) to release to the General Services Administration, and to require the Administration to make copies and distribute for public viewing, the USIA film, Winter Count, that depicts the Sioux Indians' method of recording their history.

H.R. 7007. May 9, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to make the provisions, formerly applicable to persons between 40 and 65 years of age, applicable to anyone 40 years of age or older.

H.R. 7008. May 9, 1977. Judiciary. Sets forth procedures for Federal constitutional conventions with respects to: (1) applications, (2) calling, (3) delegates, (4) convening, (5) operation, (6) congressional approval, and (7) ratification.

H.R. 7009. May 9, 1977. Judiciary. Prohibits use or supply of false documentation, false information, or birth or immigration documents of another for purposes of obtaining a Federal document containing an element of identification.

Forbids commerce in such information, documentation, or official documents for purposes of securing a State or local government document containing an element of identification.

Proscribes specified acts relative to: (1) forgery, counterfeiting, or alteration of Federal, State, or local government documents containing an element of identification; (2) interstate or foreign commerce in any such counterfeited, forged, or altered document; and (3) receipt, possession, use, or furnishing of any such document with intent to secure false official identification.

H.R. 7010. May 9, 1977. Judiciary. Directs the Attorney General to make grants to qualified State programs for the compensation of victims of crime.

Establishes an Advisory Committee on Victims of Crime to advise the Attorney General with respect to the administration of such grant program and to the compensation of victims of crime.

H.R. 7011. May 9, 1977. Armed Services. Authorizes the establishment of a National Guard for American Samoa.

H.R. 7012. May 9, 1977. Post Office and Civil Service. Directs the Secretary of Commerce to reduce the overall burden on respondents in the 1979 census of agriculture, drainage and irrigation to no more than 60 percent of the burden on respondents in the 1974 census.

Requires the statistical definition of farms in the 1979 census not to exclude any establishment which would normally sell more than $600 worth of agricultural products during the census year; or, for census years following 1979, $600 worth, adjusted by a specified percentage.

Directs the Department of Commerce to improve the collection, analysis and publication of data about the ownership structure of American farms.

H.R. 7013. May 9, 1977. Ways and Means; Banking, Finance and Urban Affairs. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7014. May 9, 1977. Government Operations. Establishes the Agency for Consumer Advocacy within the executive branch to represent the interests of consumers before Federal agencies, to receive and act upon consumer complaints, to perform research on products, and to gather and disseminate information on consumer products and services.

Requires Federal agencies considering policies or regulations which may affect the interests of consumers to notify the Agency, and to consider the interests of the consumer.

H.R. 7015. May 9, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to deem a food additive safe if the Secretary of Health, Education, and Welfare (1) makes a finding that the public benefit from permitting the use of such additive would exceed the public risk resulting from such use; (2) gives notice in the Federal Register of such a finding and opportunity for public comment; and (3) issues a final order not earlier than 120 days from such publication.

Specifies factors that must be taken into consideration when evaluating a food additive.

Deems saccharin a safe food additive unless the Secretary declares it unsafe under the provisions of this Act.

H.R. 7016. May 9, 1977. International Relations. Amends the United Nations Participation Act of 1945 to permit importation of chrome, shipped from a country other than Rhodesia under a contract entered into prior to March 18, 1977, if the seller is not of Southern Rhodesia origin.

H.R. 7017. May 9, 1977. Education and Labor. Authorizes the Commissioner of Education to provide Federal aid to those State teacher retirement systems which allow retirement credit to teachers for out-of-State teaching service.

H.R. 7018. May 9, 1977. Veterans' Affairs. Exempts courses which lead to a standard college degree from the "85–15" rule whereby the Administrator of Veterans' Affairs is required to disapprove enrollment of any eligible veteran, not already enrolled, in any course offered by a proprietary profit or proprietary nonprofit educational institution where more than 85 percent of the students enrolled have their fees paid by either the Veterans' Administration or the institution itself.

Revises the application of rules governing the two-year period a course must be in operation before enrollment of eligible veterans or persons can be approved.

H.R. 7019. May 9, 1977. Judiciary. Prohibits commerce in contraband cigarettes.

Subjects dealers in cigarettes to such reporting requirements as the Secretary of the Treasury may prescribe.

H.R. 7020. May 9, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited tax credit in an amount of $250 for each individual who is at least 65 years of age before the beginning of the taxable year, whose principal place of abode during the taxable year is the principal residence of the taxpayer, and who is not a lodger with the taxpayer.

H.R. 7021. May 9, 1977. Post Office and Civil Service. Changes the organizational structure of the United States Postal Service by: (1) transferring the authority of the Board of Governors to the Postmaster General; (2) revising the procedures for adjustment of rates and services; (3) creating a procedure for review of proposed capital investments; and (4) requiring the Postal Rate Commission to submit to the President a separate annual budget.

Prohibits a reduction in the frequency of mail delivery service below the frequency in effect on April 21, 1977.

H.R. 7022. May 9, 1977. Interstate and Foreign Commerce. Amends the Federal Railroad Safety Act of 1970 to direct the Secretary of Transportation to issue regulations requiring that the cab area of all railroad locomotives and the entire interior area of all railroad cabooses be completely enclosed by bulletproof material.

H.R. 7023. May 9, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals a limited income tax deduction for contributions paid into savings plans for purchasing their principal residences. Limits the income taxation of such plans to that imposed on the unrelated business income of charitable organizations. Makes distributions from such plans tax free if used exclusively in connection with purchasing a principal residence for the distributee.

H.R. 7024. May 9, 1977. Education and Labor. Amends the Older Americans Act of 1965 to establish a program for the elderly which would provide one hot balanced home-delivered meal five days a week. Provides for a needs assessment of individuals receiving aid under such program. Directs the Commissioner of the Administration on Aging to develop minimum efficiency standards for furnishing home-delivered meal services.

Limits the amount that may be spent on administration of a State plan for a nutrition program for the elderly to five percent of the funds allotted.

H.R. 7025. May 9, 1977. Merchant Marine and Fisheries. Amends the Fishing Act, 1916, to include controlled carriers within the coverage of such Act. Defines a "controlled carrier" as a common carrier by water in foreign commerce owned by a government whose vessels are not afforded most-favored nation treatment and which offer services not covered by a service agreement under such Act or whose rates are not covered by a conference or rate agreement under such Act.

H.R. 7026. May 9, 1977. Merchant Marine and Fisheries. Amends the Shipping Act, 1916, to establish minimum rates which non-national flag carriers operating in the foreign commerce of the United States may charge. Defines a "non-national-flag carrier" as a common carrier by water which operates vessels on regular berth services to and from United States ports and which are not documented under the laws of the United States or the other country involved.

H.R. 7027. May 9, 1977. Banking, Finance and Urban Affairs. Amends the National Housing Act to permit the Secretary of Housing and Urban Development to insure mortgages and loans with varying rates of amortization corresponding to anticipated variations in family income on a regular basis.

Amends the Internal Revenue Code to establish tax-exempt savings accounts which would be available to first-time home buyers, known as individual housing accounts.

H.R. 7028. May 9, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7029. May 9, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7030. May 9, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7031. May 9, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7032. May 9, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7033. May 9, 1977. Judiciary. Authorizes classification of a certain individual as a child for purposes of the Immigration and Nationality Act.

H.R. 7034. May 9, 1977. Judiciary. Authorizes classification of a certain individual as a child for purposes of the Immigration and Nationality Act.

H.R. 7035. May 9, 1977. Judiciary. Declares certain individuals lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act

H.R. 7036. May 10, 1977. Banking, Finance and Urban Affairs. Permits the provisions of the Renegotiation Act of 1951 to be effective only when the President determines, during a period of national emergency, that having such provisions in effect is in the best interest of the United States and neither House of Congress passes a resolution within 60 days thereafter disagreeing with such determination.

H.R. 7037. May 10, 1977. Judiciary. Amends the provision of the Gun Control Act of 1968 imposing additional sentences on persons committing Federal felonies while carrying, or with the use of, a firearm to (1) increase the penalties thereunder, (2) encompass State crimes, and (3) prohibit a suspended, probationary or concurrent sentence with respect to a first conviction.

H.R. 7038. May 10, 1977. Judiciary. Grants the Court of Claims jurisdiction to render judgments against the United States upon claims for losses other than lost profits sustained by producers, processors, manufacturers, distributors, dealers, or other persons resulting from the ban on apparel, fabric yarn, or fiber containing tris phosphate.

H.R. 7039. May 10, 1977. Judiciary. Reinstates the right to vote in Federal elections to persons convicted of a State or Federal crime upon completion of imprisonment and/or payment of fines and other penalties.

H.R. 7040. May 10, 1977. Public Works and Transportation. Authorizes the Secretary of the Army, acting through the Chief of Engineers, to construct a replacement lock and dam on the Mississippi River. Withdraws all authority with respect to channel construction and modification on the Upper Mississippi River.

Directs the Upper Mississippi River Basin Commission to prepare a master plan for the management of the Upper Mississippi River.

H.R. 7041. May 10, 1977. Public Works and Transportation. Renames the Irvington Lake and Military Lake (part of the Papillon Creek basin project) as the Glenn Cunningham Lake and Standing Bear Lake, respectively.

H.R. 7042. May 10, 1977. Public Works and Transportation. Terminates the authorization of the Big Pine Dam and Reservoir, Wabash River, Indiana.

H.R. 7043. May 10, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange service. Requires the Federal Communications Commission to make specified findings in connection with Commission actions authorizing specialized carriers.

H.R. 7044. May 10, 1977. Judiciary. Prohibits commerce in contraband cigarettes.

Subjects dealers in cigarettes to such reporting requirements as the Secretary of the Treasury may prescribe.

H.R. 7045. May 10, 1977. Veterans' Affairs. Raises the income limitation on disability pensions for veterans with non-service connected disabilities.

H.R. 7046. May 10, 1977. International Relations. Deems void any suit or judicial or administrative process against a person or the property of a person entitled to immunity under the Vienna Convention on Diplomatic Relations. Makes Presidential determinations of entitlement to immunity binding upon governmental authorities. Requires the President to publish a list of missions and personnel entitled to such immunity.

Repeals the criminal penalties for wrongful suit against an immune person. Repeals exceptions to suits against servants in the service of personnel of a foreign mission. Repeals the present criteria for determining eligibility for immunity.

H.R. 7047. May 10, 1977. Education and Labor; Banking, Finance and Urban Affairs. Amends the Fair Labor Standards Act of 1938 to authorize the Secretary of Labor to investigate any proposed business closing or relocation and to provide assistance to certain employees and local governments affected by such action.

Denies specified tax benefits to a business closing or transferring an operation upon certain findings by the Secretary.

Establishes a National Employment Relocation Administration within the Department of Labor and a National Employment Relocation Advisory Council.

H.R. 7048. May 10, 1977. Veterans' Affairs. Permits a veteran to continue vocational rehabilitation training for up to six years after the date he or she has established eligibility or regained medical feasibility for training, when such veteran has been prevented from entering or completing a training course for specified reasons.

H.R. 7049. May 10, 1977. Ways and Means. Amends the Internal Revenue Code to pro-

vide a limited, refundable tax credit to persons age 65 or over, or who are handicapped or disabled, for the real property taxes, or 25 percent of the rent, they pay or incur for their principal residences.

H.R. 7050. May 10, 1977. Judiciary. Establishes an Offender Rehabilitation Fund, within the Treasury. Authorizes the Attorney General to make loans from such fund to released Federal prisoners in need of assistance.

H.R. 7051. May 10, 1977. Judiciary. Forbids permitting Federal or District of Columbia prisoners to be subjects of medical research.

Requires a State, in order to receive assistance for correctional institutions under the Omnibus Crime Control and Safe Streets Act of 1968, to include within its comprehensive State plan assurances that no State prisoner will be allowed to be the subject of such research.

Prohibits the Director of the Bureau of Prisons from contracting with any State, territory, or political subdivision of any State or territory for the imprisonment and care of Federal offenders unless such assurances are given.

H.R. 7052. May 10, 1977. Judiciary. States that the right of a citizen of the United States, who otherwise is qualified, to vote in any election for Federal office shall not be denied or abridged because he has committed a criminal offense unless such citizen is imprisoned in a correctional institution or facility at the time of such election.

H.R. 7053. May 10, 1977. Judiciary. Authorizes the Attorney General to bring a civil action in any United States district court for the relief of any institutionalized person whenever the Attorney General has cause to believe that the constitutional rights of such person are being violated pursuant to a pattern or practice of such violations. Requires the Attorney General to give the officials of such institution a reasonable time to correct such violation. Makes any person who causes such a violation liable for redress to the institutionalized person whose rights have been violated. Permits the issuance of an injunction or other preventive relief.

H.R. 7054. May 10, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals whose income consists solely of employee compensation and interest to elect to have the Internal Revenue Service compute their income tax liability.

H.R. 7055. May 10, 1977. Ways and Means. Amends the Internal Revenue Code to decrease the floor on allowable medical deductions to two percent of adjusted gross income. Eliminates the one percent floor on deductions for drugs and medicines. Includes deductible amounts for medical insurance with other medical care expenses for which the two percent floor is applicable.

H.R. 7056. May 10, 1977. Post Office and Civil Service. Directs the Secretary of Commerce to reduce the overall burden on respondents in the 1979 census of agriculture, drainage and irrigation to no more than 60 percent of the burden on respondents in the 1974 census.

Requires the statistical definition of farms in the 1979 census not to exclude any establishment which would normally sell more than $600 worth of agricultural products during the census year; or for census years following 1979, $600 worth, adjusted by a specified percentage.

Directs the Department of Commerce to improve the collection, analysis and publication of data about the ownership structure of American farms.

H.R. 7057. May 10, 1977. Ways and Means. Directs the Secretary of the Treasury to issue upon the request of an eligible applicant a coded social security card capable of verification.

Requires employers to verify before employing an individual whether such individual has established a valid account and establishes penalties for noncompliance.

Prohibits use of the card for any other purpose than establishing identity and eligibility for employment or for welfare and public assistance under the Social Security Act.

H.R. 7058. May 10, 1977. Education and Labor; Interstate and Foreign Commerce; Judiciary; Ways asd Means. Amends the Comprehensive Employment and Training Act of 1973, the International Revenue Code of 1954, the Immigration and Nationality Act, and the Social Security Act to prohibit: (1) the employment of illegal aliens; (2) the payment of public welfare benefits to illegal aliens; (3) the transporting of illegal aliens into the United States; and (4) income tax deductions for wages paid to aliens illegally working in the United States.

H.R. 7059. May 10, 1977. Judiciary. Requires specified organizations which employ lobbyists to register and file quarterly expense reports with the Comptroller General. Makes such reports available to the public. Establishes civil and criminal sanctions to enforce this Act.

H.R. 7060. May 10,1977. Post Office and Civil Service. Amends the Post Reorganization Act Amendments of 1976 to extend to 1977, the period during which the Postal Service is prohibited from: (1) increasing rates and to levels exceeding those in effect on the enactment of the Act; (2) offering levels and types of services which are less than those available on July 1, 1976; and (3) closing certain postal facilities which were in operation on July 1, 1976.

H.R. 7061. May 10, 1977. Agriculture. Excludes cost-of-living increases in Social Security benefits from consideration as household income for purposes of determining: (1) eligibility for participation in the food stamp program; (2) the charge for issuing a coupon allotment to a household; and (3) eligibility for any Federal program administered by the Department of Agriculture which provides for the donation or distribution of surplus agricultural commodities to low-income persons.

H.R. 7062. May 10, 1977. Banking, Finance and Urban Affairs. Prohibits the consideration of any cost of living increase of Old Age, Survivors, and Disability Insurance benefits for purposes of determining the eligibility for or amount of assistance which any individual or family is provided under specified Federal housing programs.

H.R. 7063. May 10, 1977. Interstate and Foreign Commerce. Amends Title XIX (Medicaid) of the Social Security Act to assure the individuals otherwise eligible for benefits under such Title do not lose such eligibility, or have the amount of such benefits reduced, because of increases in the amount of benefits under Title II (Old-Age, Survivors, and Disability Insurance) of such Act.

H.R. 7064. May 10, 1977. Veterans' Affairs. Provides that recipients of veterans' pensions and compensation will not have the amount of such pension or compensation reduced because of increases in social security benefits.

H.R. 7065. May 10, 1977. Ways and Means. Amends the program of Aid to Families with Dependent Children of Title IV and Title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act to assure that recipients of aid and benefits under such Titles do not have the amount of such aid or benefits reduced because of increases in the amount of benefits under Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act.

H.R. 7066. May 10, 1977. Armed Services. Authorizes the Secretary of Defense to contract with health maintenance organizations to provide medical care for members of the armed forces and their dependents.

H.R. 7067. May 10, 1977. Armed Services. Credits female members of the armed forces for purposes of computing years of active service in the Armed Forces, with service performed during World War I by such individuals as members of the telephone operating units of the Army.

H.R. 7068. May 10, 1977. Ways and Means. Amends the Internal Revenue Code to tax the unrelated income of tax exempt organizations which is derived from farm real property.

H.R. 7069. May 10, 1977. Ways and Means. Amends the Internal Revenue Code to repeal the tax exempt status of farmers' and the special tax treatment of certain other cooperatives. Disallows to cooperatives any deduction for patronage dividends paid by them. Includes patronage dividends within the amounts excludible as dividends received by individuals and corporations.

H.R. 7070. May 10, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (medicare) of the Social Security Act to extend coverage to include expenses incurred in providing diagnosis of uterine cancer, if the individual receiving the test has not had such a test on a routine basis during the preceding six months.

H.R. 7071. May 10, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to extend coverage to include expenses incurred in providing diagnosis of uterine cancer, if the individual receiving the test has not had such a test on a routine basis during the preceding six months.

H.R. 7072. May 10, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to extend coverage to include expenses incurred in providing diagnosis of uterine cancer, if the individual receiving the test has not had such a test on a routine basis during the preceding six months.

H.R. 7073. May 10, 1977. Agriculture. Extends the Federal Insecticide, Fungicide, and Rodenticide Act through fiscal year 1978, authorizes appropriations for fiscal year 1978, and increases the amount of appropriations already authorized for fiscal year 1977.

H.R. 7074. May 10, 1977. Interior and Insular Affairs. Establishes the Bull Run Watershed Management Unit within the Mount Hood National Forest, Oregon, to be administered by the Secretary of Agriculture.

H.R. 7075. May 10, 1977. Ways and Means. Amends the Internal Revenue Code to allow as a credit against the income tax a limited amount of specified higher education expenses, including tuition, fees, books, and supplies, incurred by the taxpayer for himself and any dependents.

H.R. 7076. May 10, 1977. Veterans' Affairs. Designates the Veterans' Administration ambulatory care clinic in the Proctor Hospital in Peoria, Ill., the Roy Lofthouse Memorial Clinic.

H.R. 7077. May 10, 1977. Ways and Means. Amends the Internal Revenue Code to Internal Revenue Code to increase the amounts excludible from gross income as income earned abroad by repealing the provisions respecting such exclusions enacted in the Tax Reform Act and restoring former law.

H.R. 7078. May 10, 1977. Education and Labor. Authorizes the Commissioner of Education to provide Federal aid to those State teacher retirement systems which allow retirement credit to teachers for out-of-State teaching service,

H.R. 7079. May 10, 1977. Ways and Means; Interstate and Foreign Commerce. Amends the Medicare and Medicaid and specified other programs of the Social Security Act: (1) to establish more efficient methods for determining the cost of services furnished under such programs; (2) to ensure prompt and accurate determinations of eligibility under such programs; (3) to increase services for which reimbursement will be made; and (4) to establish procedures designed to

prevent excess reimbursement for services provided under such programs.

H.R. 7080. May 10, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7081. May 10, 1977. Judiciary. Authorizes the conditional admittance of a certain person to the United States for permanent residence.

H.R. 7082. May 10, 1977. Judiciary. Includes in a certain individual's period of creditable service, for purposes of government group life insurance, a specified period during which he was employed by the Agency for International Development in Laos, on the condition that he pay a specified premium amount to the Civil Service Commission.

H.R. 7083. May 10, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7084. May 11, 1977. Veterans' Affairs. Designates service as a member of the Women's Air Forces Service Pilots as active duty for the purposes of all laws administered by the Veterans' Administration.

H.R. 7085. May 11, 1977. Banking, Finance and Urban Affairs. Disallows the Secretary of the Treasury from selling, alienating or committing gold without prior approval from Congress.

H.R. 7086. May 11, 1977. Merchant Marine and Fisheries. Creates a National Zoological and Aquarium Corporation to revise standards for the national accreditation of zoos and aquariums.

Authorizes the Corporation to make grants to certain nonprofit organizations, zoos, and aquariums, to insure mortgages executed by accredited zoos and aquariums, and to guarantee specified loans by non-Federal lenders.

H.R. 7087. May 11, 1977. Judiciary. States that no sentence of death shall be imposed upon any person convicted under Federal, territorial, or State law and that no unexecuted death sentence shall be carried out after the enactment of this Act. Directs that each provision authorizing or requiring the imposition of capital punishment shall be deemed to authorize or require the imposition of life imprisonment and that death sentences remaining unexecuted on the date of the enactment of this Act shall be deemed sentences of life imprisonment.

H.R. 7088. May 11, 1977. House Administration. Directs the Secretary of the Senate and the Clerk of the House to prepare a daily electronic recording which shall include a summary of action taken in the Senate and House Chambers during the preceding day and a list of laws signed by the President during the thirty-five day period before the day on which such recording is prepared.

Requires the establishment of a toll-free telephone listing to be used to transmit such electronic recordings.

H.R. 7089. May 11, 1977. Ways and Means. Amends Title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act to make benefits under such Title payable to a resident alien only if such alien has continuously resided in the United States for at least six years.

H.R. 7090. May 11, 1977. Ways and Means. Amends the Internal Revenue Code to provide a limited exclusion from gross income of interest on savings deposits in home lending institutions paid or accrued by an individual taxpayer.

H.R. 7091. May 11, 1977. Post Office and Civil Service. Revokes the pay increase for Members of Congress transmitted by the President on January 17, 1977.

H.R. 7092. May 11, 1977. Post Office and Civil Service. Amends the Legislative Reorganization Act of 1946 to eliminate automatic cost-of-living adjustments of the salaries of Members of Congress.

H.R. 7093. May 11, 1977. Education and Labor. Prohibits the sexual exploitation of children by making it unlawful for any individual to (1) cause or permit a child to be photographed or filmed engaged in a sexual act prohibited under this Act; (2) photograph or film a prohibited sexual act; (3) knowingly transport a film or photograph depicting a prohibited sexual act: or (4) receive for sale or sell any such film or photograph, if such individual knows or should know such film to photograph depicting a prohibited sexual act: or (4) receive four sale or sell any such film or photograph, if such individual knows or should know such film or photograph may be transported in such a manner as to affect interstate or foreign commerce.

H.R. 7094. May 11, 1977. Interstate and Foreign Commerce. Amends the Federal Power Act to direct tht Federal Power Commission to require utilities to file curtailment plans to meet anticipated power shortages.

Requires public hearings on proposals for utility rate increases. Authorizes the Commission to take additional measures to eliminate discretionary and anticompetitive practices by utilities.

H.R. 7095. May 11, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to authorize payment to chiropractors for diagnosis by X-ray of vertebral subluxation.

H.R. 7096. May 11, 1977. Education and Labor. Authorizes the Commissioner of Education to provide Federal aid to those State teacher retirement systems which allow retirement credit to teachers for out-of-State teaching service.

H.R. 7097. May 11, 1977. Interstate and Foreign Commerce. Amends the Clean Air Act to allow the granting of variances from clean air standards to powerplants which emit sulfur dioxide. Requires that such variances be granted where (1) the unemployment rate in the affected State exceeds four percent and where (2) the variance does not allow for continuous sulfur dioxide emissions which may pose a serious threat to public health.

H.R. 7098. May 11, 1977. Ways and Means. Amends the Internal Revenue Code to provide that income received from nonmember telephone companies shall not be used in determining whether mutual and cooperative telephone companies qualify as tax exempt organizations.

H.R. 7099. May 11, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited income tax deduction for food and lodging expenses incurred while receiving medical care away from home.

H.R. 7100. May 11, 1977. Ways and Means; Judiciary. Amends Title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act to require that resident aliens reside continuously in the United States for five years to qualify for supplemental security income benefits.

Amends the Immigration and Nationality Act to prevent an immigrant from entering the United States unless a United States citizen (immigration sponsor) agrees to support the immigrant for five years from the date of the immigrant's admission.

H.R. 7101. May 11, 1977. Interior and Insular Affairs. Expands the Riverside County, California, land tract to which the United States' claims based upon accretion or avulsion are subject to legal and equitable defenses to which private persons asserting such claims would be subject.

H.R. 7102. May 11, 1977. Banking, Finance and Urban Affairs. Declares a national policy on investment in the private sector of the United States economy.

Requires the Council on Wage and Price Stability to deliver to Congress an annual Investment Policy Report which shall include information on levels of capital investment available, trends in such levels, and reviews of economic programs affecting capital investment. Requires the President to submit other recommendations for implementation of the national policy declared in this Act.

H.R. 7103. May 11, 1977. Interstate and Foreign Commerce. Amends the Health Professions Educational Assistance Act of 1976 to repeal the Congressional finding that there is a sufficient number of physicians and surgeons in the United States and that there is no further need to afford preference to alien physicians and surgeons in admission to the United States.

H.R. 7104. May 11, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce. Grants additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange service.

H.R. 7105. May 11, 1977. Veterans' Affairs. Provides, for purposes of awarding veterans' wartime disability compensation, that progressive muscular atrophy developing a ten percent or more degree of disability within seven years after separation from active service during a period of war shall be presumed to be service connected.

H.R. 7106. May 11, 1977. Judiciary; Standards of Official Conduct. Includes within the definition of "high crime or misdemeanor" for the purpose of impeachment proceedings under the United States Constitution, any communication or negotiation made knowingly by the President, Vice President, Supreme Court justices, or other specified Federal officials to a person engaged in any State or Federal crime involving harm or the threat of physical harm. Makes any such communication or negotiation by a Member of Congress grounds for expulsion of such Member as an act inconsistent with the trust and duty of such Member.

H.R. 7107. May 11, 1977. Interior and Insular Affairs; Interstate and Foreign Commerce. Amends the Atomic Energy Act of 1954 to direct the Nuclear Regulatory Commission to include the exposure of persons to medical radiation from sources not required to be licensed under the Act in determining the maximum allowable exposure to radiation.

H.R. 7108. May 11, 1977. Ways and Means. Amends the Tariff Schedules of the United States to suspend the customs duties on Yankee Dryer Cylinder Rolls through December 31, 1977.

H.R. 7109. May 11, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to deem a food additive unsafe to be marketed if it is found to induce cancer in man or animal when ingested in an amount reasonably anticipated to be consumed by man or animal, or found to induce cancer in man or animal in appropriate tests based upon amounts of food additives reasonably anticipated to be consumed by man or animal.

H.R. 7110. May 11, 1977. Public Works and Transportation. Amends the Urban Mass Transportation Act of 1964 to authorize the use of funds made available under such Act for projects in areas other than urbanized areas, for the payment of subsidies for operating expenses in such areas.

H.R. 7111. May 11, 1977. Agriculture. Repeals the Federal Crop Insurance Act. Establishes, within the Department of Agriculture, the Farm Production Protection Corporation, and empowers such Corporation to protect producers of agricultural products against loss of production costs due to unavoidable natural causes.

H.R. 7112. May 11, 1977. Agriculture. Repeals the Federal Crop Insurance Act. Establishes, within the Department of Agriculture, the Farm Production Protection Corporation, and empowers such Corporation to protect producers of agricultural products against loss of production cost due to unavoidable natural causes.

H.R. 7113. May 11, 1977. Armed Services. Authorizes the Secretary of Defense to contract with health maintenance organizations to provide medical care for members of the armed forces and their dependents.

H.R. 7114. May 11, 1977. Interstate and Foreign Commerce. Requires franchisors to give franchisees 90-days notice, with limited exceptions, of intent to cancel, or failure to renew, a franchise agreement. Allows such cancellation or failure to renew only for certain specified reasons. Requires a franchisor to compensate a franchisee for the value of the franchisee's business when the franchisor, for a legitimate business reason, fails to renew the franchise. Sets forth the judicial remedies available to a franchisee for a violation of this Act by the franchisor.

H.R. 7115. May 11, 1977. Small Business; Government Operations; Banking, Finance and Urban Affairs. Amends the Small Business Act to expand assistance under such Act to minority small business concerns. Establishes the Office of minority Small Business Assistance Personnel to work with all Government agencies having procurement powers. Provides statutory standards for contracting and subcontracting by the United States with respect to minority concerns. Creates an Assistance to minority enterprise.

H.R. 7116. May 11, 1977. Education and Labor. Amends the Elementary and Secondary Education Act of 1965 to require States applying for assistance under such Act to establish and implement basic standards of secondary students' educational proficiency, including the passing of reading, writing, and mathematics examinations.

Establishes the National Commission on Basic Education and directs it to (1) establish such standards; and (2) review and approve or disapprove State plans implementing such standards.

Requires the Commission to report to the President and to the Congress no later than three years after the effective date of this Act.

H.R. 7117. May 11, 1977. Judiciary. Amends the Immigration and Nationality Act to exclude from the definition of the term "immigrant" those persons entering the United States for a period of not more than one year to perform temporary services or labor if the Secretary of Labor has determined and certified to the Attorney General that there are not sufficient workers available at the aliens destination who are willing and able to perform such services.

H.R. 7118. May 11, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to revise the eligibility requirements for disability insurance benefits for blind persons. Revises the method of computing the primary insurance amount for blind persons under such Act.

H.R. 7119. May 11, 1977. Ways and Means. Amends the Internal Revenue Code to allow certain individuals to compute the amount of the deduction for retirement savings on the basis of the earned income of their spouses.

H.R. 7120. May 11, 1977. Ways and Means. Amends the Internal Revenue Code to allow certain individuals to compute the amount of the deduction for retirement savings on the basis of the earned income of their spouses.

H.R. 7121. May 11, 1977. Interior and Insular Affairs; Merchant Marine and Fisheries. Authorizes the Secretary of the Interior or the Secretary of Agriculture to permit the private, noncommercial ownership of excess wild free-roaming horses and burros.

H.R. 7122. May 11, 1977. Public Works and Transportation. Directs the Secretary of Transportation to carry out a demonstration project in the city of Orange, Texas, for the relocation of the major railroad through line in such city for the purpose of eliminating rail-highway crossings.

H.R. 7123. May 11, 1977. Merchant Marine and Fisheries. Authorizes the inspection, licensing, and operation of the vessel Manatra II as a passenger carrying vessel for as long as such vessel remains under the continuous ownership of the Marine Navigation and Training Association of Chicago, Illinois.

H.R. 7124. May 11, 1977. Judiciary. Declares two individuals lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 7125. May 11, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 7126. May 11, 1977. Judiciary. Deems a certain individual to have performed active service in the United States Coast Guard during a specified period of time for the purpose of determining his entitlement to retired pay.

H.R. 7127. May 12, 1977. Ways and Means. Amends the Internal Revenue Code to deny tax-exempt status to certain organizations if such organizations hold farm real property purchased after the date of enactment of this Act and the holding of such property is not substantially related to the charitable or educational purpose which would otherwise make the organizations tax-exempt.

H.R. 7128. May 12, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to require that comprehensive State law enforcement plans submitted thereunder include, where appropriate, police escort programs for elderly residents of high crime areas.

Directs the Law Enforcement Assistance Administration to conduct a study to determine the effects of denying release to persons convicted of violent crimes against the elderly and of prosecuting juveniles committing crimes against the elderly as adults.

H.R. 7129. May 12, 1977. Ways and Means. Amends the Internal Revenue Code with regard to the taxation of capital gains on securities.

H.R. 7130. May 12, 1977. Education and Labor. Amends the Walsh-Healey Act to permit government contractors to have their employees work ten-hour workdays if the workweek of such employees does not exceed four days.

H.R. 7131. May 12, 1977. Interstate and Foreign Commerce. Amends Title XIX (Medicaid) of the Social Security Act to qualify an individual who, although employable, is unable to care for his or her personal needs without assistance as a disabled person eligible for the services of a home health aide.

H.R. 7132. May 12, 1977. Post Office and Civil Service. Provides for the arbitration of disputes between the Postal Service and recognized organizations of Postal Service managerial personnel other than officers, postmasters, and employees engaged in personnel work in Postal Service headquarters. Identifies as subject to arbitration under this Act issue relating to pay policies, fringe benefits, and the determination of whether or not a matter is subject to participation by such organization. Establishes an arbitration board to consider a dispute upon the request of the Postal Service or such recognized organization.

H.R. 7133. May 12, 1977. Government Operations; Rules. Prohibits the expenditure of Federal moneys, not otherwise provided for by law, which are not made pursuant to procedures providing for a voucher describing payee and items or services for which payment is being made. Requires all appropriations, not made under a law which provides otherwise, to provide for voucher requirements for expending such moneys appropriated.

Requires the Comptroller General to audit all programs subject to this Act.

H.R. 7134. May 12, 1977. Public Works and Transportation. Authorizes the Secretary of the Army to construct a lock and dam project on the Mississippi River near Alton, Illinois. Authorizes the Secretary to provide wildlife protection and recreational activities with such project.

Authorizes the study of bulk commodity freight requirements on the Upper Mississippi and Illinois waterway.

Withdraws authority (1) to study the deepening of navigation channels in the Minnesota River, Minnesota; Black River, Wisconsin; Saint Croix River, Minnesota and Wisconsin; Illinois River, Illinois; and the Mississippi River north of its junction with the Missouri River, Missouri; and (2) to study or construct a specified Mississippi River channel.

H.R. 7135. May 12, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunciations industry rendering services in interstate and foreign commerce. Grants additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange service.

H.R. 7136. May 12, 1977. Ways and Means. Amends the Internal Revenue Code to allow certain low- and middle-income individuals a limited refundable income tax credit for the property taxes or rent paid by them for their principal residence.

H.R. 7137. May 12, 1977. Ways and Means. Amends the Internal Revenue Code to exempt aircraft used primarily for agricultural operation from the excise tax improved on the use of civil aircraft.

Provides for the refund of the tax on gasoline and aircraft to the aerial applicator who is the ultimate purchaser thereof.

H.R. 7138. May 12, 1977. Ways and Means. Amends the Internal Revenue Code to allow to a taxpayer holding an economic interest in a geothermal energy property a tax deduction acounting to 22 percent of the gross income from such property. Requires the Secretary of the Treasury to issue regulations granting the option to deduct as expenses intangible drilling and development costs in the case of wells drilled for geothermal steam and associated geothermal resources.

H.R. 7139. May 12, 1977. Judiciary. Revises generally provisions relative to the interception of oral and wire communications.

Increases the types of communications which are protected from unlawful interference.

Narrows present exceptions to the prohibitions against interception and/or disclosure of the contents of protected communication.

Revises the types of crimes with respect to which interceptions may be authorized.

Requires prior judicial authorization of all interceptions.

H.R. 7140. May 12, 1977. Banking, Finance and Urban Affairs. Requires appropriate Federal financial supervisory agencies to develop programs and procedures which will encourage financial institutions to help meet the credit needs of the local communities in which they are chartered.

H.R. 7141. May 12, 1977. Banking, Finance and Urban Affairs. Requires appropriate Fed-

eral financial supervisory agencies to develop programs and procedures which will encourage financial institutions to help meet the credit needs of the local communities in which they are chartered.

H.R. 7142. May 12, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for nutritional counseling as part of the home health services provided under the supplementary medical insurance program.

H.R. 7143. May 12, 1977. Government Operations. Obligates the Federal Government to pay to the appropriate State or local government payments in lieu of real property taxes for property which is owned by the Government but leased to a private person for the purpose of conducting a business for profit thereon. States that the amount of such payment shall equal the amount of tax that would be due if the lessee were the owner of the leased property.

H.R. 7144. May 12, 1977. Banking, Finance and Urban Affairs. Directs the General Accounting Office to conduct a biennial audit of the housing and related programs administered by the Department of Housing and Urban Development (HUD). Requires such audits to include evaluations of the effectiveness and fairness of such programs; conformity with applicable civil rights legislation; compliance of State, regional, and local governments with community development plans; and the criteria used by HUD to assure such development plans are enforced.

H.R. 7145. May 12, 1977. Ways and Means. Amends the Social Security Act to establish under Title IV (Grants to States for Aid and Services to Needy Families with Children and for Child-Welfare Services) a program of Foster Care Services.

Sets forth the requirements for State plans for the administration of such services.

Directs the Secretary of Health, Education, and Welfare to publish a set of uniform adoption regulations to facilitate adoptions.

H.R. 7146. May 12, 1977. Armed Services. Stipulates that a National Guard technician who: (1) has completed ten years of services in a position in which Guard membership was required; (2) is involuntarily separated from the Guard under honorable conditions; and (3) who continues to meet specified physical fitness standards shall not be required to be a member of the Guard as condition of employment.

H.R. 7147. May 12, 1977. Ways and Means. Amends the Internal Revenue Code to provide an income tax credit for expenses incurred in the conversion of farm and ranch land into qualified wind erosion control or wildlife habitat areas.

H.R. 7148. May 12, 1977. Judiciary. Specifies procedures for the transfer of convicted offenders to and from foreign countries pursuant to treaties providing for such transfers. Stipulates that an offender must consent to any transfer and may only be transferred to a country of which he is a citizen or national. Bars transfer of an offender while any appeal or collateral attack is pending. Restricts jurisdiction to challenge the conviction or sentence of a transferred offender to the country of conviction.

H.R. 7149. May 12, 1977. Government Operations. Establishes a Department of Senior Citizens Affairs. States that the Department shall serve as a clearinghouse for information related to the problems of the elderly and shall assume specified responsibilities from other government agencies.

H.R. 7150. May 12, 1977. Education and Labor. Authorizes the Secretary of Health, Education, and Welfare to provide Federal financial assistance to employers, labor organizations and public or private nonprofit agencies to establish occupational alcoholism programs for the diagnosis and treatment of alcohol abuse in employed persons.

Authorizes the appropriation of a specified percentage of Federal taxes collected on alcohol to finance such assistance.

H.R. 7151. May 12, 1977. Public Works and Transportation. Terminates the authorization of the Helm Reservior project, Wabash River, Illinois.

H.R. 7152. May 12, 1977. Education and Labor. Repeals the Occupational Safety and Health Act of 1970.

H.R. 7153. May 12, 1977. Ways and Means. Requires States participating in the Aid to Dependent Children program of the Social Security Act to develop procedures to reduce overpayments and payments to ineligible recipients under the program.

Directs the Secretary of Health, Education, and Welfare to compute payment error rates for each State based upon data received from each State. Authorizes the Secretary to reduce the amount of Federal payments to States by the amount that a State's error rate exceeds the median rate for all States.

H.R. 7154. May 12, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act and the Internal Revenue Code to increase to $30,000 over a three-year period the ceilings on the amount of earnings which may be counted for social security and tax purposes.

H.R. 7155. May 12, 1977. Interstate and Foreign Commerce. Prohibits the sale of beverage containers without a minimum refund value of five cents. Requires labeling of refund values on all such containers. Prohibits sale of metal beverage containers with detachable openings.

H.R. 7156. May 12, 1977. Education and Labor. Requires any regulation affecting any institution of higher learning to be published in Federal Register and include an educational impact statement.

Prohibits enforcement of any regulation which fails to maintain academic requirements for graduate or undergraduate admissions.

Restricts the authority and enforcement powers of Federal officials with respect to educational programs or activities of institutions of higher education receiving Federal financial assistance.

H.R. 7157. May 12, 1977. Judiciary. Grants a Federal charter to the National Ski Patrol System.

H.R. 7158. May 12, 1977. Judiciary. Grants the Court of Claims jurisdiction to render judgments against the United States upon claims for losses other than lost profits sustained by producers, processors, manufacturers, distributors, dealers, or other persons resulting from the ban on apparel, fabric, yarn, or fiber containing Tris phosphate.

H.R. 7159. May 12, 1977. Interstate and Foreign Commerce. Amends the Wool Products Labeling Act of 1939 to delete the terms "reprocessed wool" and "reused wool" and add the term "recycled wool" which includes the definitions of the deleted terms. Defines recycled wool as the fiber which results when a wool product which, has or has not been used by the ultimate consumer, has been made into a fibrous state.

H.R. 7160. May 12, 1977. Ways and Means. Amends Title XVI of the Social Security Act to prohibit the payment of supplementary security income benefits to an alien unless he is a permanent resident of the United States and has continuously resided therein for at least one year.

H.R. 7161. May 12, 1977. Armed Services. Allows United States nationals in addition to citizens, to participate in the Junior Reserve Officers' Training Corps.

H.R. 7162. May 12, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 7163. May 13, 1977. Banking, Finance and Urban Affairs. Creates, in the Department of Housing and Urban Development, an Office of Indian and Alaska Native Affairs, through which the Secretary of HUD shall carry out functions relating to Indian and Alaska native housing and community development. Creates the office of Assistant Secretary for Indian and Alaska Native Affairs. Directs the Assistant Secretary to submit certain reports to Congress, and conduct an annual conference on Indian and Alaska native housing.

H.R. 7164. May 13, 1977. Ethics. Prohibits any Member of the House of Representatives from soliciting or accepting gifts of money for personal use.

H.R. 7165. May 13, 1977. Education and Labor. Authorizes grants to assist the States in developing and implementing comprehensive and continuing plans for services to the blind; for the evaluation of visual loss and of the services needed at the onset of blindness; for provision of services to the blind; and for developing or demonstrating new or improved services to the blind.

Directs the Secretary to establish within the Department of Health, Education, and Welfare, or other agency charged with administration of the Vocational Rehabilitation Act a Division for the Blind.

H.R. 7166. May 13, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to revise the eligibility requirements for disability insurance benefits for blind persons. Revises the method of computing the primary insurance amount for blind persons under such Act.

H.R. 7167. May 13, 1977. Interstate and Foreign Commerce. Revises the warning label on cigarette packages and requires the inclusion on such packages of a label bearing a statement of the tar and nicotine content.

H.R. 7168. May 13, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to include tobacco products, within the determination of food as contained in such Act, thereby subjecting such products to the same regulation as food under such Act.

H.R. 7169. May 13, 1977. Ways and Means. Amends the Internal Revenue Code to substitute a health protection tax on cigarettes manufactured in or imported into the United States for the present tax. Sets forth graduated tax rates based on the tar and nicotine content of each cigarette. Directs the Federal Trade Commission to determine the tar and nicotine content of each brand of cigarettes manufactured in or imported into the United States.

H.R. 7170. May 13, 1977. Interstate and Foreign Commerce; Public Works and Transportation. Prohibits smoking in specified areas of Federal facilities and in interstate passenger carrier facilities. Requires the separation of smokers from nonsmokers in specified areas of such facilities.

H.R. 7171. May 13, 1977. Agriculture. Amends the Agricultural Act of 1949, as amended by the Agricultural Act of 1970 and other acts, to extend through 1981 specified existing programs and to add new programs, relating to: (1) dairy products, cotton, feed grains, rice, soybeans, wheat and wool; (2) Public Law 480 (Food for Peace); (3) the food stamp program; (4) agricultural solar energy research, development and demonstration; (5) wheat and wheat foods research and nutrition education; (6) rural development; (7) national agricultural research, extension, and teaching policy; and (8) miscellaneous agricultural subjects.

H.R. 7172. May 13, 1977. Agriculture. Amends the Agricultural Act of 1949, as amended by the Agricultural Act of 1970 and other acts, to extend through 1981 specified existing programs, and to add new programs, relating to: (1) dairy products, cotton, feed grains, rice, soybeans, wheat and wool; (2) Public Law 480 (Food for Peace); (3) the food stamp program; (4) agricultural solar energy research, development and demonstration; (5) wheat and wheat foods research and nutrition education; (6) rural development; (7) national agricultural research, extension, and teaching policy; and (8) miscellaneous agricultural subjects.

H.R. 7173. May 13, 1977. Interstate and Foreign Commerce. Suspends for two years with regard to regulations involving saccharin, the operation of the proviso in the Federal Food, Drug, and Cosmetic Act which prohibits regulatory approval of a food additive found to cause cancer.

H.R. 7174. May 13, 1977. Interstate and Foreign Commerce. Amends the Toxic Substances Control Act to create a Chemical Emergency Response Team with the Environmental Protection Agency to specialize in countering imminent threats to health and the environment posed by chemical substances. Directs the Administrator of the Environmental Protection Agency to develop a contingency plan to deal with such emergencies. Authorizes financial assistance for the development of similar State contingency plans.

H.R. 7175. May 13, 1977. Judiciary. Amends the Immigration and Nationality Act to authorize the Attorney General and the President to admit certain refugees to the United States. Permits such refugees to become permanent residents of the United States upon approval of the Immigration and Naturalization Service two years after admission.

Excludes from admission into the United States aliens who have engaged in the persecution of individuals.

Establishes a Select Commission on Immigration and Refugee Policy to study existing laws governing the admission of immigrants and refugees.

H.R. 7176. May 13, 1977. Amends the Internal Revenue Code to allow an itemized deduction, according to a specified formula, to any taxpayer who owns a passenger automobile which he uses in a carpool.

H.R. 7177. May 13, 1977. Veterans' Affairs. Provides that recipients of veterans' pensions and compensation will not have the amount of such pension or compensation reduced because of increases in social security benefits.

H.R. 7178. May 13, 1977. Interstate and Foreign Commerce; Judiciary; Banking, Finance and Urban Affairs; Ways and Means. Amends the Comprehensive Drug Abuse Prevention and Control Act of 1970 to set mandatory minimum terms of imprisonment for individuals convicted of certain opiate traffic related crimes.

Amends the Federal Rules of Criminal Procedure to require a separate sentencing hearing when a person is convicted of a crime for which such sentences are authorized.

Revises reporting requirements relative to (1) importation or exportation of cash and (2) vessels upon arrival in United States ports.

H.R. 7179. May 13, 1977. Banking, Finance and Urban Affairs. Amends the Home Owners' Loan Act to authorize the Federal Home Loan Bank Board to provide for the organization, operation and regulation of Federal Savings and Loan Associations or Federal Savings Banks.

Amends the Federal Deposit Insurance Act to provide for the conversion of State-chartered mutual savings banks into Federal Savings Banks.

H.R. 7180. May 13, 1977. Ways and Means. Amends Title XVIII (Medicare) of the Social Security Act to authorize payment for specified services performed by chiropractors, and physical examination, and related routine laboratory tests.

H.R. 7181. May 13, 1977. Veterans' Affairs. Provides that recipients of veterans' pensions and compensation will not have the amount of such pension or compensation reduced because of increases in social security benefits.

H.R. 7182. May 13, 1977. Armed Services. Directs the Secretary of each military department to extend post exchange privileges to any veteran entitled to compensation for a service-connected disability rated at 50 percent or higher.

H.R. 7183. May 13, 1977. Interstate and Foreign Commerce. Amends the Communications Act of 1934 to authorize the Federal Communications Commission to grant broadcast licenses and license renewals for 5-year terms.

Revises the act to allow certain appeals from orders or decisions of the Commission to be brought in the United States court of appeals for the circuit in which the broadcast facility is, or is proposed to be located.

Requires the Commission to examine its broadcast license renewal procedure to determine how it can be simplified.

H.R. 7184. May 13, 1977. Ways and Means. Amends the medicare program of the Social Security Act to authorize the President to enter agreements establishing reciprocal arrangements between such program and the program of any foreign country under which health services are provided.

H.R. 7185. May 13, 1977. Government Operations. Establishes the Agency for Consumer Advocacy within the executive branch to represent the interests of consumers before Federal agencies, to receive and act upon consumer complaints, to perform research on consumer products, and to gather and disseminate information on consumer products and services.

Requires Federal agencies considering policies or regulations which may affect the interests of consumers to notify the Agency, and to consider the interests of the consumer.

H.R. 7186. May 13, 1977. Public Works and Transportation. Directs the Secretary of the Army, acting through the Chief of Engineers, to carry out certain road maintenance activities on access roads to Fort Peck Dam, Montana.

H.R. 7187. May 13, 1977. Public Works and Transportation. Directs the Secretary of the Army, acting through the Chief of Engineers, to construct and maintain a rock breakwater to protect a marina located on Fort Peck Lake, Mont.

H.R. 7188. May 13, 1977. Ways and Means. Amends the Internal Revenue Code, in the case of a married individual filing a joint tax return with a spouse who has also earned compensation, to allow such spouse to elect not to take a deduction for his or her own individual paid-in retirement savings, and thereby allow a deduction for retirement savings under the provision for certain married individuals.

H.R. 7189. May 13, 1977. Ways and Means. Amends the Internal Revenue Code to exempt certain small manufacturers and producers from the excise tax on firearms.

H.R. 7190. May 13, 1977. House Administration. Adds a new chapter to the Internal Revenue Code which entitles congressional candidates who certify that they have been nominated by a political party and comply with certain contribution and expenditure standards to Federal funds for campaign use on a matching basis.

H.R. 7191. May 13, 1977. Ways and Means. Amends the Internal Revenue Code to exempt nonprofit volunteer firefighting or rescue organizations from the excise tax on sales of special fuels, automotive parts, petroleum products, and communication services.

H.R. 7192. May 13, 1977. Armed Services. Entitles members of the Armed Forces and their dependents to legal assistance in connection with their personal affairs under such regulations as the appropriate Secretary may prescribe. Places responsibility for the establishment and supervision of legal assistance programs with the judge advocate generals.

H.R. 7193. May 13, 1977. Education and Labor. Directs the Secretary of Labor to establish and maintain in counties with populations under 20,000 a pilot program designed to provide a guaranteed job opportunity to certain county residents from low-income households by partially reimbursing public and private employers for wages paid to certain such individuals, and fully reimbursing such employers for wages paid to certain other such individuals.

H.R. 7194. May 13, 1977. Ways and Means. Amends the Internal Revenue Code to provide a cost-of-living adjustment to the $15,000 phaseout amount for the disability exclusion.

H.R. 7195. May 13, 1977. Armed Services. Authorizes the Secretary of Defense to contract with health maintenance organizations to provide medical care for members of the Armed Forces and their dependents.

H.R. 7196. May 13, 1977. Interstate and Foreign Commerce. Amends the Natural Gas Act to limit Federal Power Commission authority to regulate prices of natural gas to new natural gas produced from offshore Federal lands. Requires that prices for the sale of other new natural gas be consistent with the ceiling established for offshore natural gas.

Directs the Commission to prohibit the curtailment of natural gas supplies for essential agricultural purposes. Restricts the use of natural gas as boiler fuel.

H.R. 7197. May 13, 1977. Judiciary. Requires the allowance of any claim presented to the Comptroller General of the United States within a specified period of time by the widow of a certain deceased individual respecting pay for accrued annual leave remaining on such individual's account.

H.R. 7198. May 13, 1977. Judiciary. Directs the Foreign Claims Settlement Commission to reopen the claim filed by a certain individual for the loss of certain property taken by the Government of Poland. Directs the Secretary of the Treasury to pay such individual out of the Polish Claims Fund on account of any award to him certified by the Commission.

H.R. 7199. May 16, 1977. Veterans' Affairs. Provides that recipients of veterans' pensions and compensation will not have the amount of such pension or compensation reduced because of increases in social security benefits.

H.R. 7200. May 16, 1977. Ways and Means. Amends the Food Stamp Act of 1964 to limit eligibility. Amends the Social Security Act to revise eligibility requirements and disbursement procedures under Title XVI (Supplemental Security Income Program); to increase the ceiling on Federal social services funding under Title XX (Grants to States for Services); and to revise procedures for the payment to States for child welfare services programs established under Title IV (Aid to Families with Dependent Children).

Amends Title XVI of the Social Security Act to extend the Supplemental Security Income program to Guam, Puerto Rico, and the Virgin Islands.

EXTENSIONS OF REMARKS

GETTING AMERICANS OUT OF FOREIGN JAILS—THE REAL CHALLENGE IN HUMAN RIGHTS

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. HANSEN. Mr. Speaker, having a young American held in a foreign jail for 18 months waiting for the court to act when even the prosecutors admit he is not guilty is cruel and heartbreaking. This is a true story and the ordeal continues, not for just one, but for many—not in just one country, but in many.

Long overdue progress is finally being made, but it is still slow and painful. Hopefully we will begin to see more and more the results of the faith and prayers of long suffering families and friends who have fought prejudice and lethargy and bureaucracy for long frustrating months to find those few who would care, who would do something.

The story of American prisoners in Bolivia is unfortunately not unique. It is all the complexities of humanity caught up in the system—a system of lofty legal goals, good intentions and the usual paralysis of conformity. It is a demonstration of how badly human resources can be wasted when people become slaves of the system instead of the system serving the people.

Only when enough caring people in the countries concerned came to an awareness of such crying injustice and stepped out of the lockstep of society has real progress toward needed relief been possible. Hopefully a concerted effort will now reward those who have waited so long and paid so dearly for the freedom of their loved ones.

Mr. Speaker, I enclose a news release for December 2, 1977, and a letter from the Department of State dated November 30, 1977, further describing the Bolivian prisoner situation at this point:

BOLIVIAN COURT DECISION EXPECTED MOMENTARILY

WASHINGTON, D.C.—"A Bolivian Court decision regarding Tom McGinnis of Idaho Falls is expected momentarily," Congressman George Hansen reported today.

Hansen, who three months ago traveled to Bolivia to assist in getting McGinnis' case expedited through a cumbersome Latin court system, noted that time allotted for review by Judges of the lower court is about to expire and a judgment must now be made.

The Idaho Congressman stated, "The Court was given a 15-day period after receiving the case November 18 to make their determination and that time expires December 9 if a 5-day workweek is considered, December 6 if it's a 6-day workweek, otherwise on Saturday, December 3 for a 7-day workweek. State Department officials have been alerted to notify the Congressional delegation and appropriate family members as quickly as a decision is announced," he said.

Hansen pointed out, "This will be a decision of the lower court in response to recommendations by the Bolivian government for no prosecution of McGinnis and several of his friends and similar pleadings by the defense attorneys. However, the matter must then be reviewed by the Superior Court, whatever the lower court decides, before the matter is finally resolved—hopefully by Christmastime," he continued.

Hansen, in the meantime reported that he has arranged a meeting at the U.S. Capitol Building for next Tuesday afternoon, December 6, at the request of the White House and State Department for a discussion of the prisoner matter between key State Department officials and interested Members of the House and Senate. This meeting prompted by a letter from several Congressmen to President Carter initiated by Hansen and a similar communication from a concerned group of U.S. Senators will include Patricia Derian, the President's State Department Coordinator for Human Rights and Humanitarian Affairs.

Also today Hansen stated, "I received a comprehensive letter from the Department of State at the President's direction detailing the progress made in the Bolivian prisoner matter and the expectations for the immediate future. This letter followed by one day a detailed letter to me from recently appointed U.S. Ambassador to Bolivia, Paul Boeker, dealing with recent initiatives and accomplishments in prisoner problems."

In a release earlier this week Hansen revealed that of the 41 U.S. citizens held in Bolivian prisons in mid-1977, eleven have now been released, three have escaped, six have been recommended for no prosecution, and three are eligible for parole.

"It now appears that we have finally achieved a concerted effort among U.S. Government and Bolivian authorities to put an end to the scandalous and enduring injustices suffered by American citizens imprisoned in Bolivia," Hansen concluded. "Certainly having a young man like Tom McGinnis held in jail for 18 months when even the prosecutors admit he is not guilty is cruel and heartbreaking."

DEPARTMENT OF STATE,
Washington, D.C.

DEAR MR. HANSEN: I am responding to your recent letter addressed to the President concerning American citizens imprisoned in Bolivia. I wish to assure you that your concern for those detained Americans is both understood and shared by the President and members of the Department of State.

As you may be aware, President Carter met with President Banzer on September 8 and discussed the prisoner issue. During the discussion, President Banzer was asked to take a personal interest in the cases involving American citizens. Specifically, President Carter asked President Banzer to consider action for those who were ill, those who appeared to have committed only minor offenses, and those who have served time in jail longer than the sentences which might be imposed. In addition, a new United States Ambassador was recently assigned to Bolivia with a mandate from the President to deal with the prisoner issue on a priority basis. Since his arrival in La Paz, Ambassador Boeker has been extremely active on behalf of the prisoners.

In reviewing events of the past several months, we are most encouraged that steps taken by our Embassy in La Paz and by the Bolivian Government are beginning to bear fruit for long term improvement. Not only have changes taken place within the Bolivian judicial system to speed trials, but six Americans (including one who was ill) have completed processing and are now free, five others have been released on parole and five more seem to be close to release on parole. Several others, although distressed in several cases by the length of their sentences, have nonetheless completed their judicial processing. In addition, a new and recently announced Bolivian decree law directs a high-level commission to recommend changes in the Bolivian drug law, giving special attention to due process. This last item should have a positive impact on Americans detained on narcotics charges.

We are also hopeful for welcomed news with respect to Bolivian parole procedures. Up until now, the Bolivian judiciary has held that prisoners released on parole must remain within the jurisdiction of the court. A more liberal interpretation, as a result of our Embassy's urging, may soon allow foreign parolees to return to their own country. This would indeed be a welcomed change.

In addition to the above, the Secretary recently authorized the Department's Office of the Legal Adviser to initiate formal negotiations for a prisoner exchange treaty with Bolivia which would be similar to those recently concluded with Mexico and Canada. We expect that the formal negotiations will commence in La Paz around the end of November. Since the Bolivian Government is eager to proceed with these negotiations, we are hopeful for an early agreement. Such a treaty would provide for the return of convicted citizens to their home countries to serve their sentences under more familiar living conditions.

We are extremely hopeful that the initiatives mentioned above will go far to alleviate the prisoners' situation. In the meantime, however, our consular officers will continue to closely monitor the cases and the welfare of the American detainees and provide them with whatever assistance is possible. If you have any specific questions or suggestions, please contact the Bolivian Desk on 632-3076 or the Arrest Unit in our Office of Special Consular Services on 632-9400 or 632-8089.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

THE LATE HON. CARLETON J. KING

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 1, 1977

Mr. DERWINSKI. Mr. Speaker, I am privileged to join in paying a special tribute to an outstanding public servant, our former colleague Carleton James King.

I had the pleasure of knowing Carl King for many years when he served as a Member of Congress. During his 14 years in Congress, I knew Carl to be a conscientious and hard-working Member, who was truly responsive to the needs of our Nation and of his district. He had all the qualities and talents that are essential to the makeup of an effective legislator, and he handled the demanding responsibilities of his congressional assignments with intelligence and insight.

As a member of the Armed Services Committee, Carl was instrumental in introducing legislation in support of a strong national defense. His expertise in military affairs earned him the chairmanship of the Board of Visitors of the U.S. Military Academy.

The absolute integrity of Carl King, in conjunction with his sensitivity to the

needs of others, enabled him to command the respect of all of us in Congress. The country has lost a man of great stature, and we have lost a good friend and a good human being.

Mrs. Derwinski joins me in offering our sincere condolences to his widow, Constance, and other members of his family.

IN LIEU OF DAMS

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. FRASER. Mr. Speaker, I am inserting an article written by Brent Blackwelder of the Environmental Policy Center entitled "In Lieu of Dams." The article appears in the fall issue of Water Spectrum, an Army Corps of Engineers' publication.

I found Dr. Blackwelder's article a timely piece outlining nonstructural alternatives to traditional dam building, canal digging, and stream channelization. These water resources projects have been designed primarily to achieve legitimate goals such as flood control, water supply, recreation, hydropower, and navigation. Dr. Blackwelder outlines several options to accomplish these objectives. Other alternatives include water conservation and proper management for meeting water supply needs, development of scenic rivers, or nonwater-based recreation instead of flat-water reservoir recreation, energy conservation measures taken prior to building more hydropower dams, and refurbishing our railroads instead of constructing new barge canals. These options are worth considering in light of the national water resources policy review initiated by President Carter.

For instance, an alternative of creating a greenbelt of parkland along a stream is a viable option in some areas where stream channelization has been proposed for flood control. This would control flooding while preserving the natural beauty and recreational value of the river or stream. Many different uses of flood plain lands are compatible with periodic flooding and it is encouraging the Corps is applying this concept with two projects. Several alternatives such as this one can now be undertaken without further authorization from Congress.

I hope my colleagues have a chance to read the article:

In Lieu of Dams

(By Brent Blackwelder)

The best way to dispel the suspicion that conservationists want to return the country to the Stone Age by opposing water resource development projects is to consider some of the superb alternatives we have proposed to traditional dam building, canal digging and stream channelization. Water resource projects are designed primarily to achieve one or more of the following objectives: flood control, water supply, recreation, hydropower and navigation. Given the desirability of providing these objectives, if the environmental community wants the Army Corps of Engineers and other agencies to stop altering the rivers and streams of America through water resource construction, what do we have to offer instead?

The alternatives I wish to discuss are nonstructural solution to flood problems; water pricing, water conservation and proper management for meeting water supply needs; development of scenic rivers or non-water based recreation instead of flat-water reservoir recreation; energy conservation measures taken prior to building more hydropower dams; and finally, refurbishing our country's railroads instead of constructing new barge canals.

FLOOD CONTROL

A wide range of nonstructural options is available to replace structural alterations of rivers and streams in achieving flood control. The term "nonstructural" means that these alternatives do not involve alterations of rivers through damming or channelizing.

The alternative of creating a greenbelt of park land along a stream is very attractive in some areas where stream channelizing has been proposed for flood control. The basic idea is that many uses of flood plain lands are compatible with periodic flooding. Devoting a green strip of park land alongside both banks of a river, serves the objective of flood control without destroying the natural beauty of the rivers or its recreational potential.

The Corps of Engineers is currently applying two such green belt concepts at its Indian Bend Wash project in Arizona and along the South Platte River in Colorado, where the Corps has transferred funds intended for channelization to a green belt project. That the designing of such nonstructural projects can pose an engineering challenge is demonstrated by the fact that the Indian Bend Wash project received a distinguished engineering award from the American Society of Civil Engineers.

In Prairie du Chien, Wisconsin the Corps is using two other nonstructural techniques to achieve flood control. It is relocating some residents from an island in the flood plain and is also flood proofing other buildings in the vulnerable area. By combining flood proofing and partial evacuation of the flood plain, the Corps has produced a workable plan where the traditional approaches of changing the river were too costly.

The Charles River Natural Storage Area in Massachusetts offers an example of still another nonstructural flood control technique. Here the Corps of Engineers wants to preserve 17 upstream valleys in their natural condition to prevent an increase in flood damages downstream which could occur if these valleys and their associated wetlands were developed. In 1971 the Corps found that flood losses averaged $158,000 annually. If 40 percent of the upstream wetlands storage areas developed, however, annual flood damages would jump to a staggering $957,000.

These four nonstructural flood control projects show that the Corps can and will carry out such plans. The problem is that nonstructural projects are the exception, not the rule, as far as flood control is concerned. Despite the provision of section 73 of the Water Resources Development Act of 1974 (it provided authority for Federal agencies to pursue nonstructural alternatives with cost-sharing provisions), progress in starting a large number of nonstructural projects has been very slow. This is especially regrettable since nonstructural projects do not have environmentally damaging impacts and, in the judgment of many, offer the best hope of achieving a reduction in the ever mounting annual flood damages billed to our country.

The trouble is that despite increasing expenditures on flood control structures, and despite the damages such structures have prevented, the country's annual flood damage bill continues to rise. Both the Task Force on Federal Flood Control Policy and the National Water Commission strongly support greater reliance on flood plain management techniques as the way to solve the Nation's flood problems.

Continued paving over of land in metropolitan areas leads to greater runoff and causes periodic flooding of streams. A wide range of tools is available to curtail some of this destructive runoff from suburban shopping centers and parking lots. On-site detention ponds should be required for large-scale developments. Gravel dry wells or recharge pits and porous surfacing material can help solve runoff problems. Controlling erosion by planting ground cover in new housing developments and shopping centers can also curb runoff and prevent siltation and the resultant loss of channel capacity in urban creeks and streams.

One important feature of nonstructural alternatives like flood plain evacuation and flood proofing is that they remove the burden of flood control from individuals not responsible for the problem—those inhabiting the upstream area. A disadvantage of reservoirs from the standpoint of social equity is that farmers and rural residents who are not the cause of the flood problem are forced to give up their land, some of which has been in the same family for generations, for a dam to protect people who have built downstream in the flood plain.

RECREATION

Most conservationists generally feel that enough reservoirs have been built to last far into the next century. In fact, the Corps should not, we argue, continue to cite recreation benefits to justify reservoir projects because demand for other forms of recreation, including non-water activities, is growing much faster than flat-water recreation demands. Second, building lakes in the rural countryside neglects the pressing recreation needs of the inner city where there is an insufficient number of facilities for regular use on a daily basis. Third, reservoirs eliminate some truly unique areas which provide unsurpassed recreational opportunities.

The Meramec Park Dam in Missouri is a good example of a project which will eliminate more recreational opportunities than it provides.

Conservationists discovered that about half of the claimed recreation benefits were coming from "sightseeing"—people coming to the reservoir not to boat, fish, picnic or swim but simply to stare at what the Corps had constructed.

Furthermore, the area already has an abundance of recreational opportunities: fishing and boating on the Meramec River; camping, hiking and picnicking in a State park; a wildlife management area; and in addition, spelunking in numerous caves, including the beautiful Onondaga. Each year several hundred thousand people visit Onondaga Cave, a truly unique asset to the area and Nation.

The alternative to the Meramec Park Dam would involve establishing a green belt and recreation area in the lower Meramec River and a combination of farm land, wildlife management areas and park land in the upstream reaches.

The point of this example is that the Corps partially justifies some projects by using recreational benefits when there are ample recreational opportunities already in the project area. Given hundreds of large reservoirs now existing all over the country and the growing demands for other types of recreation, it is a serious mistake to irrevocably commit these scarce river valley resources. We essentially deprive future generations of some choice in these matters and, at the same time, neglect the plight of the inner city

resident who must face crowded facilities if he chooses to picnic, swim or play tennis. The obvious alternative to more reservoirs is to spend money on inner city recreation facilities and to leave the rural landscape available for other forms of employment.

Only 19 rivers are now included in the national wild and scenic rivers system, but over 50,000 public and private dams have been built. It is time to correct the imbalance, and conservationists propose increasing the national wild and scenic rivers system by several hundred rivers to preserve both their natural and recreational value.

WATER SUPPLY

A wide range of methods dealing with water supply problems can be tried before building more reservoirs. In a number of cases where reservoirs have been proposed to solve water supply problems, conservationists have found that a water shortage did not exist, that the demand was based on questionable population projections or that benefits would accrue to only a handful of beneficiaries. For instance, we discovered that 70 percent of the water supply benefits of one Corps project, Lukfata Dam, would go to a single catfish farm operation and that the small town of Idabel, Oklahoma, population 6,000, would have to grow to 100,000 over the 50-year life of the project to fully use the projected water supply.

Setting aside such examples, let us suppose that we encounter an area with a legitimate water supply problem. What are the alternatives to building reservoirs? One of the most overlooked choices, particularly east of the Mississippi, is the use of groundwater supplies. The National Waterwell Association argues that groundwater reserves are frequently available on a sustained yield basis for as little as one tenth the cost of surface supplies. In the case of the controversial Oakley Reservoir in Illinois, which the Corps has now placed in the inactive category, a proper examination of the ample groundwater supply was not carried out.

More emphasis should be placed on the supply side of the equation. The National Water Commission, established by Congress in 1968 to do a 5-year in-depth study of all the Nation's water problems, devoted an entire chapter to better use of existing supplies in its final report.

WATER POLICIES FOR THE FUTURE

The Commission found little incentive for proper use of water because most cities assess a flat charge for the first units of water consumed and then assess progressively lower charges per unit as more water is consumed. The inevitable result is that there is little incentive to avoid excessive use.

According to the Commission, for instance, plumbing fixtures for showers and toilets could reduce total water use in the average household by as much at 35 percent and save commercial and business establishments up to 50 percent.

The Commission notes that ". . . if the common pricing policy were reversed there would be a financial penalty for excessive consumption and an incentive for individual conservation. Efficiency would also be improved by pricing policies which charged more at times of peak demand and less at times of slack demand."

To compound the problem, some areas like New York City do not meter their water, nor have they repaired leaks or fixed defective connections and valves. The Commission recommends effective leak control programs, installation of water metering, reform in the pricing structure for water and amendments to plumbing codes requiring the installation of water saving fixtures and appliances. By requiring localities to take these steps prior to receiving any Federal planning money for a water supply reservior, the Federal Government could easily eliminate much unneeded dam building.

Proper management of already existing reserviors can go a long way to alleviate the problems of water supply. Dr. Daniel Sheer, planning engineer for the Interstate Commission on the Potomac River Basin, has argued cogently that the Washington metropolitan area already has a sufficient number of reservoirs which, if properly managed, could meet the area's water needs well into the next century.

Dr. Sheer's proposal would require keeping tributary reservoirs full by using the adequate water flow from the Potomac River before a drought ever starts. By this method, Dr. Sheer points out, ". . . the Washington area would come through the worst drought with . . . 5 billion gallons of water to spare . . ." *

These alternatives to water supply reservoirs do not exhaust the possibilities. In the West, reform of groundwater management codes and the "use-it-or-lose-it" doctrine are essential. Land treatment techniques for sewage disposal and recycling of wastewater, some of which have been pioneered by the Corps, yield good quantities of pure water.

NAVIGATION

In looking to alternatives to navigation projects, we must define the ultimate goal of public spending for transportation. A reasonable goal would be achieving national transportation efficiency. This would benefit the entire economy—the businessman, the consumer and the environment. Conservationists argue that present navigation policy, which includes canal building, does not contribute to this goal. On the contrary, we are convinced that new canals damage the environment, are inefficient and are not justified economically.

The basic alternative to navigation projects lies in increased and improved railroad service and efficiency. From the environmental standpoint railroads are desirable because canals are generally much more destructive than railroad corridors. Furthermore, all the major railroad corridors have already been built so whatever environmental damage these routes have caused is a *fait accompli*.

In the area of energy efficiency the University of Illinois Center for Advanced Computation looked into prior studies of the fuel efficiencies of barge and rail modes. The Center found that studies which showed an energy advantage to barges had relied on mere ton/mile comparisons of energy consumption and had used average rail data for the entire country. These earlier studies neglected the fact that barges follow meandering rivers, thus traveling more miles to reach a given point than trains. Also, barges and railroads both ship bulk commodities which, if moved in unit trains, help give a slight energy advantage to railroads.

Is placing greater reliance on the railroads a viable alternative? Clearly, such a decision would have environmental advantages and no obvious energy disadvantages. It is a legitimate choice because there is already more track available than we now use. Professors Findley and Hannon of the University of Illinois proposed giving the Corps of Engineers authority to repair the Nation's rail beds to increase use of railroads. In an article published in *National Resources Journal*, they cite the railroads' generally poor record of track maintenance and note that the Corps is experienced in the area of rail repair. Ironically, the Corps has built over 1,500 miles of new rail bed in the past 25 years to replace old rail lines inundated by its reservoirs.

Furthermore, the Federal Government now pays 100 percent of the construction costs of new canals and all the operation and maintenance costs of the inland waterway system. If the beneficiaries of a number of major new canal projects had to pay for them, then the canals would probably not be built.

According to the Department of Transportation, the Federal Government has put some $30 billion over the past decade into our national transportation network. Until the passage of the Rail Organization Act of 1973, railroads had for many decades gone without receiving even a fraction of this support. As a result, our rail network has declined at the very time when it has such obvious advantages over other modes. Conservationists who oppose barge canal projects are thus not being obstructionists without alternatives. Rather we say that revitalization of our railroads is a more sensible way to spend public transportation dollars.

HYDROPOWER

While most Army Corps of Engineers projects do not produce hydropower (only 28 projects of more than 200 scheduled for some type of construction in the fiscal 1977 budget would generate electricity), conservationists do have much better alternatives to the construction of large hydropower dams. At the outset one might wonder why conservationists object to some hydropower projects. Aren't they a "pollution-free" form of energy which draw upon a renewable resource? It is true that hydropower projects do not have many of the environmental problems associated with fossil fuel or nuclear power plants, but they do have major environmental drawbacks: inundation of vast amounts of forest and significant wildlife habitat, damage to the native acquatic life through alteration of historic flow patterns, blocking of migratory fish passages, and to coastal resources by cutting off the downstream flow of nutrients.

The best alternative to hydropower projects is putting our major national effort into energy conservation together with the development of such alternatives as solar energy and wind power. One example will demonstrate the dramatic difference in results if we go the energy conservation route. If instead of building Dickey-Lincoln Dam in northern Maine the money were put into insulating attics we would realize the equivalent of 43 times the output of the Dickey-Lincoln project. Investing the money in insulation of walls would yield an equivalent savings of 7.5 times the output of the project. Installation of storm windows would yield 4 times the output. Doesn't it make sense to pursue such alternatives first before making the irrevocable commitments of river resources?

The Corps is now being assigned the task of evaluating the potential of installing generators in numerous existing small dams throughout the United States. This alternative appears to have important environmental advantages over the construction of new dams.

Many of the alternatives I have discussed—nonstructural flood control projects for instance—could be undertaken by the Corps without further legislation. Others such as the repair of the Nation's rail beds would require new legislative authority. Some of the alternatives would have to be implemented by other Federal agencies like the Bureau of Outdoor Recreation in the case of scenic rivers or by appropriate State or local entities.

Pursuing conservationists' alternatives affords the best way of achieving the legitimate objectives of water projects—flood control.

*Daniel P. Sheer, "Perspective on the Washington Metropolitan Area Water Supply Problem, 1977. Available from the Interstate Commission on the Potomac River Basin.

water supply, energy, recreation and transportation efficiency—while at the same time avoiding environmental damages and the loss of areas of scientific, educational and historic importance. Furthermore, these alternatives do not constitute irreversible commitments of river valleys; they leave open choices to future generations which are precluded by many traditional water development projects. Finally, conservationists' alternatives often have the advantage of being less costly to the taxpayer.

THE FUTURE OF AMTRAK

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. VENTO. Mr. Speaker, when the Conference Committee agreed to give Amtrak an $8 million supplemental appropriation on November 3, the issue did not come to an end. While some of the proposed service cutbacks were rescinded, others, such as the cutback in frequency on the Chicago-Illinois run, will continue and more cutbacks seem imminent.

The actions surrounding Amtrak's decision has raised many serious questions, questions that deserve our close scrutiny and that are integrally tied to the future of national rail passenger service.

Mr. Speaker, the Members of this Congress, in cooperation with the Executive and the general public, must determine what is to be the future of Amtrak. We must decide whether we are to expand or contract our Nation's passenger rail service, who will be responsible for those decisions, and what criteria will be used. We must formulate the role that railroads are to play in our Nation's energy conservation program and we must be willing to make all the necessary commitments to insure that our decisions are brought to fruition.

In order for us to study this matter and to make sound decisions, we need the full cooperation of Amtrak officials in their responses. Unfortunately Mr. Speaker, based on my correspondence with Amtrak during the past 3 months, I have serious doubts that we will receive the cooperation and openness so necessary for our success.

One of the first routes that Amtrak decided to cut back service on was the Chicago-Illinois route via St. Paul-Minneapolis. Since many of the employees of Amtrak live within the Twin Cities area and since the city of St. Paul is committed to building a new and much needed passenger rail facility, one would assume that Amtrak would contact the Congressmen of the affected districts. However, to the best of my knowledge, none of my colleagues ever received any notification from Amtrak of the impending cutbacks. It was only through the efforts of one of my constituents that I learned of the proposal.

In an effort to gain some insight into the criteria and processes for Amtrak's decisions, I and the rest of the Minnesota delegation sent a letter to Amtrak asking questions on ridership levels, possible impacts of the proposal, future plans, and provisions for public input into this decision.

The basic purpose behind our letter was to begin a dialog with Amtrak, a conversation that would be open and informed and that would result in the best possible decision for all concerned parties; even if this decision was to be a cutback in service. However, for any dialog to occur, two parties must be willing to discuss the issue. The reply that we receive from Amtrak was so vague, general and, at times, nearly belligerent that it was impossible for us to pursue this matter in an informed manner. Amtrak stated that this cutback would result in a savings of $7.5 million and that there would be no negative impacts by this action. However, other than these statements of "fact," Amtrak did not provide us with any documentary materials and did not even bother to explain how they reached their conclusions or decisions. In response to the question as to what input the public had in this decision, Amtrak replied:

> No public hearings were held because Amtrak is not required to hold public hearings on frequency reductions.

Assuming that the original delegation letter had been misinterpreted or improperly answered, I sent a second letter to Amtrak and reiterated and expanded upon my questions. I was still seeking to gain some explanation of the decision-making process of Amtrak, a process which Amtrak officials give the impression has some mystical connotations that are above the grasp of a Congressman.

In response to this letter, I received a form letter from Amtrak regarding their request for a supplemental appropriation of $56.5 million. I am certain that many of my colleagues received this letter and are familiar with the request of Amtrak and their mention of the results of any delay in action. While I do not object to the fact that I received a form letter, I would have appreciated some effort to respond to my questions. For if I was to make any decisions on this request it would be based on documented facts and not vague generalities.

Only after I had written a strongly worded letter to Amtrak, questioning their practice of responding to congressional inquiries with generalized promises of renewed services and further vague threats of cut backs, did I receive a response from Amtrak that addressed my concerns. Unfortunately, Amtrak once again replied to my questions by stating "facts" without providing me with any documentary materials. The only change in their approach was that public hearings were dismissed as too costly or as Amtrak stated:

> The time delay caused by public hearings would mean that, to save the same amount of money, we would have to end up cutting even more service . . .

I am grateful that not all of our Federal agencies dismiss public input as readily as Amtrak. I would rather see a few more dollars spent to insure reasonable public participation than to have it ignored or dismissed.

That, Mr. Speaker, is the status of my communications with Amtrak. A correspondence that has been marked by a distortion of public participation in the decisionmaking process and be a refusal to respond my questions with substantive answers. However, Mr. Speaker, I am apparently blessed. Many of my colleagues have also written to Amtrak and are still waiting for some type of reply.

Mr. Speaker, when this Congress does review our program of national passenger rail service and Amtrak's future, there are some questions which Amtrak should be asked. These questions do not concern the relative profitability of certain specific routes nor the energy savings that can be accomplished by a strong rail service, but I feel that they are as crucial to any final decision that we may make. I believe that we must ask Amtrak whether it considers itself as a public service organization and if so, what role does it believe that the public, the users of the service, should have, and what sort of information should we, their elected representatives, receive on Amtrak services. If Amtrak replies by word or by action that the public deserves no input and that Congress should receive only the most general and self-serving types of information, then I believe that we should seriously reexamine our commitment to Amtrak.

OLD TIME FIDDLERS AND FLAG WAVERS

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. HANSEN. Mr. Speaker, I have just received a letter from the Idaho Old Time Fiddlers recapping their many activities of the past year which have entertained and inspired thousands.

During the summer, I noted that the American flag which is always with them at every engagement was beginning to show the wear. I then offered to get them a new one which has flown over the Capitol of the United States to help inspire their wholesome activities for many years to come—an offer which they are now accepting as the year draws to a close.

I am hoping that their old flag will be properly retired to an Idaho museum as a token of the cultural heritage provided by this fine organization. The activities of the Idaho Old Time Fiddlers for the year 1977 would be typical of the busy schedule they have kept through the years in sharing a unique cultural enjoyment and heritage with Idaho's citizens and tourists. They play frequently in nursing homes, senior citizens' centers, weddings, and in parades. The group has received many awards for their colorful talent in community, patriotic and college homecoming parades. Holidays are especially busy times with performances and dances.

America is richer, indeed, because of the unselfish sharing of time and talent by these topnotch citizens—the Idaho Old Time Fiddlers.

THE HISPANICS AND THE HEMISPHERE AGENDA

HON. JOHN J. McFALL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. McFALL. Mr. Speaker, an annual event at the Elbert Covell College, University of the Pacific, Stockton, Calif., is the presentation of the Bishop Miller Lecture. This year the lecture was "The Hispanics and the Hemisphere Agenda" by Arturo Moralse Carrión. The faculty of Elbert Covell College has provided me with a copy of this timely lecture, and I therefore, include it in the RECORD for the benefit of my colleagues in the Congress.

THE HISPANICS AND THE HEMISPHERE AGENDA

(By Arturo Morales Carrión)

This is a great week in New World history. October twelve is celebrated up and down the Hemisphere in many different ways. In the United States, it is Columbus Day, and with all due respect to my Italian friends, they have craftily succeeded in capturing Christopher Columbus and making the twelfth of October exclusively an Italian celebration.

But here in California we are able to see the real perspectives of the event. On October 12 there began a human experiment of incredible magnitude, a tale of successes and failures, of generosity and cupidity, of greatness and exploitation. That tale has many chapters, and is far from finished. The historic ambivalence is still with us; the dialectical struggle is still present. Some of the promises of the American Utopia have been realized; others, for many millions of human beings in the New World, are still empty promises, unfulfilled hopes. We have a heritage of grandiose dreams and a heritage of bias, ethnocentric selfishness and social neglect. Each day we are pulled by contradictory forces; we have a rhetoric of assertion and a rhetoric of denial—a narrow view and a long, broad view.

In finding a way out of this predicament, we should take the long, broad view. We should see some of the forces at work, the trends that are pointers to the Twenty-first Century. The first is population. If demographic projections hold, what we call Latin America will have twice the population of the United States and Canada by the beginning of the next century. Two out of three inhabitants of the Western Hemisphere will come from the central and southern portions. Mexico alone will have around one hundred million people.

To that may be added the following facts. In its March, 1976 *Report on Persons of Spanish Origin in the United States*, the Bureau of the Census had this to say: "The Spanish origin population in March 1976 included a substantial proportion of young persons; about 13 per cent of all persons of Spanish origin were under 5 years old, and 44 per cent were under 18 years old. In the entire Nation, however, only 7 per cent of the population were under 5 years old, and 31 per cent were under 18 years old. At the same time, the proportion of older persons was smaller for the Spanish population than for the overall population; only 4 percent of all Spanish origin persons were 65 years old and over compared to 10 percent for the overall population".

In quoting these Census figures, which puts the total Spanish origin population at over 11 million, one has to remember that the Commonwealth of Puerto Rico, with its 3.2 millions is not included. And many have also questioned the number given by the Bureau, especially since, in order to have the total picture, the real human and social picture, the number of undocumented aliens has to be added. All in all the Hispanic presence in the United States is young, growing, dynamic, and is here to stay.

The Hispanic strain rises in the Hemisphere, as well as within the confines of the United States. That is the evident fact. In referring to the term Hispanic—which I personally prefer to Latin or Latino—I am broadening the definition to emphasize the blend, the ethnic mixtures, which have taken place in the great Afro-Indian-Hispanic orbit. A simpler definition of the Hispanic could be: a person with the willingness to mix.

So the tide that is swelling, is a tide which represents a mixture of races, and of patterns of civilizations. It is very significant that contemporary anthropologists and sociologists have great trouble in applying racial distinctions to the Hispanic-American or Latin-American world. One of the best authorities, the Swede Magnus Morner, stated in his book, *Race Mixture in the History of Latin America:* "No part of the world has ever witnessed such a gigantic mixing of races as the one that has been taking place in Latin America and the Caribbean since 1492. In fact—he concludes—it is impossible to determine the racial status of most Latin Americans without a genetic and anthropometric investigation."

In what we call Latin America, there are class and racial distinctions, and no one should be blind to them. There are sharp economic and social cleavages. But the wide stream of the culture is based on miscegenation, on what in Spanish we call "mestizaje". The Hispanic-Luso-American culture is a "mestizo" culture, a blend of many elements. Such words as "mestizo", "moreno", or mulatto" have not simply a meaning related to the color of the skin. They possess a cultural value of their own, they refer to life styles, developed over centuries. A good friend of mine, the Peruvian Manuel Seoane, used to speak and write about the "America Moreana"—a brown America which had to be understood in terms of a human crucible not simply in terms of a given pigmentation.

The demographic potential of Latin America as well as that of Hispanics in the United States imply not only a dynamic rise of statistics, but the assertion of miscegenation and mestizaje as powerful trends in the Twenty-First Century in this Hemisphere.

So, when we speak about the Hispanic strain, we are not dealing with a quaint, old, picturesque, forgotten world with dreamy Indians following their faithful "burros", or ardent caballeros—or Latin lovers—courting black-eyed senoritas. That there are Indians and burros is a fact, and that black-eyed girls are and should be courted is another fact. But the Hispanic strain is something more than amusing stereotypes from Hollywood. It is much more than a linguistic accent or broken English.

In looking at the lands to the south, to their variety and complexity and their different levels of development, and especially to their demographic explosion, against a cultural background, which, through the Indian heritage, takes us into a long, distant, creative American past, one cannot fail to see the analogy with China.

Some years ago, in a very perceptive book, New Worlds of the Tropics, the Brazilian sociologist, Gilberto Freyre, discussed Brazil in terms of a tropical China. He referred to the country's complexities, to its Moorish and oriental heritage, to its intense nationism which claims that Brazil's riches, its oil and minerals, "are almost sacred values that only Brazilian hands should touch."

But the dimensions of the continent peopled by the mestizo civilization would suggest that it is entering an era not too dissimilar from China before its present vertebration. The analogy, in a way, holds for the whole area. It is certainly not a backyard where you keep a low profile, and it is certainly not a string of banana republics. The very term is not only offensive, but shortsighted, and those who use it are prisoners of stereotypes and old prejudices, and are blinded by their inability to see that a whole continent, crisscrossed with hard, stubborn problems, is coming of age.

The relationships of the United States with Latin America will always be close and crucial. The United States cannot escape the Latin American presence, neither can Latin America escape the United States presence. If at times, the U.S. has shown an obstinate propensity to forget this historical symbiosis, the return to Latin America is always unavoidable. Freyre, with his fine Brazilian sense of humour, suggested several years ago that the United States seemed to have neglected Latin America—a sort of legitimate wife—"for exotic adventures of economic and political donjuanism in Africa, Asia and Europe."

The United States has paid dearly in the Viet-Nam fiasco for this economic and political donjuanism. A new perception of the U.S. position in the world, and particularly with reference to the Hispanic countries is clearly needed in the field of public policy. A new realization of the present and future development of the Hispanic world and its meaning to the United States is badly needed in the field of public understanding.

In a brief presentation of my views before the Senate Committee on Foreign Relations, I insisted that we are really dealing here with two agendas: one old and one new. On the Old Agenda, we have first and foremost the Panama Canal and Cuba, the vital issues of trade and private investment and some other subjects.

On the new Agenda, we have a complex of problems that are affecting us all some way or another; environmental pollution, the search for new forms of energy; the potential use of the great reserves of the sea; the imbalance between development on the one hand, and urban plight on the other; the thorny, ever present question of human rights, and the problem of more just income distribution and its bearing on the quality of life, as well as access to educational and economic opportunity. These are all pointers to the Twenty-first Century. They will be basic issues to be analyzed and debated over and over again, long after the treaty controversy has been settled and a modus vivendi developed with the Cuban Revolution.

But if the table is to be cleared, ways should be found to do away, as far as possible, with the Old Agenda.

When I participated in the meetings of the so-called Linowitz Commission, which brought together a group of specialists and concerned citizens to discuss the scope of U.S. relations with Latin America from a wide perspective, we all agreed that there was great need of action with reference to the Canal issue—a burning, irritating issue, a truly sore-spot in inter-American relations, a stumbling block to meaningful rapprochement.

President Carter has taken the bull by the horns, and with the support of experienced negotiators, a solution is in sight, if there is proper public understanding and support of what really is at stake. The problem is not that of a great power caving in to a banana republic. For one thing, Panama is not noted for its bananas, and the Canal issue is not a local issue. It has grown beyond that. It has become symbolic of the American dilemma; whether the United States is still bound by old policies and outlooks or whether it can really chart a new way, in the light of shift-

ing historical circumstances. It has to do with the awareness of the rising Hispanic tide of which I have spoken.

I think Ambassador Sol Linowitz has been essentially right in calling attention to the fact that the issue involves far more than the relationships between the United States and Panama. He has repeatedly insisted that this is an issue which affects US-Latin American relations and that "the canal runs not just through the center of Panama, but through the center of the Western Hemisphere".

We can look at the problem from the standpoint of U.S. security. The Treaty provisions meets adequately in my opinion, the basic concerns of the security-minded critics. It is very significant that the Department of Defense participated at every stage of the new negotiations. But security is not simply access to and the rights to use all land and water areas and installations necessary for the defense of the Canal during the basic treaty period. Security has also to do with confidence, with a climate of trust.

For many people in the Spanish-speaking world and Brazil, the treaty is a test of U.S. intentions vis-a-vis the rest of the Hemisphere. It is symbolic of a change in the U.S. perceptions, regarding the emergence of a new Latin America. Some of the bigger countries—such as Mexico and Brazil are not so affected by the Canal. They are not in the position of Peru, Ecuador, and Chile. They tend to deal bilaterally with the United States—and yet they are keeping a close eye on U.S. intentions regarding the treaty revision. A defeat of the treaty forces could deal a severe blow to a more realistic policy towards Latin America. It would push many of the issues of the New Agenda, into the background; thereby distorting once again the pattern of interaction between the two dominant human streams in the Hemisphere.

The old Panama treaty is no sacred piece of paper. While the building of the Canal was a magnificent engineering feat, the tough fisted diplomacy that preceded it has left deep scars in the Hemisphere. It was not the product of fair, honest negotiation but of arrogant imposition. Revision had to come as with many other actions of that age, at the turn of the century, which were inspired by a social darwinism and a racist nationalism, completely out of touch with the realities of the contemporary world.

For the United States to negotiate now a treaty revision with Panama, under the watchful eyes of Latin America, is not a retreat from power, but a retreat from arrogance. If there is something this country should do, it is not to equate its undeniable might with arrogance, but with fairness. Everybody in the world is aware that this is a big powerful nation, unmatched in its technological and industrial genius. What several unfriendly critics are questioning is whether it is really a great one. Bigness and greatness are not synonymous terms. For greatness involves a capacity to understand and act fairly, thereby asserting a moral leadership. If, as Mao-Tse-Tung pretended, power comes out of the barrel of a gun, true leadership requires the power of moral conviction. That should be the true U.S. leadership.

The world is certainly no morality play, neatly divided between the good and the bad guys. But there should not be either an impediment to wedding might to fairness and moral greatness.

In this Panama Canal test which is looming as a great national and hemispheric debate, those of us who are United States citizens of Hispanic extraction should solidly stand behind the President and his team of diplomatic and military advisors. Theirs has been an act of bold statesmanship.

To us, it should not be a matter of redressing a diplomatic wrong. A setback in this direction will be a setback in many directions. A great revolution in human relationships has been taking place in this country. An awareness of the rights of minorities and of the existence of a cultural pluralism, which had been long marginalized, is very much the order of the day.

There is no clear dividing line between external and internal affairs. Differences in these two areas may be pigeon-holed in bureaucratic departments. They are not so evident in real life. A projection of what the United States is doing in the field of human rights or in the recognition extended to women and minorities can really shake many monolithic structures in states and nations that pay lip service to revolution and change, but are impervious to asserting human and individual rights. And in the Hemisphere, I mean not only countries like Brazil or Chile, I mean also Cuba.

If we really want the Hispanic tide, so long neglected and marginalized in this country, to gain recognition and awareness, we have to insist that both internal and external policies be framed that are coherent and complementary. We can not say Viva! to the rise of the Hispanic strain, and then say Niet! to the Panama Canal treaty, and speak disdainfully of banana republics.

There are other hard issues ahead, which have to do more realistically with the shape of civilization, in this Hemisphere, in the Twenty-first Century. The search for new forms of energy, the exploration and exploitation of the seas, the evolution and sharing of a technology more attuned to environmental requirements, the protection and assertion of cultural values that have given meaning to communal life, the eradication of distorted stereotypes, the replanning of cities and the end of ghettoes and slums—these and other questions are of mutual concern. They transcend the national interests; they have to do with the quality of civilization itself.

We can not deal with the issues of the year 2000 with the mentality of the year 1900. This is why the discussion of the Panama Canal treaty is so significant. It will reveal whether this country is able to disentangle itself, as Lincoln wanted, "from the dogmas of the past."

The ratification of the treaty will mark an awareness, a recognition that the Hispanic-Indian-Afro-American world, in its demographic élan in its great variety, is gradually taking the historical contours of another China, and can no longer be treated as a backyard or as a string of banana republics.

What is taking place in Latin America—especially in Mexico and the Caribbean—will increasingly affect the United States. In the past, it had to do mainly with such matters as trade and investment, but today is something much more personal; it has to do with people, as in the complex question involving undocumented aliens.

All these issues, require a type of sensitivity that is exactly the opposite of the psychological heritage, left by the turn of the century.

It will require, for instance, the recognition that, together with the population explosion, there is a great expansion of Spanish as one of the leading world languages and that, eventually, it may become the prevailing second language of most educated persons in the United States, irrespective of origin.

This may sound to some as a wild prophecy, although not, I presume, in California. I stand on the words of a great American who, many years ago, gave some sound advice to a boy he was tutoring. With regard to the Spanish language, he wrote: "Spanish. Bestow great attention on this, and endeavor to acquire an accurate knowledge of it. Our future connections with Spain and Spanish America, will render that language a valuable acquisition. The ancient history of that part of America, too, is written in that language. I send you a dictionary."

The boy was Peter Carr; the year was 1787; the writer was Thomas Jefferson. Nearly 200 years ago, he foresaw the significance of Spanish to the emerging republic. His words are quite prophetic today.

I can not send all of you a dictionary. But coming from Puerto Rico, where Spanish is to us a basic fact of our daily culture and identity, I am especially aware of what the expansion of Spanish will mean in reaching an inter-American understanding on concrete issues, which will do away with old stereotypes and past prejudices. That is why your experience at Elbert Covell College is of such great significance.

To shape the future is no easy task. The struggle will be difficult. There are many walls of prejudice to be torn down. The obstacles are strong; the passions are many. But there is a momentum of fair play and effort which finally should carry the day. Or so we hope. Or so we hope.

EVERGREEN ARCADE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. RODINO. Mr. Speaker, recently I had the privilege of participating in groundbreaking ceremonies for a major improvement in my home district funded by the U.S. Department of Commerce. The Evergreen Arcade, to be constructed along Central Avenue near Evergreen Place in the city of East Orange, is very important to me, because it represents a new era in Federal-local government cooperation.

The mayor of East Orange, William Hart, was largely responsible for bringing together the business groups and government officials to create a revitalized downtown East Orange. When Mayor Hart came to me with the idea of building the Central Avenue Arcade-Mall I saw it as the perfect opportunity for the Federal Government to work with local government officials and community leaders. I was confident that we could get the Federal Government to support our efforts, because the people of East Orange have always shown a willingness and ability to help themselves.

Let me say a few words about this section of East Orange. Central Avenue is the premier commercial street in East Orange. Its large department stores and many specialty shops are combined with professional buildings where doctors, lawyers, and investment brokers carry on their businesses.

The mall project will improve the street conditions, plant shrubbery, install new street lamps, and increase the parking facilities along Central Avenue. Not only the commercial and professional people of the area, but all the citizens of East Orange and neighboring communities will benefit from this revitalization.

Cliff Rossignol, of the Economic Development Administration, and Senator HARRISON WILLIAMS were very instrumental in getting the necessary funds to East Orange. East Orange has proven

itself worthy of this Federal assistance, because of the efforts of people like Marty Ustin, Mayor Hart's director of planning and grants, and Larry Linkov and Marvin Johnson of the Mayor's Business Development Authority. Michael D'Altilio, city engineer of East Orange; William C. Holt, chairman of the East Orange City Council; and Otis Brown, president of the Central Avenue Mall Association have also played important roles in starting this project.

I know that the next mayor of East Orange, Thomas Cooke, will carry on this tradition of dedication to the people of East Orange and keen understanding of our American federal system.

Mr. Speaker, I salute the cooperation of the Federal Government and the East Orange community which the Evergreen Arcade represents. And I am honored to have been a part of it.

LOOKING BACK IN 1977 TO MAKE PROGRESS IN 1978

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. HANSEN. Mr. Speaker, as the legislative year 1977 draws to a close, it is important to recap some of the highlights of the past months to better provide a firm foundation for dealing with the challenges of the forthcoming year. Included herewith is a synopsis of the key actions and status regarding significant issues of national interest—the IWY-ERA controversies, final stages of court action against OSHA, the heated situation involving the Panama Canal treaties, and the scuttling of instant voter registration proposals.

SYNOPSIS OF KEY ACTIONS AND STATUS

WHITE HOUSE CHALLENGED ON IWY

I have challenged the White House to practice what they preach regarding human rights as it applies to the operation of the International Women's Year Commission.

In speaking with officials in the Congressional Liaison Office of the White House, I pointed out, "You people could have saved yourselves a lot of embarrassment over the IWY Convention in Houston if you had heeded the warning I sent to you six weeks before that time." Of course I was referring to a flurry of complaints by Members of several Congressional delegations over IWY press releases and activities at Houston condemning opponents of their programs, such as Catholics and Mormons, as subversive, right-wing extremists. These complaints resulted in a denial of responsibility of IWY actions by State Department spokesmen.

On October 5, I sent a letter to President Carter demanding that he discipline officials of the tax-supported IWY, whom he had appointed, for their "abusive, bigoted and divisive public condemnation of anyone opposing their efforts." This was in response to September statements by IWY Administration leaders like Bella Abzug and Midge Costanza irresponsibly and slanderously attacking all opponents of ERA and IWY as using Ku Klux Klan tactics.

I have given the President three opportunities to take action concerning these excesses. Besides the formal letter and today's call, members of his staff were asked to come to my office and discuss the problem and this was followed with subsequent phone calls to the White House.

The IWY Commission has grossly abused its authority in both its statements and the use of its funding. Besides the $5 million Congress appropriated for their use, the Commission has according to Government Accounting Office audit illegally diverted several hundred thousand dollars from various agencies and received additional grants from certain private foundations. Two months ago I filed a lawsuit in U.S. District Court to stop the illegal diversion of funds and employees and prevent improper use of tax funds to lobby for the ERA.

Complaints received following the Houston convention have caused me to additionally investigate the possibility of expanding or amending my lawsuit to cope with any additional improper diversion of funds and questionable use of the State Department franking privilege for disseminating partisan and bigoted IWY information.

It is unfortunate that an Administration which preaches the doctrine of human rights so loudly can ignore the gross injustice and infringement on rights perpetrated by its own appointees and programs.

And the worst part of it is that people who object to such revolutionary programs and unsavory tactics sponsored by their own tax money must fight it with additional funds out of their own pockets.

SOVEREIGN RIGHTS OF STATES ASSAULTED

The Sovereign rights of the states are being unfairly and unconstitutionally assaulted by arbitrary and political decisions from the office of the U.S. Attorney General.

I appeared during the IWY Commission in Houston before an Ad Hoc Congressional Hearing chaired by U.S. Rep. Robert Dornan (R-Calif.) in connection with activities related to the National Conference of International Women's Year (IWY) to testify for legislation to allow states to rescind their ratifications of the Equal Rights Amendment (ERA).

Three states have already passed rescissions of ERA ratifications including Idaho, but the Carter Administration is so bent on getting ERA approved that the U.S. Attorney General's office is passing off political advice as determinations of law in a blatant display of legal arrogance.

The Attorney General's office should be fair enough to admit they can't have it both ways. States not approving ERA on first consideration are not prevented from later ratifying, so why should ratifying states later be prohibited from rescinding?

My bill called the Hostage Relief Act will clarify and guarantee that legislatures are free to change their minds either way until such time as the proper number of states have qualified for certifying approval of the proposed amendment.

This legislation is particularly important in light of the recent bill introduced by Rep. Elizabeth Holtzman (D-NY) which would extend the time for ERA ratifications for another seven years.

Certainly states should not be held hostage to actions taken under a given set of rules and conditions when those circumstances are changed.

ERA has already had the advantage of extensive lobbying at taxpayers' expense so why should they also be able to arbitrarily change the rules to their advantage without allowing the fairness of an escape clause for those who wish to reconsider?

OSHA FIGHT AT CLIMAX

The battle against the warrantless searches of OSHA is moving into its final stages with the Barlow challenge serving as the landmark case in a classic battle before the U.S. Supreme Court.

The final brief was filed in September and oral arguments are scheduled as soon as the Court returns from the holiday recess in early January. A final decision should be published sometime during the Spring.

The Barlow case if upheld will be historic in eliminating the "unconstitutional" warrantless searches" of the Occupational Safety and Health Administration. So far 18 State and Federal courts across the nation have upheld the provisions of the 4th Amendment and ruled out OSHA's warrantless inspections which provides strong reason to believe the Superior Court will rule in Barlow's favor.

This fight goes back to the very roots of the American struggle for freedom and basic human rights. One of our original complaints against England was the unrestricted forced search of our homes and businesses. Now over 200 years later a government agency is claiming some of the very powers that pushed American colonists into rebellion against England.

The checks and balances devised by our founding fathers are at the heart of our system of government. They maintain our individual freedom. The OSHA concept is an unbridled use of power which must be contained and I am proud to support stalwart citizens like Bill Barlow who stand up for their Constitutional rights and our freedom by saying "no" to random, warrantless fishing expeditions by inspectors from OSHA or any other government agency.

PANAMA—A BLITZ ON THE TAXPAYER

The battle over the Panama Canal is shifting into high gear with the President utilizing to the maximum extent possible the prestige and patronage of the office of President of the United States in addition to spending vast amounts of taxpayers' dollars in an attempt to "create" public opinion—a sophisticated term for brainwashing.

Staggering amounts of money are being spent nationwide in attempts by the Administration to maneuver and manipulate the national media and prominent citizens in an all-out effort to create an artificial atmosphere of acceptance for the President's proposed Panama Canal treaties. Even as you read this, editors, prominent businessmen, heads of educational institutions and others are being invited to the White House or regional meetings to hear one side of the story—a questionable use of taxpayer funds and facilities for lobbying. The State Department is also spending your tax dollars to extensively send employees throughout the country for speeches at every crossroad to drum up support for ratification even though public opinion remains overwhelmingly opposed to ratification.

A public relations firm has even been hired at a cost of $200,000 to promote the treaties. President Carter has tried to justify the expenditure saying it was in the public interest even though the majority of Americans have repeatedly said what they want. Apparently the President considers the "public interest" to comprise of only a privileged minority such as the large multinational banks and corporations and foreign interests who stand to gain millions by this extravagant sellout of American assets and interests such as represented by his negotiator Sol Linowitz.

State Department officials spent over a month at the taxpayers' expense in the State of Oregon alone. According to the survey which was included with the newsletter you received last August, 96 percent of Idaho's 2nd District opposes ratification. The President's so-called public interest only comprises 4 percent of the population in Southern Idaho.

A recent survey of the Senate shows 49 Senators as favoring ratification of the proposed treaties including Wendell R. Anderson-MN, James Abourezk-SD, Birch Bayh-IN, Frank Church-ID, Dick Clark-IA, Alan Cranston-CA, John C. Culver-IA, Mark Hat-

field-OR, Ernest F. Hollings-SC, Hubert Humphrey-MN, Edward Kennedy-MA, George McGovern-SD, Charles Mathias-MD, Howard Metzenbaum-OH, Daniel Moynihan-NY, Gaylord Nelson-WI, Donald Riegle-MI, Adlai Stevenson-IL, Lowell Weicker-CT, Harrison Williams-IL.

Listed as undecided are 22 Senators and 29 Senators are opposed to ratification.

I have authored a resolution, House Concurrent Resolution No. 328, which would uphold the Constitutional authority of the Congress and allow the House and Senate to vote first on the question of disposition of property prior to the Senate's vote for ratification. Over 160 Congressmen have joined me in co-sponsoring this resolution. We expect to get over half the Congress signed up or 218.

The resolution was assigned to the House Merchant Marine and Fisheries Committee, where the Chairman, Congressman John Murphy of New York, is one of my chief cosponsors. Congressman Murphy is eager to hold hearings on my Resolution in order for it to be reported to the floor of the House for an expeditious vote.

Significant progress has been made to expose the give-away but the fight is not over. Public opinion will win on this issue so it's important that the President as well as Members of Congress hear what you have to say.

SCANDALOUS VOTER PROGRAM SCUTTLED

President Carter's Instant Voter Registration Plan has fortunately been scuttled. On election day this past November the Ohio electorate wisely voted 62 to 38 percent in favor of abandoning same day registration.

It was well-known that the election results from Ohio would have a great effect on the Administration's floundering bill. Thankfully the "buckeye" vote not only stopped such a program in Ohio, but also sealed the door of the national proposal for the rest of the 95th Congress and hopefully for good. The American public would not buy the administration's scheme to stack the election-day ballots and further push the nation into a one-party system. I for one say good riddance to the President's misconceived and unjust bill.

The surprising fact was not only the large percentage by which the voters of an industrialized state rejected the measure but also the fact that the largely urban and labor-dominated areas of the state rejected it by far greater margins than did the traditionally more conservative rural areas.

A TRY FOR LASTING PEACE IN THE MIDDLE EAST

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. DERWINSKI. Mr. Speaker, as a member of the House International Relations Committee, I want to commend both President Sadat of Egypt and Prime Minister Begin of Israel for their intensive efforts to break the diplomatic stalemate and work toward a lasting peace in the Middle East.

The continued misuse of the United Nations General Assembly by Arab States and the series of diplomatic false starts that have frustrated efforts to solve the Middle East crisis can possibly be overcome only by as dramatic a series of events as have been worked out by Prime Minister Begin and President Sadat.

I believe that meetings such as the planned session in Cairo are necessary to keep up the momentum of the peace initiative. As the parties expand their communications and negotiations, a slow but positive development of mutual trust can be realized.

President Sadat and Prime Minister Begin took calculated risks in their actions. By this I mean risks of political problems on the domestic front as well as the risks that are obvious in the long-standing bitterness that has marked the Middle East dispute.

The failure of the Soviet Union to accept the invitation to the Cairo conference shows that the Soviets do not want to help achieve a Middle East peace settlement. It also proves that the Carter administration made a mistake by bringing the Soviets into important involvement in the forthcoming Geneva peace conference.

Since Sadat and Begin have clearly seized the initiative, the United States should work with both of them as well as encourage other moderate Arab governments to give their cooperation, and ultimately a major role would have to be played by the United States to help insure the final peace agreement that would be worked out.

SALE OF ADVANCED COMBAT AIRCRAFT TO SAUDI ARABIA

HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. DODD. Mr. Speaker, in order to better inform ourselves of the possible problems raised by the potential sale of advanced fighter aircraft to Saudi Arabia, I have asked several organizations and individuals to prepare detailed studies of various aspects of this issue.

Today, I am including in the RECORD part one of a study prepared for me by Prof. Steven Rosen of Brandeis University entitled "Sale of Advanced Combat Aircraft to Saudi Arabia: Implications for the Arab-Israeli Military Balance."

Dr. Rosen raises several interesting points in his study. In his view, the most serious problem raised by the proposed sale of advanced fighter aircraft to Saudi Arabia is the fact that "in the particular context of the Saudi/Israeli relationship, acquisition of advanced combat aircraft by Saudi Arabia would significantly increase the likelihood * * * of * * * direct combat between forces of Israel and Saudi Arabia." Moreover, Dr. Rosen demonstrates that if Saudi forces do become involved in a future conflict they will have far greater capability to do serious damage to Israel than they have had in prior years.

This study presents evidence that is not frequently found in debates concerning the possible sale of F–15's or other advanced aircraft to Saudi Arabia, and is especially valuable in this regard. For example, Dr. Rosen examines in some detail the rapid modernization and expansion of the Saudi armed forces that has taken place in the last decade, contending that by the end of the 1980's Saudi Arabia will "have advanced far down the road toward completing modernization of its armed forces." By 1983 there will have been a tenfold increase in the number of combat aircraft compared to 1967 and a threefold increase since 1973.

Moreover, Dr. Rosen points out that in the environment of the 1980's Saudi aircraft will be in a position to threaten Israel directly from positions well within the range of any advanced attack fighter that the United States might transfer. Beyond the modern military base at Tabuk (200 miles from Eilat), Saudi Arabia has at least six combat-worthy civilian airfields which could provide bases for advanced aircraft within the context of a short Arab-Israeli conflict.

Mr. Speaker, in the months to come, I hope to be able to submit additional valuable information concerning the proposed sale of advanced combat aircraft to Saudi Arabia. I hope that the information I will be providing will help elevate the level of debate in this critical area, and I welcome the assistance of other Members in this effort.

Mr. Speaker, I commend this study by Dr. Rosen and ask that it be inserted at this point in the RECORD:

SALE OF ADVANCED COMBAT AIRCRAFT TO SAUDI ABABIA: IMPLICATIONS FOR THE ARAB-ISRAELI MILITARY BALANCE, PART I

(By Steven J. Rosen)

This paper will address some of the problems posed by the proposed sale of F–15, F–16, or F–18L combat aircraft to Saudi Arabia within the context of the Arab-Israeli military balance. As such, it is not designed to deal with all of the issues raised by this potential sale but merely attempts to cast light on one aspect of this issue.

A. POTENTIAL SAUDI INVOLVEMENT IN AN ARAB-ISRAELI CONFLICT

The most serious problem raised by the proposed sale of advanced combat aircraft to Saudi Arabia is the fact that in the particular context of the Saudi/Israeli relationship, acquisition of advanced combat aircraft by Saudi Arabia would significantly increase the likelihood of the outcome least desired by the United States, Israel, and presumably Saudi Arabia; i.e., direct combat between forces of Israel and Saudi Arabia which would make Saudi Arabia, for the first time, a full military participant in an Arab-Israeli war.

Background

Although the question of whether Saudi Arabia would actively deploy its forces in a future Arab-Israeli war is a matter of some conjecture a considerable body of evidence suggests that Saudi Arabia would indeed deploy its forces and/or make them available to other Arab states.

In the first place, it is important to realize that Saudi Arabia has participated to some extent in previous Arab-Israeli conflicts. As early as 1948, Saudi Arabia furnished a battalion of troops under Egyptian command for the invasion of Palestine by the Arab League armies. On May 24, 1967, the Jordanian government announced permission for Saudi forces to enter Jordan as part of the Arab mobilization against Israel. Some Saudi units entered southern Jordan the same day, while others remained in readiness near the border. None were heavily engaged in the succeeding hostilities of the Six Day War, but this may have been more a function of the lightning Israeli victory

than of any lack of will on the part of the Saudis. During the 1973 war, a Saudi brigade of approximately 3,000 was dispatched to Syria, and it has been reported that several Saudi soldiers were taken prisoner by the Israelis during the fighting on the northern front. In addition, eight Saudi helicopters with Saudi pilots were sent to Egypt to participate in logistic support missions, and did not return home until a few months after the war ended. Following the 1973 war, a brigade of about 4,000 men remained in Jordan encamped near Karak, in the mountains to the east of the Dead Sea, until late 1976, and the Saudi brigade in Syria also did not return home until October 1976. In November of 1975, fifteen F–5E's that we had delivered to Saudi Arabia less than twelve months earlier flew out of a Jordanian base into Syria to participate in joint Syrian/Jordanian/Saudi maneuvers lasting several days. (Saudi Arabia explained to the U.S. that its squadron was merely participating in the "annual training cycle" of the Saudi brigade in Syria). These past actions, undertaken when Saudi Arabian capabilities were far lower than they will be in the future, seem to be clear evidence that participation in a future war is a possibility that is being considered systematically by the Saudi high command. Senior Saudi military commanders and officials now consult regularly with their counterparts in the confrontation states and make frequent visits to Egypt, Syria and Jordan.

Moreover, the top Saudi political officials have been forthright in statements that their country would commit its forces in a fifth war. King Khalid told the New York Times in May of 1976 that:

"When we build up our military strength we have no aims against anybody except those who took by force our land and our shrines in Jerusalem—and we know who that is. We also believe that the strength of Saudi Arabia is a strength for the whole Arab and Islamic world. We always intended to make use of all military equipment that might help build our military strength."

Crown Prince Fahd told the Times in April of the same year that his nation's armed forces are "a force in the defense of the Arab nation and of the Arab cause." Defense Minister Sultan, according to the Christian Science Monitor, said "All our weapons are at the disposal of the Arab nation and will be used in the battle against the common enemy." Foreign Minister Saud, in a recent Newsweek interview, said "In times of war when the interests of our brother Arab countries are involved and blood is flowing, nothing is too expensive to use . . . I am saying that we will use whatever resources we have . . . to hurt our enemy." And the Kuwaiti newspaper Al Qabas reported in March 1977 that Saudi officials "feel their country will be exposed to any new war in the area and for that reason are preparing to participate in such war by opening a new front in the Eilat area." (The Israeli port of Eilat is only 200 miles from the major Saudi airbase at Tabuk). U.S. Lt. General Howard Fish, director of D.O.D.'s Defense Security Assistance Agency, may have been right that these are merely "hometown statements made for the consumption of the people that they are addressing at the moment and are not necessarily representative of their policies and their actions," but on the evidence the possibility certainly cannot be excluded that they are in fact operative statements of intent. Indeed, it can be argued that the tenfold expansion of Saudi capabilities that is now underway with U.S. assistance may make it impossible for the Wahabbi kingdom not to participate in a fifth war. The new capabilities may generate their own intentions and enhance the pressure within the country and from other Arab states to contribute to a common Arab effort against the Zionist enemy.

Implications

If Saudi intentions are ambiguous or appear to be leaning toward involvement in a war, the Israelis will have to take this into account. Should Israeli intelligence learn that advanced Saudi aircraft and paratroops are stationed at or transferred to bases in the northwest during a crisis, the Israeli Air Force, under duress in a multi-front war, might feel compelled to undertake preemptive strikes against these bases and aircraft even if the RSAF had not yet brought its forces into the war. The threat posed by F–15, F–16, or F–18L aircraft in Saudi possession would constitute a much greater additional burden on Israeli defenses than any aircraft now in the forces of the Wahabbi kingdom. If allowed to operate, they would divert IAF squadrons from other theatres; would complicate the IFF (identification friend or foe) problems of the IAF; would pose a threat to the survivability of the Hawkeye E–2C airborne early warning and control system on which Israel now depends heavily and force the diversion of Israeli F–15s from other tasks to expand the combat air patrol dedicated to defending the E–2C; and, most importantly, would very significantly enhance the threat of Saudi strikes against Israeli military and civilian targets on the ground. The Saudis, for their part, would have to assume that Israeli attacks on the northwestern airfields would be more likely than ever before, and might for this reason conclude that staying out of the war, an option that might otherwise have been feasible, is in the circumstances foreclosed by the logic of the new situation. Thus, the transfer of advanced combat aircraft to Saudi Arabia might set in motion a cycle of defensive/pre-emptive calculations on both sides. The consequences of such a train of events for the postwar orientation of Saudi Arabia and its posture vis-a-vis the United States must be taken into account by American planners who would otherwise favor the sale of advanced warplanes to the RSAF.

B. SAUDI CAPABILITIES IN A FUTURE ARAB-ISRAELI CONFLICT

The potential involvement of Saudi forces in a future Arab-Israeli conflict would be worrisome under any circumstances. However, they are most troubling given the major development of Saudi offensive capability that will have a dramatic impact in the environment of the 1980's. Within that time frame Saudi Arabia will have advanced far down the road toward completing modernization of its armed forces; moreover, it will be in a position to threaten Israel directly from positions well within the range of any advanced attack fighter that the U.S. might transfer.

Expansion and modernization of the Saudi armed forces

The systematic expansion of the Saudi Arabian armed forces is reflected in the following allocations to the Ministry of Defense and Aviation since 1972:

[In millions]

1972–73	$1,002
1973–74	1,528
1974–75	2,490
1975–76	6,419
1976–77	9,012

Current Saudi defense expenditures are therefore nearly equal to those of Britain, France, and Germany, and are more than twice those of Israel. Saudi oil revenues during the coming five years are projected at more than $35 billion per year, and given the limitations on absorptive capacity in the civilian sector, it is reasonable to assume that military outlays will continue at high levels (as is projected in the current five-year plan).

Moreover, the Saudis are not merely buying an inventory of weapons but are engaged in a thorough and systematic program to develop from the ground up a complete military infrastructure, including airfields, naval port facilities, radar and communications systems, supply depots and related logistical support, and maintenance and repair facilities, as well as thorough training of personnel to maintain, operate, repair, command, and administer the weapons and facilities. Whereas the Libyans, by contrast, are acquiring large amount of equipment but lack an infrastructure commensurate with their weapons inventory levels, Saudi Arabia is acquiring basing, operating, and maintenance facilities which exceed the requirements of current inventories and lay the groundwork for future growth. The United States Department of Defense has contributed to the development of a master plan through the completion of a study in 1974 (updated in 1976) surveying Saudi defense modernization needs for the next ten years. Prior to this study, there was no overall plan for development, and modernization was proceeding in a disjointed fashion without established goals or priorities for implementation. The U.S. survey team, at Saudi request, examined the potential threat environment and the current status of existing Saudi armed forces, and, after consideration of such limiting factors as trained or trainable manpower, made recommendations for future development. As a result, 81% of the $12.1 billion in cumulative U.S. FMS orders by Saudi Arabia through FY 1976 has been for aircraft and hardware. Thus, the real capability of the Saudi armed forces for current and sustained operations will, when these programs are completed, be significantly greater than a mere counting-the-beans comparison with other states such as Libya might suggest.

The sheer quantitative expansion of Saudi air capabilities is also impressive. The following table shows the growth in the number of combat aircraft and their total weapons payload (in single sortie tons deliverable) from 1962 through 1983, assuming the sale of 60 F–15s, F–16s, or F–18Ls.

[In tons]

	(1)	(2)
1962 (est.)	16	20
1967	20	30
1973	71	134
1977	137	382
1983 (F–15)	191	826
1983 (F–16)	191	586
1983 (F–18L)	191	856

[1] Total combat aircraft.
[2] Total weapons payload.

By 183, there will have been a tenfold increase in the number of combat aircraft compared to 1967 and a threefold increase since 1973. The increase in weapons payload will be even greater: in the F–15 case, for example, an increase of 2700% over 1967 and 500% over 1973. And the new aircraft will be superior in range, maneuverability, top speed, low-level penetration capability, avionics, weapons delivery equipment, electronic countermeasures, cannons, and missilery. The total single sortie missile payload with the F–15, for example, will be 420 air-to-air missiles and 240 air-to-surface missiles in 1983, compared to the 1973 total of 100 relatively primitive air-to-air missiles

and no air-to-surface missilery at all. It should also be recalled that Saudi Arabia has already been authorized to receive 1650 Mavericks and 1000 Sidewinders, in addition to any future authorization that might accompany aircraft sales.

The ability of Saudi pilots to exploit the full potential of this vast arsenal will undoubtedly be limited by manpower competence factors. However, it should be remembered that the Saudi armed forces draw upon the Beduin stock out of which the British fashioned the Jordanian Arab Legion—itself widely recognized as one of the most effective fighting forces in the Middle East. Several qualified F–15 specialists have offered the view that the F–15 is no more difficult to operate and maintain than the F–5. In fact, the F–15 is optimized for ease of maintenance, and is expected to require fewer maintenance man hours per flying hour than previous American aircraft. Moreover, even if operated at 50 percent efficiency, the new equipment would represent a very significant augmentation of existing Arab capabilities.

Airbases facing Israel

Within the overall context of Saudi capabilities, one of the most interesting and troublesome developments is the growing capability of Saudi Arabia to stage aircraft in an offensive mode against potential targets in Israel.

In this regard, the most important offensive staging point would be the airbase at Tabuk, which is located in northwest Saudi Arabia near its juncture with Jordan and Israel—a mere 200 miles from Eilat and 250 miles from central Sinai. The airfield at Tabuk was built some years ago by the British, originally with an orientation to defense against the western threat (i.e., Nasser's Egypt), and has at least one runway (#13–31) in excess of 10,000 feet. More recently, the U.S. Army Corps of Engineers has been engaged in the design and construction of expansions at Tabuk with a value in excess of $200 million, primarily for cantonments. In addition, the Corps is building an $83 million Airborne School at Tabuk where Saudi infantrymen will be given paratroop training to attack or land in combat areas from assault aircraft (scheduled for completion in 1980). Tabuk has not been a major center of RSAF and paratroop activity in the past, but current development plans suggest that it is being prepared for a greater role in the future.

Indeed, during the week of November 7, 1977, a squadron of F–5's took part in maneuvers at Tabuk.

In the context of the Arab-Israeli conflict, a number of civilian airfields in the northwest should be considered along with the principal military base at Tabuk. At least six could provide additional bases for F–15s, F–16s, or F–18Ls within striking range of Israel, permitting the RSAF to disperse its forces rather than concentrate them at one base vulnerable to pre-emption. Those at Badanah, Turayf, Gurayat, Sakakah, Al-Wajh, and Ha'il have runways well in excess of the takeoff and landing requirements of these advanced fighters.

Civil airfields in Northwest Saudi Arabia and runway lengths:

Gurayat	4,700
Turayf	6,567
AlWajh	10,004
Badanah	10,004
AlJawf	10,824
Ha'il	7,576

(Courtesy International Civil Aviation Organization and the Jeppeson Company of Denver, Colorado)

In fact, the civil airfields at Gurayat and Turayf are already being expanded for military use. The takeoff and landing requirements given by Jane's All the World's Aircraft and Aviation Week and Space Technology are as follows (though the figures should be extended marginally for hot climates):

	Takeoff in feet	*Landing in feet*
F–15	900	2,500
F–16	1,700	2,650
F–18L (estimate)	1,000	2,000

As for the ground support equipment required to operate from civilian airfields, according to the F–15 and F–16 program officers at the Wright Patterson Air Force Base, as well as a number of private consultants, these aircraft could operate from civilian airfields for one day with no special equipment requirements other than fuel; could operate for one week with a minimal set of organizational level aerospace ground equipment (AGE, such as loading and oil service equipment) plus an appropriate amount of fuel, ordnance, and spares; and for three weeks or more with full base-level AGE maintenance equipment. The requirements increase with the length of service, but in the most likely case of an Arab-Israeli war of less than three weeks duration, all of the required ground support could be flown into the bases on available tankers and small transport planes. The approximate distances in miles (on a straight line) between Tabuk and the six civil airfields in northwestern Saudi Arabia and possible targets in central Sinai, central Israel, and the Golan Heights are as follows:

	Tabuk	Gurayat	Turayf	Badanah	Al Jawf	Al Wajh	Ha'il
Central Sinai	250	250	300	350	350	300	550
Jersualem	300	200	200	350	350	400	500
Golan Heights	350	250	200	450	400	500	550

For comparison, the combat radii of the F–15, F–16, and F–18L carrying a full air-to-air weapons suite are at least 700, 575, and 460 miles, respectively. In summary, there are at least seven bases in Saudi Arabia from which advanced American fighter aircraft could operate effectively to participate in any future Arab-Israeli War, in addition to the possibility of operating from Jordanian, Egyptian, or Syrian airfields.

European sales

It may be argued that if the United States declines to provide state-of-the-art combat aircraft to Suadi Arabia, the Wahabbi kingdom has the option to turn to European suppliers for such alternatives as the French F–1. Too often, the thesis that "if we don't do it, somebody else will" has been accepted to justify American sales that are not warranted in themselves. In the present case, French equipment would create some additional problems for the Arab-Israeli balance (such as the greater ease of transferability to the air forces of other Arab states already contracted to receive the F–1), but in the net assessment, European sales would not be as severe in their consequences as a U.S. supply agreement.

For example, the F–1 was subjected to a rigorous technical comparison with the F–16 by a NATO committee seeking a common fighter selection for Belgium, Denmark, the Netherlands, and Norway. The committee concluded that the F–1 is inferior to the F–16 on most combat dimensions. It compares still less favorably with the F–15. Also, European aircraft are more difficult to operate and maintain, and a Saudi mix of American F–5s with French F–1s would compound the interoperability, standardization, and maintenance problems of the RSAF, resulting in a lower net combat potential. And unlike American aircraft transfers, F–1 sales would be less likely to generate follow-on demands for AWACS or the Grumman E2–C. (France does not produce an equivalent airborne radar system with overland capabilities, and the United States would be under less pressure to provide what the Saudis might regard as a natural complement to the American aircraft). Also, F–1s in place of F–15s or F–16s would reduce the IFF problems of the Israeli Air Force, as the French models are not likely to be deployed by the Israeli side—and to this extent, they would lessen the necessity to pre-empt. Finally, the United States would not be in the position of supplying both sides in any hostilities that did erupt.

Conclusion

The sale of advanced American combat aircraft to Saudi Arabia is tempting for many financial and political benefits that might accompany such a relationship. In the short run, it is obvious that an agreement to sell would enhance our influence with the most important state of the Arabian peninsula. But in the longer-term perspective, such an arrangement might well rebound to the detriment of American interests in the area. It would encourage Saudi Arabia to become a full-fledged confrontation state in the Arab-Israeli conflict, with all the difficulties that such a development would imply. And in the event of another round of hostilities between Israel and the Arabs, Saudi Arabia could very well emerge from a war with a changed attitude toward the United States.

The diplomatic position of the United States may make it impossible for the Carter Administration not to push the sale of F–15s or F–16s to the Saudis. But in this instance, the Congress is in a position to serve the higher interests of the United States, and to do for the Executive branch what it may be unable to do for itself: to stop an arms export agreement that can only lead to another escalation of tensions in the Middle East.

SOCIAL SECURITY BENEFITS OFFSET FOR SPOUSES RECEIVING PUBLIC PENSIONS ARE INEQUITABLE

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mrs. HOLT. Mr. Speaker, I am extremely concerned about the Senate-passed Social Security Amendments of 1977 (H.R. 5322) because of section 123 of the bill. The provisions of this section will reduce social security benefits for spouses and surviving spouses by the amount of any public pension payments, Federal, State, or local based on the spouse's own public employment not covered under social security.

At first blush, the notion of saving $190 million under the Senate bill appears to be one way of reducing social security outlays. But the adverse impact upon about 85,000 people is just now beginning to unfold. While I do not know how the Senate Finance Committee arrived at this estimated number or what the breakdown is for Federal, State and local government workers, I do know from the number of complaints I

have received from my constituents that those most affected are women workers of the Federal service. Since most women Federal employees are in clerical and secretarial jobs, it is a group of GS–5 and lower grades that will be hardest hit as a result of the Senate bill.

Mr. Speaker, let me cite one case. A 60-year woman living in Prince Georges County now works for the District of Columbia government; her husband is on disability retirement. She has continued working because she needs the money, rather than retire from Federal Civil Service. She thought that when she is eligible for social security, her limited pension from the Federal Government, plus her husband's disability pension, and their combined social security benefits will make it possible for them to survive on a modicum of income security. Now, because of section 123 of the Senate-passed bill, she is terrified and frustrated by the bleak outlook of income insecurity ahead.

The social security system was originally designed to provide a supplement to retirement income that is supposed to be built upon other income security arrangements derived from pension plans, personal thrift, savings, investments, and homeownership. It seems that section 123 has just the opposite and destabilizing effect. Let us consider the Federal civil service worker. While working, he or she has no choice but to participate in the civil service retirement program through contributions. In the case of the person working in the private sector or serving in the Armed Forces, he or she has no choice but to pay into social security. However, just because the spouse has to go to work, in this case, for a Federal, State, or local agency, then that spouse—or should that spouse survive a deceased social security beneficiary, the surviving spouse—must forfeit social security entitlement just because of having earned a government pension. This is obviously unfair for a relatively small number of government workers to have to bear the brunt of saving $190 million from the social security trust fund in fiscal year 1979 and yearly thereafter.

Mr. Speaker, I strongly urge the House conferees to reject section 123 of the Senate version of H.R. 5322.

ONE NATION UNDER GOD INDIVISIBLE

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. HANSEN. Mr. Speaker, Christmas is a national holiday—it is a special recognition of the Christian heritage of the Nation, a nation founded by the grace of God guaranteeing both freedom of religion and separation of church and State.

The United States of America is a dream translated into a reality—a dream of individual freedom, of individual opportunity, of individual responsibility, and finally of individual blessings.

This Nation is a composition of people of all races and creeds, a blend of human beings uncommon anywhere else in the world. And yet it seems to have brought this diversity of nationalities together in common purpose and brotherhood so effectively as to stand in stark contrast with the irresolvable differences of their eternally warring native lands.

What is this common bond that causes people to forget their differences and aspire to lofty goals and a national posture of charity and peace? What is the spirit that so unusually raises a whole nation of people above personal greed, fear, and insecurity into self-reliant, confident, productive, and ambitious individuals? The answer is probably best phrased in the inscription on the Statue of Liberty by Emma Lazarus which states—

Give me your tired, your poor, your huddled masses yearning to breathe free . . .

Freedom is the magic of America and God's greatest gift to mankind.

The alternative to freedom is slavery where dreams die, where force replaces love, where doles masquerade as charity, and where human dignity does not exist.

In the book of II Corinthians 3: 17, we are told by Paul: "Where the spirit of the Lord is, there is liberty." Thomas Jefferson, one of the greatest among our Founding Fathers, restated this point so vital to our heritage that the "God who gave us life, gave us liberty."

Thus, we see the message from the cradle 2,000 years ago to the American people today, as we commemorate the most revolutionary and profound event in the history of mankind, is one of freedom—a freedom based on truth and love and lofty principles.

The book of John 8: 32 quotes Jesus Christ, "And ye shall know the truth and the truth shall make you free." And again it is stated in Galatians 5: 1 "Stand fast therefore in the liberty wherewith Christ hath made us free and be not entangled again with the yoke of bondage."

Alexander Hamilton stated:

I am inviolably attached to the essential rights of mankind, and the true interests of society. I consider liberty in a genuine unadulterated sense, as the greatest of terrestrial blessings. I am convinced that the whole human race is entitled to it, and that it can be wrested from no part of them, without the blackest and most aggravated guilt.

The Sacred Rights of Mankind are not to be rummaged for among old parchments or musty records. They are written, as with a sunbeam, in the whole volume of human nature, by the Hand of the Divinity itself, and can never be erased or obscured by moral power.

In his first inaugural address in April 30, 1789, George Washington stated:

No people can be bound to acknowledge and adore the invisible hand, which conducts the Affairs of men more than the People of the United States. Every step, by which they have advanced to the character of an independent nation, seems to have been distinguished by some token of providential agency.

In 1765, the man who was to become the second President of the United States, John Adams, stated:

The people, even to the lowest ranks, have become more attentive to their liberties, more inquisitive about them, and more determined to defend them, than they were ever before known or had occasion to be; innumerable have been the monuments of wit, humor, sense, learning, spirit, patriotism, and heroism, erected in the several colonies and provinces in the course of this year. Our presses have groaned, our pulpits have thundered, our legislatures have resolved, our towns have voted; the crown officers have everywhere trembled, and all their little tools and creatures have been afraid to speak and ashamed to be seen. . . .

Benjamin Franklin in the Second Continental Congress in 1775 said:

I have lived, Sir, a long time, and the longer I live, the more convincing proofs I see of this truth—that God governs in the affairs of men. And if a sparrow cannot fall to the ground without his notice, is it probable that an empire can rise without his aid? We have been assured, Sir, in the sacred writings, that "except the Lord build the House they labour in vain that build it." I firmly believe this; and I also believe that without his concurring aid we shall succeed in this political building no better than the Builders of Babel: We shall be divided by our little partial local interests; our projects will be confounded, and we ourselves shall become a reproach and bye word down to future ages. And what is worse, mankind may hereafter from this unfortunate instance, despair of establishing governments by human wisdom and leave it to chance, war, and conquest. I therefore beg leave to move—that henceforth prayers and imploring the assistance of Heaven, and its blessings on our deliberations be held in this Assembly every morning before we proceed to business . . .

And it might be noted that this tradition continues to this day in both Houses of the Congress of the United States.

So as citizens of this great Nation in celebration of the national holiday for Christmas, let us search deeply in our hearts and in our prayers for the real roots of America that we might better appreciate our heritage and blessings in this greatest of all nations in the march of history.

Thomas Paine perhaps said it best at Christmas in 1776 in the following message written by firelight on a drumhead which Washington was later to read to his troops:

These are the times that try men's souls. The summer soldier and the sunshine patriot will, in this crisis, shrink from the service of his country; but he that stands it now, deserves the love and thanks of man and woman. Tyranny, like hell, is not easily conquered; yet we have this consolation with us, that the harder the conflict, the more glorious the triumph. What we obtain too cheap, we esteem too lightly; it is dearness only that gives every thing its value. Heaven knows how to put a proper price upon its goods; and it would be strange indeed if so celestial an article as freedom should not be highly rated . . .

I turn with the warm ardor of a friend to those who have nobly stood, and are yet determined to stand the matter out: I call not upon a few, but upon all: not on this state or that state, but on every state: up and help us; lay your shoulders to the wheel; better have too much force than too little, when so great an object is at stake. Let it be told to the future world, that in the depth of winter, when nothing but hope and virtue could survive, that the city and the country, alarmed at one common danger, came forth to meet and to repulse it. Say not that thousands are gone, turn out your tens of thousands; throw not the burden of the day upon Providence, but "show your faith by your works," that God may bless you.

MORALITY, AMERICAN FOREIGN POLICY AND SALT II

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. KEMP. Mr. Speaker, many of us involved in our country's defense efforts are alarmed by the attitude of some of the people in the administration that leads them to be more critical of our efforts to defend ourselves than of Soviet efforts to threaten our security. This attitude seems to be producing an arms control policy that sees any new American weapon system as an obstacle to arms control that must be limited or banned, while new Soviet weapon systems and deployments are regarded as subsidiary to the issue.

In the current administration this attitude is more prevalent than ever before, and it has gone so far as to cause the administration to reduce its own standards for judging new arms pacts with Moscow. Only last March a prime aim of the administration in the SALT negotiations was the preservation of our land-based Minuteman missile deterrent. Now the administration concedes that the new SALT agreement will leave our landbased missiles vulnerable to Soviet attack in the early 1980s. This comes not only on top of a willingness to place severe range limits on our cruise missiles at SALT II but also on top of the death of the B–1 bomber. The administration is willing to leave the safety of all Americans in the care of an aged bomber fleet of B–52s and a partially deployed force of missile submarines.

Looking at the matter historically, the SALT agreements have not only helped the Soviet achieve nuclear superiority, they have legalized it. Obviously, there is an attitude among our own negotiators that American weapon systems are a greater threat to peace than Soviet weapon systems. This attitude exists in spite of the fact that it is the Soviets who have built a first-strike missile force capable of destroying our Minuteman deterrent. If the Soviets only wanted to deter, why would they have developed and deployed this capability?

It is hard to see how we can have a successful defense effort when we have to contend with such an attitude in our own ranks. I believe we must begin by becoming aware of this attitude and understanding it. I, therefore, urge the attention of my colleagues to an article published in Modern Age by Dr. Paul Craig Roberts, a distinguished scholar currently with the U.S. Senate staff from the Hoover Institution on War, Revolution and Peace, established by the late President Hoover at Stanford University, which I read into the RECORD at this time.

[From Modern Age, Spring 1977]

MORALITY AND AMERICAN FOREIGN POLICY

(By Paul Craig Roberts)

I

The complaints we hear today about the absence of morality in American foreign policy may be deceptive. A case can be made that there is already more morality in American foreign policy than we can survive. This case has never been presented, and I want to present it for consideration. There is an inconsistency in the modern frame of mind that almost precludes positive interpretations of Western experience. A result is that the considerable demands for progress are expressed in terms of accusations against ourselves. In short, our morality is inverted into a form of self-condemnation. Michael Polanyi has written about how the modern frame of mind has been shaped by an inconsistency in the intellectual foundations of Western civilization, an inconsistency that may work itself out in the destruction of our civilization.[1] The inconsistency stems from the secularization of Christian moral fervor, which produced demands for the moral perfection of society, and from the impact of modern science on our concept of knowledge, which produced a critical philosophical positivism that is sceptical of the reality of moral motives.

The result of the former is a social and political dynamism that is committed to the moral perfection of human society. But the result of the latter is a sceptical sophistication that tends to see morality in terms of high sounding rationales for lowly but truer motives. We are all used to moral motives being unmasked as rationalizations for class and individual interests or explained as expressions of social, economic, psychological or political needs.

This unmasking does not prevent moral expression or demands for progress, but does make it easier for moral expression to take a denunciatory rather than an affirmatory form. A morally affirmatory statement, especially if it is in defense of existing society or its achievements, arouses the suspicion of dishonesty and is subject to being unmasked. It encounters objections both from the advocates of social change, who see it as a defense of the status quo, and from sceptics who look for the real motive that is operating behind the moral guise.

On the other hand, a morally denunciatory statement, especially if it is an accusation against existing society, is seen as an expression of the indignation of the morally honest reformer. In this way moral motives can be asserted backhandedly in praise of social dissenters easier than they can be asserted straightforwardly in praise of society's achievements. Scepticism and moral indignation are complementary in the critique of society. Together they support the social and political dynamism that is committed to achieving progress by remaking society.

The combination of scepticism with moral denunciation has led to many reforms that have humanized Western society and also to outbreaks of revolutionary violence, because the way they combine against existing society preempts its moral defense while at the same time focusing moral indignation against it. In the intellectual world this has made it difficult for affirmative accounts of Western experience, whether in the interpretation of Western history, or in the explanation of social and political reform, or in the defense of an anti-communist foreign policy. Any scholar, intellectual, or student who attempts to establish that good will has been an effective force in Western civilization runs a risk of being dismissed as naive and unscientific or even as intellectually dishonest, because any reform attributed to the efficacy of good will can also be explained in terms, for example, of the triumph of class interests. As would be expected, affirmative interpretations of Western achievements drop out of contention, leaving the field to cynical accounts that further undermine the moral confidence of the West in its past experience and future direction.

The untenability of affirmation has rendered ineffective, and even impossible, any moral defense of the West. Affirmations of Western achievements or institutions are likely to provoke stiff and strident protests against jingoistic justifications of imperialism and neo-colonialism and, at best, to be chided for complacency. This poses a serious problem for the continued existence of Western civilization, but it is not the most serious. The inconsistency in the modern frame of mind presents an even more serious problem. The restraint scepticism places on moral expression means that moral feelings, which have been secularized and given social purpose, have no legitimate positive form of expression. Since moral affirmations receive a sceptical response, moral expressions, have a safe outlet only in accusations of immorality against existing society.

This means, unfortunately, that a society in which this frame of mind is prevalent will express its desire for progress mainly in an attack on itself, and it will rely on self-criticism as its means for achieving progress. At the same time, however, attacks on alternative institutions will tend to be dismissed as defenses of the status quo, and scepticism about the policies and motives of an opposing society will be given short shrift as an expression of jingoism. An attack on an opposing society's practices and motives implies a defense of one's own—and that is taken as indifference to existing evils. Among many intellectuals such an attack will be more effective in eliciting resentment rather than support, because it focuses attention away from the domestic imperfections which are seen as the real barrier to progress.

The further a society is outside the Western framework, the less it will provoke the West's moral indignation. The "double-standard," to which (primarily) conservatives have objected, is merely a reflection of the modern frame of mind. It is only to be expected that within this frame of mind denunciatory rhetoric will rise to new heights over the execution of 5 terrorists in Spain but not over the execution of tens or hundreds of thousands of ordinary people by communists in Cambodia.

We are all by now familiar with the modern alienated intellectual whose alienation amounts to a moral hatred of existing society. He has a passion for moral improvement of his society, but he has worked out the doctrine of doubt to its logical conclusion. Since he cannot find moral motives safe from the suspicion of mere conformity, self-interest or hypocrisy, he can find no safe grounds for moral affirmation. His moral passions, being thus denied legitimate expression, are satisfied by turning his scepticism against his own society. He denounces its institutions and policies as masks for the material profit of vested interests. Michael Polanyi has shown that this inconsistent combination of moral scepticism with moral indignation is held together by their joint attack on society.[2]

Of course, everyone is not equally affected by this frame of mind to the extent that an alienated intellectual is, and all critics of society are not alienated intellectuals. Nevertheless, its impact is pervasive. Today we grow up in this frame of mind in the way we grow up in our language. But whereas the structure of our language has been extensively studied, the structure of our frame of mind has not. That something is amiss has not escaped notice,[3] but the usual appellations of "double-standard," "death-wish," "guilt," etc., are too feeble to give us a handle on our dilemma.

Take a typical American liberal intellectual. His commitment to his society is usually conditional upon institutional and policy changes. Therefore his allegiance at any point in time is weak, because to satisfy his

Footnotes at end of article.

desire for moral honesty he must forever remain an opponent of existing society. His program will not emphasize building on the past achievements and successes of the society, but correcting past failures and righting past wrongs. He will not see his country's gifts of foreign aid as attesting to its moral sense, but the insufficient amount will be evidence of an immoral foreign policy. He will justify foreign nationalization of his fellow citizens' property as a necessary remedy for neo-colonial exploitation. He will not see lack of progress in arms limitations as a reflection on the opponent's intentions but, instead, on his own country's lack of good faith. He will not see a strong defense posture as a justifiable response to an external threat, but as "provocative" and the cause of an arms race. On the domestic scene he will champion the failures as victims of society, and he will explain the successful in terms of ill-gotten gains. He will not even be a Marxist, but just an ordinary member of a verbalist institution.

The fusion of moral scepticism with the demand for moral perfection means that the West's morality becomes imminent in attacks on itself. Readers of the *Washington Post* and *New York Times*, and university students, are all accustomed to the use of moral scepticism to unmask the alleged immorality of existing society. To note this is not to attack the press and the universities, but to observe that this frame of mind is so endemic that the challenge it presents to foreign and defense policies necessary to the survival of the West and to protect its interests must be realized.

The West has relied for so long on a self-critical posture as its means of achieving improvement that it naturally and unthinkingly adopts this stance in its relations with external enemies. I want now to examine recent articles by three distinguished and respected men—George Kennan, George Ball, and Congressman Les Aspin—in order to show the problem posed by the modern frame of mind to the maintenance of a vigilant foreign policy and defense posture.[4] That these reasonable men are far from the purest examples of this frame of mind merely establishes its pervasiveness. At the outset I want to turn aside comments that their articles were written for purposes of self-justification, acquiring visibility in quest of high government office, etc., by observing that to be effective in these ways, the articles must relate to widespread views and be acceptable as intelligent foreign policy and defense comment.

II

In an article about US/USSR foreign relations, George F. Kennan attributes the post-World War II bad relations between the two powers to American mis-perceptions and over-reactions.[5] The mis-perceptions and over-reactions had their origin in President Franklin D. Roosevelt and his associates misleading and manipulating American public opinion about the USSR. As Kennan puts it, "The unreal dream of an intimate and happy postwar collaboration with Russia" which was peddled during the war to large portions of the American public, who "were encouraged to believe that without its successful realization there could be no peaceful and happy future at all,"[6] led to disillusionment and anxiety. The result was an over-reaction that was further intensified by the tendency of military planners to create an adversary:

"In the case at hand, the Russians, being the strongest and the most rhetorically hostile, were the obvious candidates. The adversary must then be credited with the evilest of intentions. . . . In this way not only is there created, for planning purposes, the image of the totally inhuman and totally malevolent adversary, but this image is reconjured daily, year after year, until it takes on every feature of flesh and blood and becomes the daily companion of those who cultivate it, so that any attempt on anyone's part to deny its reality appears as an act of treason or frivolity. Thus the planner's dummy of the Soviet political personality took the place of the real thing as the image on which a great deal of American policy, and of American military effort, came to be based." (p. 682)

The postwar disillusionment, then, fell in "most fatefully, with the emergence of a new pattern of fears and misunderstandings—this time of a military nature." Kennan says we should not have been alarmed by the absence of Soviet demobilization after World War II. It was just a continuation of traditional Russian custom "to maintain in being, even in time of peace, ground forces larger than anyone else could see the necessity for." (p. 680) But since Western military planners are "trained to give greater weight to capabilities than intentions" Western strategists are inclined "to chronic overrating of the adversary's capabilities," the "result, of course, was increased anxiety," which led to more American mis-perception and overreaction. (p. 681)

The development by the Russians of a nuclear weapon capability, which further militarized "American thinking about the problem of relations with Russia," was also our fault. Stalin sanctioned the development of a nuclear weapon capability because "others were doing so,"[7] but "he probably would have been quite happy to see it removed entirely from national arsenals, including his own, if this could be done without the acceptance of awkward forms of international inspection." (p. 681) Stalin, who was "entirely rational in his external policies," never allocated to nuclear weapons "anything resembling a primary role in political-strategic concepts." (p. 681) The reason Soviet doctrine today emphasizes the primacy of surprise nuclear attack is because Stalin's "successors were eventually forced into a somewhat different view of the weapon" by "Western powers, committed from the start to the first use of the weapon in any major encounter, whether or not it was used against them." (p. 681) The West couldn't see that it was the cause of all the problem, because "once again, the interest in capabilities triumphed over any evidence concerning intentions." (p. 681)

"Nor does this exhaust the list of those forces which, in the aftermath of World War II, impelled large portions of influential American opinion about Russia into a new, highly militaristic, and only partly realistic mold." (p. 682) I will not go through the rest of Kennan's list, which consists of various misreadings of events "by the official Washington establishment" as a result of their "exaggerated image of the menacing Kremlin, thirsting and plotting for world domination" and the tendency of American politicians to show "bristling vigilance in the face of a supposed external danger." (p. 683) The message of it all is that the U.S. is responsible for the cold war for taking seriously declared Soviet intentions: "It was out of such ingredients that there emerged, in the late 1940's and early 1950's, those attitudes in American opinion that came to be associated with the term 'cold war.'" (p. 682)

Having mistaken hostile rhetoric and military capability for hostile intentions, and having allowed Soviet behavior "to feed and sustain" our "distorted image of Soviet Russia," Kennan believes we proceeded to provoke the Soviet blockade of Berlin by undertaking the Marshall Plan, preparations for a West Germany government and making the first moves toward establishing NATO. According to Kennan, we then provoked the Soviets into starting the Korean War by establishing a permanent military presence in Japan. We then misread the significance of Stalin's death and proceeded to bring down Khruschev, who "was intensely human" in spite of "his occasional brutalities," by trying to achieve superiority in preparation for an inevitable future military encounter "for which there was no logical reason at all," and by letting "the interests of the gathering of military intelligence . . . be given precedence over the possibilities for diplomatic communication." (p. 685) The result was the U–2 plane incident, which shattered Khrushchev's "ascendancy over the Soviet military establishment" and may have forced him into putting missiles in Cuba "as a last desperate gamble on his part with a view to restoring his waning authority." (p. 685)

Kennan believes we are also guilty of letting the Soviet response to the 1956 Hungarian and 1968 Czechoslovakian revolutions get in the way of better US/USSR relations. Once again we failed to understand. This time a great many Americans displayed an apparent inability "to understand that the Soviet hegemony over Eastern Europe, established by force of arms in the final phases of the war and tacitly accepted by this country, was a seriously intended arrangement that the Soviet leadership proposed to maintain, if necessary, by the same means with which they had acquired it." (p. 685)

In Kennan's view we are likewise responsible for the demise of detente. Soviet culpability for the 1973 Arab-Israeli war and for Angola played no part, but it allowed "some people on the American side" to use the impression that the Soviets had violated at least the spirit of earlier understandings "to justify the very clear changes that did occur in American policy." (p. 687) Kennan places the question of any Soviet responsibility for the demise of detente as outside "the limits of this examination," and, indeed, the question is irrelevant to Kennan's frame of mind, because detente was doomed by the Americans regardless of any Soviet responsibility: "The pressures against detente had never been absent in Washington." (p. 687)

Once again an American President overdramatized US/USSR relations and bred false hopes, which led to disillusionment. This played into the hands of the Pentagon, which refused both any further SALT concessions and the unilateral suspension of weapons program development. We failed to understand that the Russians' "rhetorical and political stance of principled revolutionary Marxism" was "designed to protect them from charges by the Chinese Communists that they were betraying the cause of Leninism-Marxism." (p. 687) "The Jackson-Vanik Amendment, and the subsequent demise of the trade pact, dealt a bitter blow to any hopes" for better Soviet-American relations. (p. 688)

If things are to improve, "American statesmanship will have to overcome some of the traits that have handicapped it in the past." (p. 689) We must overcome our subjectivity. We must control "the compulsion of the military-industrial complex." We must exercise unilateral restraint in the weapons race. We must see Soviet power as a natural accouterment of a great power and not as a military capability consciously acquired at great cost for the purpose of aggression. We must understand that the Soviet arms buildup reflects the Russian character and not Communist intentions. And "American politicians will have to learn to resist the urge to exploit, as a target for rhetorical demon-

strations of belligerent vigilance, the image of a formidable external rival in world affairs." (p. 698) Time is running out, Kennan concludes, and that is our fault too.

All of this is sufficiently familiar that the reader knows I have not overdrawn the picture. I have not summarized Kennan's article in order to rebut it. My concern is not with Kennan, but with the structure of a frame of mind and the challenge it presents to American foreign policy. Kennan's article does not convey the strident tone of moral denunciation of American foreign policy that similar accounts do. Nevertheless his scepticism is turned only against his own society. He expresses his desire for a better situation solely through his catalogue of American shortcomings, and he relies solely on criticisms of America to produce a better trend in US/USSR relations.

Simultaneously, he dismisses declared Soviet intentions with a claim that the obvious ideological hostility asserts "itself more as a rhetorical exercise than as a guide to policy." (p. 673). If Kennan believes this, one might imagine that he would criticize the Soviets for doing so much damage with meaningless rhetoric and ask them to drop it. Instead, threatening "Soviet rhetoric and Soviet behavior" are made into an American failure for allowing them "to feed and sustain the distorted image of Soviet Russia." (p. 683) The exaggerated reaction of the U.S. to intentions declared by the Soviet Union constituted "at all times a complication of the Soviet-American relationship." (p. 673) It is we who are responsible for the negative effect on international affairs of hostile Soviet statements and behavior. Kennan's account explains away any Soviet responsibility, right down to their rhetoric which is attributed to the necessity of fending off Chinese ideological attacks. Kennan's indignation is reserved for only his own country. His catalogue of alleged American failures even makes us responsible for the Cuban missile crisis.

The fact that Kennan suspends his scepticism in regard to the motives of the Soviets reflects the limitation of the critical attitude in the West to condemnation of one's own society. I am not suggesting that criticism of one's own society is unpatriotic or that mistakes (when they actually occur) should not be acknowledged as a way of doing better. That is not, however, Kennan's message. The thrust of his article is that America is at fault for acknowledging the existence of an enemy and preparing to resist him. The challenge this frame of mind presents to our foreign policy is formidable.

George W. Ball, in a stinging criticism of American diplomacy in the Middle East, also suspends his skepticism in regard to the motives of the Soviets and subjects only our own foreign policy to condemnation.[8] In his criticism he assumes that the Soviets desire peace and stability in the Middle East, and he does not even criticize the Soviets for complicity in the 1973 Arab-Israeli war. Instead, he gives them credit for the cease-fire, which was "negotiated under pressure from the Soviet Union." (p. 42) He blames the terrible situation that he sees in the Middle East today on the U.S. for turning its "back on a serious effort to solve the problem." (p. 44) The U.S. exploited "Sadat's strong desire for peace merely in order to separate Egypt from the rest of the Arab world." (p. 44) The U.S. forced Assad of Syria, who "would have preferred an overall settlement that would enable him to concentrate on the peaceful development of his country," instead to "accept increasing Soviet domination as the price of keeping pace with Israeli armaments." (p. 43) The United States also "exhausted the Israeli tolerance for further compromise." (p. 46) Even Kissinger's success in separating the hostile forces is turned into an American failure because "by rigorously excluding the Soviet Union from any part in the negotiations, we reduced Moscow to a humiliating position." (pp. 42–43)

Mr. Ball expresses confidence in the Soviet Union, while he impugns the motives of Kissinger's diplomacy. Instead of working for a final settlement, Kissinger used diplomacy to fulfill "his elemental need for power and glory." (p. 41) Mr. Ball does not find the Soviet role in the 1973 Arab-Israeli war hurtful to detente. The damage to detente was done by Kissinger who, even though he "was publicly committed to detente, saw advantages in excluding the Soviet Union from participating in the negotiations, thus preventing Moscow from gaining a more solid foothold in the area." (p. 44) In other words, the American Secretary of State is not attacked for allowing Soviet successes, but for preventing them.

My purpose is not to defend Kissinger's diplomacy or to attack Mr. Ball, but to call attention to how our frame of mind undermines our own confidence while protecting our opponents from our criticism. Since we are always the focus of our criticism, the very concept of an external enemy is receding. This poses a difficulty to the maintenance of a strong defense posture.

The same self-criticism that diminishes the Soviet threat finds the real threat in our own defense budget. Congressman Les Aspin, a member of the House Armed Services Committee, warns us that "we must learn to see the dangers where they are, not where they are not."[9] Aspin thinks that the main threat to peace is the Pentagon's "we want more" doctrine, which produces an arms race.[10] In other words, the threat is in the Pentagon, not in the Kremlin.

Aspin uses the press to continually challenge the Pentagon's effort to disclose the Soviet military buildup.[11] In place of a Soviet threat, Aspin sees the Pentagon's "stripped down version of reality."[12] His use of information to down play the Soviet threat has caused General Daniel Graham, former head of the Defense Intelligence Agency, to call him a prestidigitator. Since I believe the problem is a frame of mind and not personalities, it is not for the purpose of taking sides that I give one more example of that point of view which is adept at turning facts inside out in order to apply a critical scepticism only to the United States.

In June 1976 Aspin released a report that in the past ten years the United States has built 48 nuclear-powered attack submarines and the Soviets have built only 42. Aspin said these figures "are further evidence that the 'Russians are coming' claims have been grossly exaggerated." This is the way Aspin chose to describe the fact that the Soviets have switched their submarine production capability from attack submarines where their advantage over us is 3 to 1 nuclear missile submarines where their advantage over us is less.

The structure of this frame of mind causes cynicism to be suspended in regard to the motives of foreign opponents. By focusing scepticism only inward, it undermines the self-belief and will of Western civilization and disarms it morally.

III

The communists do not share our dilemma. In their doctrine the morality of Marxism is immanent in its historical inevitability. Marxism does not rely on self-scepticism as a means of achieving progress. The destruction of the West by Soviet communism poses no moral dilemma to them, because they see it as the inevitable consequence of historical progression. However, our own defense poses a considerable moral dilemma to us because of the frame of mind I have analyzed. In any realistic assessment of the strategic balance, this disadvantage must be included.

[2] *Ibid.*

[3] ". . . we tend to blame ourselves for everything that goes wrong in the world, and to assume that other nations share our good intentions, and will follow our good example. We take pride in self-flagellation, and seize every opportunity for excusing or ignoring the faults and shortcomings of others." (Eugene V. Rostow, "The Safety of the Republic," *Strategic Review*, Spring 1976, p. 14).

[4] I am not suggesting that Kennan, Ball, and Aspin are alienated intellectuals. All idealists are not alienated intellectuals, although the frustrations they encounter tend to move them in that direction. But the frame of mind that Polanyi analyzes is independent of the dispositions of individuals. It is a paradigm that, to a greater or lesser extent, we all live in mentally, and some live in it emotionally as well.

[6] Curiously, Kennan's article perpetuates the same unreal dream and the same encouragement that he criticizes.

[7] In his review in the 8 August 1976 *Washington Post* of *Energy and Conflict: The Life and Times of Edward Teller* by Stanley Blumberg and Gwinn Owens, Colin Norman states that the authors have "convincing evidence that the Soviet Union actually led the race to develop the hydrogen bomb," testing both the first thermonuclear device and the first deliverable hydrogen bomb ahead of the U.S. "Astonishingly, the Department of Defense seems to have kept knowledge of the Soviet tests from the Atomic Energy Commission, and even Teller and his team were not informed."

[8] George W. Ball, "Kissinger's Paper Peace," *Atlantic*, February, 1976.

[9] Les Aspin, "How Much is Enough?," *The Center Magazine*, March-April, 1976.

[10] "It seems that whatever strategic doctrine happens to be enunciated by the existing Secretary of Defense, the Armed Services have always recognized only one doctrine, the same one that Samuel Gompers had for labor unions, 'We want more.'" *Ibid.*

[11] Aspin's efforts have earned him *Pravdas'* appreciative recognition: "L. Aspin, a member of the House of Representatives, came out in the U.S. Congress with a detailed critical analysis of the methods being used by the Pentagon and the CIA in their desire to prove what cannot be proved—that the military spending of the USSR is greater than the U.S. military expenditure. He then published a special article on this topic in the weekly *Foreign Policy*. A number of other members of both houses of the U.S. Congress also criticized the CIA and the Pentagon in this connection." *Pravda* contrasts Aspin with "the so-called big press of the United States," which gives "over the front pages to the slanderous fabrications of the Pentagon and the CIA." (K. Georgiyev, "Who is Whipping up the Arms Race?," *Pravda*, August 4, 1976).

THE BREADBASKET, ENERGY AND THE ENVIRONMENT

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. HANSEN. Mr. Speaker, 1977 has been a busy and controversial year in terms of agricultural programs and national policies concerning land, water, and energy. Considerable progress has been made but many challenges remain for 1978. Most significant of the national decisions and controversies which have special impact on my own State and congressional district are the issues described in the following articles.

CLINCH RIVER VETO—THE OSTRICH APPROACH

President Carter's veto of the Clinch River breeder reactor is a "symbolic gesture" that is years out of date. This closed-minded approach to America's energy needs could be disastrous to the Nation in the years to come.

This is like an ostrich burying his head in the sand because the President is ignoring the advancements made by the rest of the world. The increasing demand for new sources of energy has already forced other nations to proceed with the development of breeder reactors while the United States lags behind.

During the debates in Congress over the future of Clinch River, it was pointed out that the French are building a large breeder reactor in conjunction with the West Germans and Italians. The British have an even larger one on the drawing boards, while the Russians built a working fast breeder reactor years ago. Such a retarding approach to energy development as the Carter veto is not practical and will only force America to become even more dependent on foreign oil.

The continued research and development of breeder reactors, which produce more fuel than they consume, is vital to America's security. To say we will curtail our reactor development while the rest of the world proceeds, is indeed a dangerous and foolish fuel and foreign policy. Hopefully the Congress will finally prevail.

IRATE FARMERS AND THE 160-ACRE LIMITATION

A high priority in the next session of the 95th Congress will be legislation dealing with the proposed controversial regulations affecting the distribution of water from Bureau of Reclamation projects.

This issue has come to the forefront recently by court order and supporting Interior Department recommendations for very rigid new rates governing these procedures which have many farmers up in arms.

The Federal reclamation program grew out of efforts to distribute the vast public domain, beginning soon after the American Revolution. The initial proposals ranging from designated parcels of 100 acres to 5,760 acres.

The 160 concept was first formally adopted by Congress in the Preemption Act of 1841 and has basically been followed in all succeeding acts of Congress. The choice of this size parcel was at best arbitrary and certainly is in need of review based on modern farming techniques. In the words of Leo M. Krulitz, Solicitor of the Department of the Interior:

> Given advances in agricultural technology, it would be accidental if the 160-acre limitation imposed in 1902 was the "right" number today.

What has come to be a key question is what constitutes a family farm for the highly mechanized agriculture of 1977, as compared to the horse-and-plow days of 1902.

I sponsored legislation in the 94th Congress (H.R. 13101) and the 95th Congress (H.R. 1604) which would have created a variable acreage limit based upon, among other things the climate and growing season thus allowing an expanded land use base in States such as Idaho. Within the past month I also sponsored legislation (H.R. 9707) which would require a moratorium on implementation of current proposals for a year—until Jan. 1, 1979. This bill is currently in the Water and Power Subcommittee of the Interior Committee and scheduled for early consideration.

The Department of the Interior recently held public hearings regarding these regulations and the House Interior Committee will hold field hearings in January 1978—January 3, Spokane; January 4, Denver; January 5, Fresno; January 6, Palm Springs. I would encourage all who can attend one of the January meetings to do so, but if this is not possible, please contact my office and I will be pleased to take your prepared statement and have it entered into the hearing record just as if you had attended.

I will be working closely with other western Members of Congress in developing a responsible solution to this problem, which could have such devastating impact on farm operations and farm communities in general.

ORAL AUCTION FOR TIMBER STILL NEEDED

The House will consider early next year legislation aimed at protecting the stability of communities dependent on national forest timber for their economic base. The measure, already approved by the Senate, directs the Forest Service to use oral auction for timber sales in areas where that has been the traditional method over the years. The Forest Service has modified its regulations so that 75 percent of sales can be handled by oral auction, but that still leaves timber-dependent communities in a position of being threatened by the loss of log supply. Sealed bidding simply does not give local timber companies the opportunity to meet higher outside bids, as can be done at oral auction.

SUGAR—A SWEETER PRICE FOR FARMERS

The American farmer has won a key battle against the Latin American sugar lobby.

The White House acting under orders from Congress has finally announced duties on imported sugar—a move which has long been needed to save the domestic sugar industry.

This reluctant change in administration policy to protect U.S. producers and processors from excessive imports and depressed prices was forced on President Carter in November by a privileged resolution I introduced in the House and which was cosponsored in the Senate by Senator ROBERT DOLE, Republican of Kansas and others.

Congress rebuffed the President in September by including sugar in farm price support legislation, which set the stage for the big battle which was then won in negotiations with the administration when they agreed to voluntarily impose import curbs in lieu of the mandatory action my bill would have imposed.

My resolution would have forced President Carter to adopt import quotas recommended by the U.S. International Trade Commission which he earlier rejected.

The heavy grip of the Latin lobby on the U.S. economy which has been so obvious in pushing for more sugar imports, giveaway of the Panama Canal, and renewed trade relations with Cuba has been weakened by this concession, and it is a long overdue victory for American agriculture.

GRAZING FEES—AN OLD BEEF

After extensive hearings and public comment to develop reasonable grazing fee rate formulation as mandated by Congress, the recommendations recently released by the Departments of Interior and Agriculture were really the same old thing.

I joined with other Western Congressmen in sponsoring H.R. 9757 on October 26 which would keep the current rates in force 1 more year and hopefully allow Congress to correct the bureaucratic shortsight. This bill was given quick favorable passage by the House Interior Committee November 29 and is now awaiting full House action.

RARE II—THE ARGUMENT SIZZLES

Rare II is a review of roadless areas in the national forest for possible inclusion in the wilderness system. The Forest Service has stated this exercise consists of an inventory phase, a two-tiered evaluation phase, and a recommendation phase. The inventory phase with its 227 workshops last summer and the initial evaluation is just being concluded. The additional costs, economic, social, considerations will be reviewed this winter. In May or June of next year a draft environmental statement will be published on the findings. The final recommendations to Congress are expected in a final environmental statement late in 1978 or early 1979. Public comment will be allowed and encouraged in the various States.

This entire process has been conducted under recent more liberal wilderness criteria initiated by the new administration thus requiring inclusion of large acreages excluded from previous inventories.

This exercise is billed as a method of "rounding out the National Wilderness System" however, it may have the effect of putting a straitjacket on the already-limited resources of our Nation. Although the Department has stated this is simply a method for arriving at the recommendations for wilderness, experience should have taught us to be skeptical of assurances from the bureaucracy that they are protecting us.

FARMERS TAKE A LICKING BY FOOD STAMP

The 1977 farm bill is a violation of truth in labeling. I voted against final passage of the House-Senate conference report because this legislation is basically welfare oriented with farmers getting the scraps.

However I did support several amendments to strengthen farm income that passed during consideration of this legislation which will hopefully provide some immediate relief to beleaguered farmers. The general loss of freedom to farmers and the outlandish provisions for food stamps spending made it impossible to support the bill on final passage.

Sections beneficial and essential to the farming community at the same time provided many of the old familiar pitfalls of the past. Target prices high enough to help hard-pressed farmers are also high enough to make others overproduce, and acreage allotments to be administered by the Secretary of Agriculture may be handled in the wrong way. It will take extremely able administration to prevent prolonged buildup of surpluses as happened during the 1960's in the Government-administered market provided in this bill.

While this is titled a farm bill it could and should be considered a welfare bill. Estimates are that the food stamp title of the bill—only one of eight titles—would require approximately 75 percent of the total cost of the bill.

Several sections important to Idaho agriculture contain price protections for major crops such as wheat, corn, barley, oats, sugar beets, wool, and other commodities provided to offset the disastrously low prices farmers have been receiving.

WATER POLICY—STATE RIGHTS AND FEDERAL WRONGS

The National Water Policy Review Commission concluded public comment on recommendations to be sent to the President early next year regarding national water policy. As I stated in testimony to the Commission, this is a blatant attempt to usurp another long standing State prerogative.

"Selling water to the highest bidder," and "interbasin transfers and regional plans," were part of the proposals appearing in the Federal Register. They cannot be tolerated.

The overriding assumption of the water resource policy study is that there is not now a Federal water policy and yet legislative and legal history do not sanction Federal control of water. Rights to use water have traditionally been acquired and exercised under State law.

Fortunately, the proposals of the NWPRC ultimately require congressional approval before they can be implemented. This fight is not over and the Western States must continue to make it crystal clear to the administration that we will not roll over and play dead while the Federal bureaucrats confiscate our water.

EAST-WEST TRADE

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. FRENZEL. Mr. Speaker, on November 10, Deputy Assistant Secretary for East-West Trade, Alan A. Reich of the Department of Commerce, delivered the following speech at the World Trade Center in Baltimore. Secretary Reich heads the East-West trade operation at the Department of Commerce and is particularly sensitive to the problems and myths that inhibit greater development of our international trade.

I invite the attention of each Member to his fine speech.

IT IS GOOD FOR AMERICA

(By Alan A. Reich)

It is a pleasure to be with you at this conference on East-West trade and to help inaugurate this magnificant new trade center. It is fitting that we meet in Baltimore. I notice that from this building we can see Fort McHenry, whse "star-spangled banner" in 1814 inspired our national anthem.

I was interested to note two weeks ago that Romania, which figures prominently in today's program, had adopted its own "new" national anthem—actually a very old one resurrected—whose words honor the symbolism of the Romanian tricolor flag and the history of the brave Romanian people.

I wonder how many of you realize our American anthem has origins which lie as much in the tradition of enterprising international trade, including East-West trade, as in the heroics of the siege of Fort McHenry and the Battle of Baltimore. For Baltimore, which today is enjoying a resurgent position among the major ports of the eastern seaboard, already in the early history of our nation was one of America's leading ports.

In the early 19th century, Baltimore clipper ships not only were pioneering in East-West trade, but because of their swiftness and maneuverability often succeeded in outrunning British men-of-war. This success did not escape the notice of the leader of the British expeditionary force, who happened to be an Admiral, whose troops in 1814 were busy sacking Washington. Following the unfortunate events in the nation's capital, the British commandant proceeded to Baltimore for his next engagement, though there was no military purpose in his venture. Rather he wished to conduct a punitive operation which would teach those Baltimoreans and their clipper ships a lesson. Unfortunately for the British, the expedition resulted not only in the successful resistance at Fort McHenry, but in a military defeat on land only a few miles from where we meet today.

I recount this episode lest there be any doubt that Baltimore was, and is, a trading city of major commercial and historical importance. And if you don't believe me, you have only to look out the window at the bustling activity below, or at least it was bustling until recently!

I would like to commend the East-West Trade Council and our distinguished Baltimore hosts for organizing this meeting. The East-West Trade Council could almost be described as the "conscience" of East-West trade in this country. Under the indefatigable and skillful leadership of Max Berry, the Council, since its founding in 1973, has provided leadership in the American business and academic communities in support of East-West trade expansion.

The non-governmental sector, including those of you present today, of American society provides, after all, the dynamism and ongoing commitment to international commerce. We all recognize that government is not the most agile or effective organization when it comes to the business of promoting commerce. In the non-government sector there are far fewer limitations and far more opportunities for imaginative efforts free of bureaucratic constraints. You bring to bear the managerial skills, knowledge and talents of the private sector to resolve the myriad problems still surrounding East-West trade. We in government need your advice and support, and we welcome it.

The term East-West trade incidentally is often misunderstood. To many Americans East-West trade is trade between the United States and the Soviet Union. In fact it is much more than that. East-West trade includes the exchanges of goods and services between more than a dozen industrialized western countries and the communist countries of the world. This trade amounted to more than $54 billion last year. Despite our limited and relatively recent entry into East-West trade, the U.S. has already received significant benefits from it. In the last two years the U.S. exported $6.7 billion worth of goods to the communist countries, achieving a $4.7 billion surplus in the process. Over the long term, we expect U.S. trade with the communist countries to grow. Indeed, just last week, to take one example, the Joint American-Romanian Economic Commission concluded its session on a most positive note, predicting that U.S.-Romanian bilateral trade—currently running at about $550 million a year, would approach the $1 billion level by 1980.

While it is true that East-West trade embraces numerous countries of the East, our trade with the Soviet Union holds a preeminent place in this overall relationship, accounting for more than half of U.S. trade with the east and influencing the remainder. I should like, therefore, to limit my remarks today to trade between the United States and the Soviet Union.

When I became Director of the Bureau of East-West trade in June, I set as a priority goal increasing public understanding of the issues in trade with communist countries. For that reason I particularly welcome this conference sponsored by the Council which furthers this process.

My theme today is that trade with the Soviet Union is good for America. I shall explain why such trade is good for our nation, comment on the problems—both real and apparent—explore with you some of the opportunities in U.S.-Soviet trade, and conclude with suggestions for action.

ADVANTAGES OF UNITED STATES-SOVIET TRADE

There are three basic reasons why nonstrategic trade with the Soviet Union bene-

fits this country: (1) it is good business; (2) it is good for our economy; (3) and it furthers mutual understanding and respect between the Russian and American peoples. (By "non-strategic" trade I mean the sale of goods and technology which, in the hands of a potential adversary, would not jeopardize our national security.)

Proof that it is good business is that several hundred American firms already have profited from doing business with the Soviet Union. They include many of our largest corporations as well as smaller companies. They are not charitable organizations. They enter into business deals because they foresee the opportunity to make a profit.

The second reason for non-strategic trade between the U.S. and the U.S.S.R. is that it benefits the U.S. economy. This trade provides jobs and improves our balance of payments. Last year alone, the United States had a favorable trade balance with the U.S.S.R. exceeding $2 billion. We also benefits from the return flow of needed raw materials, including scarce metals and energy products.

The third advantage of U.S.-Soviet trade is its contribution to the climate for relations between our two countries. The American people may well be ahead of their government in appreciation of this contribution. They believe that expanded U.S. trade with the U.S.S.R. would be a good thing. A recent attitudinal survey, for example, showed that 66 percent of the American people favor expanding trade with the Soviet Union. Moreover, by a three-to-one majority, they want trade with the U.S.S.R. which does not discriminate through tariff barriers and other trade restrictions. It seems to me, in addition to the recognition of the economic benefits, there is an underlying feeling among the American people that active commerce contributes to more peaceful relations.

TRADE AND OVERALL UNITED STATES-U.S.S.R. RELATIONS

Person-to-person contacts developed in trade relations further mutual understanding between Americans and Russians. The exposure of Soviet officials through these business encounters to the values, beliefs, and perceptions of Americans helps overcome suspicion and reduces the chance of miscalculation. The more of us who know more of them and vice-versa, the better. We may not agree, but we will understand better where and why we disagree. Overcoming myths and false stereotypes about one another will enhance the likelihood of working out more rational solutions to problems.

These interactions between Americans and midlevel officials, many of whom will assume important leadership positions in the future, will help ensure that they have a more accurate view of the United States. Moreover, this exposure fosters appreciation of western management approaches characterized by rational decision-making, team effort, and open communications—all of which can lead to reduced rigidity and receptivity to new ideas.

The more deeply and intricately involved in world economic matters the communist nations become, the greater will be their stake in developing a stable international economic system. This is in our national interest because attitudes of tension and confrontation only mean trouble for the United States. Moreover, such involvement will help strengthen the hand of those within the Soviet system who have a stake in interdependent economic relationships with the rest of the world. It will foster more responsible participation in efforts to solve global problems through constructive, cooperative dialogue.

Because commercial relations lead to tangible and visible results, they can serve as a constructive model in other areas of the U.S.-Soviet relationship. Above all they demonstrate to all that persistence and patience can lead to beneficial results. Moreover, it is essential that both Soviets and Americans realize trade is mutually beneficial and that therefore both sides gain from facilitating it.

While these elements of our relationship with the Soviet Union are not measurable with any precision, common sense dictates they be developed and strengthened. We could lose much by not trying. As President Carter stated recently in a message to the U.S.-U.S.S.R. Trade and Economic Council Meeting in Washington, ". . . bringing together businessmen from both countries for discussions on ways to expand economic, industrial, and technical cooperation is important not only for its positive impact on the American and Soviet economies, but also because the expansion of bilateral trade helps maintain and strengthen the fabric of world peace." In addition, in his July speech in Charleston, President Carter urged identification and development of overlapping interests which are mutually beneficial, such as trade. The President spoke out in favor of expanded U.S.-Soviet commerce.

PROBLEMS IN UNITED STATES-SOVIET TRADE

The advantages of trade with the Soviet Union should not mask the fact that there are problems. These problems are of two kinds. Some are real; others are not. I believe it is important to distinguish between them. First, I shall describe what I consider to be several real problems in our trading relationship—problems which, nevertheless, can be overcome. Perspective is called for in viewing them, and we should recognize we already have overcome problems more severe than those which we now face. It was only with considerable difficulty that we have expanded our bilateral trade from $220 million in 1971 to $2½ billion last year.

The first major problem in U.S.-Soviet trade is the difficulty of meshing the Soviet centrally planned non-market economy with our own market economy. Foreign trade in communist countries is conducted by central government ministries through specialized foreign trade organizations. Sales potential depends generally on priorities set by the government—and not on market forces. Because of the different practices and structures, western businessmen encounted many frustrations in the communist countries.

While much progress has been made, there is a continuing need to develop mechanisms and methods which will enable the systems and individuals concerned to work together more effectively. Government on both sides must, as a matter of conscious policy, further this process by identifying and removing impediments to active commerce.

The second real problem is that the United States has been a late entrant in East-West trade. Western European countries and Japan entered this market long before we did, and we continue to lag behind. The businessmen of those nations have established personal relationships with their counterparts in Communist countries, thereby increasing their competitive advantage. Many American businessmen have said to me they only want to be allowed to compete on an equal basis. Our hesitation has cost us a great deal. The United States' share of western manufactured goods exports to the world as a whole is about 20%. However, largely because of our delayed entry into East-West trade, our share of western manufactured goods exports to the Soviet Union and Eastern Europe is less than one-fourth that—4.7 percent in 1976.

A third real problem is the imbalance in U.S.-Soviet trade reflected in the Soviet debt to the West, now estimated to have reached about $14 billion. Western bankers and government analysts do not consider the present size of the Soviet debt a major problem. However, they do see it as a fundamental limitation which must be addressed and corrected over the long term. At some point, U.S.-Soviet trade must become more balanced. The Communist countries must earn enough hard currency to finance their own imports from the West.

This leads to the next problem—current limitations on Soviet export capabilities. The Soviet economy is stretched so taut that it often is hard pressed to furnish products for export. The Soviet Union is a vast storehouse of material resources, waiting to be tapped, but many are located in remote areas and their development will take time and large investment.

A related problem is the western unwillingness to export from the eastern countries. To the extent that their imports consist of raw materials, problems will be minimal. However, manufactured goods offered for export often face style, quality, packaging, spare parts and servicing difficulties in western markets. These manufactured goods imports will have difficulty competing against domestic western production and the products of the less developed countries. In view of rising protectionism, many foresee that imports from the communist countries could encounter even more significant barriers.

Last, but by no means least in the list of problems, is America's inability to offer official export credits and non-discriminatory tariff treatment to the U.S.S.R. and some other communist countries. The inability to grant these normal trading privileges stems from U.S. legislation which I believe is based on misperception which I will discuss later.

Thus, there are real problems to be recognized and dealt with in expanding trade between the U.S. and the U.S.S.R. We must work cooperatively and imaginatively on new projects and mechanisms to bring our trade more into balance. We must pursue mutual opportunities more vigorously and exploit them jointly. We must look beyond the immediate and explore the long-range possibilities for commercial complementarity.

One possibility we should consider is a joint effort to increase total world energy supplies through the joint development of Soviet energy. New large-scale, cooperative projects must be considered. Another possibility worth exploring is greater cooperation in utilization of industrial research. Reverse technology flow—from the U.S.S.R. to the United States—is an area in which the Soviets have much to contribute. In addition we must work to adapt western import protection systems to give more equitable treatment to imports from non-market economies.

SOME MYTHS ABOUT UNITED STATES-SOVIET TRADE

There are also misperceptions about United States trade which must be corrected. Because the American people have an intensive interest in the subject, and because of the high stakes involved—both economic and political—these misperceptions must be understood.

One misperception involves the level of importance the Soviets attach to trade with the United States, and the degree of economic "pain" they suffer from being denied "most-favored-nation" status.

Repeated studies show that granting so-called "most-favored-nation" status to the Soviets would have a very small effect on increasing their exports to the United States—perhaps $20–$30 million a year in the Soviets' current situation. While some think MFN treatment is psychologically and politically very important to the Soviets, it is not very important from an economic point of view.

Furthermore, the Soviet economy would hardly be in trouble if its trade with the United States were to disappear completely. The fact is that foreign trade—especially trade with the United States—is a very small factor to the Soviet economy, which is self-sufficient in most respects. Their total imports from the West amount to only 1½ percent of the Soviet national product and their imports of manufactured goods from the United States last year were only about 8/100 of one percent of their GNP. Only 3.5 percent of their total imports of manufactured goods from the world came from the United States. Clearly the Soviet Union does not depend heavily for economic survival on trade with the West as a whole, much less with the United States.

Provisions in the Trade Act and the Export-Import Bank Bill restricting credit to the Soviets also mirrored, at least in part, public concern that the United States was going to subsidize the Soviet Union with billions of dollars of cheap export credits. I don't think there ever was a real possibility of this happening. Again, there was misunderstanding. U.S. government-backed credits are very limited in volume and their terms are always close to the going world market rates.

Another misconception about U.S.-Soviet trade surrounded the large Soviet grain purchases of the early 1970's. Not only were the Soviets blamed for driving up the price of American bread—despite the fact that larger export sales are made to other buyers—but some Americans gained the impression that the Soviet Union was desperate for our grain and that we could induce change in the communist system by withholding it. In fact, the Soviet Union normally produces twice as much wheat as the United States, and in the 1971–74 period, U.S. exports to the Soviet Union of grains amounted to less than 4 percent of Soviet production. While curtailing grain trade with the Soviets might cause them some rather serious short-term difficulties, they could both tighten their belts and turn to other sources, such as Canada, Australia or France; the American farmer would lose a major export market.

Perhaps the most serious myth surrounding this trade relationship is the notion that we sent strategic technology to the Soviet Union. It should be made very clear that exports to the communist countries of strategic items, and technology with strategic potential, are controlled by the U.S. and other western governments. Each application for an export license is screened painstakingly by the federal government before a license is issued. In compliance with the Export Administration Act, any export that would make a significant contribution to the military potential of a communist country is barred.

SALES OPPORTUNITIES IN THE U.S.S.R.

Many American businessmen want to do business with the Soviet Union. If we make it difficult for the communist countries to buy non-strategic goods from us they will buy from our western competitors who market almost identical equipment in most cases and are eager to sell it. Thus the Soviet buyers will obtain the goods anyway. Again, the consequence of our refusal to sell would be the loss of U.S. export opportunities to other western countries.

Regrettably, many Americans still assume that trade with communist countries is a one-way street with all the benefits going away from us and towards them. This simply is not true. As I have pointed out, American companies engage in trade with other countries—not as a favor to them—but because trade benefits these American companies. As long as we carefully monitor our exports to communist countries to assure that we do not enhance their military capability, we can obtain substantial benefits.

There are opportunities in U.S.-Soviet trade, as there are in East-West trade generally. In recent years, the growth rate of trade *between* the market and non-market economies has been greater than the growth *within* either of these two major world economic groupings. I believe it will continue to grow as new approaches are pursued. Our own share in this growing trade will depend not only on how we deal with recurrent legislative impediments to expansion, but also on how aggressively our businessmen pursue eastern market opportunities.

What are some of these opportunities specifically?

So far this year the top U.S. sales to the Soviet Union—following wheat, corn, and soybeans, of course, which are always high on the list—have been such diverse exports as plastic tape, anti-pollution equipment, heat exchangers, chemical catalysts, metallurgical molds, construction tractors, and gear-cutting machinery. Sales of oil field equipment of all types, including pumps, regulator valves, and seamless pipe—will amount to tens of millions of dollars this year.

With sales of $2.3 billion worth of goods to the Soviet Union last year, the United States captured 20 percent of all purchases by the Soviet Union from the industrialized west. But the shocking fact is that we are proportionately way behind in sales of manufactured goods. After all, as I said, our top exports to the U.S.S.R. are wheat, corn and soybeans. This in itself is fine. But while other western countries were selling them $950 million worth of chemicals, our sales came to only $37 million. And while other western countries sold them over $7 billion worth of machinery and semi-manufactures, our sales amounted to only $720 million.

Areas in which we could do much better relative to other western countries are, among others, metalworking machinery, machinery for the pulp and paper industries, heat treating equipment, gas pumps and compressors, mechanical handling equipment, and all kinds of electrical machinery and apparatus, including automatic and control equipment. These are just a few quick examples. The Bureau of East-West Trade can supply you with more detailed information about the market for your own particular products.

The programs of the Bureau of East-West Trade support the entry of U.S. firms into communist country markets. We help them deal more easily with and compete in these unfamiliar markets. We sponsor American business participation in exhibitions and trade missions in these nations. We work directly with communist country officials to enable our businessmen to exploit their opportunities as effectively as possible. We provide advice and technical assistance in publications and seminars to answer questions on how to do business with the communist nations. The commercial counselors in our embassies, our Moscow, Warsaw and Vienna offices, and the trade specialists at our 43 Department of Commerce field offices throughout the United States provide direct assistance to U.S. firms.

A FIVE-POINT PROGRAM FOR ACTION

If we are unable to understand and overcome existing obstacles to trade with the Soviet Union and the countries of Eastern Europe, our share could be even smaller than it is today and we could be deprived of significant economic benefits that our western competitors will gladly absorb. Conversely, if we succeed in smoothing out these trading relationships, American manufactured goods exports to the U.S.S.R. and Eastern Europe could become four or five times greater ten years from now than they are at present.

I have pointed out the benefits I see in U.S.-Soviet trade expansion, the real and apparent problems, and the opportunities that could lie ahead. President Carter wants increased trade. The American people want it. The American business community wants it.

What can be done? I offer the following five-point program:

1. Increase U.S. public understanding and dialogue on the important issues of U.S.-Soviet trade.
2. Identify carefully the business opportunities that exist for American firms.
3. Pursue these business opportunities vigorously with the help of the Department of Commerce's Bureau of East-West Trade.
4. Improve the bilateral and multilateral structures and mechanisms so necessary to develop a sound infrastructure for trade between these two super-powers, and
5. Adopt a national policy of commitment to strengthen this overlapping interest.

Those of you here today have a part to play in expanding commerce with the Soviet Union. You have a stake in it. I urge you to act now.

TOM McGINNIS—INNOCENT AND 18 MONTHS IN A BOLIVIAN JAIL

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 5, 1977

Mr. HANSEN. Mr Speaker, the fight to obtain a release for Tom McGinnis and the other Americans being held in Bolivian jails has been a long and complicated one. I have been encouraged by the progress we have made and the gradual release of some of the prisoners but unfortunately the wheels of justice in Bolivia turn painfully slow. To help "grease" those wheels I went to Bolivia in August of this year and met for long hours with several American and Bolivian officials at all levels as well as with the attorneys and the prisoners themselves. As a result of that visit I received the assurance by the Bolivian Government that immediate steps would be taken to release those who had completed their obligations and those who were being held with insufficient evidence of wrongdoing. Also, we succeeded in having some Bolivian laws modified and the judicial system streamlined by eliminating one of three review steps normally required. Still the process has been excruciatingly slow for the prisoners and their families in the States.

On the positive side, in Tom McGinnis' case the prosecuting attorneys have admitted that there is not sufficient evidence and they have recommended no prosecution. The Bolivian system is different from ours, unfortunately; and Tom's fate still rests with the judges who will review the case. Another positive note was the recent release on parole of 5 American prisoners including Ken McDonald of Coeur d'Alene.

I have also been coordinating a meeting between various Members of Congress and the President to discuss the Bolivian prisoner problem and hopefully bring

some executive pressure to further help obtain their release.

At the moment Tom's case is in the hands of the lower court which has promised a decision during the first part of December. His case will then go to the superior court, but thanks to our efforts last August that process will not take nearly as long. Hopefully Tom can be released very soon. Needless to say, I will continue to press for his release, as well as the other Americans being held in Bolivian jails wrongfully and at great personal hardship to their families back home.
